756	John	Simpson	-		Object	<p>Objection to proposed changes to the Green Belt, Urban Boundary & Countryside as shown on the South West map in relation to land parcels 30 & 31. - - NPPF paragraph 79 states that 'The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.' One of the 5 purposes of the Green Belt is 'to assist in safeguarding the countryside from encroachment.' (NPPF Para 80 – number 3). - - The proposed changes to the Green Belt boundary in Helmshore are contrary to these aims for the following reasons: - - In the assessment criteria for Purpose 3 (NPPF Green Belt Purposes – to assist in safeguarding the countryside from encroachment) a Moderate rating is where a 'parcel of land contains the characteristics of countryside, has limited urbanising development, & is relatively open.' - - The current Green Belt boundary is clearly defined by Helmshore Road & Free Lane. In 'The Green Belt Review' document para 3.19 in terms of permanence 'it is recognised that there are benefits in using features which are clearly defined & which also play a physical and/or visual role in separating town and countryside to act as Green Belt boundaries.' - - There are no such strong physical features to define the proposed new Green Belt boundaries & therefore there is nothing to prevent incremental encroachment into the Green Belt in the future. - - By moving the boundary away from the roads, & so allowing the potential for development/urbanisation on the land released, the Green Belt would lose the essential characteristic of openness it currently has in this area of Helmshore. - - Land Parcel 30 - In the proposed changes to the Green Belt, Urban Boundary and Countryside document Land Parcel 30's notes on Purpose 3 state that 'there is a sense of encroachment with the parcel as a result of a cluster of residential properties, facilities of Sunnybank Social Club and a children's play area' so that 'the north of the parcel has a somewhat weakened rural character.' - - This assessment does not take into account the length of time the properties etc have been situated here, nor the fact that they have not been classed as 'encroachment' in previous Local Plan reviews, where they have been included within the Green Belt boundary. - - Sunnybank Social Club and Helmshore Memorial Park (which includes the playground) have both been in their locations for over 100 years. Likewise the residential properties are mainly a farmhouse and cottage which have been on site for over 300 years, with associated farm buildings having been converted or re-built on the original building's footprint. In this respect there has been no recent 'encroachment'. Other buildings/structures associated with equestrian use are recognised as accepted use in rural areas (Rossendale Borough Council's Core Policy LT5). - - The Review of the Green Belt considers that the Potential Degree of Harm caused by the removal of this area from the Green Belt to be Medium. However, this parcel is adjoining a</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>large area of land where the Degree of Harm is considered High. If this parcel were to be removed the threat to the Green Belt would be increased. - - NPPF Para 81 states that 'once Green Belts have been defined, local planning authorities should plan positively ... to retain and enhance landscapes, visual amenity and biodiversity.' Therefore this parcel of land should remain within the Green Belt, not only for its own value, but also to protect this whole section of Green Belt and the adjoining Biological Heritage Site (BHS). - - Draft Local Plan - There are various policies in the draft Local Plan which strongly support the case of the Green Belt boundary not being moved in this part of Helmshore: - - Policy ENV4: Landscape Character and Quality - 'In order to protect and enhance the character and quality of the landscape, development proposals should: - •Retain and, where possible, enhance key views' - - 'The Borough's landscape is significant in terms of its local identity ... and general contribution to quality of life and it is essential that it is protected.' - - Whilst the council are proposing the above policy for new builds, the same protection should be applied to existing properties. Visitors often comment that views from the properties at Tor View Farm are considered some of the best in Rossendale. Indeed the views were considered a selling point when one of the properties was recently up for sale. - - Policy ENV5: Biodiversity, Geodiversity and Ecological Networks - 'Ecological networks should be conserved, enhanced and expanded.' - - NPPF Para109 also states that 'the planning system should contribute to and enhance the natural and local environment by: - •Recognising the wider benefits of ecosystem services; - •Minimising impacts on biodiversity and providing net gains in biodiversity where possible, contributing to the Government's commitment to halt the overall decline in biodiversity, including establishing coherent ecological networks that are more resilient to current and future pressures.' - - This parcel of land forms part of the ecological network in Helmshore, allowing linkages between the different areas of landscape and biodiversity. If these linkages are broken this would leave wildlife vulnerable as a result of the loss of habitat, pressure on remaining habitat etc. The serious decline in various species of British wildlife is well documented and by releasing even small parcels of land for development further pressure is placed on the remaining habitats and the populations these can realistically support. - - Policy ENV6: Green Infrastructure - 'Schemes which would result in a net loss of green infrastructure on-site will only be permitted if: - • The proposals would not have an unacceptable impact on amenity, surface water - run-off, nature conservation or the integrity of the green infrastructure network. - - Green Infrastructure refers to the network of Rossendale's multi-functional green spaces, corridors and waterways ("blue infrastructure"), which provide multiple social, environmental benefits, and enhance quality of life. It has an important role in providing habitats and migratory routes for many plants and animals.' - - NPPF Para 114 also states that ' Local planning</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>authorities should: - •Set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity and green infrastructure.' - - The above policies (local and national) support my previous comments about loss of habitat and maintaining links and ecological corridors. In addition the reference that green infrastructure should 'enhance quality of life' is particularly relevant as the removal of this land from Green Belt and the protection from development which that status currently provides would have a detrimental effect on the quality of life enjoyed not only by the current residents in the properties at Tor View Farm, but also those at Snig Hole and in the immediate surrounding area, visitors to Helmsshore Memorial Park, and those using the Public Right of Way and National Cycle Route. - - Land Parcel 31 - Many of the points raised in relation to Land Parcel 30 are also relevant to Parcel 31. For brevity I won't repeat them but these should be recorded as part of my objection. - - However I would repeat the point about the proposed new Green Belt boundary not having a permanent physical feature to provide a strong boundary. - - Part of the adjacent Biological Heritage Site falls outside the proposed Green Belt boundary which could make this section vulnerable from development and fragmentation. - - Given all of the above the Green Belt boundary in this part of Helmsshore should remain where it is currently to prevent inappropriate and unnecessary development, to protect ecological networks and biodiversity in the area and safeguard the integrity of Green Belt beyond the Local Plan period. - -</p>		
791	Graham	Shuttleworth	-	Between HS2.56 and HS2.58	Object	<p>This appears to be a cynical land grab, proposing to take historic farmland, with seemingly little consideration for the impacts of a number of matters. - - Flood defence. This is a vulnerable area, that is prone to flooding and is a key soakaway site for the locality. - - Traffic. This area regularly suffers due to the large volumes of users using the leisure facilities at Marl Pits. The thought of adding to this high density, high use area seems at best ill-conceived. - - Leisure and Health. The field to the west of Marl Pits Leisure Centre is superbly seen by a range of people of ages for horse riding, running, dog walking and cycling. To remove this community facility would surely be detrimental to the forward thinking health and well-being of the borough. - - Nature and Environment. I have witnessed a huge diversity of wildlife in this field already this year, including amphibians, bats, owls, badgers, foxes and deer. Woodpeckers returned and nests this year, amongst a host of wild birds and wild flowers that inhabit at this field throughout the four seasons. - - It is an essential community asset, for so many reasons and the long standing, green field use sets a clear precedent that should be respected and retained. - - There are many brown field areas that must be looked at for redevelopment and this is where the council must focus.</p>		<p>The green space is the very asset that makes Rawtenstall and the Roseendale valley such a valued and enviable asset for locals, visitors and investors alike. Please do not seek to needlessly damage and erode that which makes the borough so special and unique, instead we should be looking at ways in which we can improve and enhance our natural environment and protected green belt.</p>

792	Lisa	Struthers	-		Object	I would like to object the movement of the current urban boundary to the proposed new boundary. - Having only lived in the area a short time I have seen excessive traffic due to events at Marl Pits Sports Center and parking which has been quite frankly dangerous on Newchurch Road during such events. I believe that the movement of the boundary will in the future, increase congestion/traffic, as it is possible that properties would be built on that land. - I also believe that the loss of local wildlife would be devastating to the local habitat and the surrounding countryside, along with the recreational ground for walkers, runners and cyclists.		I have also been lead to believe that the existing boundary was put in place to protect historical farmland and the wonderful surrounding countryside.
794	Dale	Norman	-	HS2.56	Object	I am writing in objection to the proposal to alter the urban boundary between Mark Pits and Waingate Close just off Newchurch Rd. The area in question is currently a scenic piece of countryside which Rossendale should be proud of. It is used by walkers, runners, old and young and brings great pleasure to all who use it - having the countryside right on our doorstep. Please note I say countryside as that is exactly what this land is and most definitely not "urban land" It is a habitat for all kinds of wildlife from bats and birds of prey to rodents and fauna and gives access and pleasure to people who may not usually seek out such environments. - The main concern and thus objection to this proposal which is ultimately a crafty way of opening this land up for development is the congestion this will cause all around the surrounding area. Newchurch Rd at the opening to Mark Pits is absolute chaos most evenings and weekends whenever there is something on. To even think about developing land with access through a busy car park is ludicrous and shows the lack of thought. The traffic on Newchurch Rd at rush hour is at standstill and this would just add to that. Before any further houses are built in Rawtenstall I would suggest someone look at easing the chaos around Rawtenstall centre, at the junction near the Market, on Burnley Rd and on Bacup Rd as surely a priority should be to resolve these issues before adding to it? The infrastructure needs vast improvement - the state of the roads all through Rawtenstall are worn out and covered with potholes. - Rossendale is a unique, gorgeous place to live, however I fear that the things which make it just that are the same things that are are being sacrificed to fill the back pockets of large corporate developers. -		I have lived in Rossendale all my life and am excited about all the development going on in and around Rawtenstall.....the new bars and restaurants and the new bus station, however for all this to work the problems of congestion needs to be rectified. Adding more and more houses and thus vehicles into this before it is resolved will cause gridlock almost constantly. - These proposals need to be thought about very carefully and the consequences of them to the surrounding areas.

802	Dean and Diana	Hebden	-	HS2.56	Object	<p>The alteration of this boundary will change the field adjoining Marl Pits to Waingate Village, from a very pleasant field to a potential site for housing development, which we feel would be detrimental to the area. Access to this site would lead to congestion as the road is already busy with traffic to and from the Leisure centre, Rugby and Football pitches, Athletic club, regular events at Marl Pits Sports pitches eg. Cancer Research Relay for Life, Cross Country events, weekend and evening football and rugby matches and it is also access for the Rossendale golf range and a developing new garden centre, the impact of which is yet unknown as this will be opened in the new year. This could cause potential problems and will increase traffic flow along Newchurch Road into Rawtenstall centre, which is already very busy. - There is currently a boundary which is marked by original walling stones which we believe are over 200 years old and these should be preserved as they are becoming more and more rare and are part of the heritage of the area. - The field is currently used by many local people who walk along there as a pleasant route to and from Waingate to Marl Pits and the school children use it as access to Alder Grange as a short cut to and from school. It is also used by dog walkers as it is one of the areas where dogs can safely be let off the lead. It is also part of the Rossendale Round the Hills walk and the Rossendale athletic club and schools often use it as part of their cross country training routes and the popular annual Rossendale Triathlon event uses the field for their running race. - The field is often extremely wet and boggy, hence the origin of the name, marl pits. "Marl or marlstone is a calcium carbonate or lime-rich mud or mudstone which contains variable amounts of clays and silt. The dominant carbonate mineral in most marls is calcite, but other carbonate minerals such as aragonite, dolomite, and siderite may be present". (Ref: Wikipedia) This helps it to retain water and would make it very difficult to build on and may cause future problems with the potential to flood and there were indeed problems when building the Marl Pits houses which have thankfully stood now for almost 20 years without issue (as far as we know) but it is rumoured that a large piece of heavy plant machinery which was lost in the marl during building process! - This field is also habitat to an abundance of wildlife and the benefit to us humans is huge and more evidence is emerging about how important these green spaces are to health and well being. We have seen foxes, deer and many species of birds, flora and fauna and we ask that the boundary is not changed from countryside to urban land which would jeopardise the ecosystem of the field.</p>		<p>We ask that all future developments have regard for current residents and know from personal experience, the sadness that loss of open spaces can have on physical and mental health. As these spaces are eroded and opportunities to roam become lessened, the ease of access to open fields becomes more and more difficult. It is true that we have hills to walk on, but not everyone is able to access them and this relatively gently undulating field is often used by people who may not have the option to climb the steep hills which surround Rossendale. This particular field enables many people to exercise gently and take their dog out and to give it a much needed run around without endangering farm animals. - Please also consider the height of new houses as the 3 storey blocks take away peoples light and privacy and can soon dominate the area and look out of place with the older properties and spoil everyone's view. - We have tried to find out why there is a 5 bar gate appeared at one end of the field (adjacent to the car park at Marl Pits). This would allow vehicular access and as far as we are aware this a footpath access only so would ask for clarification on this matter (I have submitted a request for this information to LCC but have heard nothing yet). - Many thanks for your consideration on this matter.</p>

804	David	Booth		HS2.56	Object	This proposal is a nonsense, and is doomed before it even begins,, Access , Parking things that are already a problem in Marl Pits area, and would only be worse should this development be allowed! - This area is constantly used for recreation, walkers, cycling, running and children going to school, and last but not least the Wildlife would all so suffer, Bats and Birdlife which all have established habitats in this area, and not forgetting the protected Badger life which is very well established. - In conclusion this field is countryside and has been for years! and NOT urban, this proposal should not get the green light, it is not only impractical , and as always PEOPLE yes PEOPLE have not been given a thought it seems. - I, m sorry but thats how I feel and I suspect I, m not alone and before i finish has anybody thought about the infrastructure drainage ect ect. - Regards D. Booth		-
806	Peter	Hargreaves	-	Marl Pits area	Object	I don't want extension of the local plan around Marl Pits extended. Reasons are :- - Concerns about parking / traffic, - - Disturbance of local wildlife such as Bats, Birds of prey, Badgers and Foxes etc. The field behind Marl Pits is countryside not urban land. So it should not be designated urban land but still countryside.		-
813	Janet	Hollinson	-	Haslingden and Rising Bridge area	Object	We have on several occasions complained about parking on Rising Bridge Road to no avail. The impact of more units on Rising Bridge Road will be devastating. The Council has no regard for residents. Their employees park illegally everyday on a yellow line with no penalties ever being given. They have no respect for the residents. Building more units on Rising Bridge Road will only increase the problem. We are also concerned about more units being put on the A56. Why build more when there are plenty of empty units, We have only lived here 3 years and the increase in traffic is incredible. It is becoming apparent that only when a fatal accident happens will Rossendale Council consider doing something.		-
825	Claire	Smith	-	SHLAA16196 Land South of Hawthorn Farm and to the east of Goodshaw Lane	Object	Road Safety : More houses will mean more cars on this narrow lane. Goodshaw Lane is used daily by around 40 parents & children walking to Crawshawbooth Primary school & home. The majority of this lane is single track with no pavements. The lane is already very busy and is especially congested & parking a problem when any services are held at St Mary's & All Saints church including funerals. The lane also provides access to countryside & recreational land for walkers, cyclists and horse riders. Elderly people resident at Harvey Longworth Court regularly access the lane on foot. None of these will mix well with increased vehicular movements. - - Emergency access: Emergency service vehicles have a difficult task trying to negotiate both Goodshaw avenue & Goodshaw Lane without the prospect of more traffic - - Flooding: Goodshaw Lane suffers from surface water flooding and any extra building and reduction in run off would increase this problem.		-

854	Pauline	Smith	-	Proposed housing site, field behind Marl Pits and Waingate Village	Object	Access to the site and parking issues - There is already congestion caused by Marl Pits Sports Centre at the entrance and around Newchurch Road as well as parking issues in the area caused by the sports centre, If further development was allowed in the area it would make this even worse. - There would be a loss of area used for recreation, walking, cycling and running. It would also mean that local wildlife would lose their habitat. There are bats and birds of prey who hunt on the field, it is countryside NOT urban land. - There is also concern with regard to drainage and flooding from the stream at the bottom of the field, which has occurred in the past.		-

948	David	Ashworth	-	Urban boundary, Lomas Lane, Rawtenstall, BB4	Object	<p>In 2014, I sent X a detailed submission, including a sketch map, concerning the urban boundary adjacent to Balladen hamlet. I will send a hard copy of both this email and that from 2014 to you under separate cover. - Essentially, I made the case for the boundary to be amended to exclude the anomalous finger of land along Lomas lane which included Bess Nook cottages and Plane Tree House. This peninsula of land inside the boundary was included some years ago despite the absence of any rationale or evidence in support. I understand that the Rossendale Civic Trust has also raised this issue with the planning authority. - - I was assured that my submission would be considered under the Local Plan review but I can find no reference to it within the consultation feedback documentation. I suppose I may have missed it in the mass of paperwork but, just in case, I wish to formally request that specific reference to and justification for its inclusion in the boundary is explicit in the Plan if it is proposed to retain its inclusion inside the Urban Boundary. - Obviously, I would prefer common sense to prevail and for the land in question to return to its previous status outside the Urban Boundary. I understand that one of the purposes of the Review is to "tidy up" the Boundary by including or excluding land in order for the Boundary to make sense in both planning and geographic terms. My extremely minor proposal seems to conform to these aspirations and I therefore hope you will amend your proposals accordingly.</p> <p>Copy of email dated 17.04.2014 Hello X. Thank you for your very full reply to my email. Firstly, yes, I would like to be included on the list of consultees for the next stage of the boundary revision process please. Secondly I would like to propose an amendment to the current urban boundary insofar as it affects Balladen hamlet. As I previously explained, I cannot find any reason/justification in the records why Bess Nook cottages and Plane Tree House were included in the urban boundary. I can only imagine that the reason for this extraordinary "finger" extending out from the coherent boundary, is that, at some time, someone decided that: either all properties to the west of Lomas Lane should be included in the urban boundary or; that all properties to the north/north east of Balladen Brook should be included. Neither of these explanations stands up to serious scrutiny. If the former was applied, Horncliffe Mount Farm and Sheffield Gate Cottage would have to be included. If the latter reflects the rationale, all the properties in Balladen hamlet, with the exception of Oak Villa, Horncliffe Mount Farm and Sheffield Gate Cottage would have to be included I Bess Nook Cottages and Plane Tree House have always been not only at the gateway to the hamlet but very much part of it. Both date back to the early</p>		No thank you - other than to express great sympathy for the Council in its efforts to produce a Plan which satisfies the requirements of government, business and the electorate. All this in the face of draconian budget cuts and consequent staff reductions. GOOD LUCK!!

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>19th century. Their membership of the Balladen (countryside) hamlet is further and, in my view, convincingly reinforced by the local topography. Balladen Brook flows down behind Plane Tree House and Bess Nook and, after it has passed them, flows in a northwesterly direction down along the rear of Redwood Drive which forms the edge of the current urban boundary. This "edge" is in fact a very steep escarpment which, importantly, runs, increasingly steeply, from Lower Clowes in a southeasterly direction towards Balladen before swinging eastwards, behind (to the south of) the Cherry Crescent cui de sac, until it meets Lomas Lane north of Bess Nook. The Brook itself flows in a deep ravine which broadens just to the north of Bess Nook where another water course, previously dammed to make a (now redundant) lodge, joins it. This steeply descending water course is bounded to the north by the escarpment to which I refer above.</p> <p>The import of all this is that, between the cui de sac of Cherry Crescent and Bess Nook there is a huge, natural divide - not just a road or a hedge but a steep gulley/ravine which effectively separates Balladen hamlet from its nearest urban neighbours and, one could argue, creates its unique identity. The current "extended finger" of urban boundary into the countryside at Balladen hamlet makes no sense in terms of coherence, planning, history, topography or simple logic. It is, in short, an aberration. However, thankfully, it is one which can be simply corrected by making the urban boundary coterminous with the southern boundary of the Redwood Drive/Cherry Crescent housing estate. I enclose a map (rather amateurish I'm afraid) which I hope illustrates the points I am making.</p> <p>I hope that these comments are helpful to you in your review of the urban boundary and that you will agree with my analysis and proposal. Would you please be kind enough to acknowledge receipt of this email? Thank you.</p> <p>Please see appendix for sketch.</p>

1042	John	Lord	LANXESS Urethanes UK Ltd		Object	<p>Proposed Urban Boundary - - The proposed Urban Boundary includes land within the companies' ownership immediately adjacent to its single access road. This line is drawn too tightly and significantly restricts the development potential of allocation EMP2.35, and unallocated land south of the companies' access road between EMP2.35 and Rising Bridge Lane. - Further, the boundary as drawn fails to take account of the continuation of the urban area to the east of Rising Bridge Road at EMP2.38. - - We propose that a minor amendment be made to the Urban Boundary, for the urban area to include the area immediately to the west of Rising Bridge Road between the companies' access road and Roundhill Lane. The attached plan shows the area of land referred to. - - Proposed Green Belt - - The proposed Green Belt boundary extension includes land within the companies' ownership immediately adjacent to and south of its existing access road. Inclusion of this land within the Green Belt would significantly restrict the potential development of area EMP2.35 and the unallocated land between EMP2.35 and Rising Bridge Lane. - - We believe that the contribution of this area of land to Green Belt principles is very limited and that the impact on achievement of objectives of the Green Belt will be unaffected by this change. - - We propose that a minor amendment be made to the Green Belt boundary for it to exclude the area immediately to the west of Rising Bridge Road between the companies' access road and Roundhill Lane. The attached plan shows the area referred to. -</p> <p>Please see the plan in appendix.</p>		I would like to upload a plan referencing the companies' proposed changes to Policy SD2: Urban Boundary and Green Belt, but can see no capability to do so. - I should be grateful for the opportunity to do so for this to form part of your consideration.

1061	Rachael	Rogers	-	HS2.50; HS2.52; HS2.49; HS2.47; HS2.51 and	Object	<p>The propped extra houses in the HS2 sites quoted above will further exacerbate traffic issues within the valley. - - In the first instance Goodshaw Lane is a single track road in beautiful surroundings which is currently used extensively by cyclists and walkers thus promoting a healthier lifestyle. The extra traffic already on the lane caused by the extensions at Willows, Wags and Whiskers is problematic when walking children to the primary school which backs into the lane - children have to squash against the sides as the cars rush past (There is little paved area). This is a concern for the safety of both children and cyclists not to mention a potential reduction in the number of people selecting to walk - when as one of the most unhealthy areas of the country we are seeking to promote healthier lifestyles. - - Secondly Burnley Road will also struggle to accommodate the extra traffic. The traffic on a morning queuing to get through Rawtenstall enroute to Manchester currently can extend as far as Reeds Holme. This will only become worse with the extra houses and subsequent vehicles. - - The propped extra houses in the HS2 sites quoted above will also need to be accommodated by the local Primary School. This year alone many local children were unable to access a place at Crawshawbooth School unless they had a sibling already attending. This results in children having to travel further to schools with the associated extra cars in the road. The only option would be to extend the school for which there is no facility. An extension would require a double form entry ensuring that the school lost its identity as a village school. In addition to this there have already been a number of 'near misses' involving children and cars around the school increasing numbers will only make the situation worse. - - Changing the urban boundary in the site near the Old Baptist Chapel and Hawthorn Farm will alter the whole setting for the Chapel (a protected English Heritage site). The Chapel is the oldest Baptist church in the country and enjoys visitors from across the world. This is a 'jewel' of Rossendale which should be preserved and protected in its natural setting.</p>		no

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
1093	Guy	Thomas	-	Proposed changes to green belt, urban boundary & countryside - Regulation 18	Object	<p>There are a number of reasons why this proposal to move the urban boundary should be rejected.</p> <p>1. Road Safety - Goodshaw Lane is a single track lane that has no pavements, limited parking and contains a number of blind bends. The lane is accessed by children on their way to and from Crawshawbooth Primary School, the attached recreational area and the outdoor classroom. There are also many footpaths accessed directly from Goodshaw Lane and walker's journey up and down the lane to get from one path to another. Horses with riders are a daily occurrence. Elderly people resident at Harvey Longworth Court regularly access the lane on foot.</p> <p>2. The building of any houses would significantly increase the number of vehicles accessing the lane and almost certainly lead to overspill parking. This would adversely affect the safety of all users of the lane and create significant conflict between pedestrians, cyclists and motor vehicle drivers.</p> <p>3. An increase in the amount of vehicles and on road parking on or around this part of Goodshaw Lane would also worsen the already critical problem of access for larger vehicles. Council service vehicles already have problems accessing all areas of the lane and, at certain times, emergency vehicles would simply not be able to attend an incident.</p> <p>4. Grade II listed Church of St Mary and All Saints - The proposed change to the urban boundary to enable development would significantly affect the setting of this important, graded local building. It would also have a detrimental impact upon those parishioners who use this church, which is now the sole remaining Church of England place of worship for the parish.</p> <p>5. Impact upon biodiversity - The area under review includes a bat roost which would be totally destroyed in the event of any development. All bat species along with their breeding sites and resting places are, as I am sure you are aware, fully protected by law.</p> <p>6. The local hay meadow to the east of Goodshaw Lane, which has never been used for housing and is part of the countryside, would also be destroyed in the event of any development.</p> <p>7. Core Strategy Development Plan Document: The Way Forward (2011 - 2026) - This document states that housing will be focussed on Rawtenstall with no major development in Goodshaw and that the integrity of existing open spaces will be maintained. It also states that walking and cycling improvements in Goodshaw will offer improved countryside access. Whilst the core strategy document will be replaced by the Local Plan once it is formally issued, we assume that these same commitments will be taken up by the Planning Office going forward. Changing the urban boundary to facilitate major, additional development contravenes these commitments.</p> <p>8. Bringing countryside into the Urban Boundary opposite St Marys and All Saints Church would be the least sympathetic place to do so if upholding the twin vision of maintaining the integrity of current open spaces and improving walking and cycling access to the countryside remains a true aspiration of the Planning Office.</p> <p>9. Creation of Precedent - The area to the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						east of Goodshaw Lane has always, with good reason, enjoyed protection from development and many such applications have been refused with potential developers being told that there is enough land elsewhere for development. This situation has not changed and many sites within the current Urban Boundary, but not shown in the draft local plan, could be identified as appropriate sites. - Any opening up of the countryside to the east of Goodshaw Lane to new-build developments would set a precedent and make it difficult to refuse similar developments on similar sites in the future. The ongoing loss of countryside is then inevitable.		
1108	Margaret	Bretherton	-		to alter the existing urban boundary in respect of the field behind Marl Pits and Waingate Close	Object		
						With regard to the proposal to alter the existing urban boundary in respect of the field behind Marl Pits and Waingate Close. I would strongly like to register my objection to this proposal for several reasons:- - ENVIRONMENT - We would be losing an area well used for recreation - walking, cycling, running etc. all my family enjoy this area. - I believe that the urban boundary was originally set where it is to protect this area of historical farmland and countryside and to move it in readiness for development would be absolutely preposterous. The field is countryside and NOT urban land. - ACCESS AND PARKING ISSUES - There is enough congestion already caused by the Sports Centre entrance and around Newchurch Road - DRAINAGE - I remember previous flooding issues on the field. - - I trust you will take the above issues into consideration and leave the field as it was intended. - Thank you - Margaret Bretherton

1149	EMMA	SMURTHWAIT - E			Object	<p>The proposed movement of the urban boundary is unsafe. To go ahead with this proposal would put local children at considerable risk and in my opinion the council would be wholly responsible if a child was injured which is almost inevitable. Goodshaw Lane is already extremely congested at school times. It would be unsafe to allow more traffic through this narrow lane which in many places is single track. To increase traffic on the lane would make it unsafe out of school hours too as children use the lane for cycling and walking in preference to the already dangerous Burnley Road. As a school governor I think this proposal is putting the heart of our community at risk. - - There has not been proper consultations with local people. I first found out about it this weekend. The consultation period needs to be longer so that proper public opinion can be sought.</p> <p>Email received 09/10/2017: I am writing with grave concerns about the proposal to change the urban boundary on Goodshaw Lane. This lane is already very congested at times as it is a single lane in many areas. It becomes particularly congested at school pick up and drop off and it's incredible that a child has not been injured with the current traffic. As a school governor at Crawshawbooth Primary school I believe this plan will put our local children in jeopardy and I am certain there will be an incident with increased throughput of traffic on the lane. Parents choose to drop their children off on Goodshaw Lane as it is safer currently than Burnley Road, but this will change. Goodshaw Lane is not suitable for further increase in traffic as residents already use the lane for parking. It is frankly a dangerous idea to build more houses. In addition the entry to Crawshawbooth Primary is at maximum and therefore any additional residents will probably have to travel to get to school In addition the lane is an area of natural beauty so even outside school hours children use the lane with their families to cycle and walk. It is not unusual to encounter families on the lane and additional traffic will put them at risk too. Horse riders also frequent the lane instead of using Burnley Road. We should keep the countryside as it is and not make Goodshaw Lane a major thoroughfare which it could not be without significant investment. Happy to discuss further. I also have a petition that has been signed by many.</p>		Yes. I will put them in writing

1154	Glyn	Smurthwaite	-		Alteration of urban boundary goodshaw lane crawshawbooth reg 18 draft 2019-2034	Object There is a wealth of Brown field land in rossendale that should be prioritised for development before green field sites. - Goodshaw lane is narrow and single track and is already heavily used with traffic. - On a normal school day the road is blocked at drop off and pick up times at crawshawbooth primary school. - The vehicular access to the proposed expansion of urban boundary is all single track. - This would snarl up the area and create chaos.Necessary emergency vehicular access would be a challenge. - The local primary school is at CAPPED numbers and is not allowed by the LEA to accept more children. Any children living in the proposed area will therefore need bussing elsewhere -this would create further transport danger. - The likely traffic volume increase would create a real risk in terms of traffic accidents, restricted emergency access and service access such as post office, him collection add would be hugely compromise		Do not allow this dangerous (due to traffic/transport dangers) proposal to pass
1157	Debbie	Horrocks	Whitworth Action & Greenbelt Group	Whitworth	Whitworth	Object I think it's ludicrous to even think about this.I have several objections.One is traffic,I travel 3miles to work daily,for this I have to allow 40/45mins due to sheer volume of traffic.If there are temporary traffic lights need add at least another 15mins & this is happening too frequently.I know people who won't look at buying houses in this area due to this ongoing problem of getting in & out what is ludicrously now called a "village". Trying to get a doctors appointment is an absolute joke it is usual to be told 2/3 weeks,on numerous occasions I have had to go to the walk in centre to been seen by a doctor.Is this right?Schools are struggling with accommodating pupils already & with their budgets already having been decreased a huge amount how will this work? - Flooding has been a problem over recent years probably due to building,old/inefficient drainage & the lack of maintenance.How will your proposals help?There is also the animals habitat to think of here.We have been blessed with various different animals over the years that people enjoy,they would certainly diminish.If this plan was to go ahead I for one will be out of Whitworth.		No to cross to mention them right now

1200	Simon	Butler	-	Parcel Ref 74 - Hallfold	Object	<p>I note from your recent consultation documentation that you are reviewing green belt land within the Rossendale area. Please accept this communication as my formal appeal against the release of Parcel Ref 74. Your consultation documentation is dated as of 23 November 2016 and has been compiled by XX and XX. For clarification there are two pieces of sub area which have been identified for potential release; one of these parcels of land has already been subject to two planning applications which have been rejected at both a local planning authority level and by the Governments Inspectorate appointed by the Secretary of State for Communities and Local Government and I have attached some of their comments below which counter argue the mitigating points put forward in your report. The Parcel of land should be removed from the consultation process as it is clearly within Green Belt, has a clearly definable boundary and significantly contributes to the openness of the Countryside. Whilst I appreciate the local authority trying to address some of the housing issues within the area the amount of land would only be able to support one dwelling which would have no significant impact on the housing plan but would have a detrimental affect on the openness of the Green Belt. Within your consultation report you have listed Parcel Ref 74 as "High" with regard to the degree of harm to the area in releasing this land. The report has also listed the plot as Strong with regards to Points 1a, 1b, 3. These three Points refer to: 1a which is to check the unrestricted spread of large built up areas, - 1b to identify if the Parcel protects open land from the potential for urban sprawl to occur, - 3 to assist in the safeguarding of the countryside from encroachment. The Parcel has no contribution to point 2 which is to prevent neighbouring towns merging into one another and Point 4 is listed as Moderate, point 4 is to preserve the setting of special character of historic towns. - - They have also listed a number of potential mitigation points to be considered with regards to these plots. This mitigation includes: - - 1) Development within the sub area should be restricted to appropriate and attractive small scale of low density building - 2)New properties should be a maximum of two storeys to minimise the negative impact on the openness of the adjacent Green Belt land and view from the wider landscape. - 3) The dry stone walls that bound the sub area should be rebuilt and enhanced. - 4) A framework of boundary planting should be developed to soften the appearance of any new development and reduce the negative effect of the openness on the neighbouring Green Belt land. - - Both Government Inspectorates have considered all mitigation and believe that development within this area is harmful to the openness of the Green Belt. The last Government Inspectorates decision was delivered in May 2017 which is significantly later than your consultation document and therefore more up to date with its considerations. The second Parcel of land identified in Parcel Ref 74 is currently farmland owned by Lower Fold Head farm and is completely</p>		To object the release of Parcel Ref 74 as per the Rossendale Greenbelt review

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>separated from the Parcel of land that has had previous planning applications submitted. The dry stone walls that your report refers to are part of the farm landscape and I do not see how agricultural land can be identified as anything other than Green Belt Land. Farmers should be encouraged and supported to maintain their Green Belt land and therefore this land should be removed from the consultation process. The government's inspectorates have both communicated that the land identified in Parcel Ref 74 has clearly definable boundaries that separate it from the urbanisation of Whitworth Village, by allowing this allocated sub area to be built upon you do not have any clearly definable boundaries and therefore are not protecting the openness of the Green Belt. Future developments will then follow as you will have allowed urbanisation sprawl into a clearly defined Green Belt area and on this basis I object to your proposals. Below are some of the comments made by the Building Inspectorate. -XXX BSc (Hons) DipTPMRTPI - site visit 10 April 2017 - Decision date 3 May 2017 - The Framework indicates that inappropriate development is, by definition, harmful to the Green Belt and should not be approved, except in very special circumstances. Very special circumstances will not exist unless the harm to the Green Belt and any other harm identified is clearly outweighed by other considerations. The harm by reason of inappropriateness and the adverse effect on the openness of the Green Belt are clearly not outweighed by the other considerations outlined above. The grounds presented in support of the development have been considered but together they do not outweigh the harm the scheme would cause. Consequently, the very special circumstances necessary to justify the development have not been demonstrated. - - The proposal would therefore conflict with Policy 23 of the Rossendale Borough Council Core Strategy Development Plan Document – The Way Forward 2011 (CS) which aims to ensure that new development maintains the relationship between urban areas and the countryside. Furthermore, the proposal fails to represent one of the types of developments considered acceptable within the countryside as detailed within Policy 21 of the CS. - - In spreading a relatively substantial domestic building over a greater area of the site, the proposal would conflict with two of the Green Belt's five purposes. Those being the protection of unrestricted sprawl of large built-up areas and of safeguarding the countryside from encroachment to a greater extent than the existing development on the site. Consequently, the overall openness of the Green Belt would be eroded and the openness of the Green Belt would be significantly harmed. Accordingly, the proposal would not fall within the exceptions set out in paragraph 89 and for the purposes of the Framework, would be inappropriate development. - - The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open. Whilst the concept of openness includes the absence of buildings and development, it is a broader concept than just visibility, and levels of domestic activity can affect</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>openness. - - It is acknowledged that some landscaping is proposed. However, this is limited in scale and would not adequately soften the appearance of the proposal. In addition, the removal of part of the escarpment and introduction of a driveway and space for car parking would result in a significant amount of hardstanding, which would be an incongruous, urbanising feature in a rural setting. - - XXX BSc (Hons) MSC MRTPI - site visit 8 August 2016 - Decision date 9 September 2016 - - The presence of a steeply sloped landscaped escarpment across the frontage of the site provides a visual break that marks the point where the character of the south western side of Hall Street changes to countryside. A small group of well-established dwellings to the west of the site and buildings located further to the south are separated from the development within the urban boundary by the appeal site and a public footpath. As a consequence, they are characterised as lying within the countryside beyond the urban boundary rather than forming part of a village. For these reasons, I would not describe the appeal site as being located within a village, notwithstanding that it adjoins the urban boundary and is relatively close to local facilities. Accordingly, the proposal would not therefore represent limited infilling in a village. - - A fundamental aim of Green Belt policy, as set out in paragraph 79 of the Framework, is to prevent urban sprawl by keeping land permanently open, with openness being identified as one of the essential characteristics of the Green Belt. There is no definition of openness in the Framework but, in the Green Belt context, it is generally held to refer to freedom from, or the absence of, development. As this part of the Green Belt comprises a site with existing buildings in an elevated and screened position relative to Hall Street to the south west, with surrounding buildings to the west and others nearby to the south, it is clearly less open than the surrounding countryside further to the north, west and south. However, the Framework makes no distinction between the importance of openness in different parts of the Green Belt, and therefore the key determinant relating to the impact on openness is whether the proposal would materially increase the amount of built development on the site. - - The siting of the dwelling and detached garage would include a much larger footprint of built development within the site than the existing buildings to be removed and those which have been removed. Furthermore, the modest single storey buildings would be replaced by a more substantial two storey dwelling of a greater height, scale, bulk and massing, together with the addition of hard surfaces associated with the proposed new access and driveway. Consequently, the dwelling and detached garage would result in a significant increase in the amount of built development and hardstanding within the site and in a different position on the site than the existing/previous buildings. As a consequence, the proposal would have a greater impact on the openness of the Green Belt and would result in significant harm in this respect. - - When viewed from the south west</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>frontage of the site onto Hall Street, the prominence of the development would be lessened by the elevated position of the site, reducing land levels within the site to the west and south, the presence of the landscaped escarpment and the set back position of the buildings. However, the development would remain visible from public vantage points on Hall Street to the north and west, the New Road bridleway, a public footpath adjoining the south eastern boundary of the site and from surrounding dwellings in similarly elevated positions, from which the site would appear less open. Although some views of the development could be filtered by additional screening introduced by proposed landscaping, this in itself would have a detrimental effect on the existing openness of the site. Furthermore, the presence and scale of taller buildings in the immediate setting does not justify a harmful loss of openness within the site. - - As the site lies in open countryside rather than comprising part of a village, the proposal would also lead to encroachment of development into the countryside in conflict with one of the purposes of the Green Belt set out in paragraph 80 of the Framework. - - I conclude that the development would have a greater impact on the openness of the Green Belt than the buildings it would replace and would impact on the Green Belt purpose of safeguarding the countryside from encroachment. Accordingly the proposal would comprise inappropriate development in the Green Belt in conflict with the Framework. - - The design of the dwelling, garage and enclosures would respect the diverse style of property types evident in the local area and suitable landscaping could be incorporated. However, the presence of built development of increased footprint, height, bulk and massing, when compared to the existing modest buildings, would have a negative impact on views from public vantage points on Hall Street to the north and west, the New Road bridleway, a public footpath adjoining the south eastern boundary of the site and from surrounding dwellings in similarly elevated positions. The additional screening offered by proposed landscaping would not mitigate the resultant change of the site to an urban character and appearance, including the removal of a small section of the existing escarpment, the introduction of an extensive driveway and the potential addition of domestic paraphernalia within the site. The presence of nearby dwellings does not justify the harm to the character and appearance of the site in this respect. As a consequence, the proposal would erode the contribution that the existing site makes to the setting of the countryside around the village. - - I therefore conclude that the development would have an adverse effect on the character and appearance of the area. The proposal would therefore conflict with Policy 23 of the CS in so far as it seeks to ensure that development maintains the relationship between the urban areas and the countryside. The development also does not comprise one of the types of development that Policy 21 of the CS permits in the countryside. These policies are consistent with the Framework. - - I find that</p>

						the other considerations in this case do not clearly outweigh the substantial weight to be given to the totality of harm to the Green Belt and other harm arising from the proposed development. Consequently, the very special circumstances necessary to justify the development do not exist. For the reasons given above, the appeal should be dismissed. -		
1208	James	Hebb	-	Land To The North Of HS2.73	Support	I write regarding the Green Belt land situated off Eden Street / Eden Lane in Edenfield which is directly in front of my house . Although Green Belt land there have been several unsuccessful attempts to build on this land over the years which I have objected to. - - I support the planners view that this land should remain as Green Belt and agree with them that Eden Street / Eden Lane form a long established and suitable boundary to the urban development. - - Although in principal I do not believe that any Green Belt land should be given up for housing I do think that if Edenfield is to have more homes then a larger development as proposed between Market Street and the Edenfield By-Pass with all the associated infrastructure would be preferable. - -		No.
1233	Susan	Hebb	-	land to the north of HS2.73	Support	I write regarding Greenbelt land situated off Eden St./ Eden Lane which is directly in front of my house. Although the land is in the Greenbelt there have been several attempts to build on the land over the years which I have objected to. I therefore SUPPORT the planners view that this land SHOULD REMAIN as GREENBELT and agree with them that Eden Street /Eden Lane forms a long established and suitable boundary to the urban development. - - With regard to greenbelt land in general I do not think it should be built on. In relation to other greenbelt sites in Edenfield, I feel it is imperative that we preserve the smaller sites as these provide pockets of green space that help to prevent an urban sprawl. So given the current government thinking and rather aggressive housing policy if it is inevitable that some greenbelt is given over to be built on, I would rather one larger site be built on in order to reduce disruption and address infrastructure requirements thoroughly and in one concentrated site.		no

1247	Angela	Rhodes	-	parcel 74	Object	X - Hallfold - Whitworth - OL12 8XL - Parcel 74 Rossendale green belt survey. - I wish to raise the following concerns with regards to parcel 74 listed in you Green Belt survey as land identified as potential release & development from the Rossendale green belt. - 90% + of parcel 74 is farmed by us at Lower fold head Farm and has been agricultural farm land used in animal husbandry (production of milk & rearing of pedigree cattle) for over 200 + years. For the past 40 of those years us, the Rhodes family who purchased the farm outright. - All our farm has a holding number, registered with the Welsh Black Cattle society , is Defra registered, in a single payment scheme and natural England stewardship registered as land to be managed and protected. This includes such tasks as protection of ancient dry-stone walls, water courses / culverts and the growth and nurturing of natural grasslands as habitats for local species and wild life. We have colonies of many species from deer / bees / foxes / badgers and bats who rely on our farmland including all within parcel 74, as food and shelter indeed this is all recorded with DEFRA & Natural England status. - My cows graze this ground every day and have done for the past 40 years. - As stated we farm over 90% of parcel 74 and in the not too distant future it will pass to our daughter who is currently planning her career around agriculture and animal husbandry within our farm. - I firmly believe there is substantial evidence of conspiracy to remove this ground, in order for a well-connected local business man / come builder to build a large detached house within 0.3 (the only part of parcel 74 we DON'T farm or own) - As recent as May 2017 his planning application was once more refused by the secretary of state inspector the main point for the dismissal of the appeal being that the land in question sits clearly within a defined existing green belt boundary. She also proceeded to find that there is presently a very well placed urban boundary to the current green belt within Hallfold. - Another point made in the inspector's report in May 2017 was the very poor access to the land generally in which any access necessitates passage via very narrow step lane Hallfold is one of only 3 identified hamlets with Whitworth. There are no properties adjacent to parcel 74 north, west and east boundaries that are less than 200 years old. - Access to all or any of parcel 74 must be also made via the single-track road of Hallfold, past the already crumbling un adopted single track road to the west of St Barthomews Primary school. Within term time this is already as bottle neck with the necessity of local police officers patrolling and providing traffic calming measures to reduce the high risk of a road traffic accident. - The inspectorate concluded that any part the local area with parcel 74 to be built on would impact negatively on the hamlets perinate openness . - The only right of way to over 85 % of parcel 74 is by my own private road to my property (no point being over 7 feet wide) the other 15 % to the north east being a very poorly maintained bridleway (at no point over 8 feet wide), I therefore fail to see this parcel being of ANY developmental use or even	-

						<p>consideration for removal of green belt status for this parcel of land. - The land with parcel 74 is a very visible piece of land from almost every angle of the Whitworth valley, any development would be clearly visible and an impact on the openness of the village / Hamlet. - All the ground in Paracel 74 is on a steep gradient of over 30% and all would considerable structural engineering to be classed as suitable for building of any type. - All the ground in parcel 74 is also run off over ground and underground via culverts to surface and local spring water, indeed none of the ground within parcel 74 has mains supply within 500 M all water supplies are via spring water. - It is my understanding that the local plan concerns itself with affordable, sustainable housing for the local community. The effectiveness of such being housing in groups of 10 houses to make any dint into the current housing crisis. Parcel 74 it appears is about 1 large 4 bedroomed detached property. - Any building of sustainable housing would remove the privacy of at least 16 existing houses that back onto my open farmland within parcel 74. as previously stated all of these cottages being well over 100 years old. - I appreciate that everywhere needs more sustainable housing however parcel 74 is not a plot that you COULD build sustainable housing. it is and will remain for 90% agricultural farm land. We, as owners and farmers have no desire to see this parcel removed out of greenbelt status and should Rossendale council proceed to do so I feel gives clear evidence to gross misconduct and questionable practice in the decision making of the planning officers involved in this process . - My final point of consideration is the photograph on the front page of your Rossendale green belt survey. - A truly beautiful photograph depicting green, lush countryside. I have no doubt that your department consulted professionals to provide an image that depicts permanence of openness the very essence of greenbelt. That picture was in fact taken (without any consent I may add) within my meadow to the front of my home and actually includes that very land you wish to remove out of greenbelt! No one particularly local and national press will fail to see some irony in that. - I am currently discussing this matter with other greenbelt protection agencies and the NFU as to actions options. - I wish therefore given my beliefs and findings regards parcel 74 of land to engage in a face to face meeting with an officer from your department to discuss my concerns and thoughts further. - I may be contacted at any time on X and my landline is X where if no answer a message may be recorded. - - Yours Sincerely - Mrs A Rhodes -</p>

I have no doubt that your department consulted professionals to provide an image that depicts permanence of openness the very essence of greenbelt. That picture was in fact taken (without any consent I may add) within my meadow to the front of my home and actually includes that very land you wish to remove out of greenbelt! No one particularly local and national press will fail to see some irony in that. - I am currently discussing this matter with other greenbelt protection agencies and the NFU as to actions options. - I wish therefore given my beliefs and findings regards parcel 74 of land to engage in a face to face meeting with an officer from your department to discuss my concerns and thoughts further. - I may be contacted at any time on X and my landline is X where if no answer a message may be recorded. -</p>		
1281	Suzanne	Rhodes	-		Object	<p>We feel it is important to raise our objection to the proposed change in the urban boundary that affects the field behind Marl Pits and Waingate Close. - Changing the status of this area will make it vulnerable to future development that would result in a loss of a beautiful piece of countryside and the flora and fauna that thrive there.The field is well used by many sections of the residents of Rossendale,walkers,riders,runners,cyclists and birdwatchers and would be sadly missed if it was developed. - Further development in this area can only add to the chaos and congestion that occurs around the entrance to the sports centre. Parking,already an issue will become more of a problem around the same area. - The land behind Waingate Close has drainage and flooding problems,these will only be increased if this land is developed.</p>		Not at this time

1300	Helen	Thornton	-		Field behind marl pits and waingate close	Object	We object to the change in the urban boundary to allow housing on this field. - - Environmental - field and area prone to flooding. Our garden is like a bog most of the year. More housing would increase surface water run off and increase risk of flooding. - - Traffic - serious road accidents have happened close to the junction of marl pits and Newchurch road. Traffic is very heavy on Newchurch and travels too fast making it very difficult to turn onto Newchurch road at peak times. - - Land use - we regularly use the area for recreation and this would be lost.		DO NOT BUILD ON THIS COUNTRYSIDE AND EXACERBATE FLOODING AND HEAVY TRAFFIC WHILST REMOVING RECREATIONAL COUNTRYSIDE SPACE.
1339	Robert	Longworth	n/a	SHLAA16196		Object	Dear Sirs, - - The plan to develop on the land East of Goodshaw Lane, Crawshawbooth is of concern to us. We are opposed to this for a number of reasons, as set out below. - - We are concerned that an increase in volume of residents and traffic will bring about a deterioration of the neighbourhood and impact negatively on village life. We feel this development would take away from the natural beauty of Goodshaw Lane and the surrounding areas, which attracted us to the area in the first place. - - Of equal concern is the sheer volume of cars already parked on the lane. Drivers frequently drive at unsafe speeds down Goodshaw lane which is used throughout the week by vulnerable people such as the children attending school and the elderly attending Church. - - I would like to bring to your attention in the last fortnight drivers have been asked by the Police to move their vehicles off Albert Road for emergency vehicle access. This request is of course understandable; however, the capacity of Goodshaw Lane has already been reached. Pulling out from Albert Road onto the main road is an utter danger with parked traffic blocking visibility in both directions. - - Traffic in the centre of the village is a hazard with visitors frequently parking on double yellow lines, at present. Increased development will only lead to further congestion and present a risk to the safety of residents in Crawshawbooth. The village simply does not have the capacity for more residents. - - Kindest Regards,		-

1353	G	Coleman	-		Object	I object to the proposed urban boundary change at the rear of Waingate Close, Springside, Rawtenstall, for the following reasons: - An extension of the current urban boundary would include a field that extends from Marl Pits Sports Centre to Waingate Village. It is much more likely that this area, which is currently countryside, would be used for housing in the future. There is no vehicular access to the site through Marl Pits, which is already congested at peak times. - Access to any future housing development through Marl Pits would dramatically increase traffic at its already busy junction with Newchurch Road. - Marl Pits Sports Centre is popular since its re-development and extra traffic, despite any restrictions placed upon it, would heighten the chances of accidents in a pedestrianised area. - It would be prudent to consider the possibility of a terrorist-related vehicle attack provided by a through-road via Marl Pits, Rossendale's premier sports facility: an area popular with schoolchildren and families. - Access from Waingate Road would involve an awkwardly-angled junction with Newchurch Road which increases the risk of accidents due to bad road visibility. - At current traffic levels there are queues at peak times past this junction from the market traffic lights. - Access via Waingate Village would be along a private road used by children attending local schools as a safer alternative to Newchurch Road.		-

1361	David	Clarke	-		No site allocation number given by RBC. Amending the urban boundary on land between Marl Pits Leisure Centre and Waingate Village (area known as Springside)	Object Firstly I would object that this proposal has not been properly hi-lighted or explained in the plan. It has not been given an allocation number and people consulting the plan will not be aware of the proposal as it has not been listed or properly explained. - I would also object that the land proposed to be included in the urban boundary is in no way urban. This is open countryside with a stream running through it. The urban boundary was originally set next to the stone flag wall at the top of the field to protect this area of countryside and the boundary needs to stay where it is. - The field is next to a busy sports complex. During events at the centre traffic and parking is at saturation point. There have been numerous accidents and serious accidents in the vicinity and site entrance and there is no current vehicular access to the field which could not be undertaken safely. - This is an area of natural beauty and is used by dozens of runners, cyclists and walkers every day. It is used as an extension of the sports centre and is used by the Rossendale Harriers to train as well as being recently used for the borough's triathlon and as the final stage for the Colour Run this year. The land also forms part of the historic walk around the Waingate Village site. Planning policy as per NPPF 2012 should fundamentally seek to improve an area and not worsen it. - This is an area of countryside used by an abundance of wildlife including birds of prey, bats and amphibians. If it were earmarked for development by entering the urban boundary these animals would be at risk of extinction in the local area. - The site is also liable to flooding and significant ground swell and I believe a watercourse runs through it. The area is rich in clay and has a large stream at the bottom. This is Balladen Clough which is known to flood throughout its course. Should development ever be allowed on the land this could have a detrimental effect of the areas surface run off and ground soak and could lead to localised flooding. - There have been previous attempts to allocate the land for development which have failed. Losing a piece of countryside which is used for leisure and rich in wildlife could never be undone and a decision to amend the urban boundary to incorporate this area would be against the council's own planning policies.		Whilst I understand the pressure the council is under to allocate areas for housing this needs to be held against what is right for the borough. This is an area of nature and the beginning and end of many walks and borough events. I am unsure why the decision was made in the plan to move the urban boundary in this area when it would be so against a policy to utilise brownfield sites first and improve areas rather than devastate them. I hope the correct decision is made as if this site were to be lost it cannot ever be replaced and is currently a real asset for Rossendale as it is seen and used by a great many residents and visitors due to its location and beauty.

1364	Bernice	Eavis	-	No site allocation number given by RBC. Amending the urban boundary on land between Marl Pits Leisure Centre and Waingate Village (area known as Springside)	Object	I strongly object to the changing of the urban boundary concerning the field between Marl Pits sports complex and Waingate Village. This field is rightly countryside and should remain as such. The field is presently and frequently used for walking, cycling, running and other organised sporting events. There is much wildlife which lives in and uses our field including bats, deer, birds, butterflies and amphibians. It is a field of historical and natural beauty, flagstones run through the field as a path and these have been here for many generations and should always remain so. It is imperative to seek to protect this historical feature and not instead alter the land classification which could see it erased as would be probable if any future development were to occur.		No
1368	Racheal	Clarke	-	No site allocation number given by RBC. Amending the urban boundary on land between Marl Pits Leisure Centre and Waingate Village (area known as Springside)	Object	I object to the proposed change of the urban boundary concerning the field between Marl Pits sports complex and Waingate Village. - This field is not just a piece of spare land which at present has no use and is thus suitable for change or development. This field is already very much alive. It isn't unused or spare, indeed, far from it, it is absolutely vital to many, a part of some people's everyday lives. This field has a very hectic, busy life. Everyday, all day, it has many, many visitors and it is used and loved by both humans and animals of all ages and species. Is has already developed itself, by its very own structure and terrain, so that it is of immense importance and necessity to all those who spend any time in it. - Walkers walk through it, often the same walkers, everyday, all day, it's their 'place' to go for a walk. They may not manage far but it's a lovely walk, a flat walk away from the main road and it takes in some real natural, historical landmarks and beauty. Did you know that we have some gorgeous flagstones on the ground, they form a footpath which has been there for over 100 years. We can watch Balladen Brook cascade down through the hillside and in Spring we watch the lambs gamboling and jumping up and around in the field next door. Amazing. Beautiful. We want that to stay don't we? If we lose the urban boundary we could lose this footpath and these wonderful sights of nature. - Runners run through it. Everyday, all day they run. The Rossendale Harriers, The Rossendale Traithalon, The Colour Run and every single person who wants to run through a field and not on the road or track runs through it. They don't want to lose it. - - PLEASE SEE NEXT PAGE		Animals live in our field. The field is their home. They source their food here and they build their homes here. Small mammals, garden birds, large birds, birds of prey, frogs, hedgehogs, deer and our bats. We have bats. Fantastic. Our bats swoop over the field on a warm summer's evening, searching out their food. The owls hoot to each other. It's amazing. Our children have listened and learnt so much from it. Our animals need that field to live. They don't want to lose it. - - Cyclists cycle through our field. Children play in it. Dogs run in it. School children commute through it. They all use it, need it, love it. - - This field is alive. It is used, loved and needed by so many that without it left to remain as the countryside it rightly is, a devastation on many levels would occur. - - Don't change something for the wrong reasons. Don't make something worse. The future use of this field is and should always be determined by its past and present. - - Thank you.

1369	John	Jefferson	-	No site allocation number given by RBC. Amending the urban boundary on land between Marl Pits Leisure Centre and Waingate Village (area known as Springside)	Object	I object to the proposed change to the urban boundary concerning the field between Marl Pits sports complex and Waingate Village. - - This field should remain as countryside because - - 1. It is widely and frequently used by walkers, runners, cyclists and children for a wide variety of recreational purposes. The loss of this field as countryside could see this important area transformed into something ie housing which would prevent these people continuing their healthy lifestyles. - - 2. This field is full of a great variety of wildlife. On a daily basis I see many wild birds including birds of prey such as sparrow hawks and owls. I also see small mammals and frogs and hedgehogs sometimes also visit my garden from the field. We are very lucky to also have bats in the field and on a few occasions, the deer have been sighted early morning. The loss of this field as countryside into something urban would potentially lead to the destruction of these animals habitats. - - 3. This field is historically important due to its location next to the historic Waingate Village. The field has its own historical features which need protecting such as beautiful flagstones on the footpath and along the boundary. The urban boundary was originally set to protect this field and it should remain as so.		No

1371	Daniela	Ripa	-		Object	<p>"The Regulation 18 consultation is flawed in that it proposes release of land from the Green Belt without justification and for no identified purpose. The consultation in this respect misleads members of the public and consultees and conflicts with both the National Planning Policy Framework and relevant case law. The National Planning Policy Framework is clear that land may only be released from the Green Belt in exceptional circumstances and case law (IM Properties Development Ltd v Lichfield DC [2015] and Gallagher Homes Ltd v Solihull Metropolitan Borough Council [2014]) has established that the production of a local plan is in itself not sufficient justification for land to be released (paragraph 2.25 of the Green Belt Review). - - Gallagher Homes Ltd v Solihull Metropolitan Borough Council [2014] clearly established that a plan-maker may err in law if it fails to adopt a lawful approach to exceptional circumstances. The Draft Local Plan (2019-2034) proposes the release of land from the Green Belt at Lower Fold Head Farm, Whitworth (Figure 1) but does not clearly identify the intentions with regards to this released land (illustrated by the Key for the Policies Map 2017 at Figure 2, which does not define what this land will be designated as) and this is a clear failure to adopt a lawful approach to exceptional circumstances. There may be other such instances in the Draft Local Plan. - - As a planner, I am able to deduce from this that the land may become 'Countryside' or 'Safeguarded Land', but even I am unclear whether the release is for one of these purposes or another purpose altogether and thus what the justification and exceptional circumstance for the release may be. I have therefore been prejudiced by this as I am unable to comment fully on the proposals as they are unclear. I am not able to come to a conclusion with regards to whether the Green Belt release can be justified in accordance with case law and meets the exceptional circumstance test in the National Planning Policy Framework. - - If it is unclear and has caused prejudice to me, it will not be clear to members of the public or statutory consultees. The fact that the land proposed to be released from the Green Belt at Lower Fold Head Farm is not proposed to be allocated for any intended purpose is unlawful for it fails to satisfy the exceptional circumstance test necessary for the release to be permitted in any event. This element of the plan conflicts with the National Planning Policy Framework and presents a significant risk of challenge should the plan be progressed as proposed. - - The only potential means by which the failure in the Regulation 18 Consultation can be remedied are: - 1. The omission of the proposed release of land at Lower Fold Head Farm from the Green Belt from the Publication/Submission Version of the Local Plan. - 2. A revision to the Policies Map to ensure all land proposed to be released from the Green Belt is appropriately allocated for whatever purpose it is intended to be released for, otherwise there can be no justification to release the land from the Green Belt. Any such revision would necessitate a new Regulation 18</p>

						<p>Consultation. - - In addition to the comments above, I object to the release of the above on the following grounds: - 1. Paragraph 4.6 of the Green Belt Review identifies that it 'only considers the relative performance of the Green Belt; it does not consider the exceptional circumstances required to demonstrate the need for Green Belt release, or the range of other constraints that may inhibit sustainable development e.g. ecological, archaeological, infrastructure, social and economic constraints.' - 2. Notwithstanding that the failure to allocate the land for any purpose does not meet the exceptional circumstance test and is contrary to established legal principles, no assessment of site constraints or justification for the release of the land has been undertaken by the Council. - 3. No landscape assessment has been undertaken for this proposed release. - 4. Development on this land as suggested by the Green Belt Review document (page 52) would result in a significant adverse impact on the landscape character and would significantly encroach into the countryside. - 5. There is no realistic prospect of the land coming forward to meet unmet development needs in future as there is no feasible means of access to the land. Hall Fold is single vehicle width and due to the topography and character of the area, I can see no feasible means by which the carriageway could be brought to adoptable standards to facilitate access for development purposes. The development of the land would not meet Lancashire County Council's highways requirements or those of the Lancashire Fire Authority. Access and accessibility has not been considered. - 6. There is a clearly defined boundary to the Green Belt at this point – the eastern boundary is formed by a dry stone wall that is a retaining wall of significant height in parts (in excess of 2 metres in height). - 7. The proposed boundary of the Green Belt would result in an irregular and angular boundary that would harm the openness of the remaining Green Belt and present a significant encroachment into the countryside. - 8. It would lead to pressure for development in future that would compromise the farm holding of Lower Fold Head Farm. - 9. It would be harmful to the Rossendale Way. - 10. The parcel performs strongly against purpose 1a and 1b, performs strongly against purpose 3 moderately against purpose 4. Development within the parcel would not form a coherent extension to the current settlement edge and would introduce an element of sprawl. The parcel is open pastoral land and displays strong characteristics of the open countryside and has a relatively intact rural character. Releasing the identified sub-area would have a substantial negative effect on the integrity of the Green Belt and would result in a high degree of harm that, given the elevated nature of the land (standing some 3 metres higher than Wallbank Lane) could not be mitigated by 'planting' as suggested in the Green Belt Review. - 11. Paragraph 5.4 page 55 of the Green Belt Review states 'It is important to note that the conclusions reached in this study, do not state that the parcels identified should be released from the Green Belt; as the consideration of further constraints by</p>

1411	June	Bowker	-	reference :not known	Object	<p>Movement of existing boundary will mean any future planning proposals would be more likely to succeed. and it is obvious that enabling future development of the site would be the only reason to move the boundary. - - Any housing development would significantly increase traffic onto Newchurch Road, especially at peak times. This is already a congested road. Access from where I live .Waingate Close, onto Newchurch Road , is already very difficult, due to badly parked cars and frequent heavy traffic. Accidents have also occurred in the past when vehicles have accessed Newchurch Road from roads nearer the Marl Pitts Sports Centre access. There is, therefore at this moment in time, no suitable access point to the land in question. Access from any other part of the area around the field being prohibited by countryside and by the nearby listed building, Waingate Farm, - The Manor. - - There is also the problem of flooding. The land (adjacent field) between our boundary , and the field in question are very prone to water saturation, and any development would by its very nature. i.e. concrete on land, no doubt increase this problem. The ground being able at the moment to absorb the heavy rain we experience in Rossendale. - - In spite of assessments suggesting that as a largely flat area, development of the field would not have an adverse impact on local views and viewpoints for a considerable number of nearby residents, there would definitely be an increased problem of noise. The topography of the area means it acts as a kind of amphitheatre with loud sounds already heard often from places such as the rugby club grounds, the golfing range and the Alder Grange School playing fields. Pollution too from extra cars and homes would also pose a problem. Finally the land is at present an area with easy access from the town and very much appreciated for its open countryside by many groups of people. It is a natural habitat for birds, bats, insects,small mammals and badgers. I would urge in light of all the points listed above, and with special regard to the very real problem of access that a development of the land would bring, that the Urban Boundary is not moved from its current position.</p>		-

1421	VALERIE	BENNETT			Object	The areas that are being considered for change of policy ie Green Belt and the areas in consideration for new housing. I am objecting on the grounds primarily that the infra structure of this small town just couldnt sustain the increase in volume of cars that would be caused by more new builds - primarily Whitworth is one road running through the town- the current volume of traffic is already more than enough to cause travel disruptions and when the snow arrives and inclement weather this can cause major issues even now - so if the plans to increase the volume of housing within the town go ahead - then the traffic will become a major headache for existing and new residents to the area. The Green Belt areas should remain as they are - that being areas for people to visit and enjoy - to remove the habitat of many wild animals and flora is not acceptable Whilst I appreciate that new builds are needed to keep economies alive and for them to thrive - they should be built on existing sites that are residential areas within the current Local Plan and new sites shouldnt not be placed at the detriment of Green Belt Land.		I Hope you do take into account the feelings of the people that do live in this town - as it is important we do protect our heritage and that consideration is given to what must be protected for future generations and balance that out with what is needed within the Borough and where the new builds are best placed to be so as to keep a balance for everyone within the Borough - please dont destroy this community and cause animosity please reconsider where the new builds are best to be built
1432	Steve	Gough	For: Thrum Hall Methodist Church	Regulation 18 Draft - Rossendale Local Plan (2019-2034)	Object	I strongly object to the reclassification of Greenbelt land in and around Whitworth. If any new building developments occur they should be limited to Brownfield sites. When Greenbelt land is sacrificed it is lost forever and should only be used if it is unavoidable. I would though, question whether it is appropriate to consider any new developments, particularly large-scale estates. Whitworth is a small town with limited amenities. One dental surgery, one Doctor's surgery and the few schools are all oversubscribed. There is only one children's playground. There is no permanent police presence and currently there is a lot of concern of residents that Whitworth is too low a priority for police response to the point where they are undependable. Some residents are even considering the formation of forming their own street patrols. No matter how much new building we see in Whitworth we have NEVER seen any corresponding development of infrastructure or amenities. There remains one road in and out of the town. Traffic congestion on this road during rush-hour has increased substantially over recent years and already reaches gridlock at times. When any road works take place, even minor works, the resulting increase in congestion make travelling to and from the town unreasonably difficult and appointments all the more hard to be on time for. - - There must come a time when it is inappropriate and counterproductive to further develop a town beyond the limitations of its infrastructure. I consider Whitworth should be so considered.		-

1433	Albertina	Ripa	-		Object	<p>Without prejudice to the site specific comments below, insufficient land is proposed to be allocated for housing in both Haslingden and Rawtenstall, the most readily accessible areas in the Rossendale Borough with good motorway and public transport links to Manchester, Lancashire and the wider Greater Manchester area. The allocation of land for employment in Haslingden and the promotion of employment opportunities should go hand in hand with the allocation of land for residential development and the creation of new homes in the Borough's two most accessible areas, Haslingden and Rawtenstall. The under provision of land for residential development in Haslingden and Rawtenstall leads to a resultant overprovision of land for residential development in other areas, namely Whitworth and Edenfield. Whitworth has significant accessibility constraints due to the fact it is linear in character - the Council's Adopted Core Strategy (2011, page 37) identifies this as a constraint ('.....with the main road a single carriageway so improvements are limited...'). Although it is part of Rossendale, the closest town is Rochdale to the south. There are only two routes to Rochdale from Whitworth: the A671, which leads to the junction of Whitworth Road with John Street, St Mary's Gate and Yorkshire Street - a signalised junction known as 'Townhead'; and the B6377, which leads to the junction of Falinge Road and Sheriff Street (a roundabout). At peak times and predominately during the morning (AM) peak, these junctions operate over capacity, with significant queuing of in excess of 20 minutes to pass through these junctions. Of particular concern is the roundabout, which from my observations appears to exceed absolute capacity in the AM peak. There is an added complication in respect of highway infrastructure as both of these junctions are in Rochdale and appropriate mitigation would therefore require input from Rochdale Borough Council. - In addition, the Infrastructure Delivery Plan identifies a need for health and education facilities in Whitworth (the single local doctors surgery has over 900 patients registered and Whitworth primary school has very limited capacity), but no land is proposed to be allocated for health purposes and the Infrastructure Delivery Plan proposes education 'improvements will be dealt with on a case by case basis'. Edenfield is a village and its character would be irreversibly damaged should land be allocated for 500 homes in 2019-2034. Whilst I support the allocation of land for residential development in Edenfield in principle, the scale of the expansion proposed is excessive and should be reduced as it would result in significant harm to the social dimension of sustainable development. The Regulation 18 consultation is flawed in that it proposes release of land from the Green Belt without justification and for no identified purpose. The consultation in this respect misleads members of the public and consultees and conflicts with both the National Planning Policy Framework and relevant case law. The National Planning Policy Framework is clear that land may only be released from the Green Belt in exceptional</p>		<p>The withdrawn Draft Site Allocations document proposed the allocation of land currently used as playing fields for development in Whitworth. Playing fields provide a valuable resource for communities, making a significant contribution to the social dimension of sustainable development and the health and wellbeing of local communities. I welcome the omission of these proposals from the Draft Local Plan (2019-2034).</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>circumstances and case law (IM Properties Development Ltd v Lichfield DC [2015] and Gallagher Homes Ltd v Solihull Metropolitan Borough Council [2014]) has established that the production of a local plan is in itself not sufficient justification for land to be released (Paragraph 2.25 of the Green Belt Review Report lists the five relevant legal principles). - - Gallagher Homes Ltd v Solihull Metropolitan Borough Council [2014] clearly established that a plan- maker may err in law if it fails to adopt a lawful approach to exceptional circumstances. The Draft Local Plan (2019-2034) proposes the release of land from the Green Belt at Lower Fold Head Farm, Whitworth but does not clearly identify the intentions with regards to this released land (illustrated by the Key for the Policies Map 2017, which does not define what this land will be designated as) and this is a clear failure to adopt a lawful approach to exceptional circumstances. There may be other such instances in the Draft Local Plan. - - I have therefore been prejudiced by this as I am unable to comment fully on the proposals as they are unclear. I am not able to come to a conclusion in respect of this as the map is unclear and I do not know why the land is proposed to be released from the Green Belt. The fact that the land proposed to be released from the Green Belt at Lower Fold Head Farm is not proposed to be allocated for any intended purpose is unlawful for it fails to satisfy the exceptional circumstance test necessary for the release to be permitted in any event. This element of the plan conflicts with the National Planning Policy Framework and presents a significant risk of challenge should the plan be progressed as proposed. The only potential means by which the failure in the Regulation 18 Consultation can be remedied are: - 1. The omission of the proposed release of land at Lower Fold Head Farm from the Green Belt from the Publication/Submission Version of the Local Plan. - 2. A revision to the Policies Map to ensure all land proposed to be released from the Green Belt is appropriately allocated for whatever purpose it is intended to be released for, otherwise there can be no justification to release the land from the Green Belt. Any such revision would necessitate a new Regulation 18 Consultation. In addition to the comments above, I object to the release of release of land from the Green Belt at Lower Fold Head Farm on the following grounds: - 1. Paragraph 4.6 of the Green Belt Review identifies that it 'only considers the relative performance of the Green Belt; it does not consider the exceptional circumstances required to demonstrate the need for Green Belt release, or the range of other constraints that may inhibit sustainable development e.g. ecological, archaeological, infrastructure, social and economic constraints.' - 2. Notwithstanding that the failure to allocate the land for any purpose does not meet the exceptional circumstance test and is contrary to established legal principles, no assessment of site constraints or justification for the release of the land has been undertaken by the Council. - 3. No landscape assessment has been undertaken for this proposed release. - 4. Development on this land as suggested by the Green Belt</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>Review document (page 52) would result in a significant adverse impact on the landscape character and would significantly encroach into the countryside. - 5. There is no realistic prospect of the land coming forward to meet unmet development needs in future as there is no feasible means of access to the land. Hall Fold is single vehicle width and due to the topography and character of the area, I can see no feasible means by which the carriageway could be brought to adoptable standards to facilitate access for development purposes. The development of the land would not meet Lancashire County Council's highways requirements or those of the Lancashire Fire Authority. Access and accessibility has not been considered. - 6. There is a clearly defined boundary to the Green Belt at this point – the eastern boundary is formed by a dry stone wall that is a retaining wall of significant height in parts (in excess of 2 metres in height). - 7. The proposed boundary of the Green Belt would result in an irregular and angular boundary that would harm the openness of the remaining Green Belt and present a significant encroachment into the countryside. - 8. It would lead to pressure for development in future that would compromise the farm holding of Lower Fold Head Farm. - 9. It would be harmful to the Rossendale Way. - 10. The parcel performs strongly against purpose 1a and 1b, performs strongly against purpose 3 moderately against purpose 4. Development within the parcel would not form a coherent extension to the current settlement edge and would introduce an element of sprawl. The parcel is open pastoral land and displays strong characteristics of the open countryside and has a relatively intact rural character. Releasing the identified sub-area would have a substantial negative effect on the integrity of the Green Belt and would result in a high degree of harm that, given the elevated nature of the land (standing some 3 metres higher than Wallbank Lane) could not be mitigated by 'planting' as suggested in the Green Belt Review. - 11. Paragraph 5.4 page 55 of the Green Belt Review states 'It is important to note that the conclusions reached in this study, do not state that the parcels identified should be released from the Green Belt; as the consideration of further constraints by the Council will be required to ensure that any development is sustainable. It is also recommended that any identified land parcels are considered as part of the wider work undertaken by the Council to identify key housing and employment sites and land and tested through the Sustainability Appraisal process, as part of a robust approach to develop the future development strategy for Rossendale.' There is no document that demonstrates the Council has considered any such constraints. - 12. Development of the land would have a significant detrimental impact on outlook from my property.</p>

1437	Joanne	Finn	-		Object	I would like to object to the proposed redrawing of the urban Boundary to include the land at Oakenhead Wood(HS2.64) and to the rear of 173 to 187 Haslingden Old Road(hs2.66) , behind St James the Less School, Rawtenstall wishing it to remain as existing as I object to development of housing in these areas a outlined separately.		I'm not sure that this is the right place to put it but I'd also like to comment on the Consultation process for this and plans etc including Lives and Landscapes .Whilst I'm sure you will comply with the legal minimum requirements Most people I spoke to didn't know about the Consultation we only found about because a neighbour knew there was a proposal for the field but didn't know the process. We've found out about things retrospectively in the past. People generally feel this is deliberate to minimise likelihood of objections. I'd expect it to be better advertised, including more often in the local paper and on the front page on your website. Even knowing of it's existence you have to hunt to find it on the website.

1465	SEE AGENT DETAILS	SEE AGENT DETAILS	B AND E BOYS LIMITED	LAND AT ACRE AVENUE, STACKSTEADS	Support	<p>WE SUPPORT THE INCLUSION OF THIS SITE WITHIN THE URBAN AREA BOUNDARY. PLEASE SEE SUBMITTED REPRESENTATION FOR DETAILS. ACRE AVENUE, STACKSTEADS</p> <p>Rossendale Borough Council (RBC) is preparing a new Local Plan which will guide the future planning and development of the area. This consultation is the first public consultation stage in the production of the Local Plan (Regulation 18) and includes the Draft Local Plan (Written Statement) and its accompanying Policies Map (including the 6 area maps) and the Infrastructure Delivery Plan.</p> <p>Hourigan Connolly is instructed by B and E Boys Limited to submit and provide comment on the above site in support of its inclusion within the urban area. We have previously submitted representations in response to consultation relating to the Local Plan Part 2 in 2015 and subsequently the 'Call for Sites' exercise relating to the preparation of the new Local Plan in 2016.</p> <p>Along with this letter, we have also submitted an electronic consultation form via the Council's website and this letter should be read in conjunction with the submitted form. A site plan is also enclosed for information.</p> <p>Submissions</p> <p>We note that within the draft Local Plan land at Acre Avenue, Stacksteads is not proposed to be allocated for a particular use, however it is proposed to be included within the Urban Area.</p> <p>Our client supports the inclusion of the site within the Urban Area as is indicated on the draft Policies Map. The site is entirely appropriate for inclusion within the urban boundary given the distinction between it and land further to east which is more open in nature, providing a suitable boundary to the open countryside.</p> <p>We reserve the right to provide further supporting statements and evidence during the preparation of the Plan process and ask that we continue to be informed as the Local Plan progresses.</p> <p>Please see plan in appendix.</p>		-

1473	K	Howieson	C/O Agent		Object	<p>Please see submitted Representation Document</p> <p>Email received 09/10/2017:</p> <p>1. INTRODUCTION 1.1 Rossendale Borough Council (RBC) is preparing a new Local Plan which will guide the future planning and development of the area. The Council are asking for comments on the Draft Local Plan which will replace the Core Strategy once it is adopted. 1.2 The Draft Local Plan document has been informed by a series of evidence base documents, and previous consultations undertaken on proposed changes to the Urban Boundary and the Green Belt. 1.3 The evidence base comprises the following documents: • Strategic Housing Land Availability Assessment (SHLAA) - Stages 1 & 2 and Site Assessments 2017 • Strategic Housing Market Assessment (SHMA) 2017 • Employment Land Review 2017 • Green Belt Review 2016 • Environmental Network Study 2017 • Gypsies and Travellers Accommodation Assessment 2016 • Town Centre, Retail, Leisure and Tourism Study 2017 • Playing Pitch Strategy 2016 (previously published) • Strategic Flood Risk Assessment (SFRA) 2016 • Local Plan Viability Study 2015 and Updated Viability Study in relation to Affordable Housing 2017 • Landscape Study 2015 (previously published) • Landscape capacity study for wind energy developments in the South Pennines (2014) (previously published).</p> <p>1.4 Rossendale's Local Plan will designate land and buildings for future uses to meet the Borough's needs and set out what developments should look like and how they should fit in with their surroundings.</p> <p>1.5 Sites have been proposed for development (such as housing or employment sites), for environmental protection and for recreation uses on the Draft Policies Map. Changes are also proposed to the existing Green Belt and the Urban Boundary. Also, four additional Conservation areas and an extension to an existing Conservation area are being considered.</p> <p>BACKGROUND</p> <p>1.6 Hourigan Connolly is instructed to review and comment on the Draft Local Plan in relation to land opposite 1019 Burnley Road in Loveclough, Rossendale. Currently the site is designated as being located beyond the Urban Boundary within the open countryside. On behalf of our client, we seek to promote a change to the Urban Boundary to include the subject site.</p> <p>1.7 This Statement will demonstrate that a change to the Urban Boundary to include the subject site would accord with the criteria set out by the Council as part of their consultation for the Review of existing Green Belt and Urban Boundary in 2012 / 2013 (no update to this appears to be available as part of the 2017 consultation).</p> <p>1.8 The location of the site is shown below, at Figure 1.1. Figure 1.1 Site Location & Context (NB. Red line is for indicative purposes only).</p> <p>1.9 The site itself has been previously developed and includes nine existing garages, which are currently used for storage purposes, with two being used</p>		Please see submitted Representation Document

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>as workshops for local builders. These are accessed via an existing track which is in private ownership but is a public right of way. Abutting the site to the east is an allotment and further garage which is under separate ownership. The to the south is greenfield land, beyond which is existing residential development.</p> <p>Figure 1.2 Existing garages within the site, viewed from Burnley Road</p> <p>1.10 The site is bordered to the north by recreational sports fields (Loveclough Sports Field), to the east by Burnley Road with residential uses beyond and to the south by further existing residential uses.</p> <p>1.11 Land to the north west of the site benefits from a recent planning permission for a large allotment development², which was approved by the Council's Planning Committee on 10 December 2013 and is under construction. This development is known as Badgercote Allotments and is on land owned by the Council. Also to the west is the settlement of Goodshaw Fold.</p> <p>1.12 The site is within walking distance of a number of settlements including Goodshaw, Crawshawbooth and Dunnockshaw, which provide a variety of services, and the topography of the area is conducive to walking, with good, well-surfaced and street-lit footways on both sides of all the roads in the area. There are a number of facilities within a 5km cycling distance of the site, including primary, secondary and further education facilities, convenience and large-format foodstores, accessible via traffic-free routes.</p> <p>1.13 The site has previously been subject to an appeal against the Council's decision to refuse full planning permission on 05 February 2015 for the erection of 15no. detached dwellings including formation of access from Burnley Road and landscaping³. The appeal was dismissed by the Planning Inspectorate, primarily on the grounds of landscape impact on 4th February 2016.</p> <p>1.14 In preparing these submissions we have reviewed the documents mentioned above as well as other documents forming the evidence base that underpins the emerging Local Plan.</p> <p>OVERVIEW</p> <p>1.15 The starting point for consideration of the Draft Local Plan document is the well-established principle embodied in Paragraph 158 of the National Planning Policy Framework (hereafter referred to as the Framework) that Development Plans must be based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.</p> <p>1.16 On behalf of Mr X we strongly recommend that the Council redraw the Urban Boundary so that it includes the area of land subject to this Representation.</p> <p>1.17 Needless to say we will wish to participate in the Examination in Public and attend the relevant hearings and will make further representations at the</p>

						<p>under Section 39(2) of the Planning & Compulsory Purchase Act 2004. Local Plans must also be consistent with the principles and policies of the Framework.</p> <p>2.13 Paragraph 152 of the Framework requires local planning authorities to seek opportunities to achieve and secure net gains for each of the three dimensions of sustainable development. These three dimensions are defined in Paragraph 7 of the framework as economic, social and environmental. According to Paragraph 7 of the Framework these dimensions give rise to the need for the planning system to perform a number of roles:</p> <ul style="list-style-type: none"> • “an economic role – contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure; • a social role – supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community’s needs and support its health, social and cultural well-being; and • an environmental role – contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy”. <p>2.14 Paragraph 8 of the Framework states that the roles mentioned in Paragraph 7 should not be undertaken in isolation, because they are mutually dependant and should be sought jointly and simultaneously through the planning system.</p> <p>2.15 The importance of Local Plans taking into account local circumstances is highlighted in Paragraph 10 of the Framework to ensure that they respond to the different opportunities for achieving sustainable development.</p> <p>2.16 Paragraph 152 of the Framework goes on to deal with adverse impacts on any of the dimensions of sustainable development and sets out three tests: Firstly significant adverse impacts on any of the dimensions should be avoided, and where possible, alternative options which reduce or eliminate such impacts should be pursued.</p> <ul style="list-style-type: none"> • Where adverse impacts are unavoidable, measures to mitigate the impact should be considered. • Where adequate mitigation measures are not possible, compensatory measures may be appropriate. <p>2.17 Paragraph 154 of the Framework requires Local Plans to be aspirational but realistic and address the spatial implications of economic, social and environmental change.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>2.18 The requirement for local planning authorities to set out strategic priorities for their areas in their Local Plans is established in Paragraph 156 of the Framework. Such policies are required to deliver:</p> <ul style="list-style-type: none"> • “the homes and jobs needed in the area; • the provision of retail, leisure and other commercial development; • the provision of infrastructure for transport, telecommunications, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat); • the provision of health, security, community and cultural infrastructure and other local facilities; and • climate change mitigation and adaptation, conservation and enhancement of the natural and historic environment, including landscape”. <p>2.19 The importance of using a robust and proportionate evidence base for Plan making is dealt with in Paragraphs 158 to 177 of the Framework. Paragraph 158 is of particular relevance to these submissions: “Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local planning authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals”.</p> <p>2.20 A number of topics are discussed and for the purpose of this document we will focus on housing (Paragraph 159), business (Paragraphs 160 – 161), infrastructure (Paragraph 162) and environment (Paragraphs 165 – 168). HOUSING</p> <p>2.21 Paragraph 159 outlines the importance of preparing a Strategic Housing Market Assessment (SHMA) to assess full housing needs and a Strategic Housing Land Availability Assessment (SHLAA) to establish realistic assumptions about the availability, suitability and the likely economic viability of land to meet the identified need for housing over the plan period.</p> <p>2.22 Of particular importance is the requirement for the SHMA to identify the scale and mix of housing and the range of tenures that the local population is likely to need over the Plan period which:</p> <ul style="list-style-type: none"> • “meets household and population projections, taking account of migration and demographic change; • addresses the need for all types of housing, including affordable housing and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes); and • caters for housing demand and the scale of housing supply necessary to meet this demand”. <p>BUSINESS</p> <p>2.23 Paragraph 160 of the Framework outlines the importance of local</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>planning authorities having a clear understanding (from a robust evidence base) of business needs within the economic markets operating in and across their area.</p> <p>2.24 Paragraph 161 of the Framework establishes the importance of understanding business needs (both quantitative and qualitative) and ensuring that sufficient suitable land (both existing and future) is available to meet needs.</p> <p>INFRASTRUCTURE</p> <p>2.25 An objective of government policy is the delivery of growth. Central to this objective is ensuring that infrastructure has the capacity or can be enhanced to deliver growth. A number of factors are outlined in Paragraph 162 of the Framework which need to be considered at a local level including transport, water, foul drainage, energy, telecommunications, waste, health, social care, education, flood risk and coastal change management.</p> <p>ENVIRONMENT</p> <p>2.26 Paragraphs 165 to 168 of the Framework deal with environmental matters and set out the requirement that a sustainability appraisal which meets the requirements of the European Directive on strategic environmental assessment should be an integral part of the plan preparation process, and should consider all the likely significant effects on the environment, economic and social factors.</p> <p>SOUNDNESS</p> <p>2.27 Paragraph 182 of the Framework deals with the examination of Local Plans. The Local Plan will be examined by an independent inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. Local planning authorities are required to submit Plans for examination which they consider “sound” – namely that they are:</p> <ul style="list-style-type: none"> • “Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development; • Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence; • Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and • Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework”. <p>NATIONAL PLANNING PRACTICE GUIDANCE</p> <p>2.28 The NPPG replaces some 230 planning guidance documents but will result in no amendments to the Framework.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>2.29 The Housing and Economic Land Availability Assessment section of the NPPG is worthy of specific mention in relation to this Submission, in particular paragraph 030 (reference ID: 3-030-20140306 confirms): Housing requirement figures in up-to-date adopted Local Plans should be used as the starting point for calculating the five year supply. Considerable weight should be given to the housing requirement figures in adopted Local Plans, which have successfully passed through the examination process, unless significant new evidence comes to light. It should be borne in mind that evidence which dates back several years, such as that drawn from revoked regional strategies, may not adequately reflect current needs.”</p> <p>2.30 The NPPG deals with deliverable sites as follows at paragraph 031 (Reference ID 3-031-20140306): WHAT CONSTITUTES A ‘DELIVERABLE SITE’ IN THE CONTEXT OF HOUSING POLICY? Deliverable sites for housing could include those that are allocated for housing in the development plan and sites with planning permission (outline or full that have not been implemented) unless there is clear evidence that schemes will not be implemented within five years. However, planning permission or allocation in a development plan is not a prerequisite for a site being deliverable in terms of the five-year supply. Local planning authorities will need to provide robust, up to date evidence to support the deliverability of sites, ensuring that their judgments on deliverability are clearly and transparently set out. If there are no significant constraints (e.g. infrastructure) to overcome such as infrastructure sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a five-year timeframe. The size of sites will also be an important factor in identifying whether a housing site is deliverable within the first 5 years. Plan makers will need to consider the time it will take to commence development on site and build out rates to ensure a robust five-year housing supply</p> <p>2.31 In regards to how often a Local Plan should be reviewed, the NPPG states at paragraph 008 (Reference ID 12-008-20140306) that: HOW OFTEN SHOULD A LOCAL PLAN BE REVIEWED?</p> <p>To be effective plans need to be kept up-to-date. Policies will age at different rates depending on local circumstances, and the local planning authority should review the relevance of the Local Plan at regular intervals to assess whether some or all of it may need updating. Most Local Plans are likely to require updating in whole or in part at least every five years. Reviews should be proportionate to the issues in hand. Local Plans may be found sound conditional upon a review in whole or in part within five years of the date of adoption.</p> <p>GOVERNMENT CONSULTATION ON STANDARDISED METHODOLOGY FOR HOUSING NEED (SEPTEMBER 2017)</p> <p>2.32 On 14 September 2017 the Government announced a consultation on a Standardised Methodology for Assessing Local Housing Need, the basis of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>which was included in the White Paper (February 2017) and is aimed at helping local authorities plan for the right homes in the right places.</p> <p>2.33 As the consultation document sets out, the root cause of the dysfunctional housing market in the UK is that for too long we have not built enough homes. The Government is aiming to deliver 1.5 million new homes between 2015-2022 and is attempting to create a system which is clear and transparent for local authorities. The new methodology will apply to all future plans, with the exception of those which have been submitted or will be submitted before 31 March 2018.</p> <p>2.34 The standard methodology is principally aimed at tackling problems of affordability as the proposed formula simply uplifts the household projections figure, based on market signals.</p> <p>2.35 For Rossendale the proposed standard methodology has little impact on the annual housing requirement (which, it is suggested should be 212 rather than the current 265 dwellings per annum). However, it should be noted that the proposed standard methodology is currently on consultation and may therefore be subject to changes in due course. It is also worth noting the heavy speculation that the proposed methodology focuses on growth in the south east to the detriment of other parts of the UK, in particular the north west.</p> <p>(...)</p> <p>POLICY SD2 URBAN BOUNDARY AND GREEN BELT</p> <p>3.3 This policy seeks to restrict new development to within the Urban Boundary, except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area.</p> <p>3.4 The principle of this policy is supported; however, the proposed extent of the Urban Boundary is not. We consider that there is scope within the Borough to further revise the line of the Urban Boundary to accommodate the level of growth required to ensure the Borough's growth is sustainable and meets the aspirations of the Council moving forward.</p> <p>SUGGESTED MODIFICATION</p> <p>3.5 The Council should change the Urban Boundary to include the subject site within this boundary line to further deliver a sustainable level of growth. To change the Urban Boundary at this location would be sound and would not harm the objectives of the Local Plan and would accord with the Council's criteria set out in the Review of the Urban Boundary.</p> <p>3.6 The detailed proposed amendment to the Urban Boundary is shown in the following Chapter.</p> <p>4. PROPOSED AMENDMENT TO THE URBAN BOUNDARY</p> <p>INTRODUCTION</p> <p>4.1 Previous consultations by the Council on the Review of the Green Belt and Urban Boundary has resulted in a number of proposed changes to the Urban</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>Boundary line as shown on the draft Proposals Maps4. The Council used a number of criteria to assess whether a change to the Urban Boundary would accord with the purpose of the Urban Boundary to clearly define and differentiate between designated settlements, Countryside and Green Belt.</p> <p>4.2 The subject site is situated within the Ward of Goodshaw in Loveclough. Loveclough is a village located between Burnley and Rawtenstall with quick and direct access by public transport to both towns via Burnley Road (A682). The bus shelters opposite the site are served by the X43 'Witch Way' bus service which provides an express service into Manchester City Centre.</p> <p>4.3 Appendix 1 contains an extract from the Goodshaw Ward Proposals Map where the location of the subject site has been indicated with an arrow. Currently the site is located directly adjacent to the Urban Boundary. In the second extract, we have indicated how the Urban Boundary should be changed to include the site. The amendment to the delineation of the boundary line is minor.</p> <p>4.4 By assessing the inclusion of the site within the Urban Boundary against the Council's criteria (as listed above), we reach the following conclusions:</p> <p>1 The Urban Boundary will be amended to correct any cartographic errors, anomalies and inconsistencies where:</p> <p>(a) Boundaries are inaccurately drawn, or The current Urban Boundary in this location is some 20 years out of date, representing the old field boundaries in this locality.</p> <p>(b) Do not follow strong, robust and permanent boundaries, on the ground, or The boundary should include the subject site which would be bounded by a clearly defined boundary line associated with the allotment development immediately adjacent to the west. The new boundary would be well established, permanent and robust.</p> <p>(c) Areas of land no longer read as part of the wider built up area, or N/A</p> <p>(d) Areas of land clearly read as part of the wider built up area. This site reads as part of the built up area along Burnley Road, where there is residential development on both sides of the main road. This relationship has been strengthened following the development of the approved allotments to the immediate west of the site.</p> <p>2 To meet the Borough's future development and community needs, additional land will be considered for inclusion within the Urban Boundary where</p> <p>(a) It is capable of being developed sustainably and integrated into the existing built-up area, and Yes. The site is sustainably located and is already integrated into the existing built-up area.</p> <p>b) It would not adversely affect aspects of the natural environment unless it is capable of full mitigation, and Yes. There would be no adverse effect.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>(c) It would not result in the amalgamation of settlements or adversely affect the character of the settlement; and Yes. There would be no amalgamation of settlements or adverse effect on the character of the settlement.</p> <p>(d) It would not adversely affect heritage assets or their setting, and N/A</p> <p>(e) It is capable of being developed without a significant adverse impact on local views and viewpoints, including where appropriate the use of appropriate mitigation measures. Yes. Development could be achieved without significant impact.</p> <p>3 Open land on the edge of existing settlements will be excluded from the Urban Boundary where it has existing recreational or community value (e.g. playing fields, allotments, playgrounds etc) to ensure it remains undeveloped The site is not used for recreational purposes.</p> <p>4.5 The subject site is sustainably located and any future development, would represent sustainable development, which the Framework establishes a presumption in favour of.</p> <p>4.6 The Framework also encourages Local Planning Authorities to positively seek opportunities to meet the objectively assessed development needs of their area unless, inter alia, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits.</p> <p>4.7 With this in mind, we would recommend that the draft Proposals Map for Goodshaw Ward be revised to take account of a change to the Urban Boundary so that the site on land opposite 1019 Burnley Road, Loveclough is included within the Urban Boundary.</p> <p>4.8 We reserve the right to add to make further submissions to the Council during the Local Plan preparation period.</p> <p>5. CONCLUSIONS</p> <p>5.1 The Council should amend the Urban Boundary to include the subject site within this boundary line to further deliver a sustainable level of growth and to properly reflect the lie of the land. To amend the Urban Boundary at this location would be sound and would not harm the objectives of the Local Plan and would accord with the Council's criteria set out in the Review of the Urban Boundary.</p> <p>Please see appendix for figures</p>

1478	N/A	N/A	Winfields Holdings Ltd and Winfield's Ltd		Support	Winfields support the extension of the urban boundary at Acre to include the brownfield land that forms the northern part of the site upon which its existing business operates. The site is enclosed and not readily discernible from the surrounding area. Indeed, the land to be excluded from the Green Belt is directly comparable to other land already included within the existing urban area, and not readily visible from beyond it. - - As recognised by Officers, this land does not perform any Green Belt function and is a clear continuation of the existing urban area, being distinct and separate from the countryside beyond (as confirmed by your site assessment from June of this year). It does not therefore perform the purposes identified by paragraph 80 of the NPPF, as confirmed by the independent reviews undertaken during 2014 and November 2016. The exclusion from the Green Belt would, however, assist the existing business by recognising its status, which provides further assurances with respect to its programme of consolidation and renewal of the business within the Haslingden area.		-

1479	N	TEAGUE	SEE AGENT DETAILS		Object	<p>THE SITE SHOULD BE REMOVED FROM THE GREEN BELT AND INCLUDED WITHIN THE URBAN BOUNDARY. PLEASE SEE SUBMITTED REPRESENTATION FOR FULL DETAILS.</p> <p>1. INTRODUCTION</p> <p>BRIEF 1.1 Hourigan Connolly is instructed by Mr N Teague in respect of his land interests at Elm Street, Edenfield. 1.2 Rossendale Borough Council (RBC) is preparing a new Local Plan which will guide the future planning and development of the area. Following the adoption of the Local Plan Part 1: Core Strategy in November 2011, RBC commenced work on its Local Plan Part 2: Site Allocations and Development Management Policies. However, this document was halted in favour of the preparation of a full new Local Plan which has now been issued for consultation from Monday 24 July to Monday 9 October 2017. This edition of the Local Plan comprises the Regulation 18 consultation document which sets out the Council's preferred approach to future housing, employment and leisure uses over the Plan period. Once adopted the Local Plan will replace the Core Strategy (2011).</p> <p>1.3 Within the draft Local Plan, sites have been proposed for development (for housing or employment use), for environmental protection and for recreation uses, as identified on the Draft Policies Map. Changes are also proposed to the existing Green Belt and the Urban Boundary. Also, four additional Conservation Areas, along with an extension to an existing Conservation Area, are being considered. 1.4 Documents included in the Draft Local Plan Consultation are the Draft Local Plan (Written Statement), the accompanying Policies Map (including the 6 area maps) and the Infrastructure Delivery Plan. 1.5 The evidence base which supports the Local Plan comprises the following documents: • Strategic Housing Land Availability Assessment (SHLAA) (2017). • Strategic Housing Market Assessment (SHMA) (2017). • Employment Land Review (2017). • Green Belt Review (2016). • Environmental Network Study (2017). • Gypsies and Travellers Accommodation Assessment (2016). • Town Centre, Retail, Leisure and Tourism Study (2017). • Playing Pitch Strategy (2016) (previously published). • Strategic Flood Risk Assessment (SFRA) (2016). • Local Plan Viability Study 2015 and Updated Viability Study in relation to Affordable Housing (2017). • Landscape Study (2015) (previously published). • Landscape capacity study for wind energy developments in the South Pennines (2014) (previously published). • Heritage Impact Assessment of Housing Sites (2017). 1.6 In addition to the above documents, the Council's Sustainability Appraisal, although not strictly evidence, has informed the development of the draft policies.</p> <p>BACKGROUND</p> <p>1.7 Hourigan Connolly is instructed to review and comment on the emerging</p>		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>Local Plan in relation to land at Elm Street, Edenfield. The site falls outside of the urban boundary and is designated at Green Belt, and this Representation sets out why the Council should consider amending the urban boundary in this location order to promote sustainable development.</p> <p>SCOPE</p> <p>1.8 In preparing these submissions we have reviewed the documents mentioned above as well as other documents forming the evidence base that underpins the emerging Local Plan.</p> <p>1.9 This representation is structured as follows:</p> <ul style="list-style-type: none"> • Legislative and Policy Context. • The Site. • Green Belt Review. • Proposed Extended Employment Allocation. • Conclusions. <p>2. LEGISLATIVE & POLICY CONTEXT</p> <p>INTRODUCTION</p> <p>2.1 In this Chapter we set out the relevant legislative and policy context before going on to examine the Council's Local Plan document.</p> <p>LEGISLATIVE CONTEXT</p> <p>2.2 Part 2 of the Planning & Compulsory Purchase Act 2004 (As amended) deals with Local Development.</p> <p>2.3 The RBC Local Plan is being brought forward following changes to the Development Plan making system in England which are set out in the Localism Act 2011. Part 6 Sections 109 – 144 of the Localism Act deal with Planning.</p> <p>2.4 Following revocation of the North West Regional Strategy (RS) in May 2013, Council's such as RBC will set their own housing and employment targets against objectively assessed needs.</p> <p>2.5 The Town & Country Planning (Local Planning) (England) Regulations (SI No. 767) came into force on 6 April 2012 and guide the preparation of Local Plans.</p> <p>MINISTERIAL STATEMENTS</p> <p>2.6 In his Written Statement of 23 March 2012 the then Minister for Decentralisation and Cities the Rt. Hon Greg Clark MP referred to a pressing need to ensure that the planning system does everything it can to help England secure a swift return to economic growth. He urged local planning authorities to make every effort to identify and meet the housing, business and other development needs of their areas.</p> <p>2.7 The National Planning Policy Framework (hereafter referred to as the Framework) (see below) was subsequently published on 27 March 2012 and urges local planning authorities to boost significantly the supply of housing.</p> <p>2.8 In his Written Statement of 6 September 2012 the Secretary of State for Communities and Local Government the Rt. Hon Eric Pickles MP noted an increase in house building starts between 2009 and 2011 but said that there</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>was far more to do to provide homes to meet Britain’s demographic needs and to help generate local economic growth.</p> <p>2.9 There can be no doubt that house building is a driver of the local economy besides providing homes for local people and that Local Planning Authorities should plan for the release of land for development.</p> <p>FRAMEWORK REQUIREMENTS</p> <p>2.10 Paragraphs 150 to 185 of the Framework deal with Plan-making.</p> <p>2.11 The importance of the Local Plan is identified as the key to delivering sustainable development and a cornerstone of the development management process (Paragraph 150 refers).</p> <p>2.12 The requirement for Local Plans to be prepared with the objective of contributing to the achievement of sustainable development is embodied in Paragraph 151 of the Framework and stems from the requirements set out under Section 39(2) of the Planning & Compulsory Purchase Act 2004. Local Plans must also be consistent with the principles and policies of the Framework.</p> <p>2.13 Paragraph 152 of the Framework requires local planning authorities to seek opportunities to achieve and secure net gains for each of the three dimensions of sustainable development. These three dimensions are defined in Paragraph 7 of the framework as economic, social and environmental. According to Paragraph 7 of the Framework these dimensions give rise to the need for the planning system to perform a number of roles:</p> <ul style="list-style-type: none"> • “an economic role – contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure; • a social role – supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community’s needs and support its health, social and cultural well-being; and • an environmental role – contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy”. <p>2.14 Paragraph 8 of the Framework states that the roles mentioned in Paragraph 7 should not be undertaken in isolation, because they are mutually dependant and should be sought jointly and simultaneously through the planning system.</p> <p>2.15 The importance of Local Plans taking into account local circumstances is highlighted in Paragraph 10 of the Framework to ensure that they respond to</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>the different opportunities for achieving sustainable development.</p> <p>2.16 Paragraph 152 of the Framework goes on to deal with adverse impacts on any of the dimensions of sustainable development and sets out three tests:</p> <ul style="list-style-type: none"> • Firstly significant adverse impacts on any of the dimensions should be avoided, and where possible, alternative options which reduce or eliminate such impacts should be pursued. • Where adverse impacts are unavoidable, measures to mitigate the impact should be considered. • Where adequate mitigation measures are not possible, compensatory measures may be appropriate. <p>2.17 Paragraph 154 of the Framework requires Local Plans to be aspirational but realistic and address the spatial implications of economic, social and environmental change.</p> <p>2.18 The requirement for local planning authorities to set out strategic priorities for their areas in their Local Plans is established in Paragraph 156 of the Framework. Such policies are required to deliver:</p> <ul style="list-style-type: none"> • “the homes and jobs needed in the area; • the provision of retail, leisure and other commercial development; • the provision of infrastructure for transport, telecommunications, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat); • the provision of health, security, community and cultural infrastructure and other local facilities; and • climate change mitigation and adaptation, conservation and enhancement of the natural and historic environment, including landscape”. <p>2.19 The importance of using a robust and proportionate evidence base for Plan making is dealt with in Paragraphs 158 to 177 of the Framework. Paragraph 158 is of particular relevance to these submissions: “Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local planning authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals”.</p> <p>2.20 A number of topics are discussed and for the purpose of this document we will focus on housing (Paragraph 159), business (Paragraphs 160 – 161), infrastructure (Paragraph 162) and environment (Paragraphs 165 – 168).</p> <p>GREEN BELT</p> <p>2.21 In respect of Green Belt Paragraph 80 of the Framework lists the five national purposes of the Green Belt as follows:</p> <ul style="list-style-type: none"> • To check the unrestricted sprawl of large built-up areas; • To prevent neighbouring towns merging into one another; • To assist in safeguarding the countryside from encroachment; 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<ul style="list-style-type: none"> • To preserve the setting and special character of historic towns; and, • To assist in urban regeneration, by encouraging the recycling of derelict and other urban land. <p>2.22 Paragraph 83 goes on to state that Local Planning Authorities (LPA's) with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period.</p> <p>2.23 Paragraph 84 states when drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary.</p> <p>2.24 Paragraph 85 sets out that when defining new Green Belt boundaries LPA's should:</p> <ul style="list-style-type: none"> • ensure consistency with the Local Plan strategy for meeting identified requirements for sustainable development; • not include land which it is unnecessary to keep permanently open; • where necessary, identify in their plans areas of 'safeguarded land' between the urban area and the Green Belt, in order to meet longer-term development needs stretching well beyond the plan period; • make clear that the safeguarded land is not allocated for development at the present time. Planning permission for the permanent development of safeguarded land should only be granted following a Local Plan review which proposes the development; • satisfy themselves that Green Belt boundaries will not need to be altered at the end of the development plan period; and <p>2.25 define boundaries clearly, using physical features that are readily recognisable and likely to be permanent.</p> <p>BUSINESS</p> <p>2.26 Paragraph 160 of the Framework outlines the importance of local planning authorities having a clear understanding (from a robust evidence base) of business needs within the economic markets operating in and across their area.</p> <p>2.27 Paragraph 161 of the Framework establishes the importance of understanding business needs (both quantitative and qualitative) and ensuring that sufficient suitable land (both existing and future) is available to meet needs.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>HOUSING</p> <p>2.28 Paragraph 159 outlines the importance of preparing a Strategic Housing Market Assessment (SHMA) to assess full housing needs and a Strategic Housing Land Availability Assessment (SHLAA) to establish realistic assumptions about the availability, suitability and the likely economic viability of land to meet the identified need for housing over the plan period.</p> <p>2.29 Of particular importance is the requirement for the SHMA to identify the scale and mix of housing and the range of tenures that the local population is likely to need over the Plan period which:</p> <ul style="list-style-type: none"> • “meets household and population projections, taking account of migration and demographic change; • addresses the need for all types of housing, including affordable housing and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes); and • caters for housing demand and the scale of housing supply necessary to meet this demand”. <p>INFRASTRUCTURE</p> <p>2.30 An objective of government policy is the delivery of growth. Central to this objective is ensuring that infrastructure has the capacity or can be enhanced to deliver growth. A number of factors are outlined in Paragraph 162 of the Framework which need to be considered at a local level including transport, water, foul drainage, energy, telecommunications, waste, health, social care, education, flood risk and coastal change management.</p> <p>ENVIRONMENT</p> <p>2.31 Paragraphs 165 to 168 of the Framework deal with environmental matters and set out the requirement that a sustainability appraisal which meets the requirements of the European Directive on strategic environmental assessment should be an integral part of the plan preparation process, and should consider all the likely significant effects on the environment, economic and social factors.</p> <p>SOUNDNESS</p> <p>2.32 Paragraph 182 of the Framework deals with the examination of Local Plans. The Local Plan will be examined by an independent inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. Local planning authorities are required to submit Plans for examination which they consider “sound” – namely that they are:</p> <ul style="list-style-type: none"> • “Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development; 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<ul style="list-style-type: none"> • Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence; • Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and • Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework”. <p>NATIONAL PLANNING PRACTICE GUIDANCE – LAUNCHED 6 MARCH 2014</p> <p>2.33 On 28 August 2013 the government launched its draft National Planning Practice Guidance (NPPG). The draft NPPG was subject to consultation for 6 weeks and was launched on 6 March in its final form. The NPPG replaces some 230 planning guidance documents but will result in no amendments to the Framework.</p> <p>2.34 The Housing and Economic Land Availability Assessment section of the NPPG is worthy of specific mention in relation to this Report, in particular paragraph 030 (reference ID: 3-030-20140306 confirms): “Housing requirement figures in up-to-date adopted Local Plans should be used as the starting point for calculating the five year supply. Considerable weight should be given to the housing requirement figures in adopted Local Plans, which have successfully passed through the examination process, unless significant new evidence comes to light. It should be borne in mind that evidence which dates back several years, such as that drawn from revoked regional strategies, may not adequately reflect current needs.”</p> <p>2.35 The NPPG deals with deliverable sites as follows at paragraph 031 (Reference ID 3-031-20140306): “WHAT CONSTITUTES A ‘DELIVERABLE SITE’ IN THE CONTEXT OF HOUSING POLICY? Deliverable sites for housing could include those that are allocated for housing in the development plan and sites with planning permission (outline or full that have not been implemented) unless there is clear evidence that schemes will not be implemented within five years. However, planning permission or allocation in a development plan is not a prerequisite for a site being deliverable in terms of the five-year supply. Local planning authorities will need to provide robust, up to date evidence to support the deliverability of sites, ensuring that their judgments on deliverability are clearly and transparently set out. If there are no significant constraints (e.g. infrastructure) to overcome such as infrastructure sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a five-year timeframe. The size of sites will also be an important factor in identifying whether a housing site is deliverable within the first 5 years. Plan makers will need to consider the time it will take to commence development on site and build out rates to ensure a robust five-year housing supply.”</p> <p>2.36 In regards to how often a Local Plan should be reviewed, the NPPG states at paragraph 008 of the section titled ‘Local Plans’ (Reference ID 12-008-</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>20140306) that: “HOW OFTEN SHOULD A LOCAL PLAN BE REVIEWED? To be effective plans need to be kept up-to-date. Policies will age at different rates depending on local circumstances, and the local planning authority should review the relevance of the Local Plan at regular intervals to assess whether some or all of it may need updating. Most Local Plans are likely to require updating in whole or in part at least every five years. Reviews should be proportionate to the issues in hand. Local Plans may be found sound conditional upon a review in whole or in part within five years of the date of adoption.”</p> <p>GOVERNMENT CONSULTATION ON STANDARDISED METHODOLOGY FOR HOUSING NEED (SEPTEMBER 2017)</p> <p>2.37 On 14 September 2017 the Government announced a consultation on a Standardised Methodology for Assessing Local Housing Need, the basis of which was included in the White Paper (February 2017) and is aimed at helping local authorities plan for the right homes in the right places.</p> <p>2.38 As the consultation document sets out, the root cause of the dysfunctional housing market in the UK is that for too long we have not built enough homes. The Government is aiming to deliver 1.5 million new homes between 2015-2022 and is attempting to create a system which is clear and transparent for local authorities. The new methodology will apply to all future plans, with the exception of those which have been submitted or will be submitted before 31 March 2018.</p> <p>2.39 The standard methodology is principally aimed at tackling problems of affordability as the proposed formula simply uplifts the household projections figure, based on market signals.</p> <p>2.40 For Rossendale the proposed standard methodology has little impact on the annual housing requirement (which, it is suggested should be 212 rather than the current 265 dwellings per annum). However, it should be noted that the proposed standard methodology is currently on consultation and may therefore be subject to changes in due course. It is also worth noting the heavy speculation that the proposed methodology focuses on growth in the south east to the detriment of other parts of the UK, in particular the north west.</p> <p>3. THE SITE</p> <p>SITE LOCATION</p> <p>3.1 The site’s general location is identified below in Figure 3.1. Figure 3.1 – Land at Elm Street, Edenfield– not to scale.</p> <p>3.2 The site lies to the south of Elm Street, with properties along Rochdale Road forming the south western boundary and the line of a former hedgerow forming the eastern boundary. This parcel of land forms part of a much larger parcel which is also within the ownership of our client – this wider parcel is bounded by Gincroft Lane, Michael Wife Lane and Plunge Road.</p> <p>3.3 As is evident from the aerial image above, land at Elm Street has a close</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>physical relationship with the existing built up part of the settlement, and the parcel provides an opportunity for rounding off the urban area.</p> <p>SITE DESCRIPTION</p> <p>3.4 The site extends comprises vacant greenfield land currently located within the Green Belt. Adjacent to the site, to the north east, there is a barn which has recently been converted to 2 No. apartments. This is also within the ownership of Mr N Teague and is outlined in red below.</p> <p>Figure 3.2 – Land at Elm Street, Edenfield.</p> <p>SURROUNDING AREA</p> <p>3.5 The subject site is located on the edge of the settlement of Edenfield. The site is approximately 1 mile to the north of Ramsbottom and 2.5 miles south of Rawtenstall. The village is mainly residential in nature and it has seen recent growth as a commuter settlement serving Greater Manchester and Lancashire.</p> <p>3.6 The village centre is located along Market Street (approximately 150 metres from the site) where a range of local services and facilities can be found, including a baker, butcher, pharmacy, post office newsagent and takeaway.</p> <p>3.7 The centre of Edenfield lies at the intersection of the A676 providing links to Bolton, the A680 providing links to Accrington and Rochdale and the A56 to Rawtenstall and Bury. The M66 motorway terminates at Edenfield where it becomes the A56 dual carriageway known as the Edenfield Bypass.</p> <p>3.8 This unremarkable site has a close physical relationship with the existing settlement (being surrounded by development to the north, south and west), and it does not relate to the wider countryside which dominates the landscape further to the east and north. Furthermore, the site is relatively flat compared to other parts of the village and the Borough more widely.</p> <p>FLOOD RISK</p> <p>3.9 According to the Flood Map for Planning provided by the Environment Agency, the site lies within Flood Zone 1. Only those areas which lie adjacent to the course of Dearden Clough Brook further to the south are identified as being in Flood Zones 2 and 3.</p> <p>Figure 3.2 – Extract from Flood Map for Planning</p> <p>LANDSCAPE</p> <p>3.10 The Council commissioned a Landscape Character Assessment in 2015. The document separates areas of the Borough into various landscape character types, with reference to those identified in the Lancashire Landscape Strategy. The subject site which is located on the edge of the urban area of Edenfield falls into an area identified as ‘Settled Valley’. The area is not identified as one which is of particular value.</p> <p>Figure 3.3 – Extract from Landscape Character Areas Plan</p> <p>3.11 The Landscape Character Assessment goes on to assess specific sites in relation to their development potential, although land at Elm Street is not</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>considered in detail in this regard.</p> <p>PUBLIC RIGHTS OF WAY</p> <p>3.12 Footpath number 14-3-FP164 runs in close proximity to the site to the south. The wider land which is in the ownership of our client is bounded by further footpaths as shown within Figure 3.4.</p> <p>Figure 3.4 Extract of Lancashire County Council's PROW Mapping</p> <p>AGRICULTURAL LAND QUALITY</p> <p>3.13 According to the agricultural land quality database, land in this area is considered to be of poor or very poor value. This is identified in Figure 3.5 below.</p> <p>Figure 3.5 Extract of Natural England's Agricultural Land Classification Mapping</p> <p>ECOLOGY</p> <p>3.14 The site is not a statutory Ecological or Heritage asset neither is it within 1 km of a National Nature Reserve, Ramsar Site, Site of Special Scientific Interest or Special Protected Area.</p> <p>SUMMARY</p> <p>3.15 In summary, none of the statutory or other designations identified would preclude development of the site.</p> <p>4. GREEN BELT REVIEW</p> <p>4.1 As part of the evidence base to inform the emerging Local Plan, a Green Belt Review was carried out by LUC with the final report being published in November 2016. The purpose of the review was to carry out an independent and comprehensive assessment of Green Belt within the Borough to inform the preparation of the new Local Plan. One of the key aims of the review was to provide clear conclusions on the relative performance of Green Belt which will enable Rossendale Borough Council to consider whether there are 'exceptional circumstances' (as per Paragraph 83 of the Framework) to justify altering Green Belt boundaries through the Local Plan process to meet development needs.</p> <p>4.2 As previously identified, the Framework sets out five purposes of the Green Belt as follows:</p> <ul style="list-style-type: none"> • To check the unrestricted sprawl of large built-up areas; • To prevent neighbouring towns merging into one another; • To assist in safeguarding the countryside from encroachment; • To preserve the setting and special character of historic towns; and, • To assist in urban regeneration, by encouraging the recycling of derelict and other urban land. <p>4.3 In common with other studies we have reviewed the LUC Green Belt Assessment firstly establishes Green Belt parcels – in this instance there are 80 parcels included within five broad areas of Green Belt. In that respect the subject site falls within Parcel 47, as identified below.</p> <p>Figure 4.1 Extract from Green Belt Review (2016) Green Belt Parcels around Edenfield</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>4.4 Parcels were formed through the identification of land that contains the same or very similar land uses or character bounded by recognisable features. These features are described as:</p> <ul style="list-style-type: none"> • Natural features i.e. substantial watercourses; and • Manmade features i.e. motorways A and B roads, railways. <p>4.5 Less prominent features such as walls, woodland, hedges, tree lines, streams and ditches were also considered where other more permanent boundaries were not present.</p> <p>4.6 Two types of parcel were identified:</p> <ul style="list-style-type: none"> • Areas adjacent to built up areas (relatively small parcels); and • Broad areas of Green Belt that may be more remote from settlement. <p>4.7 The boundary of Parcel 47 is identified in further detail in Figure 4.2 below. Figure 4.2 Extract from Green Belt Review (2016) identifying Parcel 47</p> <p>4.8 An assessment has then been made by LUC as to the ratings of the Green Belt parcels in Rossendale against the first four objectives of including land within the Green Belt as set out in Paragraph 80 of the Framework. Figure 4.3 Extract from Green Belt Review (2016) – Overall Assessment Table Figure 4.4 Extract from Green Belt Review (2016) – Parcel Ratings</p> <p>4.9 It can be seen in Figure 4.3 that the Council’s Green Belt Assessment for Parcel 47 concluded that the parcel has a ‘strong’ role in relation to Purpose 1a and Purpose 1b, a ‘weak’ role in relation to Purpose 2, a ‘moderate’ contribution in relation to Purpose 3 and a ‘weak’ contribution in relation to Purpose 4. Purpose 5 is not detailed within the table given that all sites have been considered as equal in this regard.</p> <p>4.10 We have considered the Council’s Green Belt Review and the analysis of the subject site below.</p> <p>PARCEL 47</p> <p>4.11 The assessment for Parcel 47 states that it lies adjacent to Edenfield and it lies between Edenfield and Rawtenstall.</p> <p>4.12 In our view Parcel 47 is far too broad a study area which has led to skewed conclusions being reached by LUC. In our opinion there is a clear distinction between the western most part of Parcel 47 to that in the east. In that respect we comment on the conclusions reached by LUC below.</p> <p>PURPOSE1A - DOES THE PARCEL EXHIBIT EVIDENCE OF EXISTING URBAN SPRAWL AND CONSEQUENT LOSS OF OPENNESS?</p> <p>4.13 As identified within the assessment of the subject site, the land lies on the edge of Edenfield which forms part of the large built up area of Ramsbottom/Bury. The assessment considers that there are few urbanising features within the parcel and that there is a strong sense of openness. This may be the case for the eastern part of the parcel, however, the area to the west has a strong relationship with the existing urban area and the sense of openness is limited. Parts of the parcel are distinctly different in character and this means the assessment is flawed.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>4.14 The western side of the parcel offers a sensible opportunity to round off the settlement and would not constitute unrestricted sprawl of the built up area.</p> <p>4.15 Result: No contribution.</p> <p>1B - DOES THE PARCEL PROTECT OPEN LAND FROM THE POTENTIAL FOR URBAN SPRAWL TO OCCUR?</p> <p>4.16 Land on the western side of the parcel makes a Weak Contribution to protecting land from the potential for urban sprawl. Containment can be achieved using existing building lines and former field boundaries.</p> <p>4.17 Result: Weak contribution.</p> <p>PURPOSE 2: TO PREVENT NEIGHBOURING TOWNS MERGING INTO ONE ANOTHER</p> <p>4.18 The assessment identifies that although this parcel lies between Edenfield and Rawtenstall, the settlements are 2km apart and so this parcel has a weak role in terms of preventing neighbouring towns merging into one another.</p> <p>4.19 Again, the varying nature of land included within Parcel 47 makes it difficult to make a fair assessment and we consider that land on the western side of the parcel would have no contribution to this purpose.</p> <p>4.20 Result: No contribution.</p> <p>PURPOSE 3: TO ASSIST IN SAFEGUARDING THE COUNTRYSIDE FROM ENCROACHMENT</p> <p>4.21 It is stated within the assessment of Parcel 47 that properties along Plunge Road already give a sense of encroachment in this area.</p> <p>4.22 In our view, existing buildings along Plunge Road, and others to the north along Boundary Edge and Gincroft Lane mark out the limits of the existing urban area. The western part of Parcel 47 does not go beyond these limits and therefore inclusion of some of this land within the urban area would not constitute encroachment. There is no basis for the Council considering that this site has a moderate role in this regard.</p> <p>4.23 Result: No contribution.</p> <p>PURPOSE 4: TO PRESERVE THE SETTING & SPECIAL CHARACTER OF HISTORIC TOWNS</p> <p>4.24 The assessment of Parcel 47 considers its relationship with the historic settlement of Ramsbottom. However, it is concluded that the effects of development within this parcel on the character of the historic settlement are likely to be limited. We therefore agree with the conclusion that the site is rated as 'weak' in this regard.</p> <p>4.25 Result: Weak.</p> <p>PURPOSE 5: TO ASSIST IN URBAN REGENERATION BY ENCOURAGING THE RECYCLING OF DERELICT & OTHER URBAN LAND</p> <p>4.26 It is noted that in line with the methodology all sites have been considered as having an equal contribution to this purpose, though it is not</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>stated what this is.</p> <p>4.27 Result: Equal contribution.</p> <p>OVERALL ASSESSMENT</p> <p>4.28 We consider the assessment which has been carried out for the subject site, which comprises part of the land included within Parcel 47 to be flawed as it overestimates the value of the Green Belt in this location. This is largely due to the fact that the parcel is too large and varied in nature for a fair assessment to be made.</p> <p>4.29 We advocate that our client's land, particularly that to the west, makes a very weak to no contribution to four of the purposes of including land in the Green Belt and the remaining purpose 5 cannot be used for assessment purposes as all of the sites in the Borough are given equal weighting.</p> <p>4.30 In line with the Council's methodology the overall assessment for our client's site should therefore be weak.</p> <p>4.31 We consider the subject site as an appropriate site for release from the Green Belt as it is adjacent to the settlement boundary and has existing development on 3 sides. The site would form a logical extension to Edenfield in this location.</p> <p>4.32 We reserve the right to make further representations in support of the release of the subject site from the Green Belt.</p> <p>5. REPRESENTATIONS</p> <p>5.1 In light of the assessment included within this report, we consider that land at Elm Street, Edenfield should be considered for release from the Green Belt.</p> <p>5.2 Figure 5.1 shows the current Green Belt designation which covers the site in the emerging Local Plan Proposals Map. The extent of the urban boundary of Edenfield is marked with a red line.</p> <p>Figure 5.1 Extract from Local Plan Proposals Map identifying urban boundary</p> <p>5.3 It is clear that the area which lies immediately behind properties on Rochdale Road is enclosed on three sides and, as set out in Section 4 of this report, has a very limited role in terms of the five purposes of the Green Belt as identified in the Framework.</p> <p>5.4 The nature of the existing urban boundary in this location means that this part of the Green Belt provides an opportunity for rounding off the settlement without causing encroachment into the surrounding Green Belt which is more open in nature. In a Borough such as Rossendale which has a significant amount of smaller settlements and a large amount of countryside, it is imperative that sustainable sites on the edge of existing urban areas are fully considered in terms of their ability to meet the Borough's development needs where appropriate. Rossendale is further limited due to its topography and the subject site lies in a relatively flat part of the Borough.</p> <p>5.5 Edenfield is a sustainable settlement and the subject site is within 150m of local services along the high street. The village has good road links to</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>Ramsbottom, Rawtenstall and beyond. Access to the site is achievable via Elm Street.</p> <p>5.6 The site is entirely appropriate for inclusion within the urban boundary of Edenfield. Indeed, part of the wider Green Belt parcel may have a future role in delivering sustainable development beyond the emerging Local Plan period.</p> <p>PROPOSED MODIFICATION</p> <p>5.7 The Council is respectfully requested to modify the proposed urban boundary of Edenfield to include land to the rear of properties along Rochdale Road as shown below.</p> <p>Figure 5.2 Proposed Amendment to Green Belt Boundary</p> <p>5.8 The extension of the urban boundary in this location is considered entirely appropriate having regard for the site's limited Green Belt function and the fact that it is bounded by the urban area on three sides.</p> <p>5.9 We contend that this would properly reflect the provisions of Paragraph 83 of the Framework which sets out that amendments to Green Belt boundaries can only be made in exceptional circumstances and through the local plan process. In addition, the amendment to the Green Belt boundary in this instance would be fully in accordance with Paragraph 84 of the Framework which sets out that such amendments should only be made to facilitate sustainable development patterns.</p> <p>6. CONCLUSIONS</p> <p>6.1 The starting point for consideration of the Council's Local Plan is the well-established principle embodied in Paragraph 158 of the Framework that Development Plans must be based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.</p> <p>6.2 The Framework is clear at Paragraph 83 that Green Belt boundaries can be amended in exceptional circumstances, through the local plan process. Paragraph 84 further states that this can only be done in order to facilitate sustainable development.</p> <p>6.3 It has been highlighted in this Representation that land at Elm Street does not meet the five purposes of the Green Belt as set out in Paragraph 80. As a result, and in order to provide for sustainable development over the plan period, the land should be included within the urban boundary of Edenfield and subsequently it should be removed from the Green Belt.</p> <p>Please see appendix for figures</p>

1485	Mark	Nelson	.		Object	<p>See attached representations</p> <p>1. INTRODUCTION 1.1 Rossendale Borough Council (RBC) is preparing a new Local Plan which will guide the future planning and development of the area. The Council are asking for comments on the Draft Local Plan which will replace the Core Strategy once it is adopted. 1.2 The Draft Local Plan document has been informed by a series of evidence base documents, and previous consultations undertaken on proposed changes to the Urban Boundary and the Green Belt1. 1.3 The evidence base comprises the following documents: • Strategic Housing Land Availability Assessment (SHLAA) - Stages 1 & 2 and Site Assessments 2017 • Strategic Housing Market Assessment (SHMA) 2017 • Employment Land Review 2017 • Green Belt Review 2016 • Environmental Network Study 2017 • Gypsies and Travellers Accommodation Assessment 2016 • Town Centre, Retail, Leisure and Tourism Study 2017 • Playing Pitch Strategy 2016 (previously published) • Strategic Flood Risk Assessment (SFRA) 2016 • Local Plan Viability Study 2015 and Updated Viability Study in relation to Affordable Housing 2017 • Landscape Study 2015 (previously published) • Landscape capacity study for wind energy developments in the South Pennines (2014) (previously published).</p> <p>1.4 Rossendale's Local Plan will designate land and buildings for future uses to meet the Borough's needs and set out what developments should look like and how they should fit in with their surroundings.</p> <p>1 Consultation was undertaken on the Green Belt & Urban Boundary Review between October – December 2012, January 2013 and December 2014, with further comments accepted by the Council during 2015 and 2016 to inform the previous Local Plan Part 2 consultation, which was late withdrawn.</p> <p>1.5 Sites have been proposed for development (such as housing or employment sites), for environmental protection and for recreation uses on the Draft Policies Map. Changes are also proposed to the existing Green Belt and the Urban Boundary. Also, four additional Conservation areas and an extension to an existing Conservation area are being considered.</p> <p>BACKGROUND</p> <p>1.6 Hourigan Connolly is instructed to review and comment on the Draft Local Plan in relation to land at Leabrook Nurseries, Burnley Road, Rossendale. Currently the site is designated as being located beyond the Urban Boundary within the open countryside. On behalf of our client, we seek to promote a change to the Urban Boundary to include the subject site.</p> <p>1.7 This Statement will demonstrate that a change to the Urban Boundary to include the subject site would accord with the criteria set out by the Council as part of their consultation for the Review of existing Green Belt and Urban Boundary in 2012 / 2013 (no update to this appears to be available as part of the 2017 consultation).</p> <p>1.8 The location of the site is shown below, at Figure 1.1.</p>		N/A

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>Figure 1.1 Site Location & Context.</p> <p>1.9 The site itself previously developed and includes the garden centre and associated structures, areas of hardstanding for display and sale of goods and parking areas. These are accessed via an existing bridge from Burnley Road, which also serves the adjacent commercial premises to the south. The site is generally flat though it does slope from west to east in its western part.</p> <p>Figure 1.2 The site, viewed from Burnley Road</p> <p>1.10 The site is bordered to the north by an established belt of trees, lining a farm access road. To the east lie terraced residential properties, whilst to the south lie commercial premises in a mix of uses compatible with this residential location. To the west, the site is bounded by an established belt of mature trees beyond which lies a farmstead converted to residential use.</p> <p>1.11 The site is within walking distance of a number of shops and services, and the topography of the area is conducive to walking, with good, well-surfaced and street-lit footways on both sides of all the roads in the area. There are a number of facilities within a 5km cycling distance of the site, including primary, secondary and further education facilities, convenience and large-format foodstores, accessible via traffic-free routes. The site also lies on an established bus route with regular facilities calling the bus stops immediately adjacent to the site.</p> <p>1.12 It is beyond question that the site is sustainably located.</p> <p>OVERVIEW</p> <p>1.13 The starting point for consideration of the Draft Local Plan document is the well-established principle embodied in Paragraph 158 of the National Planning Policy Framework (hereafter referred to as the Framework) that Development Plans must be based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.</p> <p>1.14 On behalf of Mr M Nelson we strongly recommend that the Council redraw the Urban Boundary so that it includes the area of land subject to this Representation to properly reflect the up-to-date position on the ground.</p> <p>1.15 Needless to say, we will wish to participate in the Examination in Public and attend the relevant hearings and will make further representations at the Regulation 19 Submission stage.</p> <p>2. LEGISLATIVE & POLICY CONTEXT</p> <p>INTRODUCTION</p> <p>2.1 In this Chapter we set out the relevant legislative and policy context before going on to examine the Council's Development Strategy.</p> <p>LEGISLATIVE CONTEXT</p> <p>2.2 Part 2 of the Planning & Compulsory Purchase Act 2004 (As amended) deals with Local Development.</p> <p>2.3 The Rossendale Borough Council Local Plan is being brought forward following changes to the Development Plan making system in England which</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>are set out in the Localism Act 2011. Part 6 Sections 109 – 144 of the Localism Act deal with Planning.</p> <p>2.4 Following revocation of the North West Regional Strategy (RS) in May 2013, Council’s such as RBC will set their own housing and employment targets against objectively assessed needs.</p> <p>2.5 The Town & Country Planning (Local Planning) (England) Regulations (SI No. 767) came into force on 6 April 2012 and will guide the preparation of Local Plans.</p> <p>MINISTERIAL STATEMENTS</p> <p>2.6 In his Written Statement of 23 March 2012 the then Minister for Decentralisation and Cities the Rt. Hon Greg Clark MP referred to a pressing need to ensure that the planning system does everything it can to help England secure a swift return to economic growth. He urged local planning authorities to make every effort to identify and meet the housing, business and other development needs of their areas.</p> <p>2.7 The National Planning Policy Framework (hereafter referred to as the Framework) (see below) was subsequently published on 27 March 2012 and urges local planning authorities to boost significantly the supply of housing.</p> <p>2.8 In his Written Statement of 6 September 2012 the Secretary of State for Communities and Local Government the Rt. Hon Eric Pickles MP noted an increase in house building starts between 2009 and 2011 but said that there was far more to do to provide homes to meet Britain’s demographic needs and to help generate local economic growth.</p> <p>2.9 There can be no doubt that house building is a driver of the local economy besides providing homes for local people.</p> <p>FRAMEWORK REQUIREMENTS</p> <p>2.10 Paragraphs 150 to 185 of the Framework deal with Plan-making.</p> <p>2.11 The importance of the Local Plan is identified as the key to delivering sustainable development and a cornerstone of the development management process (Paragraph 150 refers).</p> <p>2.12 The requirement for Local Plans to be prepared with the objective of contributing to the achievement of sustainable development is embodied in Paragraph 151 of the Framework and stems from the requirements set out under Section 39(2) of the Planning & Compulsory Purchase Act 2004. Local Plans must also be consistent with the principles and policies of the Framework.</p> <p>2.13 Paragraph 152 of the Framework requires local planning authorities to seek opportunities to achieve and secure net gains for each of the three dimensions of sustainable development. These three dimensions are defined in Paragraph 7 of the framework as economic, social and environmental. According to Paragraph 7 of the Framework these dimensions give rise to the need for the planning system to perform a number of roles:</p> <ul style="list-style-type: none"> • “an economic role – contributing to building a strong, responsive and 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure;</p> <ul style="list-style-type: none"> • a social role – supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community’s needs and support its health, social and cultural well-being; and • an environmental role – contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy”. <p>2.14 Paragraph 8 of the Framework states that the roles mentioned in Paragraph 7 should not be undertaken in isolation, because they are mutually dependant and should be sought jointly and simultaneously through the planning system.</p> <p>2.15 The importance of Local Plans taking into account local circumstances is highlighted in Paragraph 10 of the Framework to ensure that they respond to the different opportunities for achieving sustainable development.</p> <p>2.16 Paragraph 152 of the Framework goes on to deal with adverse impacts on any of the dimensions of sustainable development and sets out three tests:</p> <ul style="list-style-type: none"> • Firstly significant adverse impacts on any of the dimensions should be avoided, and where possible, alternative options which reduce or eliminate such impacts should be pursued. • Where adverse impacts are unavoidable, measures to mitigate the impact should be considered. • Where adequate mitigation measures are not possible, compensatory measures may be appropriate. <p>2.17 Paragraph 154 of the Framework requires Local Plans to be aspirational but realistic and address the spatial implications of economic, social and environmental change.</p> <p>2.18 The requirement for local planning authorities to set out strategic priorities for their areas in their Local Plans is established in Paragraph 156 of the Framework. Such policies are required to deliver:</p> <ul style="list-style-type: none"> • “the homes and jobs needed in the area; • the provision of retail, leisure and other commercial development; • the provision of infrastructure for transport, telecommunications, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat); • the provision of health, security, community and cultural infrastructure and other local facilities; and 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<ul style="list-style-type: none"> • climate change mitigation and adaptation, conservation and enhancement of the natural and historic environment, including landscape”. <p>2.19 The importance of using a robust and proportionate evidence base for Plan making is dealt with in Paragraphs 158 to 177 of the Framework. Paragraph 158 is of particular relevance to these submissions: “Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local planning authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals”.</p> <p>2.20 A number of topics are discussed and for the purpose of this document we will focus on housing (Paragraph 159), business (Paragraphs 160 – 161), infrastructure (Paragraph 162) and environment (Paragraphs 165 – 168). HOUSING</p> <p>2.21 Paragraph 159 outlines the importance of preparing a Strategic Housing Market Assessment (SHMA) to assess full housing needs and a Strategic Housing Land Availability Assessment (SHLAA) to establish realistic assumptions about the availability, suitability and the likely economic viability of land to meet the identified need for housing over the plan period.</p> <p>2.22 Of particular importance is the requirement for the SHMA to identify the scale and mix of housing and the range of tenures that the local population is likely to need over the Plan period which:</p> <ul style="list-style-type: none"> • “meets household and population projections, taking account of migration and demographic change; • addresses the need for all types of housing, including affordable housing and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes); and • caters for housing demand and the scale of housing supply necessary to meet this demand”. <p>BUSINESS</p> <p>2.23 Paragraph 160 of the Framework outlines the importance of local planning authorities having a clear understanding (from a robust evidence base) of business needs within the economic markets operating in and across their area.</p> <p>2.24 Paragraph 161 of the Framework establishes the importance of understanding business needs (both quantitative and qualitative) and ensuring that sufficient suitable land (both existing and future) is available to meet needs.</p> <p>INFRASTRUCTURE</p> <p>2.25 An objective of government policy is the delivery of growth. Central to this objective is ensuring that infrastructure has the capacity or can be</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>enhanced to deliver growth. A number of factors are outlined in Paragraph 162 of the Framework which need to be considered at a local level including transport, water, foul drainage, energy, telecommunications, waste, health, social care, education, flood risk and coastal change management.</p> <p>ENVIRONMENT</p> <p>2.26 Paragraphs 165 to 168 of the Framework deal with environmental matters and set out the requirement that a sustainability appraisal which meets the requirements of the European Directive on strategic environmental assessment should be an integral part of the plan preparation process, and should consider all the likely significant effects on the environment, economic and social factors.</p> <p>SOUNDNESS</p> <p>2.27 Paragraph 182 of the Framework deals with the examination of Local Plans. The Local Plan will be examined by an independent inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. Local planning authorities are required to submit Plans for examination which they consider “sound” – namely that they are:</p> <ul style="list-style-type: none"> • “Positively prepared – the plan should be prepared based on a strategy which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development; • Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence; • Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and • Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework”. <p>NATIONAL PLANNING PRACTICE GUIDANCE</p> <p>2.28 The NPPG replaces some 230 planning guidance documents but will result in no amendments to the Framework.</p> <p>2.29 The Housing and Economic Land Availability Assessment section of the NPPG is worthy of specific mention in relation to this Submission, in particular paragraph 030 (reference ID: 3-030-20140306 confirms): Housing requirement figures in up-to-date adopted Local Plans should be used as the starting point for calculating the five year supply. Considerable weight should be given to the housing requirement figures in adopted Local Plans, which have successfully passed through the examination process, unless significant new evidence comes to light. It should be borne in mind that evidence which dates back several years, such as that drawn from revoked regional strategies, may not adequately reflect current needs.”</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>2.30 The NPPG deals with deliverable sites as follows at paragraph 031 (Reference ID 3-031-20140306): WHAT CONSTITUTES A 'DELIVERABLE SITE' IN THE CONTEXT OF HOUSING POLICY? Deliverable sites for housing could include those that are allocated for housing in the development plan and sites with planning permission (outline or full that have not been implemented) unless there is clear evidence that schemes will not be implemented within five years. However, planning permission or allocation in a development plan is not a prerequisite for a site being deliverable in terms of the five-year supply. Local planning authorities will need to provide robust, up to date evidence to support the deliverability of sites, ensuring that their judgments on deliverability are clearly and transparently set out. If there are no significant constraints (e.g. infrastructure) to overcome such as infrastructure sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a five-year timeframe. The size of sites will also be an important factor in identifying whether a housing site is deliverable within the first 5 years. Plan makers will need to consider the time it will take to commence development on site and build out rates to ensure a robust five-year housing supply</p> <p>2.31 In regards to how often a Local Plan should be reviewed, the NPPG states at paragraph 008 (Reference ID 12-008-20140306) that: HOW OFTEN SHOULD A LOCAL PLAN BE REVIEWED?</p> <p>To be effective plans need to be kept up-to-date. Policies will age at different rates depending on local circumstances, and the local planning authority should review the relevance of the Local Plan at regular intervals to assess whether some or all of it may need updating. Most Local Plans are likely to require updating in whole or in part at least every five years. Reviews should be proportionate to the issues in hand. Local Plans may be found sound conditional upon a review in whole or in part within five years of the date of adoption.</p> <p>3. DRAFT LOCAL PLAN POLICIES</p> <p>POLICY SD1 PRESUMPTION IN FAVOUR OF SUSTAINABLE DEVELOPMENT</p> <p>3.1 This policy is in line with the Framework and supports sustainable development in accordance with the Local Plan, unless material considerations indicate otherwise. In addition, where policies are out of date or irrelevant the Council will grant permission unless material considerations indicate otherwise, taking into account any adverse impacts that would demonstrably outweigh the benefits or any specific policies in the Framework that indicate development should be restricted.</p> <p>3.2 This policy is supported as it is directly in line with the Framework.</p> <p>POLICY SD2 URBAN BOUNDARY AND GREEN BELT</p> <p>3.3 This policy seeks to restrict new development to within the Urban Boundary, except where development specifically needs to be located within a countryside location and the development enhances the rural character of the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>area.</p> <p>3.4 The principle of this policy is supported; however, the proposed extent of the Urban Boundary is not. We consider that there is scope within the Borough to further revise the line of the Urban Boundary to accommodate the level of growth required to ensure the Borough's growth is sustainable and meets the aspirations of the Council moving forward.</p> <p>SUGGESTED MODIFICATION</p> <p>3.5 The Council should change the Urban Boundary to include the subject site within this boundary line to further deliver a sustainable level of growth. To change the Urban Boundary at this location would be sound and would not harm the objectives of the Local Plan and would accord with the Council's criteria set out in the Review of the Urban Boundary.</p> <p>3.6 The detailed proposed amendment to the Urban Boundary is shown in the following Chapter.</p> <p>HS1 HOUSING</p> <p>3.7 This Policy sets out the need to provide at least 4,000 additional dwellings over the plan period (2019-2034), equating to 265 dwellings per annum. The policy seeks to address prior under-provision in the first five years of the plan period, by increasing the annual requirement to 350 in the first five years. This strategy is supported.</p> <p>3.8 It is however noted that the SHMA sets out a range of need from 265-335 dwellings per annum, it is therefore questionable as to why the Council has simply chosen the lower end of this range, rather than opting for an aspirational target to ensure need is met and sustainable growth achieved.</p> <p>4. PROPOSED AMENDMENT TO THE URBAN BOUNDARY</p> <p>INTRODUCTION</p> <p>4.1 Previous consultations by the Council on the Review of the Green Belt and Urban Boundary has resulted in a number of proposed changes to the Urban Boundary line as shown on the draft Proposals Maps². The Council used a number of criteria to assess whether a change to the Urban Boundary would accord with the purpose of the Urban Boundary to clearly define and differentiate between designated settlements, Countryside and Green Belt.</p> <p>4.2 The subject site is situated with quick and direct access by public transport to Burnley to the north and Rawtenstall to the south with both towns via Burnley Road (A682). The bus stops adjacent to the site are served by the X43 'Witch Way' bus service which provides an express service into Manchester City Centre.</p> <p>4.3 Our proposed amendment is shown below:</p> <p>Fig. 4.1 Current Draft Boundary</p> <p>² The Council has produced a Borough-wide Proposals Maps and a number of Ward Proposals Maps.</p> <p>Fig. 4.2 Proposed Draft Boundary (site indicated by red dot)</p> <p>4.4 By assessing the inclusion of the site within the Urban Boundary against</p>

						<p>the Council's criteria (as listed above), we reach the following conclusions: (Table)</p> <p>1 The Urban Boundary will be amended to correct any cartographic errors, anomalies and inconsistencies where:</p> <p>(a) Boundaries are inaccurately drawn, or: The current Urban Boundary in this location is some 20 years out of date and do not reflect the urban area on the ground.</p> <p>(b) Do not follow strong, robust and permanent boundaries, on the ground, or: The boundary should include the subject site which would be bounded by a clearly defined boundary line associated with the established boundaries to the garden centre. The new boundary would be well established, permanent and robust.</p> <p>(c) Areas of land no longer read as part of the wider built up area, or: N/A</p> <p>(d) Areas of land clearly read as part of the wider built up area : This site reads as part of the built-up area along Burnley Road, where there is already development on both sides of the main road.</p> <p>2 To meet the Borough's future development and community needs, additional land will be considered for inclusion within the Urban Boundary where</p> <p>(a) It is capable of being developed sustainably and integrated into the existing built-up area, and: Yes. The site is sustainably located and is already integrated into the existing built-up area.</p> <p>(b) It would not adversely affect aspects of the natural environment unless it is capable of full mitigation, and: Yes. There would be no adverse effect.</p> <p>(c) It would not result in the amalgamation of settlements or adversely affect the character of the settlement; and: Yes. There would be no amalgamation of settlements or adverse effect on the character of the settlement.</p> <p>(d) It would not adversely affect heritage assets or their setting, and: N/A</p> <p>(e) It is capable of being developed without a significant adverse impact on local views and viewpoints, including where appropriate the use of appropriate mitigation measures : Yes. Development could be achieved without significant impact.</p> <p>3 Open land on the edge of existing settlements will be excluded from the Urban Boundary where it has existing recreational or community value (e.g. playing fields, allotments, playgrounds etc) to ensure it remains undeveloped: The site is not used for recreational purposes.</p> <p>4.5 The subject site is sustainably located and any future development, would represent sustainable development, which the Framework establishes a presumption in favour of.</p> <p>4.6 The Framework also encourages Local Planning Authorities to positively seek opportunities to meet the objectively assessed development needs of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>their area unless, inter alia, any adverse impacts of doing so would significantly and demonstrably outweigh the benefits.</p> <p>4.7 With this in mind, we would recommend that the draft Proposals Map for be revised to reflect the urban area correctly so that the land at Leabrook Garden centre is included within the Urban Boundary.</p> <p>4.8 We reserve the right to add to make further submissions to the Council during the Local Plan preparation period.</p> <p>5. CONCLUSIONS</p> <p>5.1 The Council should amend the Urban Boundary to include the subject site within this boundary line to further deliver a sustainable level of growth and to properly reflect the lie of the land. To amend the Urban Boundary at this location would be sound and would not harm the objectives of the Local Plan and would accord with the Council's criteria set out in the Review of the Urban Boundary.</p>		
1531	Christine	Storey	-		Object	I objected to this land being taken off greenbelt		-
1537	John	McGuinness	-		Object	I do not agree with the extension of the urban boundary into the former green belt areas. Rossendale is a beautiful place to live and these intrusions into greenbelt land will bring us a blighted landscape. - Loss of wild life habitat will also be impacte		You seem to be trying to implement a plan where nearly all patches of green within the urban boundary are built on. The hillsides may be green (for now) but all small breathing spaces seem to be a target for building on. Sustainable; how can building more houses on any green area be sustainable? Once land is lost to development, it's lost forever.

1549	Jane	Sacks		Urban boundary change off Goodshaw Lane	Object	<p>My purpose in writing is to bring to your attention my concerns regarding the above proposed redrawing of the Urban Boundary.</p> <p>You will note that I do not live in the areas, but I am a regular worshipper at St Marys & All Saints Church and I also attend many other events held there. I used to live in a house off the lane, and am very aware of the dangers of driving or walking in the area, because of the lack of pavements, the narrowness of the land and the "blind" corners.</p> <p>As this stand at the moment, it is a very difficult area to negotiate. There is a weekly Toddler Group at Church, and carers often need to park quite some distance from the venue and then negotiate their way in with babies, prams etc. In addition, a Community Lunch is held, and many guests have mobility problems. There is only a small length of pavement before the car parking at Harvey Longworth Couth and the Church building, and no parking or pavements whatsoever at the other side of the building going down the lane. I attended an event this morning, when a resident from Harvey Longworth Court had extreme difficulty in manoeuvring out of the car park because of cars parked on the other side of the lane (even though they were partly parked on the grass verge). Whilst this was occurring, vehicles were blocked in either direction.</p> <p>It is also challenging for churchgoers with disability to access the Church building even now, as we have no parking of our own and (naturally) are not allowed to park at Harvey Longworth Court since more of their residents are now car owners.</p> <p>In addition, when there are Weddings, Baptisms and Funerals it is not just difficult to find parking but the lane is completely blocked when a car or hearse needs to stop outside. It is already hazardous to try to walk in this area, due to the lack of pavements, and (over the years) the increased volume of traffic. It can be fraught with danger, as people have to squeeze into hedgerows or walls to let vehicles pass.</p> <p>If Planning Officers view this area in the middle of a weekday it will not immediately be apparent how hazardous this stretch of road can be, but I ask that my objections be taken into account when this proposal is considered.</p> <ul style="list-style-type: none"> - This plan would pave the way for properties to be built that would undoubtedly increase the volume of traffic in this area, with all the attendant risk this would bring. - Access and parking for the Church is already problematic and could only be exacerbated by allowing more houses on this site.

1560	Stephen	Alderson	Alderson and Horan Funeral services Limited		Object	<p>I wish to offer an objection to the proposed boundary change, adjacent to St Mary's and All Saints' Church extending down to Goodshaw lane, Crawshawbooth.</p> <p>As the local funeral directors in Crawshawbooth, we use this church for many of our funerals within the village and we are concerned that the increase in use of this lane and the added volume of more traffic and parking in this area would cause serious problems with parking the hearse at the church entrance due to the road being very narrow, so turning the hearse and other funeral vehicles would prove impossible.</p> <p>Therefore, I would be grateful if ask you could take these issues into consideration when making your decision.</p>		
1565	Richard	Hardman		Designation of land on draft policies map	Object	<p>On behalf of myself and the three other co-owners of the land lying to the south of Newchurch Road at Cowpe, which is registered under Land Registry Title No. LAN74318 in our names, I am returning your questionnaire, in which I have indicated that our objection is to the designation on the Draft Policies Map 2017 of part of our land as "Greenland", as distinct from "Green Belt". The alnd in relation to which our objection arises is indicated on the atatched plan and the position is further explained in the "Comments" section on the Questionnaire.</p> <p>Our objection is to the description or designation as "Greenland" of the areas which we have indicated in red on the attached copy of the Draft Policies Map 2017 and also on the plan (marked "Plan A"), which we have attached to this Questionnaire. We submit that the areas, which we have so indicated, should be described or desiganted as "Green Belt" and not as Greenland. Part of the land, which we have marked or edged in red is occupied by garages, part is the front garden of number 2 Hardman Drive and the remainder should have the same description or designation as the land immediately to the north of it (being "Green Belt").</p>

1581	H P	Barlow			Object	<p>I would like to notify you of my objections to the proposed amends to the Urban Boundary and Green Belt, Local Plan Housing allocation site HS71- and Policy HS3 Edenfield.</p> <p>My primary reasons for objection are that the proposals in the draft Local Plan contravene advice in various components of Rossendale Council Evidence base documents i.e. Strategic Land Availability Assessment (SHLAA) -Site Assessment 2017, Green Belt Review 2016 and Sustainability Appraisal of the Rossendale Local Plan, Landscape Study 2015 and central government guidelines/policies. Rossendale Council has also failed to provide residents with substantial Infrastructure evidence to support the proposals.</p> <p>Objections</p> <p>1.HS2.71- Removal of the Urban Boundary and Green Belt Sites identified for removal from the Green Belt especially in the southwest - Edenfield area, all have a potential harm to the surrounding environment, score moderately/Strong against the Planning Advisory Guidance (PAG) on the purpose of the Green Belt (Rossendaie Council Green Belt Review document). The parcels of land HS2.71 forms a large open area to the west of Edenfield village. At present this area of land performs a valuable contribution to prevent urban sprawl in particular to the northwest of the village. The loss of the Green Belt would result in the loss of characteristic linear settlement and encourage urban sprawl. A view supported by the Sustainability Appraisal of the Rossendale Local Plan (3.6.7). The PPG Green Belt purpose 1- states removing areas of Green Belt should not result in urban sprawl. If this area were removed from the Green Belt it would result in urban sprawl and have negative implications on village of Edenfield and local community.</p> <p>Government Guide lines and case law (Properties Development Ltd v Lichfield DC [2015] EWHC 2077) states that alterations to the Green Belt boundary require local authority to demonstrate exceptional circumstances. Rossendale Council has not provided any evidence to meet this criterion. The proposed alternation to the Urban Boundary and Green Belt parcel HS2.71 should be withdrawn from the draft Local Plan, as the council has failed to demonstrate exceptional circumstances.</p>

1582	Jean	Stewart			Object	<p>My last letter, received from MrX (18 Sept 14), in reply to mine of 8 Sept 14 outlining my various objection to the repositioning of the urban boundary RCGL(UB)6. This letter states that the Council was no longer proposing to take the site forward as a Boundary change. The onus being on the landowner to demonstrate that suitable access could be provided. As far as I am aware this has no happened.</p> <p>After the last round of consultations it was decided no to take this forward. Main reason for this decision was access, together with possible flood damage, loss to local dog walkers, runners etc. not to forget pupils of Alder Grange. I would also like to add that badgers, foxes and other wild life make this site 'their own' as it if presently countryside.</p> <p>In my humble opinion moving the present Urban Boundary before access has been resolved is like putting the cart before the horse!</p> <p>A neighbour and I visited the Rawtenstall venue where we viewed the various maps of the Borough. I must admit to being a little confused as the Boundary appeared already to have been moved to a different area. I questioned whether we were due for development but was answered our site was not scheduled in the near future.</p> <p>My objections to the development are very strong as I feel in addition to aforementioned reasons, that amongst other things, traffic in Rawtenstall is already at almost crisis level with no visible signs, or indeed promises of resolutions to ease congestion. Schools, medical facilities and other services are all under tremendous pressure. Newchurch Road is one such area. The swimming pool sports centre and future garden centre all add to more local traffic.</p>		
1592	Warren	Hilton	Highways England		Not Applicable	<p>SD2: URBAN BOUNDARY AND GREEN BELT</p> <p>The Local Plan makes reference to the settlement boundaries set out within the Policies Map and states that Sustainable Development will generally be permissible in such locations. Development in rural areas will be supported if there is an identified need for such activity in the area.</p> <p>The Policy states: ‘All new development in the Borough will take place within the Urban Boundaries, defined on the Policies Map, except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area’</p> <p>Key Point: The Council recognises the importance of Sustainable Development as identified within the NPPF and it will work proactively to ensure that such developments are delivered within the Borough.</p>

1616	Janet	Simpson			Object	<p>Proposed changes to the Green Belt boundary - Objection</p> <p>I wish to lodge an objection to the proposed changes to the Green Belt, Urban Boundary and Countryside as shown on the South West map in relation to land parcels 30 and 31.</p> <p>NPPF paragraph 79 states that 'The Government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence.' One of the five purposes of the Green Belt is 'to assist in safeguarding the countryside from encroachment.' (NPPF Para 80 – number 3).</p> <p>The proposed changes to the Green Belt boundary in Helmshore are contrary to the fundamental aims outlined above for the following reasons.</p> <p>In the assessment criteria for Purpose 3 (NPPF Green Belt Purposes – to assist in safeguarding the countryside from encroachment) a Moderate rating is where a 'parcel of land contains the characteristics of countryside, has limited urbanising development, and is relatively open.'</p> <p>The current Green Belt boundary is clearly defined by Helmshore Road and Free Lane. In 'The Green Belt Review' document para 3.19 in terms of permanence 'it is recognised that there are benefits in using features which are clearly defined and which also play a physical and/or visual role in separating town and countryside to act as Green Belt boundaries.'</p> <p>There are no such strong physical features to define the proposed new Green Belt boundaries. As such there is nothing to prevent incremental encroachment into the Green Belt in the future.</p> <p>By moving the boundary away from the roads, and so allowing the potential for development/urbanisation on the land released, the Green Belt would lose the essential characteristic of openness it currently has in this area of Helmshore.</p> <p>Land Parcel 30</p> <p>In the proposed changes to the Green Belt, Urban Boundary and Countryside document Land Parcel 30's notes on Purpose 3 state that 'there is a sense of encroachment with the parcel as a result of a cluster of residential properties, facilities of Sunnybank Social Club and a children's play area' so that 'the north of the parcel has a somewhat weakened rural character.'</p> <p>This assessment does not take into account the length of time the properties etc have been situated here, nor the fact that they have not been classed as 'encroachment' in previous Local Plan reviews, where they have been included within the Green Belt boundary.</p> <p>Sunnybank Social Club and Helmshore Memorial Park (which includes the playground) have both been in their locations for over 100 years. Likewise the residential properties are mainly a farmhouse and cottage which have been on site for over 300 years, with associated farm buildings having been</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>converted or re-built on the original building's footprint. In this respect there has been no recent 'encroachment'. Other buildings/structures associated with equestrian use are recognised as accepted use in rural areas (Rossendale Borough Council's Core Policy LT5).</p> <p>The Review of the Green Belt considers that the Potential Degree of Harm caused by the removal of this area from the Green Belt to be Medium. However, this parcel is adjoining a large area of land where the Degree of Harm is considered High. If this parcel were to be removed the threat to the Green Belt would be increased.</p> <p>NPPF Para 81 states that 'once Green Belts have been defined, local planning authorities should plan positively ... to retain and enhance landscapes, visual amenity and biodiversity.' Therefore this parcel of land should remain within the Green Belt, not only for its own value, but also to protect this whole section of Green Belt and the adjoining Biological Heritage Site (BHS).</p> <p>Draft Local Plan</p> <p>There are various policies in the draft Local Plan which strongly support the case of the Green Belt boundary not being moved in this part of Helmshore. Briefly there are:</p> <p>Policy ENV4: Landscape Character and Quality</p> <p>'In order to protect and enhance the character and quality of the landscape, development proposals should:</p> <p><input checked="" type="checkbox"/> Retain and, where possible, enhance key views'</p> <p>'The Borough's landscape is significant in terms of its local identity ... and general contribution to quality of life and it is essential that it is protected.'</p> <p>Whilst the council are proposing the above policy for new builds, the same protection should be applied to existing properties. Visitors often comment that views from the properties at Tor View Farm are considered some of the best in Rossendale. Indeed the views were considered a selling point when one of the properties was recently up for sale.</p> <p>Policy ENV5: Biodiversity, Geodiversity and Ecological Networks</p> <p>'Ecological networks should be conserved, enhanced and expanded.'</p> <p>NPPF Para109 also states that 'the planning system should contribute to and enhance the natural and local environment by:</p> <p><input checked="" type="checkbox"/> Recognising the wider benefits of ecosystem services;</p> <p><input checked="" type="checkbox"/> Minimising impacts on biodiversity and providing net gains in biodiversity where possible, contributing to the Government's commitment to halt the overall decline in biodiversity, including establishing coherent ecological networks that are more resilient to current and future pressures.'</p> <p>This parcel of land forms part of the ecological network in Helmshore, allowing linkages between the different areas of landscape and biodiversity. If these linkages are broken this would leave wildlife vulnerable as a result of the loss of habitat, pressure on remaining habitat etc. The serious decline in various species of British wildlife is well documented and by releasing even</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>small parcels of land for development further pressure is placed on the remaining habitats and the populations these can realistically support.</p> <p>Policy ENV6: Green Infrastructure</p> <p>'Schemes which would result in a net loss of green infrastructure on-site will only be permitted if:</p> <ul style="list-style-type: none"> • The proposals would not have an unacceptable impact on amenity, surface water run-off, nature conservation or the integrity of the green infrastructure network. <p>Green Infrastructure refers to the network of Rossendale's multi-functional green spaces, corridors and waterways ("blue infrastructure"), which provide multiple social, environmental benefits, and enhance quality of life. It has an important role in providing habitats and migratory routes for many plants and animals.'</p> <p>NPPF Para 114 also states that ' Local planning authorities should:</p> <p>☑ Set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity and green infrastructure.'</p> <p>The above policies (local and national) support my previous comments about loss of habitat and maintaining links and ecological corridors. In addition the reference that green infrastructure should 'enhance quality of life' is particularly relevant as the removal of this land from Green Belt and the protection from development which that status currently provides would have a detrimental effect on the quality of life enjoyed not only by the current residents in the properties at Tor View Farm, but also those at Snig Hole and in the immediate surrounding area, visitors to Helmshore Memorial Park, and those using the Public Right of Way and National Cycle Route.</p> <p>Land Parcel 31</p> <p>Many of the points raised in relation to Land Parcel 30 are also relevant to Parcel 31. For brevity I won't repeat them but these should be recorded as part of my objection.</p> <p>However I would repeat the point about the proposed new Green Belt boundary not having a permanent physical feature to provide a strong boundary.</p> <p>I've also noted that part of the adjacent Biological Heritage Site falls outside the proposed Green Belt boundary which could make this section vulnerable from development and fragmentation.</p> <p>Given all of the above the Green Belt boundary in this part of Helmshore should remain where it is currently to prevent inappropriate and unnecessary development, to protect ecological networks and biodiversity in the area and safeguard the integrity of Green Belt beyond the Local Plan period.</p>

1617	Alex	Smurthwaite			Object	<p>I'm writing to you to express my opinion on the moving of the urban boundary affecting the area round Goodshaw Lane. I am a resident in the area and believe that there are several issues with the idea.</p> <p>Firstly, If development was to take place it would cause a huge increase in the amount of traffic, making it much more dangerous for children and parents leaving the grounds of Crawshawbooth Primary School. Obviously it is in everyone's best interest to keep our local area as safe for everyone as possible. Secondly, the area round Goodshaw Lane is very picturesque, many of the residents of Crawshawbooth and Loveclough use the area to walk dogs, horse ride and cycle. Not only would development make it more dangerous for people to partake in these activities. It would also massively distract from the enjoyment factor. Personally I believe we should do all we can to protect the green areas of our community. Moving the urban boundary is doing exactly the opposite and will undoubtedly lead to further development.</p> <p>Thirdly, there are several heritage sites in the area. Most notably St Mary's church and Goodshaw Chapel which dates back to 1760. I believe moving the urban boundary will place these sites in a very risky position. All too often we see beautiful old buildings bought out and demolished, only to be replaced by a modern, cheaply build monstrosity. This goes back to my previous point that taking care of our local area should be everyone's top priority.</p> <p>In conclusion I believe the entire concept is a frankly ridiculous proposition with absolutely no benefits to the local community and its residents.</p> <p>I hope you take my views into account and I look forward to hearing back from you.</p>		
1622	John & Maggie	Clegg		land east of Goodshaw Lane	Object	<p>I wish to register my objection to the possible boundary changes on land east of Goodshaw Lane below St Mary and All saints C.E Church. My reasons for objecting are as follows</p> <ol style="list-style-type: none"> 1 .The possibility of further housing means increased traffic on an already busy narrow lane which has extremely limited parking. 2.The lane is well used twice a day by parents taking their children to Crawshawbooth County Primary School.It is also used by children making their own way to school. 3.Goodshaw Lane at this particular point is always extremely congested when any event takes place at St Mary and All saints Church. 4. The lane is also well used by pedestrians, ramblers and horses, which would all be adversely affected by increased traffic. 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
1633	Carol	Hayman		SHLAA16196	Object	<p>1. The possibility of further development would mean more traffic on an already busy single track lane. There is no space for parking and very few passing places.</p> <p>2. The lane is used by lots of children walking to and from school both on their own and with parents, leisure walkers, horse riders and cyclists. If the volume of traffic increases it will only be a matter of time before there is a tragic accident.</p> <p>3. Rossendale is beginning to encourage rural tourism encouraging walkers and cyclists to the area, we need to protect our assets from developers who are only interested in personal gain.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
1634	Jean and David	Pilling		SHLAA16196	Object	<p>We wish to register our objection to the proposal to incorporate the land described as being to the East of Goodshaw Lane and referred to as SHLAA 16196 into the urban boundary.</p> <p>There are many reasons why this should not be done but we believe that the most compelling reason is the fact that without substantial investment the lane will simply be unable to cope with the increased traffic. The proposal envisages the eventual provision of housing which will lead to traffic which the lane was never designed to cope with and the danger to both adults and children will be totally unacceptable.</p> <p>The recent traffic counter will no doubt give some interesting results but we believe that other than showing the number of vehicles using the lane it will fail to show how these vehicles use the lane, parking and reducing even the widest part of the lane to a single vehicle width and, from time to time, blocking the lane entirely – sometimes for an extended period.</p> <p>Starting at the bottom of the lane the used car dealership finds it necessary to store vehicles on the lane, reducing access considerably. Complaints from residents have fallen on deaf ears.</p> <p>Moving along to the houses on the left hand side at the beginning of the lane; having no offstreet parking they are forced to park on the road. This wasn't helped when the houses on Albert Road (which links the bottom end of the lane with Burnley Road) were told recently that they were not allowed to park on Albert Road and have moved their vehicles to Goodshaw Lane</p> <p>School starting time is particularly difficult when parents park in the lane to drop off their children. We timed the photograph opposite so as not to include children in the picture but with bags and children in the road during unloading operations the area is crowded and dangerous. When a vehicle travelling down the lane has to reverse to allow passage of a vehicle travelling up the lane it becomes particularly hazardous.</p> <p>St Mary and All Saints' church is another danger spot. A recent coffee morning led to cars parked in both directions up and down the lane. Sunday services lead to a similar situation and a funeral can lead to obstruction of a different order entirely; the hearse stops to unload the coffin, the mourners in the following cars want to accompany the coffin into the church and so the following cars are parked higgledy-piggledy occasionally blocking the entire lane for the duration of the service.</p> <p>We have little recent experience of the lane after its junction with Goodshaw Avenue as it's too narrow, overgrown and winding to be navigated safely – a fact which speaks for itself.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
1638	Craig	Bell		SHLAA16196 Land east of Goodshaw Lane	Object	<p>We would like to put on record our vigorous objection to the proposed move of the Urban Boundary on land to the east of Goodshaw lane, Crawshawbooth which would no doubt then allow more building of houses to commence on this land.</p> <p>We live at X Goodshaw Lane, on the stretch of lane below the proposed area near the bottom of Goodshaw Lane, a area of lane which already has very limited car parking and is extremely crammed with vehicles which makes for difficult driving up and down the lane. We already have a ridiculous amount of traffic using the lane that do not even live on here but use it to get to housing estates higher up. Building more houses in the area proposed would make the problem a whole lot worse. Vehicle speed on the lane is also a massive issue with residents on the lower stretch of this lane. We have previously asked the council for measures to reduce vehicular access, limit (preferably STOP!!) large lorries including massive articulated ones, who seem to follow sat-nav instructions with deliveries to farms higher up Goodshaw Lane, but this will no doubt make things even worse!!. This lane is a single track Lane with varying bends and very steep climbs. These lorries should not be accessing Goodshaw Lane at the Crawshawbooth end and should be using Goodshaw Avenue to go to the upper farms. We have previously asked for speed humps on the lower section of Goodshaw Lane to reduce the speed of cars. The proposed area, and following building of houses, will make this matter worse.</p> <p>As a resident of Goodshaw Lane for all my life (50 years) the east side of the lane has always been in the "Green Belt" and allowing this boundary to be moved in this instance would no doubt instigate more areas being opened up for similar building areas. This is a quiet residential area which is already becoming a busy location and more houses will mean more disruption and more cars, noise, accidents, speeding, risk to school children on way to and from Crawshawbooth Primary School.</p> <p>This proposal is not wanted by the residents around this location.</p>

1640	Beryl	Harper			Object	<p>Re Peel Holdings proposals to remove our Green Belt south of Duckworth Lane</p> <p>My name is Beryl Harper and I have lived at X Bury Road Rawtenstall for over thirty years. The property I live in was built for my Grandfather in the 1950's. As a girl I lived at Duckworth Hall and attended Townsendfold School and the Methodist Church in Townsendfold. During my lifetime we have seen houses built down Holme Lane and a housing estate built at Hornccliffe Close. Both of these sites have caused an increase in traffic in our village, and during the winter months Bury Road becomes a car park because residents cannot access their properties.</p> <p>I wish to object to your proposals to remove our Green Belt south of Duckworth Lane as part of the new local plan. Our Green Belt prevents urban sprawl and saves a local beauty spot for future generations, to lose it would harm the important setting of the East Lancashire Railway and damage Rossendale's Tourist Industry which brings jobs to the Valley. There are plenty of Brown Field and previously developed sites which should be used instead of sacrificing our Green Belt. There are also many empty dwellings and buildings suitable for conversion.</p> <p>On a practical note, our local schools are full to capacity. There are no vacancies at our Doctor's surgeries. Several years ago a bypass was built to take traffic off Bury Road going through the village of Edenfield, however, this is still a very busy road and building more houses would make it even busier. I am very concerned about where they plan to access these properties, as this will cause further hazards.</p> <p>I appeal to the Borough Council to consider these proposals very carefully as the decisions they make could have a detrimental effect on the future of this beautiful valley.</p>

1747	Tom Morley	Jean Kay-Morley			Proposed Plans to alter an existing urban boundary In respect of the field behind Marl Pits and Waingate Close	<p>Object</p> <p>We are registering our objection to the alteration of the boundary, on the above mentioned land.</p> <p>The following are our main objections:-</p> <ol style="list-style-type: none"> 1. Access, Safety and Parking issues 2. Flooding risk 3. Restriction of Recreational Use <p>Access, Safety and Parking issues</p> <p>We are really concerned about access as we have already experienced problems when there have been events at Marl Pits. When these events have been held at the Leisure Centre our crescent, the road leading into it and Newchurch Road quite often become congested with parked cars; despite the allocations of parking spaces created recently at the Leisure Centre.</p> <p>This has led to times when it has not been possible to gain access to our crescent. A safety concern is that drivers park so close to the junction of Marl Pits and Newchurch Road that it is impossible to see the traffic both ways on Newchurch Road. We believe that this could lead to an accident. We would ask you to also consider the extra volume of traffic, now experienced on the tarmac road, leading to the Golf range.</p> <p>Flooding risk</p> <p>There have been previous flooding issues on this land and over the last few years we have also had problems in our own garden; unable to cut the lawn due to lying water, even during the summer months. Flooding has also occurred at the back of our houses which has previously been brought to the attention of our local council.</p> <p>Restriction of Recreational Use</p> <p>This land is designated as countryside and is available for use of the local people for walking, running, cycling etc., which as we are all aware, are important for the health and well-being of local people. It is also a privilege to have the experience for our children to enjoy and appreciate local wildlife on this piece of countryside.</p> <p>To alter the boundary line, to build houses on this land, appears to us to be a travesty in order to enable property developers to make money. We appreciate our local council have a directive to build a certain amount of new housing, 4,000+ and we have our MP Jake Berry to thank for managing to have this reduced to 2,000+. However, we have many waste land areas, brown site areas and still have the problem of derelict, empty buildings, throughout the valley, which are eyesores, and could be converted into residential properties.</p>

1751		Banks & Greenwood	Ivy Label Boutique	Land between Marl Pits Sport Centre and Waingate Village	Object	<p>Here is our appeal against the change in the urban boundary the council have put forward for the field between Marl Pits and Waingate Close.</p> <p>Myself and my partner live at number X Marl Pits, Rawtenstall. We overlook the back field and as mentioned scenic views really make our house a home. We have regular walks on the back fields and leading paths through chapel hill and drop down to the rugby fields. The field is also used on regular basis by school children, other dog walkers and general public.</p> <p>That a side, our biggest concern of all is the congestion of parking as it stands today! When events are held at Marl Pits Lesuire centre the traffic, parking and main road (Newchurch Road) is horrendous. As our close "Marl Pits" is off Newchurch Rd and our access is always bombarded with cars, visibility to get on and off Newchurch Road is very limited. Vehicles parked on either side of the road now, so adding extra traffic and additional parked cars to this is unbearable!!</p> <p>Myself and X are a young couple and we value where we live. Both full time workers and in the near future would like to start a family and would like them to grow up in a place they can enjoy greenery, fields and space. More housing is not needed in the space proposed it would feel cramped, invasive and would cause high levels of disturbance for all around.</p> <p>Traffic in a morning into Rawtenstall is already an issue, not to mention the higher risk it would cause to accidents. Safe to say we are strongly against this proposal and would like the council to really think about the issues raised in this appeal.</p> <p>Please keep us informed on any future developments related to this case.</p>

1758	Rex and Constance	Trippier		Land at Marl Pits adjoining Waingate Close	Object	<p>It seems almost certain that the above changes will result in planning applications for housing development on the land at Marl Pits and adjoining Waingate Close, If so, a number of serious objections arise. These are summarised in my letter of 19 August 2014, namely Health and Safety, the loss of a popular local amenity and the aesthetic impact</p> <p>The decisive factor in the rejection of planning permission was the disruption of traffic caused by the exit of vehicles onto Newchurch Road. This will be increased when a proposal to build a garden centre near Marl Pits is implemented.</p> <p>Further objections are made by our neighbour, William Arnold in a letter of 9 September 2014.</p> <p>Finally, taking into account all these considerations it seems clear that any application for development of these sites should be rejected,</p> <p>Letter of William Arnold - 9 September 2014</p> <p>I write as the owner and sometimes resident of X Waingate Close, Rawtenstall. My neighbours have brought it to my attention that there has been an application submitted to the Council to extend the urban boundary beyond the bottom of the gardens of the houses on the even numbered side of Waingate Close to the brook over the field. I understand the intention is then to apply to build 55 houses on this field if the boundary change is authorised by the Council.</p> <p>Although number X is one of the pair of houses (with number X) at the top of Wain gate Close, so that my garden boundary is with the Marl Pits development and not with this field, I have one particular concern to which this proposal gives rise, which I wish to bring to your attention.</p> <p>When X Waingate Close was built in 1965 (I know - I was there aged 12), the old Second World War single storey pre --fab housing on the Marl Pits site was much further away from boundary at the bottom of our garden to which the Marl Pits land also sloped down. As a consequence the land down there though often marshy (there was said to be a natural spring there) was never more than that and the trees my mother then planted were so effective at taking up water that the land then remained dry effectively year round.</p> <p>When Marl Pits was re-developed, however, no doubt in order to gain the best value from the site, the developers built up the gentle slope into a much steeper one. This enabled them to put more properties on to the site and coming much closer to the site boundary with Waingate Close (i.e the bottom of my garden). Unfortunately one of the, no doubt unforeseen, effects of this redevelopment seems to have been to disturb the water table I natural drainage.</p> <p>Ever since then (probably 20 years now), the relevant area at the bottom of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>my garden and also that of number X next door has every winter / spring been a pond for weeks on end (the time depending on how much it has rained), which only very slowly drains - and it appears to drain through the garden at number X (which then unusually has a similar pond) and into the field which is the subject of the present application. And by pond I mean several feet deep of standing water, which in some winters has even had ducks use it as home. This water definitely does not drain in the other direction (towards number 23), since the natural high point of the land is about midway along the bottom fence in my garden. This pond has also now killed all the trees which were there (and used to soak up some water), so that I am now having to think about re - planting with only alders and willows, ie, trees which will tolerate standing in water.</p> <p>My concern is that building on the field will block the only natural drainage route for this water from my garden and that of number X, compounding a problem which itself resulted from the Marl Pits redevelopment. I do not want to find myself in a position where a lack of natural drainage means I have a larger / deeper pond for much of the year. A large pool of what would effectively be stagnant water obviously raises potential health and safety issues, Apart from this I would only add my name to what I am sure are general concerns that, if the proposed access to this site is to be through the Marl Pits sports area (and I cannot immediately think of any other access, given the deep valley that is Waingate Road), there will be an increase in traffic both on Newchurch Road and more particularly in the Marl Pits sports area itself, making participation in sporting events there more difficult and therefore less attractive,</p> <p>And if there is also a consequential loss of car parking spaces at the Marl Pits sports area, that will equally directly work against the Council's efforts to support and promote the various sports clubs which operate there. However good the sporting facilities themselves, people will not come and use them, if they cannot easily park nearby. Given how much public money has recently been spent by the Council on improving the Marl Pits sporting facilities, it would be verging on the irresponsible for the Council now actively to diminish the availability of parking there.</p> <p>Letter of Rex Trippier 19 August 2014</p> <p>The purpose of this letter is to bring to your attention the following valid objections to the above proposal.</p> <p>Firstly, the Health and Safety aspect should be considered, especially regarding the increased volume of traffic emerging onto Newchurch Road from Marl Pits. This single exit already serves traffic from the swimming pool, social club, golf driving range and the football fields.</p> <p>Local residents report one serious and several minor accidents at this junction in recent months.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						Mingling with this traffic are pupils on their way to Alder Grange High School and young unaccompanied visitors to the baths. The potential loss of well used local amenity is a further serious consideration. As well as the fore mentioned school pupils, the field is frequently used by dog walkers, young families and elderly people taking a stroll, Rossendale Harriers and child visitors to the swimming pool. Lastly, the aesthetic impact of building on a site of natural beauty should not be overlooked especially as there are surely more suitable sites available.		
1761	D	Bonney		SHLAA16196	Object	I am writing about the proposal outlined in the draft plan above. My concerns would be about the hazards this may create for children going to and from Crawshawbooth Primary School.

1766			Peel Holdings (Land and Property) Ltd		Not Applicable	<p>established or even mentioned within polices SD2 or HS2 as currently drafted; whilst the recent Housing White Paper suggested further amendments to this guidance in terms of justifying Green Belt release (paragraph 1.39).</p> <p>2.4 In our view, it is the combination of increased housing need (both market and affordable) and insufficient supply, and the harm that will occur from failing to meet these needs; in terms of slower economic growth, a lack of labour force mobility, affordability issues, disruption to commuting patterns and the delivery of housing choice; that generates the exceptional circumstances for Green Belt release in Rossendale, and we would ask that the policy text is updated on this basis.</p> <p>Green Belt</p> <p>7.5 Policy SD2 states that development will be “All new development in the Borough will take place within the Urban Boundaries...except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area...”.</p> <p>7.6 And that: “...Development in the countryside will be supported where it is for a use that needs to be located in this location. Examples would include farm diversification or certain types of tourism uses...” (page 5)</p> <p>7.7 In some cases infrastructure projects need to be situated in a countryside location. We therefore suggest that the text referred to above is amended to make clear that “infrastructure” is amongst the examples of development which may be acceptable in a countryside location. Similarly, infrastructure projects are not always capable of enhancing rural character, but this does not mean that they are unsustainable. In this regard, the policy itself should be amended to state that “...except where development specifically needs to be located within a countryside location and, where possible, enhances the rural character of the area...”.</p>

1775	Tom	Whitehead	16 different groups		Not Applicable	<p>Draft Policy SD2</p> <p>The Green Belt boundary should be extended in the area south of Rawtenstall to meet the southern boundary of Rossendale's borough boundary. This would assist in protecting against 'urban sprawl' (wind turbines and ancillary development being urbanising), to assist in safeguarding the countryside from encroachment, and to protect the character and setting of historic towns. These are of course three of the five purposes of Green Belt as defined in NPPF; there is therefore a compelling case for this. At the time the current Green Belt boundaries were set previously, it would have been inconceivable for the threat of windfarm development of the scale now present and threatened. There is a compelling need to update policy and land allocations to reflect modern challenges.</p> <p>Signed on behalf of:</p> <ul style="list-style-type: none"> • Rooley Moor Neighbourhood Forum • Holcombe Society • Bury Rural Inequalities Forum • Ramsbottom Heritage Society • Prickshaw & Broadley Fold Area Community Group • Rossendale Harriers club • Friends of Rooley Moor • Whitworth Residents • Turn Village Residents • Townsend Fold Residents • Affetside Society • Lane Head residents group • Edenfield Village Residents Association • Rochdale & Bury Bridleways Association committee • Rural Rossendale Trust Accommodation Providers • Norden Area Forum

1788	Anna and Neil	Warburton		Land at Co- operative Street, Helmshore	Object	<p>Further to the publication of the proposed urban boundary changes in the draft Rossendale Plan we are very disappointed to find that our proposed inclusion of a small site on land at Co-operative Street Helmshore has yet again been opposed.</p> <p>We also note that a similar piece of infill land has been proposed as a site for housing within the urban boundary - this site by the Park at Snig Hole, Helmshore is on high land, its access point is a very narrow blind access to Helmshore Road and it is next to a children's park and play area and zebra crossing. The inclusion of the land at Snig Hole suggests that our application has not been treated fairly or equally - as the 'poor' access referred to at Co-op St is not at all poor by comparison.</p> <p>Co-operative Street is in a quiet area just serving a short row of terraced houses and the addition of of a very small development of sympathetic houses would have a minimal impact on the access road. Indeed a road widening and surfacing of the unmade road would enhance access, turning and parking for the current residents of Co-operative Street.</p> <p>We have only just been made aware of the reasons the Council had for opposing the inclusion and we refute the reasons given as outlined below.</p> <p>1) The land is close for a scheduled Ancient Monument - any development of the land would affect the setting of the chimney. The chimney is entirely isolated built on a very high piece of land at the top of a steep sided hill with a flue going diagonally across the road to Higher Mill. It toward above any of the buildings in the area and is a considerable distance from Co-op St which is in the valley. Any development would have no impact whatsoever on the chimney either visually or archaeologically.</p> <p>2) Any development would be built in sympathy with the proposed conservation area - in character stone - in vernacular form and scale and fenestration and with slate pitched roofs.</p> <p>There would be a limited number of extra dwellings and the impact of such a small scale development would be at neutral on the area and would probably enhance it as it would stop encroachments and fly tipping.</p> <p>3) The Council mentions a complex system of culverts. Further advice was to be sought from Archaeology Officers before a decision was made. Has this advice been sought? I was the Assistant Keeper at Higher Mill Museum from 1976 to 1983 and was in charge of the day to day running of the museum. We ran a Youth opportunity scheme to repair and restore the drainage systems for the lodges at Higher Mill coming from the land at the west of Holcombe Road. The drainage pipes went in the current garden and under the new house on Holcombe Road therefore I can confirm that they were to the North of our land.</p> <p>In view of this please reconsider our application.</p>

1789	Jackie	Copley	CPRE		Not Applicable	Policy SD2: Urban Boundary and Green Belt 8. We are pleased that Policy SD2 seeks for all new development in the Borough to take place within the Urban Boundaries, defined on the Policies map, except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area. The exceptions need to be strictly controlled. 9. We are aware that today, in part down to our efforts, people have a much higher level of awareness of the importance of our green natural spaces, both rural, and urban, and the elements that constitute 'Green Infrastructure'. We believe that everyone benefits from the wide ranging roles of greenfield land: from its green lung function, flood resilience, wildlife habitats, food production, recreational opportunities, tranquillity and contribution to our cultural heritage, so we trust that the Council will take an integrated and strategic approach to the provision and management of land for development while protecting and enhancing the countryside and green spaces that are so loved in Rossendale.		
1820	Kelly	Holt	Lancashire County Council	Boundary change opposite Goodshaw Parish Church	Not Applicable	Boundary change opposite Goodshaw Parish Church, Goodshaw Lane (3 or 4 houses) – Goodshaw Lane is narrow on this section and experiences on-street parking partly on the grass verge which is a concern. The Highway Authority would seek improvements to address the issues as part of any application that came forward.

Chapter 1: Housing

Reference HS01 Meeting Rossendale's Housing Requirement

6	Christopher	McManus	Park Royal Development s (NW) Ltd		Object	The explanation of Policy HS1 states: "The SHMA particularly highlights a need for larger, aspirational property types in Rossendale to rebalance the stock away from small terraced properties and reduce the high levels of outmigration to adjoining areas" but Policy HS4 a) details "A requirement of 30% on-site affordable housing from market housing schemes subject to site and development considerations (such as financial viability)." - - It could be easily argued that these two policy points are in direct contradiction of each other. While RBC may believe Developers should build out larger, and as such more expensive, properties for affordable housing this is likely to stymie projects being brought forward due to lack of margin. RBC will argue that they have given Developers the opportunity to make their case based on financial viability but simply put this is a barrier to entry for smaller Developers who would have to pay to contest their appraisals vs RBC's (which reduces their project's viability further). -

93	Norman	Crook	-		Support	The net housing target requirement seems reasonable and based on sound evidence. The requirement for delivering an overall amount of 20% of all new dwellings on previously developed land is strongly supported, so that such land (e.g. land at Blackwwod Road, Stacksteads (HS2.24) can be recycled for housing to reduce the need for building on greenfield and green belt land.		No. - - If further information, clarification or explanation is required, please do not hesitate to contact the Agent.
323	Anne	Dixon			Object	I am very upset that we have to build a large quantity of houses in this Region, just because the Government have set a target for each area. I would like to see the following completed:- - a) An investigation into how much housing is actually needed in the area. - - b) An investigation into how many empty houses/flats there are in the area, and more drives to bring them back into usage. - - c) An investigation into how many of the proposed houses are luxury houses, not affordable housing for 1st time buyers. There seem to be a lot of 4 bed luxury homes featured in the plans. This will not help people buy their 1st home. - - d) An investigation into how many of the new proposed houses will be built on ecological sustainable principals - eg solar panels, flood proof, etc. - - e) An investigation into how many of the new proposed houses will be built with the needs of disabled and elderly people in mind - eg level access, wide doorways, wet rooms, etc. - - f) An investigation into the existing services and infrastructure to see if they can cope with an increase in people using their services - ie schools, medical practices, dentists, hospitals, highways, police, etc. My concern is that schools etc. are already at full capacity and cannot cope with the influx of new people that building such a large quantity of housing will require. - - g) More flood prevention measures need to be implemented for existing housing stock. - - h) Environmental impact on the ecosystem locally. - - i) We need to work to preserve the character and heritage of Rossendale, and this includes preserving green spaces, mature trees, and valuing the natural beauty of the region. - - j) We need to attract morevisitors to the area. This means keeping the area green and pleasant, and re-opening our valuable heritage museums that have been closed. -		Rossendale is a wonderful area to live in, and I am passionate about preserving the heritage and character of the place. I am a volunteer at Civil Pride and help maintain the flower beds that so many people in the area appreciate. People need green spaces, trees and interactions with wildlife for mental and physical well being. Housing should not be built on green field or forest areas - it increases the risk of flooding and land erosion, and takes away the lungs and soul of the area. We need a local strategy for housing that takes into account existing housing stock and old mills, etc that could be made habitable, and looks at the local needs, not just works blindly to meet a target set by Government officers in Whitehall. We need to consider what the local infrastructure can cope with, and we need to ensure that the houses built are suitable for the needs of disabled, and elderly, and flood resistant, and in keeping with the local environment. We need balance. - - The proposed plan also needs to be publicised more widely. A lot of people in the area do not know that housing is being proposed near to them, and therefore cannot comment on your proposals.

677	Phil	Ramsden	Lindon Park Development s Ltd		Object	<p>Policy HS1: Meeting Rossendale's Housing Requirement - - The net housing requirement for the period 2019-2034 will be achieved through the development of a number of sites proposed in the draft plan as allocations for housing development. - - This policy confirms that the new plan provides for at least 4,000 additional dwellings over the plan period, equating to 265 dwellings a year, which addresses prior under-provision of 425 dwellings (as of 31st March 2017) within the first five years of the plan period; delivering an overall amount of 20% of all new dwellings on previously developed land (PDL) across the Borough; and keeping under review housing delivery performance on a yearly basis. - - The Representor questions whether, based on previous poor delivery rates, 4,000 additional dwellings is an adequate requirement/target. In addition, while the Representor agrees with the presumption that the plan should aim to try to play catch-up on the issue of under delivery in previous years, it questions whether 425 dwellings within the first five years of the plan period is an achievable target given previous poor performance on delivery, which in part is due to the lack of suitable, available and viable development sites. - - A further point of concern is the fact that the target for brownfield development, which is 20%, seems very low when the nature and profile of the borough is considered. We would have expected the target to be greater. Indeed, the figures for neighbouring authorities in previous years have been considerably higher. If the target is correct, based on a full review of available opportunities, it suggests that what greenfield sites are proposed to be allocated should be suitable, available and viable for development and, ideally, deliverable in the short term, given the point made earlier about the need to play catch-up. -</p>

763	Alan	Billingsley	-		Object	<p>The need for new housing in Rossendale has been assessed in the Council's Strategy - Housing Market Area Assessment (SHMA) (2016). This study, is NOT consistent with the - Government's current policy position. The SHMA recommendation that the need for additional housing in Rossendale of between 265 and 335 dwellings per year is therefore, at the very least, questionable and consequently the total number of dwellings to be provided over the plan period (2019-2034) of 3,975 is also questionable. - On the 14th Sept 2017, Sajid Javid Secretary of State for Communities and Local Government issued a statement - https://www.gov.uk/government/speeches/local-housing-need - in which he announced the following: - 'If we're going to make a lasting change – building the homes we need to meet both current and future demand – we need a proper understanding of exactly how many homes are needed and where. The existing system for determining this simply isn't good enough. - It relies on assessments commissioned by individual authorities according to their own requirements, carried out by expensive consultants using their own methodologies. - The result is an opaque mish-mash of different figures that are consistent only in their complexity. - This piecemeal approach simply doesn't give an accurate picture of housing need across the country. - Nor does it impress local people who see their area taking on a huge number of new homes while a town on the other side of a local authority boundary barely expands at all. - If we're going to get the right number of homes built in the right places we need an honest, open, consistent approach to assessing local housing need'. - This would suggest you need to re assess the housing needs of the Borough in line with the new proposals which would probably result in a much more sympathetic outcome when trying to meet the housing development requirement in the Rossendale Valley, with its inherent limited land availability, flooding issues, limited road access and limited infrastructure.</p>		No
1414	Gavin	Cox	-		Object	<p>Given the latest reduction from circa 4000 to 2000 houses the current local plan should be revised to take out all of the reallocation of greenbelt in the current addition. Only once existing brownfield sites cannot meet the housing need should encroachment of green belt be considered and then only on a case by case basis. If the Council allows 4000 houses to be built locally house builders will want to build 4000. If the need is reduced to 2000 houses, builders should only be allowed to build 2000.</p>		-
1455	Diane	Steels	N/A		Object	<p>We don't need anymore houses.</p>		-

1473	K	Howieson	C/O Agent		Not Applicable	<p>Please see submitted Representation Document</p> <p>Email received 09/10/2017: HS1 HOUSING 3.7 This Policy sets out the need to provide at least 4,000 additional dwellings over the plan period (2019-2034), equating to 265 dwellings per annum. The policy seeks to address prior under-provision in the first five years of the plan period, by increasing the annual requirement to 350 in the first five years. This strategy is supported. 3.8 It is however noted that the SHMA sets out a range of need from 265-335 dwellings per annum, it is therefore questionable as to why the Council has simply chosen the lower end of this range, rather than opting for an aspirational target to ensure need is met and sustainable growth achieved.</p>		Please see submitted Representation Document

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
1478	N/A	N/A	Winfields Holdings Ltd and Winfield's Ltd		Object	<p>Whilst the principle of addressing the proposed borough's objectively assessed housing need is supported, the proposed annual provision is at the bottom of the range identified as being required by the up-to-date SHMA (published December 2016). It is appreciated that Government is undertaking a consultation on a standard methodology for assessing housing need, but this has only just commenced and does not address borough specific issues. As such, the exercise undertaken on behalf of the Authority has to be given precedence as it assesses the objectively assessed housing needs for this borough in the light of its specific circumstances and aspirations. The growth aspirations of the Local Plan will not, however, be realised without the amount of housing being increased, as a restricted approach will significantly and adversely affect the growth strategies being pursued (as confirmed by the commentary to the SHMA).</p> <p>The need to address the current housing deficit following a prolonged under provision is also supported. However, whilst the Council propose to deal with this within the first 5 years of the plan period, there is no evidence that this is achievable and a buffer of 20% should be applied to the total provision for there to be a realistic prospect of achieving the planned supply (as required by Paragraph 47, second bullet, of the NPPF).</p> <p>The explanation to the policy confirms that brownfield land is to be used in preference to greenfield, and utilised wherever possible. It suggests, however, that the supply of sites without significant constraints is limited. In this respect, it is noted that there is a significant supply of land that has been identified for employment purposes since at least 1995 that has not come forward. As stated at Paragraph 22 of the NPPF, planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of them coming forward. The land at Hud Hey, the site specific aspects of which are drawn out below, is one such site. Given the amount of unused previously developed land across the borough the aspiration of achieving 20% of all new dwellings on such land is supported. It is the case, however, that flexibility needs to be incorporated into other policies (such as Policy EMP3 which relates to employment sites) to achieve this objective.</p> <p>Separate representations are made below with respect to the status of land at Hud Hey (EMP2.14) that could assist with helping meet the Council's objective of bringing forward brownfield land in preference to releasing greenfield.</p>		-

1550	Shelley	Carter			Object	<p>I have not been able to look at the detail of this Draft Plan as much as I would have liked, due to it being such a large and complex document. So, my comments about specific sites relate to my local area of Weir Village, followed by more general comments about the Valley as a whole.</p> <p>In general, it appears to me that the Urban Boundary is being expanded into Greenfield areas when there are still Brownfield sites that need to be re-developed. Looking down the list of proposed new housing sites throughout Rossendale, this is quite striking. My concern is that once our grazing land has gone, it's gone for ever and the impact on our Valley would be detrimental to residents' wellbeing and also the tourism industry which is providing much needed employment and bringing revenue into the area.</p> <p>All this additional building on the hillsides could result in more flooding in the valley bottoms.</p> <p>Having lived in the Valley all my life, I can see that flooding is occurring more severely and more regularly than in the past and it is a growing concern for both homeowners and businesses alike.</p> <p>The quantity of homes that Rossendale is expected to build does not take into consideration the geography of this area and this needs to be addressed. The Rossendale Valley is a collection of valleys and because of the geographical constraints, there is a limited amount of developable land for any usage. The same geographical constraints also limits any improvements to our road network and in its present form it cannot sustain any further increase in vehicle numbers. It's no good building houses if people cannot access facilities and commute for work. The old industries of our Valley have disappeared due to foreign competition and those jobs which were lost have not been replaced by other industries within the Valley.</p> <p>Officers and Politicians alike need to pressure Government, to ensure that the number of proposed new homes is reduced throughout our much loved Valley. Future development needs to be sympathetic to and enhance Rossendale's natural and built environments. The Valley's landscape is valued by locals and visitors alike and it is essential that it is protected for future generations.</p>

1592	Warren	Hilton	Highways England		Not Applicable	<p>2.2 HOUSING</p> <p>This section of the review focusses on the current context in regard to employment and identifies opportunities that Rossendale's Town Centre and other District Centres within the Borough can capitalise upon to further improve upon their economic output.</p> <p>HS1: MEETING ROSSENDALE'S HOUSING REQUIREMENT</p> <p>The Local Plan states that a Strategic Housing Market Area Assessment (SHMA) was undertaken in 2016 by Rossendale Borough Council and recommended that there is a need for additional housing of between 265 and 335 dwellings per year over the Local Plan period (2019 – 2034). The Council has stated that the figure of 265 dwellings per year is sufficient which therefore equates to a total of 3,975 dwellings being delivered over 15 years. It is also stated that provision of dwellings during the first five year period will need to take into account the requirement to address the under-provision of 425 dwellings. Therefore, the annual delivery of dwellings during the first five year period will increase to 350 dwellings.</p> <p>The Policy states: 'The net housing requirement for the period 2019 – 2034 will be achieved through: Providing at least 4,000 additional dwellings over the plan period equating to 265 dwellings a year; Addressing prior under-provision of 425 dwellings (as of 31st March 2017) within the first five years of the plan period.'</p>

1619	Michael	Onley	Planning Sense NW		Object	<p>Thank you for the opportunity to comment on the emerging Local Plan. Rossendale Borough Council has identified a need to provide “at least 4,000 additional dwellings over the plan period” [Rossendale Draft Local Plan policy HS1, RBC 2017] despite there being a number of serviced, well-located and accessible residential development sites with planning permissions dating back twenty, thirty or more years [5 Year Housing Land Supply Report (2017 – 2022) RBC 2017]</p> <p>Rossendale's house affordability has lain stable for 12 years [ONS]. There are currently 653 houses offered for sale in Rossendale; 268 of them at asking prices of £125k or less. A bike ride away in Burnley and Accrington, decent homes can be bought for £25k [RightMove, October 2017]</p> <p>In 2001 8.9% of the Elevate East Lancashire housing stock was empty, more than twice the national average [DCLG 2009]</p> <p>The number of households in the Elevate East Lancashire area is predicted to increase at half the national rate [National Evaluation of Housing Market Renewal Pathfinders 2005–2007, Leather, Ferrari and Cole for DCLG 2009]</p> <p>In the face of over-supply, lack of demand, high void rates and low house prices it is wholly wrong to impose a southern-biased analysis of the housing market (planning constraint causing under supply, causing affordability problems). The problem for the post-industrial north-west is that more houses are being built than we need to meet demand [Sustainable Communities: Homes for All ODPM 2005]</p> <p>It is not a lack of residential allocations which restricts house construction in Rossendale, but market forces. Lack of demand deflates prices and diminishes return for the developer. Inflating the supply side of the housing market is wholly counter-productive. What keeps Rossendale’s quality of life above its neighbouring Boroughs is affordable housing, decent accessibility and enviable landscape quality.</p> <p>However, misplaced analysis has obliged Rossendale Borough Council to set an unattainable housing target of at least 4,000 additional dwellings over the plan period. Allocating yet more housing sites will only exacerbate the problems of over-supply and lack of profitability, and lead to fewer completions.</p> <p>The geographical challenge of 4000+ new-build houses in a tightly constrained post-industrial landscape has obliged Rossendale BC to abandon its target of 65% of new housing on previously developed land [Rossendale Core Strategy policy 2, RBC 2011] and to adopt an unsustainable target of 20% of all new dwellings on previously developed land [Rossendale Draft Local Plan policy HS1, RBC 2017]</p> <p>Clients fear cherry-picking of the most desirable sites. This is reflected in the abandonment of density target of 50+ dwellings per hectare appropriate to urban renewal [Rossendale Core Strategy policy 2, RBC 2011] in favour of a</p>

1764			Taylor Wimpey UK Ltd		Object	<p>Policy HS1: Meeting Rossendale’s Housing Requirement</p> <p>2.5 This policy outlines that 4,000 dwellings will be required over the plan period (2019-2034), which equates to 265 dwellings per annum (dpa), and represents a slight increase from the 247 dpa set out in the previous Core Strategy which was based on the RSS.</p> <p>Strategic Housing Market Assessment (SHMA) December 2016</p> <p>2.6 This figure comes from the SHMA which was produced in December 2016 by Lichfields, and suggested that Rossendale’s objectively assessed housing need (OAN) is 265-335 dpa.</p> <p>2.7 Whilst we do not dispute the SHMA’s findings, and accept that the proposed target represents an increase from the adopted Core Strategy, we have concerns with the Council’s adopting a figure at the lower end of the range.</p> <p>2.8 Firstly, we note that the 265 dpa figure represents the demographic baseline with uplifts for market signals and affordable housing; however it does not take account of economic aspirations, as employment-led needs suggested a range of 269-335 dpa. Yet the NPPF is clear that housing strategies within Local Plans must take account of economic aspirations (paragraph 158), whilst the NPPG (paragraph 2a-018-20140306) notes how failing to align housing and jobs “could result in unsustainable commuting patterns... and reduce the resilience of local businesses”.</p> <p>2.9 Secondly, adopting a figure at the lower end of the OAN range provides no flexibility to take account of potential unmet needs of adjacent authorities, and whilst we accept that Rossendale is considered to be its own Housing Market Area for the purposes of the SHMA, it’s level of containment is actually lower than the 70% threshold set out in the NPPG and it is directly adjacent to Greater Manchester, where a new Spatial Framework (GMSF) is being prepared across the 10 authorities which will necessitate substantial housing growth. Indeed the SHMA acknowledges that Rossendale has strong commuting flows with Manchester, and significant housing market overlap with both Bury and Rochdale, with paragraph 13.3 noting: “Through the Duty to Co-operate process RBC must consider the housing issues of adjoining authorities, particularly Bury and Rochdale, and assess any additional need required to be met. The target requirement is for Rossendale to judge based on the evidence provided to them.”</p> <p>2.10 In light of this, it is pertinent that neither Manchester or Bury are currently able to demonstrate a 5-year supply, whilst Rochdale claim between 5.1 – 6.1 years, suggesting existing issues in respect of housing capacity.</p> <p>2.11 Moving onto the GMSF itself, the December 2016 draft set a housing target of 227,000 from 2015-2035 and proposed significant Green Belt across 55 large strategic allocations, totalling close to 70,000 units; although this still left over 157,000 units to be met by each individual authority.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>2.12 However since then, the new Metropolitan Mayor, Andy Burnham has called for the plan to be redrafted to minimise Green Belt release and therefore it looks likely that the 10 GM authorities will be looking for even greater numbers within their urban areas. This will generate huge delivery challenges in these areas and unless the Mayor's position changes, this is likely to generate unmet need, which will need to be accommodated by the surrounding authorities, unless they can demonstrate and evidence that this is not achievable.</p> <p>2.13 As such we would recommend an uplift to take account of employment needs, and to provide some flexibility to accommodate any unmet needs from surrounding GM authorities. Adopting a higher figure, which goes above and beyond meeting just Rossendale's basic need, would align with paragraph 154 of the NPPF which states that Local Plans should be aspirational, as well as realistic.</p> <p>2.14 Furthermore, paragraph 47 of the NPPF requires local authorities 'to boost significantly' the supply of housing. Adopting a housing requirement which utilises a higher figure within the OAN range would therefore obviously assist in achieving this overall goal, and would provide a more aspirational figure to drive growth in Rossendale.</p> <p>Consultation on Standard Housing Need Methodology– 14th September 2017</p> <p>2.15 Following the publication of the SHMA and Draft Local Plan, the government have issued a consultation paper proposing a new standardised approach to calculating housing need. At the outset, it must be noted that this is only a consultation document at this stage and cannot be afforded any meaningful weight at the present time. It is likely to generate a significant number of responses and objections, given it is such a fundamental element of the planning process, and therefore it is entirely possible that it will be subject to change before it makes its way into formally issued policy.</p> <p>2.16 In Rossendale's case, the proposed methodology generates a housing need of 212 dpa from 2016-2026; which is below the OAN range suggested in the December 2016 SHMA (269-335 dpa). However, there are a number of flaws/implications that result from the Government's drafted approach, which we have identified.</p> <p>2.17 Firstly, the suggested calculation of objectively assessed housing need is simply based on anticipated demographic change and uplifts associated with affordability</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>market signals. It does not automatically include the need to take account of economic considerations.</p> <p>2.18 Helpfully, the consultation does note that authorities will be able to plan for higher housing numbers to support a strategic infrastructure project, or increased employment ambitions (giving examples of a Local Economic Partnership investment strategy, a bespoke housing deal with Government or a modern Industrial Strategy). In short, economic considerations effectively become a ‘policy on’ decision rather than a direct input in terms of calculating what the OAN will be.</p> <p>2.19 The critical point to note is that the revised housing OAN methodology does not obviate a Local Planning Authority from promoting a sound Development Plan, which needs to be positively prepared, justified, effective and consistent with national policy.</p> <p>2.20 Importantly, there is no proposed change to the relevant Acts which require a Development Plan to embody the principles of ‘sustainable development’ and there is no proposed change to the definition of sustainable development, which embodies economic, social and environmental considerations, as set out in the NPPF.</p> <p>2.21 Indeed, the NPPF will continue to state that “local planning authorities should positively seek opportunities to meet the development needs of their area”, as required by paragraph 14. Given such needs include economic development as well as housing development, it is difficult to see how the two considerations can be meaningfully separated when preparing a holistic, sound Development Plan and one that fully adheres to the principles of delivering the “presumption in favour of sustainable development”.</p> <p>2.22 Furthermore, this methodology only covers the period 2016-2026, whilst most emerging or adopted Local Plans cover a 15-20 year period, with Rossendale’s running from 2019-2034, and therefore the current figures cover less than half the plan period.</p> <p>2.23 In short, the revised OAN methodology will still only continue to represent the starting point in forging a sound Local Plan.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>2.24 The SHMA has already confirmed that a minimum of 269 dpa would be required to support their job growth aspirations and align with the NPPF requirement. Furthermore, affordable housing need is real issue in Rossendale with the 2016 SHMA (paragraph 13.19) confirming a need of between 158-321 dpa, which would also justify an uplift, whether as part of the OAN calculation as it is now, or as a 'policy on' adjustment if this new methodology is adopted.</p> <p>2.25 There are also other economic objectives within Rossendale that will be aided by an uplift in housing. Much of the borough currently suffers from low property values, with more than half of the Borough's properties (51%) falling in Council Tax band A, well above the Lancashire County average of 37% and more than double the average for England of 25%.</p> <p>2.26 Providing additional housing beyond the minimum demographic need, and particularly greenfield and Green Belt development, which promotes lower density, higher value, large family housing, will help to raise this profile and secure higher Council Tax bandings and receipts which can then be reinvested in local services, which have been subject to significant cuts in recent years. This additional choice and variety of housing will also help to inject more dynamism and mobility at all levels of the local housing market.</p> <p>2.27 Penultimately, the consultation proposes that Local Authorities agree Statements of Common Ground with neighbouring authorities on areas of cross-boundary housing need and other strategic matters. Given the issues raised above in terms of supply pressures within Greater Manchester, and particularly the adjacent authorities of Bury and Rochdale where there this significant housing market overlap; this would again support Rossendale building some flexibility into their housing requirement to accommodate unmet need as part of this SoCG/ duty to cooperate process.</p> <p>2.28 Finally, a criticism we will be raising in relation to the government's revised OAN approach is that it effectively restarts the clock on housing need, without looking at what backlog or concealed</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>households have been generated in years gone by due to the lack of delivery.</p> <p>2.29 In the case of Rossendale, the Borough has been without a full Local Plan (i.e. one that specifically allocates housing sites to direct the development industry in where it should seek to develop) for a considerable period of time. Indeed, the Core Strategy was adopted in 2011, prior to the NPPF.</p> <p>It does not allocate housing sites. Furthermore, the previous Local Plan dates back to 1995 and its Proposal's Map is still being relied upon for settlement boundaries. Whilst we note there are other issues within Rossendale (such as the topography), combined with the lack of a full and directional Local Plan, this has seriously restricted housing delivery across the Borough for over of 20 years.</p> <p>2.30 To continue to delay the delivery of the Local Plan will only continue to compound affordability issues in certain parts of the Borough, which could ironically push the Council's housing requirement up further overtime. For the above reasons, we consider the Council should press on with the submission of the Local Plan but should consider an increase in the housing requirement to take account of economic needs, to address structural issues in the housing market, and to provide flexibility to accommodate unmet needs of adjacent authorities if required in the future.</p>

1766			Peel Holdings (Land and Property) Ltd		Not Applicable	<p>4.1 This chapter comments on the DLP's content in respect of the scale of new residential development which is proposed.</p> <p>Evidence of Housing Need</p> <p>4.2 RBC commissioned a Strategic Housing Market Assessment6 (SHMA) for Rossendale, which was published at the start of the current Local Plan consultation. This provides an objective assessment of housing need (OAN) in the Borough over the plan period. Reflecting the methodology advocated by the PPG, the SHMA follows a stepped approach in establishing the OAN, as follows:</p> <ul style="list-style-type: none"> • Using the latest 2014-based household projections as a 'starting point'7; • Sensitivity testing the 'starting point' through the application of alternative assumptions on population and household formation, in order to determine the demographic need for housing8; • Responding to market signals of imbalance between housing supply and demand9; • Taking employment trends into account; and • Taking affordable housing needs into account. <p>4.3 The following table summarises this stepped methodology by replicating Table E.1.1 of the SHMA. This indicates a need for between 265 and 335 dwellings per annum in Rossendale over the plan period (2014 – 2034). Table 4.1: Approach to OAN for Rossendale 2014 – 2034</p> <table border="1"> <thead> <tr> <th>Dwellings per annum 2014 – 2034 / Adjustment from previous stage / Uplift from 'starting point'</th> <th>Demographic 'starting point'</th> <th>183 / – / –</th> </tr> </thead> <tbody> <tr> <td>Adjustments to demographic-led needs</td> <td>220 / +37 / +20%</td> </tr> <tr> <td>Uplift for market signals (10%)</td> <td>242 / +22 / +32%</td> </tr> <tr> <td>Employment-led needs</td> <td>269 – 335 / +86 – 152 / +47 – 83%</td> </tr> <tr> <td>Affordable housing needs (10%)</td> <td>266 – 335 / +83 – 152/+45 – 83%</td> </tr> <tr> <td>Objectively assessed need</td> <td>265 – 335/ +82 – 152 / +45 – 83%</td> </tr> </tbody> </table> <p>Source: Lichfields, 2016</p> <p>4.4 The OAN concluded in the SHMA evidently uplifts the 'starting point' referred to above by at least 45%. This reflects a series of adjustments following the PPG methodology, including:</p> <ul style="list-style-type: none"> • A sensitivity testing of the 'starting point' projections to take account of the impact of factors shaping recent trends. This includes a stated preference to base needs on a demographic scenario based on longer-term migration trends recorded over ten years (2004 – 2014), as opposed to the five year trend (2009 – 2014) which largely underpins official 2014-based projections. The demographic scenario preferred also allows for an improvement from suppressed household formation rates13; • A 10% uplift from the preferred demographic scenario to reflect the 'moderate' imbalance between housing supply and demand in the Borough, 	Dwellings per annum 2014 – 2034 / Adjustment from previous stage / Uplift from 'starting point'	Demographic 'starting point'	183 / – / –	Adjustments to demographic-led needs	220 / +37 / +20%	Uplift for market signals (10%)	242 / +22 / +32%	Employment-led needs	269 – 335 / +86 – 152 / +47 – 83%	Affordable housing needs (10%)	266 – 335 / +83 – 152/+45 – 83%	Objectively assessed need	265 – 335/ +82 – 152 / +45 – 83%

----	-----------	---------	--------------	-----------------	-----------	---------	------	-----------------

following a review of market signals;

- The need to accommodate the labour force growth required to support job creation forecast by Experian (269dpa) and currently planned by the Core Strategy (335dpa). This recognises that a continuation of recent demographic trends will not provide an adequately sized labour-force to support forecast and planned job growth in Borough; and
- A further 10% uplift on the implied need related to demographic and market signals adjustments to reflect the high level of affordable housing need in Rossendale.

4.5 The approach followed in the SHMA is considered to align with the PPG methodology as currently drafted, and confirms that a minimum of 265 dwellings per annum are needed in Rossendale over the plan period. Provision of this scale would not, however, provide the growth in labour force required to support the level of job growth indicated by the Strategy's adopted target of 3% net growth in jobs over a fixed five year period, with at least 335 dwellings per annum required to ensure that housing and economic policies are fully integrated. This is a requirement of the NPPF (paragraph 158) and would support the creation of 3,115 jobs over the plan period, or 156 jobs per annum.

4.6 The SHMA notes that such a level of job growth exceeds that implied by the then-latest Experian forecasts used within the SHMA, which were released in September 2016 and forecast the total creation of 1,800 jobs in the Borough over the plan period (90 jobs per annum).

4.7 A review of the latest available data confirms, however, that the most recent Experian forecasts released in September 2017 indicate a level of job growth which more closely aligns with RBC's adopted target, as summarised in the following table. This suggests that it remains appropriate to retain the employment target adopted in the Core Strategy, particularly in light of the strong employment growth seen in the Borough since its adoption in 2011/14. This will ensure that the Local Plan remains positively prepared as required within the NPPF and will contribute to sustaining a strong, responsive and competitive economy (paragraph 7).

Table 4.2: Future Job Growth in Rossendale 2014 – 2034

Total job growth 2014 – 2034 / Annual job growth 2014 – 2034	
Adopted Core Strategy	3,115 / 156
Experian, September 2017	2,600 / 130
Experian, September 2016	1,800 / 90

Source: Lichfields; Experian

4.8 While the upper end of the range fully takes account of these more positive economic factors, the SHMA indicates that the lower end of the range accommodates only the previously lower forecast level of job growth. This suggests that the lower end of the range risks constraining the potential of the local economy.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>4.9 The OAN range does, however, take account of proportionate uplifts based on market signals and affordable housing need. With regards to market signals, this reflects guidance in the PPG, which supports reasonable upward adjustments where worsening market signals are identified. The analysis in the SHMA highlights inter alia:</p> <ul style="list-style-type: none"> • Relatively significant growth in average house prices, when compared to other areas; • A short-term worsening in affordability, based on the relationship between house prices and earnings; and • Falling levels of housing delivery since the recession, which have generated ‘adverse outcomes for people who still need to access the housing market’ and resulted in increasing reliance upon the private rented sector. <p>4.10 Although the SHMA presents data which remains comparatively up-to-date, it is of note that the latest available evidence continues to reinforce the fact that there has been no recent improvement in market signals in Rossendale. The ratio between both median and lower quartile house prices and earnings has worsened over the latest calendar year¹⁵ (2015/16) and average house prices in the Borough have also increased¹⁶. The adopted housing requirement has been met only once (2013/14) in the past six years¹⁷, with this an important contributing factor to a worsening of market signals relating to an imbalance of supply and demand.</p> <p>4.11 The SHMA concludes that ‘moderate’ housing demand pressure in Rossendale requires a ‘relatively modest’ increase in housing delivery to improve affordability, indicating that an uplift of 10% from the demographic-led projections would be justified. It is considered that the evidence of market signals provides a clear justification for this level of adjustment.</p> <p>4.12 The SHMA includes a further adjustment made to reflect the sizeable annual need for 158 – 321 affordable homes, uplifting housing need to the lower end of the concluded range (265dpa).</p> <p>4.13 The Housing Register data favoured in the calculation highlights a net backlog of some 744 households currently in need of affordable housing. While this is annualised over twenty years within the SHMA, clearing this backlog over the next five years – as stipulated within the PPG¹⁸ – would require a more significant elevation in affordable housing delivery in the short-term. An average of 149 affordable homes would need to be annually provided within this period to clear this backlog, which is more than three times the average level of affordable housing delivery in the Borough over the past five years¹⁹ (2012 – 2017). Need is elevated further when taking account of the net newly arising need for up to 285 affordable homes per annum.</p> <p>4.14 The delivery of affordable housing through market-led development will make an important contribution towards meeting this need. This reinforces the need to plan for a boosting of housing supply in Rossendale, with a higher level of housing provision inherently supporting the greatest level of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment								
						<p>affordable housing delivery on this basis.</p> <p>Proposed Changes to Methodology for Calculating Housing Needs</p> <p>4.15 As noted earlier in this section, the SHMA correctly follows the methodology currently detailed in the PPG in establishing the OAN for housing in Rossendale. At the current point in time, this remains the latest official guidance on establishing housing needs, pending the outcome of the Government's ongoing consultation on a new draft standardised methodology.</p> <p>4.16 A standardised methodology for calculating housing needs formed one of the recommendations to Government made by the Local Plans Expert Group (LPEG), with its proposed methodology including a number of key deviations from the approach detailed in the PPG20. In establishing the OAN for Rossendale, reference is made within the SHMA to adjustments suggested by LPEG, particularly in relation to market signals and affordable housing needs. Proportionate 10% uplifts applied at these stages within the SHMA align with those advocated by LPEG.</p> <p>4.17 Reflecting the recommendations made by LPEG, the Government's Housing White Paper – published in February 2017 – set out an intention to consult on the introduction of a new standardised approach to assessing housing needs²¹. This followed Government's appreciation of the scale of the national housing crisis and the need for 'radical, lasting reform that will get more homes built right now and for many years to come'.</p> <p>4.18 Consultation on the draft methodology commenced on 14 September 2017, and runs until 9 November²². The method proposed differs from that suggested by LPEG and represents a considerable simplification of the existing approach, with three stages as follows:</p> <ul style="list-style-type: none"> • Starting with the average household growth annually projected by the latest official household projections over the next ten years; • Adjusting based on the ratio between median house prices and earnings in the latest available year; and • Capping adjustments to 40% above housing requirements adopted in the last five years, or the latest household projections if higher than a requirement adopted more than five years ago. <p>4.19 The Government has indicatively calculated a housing need figure for each local authority in England based on its proposed formula, suggesting that a need for 215 dwellings per annum is implied for Rossendale. This is solely derived from the household projections with an adjustment based on affordability, which falls below the 40% cap. The implied outcome for Rossendale is summarised in the following table.</p> <p>Table 4.3: Indicative Housing Need Based on Proposed New Methodology</p> <table border="1" data-bbox="891 1369 1653 1495"> <thead> <tr> <th></th> <th>Dwellings per annum</th> </tr> </thead> <tbody> <tr> <td>Household projections</td> <td>187</td> </tr> <tr> <td>Affordability ratio</td> <td>6.14</td> </tr> <tr> <td>Adjustment factor</td> <td>13.4%</td> </tr> </tbody> </table>		Dwellings per annum	Household projections	187	Affordability ratio	6.14	Adjustment factor	13.4%

Adjustment factor	13.4%															

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
					<p>Housing need</p> <p>Source: DCLG; Turley analysis</p> <p>4.20 Application of the proposed draft methodology results in a level of need which falls below that suggested by the SHMA and below that identified in the adopted Core Strategy (247 dpa).</p> <p>4.21 The methodology is limited to a single upward adjustment of 13% to respond to market signals, a level which falls above the 10% in the SHMA but below that applied when accounting for the identified scale of affordable housing need²⁴.</p> <p>4.22 It is important to recognise that the proposed removal of the existing requirement to sensitivity test the latest official household projections, which – as demonstrated in the SHMA – would lead to an underestimation of the growth which would occur in Rossendale if longer-term demographic trends persist over the plan period is a key factor in suggesting a lower level of need.</p> <p>4.23 Importantly the proposed methodology also removes the step in the existing methodology which requires the consideration of the relationship between employment growth and housing need. This currently forms the basis for the upper end of the range concluded in the Rossendale SHMA, recognising the need for further growth in the labour force to support likely job creation. The 2014-based projections underpin the new proposed approach, but suggest that the working age population (16 – 64) of Rossendale will decline over the next decade (2016 – 2026) and beyond. This inherently presents a risk to the Borough’s economy and its capacity to support future growth.</p> <p>4.24 The consultation document acknowledges the consequences of this proposed omission, and importantly makes clear that ‘local planning authorities are able to plan for a higher number than set out by our proposed method’²⁵. The consultation paper recognises that this may result from a range of factors – including increased employment ambition – and indeed makes clear its continued expectation that authorities plan to reflect the effects of the Government’s Industrial Strategy in promoting prosperity in every part of the Country. The NPPF as drafted emphasises the importance of integrating housing and employment strategies in this regard²⁶.</p> <p>4.25 The consultation document includes proposals around transitioning to the new approach, confirming that this is dependent upon the status of current and emerging Local Plans. RBC’s intention²⁷ to submit its Local Plan for Examination in January 2019 means that it will be expected to take account of the implications of the new methodology, as will all authorities submitting after 31 March 2018.</p> <p>4.26 Finally, it is important to note that the formulaic nature of the proposed methodology means that housing needs will iteratively change upon release of new datasets, including new household projections – released in summer 2018 and every two years – and new affordability ratios, updated annually.</p>	215		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>The minimum need figure implied for Rossendale will therefore be subject to change in advance of the submission of the new Local Plan, further cautioning against reliance upon the current indicative figure published for consultation by DCLG.</p> <p>Planning for Housing Need</p> <p>4.27 Peel considers that RBC has assembled a robust evidence of housing needs in Rossendale.</p> <p>4.28 The SHMA concludes with a minimum lower OAN of 265 dwellings per annum. This recognises need pressures resulting from projected demographic growth and a positive response to evidence of worsening market signals, which have at least partially resulted from a sustained failure to provide the level of homes needed. This lower end of the range also provides a proactive response to elevating the supply of much needed affordable homes.</p> <p>4.29 It is noted that this minimum OAN is somewhat higher than the indicative minimum need implied through the DCLG's current consultation on a draft standardised methodology which indicates a minimum baseline need for 215 homes per annum.</p> <p>4.30 There is currently no certainty around how the proposals set out within the Housing White Paper – including the proposed standardised methodology for calculating housing need – will progress in the coming months, following the conclusion of the current consultation and a subsequent consultation on proposed changes to the NPPF.</p> <p>4.31 Peel strongly considers that RBC should continue to plan to provide for a level of housing growth which exceeds either of these minimum need positions. The evidence published by RBC confirms that planning on the basis of this level of provision (i.e. 215dpa) will mean that there is insufficient labour within the Borough to support the job growth planned through the Core Strategy. This reflects the projected ageing of Rossendale's population under a trend-based demographic projection. Supporting planned levels of job growth without generating unsustainable in-commuting into the Borough will require a retention and attraction of additional working age people. This in turn will result in the need to provide housing to accommodate this additional population.</p> <p>4.32 The Government retains a recognition of the importance of plan-making in supporting economic growth with the current consultation confirming that authorities will be encouraged to plan for levels of housing need above the minimum position where this supports wider economic growth objectives. The wider benefits of growth with regards to investment in infrastructure and the vibrancy and vitality of places across Rossendale must also be considered in this context.</p> <p>4.33 On this basis, and recognising the challenges facing authorities in developing Local Plans through the current period of transition, Peel strongly recommends that RBC plans to provide housing to accommodate its</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>evidenced need for target homes per annum to be in accordance with the SHMA. This is particularly the case given that the emerging standardised OAN identified by the Government is based on past recessionary trends which do not reflect the future needs.</p> <p>Housing Growth Options</p> <p>4.34 Policy HS1 of the DLP proposes a net requirement for at least 4,000 homes in Rossendale over the plan period (2019 – 2034), or 265 dwellings per annum on average. This is the only housing growth option presented in the DLP.</p> <p>4.35 RBC has, however, also published an overview of the options considered in developing the Rossendale Local Plan²⁸. While the level of development associated with each option is not specified, these options can be summarised as:</p> <ul style="list-style-type: none"> • Option 1 – “Do Nothing” – reliance upon the existing Core Strategy, with no allocated sites and progressively outdated local policies. There is acknowledgement that this would result in residents leaving the Borough through its failure to meet housing needs, and the relocation of employers due to a loss of jobs or opportunities; • Option 2 – “Go for Growth” – maximising employment and housing growth ‘at or close to [the] maximum levels achievable’. It is recognised that this would deliver wider economic benefits and increase provision of affordable housing; • Option 3 – “Environmental Protection Focus” – with a focus on environmental and infrastructure constraints, it is acknowledged that this would not ‘provide the housing and employment needed’, restrict opportunities for young people to remain in the Borough and create difficulty in delivering ‘anticipated housing requirements in full’, threatening its soundness; and • Option 4 – “Draft Plan” – by seeking to ‘meet the housing and employment requirements set out in the evidence base’, this option ‘aims to balance creation of new employment and housing provision with environmental protection’ and would help to retain the Borough’s working population. <p>4.36 The absence of detail on the specific level of housing growth associated with each of these options inhibits consideration of their capability to meet housing needs as considered above. The extent to which each has been meaningfully considered in arriving at the position advanced in the DLP is similarly unclear.</p> <p>4.37 Based on the information available, however, it is clear that a “do nothing” approach will fail to meet the need for housing in Rossendale. Furthermore, Government has legislated to make clear ‘beyond doubt the requirement for all areas to be covered by a plan’²⁹ and reiterated its intention to intervene where necessary to ensure that plans are put in place. Doing nothing evidently is not an option for RBC, and should not be</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>considered as such.</p> <p>4.38 The “Draft Plan” option is taken forward within the DLP, and provides for at least 265 dwellings per annum over the plan period. This aligns with the lower end of the range concluded within the SHMA, albeit covering a different period. As recognised above this would not provide for the higher levels of housing growth needed to grow the labour force and support future growth in the Borough’s economy, given the SHMA’s conclusion that 335 dwellings per annum will be needed to support a continuation of the Core Strategy’s job target. The statement that this option is sufficient to meet housing needs is therefore unjustified and not evidenced.</p> <p>4.39 The “go for growth” option would maximise housing provision and inherently support the highest level of employment growth, ostensibly exceeding the growth proposed in the DLP. By implication, therefore, this would deliver a level of growth which approaches or indeed exceeds the upper end of the OAN range, delivering the greatest economic benefit and supporting the required elevation in affordable housing delivery as recognised by RBC. Although the absence of detail on the absolute level of growth which could be accommodated under this option is unhelpful, in principle this growth option should be given further consideration in advancing the Local Plan to ensure that housing needs are met in full and that the economic potential of the Borough is realised.</p> <p>4.40 In contrast, the “environmental protection focus” option explicitly recognises that it would fall short of meeting needs, albeit the level of provision is not quantified. Peel considers that this option should be disregarded given that RBC has not presented evidence to indicate that needs cannot be met in full. Equally, the realisation of this option from a plan-making perspective would have significant detrimental effects on the long-term sustainability of the Borough’s settlements and the vibrancy of its communities.</p> <p>4.41 On this basis, Peel strongly suggests that RBC dismiss any consideration of Options 1 and 3 as they will fail to provide a sustainable Local Plan for Rossendale. Peel considers that RBC should continue to explore and articulate in more detail an option which is more aspirational than Option 4 and fully accounts for the benefits associated with pursuing Option 2. This should take into account updates to the underpinning evidence regarding the economic prospects of the Borough and the associated implications for supporting infrastructure including housing.</p> <p>Delivering the Type of Housing Needed</p> <p>4.44 The NPPF requires Local Plans to recognise the ‘size, type, tenure and range of housing that is required in particular locations, reflecting local demand’ and encourages authorities to plan for a mix of housing³⁰. More recently, the Government’s Housing White Paper reinforced the ‘need to build many more homes, of the type people want to live in, in the places they want</p>

----	-----------	---------	--------------	-----------------	-----------	---------	------	-----------------

to live’31 – appreciating both the quantitative and qualitative factors shaping housing needs.

4.45 Peel considers that it is critical that the Local Plan seeks to plan positively in providing for the types of homes that will be required in Rossendale over the plan period.

4.46 In evidencing its understanding of these future needs, the DLP importantly references the SHMA in highlighting: “...a need for larger, aspirational property types in Rossendale to rebalance the stock away from small terraced properties and reduce the high levels of out-migration to adjoining areas”32

4.47 Peel strongly supports the planned provision of homes of this type. Qualitative issues in the existing housing stock of Rossendale are highlighted within the SHMA, and are seen to emphasise a ‘qualitative need to rebalance the housing market’. The SHMA cites stakeholders’ views that ‘younger families with children are moving out of the borough seeking more aspirational executive housing’, and notes that:

“It is only by developing higher quality 3 and 4-bed detached properties in [areas with poor quality flatted and terraced stock] that Rossendale can hope to effectively compete against more diverse housing markets or housing markets with a higher concentration of aspirational homes nearby, and to stem the tide of out-migration of affluent residents which is currently a serious problem for the borough. This is particularly important if the upper end of the OAN housing range is targeted, which will aim to reverse the trend of out-migration and seek to attract and retain economic migrants to move to the borough”33

4.48 Accordingly, the SHMA recommends making provision for 60% of all new homes to be houses with at least 3 bedrooms, with half of all homes (50%) detached or semi-detached overall.

Table 4.4: SHMA Recommendation on Size and Type (2014 – 2034)

Size ▶	1 or 2 bedrooms			3 or 4 bedrooms	
All property types	40%			60%	
Type ▶	Semi	Detached	Terraced	Flat	Bungalow
All property types	25%	25%	10%	10%	30%

Source: Lichfields, 2016

4.49 The SHMA notes that diversifying the housing stock towards larger, better quality dwellings will ‘help to ensure that there is a more clearly defined housing ladder within the borough, which is currently overly weighted towards the value end of the market’.

4.50 Planning to support the provision of such homes will contribute towards rebalancing the housing stock profile of Rossendale, which it is agreed is currently skewed towards lower quality homes. In 2017, the Valuation Office Agency34 (VOA) recorded some 51% of the Borough’s properties in Council Tax Band A, which is more than double the national average (24%) and also

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>exceeds the average in the North West (42%).</p> <p>4.51 Delivering higher quality housing in higher Council Tax bands can also have wider benefits in that it offers the potential to increase the revenue of RBC. Households living in Band C properties annually pay some 33% more in Council Tax than Band A35, for example, with an increased representation of higher value properties in Rossendale therefore likely to generate an increased financial benefit to the Council over a lasting period. This important revenue source will enable RBC to reinvest in local community infrastructure and services.</p> <p>4.52 Peel considers that in order to support this objective, it is imperative that RBC directs allocations towards areas where this higher quality family housing can be viably delivered. A balanced spatial distribution is required which takes account of these qualitative factors and development viability, and delivering housing of the quality needed will likely require allocations in areas of higher market demand.</p> <p>4.53 Peel considers that this will require a re-consideration of the proposed spatial distribution of the housing supply / land allocations identified within the DLP. This currently suggests that approximately 31% of land allocations are located around Bacup, Stackheads, Britannia and Weir. In other parts of the Borough, there are more established and stronger housing markets to support the delivery of homes which can be considered as more aspirational and of higher value. The following plan highlights western areas in which higher prices were paid on average over the last two years (2015/16), based on Land Registry data.</p> <p>Figure 4.1: Average Price Paid by Postcode Sector 2015 – 2016</p> <p>4.54 The implications for the spatial approach to providing land allocations taking account of the recognised need for larger higher value homes is considered further in the following section. The additional Green Belt releases required to ensure that the emerging Local Plan is sound must be directed towards those areas at the west of the Borough which are currently under-served in terms of housing land supply.</p>

1781			Rossendale Civic Trust		Object	<p>Policy HS1: Meeting Rossendale’s Housing Requirement The net housing requirement for the period 2019-2034 will be achieved through:</p> <ul style="list-style-type: none"> a) Providing at least 4,000 additional dwellings over the plan period equating to 265 dwellings a year b) Addressing prior under-provision of 425 dwellings (as of 31st March 2017) within the first five years of the plan period c) Delivering an overall amount of 20% of all new dwellings on previously developed land (PDL) across the Borough d) Keeping under review housing delivery performance on a yearly basis <p>A. RCT object to HS1’s focus on “aspirational” housing, despite explanations: Strategic Housing Market Area Assessment (SHMA) (2016).....based on the projected increase in the number of households over the plan period, uplifted to take account of worsening market signals and the need to provide affordable housing.....particularly highlights a need for larger, aspirational property types in Rossendale to rebalance the stock away from small terraced properties and reduce the high levels of outmigration to adjoining areas. It also evidences the need for more good quality, specialist accommodation designed specifically for the growing elderly population.</p> <p>B. RCT compare this proposed build rate of 265/year, with the 172/year delivered from 2011 – 2016, the present Core Strategy 247/year and the Inspectors 222/year:- Report to Rossendale Borough Council by Roland Punshon BSc Hons, MRTPI 29. The Council’s proposed annual rate of housing delivery would be in general conformity with the RS. Whilst I am satisfied that house building rates of more than 222 dwellings per annum could be achieved, I have seen no evidence to persuade me that substantially higher annual rates could be consistently maintained. In addition, given the character of the local environment with its narrow, developed valleys and open uplands, I am concerned that a substantial increase in requirement to meet the need/demand levels identified by the Council’s SHMA could be difficult to achieve without causing unacceptable harm to the character and appearance of the area.....A robust Monitoring and Implementation Strategy will assist in this regard (see Issue 10 below). In these circumstances I am satisfied that, in the light of the existing evidence, the adoption of a housing requirement of 222 dwellings per annum is appropriate although the level of the overall housing requirement will need to be kept under regular review and the DPD should be adapted as appropriate.</p> <p>C. RCT now see 212/year 2016-2026 in 14 September 2017 Department for Communities and Local Government Planning for the right homes in the right places: consultation proposals, and explained:- Indicative assessment of housing need based on proposed formula, 2016 to</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>2026. This is calculated based on the formula proposed in the consultation document Planning for the right homes in the right places. It uses affordability ratios for 2016, and average household growth over the period 2016 to 2026 from the 2014 based household projections. The Local Plan figures used to calculate the proposed cap are included in column I. The assessment is indicative, as actual figures will depend on the most recent data available at the time the need is calculated. For the purposes of the calculation, plans adopted within five years of the date of publication have been considered up to date.</p> <p>Current local assessment of housing need, This has been collected by DCLG from publically available reports. Where possible we have used the latest available figure on the Local Authority's website, with sources for these provided in column G. This is to provide a point of comparison for the formula based assessment of need. Whilst every opportunity has been taken to ensure the latest figures have been taken, these figures should be treated with caution as not every local authority has been able to provide confirmation prior to publication.</p> <p>Proportion of Local Authority land area covered by Green Belt, National Parks, Areas of Outstanding Natural Beauty or Sites of Special Scientific Interest Calculated from publically available data from DCLG, Natural England and the ONS. This provides an indication of land that is not generally available for development, to illustrate the point in the consultation document that not all authorities will be able to meet their need in full within their own area.</p> <p>RCT note Rossendale ONS Code - E07000125, and its neighbours:- Indicative assessment of housing need based on proposed formula, 2016 to 2026 (dwellings per annum) – 212. Bury - 597. *Hyndburn – 60.</p> <p>Current local assessment of housing need, based on most recent publically available document (dwellings per annum)- 265. Bury – 610. *Hyndburn - 180 - 350</p> <p>Proportion of Local Authority land area covered by Green Belt, National Parks, Areas of Outstanding Natural Beauty or Sites of Special Scientific Interest - 31%. Bury - 60%. *Hyndburn - 58%</p> <p>D. RCT 18/9/17 question to DfCLG: 14 September consultation on housing numbers, that proposes 212/year 2016-2026, and notes present revised local plan consultation of 265/year, and current 2011 – 2016 Local Plan Core Strategy of 247/year, which was based on Planning Inspector's 222/year and a previous shortfall. Now on a first scan through/word find look at this consultation, as it makes no mention of individual LA's past 2011-2016 Table 100 deliveries – Rossendale 172/year, am thinking that it's based on where we are now nationally, and so past shortfalls on local plans are not a issue;</p> <p>21/9/19 HOUSSTATS: You are correct that the method does not account for past shortfalls (except where these impact affordability).</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						<p>So we are now looking at a reduction from the present Core Strategy 3700 growth to 2026, on basis of 860 for 2011-16 plus 10 x 2120, to 2980 dwellings. and to 2034???</p> <p>RCT see for Rossendale a potential problem in areas close to neighbours with high demand: Bury and Rochdale, and low demand: Hyndburn and Burnley. E. RCT see as still relevant comments on abandoned 2015 Local Plan's Housing Needs</p> <p>The 1951 Census shows Rossendale with a population of 68958 living in 22550 dwellings. The 1971 Census shows 61857 in 22460 dwellings. In 2001 the Census shows 65600, and the Council Tax Dwelling Stock Total was 28960. By 2009 LCC estimate population at 67100, and 2009 Council Tax Dwelling Stock Total is 30544.</p> <p>We see an occupancy reducing from c3/dwelling, c2.75/dweling, c2.3/dwelling, to an estimated c2.2/dwelling. Will the 2011 Census help to show where Rossendale's housing stock is becoming so underoccupied? With the retirement of the "baby-boom" generation will this underoccupation increase?</p> <p>To counter the Local Plan's aim for 3 and 4 bed "asprational" needs. Is there an unmet demand for new 2 bedroom 3 person and 3 bedroom 4 person houses, with their wheelchair accessible ground floors as required by current Building Regulations: to facilitate policies for more care in the home?</p> <p>What's the engines driving growth in Executive, Low Cost Market, Affordable and Registered Social Landlord Housing. The RSS's target was 222 dwellings / year from 2003 - 2021, it had a shortfall of c370 due to a market slump, and so we see the :Local Plan11/26's 15 years target is now 3700: (222 x 15 + 370). But is this really just a paper target of convenience, that does not take account of the practicalities: that most of Rossendale's potential housing sites are not large, and further many have access problems of steep roads, that will need significant investment to enable there satisfactory use. And what's real aims? Planned urban villages at 50/Ha or, as appears so frequently in Stage 2, "low density" 25/Ha suburban estates?</p> <p>Compare with other Core Strategies for the period 2011 – 2026:- Warrington, CS estimated 2010 at 198,900*, 9099 dwellings = 0.046d/p *now 202,228. Blackburn + Darwen, CS at 141,200, 9365 dwellings = 0.066d/p. Rossendale, CS at 67,300, 3700 dwellings = 0.055d/p. Given Warrington's strategic location on M6, M62, M56, West Coast Main Line, Liverpool to Manchester Line, future HS2, Manchester Ship Canal, and between Liverpool and Manchester Airports, and no hilly terrain, why should the more remote Pennine Lancashire be aiming for so much more new housing? Are we seeing the same sort of wishful aims that produced that oversized bus station in Preston?</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
1789	Jackie	Copley	CPRE		Object	<p>Policy HS1: Meeting Rossendale's Housing Requirement</p> <p>10. CPRE published research showing the problem of Councils setting inflated targets, as required by the NPPF to be found sound. It has promoted unnecessarily the accelerated countryside loss,. Regrettably, housing assessments produced by local authorities (SHMAs) were shown often to be inaccurate, inflated and unreliable, and are not being balanced with sensible planning for infrastructure, consideration of environmental constraints, and realistic assessments of what housebuilders will be able to deliver. For more details please read the research paper here: http://www.cpre.org.uk/resources/housing-and-planning/housing/item/4158-set-up-to-fail-why-housing-targets-based-on-flawed-numbers-threaten-our-countryside</p> <p>11. Therefore CPRE believes the figure of 265 dwellings per annum (dpa) is much too high and will not be found sound at examination.</p> <p>12. The Government is consulting on a new method for calculating housing need and it uses a three step process, to identify a baseline, apply an adjustment to take account of market signals and a cap of up to 40% to ensure delivery. The new indicative assessment of housing need based on proposed formula, 2016 to 2026 new annual housing requirement figure for Rossendale is 212 dwellings per annum (dpa), less than 53 dpa than the 265 dpa identified. The new calculation will take effect from March 2018.</p> <p>13. Over the plan period (2019-2034) this equates to 3,180 homes, 795 less units than the 3,975 figure being consulted upon. If an average density of 30 dwellings per hectare is applied (although this should probably be at least 40 to make the best use of land in the future) this equates to 26.5 hectares less of housing land being needed over the plan period. This can save 26.5 hectares of Green Belt land being released, as the exceptional circumstance no longer exists.</p> <p>14. The North West Regional Spatial Strategy had a 65% brownfield target figure, compared to the unambitious draft local plan target for brownfield development of 20%. CPRE believes the brownfield target should be higher at least 65%. As it stands the policy is non-compliant with the NPPF, or Local Plan Policies SD1: Presumption in Favour of Sustainable Development and SD2: Urban Boundary and Green Belt.</p> <p>15. We will scrutinise the Brownfield Register, December 2017 to understand how robust it will be. The public need assurance that all of the land classed as Previously Developed Land (PDL) is included in Part 1 and that sites suitable for housing are given Permission in Principle as Part 2 sites. The Council must do everything in its gift to ensure brownfield sites are recorded thoroughly in order to achieve effective reuse through partnership approaches to regeneration. All brownfield sites captured on previous National Land Use Database records, Strategic Housing Land Availability Assessments and</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS01	Further comment
						Employment Land Registers need to be considered. Also, local property firms have a good idea of clients aspirations for land holdings. 16. Developers must be encouraged to focus activity on PDL in urban locations, and not chasing rural consents. Rossendale Council must properly plan to ensure local plan policies and allocations achieve an adequate level of homes to market, including affordable homes, effectively enabling brownfield regeneration. Allocating too much greenfield land undermines the viability of brownfield land, so it must be strictly controlled, or the local plan will fail in its core purpose of seeking sustainable development.		
1790	David	Trivett			Not Applicable	Policy HS1: Meeting Rossendale's Housing Requirement. Providing at least 4000 additional dwellings over the plan period equating to 265 dwellings per year. This number may have been correct when the draft was released but; from the Rossendale Free Press article of 22/09/17 I understand this number, though still to be confirmed is now likely to be reduced to 212 dwellings per year following the "Keep Rossendale Green" campaign taken to Whitehall by Councillor Alyson Barnes and Jake Berry MP to protect our green spaces. With consideration to the protection of our "green spaces" I now raise my concerns about the housing proposals related to Bankside Lane Bacup.		
1794			The Methodist Church		Not Applicable	Policy HS1: Meeting Rossendale's Housing Requirement 2.7 A net housing requirement of 4,000 dwellings, or 265 dwellings per annum (dpa), is established under this policy. Having reviewed the Strategic Housing Market Assessment prepared by Lichfields (December 2016) it is noted that the intended housing requirement is at the bottom end of the recommended range of 265-335 dpa. The figure of 265 dpa should therefore be treated as an absolute minimum and should not in any way be suppressed following the consideration of the revised OAN Methodology that is currently being consulted upon. 2.8 The figure of 265 dpa, although at the bottom end of the SHMA recommendation, does to an extent take into account economic growth and employment led aspirations and the Duty-to-Cooperate requirements given the south of the borough's undeniable relationship with the Bury and Rochdale housing market areas (as confirmed in the SHMA). These factors should continue to be taken into account when establishing the correct housing requirement and a failure to do so would deviate from the tests of soundness when examining Local Plans as set out at paragraph 182 of the Framework.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
9	Sharon	Milton	-		Object	We cannot possibly sustain any more houses in Whitworth , we simply do not have the infrastructures in place , GPs , schools, roads. We have had so many new houses built in the valley recently . The traffic in a morning is already horrendous and if for any reason there a road works it is already a nightmare.		-
13	Lewis	Woodruff	-		Object	Stop any more building of houses in Whitworth. - Road infrastructure totally inadequate for the amount of traffic it will generate. - Already congested at peak times with only one road in and one road out. - Also schools and medical centres need building to support influx of new residents		Stop building houses in Whitworth and leave the green spaces to be enjoyed as they are. - Spoiling everything that makes Whitworth a nice place. At least provide some recreational space of facilities if green spaces are to be developed. Whitworths roads cant sustain anymore traffic its ridiculous
15	Mike	Royds	-	HS2 Tonacliffe	Object	We need to know what provision will be made for roads and traffic which are already heavily congested, what provision for more school places, more doctors etc		not at this time
29	Lynn	Holland	-		Object	Schools are over subscribed already. - Doctors surgery far to small to accommodate more people. - Traffic - roads already overcrowded and in a poor state. - Entrance to new estates not adequate - Services throughout whitworth already overloaded - Electricity and water supplies often faulty		-
30	Jammie	Mc Ninch			Object	The infustructure of the village will not allow anymore development. Schools are over crowded,water and sewer are over powered, not to mentioned roads are congested.		-
34	Marie	Eccles	-		Not Applicable	The main worry that people seem to have about the proposed extra housing developments in Whitworth is the potential extra burden on the infrastructure (schools and doctors' surgeries, sewage systems, increased traffic etc.). I have not been able to find any reassurance in the plan that these will be taken into account and provision made - although I have to say that navigating around the files on the website is extremely difficult, so I may have missed it.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
35	Catherine	Duffy	-	HS2.108 in particular, + all the other proposed sites in Whitworth	Object	I am very concerned about all these proposals, especially Sandbank Gardens! - - 1) Where is the access going to be? Sandbank Gardens is a cul-de-sac with private gardens at the top, it is a very narrow street with already many residents cars parked on the kerb/street. The public house close by is one of the hubs of the community and as such hosts regular events, ie meetings re the local football teams, starts for races and many more. Sandbank Gardens then takes the brunt of people attending these events parking their vehicles on Sandbank Gardens. Maybe the plan is to use Tong End as the access, again another nightmare! On a very narrow over used road. It is used every week day by the waggons up and down to the quarry, lots of visitors to the water ski centre, the reservoir and off road centre in the quarry, along with residents cars parked outside their homes on the road. - - 2) The water and electricity struggles already with the amount of properties in the village. We have frequent disruptions in services in both these areas, more properties on this clearly out of date system would surely lead to even more disruption. - - 3) The majority of the primary schools and the high school are running on full capacity (even with waiting lists), therefore, who will fund the building works and staffing, to accommodate the influx of children wishing to be educated, as I am presuming that the proposed sites would be family homes! - - 4) Our village has one road in and out, which is already busy. The slightest disruption makes for major delays, surely more users would make these delays more permanent.		Leave our village as a village, don't make it into a town. It's facilities and amenities are already at full stretch with no sight of extra funding to accommodate these proposed extra residents!!
41	Catherine	Swift	-		Object	Too many houses for small village - Issues with congestion/traffic on market street - Schools - edenfield, stubbins and haslingden already over subscribed - Few local amenities - v small run down park and community centre		
43	Jill	Hunt	-		Support	Edenfield is the perfect location for us to move to so we support plans for new homes, as there is a real lack of opportunities to purchase new builds in this area. Obviously the impact on local area and residents and improvements to public transport and local infrastructure must be considered carefully as this is critical in ensuring a successful plan for Edenfield.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
48	Chris	Comer	-		Object	Whitworths current infrastructure is over capacity. - - Schools are at capacity with Whitworth residents unable to gain places - - Whitworths one Medical practice is well over capacity with appointments spanning 2 weeks away. They cannot take on more patients without further effecting its current services. - - Whitworths Dental practice has stopped taking on NHS patients and is again over subscribed. Appointments are approximate over 3 weeks away. - - Whitworth has two childrens play areas which are over 2 miles from each other, these are in a diabolical state and give local families little or no use due to their distance from most people and their condition. - - Whitworth is a one road in one road out under funded village. In recent years it has had a massive influx of new builds which have contributed to increased congestion and strain on ALL local services. There are already passed plans for more homes in areas at frankly stupid places that will cause ridiculous and dangerous traffic. - - Overturning current green belt classifications so that it can be built on is an absolute disgrace and an ignorance of the current poor infrastructure of Whitworth and its surround areas. -		
166	Isabel	Hannah			Object	I ask have you seen a plan of Edenfield? Have you seen how there are a few roads where one were tracks? Please realise the the present roads can cope barely with the amount of traffic. I see heavy farm vehicles passing , huge blocks of stone plus large lorries (I count the wheels) apart from other limitations		
211	Sarah	Broxton	-	-	Object	The village has no facilities to sustain the increase in housing and people. The school is small, no shop., pub and very limited parking.		
241	Lyndsay	Hastings			Object	I wish to object on the plans regarding more houses being built in Edenfield. I am no longer an Edenfield resident but feel this move would spoil the highly desirable village. The extra housing that has been built over the last few years has increased congestion and with more housing this will worse. Edenfield has the charm of being a small friendly village, if the plans go ahead to build hundreds of houses, this will no longer be.		
261	David	Eyes	-		Object	Please accept this email as an objection to your plan of building a substantial number of homes within Rossendale over the next 15yrs. This proposal is profit driven as the proposed buildings will only decrease the standard of living in the Borough. I know that elderly neighbours are already in tears at the thought of their current 'green' back yard view will one day be covered in houses. Regards		This smells of greed over common sense

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
286	Christina	Pieper	-	building new houses in Whitworth	Object	Whitworth is far too overcrowded as it is. It is a village and can not facilitate more houses it is not a town.		-
351	James	Fulton			Object	The Rossendale Valley is, as the name suggests, a valley with single road running through the middle. Infilling here and there with new build houses throughout the valley is not only detrimental to the character but it will also have a significant impact on the infrastructure. It already takes 30 minutes to drive from Crawshawbooth to Rawtenstall on a week day morning due to the sheer amount of traffic on the roads. Infilling will only make this worse. Surely the best option would be build on the outer end of the valley, near to the bypass that everyone is trying to reach. There is plenty of space there and a new slip road could be created to allow the new residents immediate access to the bypass. Ewood Bridge and Townsend Fold would be much more suited as there is plenty of spare land such as the old football club and the Mayfield Chicks site. The residents can have easy access to the bypass at Road End, they are near to Haslingden High School and Tesco is there as well. Building on these sites will also be much easier and more attractive to developers as they are easily accessible, flat and will have little impact on local residents are there very few.		-
364	Paul	McAteer	-	4344	Object	I object to this proposal due to the increased population of the village over a short period of time causing traffic chaos to the village and increased pressure on the social infrastructure and resources locally. There appears very little coverage of the damage to the green belt area in this vicinity. The proposal should be rejected.		No
389	Kirsty	Stott	-		Object	To many houses being built on the area our roads schools and facilities won't stand to footprint.		Taking away all our green belt land .
437	Geoffrey	Bramwell	-	Sites for the proposed circa 400 new homes not yet identified	Object	Whitworth is already a very busy village with too few schools, General Practitioner service, poor transport connection that cannot support the traffic streams currently trying to depart/enter to/from Whitworth. It would not be terribly difficult and could have minimal effect on local households if the authorities and government looked at a new route over the moor connecting to the M66.		Only that I will write to our local MP to express my concerns. It is to be hoped that councillors will include their suggestions/support for the schemes to increase the housing stock in future canvassing material.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
521	Lynn	Phillips	-	HS2, South West plan: Edenfield and across the Authority	Object	<p>I support the plan for 300 new homes for Edenfield in principle as it would boost the local economy. However the Market Street highway is already difficult to navigate due to parked vehicles either side of the road. How does the highway authority propose to address access for the new development? Surely a new highway infrastructure would have to be constructed. How would this be funded? - - M66: 4000 new homes in Rossendale would decrease the capacity of the motorway. New homes development in Edenfield would be a factor in itself. Capacity is already at maximum. At evening rush hour its often second gear all the way from Bury to Rawtenstall. Regarding Edenfield, access to the M66 would have to be improved: i.e. slip roads into and off the motorway at Edenfield and Ramsbottom. I work in Oldham and drive via the M66 junction at Ramsbottom. Often in the morning the traffic is backed up from the Duckworth Arms at Edenfield to the M66 slip road: it can take 20-30 mins to travel the two miles. - - The overview of the master plan for the 273 new homes off Market St, Edenfield, has an emphasis on the use of public transport and cycling. Public transport is woeful! The X Witch Way service through Edenfield was cancelled 6 years ago. There is no bus service from Edenfield to Rochdale along Rochdale/Edenfield Rd. The current bus service is limited and not frequent. Cycling: sorry but the topography of the area lends itself to only athletes, the average cyclist cant cope with the steepness of our local roads! - - The Metrolink needs extending from Bury to Ramsbottom, Edenfield and beyond, to service the thousands of new commuters the new homes across the borough would create. However not at the expense of the East Lancs railway which brings in much needed tourist income to the area and our history needs to be preserved for future generations. - - Finally, with regard to 4000 new proposed homes across the authority: the additional council tax receipts will not be sufficient to cover the cost of the required increase in services such as policing, emergency services, schools. GP surgeries, refuse collection, highway maintenance, adult social care, environmental services etc etc. With ever decreasing central government payments, how would Rossendale support this? - - -</p>		-

639	Roy	Lister	-		Not Applicable	<p>PROPOSED LOCAL PLAN FOR ROSSENDALE - - I attended the consultation meeting held at Kay St. Baptist Church on Thurs. 7 Sept. - - With regards to the proposed local plan for Rossendale, I wish to make the following comments. - - There appears to be a tremendous amount of proposed housing developments alongside the Newchurch Road corridor. - - Newchurch Rd. already has to cope with an ever increasing volume of traffic. I feel that to place more vehicles on this road will create increased problems for drivers. Traffic has been increasingly problematic over the last two years or so. This is due to the fact that Alder Grange School, along with LCC decided in their wisdom, to build a rear access tarmac path which links to Hurst Lane. This has invited a large volume of traffic to avoid having to travel along the busy A682, Burnley Rd. then having to turn into Constablee housing estate to access the school via Calder Road. The A682 is busy enough at the best of times but exceptionally busy at early morning/mid afternoon times as school commences and closes. Much of the School traffic can now avoid long delays due to being held up at the traffic lights outside of the Market/Old Ram's Head pub. It is now using Union Street to gain access to Hurst Lane and the rear entrance to the school instead. - - Because most residents on Union St. park their cars outside their houses, Union St. is a single track road 100% of the time. Upon reaching the top of Union St. traffic has to make a right turn into Hurst Lane round a blind corner. At this point on Hurst Lane, there are no pavements for the first 100 yards: the lane is quite narrow. School children have to walk in the middle of the road at the very point where cars have just driven around a blind corner. This creates a danger to both the children and to drivers. - - Union St. itself has a very steep incline. In Winter it is especially a very difficult road to drive on and unless you have a four wheel drive vehicle you will be unlikely to ascend Hurst. Lane. Trying to attempt to descend is extremely difficult in icy conditions. It has parked vehicles 90% to 100% of the time on one side of the road, if you happen to start sliding as you descend, you have very little manoeuvring space to avoid colliding with another vehicle particularly at the junction with Newchurch Road. - - Furthermore since the introduction of the rear entrance to the high school, it has been calculated by Residents that Union St. and Hurst Lane have experienced a higher volume of traffic to the tune of 10,600 to 13,680 per annum. The regular increased volume in traffic generates this figure. - - Calculation used:- 30 to 40 vehicles per visit, twice per day (Morning & Aft.) = 60 to 80 vehicles per day. - - Number of school days per year, (Days per year – 365 less (14 wks. Holidays) 14 times 5 = 90 - less 52 weekends = 104 Total usage days 365 minus 194 - - Days of school days therefore 365 minus 194 equals = 171 days per yr. At average of say 70 per day equals a traffic surge of 11,970 per year on road's and lanes that were not designed for such volumes. - - In respect of the junction at the bottom of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>Union St. with Newchurch Rd, there are two shops and two bus stops(one either side of the road) close to the junction. Regularly cars,van's and lorries are parked outside these shops. This creates a gridlock at this point.</p> <p>Newchurch Rd. in this area reduced to being a single lane road for much of the day. This has proved to be a nightmare for those residents of Union St., Hurst Lane, Hurst Crescent, Waingate Village and Chapel Hill, wishing to gain access to Newchurch Rd. - - Union Street is the ONLY highway available from the area to access the Town. The bottom end of Hurst Lane, connecting to and passing the top of Whithead St. and leading into Crankshaw St as shown on highway maps, is only just wide enough for the smallest of vehicles. No Emergency vehicles, Fire, Ambulance etc. would be able to access the whole of the Chapel Hill area using this section of the road as it is far to narrow. - - Waingate Road, leading off Newchurch Rd. up to Waingate Village as shown on the highways map, is only a footpath/bridle-path with no capacity for vehicles. - - Any changes to the Urban Boundary, in order to facilitate further housing development in the Springside, Higher Cloughfold and Newchurch area would put tremendous pressure on the volume of traffic using Newchurch Road, which is already full to bursting. - - It is noted that planning permission has already been granted for two five bedroom houses outside of the existing Urban Boundary, on a greenfield site. (2015/0308.) although according to the draft local plan, it is not proposed to move the Urban Boundary line to incorporate the area of land where these houses are to be built. Therefore the Council are already proposing to allow houses to be built in the Countryside, outside of the Urban Boundary. - - In view of the news that the target for house building in the area that the Central Government are imposing has dropped by some 50%. I would strongly urge the Council to abandon any proposals to develop outside the Urban Boundary and especially to look very closely at any development proposals that would affect the Newchurch Rd. and Springside area's of the town. - - Please try and concentrate on developing any Brownfield sites along with redundant buildings and former Industrial sites. - - SUGGESTED SITES:- - 1) The old Poundland store site on Newhalley Rd. - 2) The old Broadley Factory site on Burnley Road (A682) - 3) Land opposite the bottom of Woodcroft St. (A682) The old White Factory site. - 4) Land at the old Social Services day care centre on Haslingden old road. - (This building has been closed for over two years at least) - 5) Site of "Horncliffe House" on Bury Rd. (Ex A56) Closed and in disrepair. - 6) Site of former Holmfield Garage on Burnley Rd (A682) - -</p>

662	Joanne	Ormerod	-	Helmshore	Object	I want to object to any form of housing being built in Helmshore. Our village (or village that was) is being destroyed. I moved to Helmshore in 1994 when it was a quiet community. Since then i have seen at least ten developments of 3 or more houses. Every small space is being filled and not always with quality housing in keeping with the area. The roads are busier and are rarely repaired or prepared for the over use. I work at the local primary school where more and more children are being squeezed in yet funding is being cut and support staff are being lost. I accept some of the housing in Helmshore is justified and has been built on brown field sites. More and more now i am seeing plans and rumours of green sites being destroyed. Helmshore is a desirable place to live but not for long. New houses are being squeezed in but the desirable local schools that bring families to Helmshore are not even available to people who have lived in Helmshore for years as the catchment area is so overcrowded that houses 5 minutes from school have to be allocated school places in Haslingden! Stop the building now and think about what you are doing to lovely individual places like Helmshore. They are being turned into toy towns with queues of traffic everywhere and every green space filled with bland houses .

677	Phil	Ramsden	Lindon Park Development s Ltd		Object	<p>Policy HS2: Housing Site Allocations - - This policy identifies a number of sites on the Policies Map that have been allocated for housing development. The Representor does not object to the intent and purpose of the policy but it does question why a site off Lindon Park Road, Ewood Bridge, Haslingden is not included. - - This site was granted outline planning permission for 235 dwellings in 1972 (under planning permission ref no. 13/2/2600LA). Subsequently, a further detailed planning permission was granted for 231 dwellings at the site (under planning permission ref no. 13/2/2758) albeit the extent of the application site was slightly smaller than the area covered under planning permission ref no. 13/2/2600LA. In or around 1974, 44 of the consent dwellings under planning permission 13/2/2758 were constructed and later sold and occupied. As a consequence of the fact that the relevant detailed planning permission has been implemented, as evidenced by the fact that 44 of the permitted dwellings were built and stand and remain occupied today, confirms that the other non-implemented elements of the permission can be built out in future. The owners of the site, the Representors in this instance, have sought learned counsel's opinion on this matter, which was provided to a prospective housebuilder in 2013, which concludes the same. As such, this site, for which we would be happy to provide further details and background information and documentation on, should be included in the schedule introduced by this policy as a residential allocation for up to 187 dwellings (number not yet built out under planning permission ref no. 13/2/2758) or another number to be defined through a fresh planning permission. - - The fact that this site benefits from a planning permission for residential development raises the question about whether all of the sites forming part of Policy HS2 need to be retained. In the Representor's view, a number of sites currently included in the policy are not obvious development sites by reference to site and other related constraints. For example (in no particular order): HS2.82, HS2.84, HS2.24, HS2.33, HS2.53, HS2.80, HS2.32, HS2.24, all of which raise different issues regarding whether they are suitable and viable for development of housing and within the plan period, a key issue being that many would seriously impact on existing urban areas and cause urban cramming by virtue of the fact that no new infrastructure is planned to cope with the additional development. Indeed, the Representor is of the view that the Council should give serious consideration to adopting a new and more sustainable development strategy which involves releasing Green Belt in the southern section of the district so that new development has better access to the primary route network, public transport and main centres both in and out of the borough. - - Regardless of this preferred strategy, the Representor is of the view that all of the sites currently proposed to be allocated need to be fully and properly reviewed to ascertain their suitability for development, and linked to this the Council should consider formulating an infrastructure</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						masterplan to ensure that with all of the planned development in place, the urban areas of the borough can still operate effectively and sustainably. It also needs to carry out a full and proper audit to ensure that sites like the Representor's are not missed or ignored, given the significant role they might be able to play in housing delivery. -		
706	Jackie	Taylor	-		Object	Whitworth has green belt areas that support and enable a multitude of wildlife to flourish - - Proposed change if use of these sites in the plan will be detrimental to any protected species - - Whitworth is already experiencing pressures of more recent housing builds---the infrastructure of roads, schools and health is not equipped for the numbers of proposed new people that additional housing will bring		I trust our council will consider the unintended consequences of harming our village and take a responsible decision to safeguard our environment for the people and wildlife
801	Melanie	Spence	-	Tonnacliffe and whitwirth	Object	More housing will put more strain on already bad roads. Not enough schools or doctors places let alone policing which is non existent in whitworth		-
906	Graham	Smyth	-		Object	Only that caution should be exercised in proposing development in Bacup because of the wider infrastructure / access / capacity issues highlighted in my above representation.		While accepting that the task set the council is a difficult one, it is my view that further destruction of the countryside areas in and around Bacup should be resisted, and that Bacup has neither the capacity nor the infrastructure to absorb a high number of houses. Bankside Lane in particular is unsuitable as an access route for more housing, which would create dangers and obstacles for vital services.
914	Daniel	Allen	-		Object	HS2.86 - this development is above a school and the traffic would present a danger to kids. It is already dangerously packed with people and cars at picking up and dropping off time, extra cars would only make this worse. Also the exit to Newchurch Road from St Peters is almost blind, extra cars using this exit would only increase the risk of accidents. - HS2.53 - this land is always boggy - building on here would cause an increase in flood risk. - HS2.54 - this would build over a current wildlife corridor as this land was intended for. Access from Peel St and exiting on the 'bad bend' on Newchurch Road would also increase risk of accidents. - HS2.82 - the south west end of this development would be over precious wild land bordering on Staghills Woods and for the number of houses which could be accomodated in this area is surely unnecessary, and access would be difficult at best.		Some of these proposed developments need further consideration as to their merit with regards to road safety, unnecessary destruction of wild land, flood risk and drainage issues. Consideration also needs to be given to how the local area can support these extra houses with regards to school places, medical facilities, road capacity, dirty water drainage and sewage. I'm not convinced that this has been carefully considered.

917	A J	Hill	-	General Objection To All Building Sites In Whitworth	Object	Reasons for objection. - Wildlife, All the land in the Whitworth and Shawforth area that is not built on is of great importance to the local wildlife ie, Deer, Badgers,Bats, Various species of birds,Foxes,Hares to name but a few. - - The infrastructure in the area is already at breaking point Doctors and Dentists are struggling to accommodate existing residents. On a personal note I had to travel to Rochdale walk in centre with a bad ear infection when i was told that I would have to wait for one week to get an appointment at Whitworth Medical Centre. - The existing Gas Water and Electricity supplies are continuously having to be repaired, all these supplies are situated under the main road which runs through Whitworth. This is the only road in and out of the valley and is frequently gridlocked due to temporary traffic lights. It is not uncommon to have tailbacks of traffic of between four to five miles in length. The Gas main outside my property has fractured twice in the last four years, in the last instance five properties were evacuated whilst these repairs were undertaken due to the high risk of explosion. - - Landscape. The landscape is such that Whitworth is situated in a valley and due to the changes in weather patterns a lot of the land that is not built on is required to help to soak and help drain the heavy rain that the area has been experiencing over the last few years. To build on it would only increase the risk of flooding.		In my opinion if the Government is intent on putting pressure on local councils to build houses, it would make much more sense to create new towns and villages instead of proposing to build in areas where it is quite obviously not where the majority of people want them to be.
1058	Faye	Murphy	-	HS3.12	Object	I have lived in Edenfield all my life and I think adding extra housing is not the way forward. There is not enough schools, GPs and parking space so I think it isn't a good idea.		-
1158	Richard	Hughes	-		Object	Whitworth is a single through road village. Congestion is increasing on all side roads with the current housing stock additional housing in the village will only add to this issue. Other local infrastructure is failing - e.g. Water supplies. There are frequent outages in the village - Tonnacliffe being a prime example. Adding additional demand on water will lead to pressure being increased in the pipes leading to additional outages. One GP surgery which is at bursting point. The most excellent Whitworth Community High School is at absolute capacity, the kids can hardly move in the corridors now , additional demand cannot be catered for within the existing buildings. - The village is full, no more houses -		as above
1177	trevor	thomson			Object	to many houses in whitworth now not enough schools and only one road get wise		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
1199	Wendy	Hamer	-		Object	Whitworth is village which is already struggling with traffic travelling to other towns is a nightmare most days - Also the doctors is heavy under pressure getting an apt is pot luck as with so many now registered ,,schools are now full so where are those pre school children already in village going to go ,before you even build more houses bring more children in - All the services are already stretched we have regular water failure,power failure building more house will surely have an impact on these services as there is no mention of updates to the services nor has there been for years - Also the police,fire and ambulance services are struggling to provide adequate cover of Whitworth now due to government cuts ,we have in recent months had a very high number of crimes - We have one road which at peak times is sometimes very congested the proposed site one near a school which at school times now is hazardous to all children due to the volume of cars ,another is off the main road with a street which is not wide enough now for traffic - Whilst I understand the need for more Social housing that our children will need to rent I understand some of the proposed sites in whitworth are for private sale where does that help our already struggling village as those who buy are usually from else where and will want to commute to work on an already packed road -		Before plans to build further housing perhaps up date the services ,look at another road to Rochdale the road over lobden/Skye would be a good alternative if it was brought up to standard then if road closed at least could get to work and not risk losing their jobs
1269	Alex	Rushton	-		Object	The traffic in and out of Whitworth is already a nightmare! More houses means more cars and with one road in and one road out it's not feesable. - Also I moved into Whitworth because of the beautiful countryside surrounding my home. I don't want to see more housing blocking the way. - - -		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
1273	Robert	Baron	-		Object	General objection to the building of housing throughout the area of Whitworth. - The proposed sites for these houses would require the destruction of woodland having an incredibly negative impact on the health and wellbeing of the wildlife and the people living in these areas. - Also, some proposed housing would put a strain on the drainage that is already at near breaking point, leaving many residents at the risk of major flood damage affecting infrastructure and local businesses. - Also, since there is only one way in and out of whitworth, the roads are already at breaking point. Traffic is regularly backed up and a 5 minute journey often takes over an hour due to the sheer volume of traffic on the road. Adding further properties to this would only increase the misery on whitworth drivers who already have to endure ridiculous traffic jams on a regular basis. The increase of traffic will put lives at risk due to the number of vehicles using an already oversubscribed road. - - As some of this housing is proposed to be built on greenbelt land, some of which has already had planning permission denied in the past, please can somebody explain the exceptional circumstances that will enable these developments to go ahead? - - Our water, electricity, internet, and gas are regularly pushed to the limits. Regular power cuts and water problems occur already so building these extra houses will put even more pressure on these services and pile even more misery on the residents of whitworth. - The schools are already under immense pressure, more houses will bring more families and more children and teh schools will not be able to cope. Also, the extra road traffic at school times will not only increase volume of traffic on the roads but it will also put poeple's lives at risk. - The fact that the council is even considering building over 350 more houses in whitworth when we dont even have the infrastructure, resources, roads and schools to cope with the population at present is ridiculous.		-
1319	Raymond	Teague	-	41	Object	Local infrastructure not in place to cope with increase in housing		-
1338	Alexandra	Foster	-		Object	Whitworth (and surrounding areas) is a small village which is already over capacity, and local resources stretched. - Building of new houses of the quantity that the council propose is going to be detrimental to the everyday lives of inhabitants of the village including parking, GP services and crime are a few to name. - The surrounding areas are idyllic and habour various varieties of wildlife and to see this be destroyed is not right. This village sits on green belt land and this should not be tampered with build houses that the village cannot accomodate.		-
1340	Rachel	Jones	-		Object	I do not believe that edenfield infrastructure can cope with the extent of the building proposed. - Traffic/pollution and parking is already a problem, which is further exacerbated when traffic is directed from the bypass.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
1346	Samantha	Culshaw	-		Object	I am worried about the amount of cars this will bring to our roads and how over crowded our schools will become. I. Like oue village and how small it is, that's why I bought a house here. If it was bigger it wouldn't be as quaint.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
1382	Gaynor	Mellor	-	Whitworth	Object	<p>1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. - 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. - 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. - 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? - 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. - 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. - 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. - 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. - 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. - 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. - 12. What would the impact be on the carbon footprint of the valley ? - 13. Loss of privacy - Would my house and others be overlooked. - 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. - 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. - 16. Some of the areas and the surrounding areas have already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. - 17. A public footpath (Right of way) could be lost. - 18. Local drainage cannot cope with the usage now would more</p>

						residents put an unbearable strain on this network. - DON'T FORGET EACH ADULT IN YOUR HOUSEHOLD CAN PUT		
1421	VALERIE	BENNETT			Object	The areas that are being considered for change of policy ie Green Belt and the areas in consideration for new housing. I am objecting on the grounds primarily that the infra structure of this small town just couldnt sustain the increase in volume of cars that would be caused by more new builds - primarily Whitworth is one road running through the town- the current volume of traffic is already more than enough to cause travel disruptions and when the snow arrives and inclement weather this can cause major issues even now - so if the plans to increase the volume of housing within the town go ahead - then the traffic will become a major headache for existing and new residents to the area. The Green Belt areas should remain as they are - that being areas for people to visit and enjoy - to remove the habitat of many wild animals and flora is not acceptable Whilst I appreciate that new builds are needed to keep economies alive and for them to thrive - they should be built on existing sites that are residential areas within the current Local Plan and new sites shouldnt not be placed at the detriment of Green Belt Land.		I Hope you do take into account the feelings of the people that do live in this town - as it is important we do protect our heritage and that consideration is given to what must be protected for future generations and balance that out with what is needed within the Borough and where the new builds are best placed to be so as to keep a balance for everyone within the Borough - please dont destroy this community and cause animosity please reconsider where the new builds are best to be built
1426	David	Evans	-		Object	Firstly the proposed development is on green belt land which under central government guidelines should only be permitted under exceptional circumstances. There is absolutely no evidence included in the local plan suggesting exceptional circumstances exist that warrant housing development on greenbelt land in Edenfield. - Secondly infrastructure in Edenfield including the road network, school facilities and medical provision are not sufficiently robust to support any further housing development.		No.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
1458	Jodie	Fairfax	-	Housing Site Allocations - specifically the sites behind Bankside Lane and at the back of Rooley View, but on housing development in general on any green land	Object	<p>I am a current resident of Bacup living on Edward Street with my husband. My parents (who live on Rooley View) and my sister and her family who live on Bankside Lane will also be objecting as will many of their neighbours. - - Empty houses already in Bacup abd Stacksteads - Firstly, I question the need for housing at all. If it is proven that housing is required, then there are hundreds of current buildings lying vacant in Bacup, as well as vacant industrial units where housing could easily be developed without touching the green land around Bacup and it's surrounding areas. In fact, from my house, within 20 yards of my front door, there are 4 houses boarded up that could easily be affordable housing. Not to mention no end of vacant properties on Newchurch Road through Bacup and Stacksteads. The Britannia Estate is still partially empty and those houses have been on the market for 2 -3 years already. - - Infrastructure - we have no police dedicated to the area; schools that are already oversubscribed, no high school or colleges; roads are already in a state of disrepair; public transport links are confined to the centre only; the healthcare in the area could not sustain the influx - doctors, dentists, not to mention no hospital. - - Width of roads (congestion) and width and lack of paths - specifically looking at Bankside Lane, the roads are already congested, double parking is rife. My husband drives a van and struggles to drive it up Bankside. The volume of vehicles required for a large housing development would not be feasible on the current road structures let alone the volume of extra residents using the road. Also, the paths are already too narrow for - the elderly, disabled and parents with prams and young children. - - Surface drainage problems and sewerage problems - possible flooding in some of the areas (e.g. Bankside Lane). Also, there is already existing issues with sewerage on Bankside Lane. The pipes frequently get blocked and overflow. My brother in law is a water specialist and had regularly unblocked it with rods so it stops running into his and other residents gardens. More sewage is not sustainable with the current system. - - Traffic in and out of Bacup at peak times - I commute to Salford daily. It often takes me 30 - 40 minutes to drive the 10 minutes to Rawtenstall at rush hour. This would increase. - - Wildlife and Areas of natural beauty - As already mentioned, I don't believe there is a need to build on green land, for example, behind Bankside near Animal Quackers. The impact on local residents, the environment and wildlife in the area will be catastrophic, and when there are many other options within current buildings and land, and so many empty houses, I don't believe this is needed. -</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
1461	Peter	Toulmin	-		Object	All the greenbelt land is of great importance. We have rare species of protected newts, deer that sleep within the wooded areas at night, bats that roost in the trees and badgers, foxes and hares that exist in the areas. - The one and only main road that runs through Whitworth is already full to capacity, and more vehicles that will be brought about by this planned house building will only make the problem worse. Only one set of temporary traffic lights causes absolute havoc throughout the valley, increasing travelling times and air pollution. - Access to the proposed sites is only accessible down narrow streets or tracks.		-
1475	Kim	March	-		Object	The sites relating to Whitworth in respect of the draft local plan do not take into account the infrastructure of Whitworth. There is one road into and out of the village and this is extremely congested during peak times, having queued for an average of 45 minutes to an hour to get to Rochdale most week days. Further houses will make this bad problem much worse. You have made no proposal as to how the extra cars will be accommodated in terms of egress from the village? - The school have waiting lists, so presumably you will advise new residents that they will be unable to get their child into a local Whitworth school if they are moving from a different area? Again, your draft policy makes no mention of this issue? - The GP surgery states that the average appointment waiting time is four weeks at least, so further residents will increase this problem. Your draft plan makes no allowance for a second GP surgery, and so again how do you plan to resolve this issue? - Your draft plan is flawed as it looks at the sites in isolation. Your plans do not take into account an already bursting infrastructure within the village. - -		-

1478	N/A	N/A	Winfields Holdings Ltd and Winfield's Ltd		Object	<p>As set out above, in order to meet the Borough's identified housing need and reduce pressure on greenfield sites, historic employment land that has little or no prospect of being developed should be released either as part of a mixed use scheme or for stand alone residential development. The land at Hud Hey (EMP2.14) extends to over 8Ha and much of it is long-term vacant despite having being allocated for employment purposes since at least 1995. A restricted area currently accommodates Winfield's Limited's warehousing and head office operations, but It is the company's intention to relocate these operations to the company's site at Acre, as indicated by the representations submitted with respect to Policy SD2 (thereby retaining it and expanding its existing contribution to local employment).</p> <p>The land currently identified for employment purposes includes a number of residential properties which extend into the northern section of the site as well as being located to the west of an existing residential area that extends along much of its eastern boundary. The site also includes an extant consent within the recently listed Britannia Mills for retail use.</p> <p>A significant proportion of the site has historically been cleared in order to make it more attractive to the market, but without any interest arising despite being allocated for employment purposes since at least 1995. In this respect, Government is clear, as set out at Paragraph 22 of the NPPF, that planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of them being used for that purpose.</p> <p>As identified, there is a recognised supply of vacant employment sites of this nature within the borough with there being no reasonable prospect of them being used for the allocated purpose. Government states that alternative uses should be treated on their merits with regard to market signals and the relative need for different land uses to support sustainable local communities. It is not suggested that employment uses are necessarily excluded but rather that the site is identified as being suitable for residential purposes. In this manner, the site would make a meaningful contribution to the Council's housing requirement on a brownfield site in a sustainable location close to a range of opportunities and services that are well served by public transport. This would, in turn, reduce the need to release greenfield sites.</p> <p>The status of the site has, therefore, changed since its initial allocation for employment purposes prior to 1995, with the grant of a retail consent within Britannia Mill (lawfully commenced) demonstrating that the site is already being used for mixed use purposes. The recent Grade II Listed status accorded to the Mill requires an alternative approach, particularly given the cost of renovating and maintaining this building, which the allocation also needs to address.</p> <p>In summary, the site should be allocated for mixed-use and/or residential</p>		-

1512	David & Ann	Rhodes	-		Not Applicable	<p>These are comments relating to the draft local plans prepared by Rossendale Borough Council -</p> <p>- 1. Oversight. - Abbreviation - RBC - Rossendale Borough Council - Because of topography of the area, and a lack of homogeny, there is a substantial case for looking at local plans in a strictly local, rather than borough-wide context. The Whitworth district is at the periphery of Rossendale and surveys over a period of years have consistently shown that Whitworth is more closely associated with the Rochdale Metropolitan Borough in relation to housing, employment and recreational services. These observations relate solely to the proposals in relation to the Whitworth Township, and not to such proposals as relate to the wider Rossendale Borough Council.</p> <p>- 2. Pre-disposition to develop - The documents prepared by RBC appear to be pre-disposed to development within the Borough, and actions such as the borough positively seeking nomination of land for development appears to reinforce this impression, as such lands appear, in relation to the Whitworth area, to be put forward for housing development in the plan and no land has been identified for purposes other than housing development. There is negligible evidence in the documents produced by RBC to show high projected housing demand and certainly none in relation to the Whitworth area which, as mentioned already, is more closely linked to Rochdale Metropolitan Borough. In documents of the Rochdale Metropolitan Borough showing their local planning proposals, these documents do not reveal any pressing significant development requirements for their area - and therefore by substantial implication, the Whitworth district.</p> <p>- 3. The Whitworth District - a) The Whitworth area is a 'ribbon' township: it has one major road which traverses the valley between moorland hills. All traffic - road access of any kind has to use this single (2 single lanes, one in each direction) road, including all emergency vehicles and emergency services (it should be noted that there are no police, fire, ambulance, or accident services or facilities in the Whitworth area, therefore all residents in this area rely ENTIRELY on this lifeline). Any problem in this road, and there have been many, involves a diversion of 14 miles to Rochdale. This is a major and significant limitation to the continuing development of this district, yet RBC in its infrastructure plan document of July 2017, makes no reference to this severe limitation to the further development of the district.</p> <p>- b) The one road contains all of the major services to the area beneath its surface. Any problem in these services immediately leads to disruption to traffic in the one road. It is reasonable to assume that some local, regional or government agency will be able to quantify days and hours of delays in recent years, which should be quantified and presented by RBC if its development proposals - which would lead to significant increase in traffic volume - are to be considered. Presumably, RBC has already undertaken studies of traffic volume in the district, and such studies will be made readily available in further consultation</p>		I should appreciate an acknowledgement so that I can be reassured that my comments have been received

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>of RBC proposals. - c) Local Services - electric and water especially - are already evidencing problems in coping with the increasing demand which has been caused by developments of the last decade in the Whitworth district. Subjectively, there are reports of reductions in water pressure and residents installing pressure compensating devices and reducing the size/bore of shower-heads because of the deterioration in water pressure. Similarly, there have been a number of recent occasions where leaks have led to interruptions to water supplies. It would appear that electricity supplies are similarly finely balanced with at least three major interruptions to supply in the last year or so. This information should be available to RBC from the various utility companies, and it would be prudent for the Council to investigate the position regarding gas supply, and sewage capacity also. - d) RBC proposals seem to envisage housing development only. - i) There is no evidence of any development of employment opportunity, nor commercial premises in the proposal. The absence of commercial development would mean that all employment would arise outside the district. It is reasonable to conclude that this would further exacerbate transport pressure on the single road. Further, the jobs density data indicates that for every two people aged 16-64 there is one job available in Rossendale. It would be irresponsible of RBC to sanction housing development where little or no provision has been made to increase employment opportunities. - ii) The Council has already recognised that Primary school provision in the Whitworth area will not sustain further development. If the Council is proposing to increase school provision in the area, this could not be met by a further school: there will be no land remaining if the Council's development proposals are approved. - iii) RBC has a responsibility to build balanced communities: communities where an area is not blighted by over-development and where the provision of additional housing is not the sole consideration. There is nothing in the Council's proposals which suggest that the Council has given even cursory consideration to the wider needs of the community. Where are the social/health, recreational and community provisions that equate to a reasonable quality of life for residents? Are the Council really pretending that there will be a continuing void, and that demand and expectations for such service provision will not rise exponentially in the next 15 years? - e) RBC has failed to identify a need in this district for further development. There is nothing in the Council's documentation which identifies a need for further development in this district. There is no identified need based on unsuitable housing stock - the 3.8% is the lowest in rossendale except for prosperous area of helmshore/edenfield. There is no action needed on grounds of affordability of housing: affordability test results – Proportion of Existing Households Unable to Afford LQ Market Housing - Whitworth second lowest after Bacup. - No doubt others will raise issues relating to the suitability of specific areas but I shall confine my observations to just one - how can the Council consider</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						further development beneath a reservoir that is the subject of 48-hour inspection regime because of fears about its stability: if you would not build a Primary School on such a site then the question of housing should be a non-starter also. Put allotments there, or leave it as a walking and recreation area. I shall leave to others to make representations about any proposals for the unwelcome development of green belt when the Council has failed to justify that any development is appropriate for the Whitworth area. - - Ann & David Rhodes - 9th October, 2017 -		
1515	Nikita	Hanson	-		Object	Whitworth is already at its stretch with educational needs, school's and medical services at a push. The traffic is on a constant rise and I feel more houses would only make the above matters even more demanding and unmanageable. -		No
1537	John	McGuinness	-		Not Applicable	Due to the impact on biodiversity and loss of greenbelt land there do not seem to be any plans for further Local Nature Reserves which would help to mitigate the impact on wildlife, flora and fauna. - - Will there be increased tree planting to replace tr		You seem to be trying to implement a plan where nearly all patches of green within the urban boundary are built on. The hillsides may be green (for now) but all small breathing spaces seem to be a target for building on. Sustainable; how can building more houses on any green area be sustainable? Once land is lost to development, it's lost forever.

The Government is committed to protecting and enhancing the quality of the natural and historic environment, in both rural and urban areas. Planning policies should seek to protect and enhance the quality, character and amenity value of the countryside and urban areas as a whole. A high level of protection should be given to most valued townscapes and landscapes, wildlife habitats and natural resources. Those with national and international designations should receive the highest level of protection. 18. The condition of our surroundings has a direct impact on the quality of life and the conservation and improvement of the natural and built environment brings social and economic benefit for local communities. Planning should seek to maintain and improve the local environment and help to mitigate the effects of declining environmental quality through positive policies on issues such as design, conservation and the provision of public space. 19. Plan policies and planning decisions should be based on: –up-to-date information on the environmental characteristics of the area; – the</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
								potential impacts, positive as well as negative, on the environment of development proposals (whether direct, indirect, cumulative, long-term or short-term); and, – recognition of the limits of the environment to accept further development without irreversible damage. Planning authorities should seek to enhance the environment as part of development proposals. Significant adverse impacts on the environment should be avoided and alternative options which might reduce or eliminate those impacts pursued. Where adverse impacts are unavoidable, planning authorities and developers should consider possible mitigation measures. Where adequate mitigation measures are not possible, compensatory measures may be appropriate. In line with the UK sustainable development strategy, environmental costs should fall on those who impose them – the “polluter pays” principle.
1539	Gary	Wright	None		Object	Road infrastructure cannot take the amount of traffic in or out of Bacup already one road works on Bacup rd (which must be the most dug up rd in the country) causes traffic chaos at peak periods and it's getting worse Do not allow any more housing developments in the area for this reason alone		-
1550	Shelley	Carter			Object	The on-road parking along Burnley Road (A671) in Weir Village causes a bottleneck and results in congestion at peak times, so any increase in traffic would only add to this problem. The rural location of Weir Village and the lack of a regular bus service means that residents are reliant on their own private vehicles to travel to the following services: shops, doctor, dentist, nursery school, high school, theatre, cinema, railway station. It is also several miles from both the M66 and M65, which are the nearest motorways. As such, I believe that any further housing development in Weir Village is not sustainable and any future Planning Applications should be refused on the above points.

						<p>sites is therefore less likely to have a significant impact on the SRN. Notwithstanding this, the potential cumulative impact of this number of sites remains an important consideration and hence it is crucial that all housing sites are appropriately assessed as part of the highways evidence base which is required in order to underpin the Local Plan.</p> <p>As a general point, which applies to all allocated sites, no information is provided in relation to access arrangements. Due to the topography of the Rossendale Valley, in many places there are limited existing access points or opportunities, which creates pressure for new accesses onto the A56(T). It is known that some existing employment sites are served by outdated and substandard 'left-in / left-out' access arrangements and any material increase in traffic using these as a primary access to new site allocations would be of concern.</p> <p>For reference on the above point, Policy Circular 02/2013 sets out a presumption against new accesses and junctions being created on high-speed routes such as the A56(T), except at the plan-making stage where it can be demonstrated that it would facilitate 'strategic, planned growth'. It is Highways England's view that the scale and of these proposed allocated sites would not meet the criteria of being 'strategic' in the context of the Policy Circular / Highways England Licence. It is recommended that careful consideration is given to the access arrangements for all sites and that Highways England is kept informed of this.</p>		
1662	Teresa	Barber		Whitworth	Object	<p>I wish to forward my objection to the proposed building of new houses in Whitworth The area is still a village, whilst it's over stretched with schools GP services and the one road in and out , it would be unsustainable to say the least to add new builds</p>

1764			Taylor Wimpey UK Ltd		Not Applicable	<p>Policy HS2: Housing Site Allocations</p> <p>2.31 Taylor Wimpey wholly support the allocation of the Land south of Grane Road, Haslingden (HS2.78) for residential development, and we discuss this site, and its delivery assumptions in more detail in Section 3 of these representations.</p> <p>2.32 We would also reiterate our comments on policy SD2 in that we support the Council's acceptance that Green Belt release is necessary, but that the Plan needs to clearly articulate the exceptional circumstances that support the amendment of their Green Belt boundaries.</p> <p>2.33 Looking at the allocations themselves, there are 109 in total, with an expected capacity of 3,622 dwellings based on a standard density 30 dph; which falls short of meeting the proposed housing requirement of 4,000 dwellings in full.</p> <p>2.34 The supporting text does state that sites with extant consent and those nearing completion have not been included with reference to the Council's 5-Year Housing Land Supply Report (2017-2022). This document suggests an existing deliverable supply of 985; however it should be noted that this covers the period 2017-2022, whilst the plan covers the period 2019-2034, and when you consider the 5 year trajectory only 174 of the 985 dwellings are to be delivered from 2019 onwards, with the numbers set out below (2019 onwards in brackets):</p> <ul style="list-style-type: none"> • Dwellings under construction: 436 (48) • Dwellings with planning permission: 261 (54) • Dwellings with resolution to grant permission: 256 (40) • Small sites allowance: 32 (32) • Deliverable Capacity: 985 (174) <p>2.35 This generates an overall capacity of 3,796 and suggest that Council's proposed allocations and existing supply will not meet its basic housing requirement to 2034, and this shortfall would be even greater if the housing requirement is increased as we advocate above.</p> <p>2.36 We would ask that the Council provide clarification on this matter, particularly the relationship between the allocation figure in the consultation document and the 5 year supply figures, given the differing time periods; as this is not explained within the Draft Plan.</p> <p>2.37 If our calculations are correct, then clearly the Council will need to allocate additional sites to meet its basic requirements, which we consider should be increased anyway.</p> <p>2.38 Furthermore, the NPPF is categoric that housing requirement is a minimum figure which Local Plans should seek to surpass, and this interpretation has been endorsed in numerous Local Plan examinations. Exceeding the basic requirement also generates a buffer in the supply and provides flexibility within the plan to take account of under-delivery and</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>additional choice in the market.</p> <p>2.39 A buffer of sites will therefore provide greater opportunities for the plan to deliver its housing requirement. Such an approach is recommended within the LPEG report to Government (dated March 2016), with recommendation 40 (at Appendix A) noting that Local Plans should: ‘focus on ensuring a more effective supply of developable land for the medium to long term (over the whole plan period), plus make provision for, and provide a mechanism for the release of, developable Reserve Sites equivalent to 20% of their housing requirement, as far as is consistent with the policies set out in the NPPF. Reserve Sites represent land that can be brought forward to respond to changes in circumstances.’</p> <p>2.40 As such the Council should consider allocating additional sites over and above its housing requirement. Based on the Council’s current requirement a 20% uplift would require allocations for up to 4,800 dwellings, and based on our findings above this would require land for approximately 1,000 additional dwellings to be identified.</p> <p>5 Year Supply</p> <p>2.41 Moving on to the Council’s 5-Year Housing Land Supply Report (2017-2022) we note that this confirms that Rossendale are currently unable to demonstrate a 5 year supply, and claim between 2.4 and 2.6 years depending which scenario is used.</p> <p>2.42 This is a clear indication that there are a lack of deliverable housing sites in the borough and that the Council could be vulnerable to speculative development proposals through S78 appeals until they get a robust plan in place.</p> <p>2.43 Whilst we welcome the Council’s acknowledgement of this issue and the detailed trajectories included in this document we do raise the following issues with the methodology:</p> <ul style="list-style-type: none"> • The Council add the 20% buffer before adding the shortfall; however the approach adopted by Pegasus Group is to apply the NPPF buffer to the requirement and backlog combined, and this has been endorsed in several appeals, including the Droitwich Spa decision (Refs: APP/H1840/A/13/2199085 & APP/H1840/A/13/2199426). • The Council have not applied any discounts to their claimed supply to allow for underdelivery; yet a 10% lapse rate is generally advocated by S78 Inspectors (see Droitwich Spa decisions above), and would be appropriate here given Rossendale’s physical constraints and historic under delivery. <p>2.44 If the above adjustments are made in the methodology this gives a 5 year supply figure of between 2.11 and 2.33 years:</p> <p>Figure 2.1 – Rossendale’s 5 Year Housing Land Supply</p> <p>2.45 Finally, we note that if the Government’s draft/proposed standard housing needs methodology were applied in Rossendale, it would still only result in a 2.49 year supply (or 2.76 years with no lapse</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>rate deductions). In short there are acute supply issues in the area that should be addressed at the earliest opportunity.</p> <p>Policy HS4: Affordable Housing</p> <p>2.46 Taylor Wimpey fully support the need to deliver affordable housing, and agree that policies of this nature should be set within a Local Plan or other statutory planning policy. Taylor Wimpey also recognise their obligations as a responsible housebuilder to assist in meeting such needs.</p> <p>2.47 As noted above the SHMA confirms that there is acute affordable need in Rossendale, ranging from 158-321 dpa, which equates to between 60% and 121% of the Council's chosen housing requirement. Meeting this need in full is unlikely to be realistic as this must balance against the impacts that the policy requirement has upon the viability of development. As such, we welcome the Council's flexible approach in HS4 part a, in applying a 30% requirement for market housing schemes 'subject to site and development considerations (such as financial viability)'.</p> <p>2.48 We also welcome the requirement in part c that the tenure, size and type of affordable provision be based on the 'latest available information on housing needs' rather than any prescriptive requirement. This allows the plan to be more flexible and individual schemes to respond to more localised needs at the time they are being considered. That said, we reserve the right to make further comments on future local needs assessments.</p> <p>2.49 In respect of part d, we note that some schemes may lend themselves, or specific Registered Providers may prefer, to locate the affordable housing in a specific part of the site for practical purposes (i.e. maintenance) or for other site-specific reasons (proximity to public transport routes etc.), and therefore we would ask that some flexibility is built in, such as adding the wording "should be evenly distributed throughout the development, where practical".</p> <p>2.50 Finally, we welcome the acceptance that both on and off-site provision of equivalent value will be considered.</p>

1766			Peel Holdings (Land and Property) Ltd		Not Applicable	<p>5. Approach to Land Allocations</p> <p>5.1 This chapter comments on the DLP's approach to the proposed release of land from the Green Belt and the allocation of development sites to meet the needs of the Borough. The chapter concludes that additional land is needed to meet the borough's development needs and that further allocations should be identified through the DLP.</p> <p>Exceptional Circumstances for Green Belt Release</p> <p>5.2 The DLP states that: "Green Belt releases have been avoided wherever possible in line with the Government's White Paper which maintains strong protections for Green Belt, however it is recognised that some releases will be required to meet the housing requirements." (page 12)</p> <p>5.3 In respect of housing, it is evident that there is a significant 'gap' between the development needs of the Borough and the delivery which can be achieved from the extant housing land supply. The DLP does not itself identify the size of the 'gap'. However, based on the evidence presented in the DLP, it appears to be approximately 1,518 dwellings based on:</p> <ul style="list-style-type: none"> • A need to deliver 4,425 dwellings over the over the period up to 2034 comprised of: <ul style="list-style-type: none"> – A housing requirement of 4,000 dwellings between 2019 and 2034; and – The need to address under-provision of 425 dwellings since the adoption of the extant Core Strategy³⁶. • A potential land supply of 2,907 dwellings from non-Green Belt sources of land (including 997 dwellings from "brownfield"/"mixed" land and 1,910 dwellings from land outwith the Green Belt, including development on land designated as green infrastructure). <p>5.4 It is noted that RBC has considered the implications of a lower level of housing growth. For example, the SHMA published alongside the DLP considers the implications of delivery 183 dwellings per annum (dpa)³⁸ – a level of growth which would be broadly consistent with what can be achieved from non-Green Belt sources of land (193 dpa). However, this level of growth would fall significantly short of the identified OAN for the Borough. As noted in the preceding chapter, it would result in significant risk that the identified needs for housing and employment would not be met.</p> <p>5.5 Peel does not consider that this level of growth is a sustainable or "sound" growth option mindful of the tests at paragraph 182 of the NPPF. Whilst it may enable the Borough to meet its baseline demographic needs, it would mean that the Borough would face a future of gradual economic decline and a housing market which is increasingly inaccessible, particularly to younger and lower/middle income families. It would also result in new housing delivery being focussed in inner-urban areas which are not in high demand; it would provide very little land for new high quality family homes in strong market</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>areas.</p> <p>5.6 Peel considers that such an approach would be contrary to the clearly stated aims of the NPPF that “Planning should operate to encourage and not act as an impediment to sustainable growth...” (paragraph 19); it would therefore be unsound. As such, it is evident that there is an urgent need to identify new sources of development land if Rossendale is to be capable of meeting its housing needs and address economic growth requirements.</p> <p>5.7 The Green Belt is not an environmental designation. It is a strategic planning tool which was introduced to manage the growth of urban areas. It is wholly appropriate to revisit Green Belt boundaries when development requirements justify this. This is acknowledged in the recent Housing White Paper, which states that Green Belt land can be released where all other reasonable options for meeting their identified development requirements have been fully examined.</p> <p>5.8 Peel therefore strongly agrees with RBC that there are clear “...exceptional circumstances...” to undertake targeted Green Belt releases in order to make land available for development to meet the Borough’s needs. Indeed, the release of such land is critical if the Borough is to grow sustainably and deliver its ambitions for growth. Peel notes that the DLP does not explicitly state that exceptional circumstances exist; this should be rectified in the next draft of the Local Plan.</p> <p>The Scale of the Land Allocations Required</p> <p>5.9 The extent of Green Belt release proposed in the DLP is unclear. However, based upon a high level review of the evidence presented in the DLP, RBC appears to:</p> <ul style="list-style-type: none"> • Have identified a “gap” between the housing requirement and the housing land supply from non-Green Belt sources of land of 1,518 dwellings. • Propose the release of land from the Green Belt in the DLP to deliver 715 dwellings, which when added to the potential supply from non-Green Belt sources of land equates to a total potential supply of 3,622 dwellings. <p>5.10 Peel considers both that a) the scale of the “gap” is significantly larger than that identified by RBC and b) the extent of Green Belt releases required address that “gap” has been underestimated. This is discussed in the following paragraphs.</p> <p>5.11 It is noted at the outset that the land proposed to be released from the Green Belt falls far short of the “gap”. The 715 dwellings from proposed Green Belt releases are equivalent to less than half (47.1%) of the 1,518 dwelling “gap”; there is a shortfall of 803 dwellings. It is therefore immediately evident that the extent of Green Belt releases proposed by the DLP need to be more than doubled if the emerging Local Plan is to be found sound, before the matters discussed below are taken into account. We highlight that this requirement for additional Green Belt releases is based on the 265dpa requirement proposed by RBC; as such, it is clear that additional releases will</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>be required even if the proposed housing requirement is reduced.</p> <p>The Extant Land Supply Deliverability and Developability</p> <p>5.12 RBC's SHLAA41 does not quantify the scale of the potential housing land supply across the Borough. However, as noted above, the DLP appears to identify the potential to deliver 2,907 dwellings from non-Green Belt sources of land. Peel considers that it is likely to have been overestimated.</p> <p>5.13 For example, the SHLAA identifies two sites north and south of Hollin Lane in Rawtenstall (references SHLAA16184 and SHLAA16392 respectively) which are considered to be developable in years 6 to 10. These two sites have a cumulative dwelling yield of 51 dwellings. It is noted, however, that both are accessible only via Hollin Lane, which is a narrow single-carriageway farm track. As the SHLAA notes, this track would need to be substantially upgraded to facilitate the residential development of both sites. However, the track is enclosed on both sides by existing residential properties so cannot be upgraded to a suitable highway access – including pedestrian footways – without the use of third party land. As such, the current evidence does not demonstrate that the residential development of this land is achievable. This is particularly the case given that the land south of Hollin Lane has previously been included within RBC's 5-year housing land supply with no meaningful progress regarding its delivery, presumably due to the nature of its constraints.</p> <p>5.14 It is therefore considered that the amount of housing delivery which can be secured from the extant land supply is overestimated by the SHLAA. It is considered that sites which are the subject of significant constraints – should be removed discounted from the supply until there is clear and robust evidence that those constraints can be overcome in order to justify their continued allocation, such as the submission of Development Frameworks by the landowner or promoter.</p> <p>Small sites</p> <p>5.15 66 (48.2%) of the 137 sites which are proposed for allocation in the DLP are small-sites which are under 0.5ha in size, whilst a further 26 sites (19%) are just 0.5-1ha in size. This means that 92 – over two-thirds (67.2%) – of the proposed allocations are 1ha or less in size. These sites have a combined yield of 1,236 dwellings, equating to over one-third (34.1%) of the total supply identified in the DLP.</p> <p>5.16 Peel acknowledges that the Housing White Paper³⁹ encourages greater use of small sites in emerging Local Plans in order to ensure that there are sufficient opportunities for custom and SME builders. It recommends that 10% of sites allocated for development should be on sites of <0.5ha. It is clear that the DLP – which proposes that 48.2% of allocations are such sites – goes far beyond the requirements of the White Paper. It must be recognised that the resources of such developers and their capacity to deliver a high rate of completions is limited. This is particularly the case in Rossendale where</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>developments must be of sufficient size such that they have the critical mass required in order to be viable.</p> <p>5.17 Peel supports the ambition to create opportunities for smaller and custom builders. However, it is clear that the housing land supply identified in the DLP is over-reliant upon small sites of less than 10 dwellings. There is therefore a significant risk that this supply will not be delivered in the timeframe envisaged by the DLP.</p> <p>Providing flexibility through “reserve sites”</p> <p>5.18 It is unrealistic to expect that every identified site – either brownfield or greenfield – will be delivered or will provide the number of new homes from it within the plan period. Recent DCLG analysis⁴² has indicated that between 10-20% of planning permissions are not implemented, whilst a further 15-20% are subject to a revised application process which delays delivery. As a result, it is reasonable to assume that upwards of 15% of the total supply anticipated within the plan period will not come forward by 2034. It is therefore essential to allow the flexibility of additional provision.</p> <p>5.19 Numerous Local Plans have acknowledged that not all allocated sites will come forward in a plan period and have therefore included flexibility allowances or reserve sites. For example:</p> <ul style="list-style-type: none"> • The Cheshire East Local Plan provides an additional 7% housing land to provide for an element of non-delivery; • The West Lancashire Local Plan includes ‘Plan B’ sites, which was concluded to be “...a constructive response to the uncertainty inherent in planning for housing provision...”⁴³ which would maintain the level of supply whilst allowing for peaks and troughs in the trend of provision; and • The draft St Helens Local Plan⁴⁴ has identified land for Green Belt release and safeguarding, and includes a mechanism in Policy LPA05 ‘Meeting St. Helens’ Housing Need’ to undertake a review of those sites for release should there be under-delivery during the course of the plan period. It reduces the capacity of the identified SHLAA supply by 10% to reflect non-delivery and adds a 20% buffer for “...choice, flexibility and to compensate for lead in times...”. <p>5.20 Moreover, this is also an approach currently being taken by the Secretary of State (SoS). For example, in determining a recovered appeal for a mixed-use development proposal including 235 dwellings in July 2017⁴⁵, the SoS considered the housing land supply position of the relevant authority and noted that:</p> <p>“...planning permissions exist for 4,465 dwellings on sites of fewer than 10 dwellings. The Secretary of State has deducted 10% from this to allow for non delivery...” (paragraph 22)</p> <p>And that:</p> <p>“Applying average lead in and delivery rates, the Secretary of State has gone on to deduct 1,458 units from the supply of planning permissions on sites of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>10 or more dwellings, to reflect the fact that some sites may not deliver, or may not deliver within the five year period. The Secretary of State considers that this is likely to reflect the overall rate of non-delivery.” (paragraph 23)</p> <p>5.21 RBC has made no such allowances and there is therefore a very high degree of risk that the land supply identified in the DLP will not be delivered. The Local Plans Expert Group⁴⁶ (LPEG) identified this as a particular problem in maintaining the supply of homes which are required to meet needs: “...because Plans tend only to allocate the minimum amount of land they consider necessary, once adopted, there is little that Local Plans can do to address any shortages that appear in the five year supply...” (paragraph 11.2)</p> <p>5.22 This is a particular issue where, as in Rossendale, Green Belt boundaries are (and as proposed will be) tightly drawn around the urban area. The LPEG report therefore set out a clear recommendation that Local Plans should make provision for, and provide a mechanism for the release of, developable ‘reserve sites’ equivalent to 20% of their housing requirement. The inclusion of a similar approach in the emerging Local Plan for the Borough would be a positive way of reducing the delivery risk which is currently inherent within it and will ensure that it meets the soundness test of being “effective”, i.e. deliverable over its plan period.</p> <p>Safeguarded land</p> <p>5.23 In accordance with national policy the emerging Local Plan must identify areas of safeguarded land “...in order to meet longer-term development needs stretching well beyond the plan period...”⁴⁷. This is necessary to “...take account of longer-term requirements...”⁴⁷ and to provide confidence that Green Belt boundaries will not need to be altered at the end of the development plan period. The DLP makes no such provision; rather, given that the extent of Green Belt release is insufficient even to meet the requirements during the current plan period up to 2034, it is clear that a further review will be required to take account of longer-term requirements. This is particularly the case given that the DLP is predicated upon the delivery of all non-Green Belt sources of land within the plan period. As such, the DLP is inconsistent with national policy.</p> <p>Conclusion on the scale of land allocations and Green Belt release</p> <p>5.24 The DLP makes insufficient land available to meet the Borough’s housing needs. As highlighted above, it is immediately evident that the allocations proposed in the DLP fall short of the proposed housing need by 803 dwellings. However, additional releases will also be needed to take account of the following matters:</p> <ul style="list-style-type: none"> • The need to extend the plan period such that the emerging Local Plan is capable of covering a 15-year timeframe, as required by the NPPF (see chapter 4). <p>⁴⁶ Report to the Communities Secretary and to the Minister of Housing and Planning, Local Plans Expert Group (March 2016)</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>47 NPPF paragraph 85</p> <p>24</p> <ul style="list-style-type: none"> • The need to revise the potential capacity which can be realistically achieved from non-Green Belt sources of supply, given: <ul style="list-style-type: none"> – the concerns regarding the deliverability and developability of some sites within it which has resulted in the supply being overestimated; and – The over-reliance which is placed on delivery from small sites (<0.5ha). • The need to identify at least “reserve sites” equivalent to 15-20% of the Borough’s development needs, to reflect the risk of non-delivery of sites in the supply. • The need to identify safeguarded land to take account of longer-term development requirements beyond the plan period. <p>5.25 It is necessary to identify additional development allocations – and therefore to identify additional Green Belt releases – in order for the emerging Local Plan to be found sound. Peel recommends that the DLP allocate additional sites to meet this requirement.</p> <p>6. Proposed Development Opportunities</p> <p>6.1 As set out in the introduction to this document, Peel has continuously and historically engaged with the plan-making process for Rossendale. This has included the submission of detailed representations to the previous Core Strategy and the draft Lives and Landscapes DPD (since withdrawn), including Development Frameworks that set out the development potential at four sites:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden (allocated in part) • Land at Haslam Farm, Rawtenstall (allocated in part) • Land at Blackburn Road, Edenfield (allocated) • Land at Burnley Road, Edenfield (not allocated) <p>6.2 Peel welcomes the progress which has been made on the emerging Local Plan and supports, in principle, the proposals for development within it. In particular, Peel strongly supports the allocation of land at Kirkhill Avenue in Haslingden, Haslam Farm in Rawtenstall, and Blackburn Road in Edenfield, which include some or all of three of the sites previously put forward (as above).</p> <p>6.3 It is noted, however, that additional work is required to ensure that the emerging Local Plan is capable of meeting the full development needs of the Borough. Additional land will need to be allocated for residential development, above that which has been identified in the DLP.</p> <p>6.4 This opportunity is being taken to make representations in relation to the sites previously identified by Peel as capable of accommodating development in the Borough that have not been put forward in the DLP for allocation and/or Green Belt release. Peel is preparing updated Development Frameworks which will promote and justify its landholdings within Rossendale. Matters addressed below and in the preceding chapter which directly affect its</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>landholdings will be discussion in detail in each Development Framework.</p> <p>Additional Site Allocations</p> <p>6.5 In the context of the need for the Rossendale DLP to allocate additional land for development, Peel wish to reiterate the development opportunities at each of the four sites previously identified, as well as proposing a further potential site at Rossendale Golf Club.</p> <p>6.6 These sites can each provide a deliverable housing development site in sustainable locations adjoining existing settlements. Initial reviews of site constraints and opportunities, landscape and highways have indicated that there are no significant barriers to development. Further site appraisals are being undertaken to inform updated Development Frameworks which will be provided to the Council in due course.</p> <p>6.7 The updated Development Frameworks will:</p> <ul style="list-style-type: none"> • Provide analysis of the site constraints and opportunities. • Where relevant provide details of the findings of further technical assessment (such as highways, flood risk, ground conditions). • Consider the key principles for development of the site. • Present a proposed site layout plan illustrating development parcels, access, landscaping, etc. • Comment on the economic benefits of development. • Address comments / observations made within the recently published evidence base for the emerging Local Plan. <p>Proposed Development Opportunities</p> <p>6.8 In advance of the full Development Frameworks, initial reviews of the development opportunities are submitted alongside this representation for each of the individual sites. Each Site Opportunity Representation includes:</p> <ul style="list-style-type: none"> • A description of the site and its location • Details of the consideration of the site in the Strategic Housing Land Assessment (SHLAA)⁵⁴ • A review of the planning policy context including the Draft Local Plan • A Green Belt appraisal, commenting on the findings of the Green Belt Review <p>6.9 Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan and the merits of the sites promoted here for residential development, these include:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden • Land at Haslam Farm, Rawtenstall • and at Blackburn Road, Edenfield • Land at Burnley Road, Edenfield • Land at Rossendale Golf Course, Helmshore

						<p>or adjacent to Newchurch Road. Should all these eventually come to fruition there will be a considerable increase in traffic in both directions along Newchurch Road. This will be most apparent at the west end at the junction with Burnley Road (A682) and at the east end for those leaving Turnpike at the awkward junction with the B6283. The access and exit from Union Street, in Rawtenstall, already problematic, will inexorably become more difficult as Union Street is the only access to properties on Union Street, Green Street, Rose Bank, Hurst Lane, Hurst Crescent And Waingate Village. We have written to RBC (& LCC) on this matter several times over the years our representations seem to fall on deaf ears. They just don't seem to care but the situation will become intolerable if all these sites are made available for housing.</p> <p>E. Council object to lack of a policy for council owned land to retain its original purpose, kept for future generation's needs, and if proposed for housing, it should be offered on tender to RSL's. And given the often poor quality of unbuilt on land, there should be at least some trial holes to check its nature, stability and wetness before any changes of use are proposed.</p> <p>F. RCT in conclusion do not see HS2 meeting national needs: Fixing Our Broken Housing Market, Department for Communities and Local Government (February 2017). Its section on housing density that does not quite fit with 30/Ha.</p>		
1789	Jackie	Copley	CPRE		Object	<p>Policy HS2: Housing Site Allocations</p> <p>17. We have shown above that because the housing requirement will be lower, as much as 26.5 hectares of land in countryside, specifically protected by Green Belt can be saved. The exceptional circumstance has been removed for Green Belt allocation and this will be strongly argued at examination. Housing land should be allocated on the basis of sustainability ranking. The least sustainable sites should be excluded from the local plan.</p>

1812	Philip	Carter	Environment Agency		Object	<p>Thank you for consulting us on the draft Local Plan for Rossendale. I apologise for the delay it has taken to submit our response to the consultation. We have reviewed the draft plan is so far as it relates to our remit and we would offer the following comments:-</p> <p>Policy HS2</p> <p>Issue: Several of the proposed residential allocations are subject to constraints that may impact on compliance with the National Planning Policy Framework (NPPF), delivery and yield.</p> <p>Impact: Proposed allocations for residential development may be non-complaint with NPPF and National Planning Practice Guidance (NPPG) requirements.</p> <p>Suggested solution: Demonstrate that relevant environmental constraints have been taken into account when allocating residential sites.</p> <p>Commentary:</p> <p>Table 1 at Appendix 1 identifies where proposed residential allocations are adjacent to or partly within a Flood Zone (2 or 3), within 8 metres of a designated Main River watercourse or located on top of a historic landfill site (so may have contamination issues).</p> <p>1. Flood Zones: In relation to sites within a Flood Zone as defined on the EA Flood Map for Planning, it will be for the Council to demonstrate that any site allocated for development in a Flood Zone satisfies the requirements of the Sequential Test and, where necessary, the Exception test. We have identified all those sites where flood risk may be an issue (including sites that border an area considered to be at risk). We understand that you have completed your Strategic Flood Risk Assessment (SFRA) and that this may provide sufficient evidence for these sites to come forward. Evidence to demonstrate that the Sequential Test and Exception Test have been satisfied for allocations in Flood Zones should be clearly cross-referenced in the Local Plan. Where site specific mitigation measures are necessary to make a development safe in planning terms, these should be specified at an appropriate point in the local plan, possibly as part of Policy ENV11. This may be in the form of excluding parts of the site from inappropriate development or identifying site specific measures that would be necessary to make residential development safe in that Flood Zone.</p> <p>2. Main Rivers: Development within 8 metres of the top of the bank or edge of the retaining wall of a designated Main River watercourse (or culverted watercourse) will require consent from the Environment Agency. Development that restricts access to a Main River watercourse and / or presents a risk of harm to the aquatic environment may not be acceptable. It is essential to ensure that any sites with Main River watercourses in an open channel or a culvert within the development site or within 8 metres of the site boundary take this into account. Where small sites require an easement on</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS02	Further comment
						<p>either side of a Main River watercourse that may be within the site, this could impact on the density of development that could be achieved. Development over culverted Main River watercourses will not be permitted.</p> <p>3. Historic Landfill sites: Proposals for development of historic landfill sites will need to be supported by sufficient information to demonstrate that the site is suitable for the proposed use without posing a risk to controlled waters. We have no evidence to suggest that these sites cannot be re-developed, but there may be a need for some remediation of contaminated sites.</p> <p>It is also noted that several of the proposed allocations on historic landfill sites are identified as Greenfield sites. Given the previous use, these may be more appropriately designated as Brownfield.</p> <p>Please see table in appendix.</p>

Reference	HS03	Edenfield						
731	Emily	Hrycan	Historic England		Not Applicable	<p>Policy HS3 Edenfield</p> <p>Whilst there is no objection to the inclusion of a design code for new development in Edenfield, any site allocations in this area (and any other areas in Rossendale) will be expected to demonstrate that they have undertaken an appropriate assessment of the impact they may have on the historic environment (more detail on this is contained in the section below on site allocations). This policy appears to reference that the setting on the Edenfield Parish Church (Grade II*) is to be affected, yet there appears to be no evidence to support this in the accompanying reports and mitigation measures within the policy and this need to be amended.</p>		
843	PAUL	DODD	RESIDENT		Object	<p>This part of the Draft Plan lacks any real details. It makes no mention of the fact that Edenfield over the past 20 years has lost many local amenities and necessary infrastructure: for example, a doctor's surgery, Post Office, various shops. There are very limited places in the local Primary schools and the secondary school. The local quarry has seen an increase in the numbers and scale of local traffic, leading to pollution in and around the main roads in Edenfield. Whilst the draft plan recognises the special needs of Edenfield, I believe the proposed large - scale increase in the house building programme in this small area will have a detrimental impact on the environment and living standards of all the residents. The short time scales for the building programmes will ensure that no amount of planning can fully accommodate the massive changes to this area.</p>		No

1506	Catherine	Blyfield	-		Object	Increased Flood Risk. - The recent Boxing day floods in 2016 and previous flooding was initially caused by run off and secondly by the river bursting its banks. If trees and vegetation above the river are replaced with concrete and tarmac then there will be no ground to soak up the rain water and so the flooding problem will become increasingly frequent and worse when it does happen. This not only impacts in the local area but properties further down the river. There is no point in building new homes if they make the existing properties inhabitable. - - Destruction of green sites. - There are plenty of disused mills, factories and brown sites in the area that could be developed for homes, many of which have been purchased and are currently eyesores. There is no point in destroying the countryside just so that the property developers have an easier time and can make more money.		-

1573	M	Hoyle			Object	<p>3. Policy H53 - Edenfield</p> <p>The proposal would have a major impact on the infrastructure of the area. There is a lack of any evidence in the Infrastructure Plan document to show how other authorities or service providers would support the introduction of 408 new dwellings in Edenfield. National Planning Policy Framework (NPPF) and National Planning Policy Guidance (NPPG) states the Local Plan should give a clear indication of what is required in terms of infrastructure, who is going to fund it and provide it in the first 5 years of the plan. The document at present does not address any of these issues. It does, however state it is a 'living document', which will be updated, but from a residents view it does not provide sufficient evidence or information on infrastructure plans, or give details on when further updates will be available.</p> <p>The Council is going to make decision on Local Plan, which contains insufficient evidence to support the officers and consultant's recommendations. This is unacceptable, as the Local Plan has a massive impact on the residents of the borough for many years, all the information must be available to all interested parties before the Local Plan can be approved.</p> <p>Transport</p> <p>The addition of 408 dwelling would result in over 1000 extra cars (Figures from East Transport Strategy) using the roads in Edenfield. Rossendale Council is unable to provide accurate figure and give details of the impact this would have on the area, as no strategic transport surveyor report has been made. The council has commissioned one but no date for publication has been given. The East Lancashire Transport Strategy (EL TS) does state that there is major congestion problems on the A56 around Edenfield and has come up with vision of junction 0 .To date the Highways agency has no plans to investigate the proposal in this or the next development plan. The ELTS has investigated improvements in public transport but no provision has been made to increase this due to government funding cuts. There is no public transport provision in Edenfield after 7pm and the X43 bus route to Manchester no longer runs through the village resulting in resident having to rely heavily on cars. The road network in Edenfield and the surrounding area could not cope with the large volume of traffic generated by large developments. Rossendale Council has failed to provide evidence required under NPPF and NPPG on the transport and traffic implications.</p> <p>Education</p> <p>The building of new dwellings in the Edenfield area would have a massive impact on the local education provision. Edenfield and Stubbins primary schools are currently over subscribed and at full capacity. If the permission is given to develop 408 houses in Edenfield it will have a major impact on the availability of places within the Edenfield / Stubbins area both at primary and</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS03	Further comment
						<p>secondary level. Rossendale Borough Council or Lancashire County Council has not addressed how it will provide education places. Although RBC states planning obligations will be sought for education places this is only a one off payment and does not cover future years. RBC could place a planning levy on new developments to fund further school places or building a new school but this would be limited to a one off payment and any further expenses would not be maintained by local LEA under government regulations, therefore it would not address the need for extra places within the area. Schools in neighbouring area (within 2 mile radius) are also working at full capacity; the borough currently has very little capacity at both primary and secondary level. This would result in lack of school places for all children living in the community and have an adverse impact on the community.</p> <p>Utilities – Electric / Water Water Although United Utilities have not commented on the proposed housing development in Edenfield in detail, they have raised concerns about impact the new developments will have in Rossendale. In Edenfield concerns have been raised about the sewage issues, wastewater and surface water flooding. Rossendale Council or partners have failed to provide evidence required under NPPF and NPPG on how this will be addressed.</p> <p>Electric United Utilities have clearly stated that in Rossendale a number of substations are currently working at full capacity and Edenfield will require a major enhancement before any housing development is undertaken. Again Rossendale Council or partners has failed to provide evidence required under NPPF and NPPG on how this will be addressed.</p> <p>Health The Infrastructure plan indicates GP practices in Rawtenstall (which serves Edenfield) will be full within first 5 years of the Local Plan. The Local Plan comments that GP services in Ramsbottom serve the residents of Edenfield. However, these services are currently not open to new patients from the Edenfield area. Again Rossendale Council or partners has failed to provide evidence required under NPPF and NPPG on how this will be addressed. The proposals made in the draft Local Plan have not been supported by significant evidence. Rossendale Council has failed to follow guidance from the NPPF and NPPG, which clearly states the Local Plan should provide a clear initial five year plan stating is required in terms of infrastructure requirements, who is going to fund it and provide it. Therefore Policy HS3 - Edenfield should be withdrawn from draft Local Plan until all the correct supporting evidence has been obtained and considered. I hope the Council and Councillor's will consider my objections to Local Plan</p>

1592	Warren	Hilton	Highways England		Not Applicable	<p>HS3: EDENFIELD</p> <p>An allocated residential site comprising 26 ha (gross) has been identified as potential for providing residential development. The Local Plan states that any scheme will need to be well designed so that it delivers a sufficient level of accessibility to the site and that there is connectivity to public transport. It is further stated that any development proposals will be subjected to a Scoping Study, Transport Assessment and Travel Plan.</p> <p>Key Points</p> <p>The Edenfield site is located in close proximity to the A56(T) and M66 and as a result of this, and the size of the site, it has the potential to have a significant traffic impact on the SRN. The inclusion of the site in the assessments undertaken as part of the highways evidence base which is required to underpin the Local Plan will allow for a better understanding of the impact of the site. The need for the site to be accessible via a range of travel modes, supported by a Travel Plan as part of a planning application, will be important in reducing the overall traffic impact on the SRN.</p> <p>The site lies above the level of the A56, resulting in an embankment between this land and the carriageways. At one location (Woodcliff Cutting), the embankment is unstable due to a gradual landslip that has been moving for a number of years. Whilst this is being monitored regularly, we would advise that this is factored-in to any allocation of this wider site and its subsequent promotion through the emerging Plan as there is a danger that the land-loading pressure of development on top of the embankment could further affect its stability. We would ask that a geotechnical assessment be carried out in this location to advise the Council as to how this issue should be managed.</p>

1764			Taylor Wimpey UK Ltd		Not Applicable	<p>Response to the Requirements of Policy HS3: Edenfield</p> <p>3.7 Policy HS3 is a policy supporting the HS2.71 allocation at Edenfield, which covers 26 hectares of land across four individual sites, being promoted by four separate parties. The Taylor Wimpey site covers the largest site area, at the centre of the allocation. Policy HS3 states that new residential development will be permitted in this area subject to specific criteria and we address these in turn below.</p> <p>a) Comprehensive development of the entire site is demonstrated through a masterplan</p> <p>3.8 Policy HS3 outlines how the Council expect to see comprehensive development of the full allocation through a masterplan.</p> <p>3.9 Taylor Wimpey are committed to this process and have engaged with the other key landowners, as demonstrated in the Memorandum of Understanding and an initial Constraints and Opportunities Plan, which are attached at Appendix 2 and 3 accordingly.</p> <p>3.10 As part of this it was agreed that the next step should involve the interested parties meeting with the Council to discuss the consultation responses and feedback received at the public meetings, before working up a more formal draft masterplan.</p> <p>b) The implementation of development in accordance with an agreed Design Code</p> <p>3.11 We are in agreement with the general Design Code principles listed here, but reserve the right to make further, more detailed comments as these criteria are refined and as the masterplanning process progresses.</p> <p>3.12 We would also reiterate our earlier comments that Design Codes and other additional policy documents can add an additional layer of complexity and lead to delays in the delivery. In this instance, we agree that some form of design framework is necessary given the size of the site, albeit it is possible this could be secured through a detailed masterplan and could be controlled through a policy in the Local Plan rather than necessitating a separate document to be prepared and adopted by the Local Authority post adoption of the Local Plan.</p> <p>c) A phasing and infrastructure delivery schedule for the area</p> <p>3.13 We do not take issue with the infrastructure requirements and phasing considerations listed here; and confirm that these will be agreed and refined with the Council and adjoining landowners as the process progresses. However, we would ask that the Council clarify what format this schedule is intended to take and how it will be monitored and implemented, as again, if it has to go through any formal approval process it could add complexity and cause delays.</p> <p>3.14 Finally, any infrastructure requirements must be shown to be necessary and proportionate, and must take account of viability matters.</p>

1766			Peel Holdings (Land and Property) Ltd		Support	<p>Policy HS3: Edenfield</p> <p>3.17 As above, the DLP identifies a 26ha (64 acre) parcel of land to the north and west of Edenfield for release from Green Belt and allocation for housing development. Policy HS3: Edenfield sets out the requirements for the development of this site which includes a comprehensive masterplan being developed for the entire site, implementation in accordance with an agreed Design Code, an agreed phasing and infrastructure delivery schedule, and a programme of implementation – all to be progressed as part of the evolving Local Plan process.</p> <p>3.18 This Draft Land Allocation comprises a number of separate land ownerships. The major landowners collectively support the draft HS3 allocation and have put forward their individual sites (parcels of said allocation) for consideration as part of the preparation of the Draft Local Plan.</p> <p>3.19 In compliance with the draft policy, the landowners are committed to working together to enable the entire HS3 allocation to be delivered. An initial meeting has been held and it is agreed that a joined up approach to development of a masterplan will be taken, in partnership with Rossendale Borough Council and other relevant stakeholders, including the local community in and around Edenfield.</p> <p>3.20 A Constraints and Opportunities Plan for the entire allocation has been prepared jointly on behalf of the major landowners and is included at Appendix 1.</p> <p>3.21 As infrastructure requirements are defined and specified for the allocation as a whole, the landowners with the Council and other relevant Stakeholders will work together to ensure that necessary requirements are incorporated into the masterplan and the phasing and delivery programme. Likewise, where technical assessments are needed, a joined up allocation wide approach will be sought. In particular, the following matters will be collectively addressed, so far as possible:</p> <ul style="list-style-type: none"> • Appropriate buffers adjacent to the A56 will be included to ensure that new homes are protected from unacceptable levels of noise • Key views across the site to the Rossendale Valley will be protected and maintained, where appropriate. • Design and layout will consider the setting of Edenfield Parish Church, Market Street/ Horse and Jockey, and the amenity of existing housing. • A movement framework will identify key access points and circulation within the site for vehicles, cycles and pedestrians. • Key principles will be developed for contextual design, architectural styles and materials. • Ecological and nature conservation, flood risk and drainage considerations will be investigated further and mitigation identified. • Requirements for open space and play areas will be identified together with 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS03	Further comment
						<p>a strategy for delivery.</p> <ul style="list-style-type: none"> • Transport implications of the cumulative development. <p>3.22 Individual representations have been produced and submitted to illustrate the suitability and deliverability of each specific parcel of land within the wider allocation as well as echoing support for the wider DLP allocation. This statement however, should be taken as reassurance that going forward the major landowners are committed to working together to deliver this strategically important development in Edenfield, in accordance with the aspirations of Policy HS:3 and will seek to engage with the Council and other relevant Stakeholders.</p>		
1771	Mohammed Ali	Ahmed	Lancashire County Council		Not Applicable	<p>Site Allocations</p> <p>Policy HS3 Edenfield identifies the 4 allocated housing sites as per Policy HS2 Housing Allocations, (sites HS2.71) as a large housing site which will require a masterplan to be prepared. The overall site is expected to provide 451 housing units. The masterplan is to be prepared to a design code and is to be accompanied by an Infrastructure Delivery Schedule and other assessments including a transport assessment and travel plan.</p> <p>The Edenfield housing sites will cover a 15ha area of existing greenfield, within the ward of Eden. Policy HS3 identifies the overall Edenfield site gross area as 26ha. Given that this is significant strategic housing site area for Rossendale, which is expected to have a strategic impact on the local area, it has the potential to have positive and negative health impacts, to the immediate locality and also to neighbouring wards. The design code principles listed in the policy do not include reference to cycling and walking provision, air quality or road safety considerations, although we would expect that these aspects would be considered in a transport assessment and travel plan for the site. Given the size of the overall site area, no reference is given either to the provision of any of the site for specialist housing accommodation.</p> <p>Revise Policy HS3: Edenfield, to require a Health Impact Assessment to be prepared as part of the policy criteria. In addition the design code principles should be reviewed to require the incorporation of good quality and accessible cycling and walking provision within the development and a requirement for electric vehicle charging points. Design and layout considerations should also consider road safety, particularly for the most vulnerable people (i.e. children, elderly and the disabled). Consideration should also be given to the inclusion for a percentage requirement for the provision of specialised housing if a need is identified, with the site correspondingly allocated in Policy HS17: Specialised Housing.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS03	Further comment
1777	Adam	Brennan	United Utilities		Not Applicable	Policy HS3 - Edenfield United Utilities are pleased to see that the policy encourages development proposals to achieve high standards of sustainable design and construction through (amongst other things) incorporating drainage masterplanning and seeking to reduce water consumption and minimise surface water run-off. United Utilities encourages masterplanning on this large allocation. As the site is greenfield, there may need to be infrastructure improvements to accommodate such development. United Utilities would require early consultation with regard to the masterplanning documents produced in relation to this site.

1781			Rossendale Civic Trust		Support	<p>Policy HS3: Edenfield</p> <p>Within the area defined on the Policies Map at Edenfield (Housing Allocation HS2.71) new residential development will be permitted subject to the following:</p> <p>a) Comprehensive development of the entire site is demonstrated through a masterplan;</p> <p>b) The implementation of development in accordance with an agreed Design Code. The Design Code shall include the design principles for the whole of the site and will incorporate, amongst other elements:</p> <ul style="list-style-type: none"> a. Specific character areas incorporating detailing design requirements b. A highway hierarchy and design considerations c. A greenspace and landscape structure d. A movement framework e. Layout considerations f. Parking and garaging g. Appropriate building and hard surfacing materials h. Maximising energy efficiency in design i. Details of appropriate boundary treatments j. Lighting k. Details of the laying of services, drainage and cables l. Bin storage and rubbish collection m. Ecology and nature conservation n. Design and layout considerations in respect of the setting of the Grade II* Listed Edenfield Parish Church o. Design and Layout considerations in respect of the existing housing within the allocation p. The relationship with the adjacent retained recreation ground q. The relationship to Market Street, in particular the Horse and Jockey r. Noise mitigation in respect of the adjacent A56 <p>c) A phasing and infrastructure delivery schedule for the area. The schedule shall include, amongst other elements:</p> <ul style="list-style-type: none"> a. Foul drainage b. On site Affordable Housing c. Surface water drainage strategy including details of Sustainable Urban Drainage d. Nature conservation and enhancement works e. Provision and layout of public open space (including the provision of a Neighbourhood Equipped Area of Plan NEAP) f. Provision of footpath and cycle links g. Tree works and tree protection measures d) An agreed programme of implementation in accordance with the masterplan 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS03	Further comment
						<p>A. RCT support HS3 and note its: area comprising 26 ha (gross site area) has been identified as potential for providing residential development, subject to national policy in the Framework and other relevant policies of this Local Plan e.g. policy on affordable housing. - will require a well designed scheme that responds to the sites context, makes the most of environmental, heritage and leisure assets and delivers the necessary sustainability, transport, connectivity, accessibility (including public transport) and infrastructure requirements –</p> <p>B. RCT advise that to make sense, to justify the ambition of a Masterplan, we should have a representative community involvement to look at the overall area of Edenfield – not just what’s in ownership of a potential developer. To look at the potential ways that it could become an example of how to do well an expanded village in the Green Belt. Including, a maybe unwelcome to some, development along a Local Distributor or Spine Road from the areas of Horncliffe Mansions on Burnley Road, past the Cricket Ground, link to Plunge Road, a Dearden Clough Lake, and on to Rochdale Road. Look for example at how another part of the A56 helped to create the valued areas around Lymm Dam in north Cheshire.</p>		
1789	Jackie	Copley	CPRE		Object	<p>Policy HS3: Edenfield</p> <p>18. The allocation could be deleted from the local plan as, set out above, it is no longer necessary. The site is very open in character and allows views of the surrounding hills and moors.</p> <p>19. If the Council concludes this site is needed, even when considering the reduced housing requirement, CPRE agrees (without prejudice) that it should be well designed and subject to a Masterplan.</p>		
1794			The Methodist Church		Support	<p>Policy HS3: Edenfield</p> <p>2.18 The Methodist Church are fully supportive of this policy and the requirements as they relate to Housing Allocation HS2.71, within which Land at Exchange Street sits. A Joint Statement has been produced by the landowners that make up this allocation, namely The Methodist Church, Taylor Wimpey and Peel Holdings, which confirms their commitment to work together and ensure that a combined approach is taken in respect of this wider allocation. This Statement, along with an initial Opportunities and Constraints Plan, is provided at Appendix C to this representation and should be read as our response to this policy.</p>		
1812	Philip	Carter	Environment Agency		Support	<p>We support the requirement for a phasing and infrastructure delivery schedule. From a strategic perspective, the management of surface and foul water should ideally be designed for the site as a whole rather than individual development plots. The cumulative impacts of multiple foul and surface water discharges from different sites will be more effectively managed when considered as a whole.</p>

Reference		HS04		Affordable Housing				
6	Christopher	McManus	Park Royal Development s (NW) Ltd		Object	- This same argument would be made for Policy HS4 b) "On any rural exception sites including those in the Green Belt there will be a requirement of 100% on-site affordable housing." It has been recognised that larger more desirable houses are wanted but no Private Developer is going to want to build them if they are all affordable as there is little margin in them for Small/Medium size Developers. This could be considered preferential treatment for Developers of affordable housing schemes, who incidentally already have an advantage on the open market as they can borrow funds for construction as less than half the market rate from Local and National Governments. - - Finally I would point out that the 30% figure was arrived at in the RBC's Affordable Housing Economic Viability Assessment in 2010. The data used in this report was compiled in 2008 and 2009 a period in which housing, land and build costs were much cheaper following the economic downturn in 2007. A more up to date assessment should be carried out in regards to affordable housing as it is unlikely that 30% will be considered workable by most Developers.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS04	Further comment
677	Phil	Ramsden	Lindon Park Development s Ltd		Not Applicable	<p>"Policy HS4: Affordable Housing - - This policy requires that new housing developments of 10 or more dwellings (0.35 hectares or part thereof) will be required to provide on-site affordable housing as follows: a) requirement of 30% on-site affordable housing from market housing schemes, subject to site and development considerations (such as financial viability); b) on any rural exception sites including those in the Green Belt there will be a requirement of 100% on-site affordable housing; c) affordable housing shall be provided in line with identified needs of tenure, size and type as set out in the latest available information on housing needs; d) within larger housing developments, the affordable housing will be evenly distributed throughout the development. Where a site has been divided and brought forward in phases, the Council will consider the site as a whole for the purposes of calculating the appropriate level of affordable housing provision. - - The policy goes on to confirm that where robustly justified, off-site provision or financial contributions of a broadly equivalent value instead of on-site provision, will be acceptable where the site or location is unsustainable for affordable housing. - - The Representor does not oppose this policy, indeed its origins lie in national planning policy guidance and as such the Council is correct to include a policy of this nature, however the Representor it is of the view that the policy should be more specific about viability related issues which provision of affordable housing inevitably raise. By this we mean that the policy should make it clearer that while the provision of affordable is a key policy aspiration, the Council recognises that delivery of the full policy target can render many developments unviable, a key issue in Rossendale given the nature of the local topography which raises a considerable number of site related issues which can be costly to address when sites are being promoted for development. The policy should categorically confirm at the outset that this is recognised and is a key consideration. - - In addition, the Representor is also of the view that in some instances better and more effective affordable provision can be provided if monies are collected, pooled and provision provided off site. Indeed, such an approach lends itself to smaller sites and sites that might be better promoted as mixed-use developments, where, for example, there might be scope for residential above retail units. - - Based on the above, the policy could be redrafted to say as follows: - - Policy HS4: Affordable Housing - - ""New housing developments through the listed allocations forming part of Policy HS2 will be expected to provide an element of affordable housing unless it can be unequivocally demonstrated that the target provision would render the overall development unviable. In this scenario, the Council will either accept that no affordable units need be provided or will seek a lesser provision in line with the viability of the scheme or alternatively will collect contributions towards provision off site. - - Relevant sites that will be required to provide affordable units are new</p>

1766			Peel Holdings (Land and Property) Ltd		Not Applicable	<p>housing developments of 10 or more dwellings (0.35 hectares or part thereof). They will be required to provide on-site affordable housing as follows: - - a)As per current wording of the policy)" - "</p> <p>Meeting the Need for Affordable Housing</p> <p>4.42 As highlighted earlier, there is a sizeable need for affordable housing in Rossendale, which will require a significant short-term uplift in delivery to even clear the backlog of households with unmet needs on the Housing Register. The DLP recognises the importance of tackling this issue 'to prevent the problem becoming more acute', proposing the delivery of affordable housing as part of market housing-led developments.</p> <p>4.43 The DLP acknowledges the need to 'balance the delivery of affordable housing against viability of delivery'. In spatially distributing development in the Borough, allocations in stronger, higher value market areas will be important in securing both the quality of housing sought through policy and the viable delivery of affordable housing, in response to the evidence of substantial need. A standalone representation on development viability is included at Appendix 1.</p> <p>New Housing Requirements</p> <p>7.2 Policy HS4 sets out requirements for provision of affordable housing within new developments at 30% where more than 10 units are proposed, subject to site and development considerations (such as financial viability) and at 100% on rural exception sites. The evidence base supporting the Local Plan includes an economic viability study of the Site Allocations and DM DPD55 which concludes that this may be achievable in some higher value areas within the Borough, particularly for greenfield sites and where higher densities are appropriate, but will not be viable in other areas with a number of sites assessed only capable of achieving 10% affordable.</p> <p>7.3 It is considered that this is not sufficient evidence upon which to apply a blanket 30% requirement for sites over 10 units, and is overly onerous on developers in terms of the detailed justification that would be needed where this is not viable. Our client requests that the policy should refer to a requirement determined on a site by site basis.</p>

1771	Mohammed	Ali Ahmed	Lancashire County Council		Not Applicable	Affordable Housing The provision of affordable housing is plays an important role in enabling people, including those on lower incomes, to access a range of housing tenures and localities. Policy HS4: Affordable Housing, requires new housing developments of 10 or more dwellings (or 0.35 hectares or part thereof) to provide on-site affordable housing in line with stated criteria. There is a requirement for 30% on-site affordable housing to be provided on market housing schemes and 100% on-site affordable housing provision on rural exception sites. In the policy explanation reference is made to the Council's SHMA which recommends that at least 158 affordable dwellings to be provided in the district per year, and potentially 321 affordable dwellings per year. Policy HS2: Housing Site Allocations calculates a potential housing unit yield of 3622 for the local plan period, even if 30% of this total yield was provided as on-site affordable housing that would result in an affordable housing provision of 1086, which is 1,284 less that the 15 year local plan period amount of 2,370, if the minimum recommended amount of 158units were provided per year. Given that not all of the allocated sites are over 10 units and other housing sites may be subject to constraints, it appears that the SHMA recommended level may not be achievable. Review Policy HS4: Affordable Housing, to consider how the SHMA recommended annual amount of on-site affordable housing provision can be realistically achieved during the local plan period and whether a higher level of provision should be required on larger housing site allocations.

1781			Rossendale Civic Trust		Support	<p>Policy HS4: Affordable Housing</p> <p>New housing developments of 10 or more dwellings (0.35 hectares or part thereof) will be required to provide on-site affordable housing as follows:</p> <p>a) A requirement of 30% on-site affordable housing from market housing schemes subject to site and development considerations (such as financial viability).</p> <p>b) On any rural exception sites including those in the Green Belt there will be a requirement of 100% on-site affordable housing.</p> <p>c) The affordable housing shall be provided in line with identified needs of tenure, size and type as set out in the latest available information on housing needs.</p> <p>d) Within larger housing developments, the affordable housing will be evenly distributed throughout the development. Where a site has been divided and brought forward in phases, the Council will consider the site as a whole for the purposes of calculating the appropriate level of affordable housing provision. Where robustly justified, off-site provision or financial contributions of a broadly equivalent value instead of on-site provision will be acceptable where the site or location is unsustainable for affordable housing.</p> <p>The size of the development should not be artificially reduced to decrease or eliminate the affordable housing requirement, for example, by sub-dividing sites or reducing the density of all or part of a site. The Council will consider the site as a whole for the purposes of calculating the appropriate level of affordable housing provision.</p> <p>A. RCT supports HS4 subject to inclusion of a policy to identify sites for affordable and social housing to be purchased by the Council for use by RSLs for shared ownership and general let housing in order to meet: The Council's SHMA has demonstrated that there is considerable need for affordable housing in Rossendale and it states that the issue must be tackled to prevent the problem from becoming more acute. The study recommends that there is a need for at least 158 affordable dwellings to be provided in Rossendale per year in addition to market housing and potentially that there is a need for up to 321 affordable dwellings per year.</p> <p>B. RCT notes loss on sites, such as Whinberry View from claims of unforeseen site problems.</p> <p>C. RCT note that in 1977 Rossendale had c7230 LA dwellings, 29.3% of c24680 total housing stock. In 2009 RSLs had 3503 self contained units and 1022 supported bedspaces to total 4525, or 14.8% of 30544 total housing stock. In 2016 Rossendale had 80 La owned buildings, RSL's 4680 (14.8%), private sector 26950, Total 31710. From 2011 to 2016, gain 860 houses, of which 184 or 20% are social, but NOTE Together Housing Group had 66 sales from Right to Buy and Right to Acquire. Was 150 from 2006-2011.</p>

Reference HS05 Housing Density

677	Phil	Ramsden	Lindon Park Developments Ltd		Not Applicable	<p>Policy HS5: Housing Density - - This deals with the proposed density of new housing development and requires it to be in keeping with local areas and to ensure that it does not have a detrimental impact on the amenity, character, appearance, distinctiveness and environmental quality of an area. - - Although the Representor does not object to the policy as such, indeed it recognises what the policy is trying to achieve, it does raise the issue as to whether the policy is too prescriptive given it applies throughout the Borough as opposed to just areas where landscape quality might be high and/or there are heritage related designations. In addition, there might be possible issues regarding whether the policy clashes with Policy HS2 which allocates sites for development as this includes a target number of units (based on density calculations) and Policy HS4 on provision of affordable housing. This is influenced by viability considerations, which in turn are heavily influenced by the layout, design and density of proposed schemes. - - Accordingly, the Representor is of the view that it would be more appropriate for the policy to be pitched more generally and to deal mainly with design, for example: - - Policy HS5: Design of Housing Developments - - "The Council will require the design of new development, which also covers layout and related matters including density considerations, to be of a high quality and appropriate to the site and its location so as to ensure that the proposed development is appropriate to its surroundings and does not have a detrimental impact on existing amenity." -</p>

1619	Michael	Onley	Planning Sense NW		Object	<p>The geographical challenge of 4000+ new-build houses in a tightly constrained post-industrial landscape has obliged Rossendale BC to abandon its target of 65% of new housing on previously developed land [Rossendale Core Strategy policy 2, RBC 2011] and to adopt an unsustainable target of 20% of all new dwellings on previously developed land [Rossendale Draft Local Plan policy HS1, RBC 2017]</p> <p>Clients fear cherry-picking of the most desirable sites. This is reflected in the abandonment of density target of 50+ dwellings per hectare appropriate to urban renewal [Rossendale Core Strategy policy 2, RBC 2011] in favour of a suburban 30+ figure [Rossendale Draft Local Plan policy HS5, RBC 2017].</p> <p>Clients oppose planning blight upon precious greenfield sites such as achingly lovely meadows east of Johnny Barn (variously identified as HS2.53 and duplicated as HS2.54), and cinematic quality, rail-side pasture at Haslam Farm (HS2.60). Access and road safety concerns have been raised in respect of allocation HS2.86 (St Peter's School) - photos attached.</p> <p>(...) •Draft policy HS5 in respect of low residential density target(...)</p>		
1764			Taylor Wimpey UK Ltd		Support	<p>Policy HS5: Housing Density</p> <p>2.51 We agree with Policy HS5 as drafted, as it allows for sufficient flexibility and variation in density, based on the characteristics of the individual site; rather than a blanket prescriptive requirement.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS05	Further comment
1781			Rossendale Civic Trust		Object	<p>Policy HS5: Housing Density</p> <p>The density of the development should be in keeping with local areas and have no detrimental impact on the amenity, character, appearance, distinctiveness and environmental quality of an area.</p> <p>A. RCT object to HS5 and it's Explanation: The Government's Housing White Paper 'Fixing our broken housing market' (2017) encourages better use of land for housing by encouraging higher densities where appropriate, such as in urban locations where there is high housing demand.</p> <p>Densities in excess of 30 dwellings per hectare will be expected to be delivered in sustainable locations within Rossendale. Sustainable locations include urban areas and areas around public transport nodes. The figure of 30 dwellings per hectare is reflective of historic housing densities in some parts of Rossendale. It is recognised that housing densities will be lower in other areas of the Borough because of physical constraints, for example, topography, areas at risk of flooding and landscape.</p> <p>B. RCT note present 2011 Core Strategy was adopted after: "Report to Rossendale Borough Council by Roland Punshon BSc Hons, MRTPI an Inspector appointed by the Secretary of State for Communities and Local Government 10 October 2011"</p> <p>Appendix D: Monitoring and Implementation Strategy:-</p> <p>70% of all new residential development in Rawtenstall, Bacup, Haslingden and Whitworth to be built at 50 dwellings per hectare. 85% of all new residential development in all other areas to be built at 30 dwellings per hectare.</p> <p>C. RCT have noted in a July 2014 RBC Annual Monitoring Report:-</p> <p>Progress towards Targets</p> <p>In 2013/2014 only 3.5% of dwellings built in Rawtenstall, Bacup, Haslingden and Whitworth were built at 50 dwellings per hectare. Although the cumulative three year figure is slightly higher at 9.8%, this figure also falls well below the target and trigger.</p> <p>The results are significantly underperforming against the target despite the Council working with partners and developers to encourage higher density housing developments. It may be necessary to review this policy or investigate why high densities are not being achieved, and consider how this can be resolved.</p> <p>For areas outside Rawtenstall, Bacup, Haslingden and Whitworth, the density of new residential development being built at 30 dwellings per ha or above was 92.5% in 2013/2014 which is above the target. Over the cumulative three years the figure stands at 67% which is marginally below the trigger</p> <p>The results are significantly underperforming against the target despite the Council working with partners and developers to encourage higher density housing developments</p> <p>D. RCT suggest this example, to maybe illustrate how choices made by RBC</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS05	Further comment
						<p>lead to their not achieving their Core Strategy Policy 2 targets. Look at the 2015 Local Plan's withdrawn consultation: Tier 1 site H16 Whinberry View, detailed in Site Allocations as 29 houses on 0.6Ha at 48/Ha. But on this area it was actually 23 houses at 38/Ha. The developer purchased 166 Bacup Road to get 29 houses on 0.72Ha and so 40/Ha. Now the northern part of this site is in an area of sloping Greenlands, and there's now permission, for 28 – 39/Ha, to cut into this with sheet piling and retaining walls close to a densely tree planted boundary with Rossendale BC's H13 Greenlands. RCT's representations suggested the exclusion of the site's Greenland and a simple 3 row layout of 31 terraced houses on 0.6Ha at 52/HA.</p> <p>E. RCT do not see this proposal, to come down from 50 to 30/Ha, meeting the aims of this White Paper, where it talks about:-</p> <p>A.67 Local planning authorities decide what sort of density is appropriate for their areas. A locally led approach is important to ensure that development reflects the character and opportunities presented by each area. At the same time, authorities and applicants need to be ambitious about what sites can offer, especially in areas where demand is high and land is scarce, and where there are opportunities to make effective use of brownfield land given the strong economic and environmental benefits.</p> <p>A.68 To help ensure that effective use is made of land, and building on its previous consultations,¹⁰⁵ the Government proposes to amend the National Planning Policy Framework to make it clear that plans and individual development proposals should:</p> <p>make efficient use of land and avoid building homes at low densities where there is a shortage of land for meeting identified housing needs</p> <p>ensure that the density and form of development reflect the character, accessibility and infrastructure capacity of an area, and the nature of local housing needs (which may, for example, mean terraced houses.</p> <p>F. RCT therefore suggest this alternative to HS5:-</p> <p>Residential development should seek to achieve the maximum density compatible with good design, the protection of heritage assets, local amenity, the character and quality of the local environment, and the safety and convenience of the local and strategic road network.</p> <p>70% of all new residential development in Rawtenstall, Bacup, Haslingden and Whitworth to be built at 50 dwellings per hectare. 85% of all new residential development in all other areas to be built at 30 dwellings per hectare.</p> <p>Housing type densities:-</p> <ol style="list-style-type: none"> 1. Low cost Market Housing: 3 bed / 4 person and 3 bed / 5 person mostly in linked pairs and short terraces at about 40 - 60 / Ha. 2. So called "Aspirational" Market Housing: 4 bed / 6 person and 5 bed / 7 person detached at about 20 – 40 / Ha. 3. Apartment Housing both Social and Market: at 100 – 200 / Ha. 4. Social "General Let" Housing: 3 bed / 4 person, 3 bed / 5 person and 4 bed

Reference HS06 Housing Standards

677	Phil	Ramsden	Lindon Park Development s Ltd		Not Applicable	For the same reasons as given in relation to Policy HS4 covered earlier, the Representor does not oppose the principles this policy introduces, rather it suggests that such matters need to be considered in the round, including in the context of impacts on viability, and that such matters will be taken into account should a development not be able to deliver the full requirements of the policy, as per the current draft of it.		
-----	------	---------	-------------------------------	--	----------------	--	--	--

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS06	Further comment
1764			Taylor Wimpey UK Ltd		Object	<p>Policy HS6: Housing Standards</p> <p>2.52 Policy HS6 indicates that the Council intend to introduce accessibility standards (at least 30% of housing to be wheelchair adaptable) and national internal space standards and we comment on these in turn.</p> <p>a) Access- meeting the needs of elderly or disabled residents</p> <p>2.53 Whilst Taylor Wimpey are committed as a responsible house builder to deliver accessible forms of housing if required, this must be based on a demonstrable need, and therefore we would request that evidence and clarification is provided on this matter.</p> <p>2.54 Part A requires at least 30% of any new housing development to meet the needs of elderly or disabled residents, or be easily adaptable; subject to site-specific factors and viability.</p> <p>2.55 Whilst we welcome the flexibility provided within this policy, and would highlight that site specific factors such as topography are a major issue in Rossendale, we do raise concerns with the 30% starting point.</p> <p>2.56 The explanatory text to this policy indicates that the SHMA highlights a considerable growth in the number of elderly households, as well as a high percentage of households containing one or more adults with some form of disability.</p> <p>2.57 This reflects the aging population trend which can be seen nation-wide. Paragraph 10.74 of the SHMA also confirms that 18.5% of households in Rossendale contain one or more adults with some form of disability. However, whilst the SHMA provides a starting point in establishing demographic trends, it does not provide enough evidence to translate this into a policy threshold for housing to be adapted to these specific groups and certainly not one set at 30%.</p> <p>2.58 Firstly, neither the SHMA nor wider evidence base confirms the proportion of these groups who will require dedicated, and wheelchair adaptable new housing, as many may wish to stay put and adapt their own homes. Furthermore, whilst the Viability Assessment states that it has factored these requirements in, these are insufficiently evidenced and justified in the report, which gives no detailed breakdown of the costs involved.</p> <p>2.59 It is worth reiterating Section 56 of the NPPG, which confirms that the introduction of new enhanced standards on water efficiency, accessibility and spaces are optional, and must be justified by specific evidence on need and viability before they can be implemented. The evidence in this instance falls well short of demonstrating the need or viability of a 30% target.</p> <p>b) Internal Space- National space standards</p> <p>2.60 As with the elderly housing requirement, we have concerns with the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS06	Further comment
						<p>application of the National Space Standards on the basis that the need and viability for this has not been sufficiently demonstrated within the evidence to meet the requirements of the NPPG (paragraph 56-020-20150327). The SHMA does not consider housing size in this context, and whilst the Viability Assessment states that it has factored these standards in, the implications are not properly articulated.</p> <p>2.61 In respect of the space standards, the NPPG also requires that transitional arrangements are considered following adoption to enable developers to factor the associated costs into future land acquisitions, and there has been no discussion of this in the Draft Plan or evidence.</p> <p>2.62 As such we would request that this requirement is removed or that additional evidence and clarification is provided.</p>		
1766			Peel Holdings (Land and Property) Ltd		Object	<p>7.4 Policy HS6 requires at least 30% of any new housing development to be tailored to meet the needs of elderly or disabled residents, or be easily adaptable. The explanatory text refers to the SHMA showing 'a high percentage of households containing one or more adults with some form of disability (15.8%)', this is again not sufficiently evidenced. Whilst the policy states that this standard will be applied flexibly where necessary, considering site conditions, the expected percentage is unduly high. New development should not be required to meet the shortcomings of existing housing stock. Opportunities for improving and adapting existing stock should contribute to meeting the demand in the Borough. Our client requests that this policy is revised accordingly.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS06	Further comment
1771	Mohammed	Ali Ahmed	Lancashire County Council		Not Applicable	<p>Policy HS6: Housing Standards, addresses the national regime of optional technical standards for housing which are to be adopted for new housing developments. Policy HS6 requires for Access, that at least 30% of new housing provided on sites should be specifically tailored to meet the needs of elderly and disabled residents, or be easily adaptable, unless evidence is provided on specific factors that could affect a developer's ability to provide this provision. In terms of Internal space the nationally described spaces standards should be the minimum provision.</p> <p>The inclusion of Policy HS6 in the local plan is welcomed. Some clarification is required as to how the 30% adaptable housing requirement, will exceed the minimum requirements as set out in the access requirements of Building Regulations M4 (2) Category 2 Acceptable and adaptable dwellings. The policy could be enhanced further by requiring the design of new housing development to conform to the Design Council's Building for Life 12 industry standard.</p> <p>Revise Policy HS6: Housing Standards, to clarify that 30% of new housing will be required to be adaptable with access requirements exceeding those of the Building Regulation M4 (2) Category 2. The policy should also require that all new developments to take account of Building for Life 12 industry code.</p>

Reference		HS08		Open Space Requirements in New Housing Developments				

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS08	Further comment
1036	L	Bower	c/o agent		Object	The policy states: - "An update to the existing accompanying Supplementary Planning Document will establish the following: - i. The minimum local standards and how they will be applied. - ii. Accessibility and qualitative assessments, to determine the amount of new open space provision required as part of a residential development or - iii. Appropriate financial contributions required from new residential developments." - Such wording would give the SPD the status of a policy which must be complied with to meet the development plan. However an SPD can only provide supplementary guidance, and will not be subject to independent scrutiny at examination in the same way that the development plan is. We therefore consider that the sentence should be deleted from the policy. An additional sentence could be inserted within the supporting text to clarify that regard should be had to the SPD / Open Space Strategy. - We note that a number of other policies within the plan require compliance with an SPD, and our comments would apply equally to those policies.		-
1764			Taylor Wimpey UK Ltd		Not Applicable	Policy HS8: Open Space Requirements in New Housing Developments 2.63 This Policy confirms that the existing SPD on Open Space will be updated to discuss minimum local standards and appropriate financial contributions. We therefore reserve the right to comment on these local standards and financial contributions as and when the SPD is updated and consulted on.		
1766			Peel Holdings (Land and Property) Ltd		Not Applicable	Open Space, Gardens and Playing Pitches 7.8 Public open space and private garden requirements for new housing developments are set out in policies HS8 and HS10 respectively. 7.9 HS8 sets out a requirement for provision of open space and recreation facilities, where there are identified local deficiencies in quantity accessibility and quality / value. The policy states that an updated SPD will set out minimum local standards, accessibility and qualitative assessments and appropriate financial contributions. Peel reserves the right to comment further when the SPD is under review. It is considered that the SPD update should take place as soon as possible to give clarity to development. A degree of flexibility is needed where standards are set in order to reflect site context, local provision and overall viability measures. Precise open space requirements should be capable of being agreed on a site by site basis.

1771	Mohammed	Ali Ahmed	Lancashire County Council		Not Applicable	<p>Open Space Provision</p> <p>The provision of, and access to, greenspace for recreational, fitness and mental wellbeing plays an important role in enabling people to be physically active and sociable.</p> <p>Policy HS8: Playing Pitch Requirements in New Housing Developments, requires that housing sites of 10 or more new units (0.35 hectares or part thereof) will be required to pay a financial contribution towards improvements to existing playing pitches in the Borough. This is in line with the Council's Playing Pitch Strategy (2016) which identifies a number of deficiencies in provision in Rossendale against Sport England's requirements. Policy HS8 is only focused on the provision of playing pitches and does not represent a general requirement for public open space provision. No reference is given to housing sites of 10 or more units being required to provide public open space in accordance with Fields in Trust standards, whereby 2.4hectares of public open space per 1,000 population is recommended to be provided.</p> <p>Recommendations:</p> <p>Clarification should be given on whether Policy HS8: Playing Pitch Requirement in New Housing Developments is intended to only meet the requirements of the Council's Playing Pitch Strategy. If it is also the mechanism for delivering the recommended public open space provision as per the Fields in Trust standard, the policy needs to be amended to reflect this. If not it is important that the provision of public open space by new housing developments is also addressed through local plan policy. All forms of public open space including amenity open space and children's play areas also need to be provided (or existing facilities enhanced) as appropriate provided either on or off site (depending on site thresholds), to enable all residents to have access to greenspace to aid health and wellbeing.</p>		
1777	Adam	Brennan	United Utilities		Not Applicable	<p>Policy HS8: Open Space Requirements in New Housing Developments</p> <p>In support of the proposed policy, United Utilities would recommend the inclusion of the following paragraph as part of the proposed policy:</p> <p>“Where the proposal is identified at risk of flooding and / or will result in an increase in surface water run-off, a developer may be required to accommodate an element of open space for the discharge of surface water through the incorporation of sustainable drainage systems (SuDS). The preference will be for no surface water to discharge to the public sewer, directly or indirectly, if more sustainable alternatives are available and can be achieved.”</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS08	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy HS8: Open Space Requirements in New Housing Developments</p> <p>Housing developments of 10 or more new dwellings (0.35 hectares or part thereof) will be required to make provision for open space and recreation facilities, where there are identified local deficiencies in the quantity, accessibility or quality and/or value of open space and recreation facilities. Where there is an identified local deficiency in quantity and/or accessibility to open space, provision will be required. This should be on-site for housing schemes of 100 or more dwellings. For smaller schemes or where this is not appropriate, payment of a financial contribution towards off-site provision or improvements to existing open spaces and recreation facilities will be required. Where there is existing provision but an identified local deficiency in the quality and/or value of these open spaces and recreation facilities, a financial contribution towards improving these sites will be required.</p> <p>The size of development should not be artificially reduced to decrease or eliminate the open space requirement, for example, by sub-dividing sites or reducing the density of all or part of a site. The Council will consider the site as a whole for the purposes of calculating the appropriate level of open space provision.</p> <p>An update to the existing accompanying Supplementary Planning Document will establish the following:</p> <ul style="list-style-type: none"> i. The minimum local standards and how they will be applied. ii. Accessibility and qualitative assessments, to determine the amount of new open space provision required as part of a residential development or iii. Appropriate financial contributions required from new residential developments. <p>RCT support HS8 subject to inclusion of a reference to Sport England guidance, which no doubt will be in the SPD. RCT also note need to ensure that open spaces, which can include unadopted parking and their access areas, need to have accountable and insured management, and in passing note that this is often why they have been planned out of areas. RCT note the Street Manager provisions for frontagers to such areas in the 1991 New Roads and Streetworks Act.</p>

1614	Helen	Ledger	Sports England		Not Applicable	<p>2. Policy HS9 – beware contributions from new development cannot resolve deficits that already exist and can only contribute to the impact on future population growth. It is interesting you wish to defer to a future SPD on contributions, will this be one specifically on open space & sport, or dealing with developer contributions?</p> <p>Sport England do not support a standards approach, any demand for pitches will change over time and from place to place. Standards can be an over simplification of the likely actual newly arising need for pitches. You can instead use the playing pitch calculator to quantify contributions from major sites over a threshold and/or develop CIL to capture contributions for larger schemes.</p>		
1764			Taylor Wimpey UK Ltd		Not Applicable	<p>Policy HS9: Playing Pitch Requirements in New Housing Developments</p> <p>2.64 Again, it is stated that an accompanying SPD will be produced to establish minimum local standards and appropriate financial contributions from new residential development. We reserve the right to comment on this matter further as and when the SPD is produced and consulted on.</p>		
1766			Peel Holdings (Land and Property) Ltd		Object	<p>7.11 Policy HS9 requires financial contributions to be made from developments of over 10 dwellings to improvements in existing playing pitches in the Borough. An SPD will set out minimum local standards and appropriate contributions.</p> <p>7.12 Peel objects to the inflexible application of a requirement for financial contributions in this respect. There are clear policy and legal tests for planning obligations and contributions should only be required where they are necessary to make the development acceptable in planning terms. As such, rather than establishing an upfront and one-size-fits-all expectation that new development will fund playing pitch improvements, the requirement for contributions should be determined on a site-by-site basis having regard to the relevant legal and policy parameters set out in the NPPF (paragraph 204) and The Community Infrastructure Levy Regulations 2010 (as amended). Policy HS9 should be updated accordingly in this respect.</p> <p>7.13 As with open space requirements, it is considered that the SPD update should take place as soon as possible to give clarity to development. Our client reserves the right to comment further when the SPD is under review.</p>

Reference	HS10	Private Outdoor Amenity Space
-----------	------	-------------------------------

1766			Peel Holdings (Land and Property) Ltd		Not Applicable	<p>7.10 Our client is supportive of the intentions of Policy HS10 to ensure that new developments include adequate private outdoor amenity space. It is considered however, that it is too specific and overly prescriptive to require the size of such spaces to be determined by 'garden sizes of nearby properties'. The housing stock in Rossendale is significantly varied with some existing properties having overly large gardens and some having no garden areas. Local Plan Policy ENV1 sets out the need to take account of the local character and appearance, and sufficiently covers the appropriate design considerations that new development proposals will be required to address.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS14	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy HS14: Conversion and Re-Use of Rural Buildings in the Countryside</p> <p>Proposals for the conversion of an existing building in the countryside will be permitted where:</p> <p>The proposal does not have a materially greater impact on the openness of the area and the proposal will not harm the character of the countryside;</p> <p>The building is of a permanent and substantial construction, structurally sound and capable of conversion without the need for more than 30% reconstruction;</p> <p>The conversion works and facing materials to be introduced would be in keeping with the original building, and important architectural and historical features would be retained. Particular attention will be given to curtilage formation, including appropriate boundary treatments and landscaping, which should be drawn tightly around the building footprint and the requirement for outbuildings, which should be minimal;</p> <p>The proposals would serve to preserve or enhance the setting of any nearby Listed Buildings or Conservation Area they are within, or the amenity of nearby residents;</p> <p>The building and site has a satisfactory access to the highways network and the proposal would not have a severe impact on the local highway network;</p> <p>Satisfactory off-street parking, bin storage and bin collection points can be provided without adversely impacting on rural character and mains services are available for connection into the scheme;</p> <p>The development does not require the removal of, or damage to, significant or prominent trees, hedges, watercourses, ponds or any other natural landscape features;</p> <p>The development would not have an unacceptable impact on nature conservation interests or any protected species present;</p> <p>If an agricultural building, it is not one substantially completed within ten years of the date of the application;</p> <p>The proposal would not harm the agricultural or other enterprise occupying the land or buildings in the vicinity; and</p> <p>The re-use of the building must not be likely to result in additional farm buildings which would have a harmful effect on the openness of the area.</p> <p>All applications should accord with guidance set out within the latest version of the "Conversion and re-use of buildings in the Countryside" Supplementary Planning Document.</p> <p>RCT support HS14.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS14	Further comment
1789	Jackie	Copley	CPRE		Not Applicable	<p>Policy HS14: Conversion and Re-Use of Rural Buildings in the Countryside</p> <p>23. We have concern over the Government relaxation of planning controls to enable occupiers to more easily change agricultural buildings to other uses without planning permission though the prior approval process, subject to meeting certain criteria. We therefore urge Rossendale Council to everything it can to ensure farms are supported to diversify whilst ensuring that works do not result in a substantial rebuild of structures and ensure that conversions which involve external alterations and / or other associated development e.g. hardstanding, boundary treatment etc. are sympathetic to the character of the building and the rural setting of the building. It is good that the Council has Supplementary Planning Document on Converting and Re-using Buildings in the Countryside.</p> <p>24. CPRE also seeks good planning policies for the following:</p> <ul style="list-style-type: none"> • Rural policies to guard against unnecessary encroachment and built intrusion, by protecting and enhancing Rossendale’s countryside and rural landscapes, especially Green Belt designated land. • Developer contributions must be adequate for affordable housing, particularly in rural places as there are huge issues with affordability in rural settlements. Other community infrastructure required to make places sustainable are required. • Sustainable travel should be promoted before the private car. Rossendale requires safe walking and cycling routes to promote healthy modes of travel. Public services should be prioritised over car based development due to the problem of emissions for climate change and air quality, and increase traffic congestion. • Energy and waste demand minimisation should be planned. The energy needs and waste arising from developments should be reduced by embracing new technologies and sustainable development principles. • Green Infrastructure policies should encourage natural capital to be planned into new development for climate change resilience, flood risk, promotion of biodiversity, green lung function and residential amenity. 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS14	Further comment	
1812	Philip	Carter	Environment Agency		Object	<p>Issue: Development proposals to convert and re-use rural buildings in the countryside are often in locations with limited sewerage infrastructure.</p> <p>Impact: Development in areas with little or no sewerage infrastructure can increase the risk of pollution to controlled waters without a suitable method of foul drainage.</p> <p>Suggested solution: Expand the policy to ensure that development schemes include sewerage infrastructure proposals that will not increase the risk of pollution to controlled waters</p> <p>Commentary:</p> <p>Government guidance on non-mains drainage in NPPF paragraphs 109 and 120, and national Planning Practice Guidance (Water supply, wastewater and water quality – considerations for planning applications, paragraph 020) stresses that the first presumption must be to provide a system of foul drainage discharging into a public sewer. Only where having taken into account the cost and / or practicability it can be shown to the satisfaction of the local planning authority that connection to a public sewer is not feasible, should non-mains foul sewage disposal solutions be considered. When considering non-mains drainage systems, the first presumption should be for the use of a package treatment plant and only where this is demonstrated not to be feasible should septic tanks be considered. Making reference to the use of an appropriate system of foul drainage in Policy HS14 adds weight to need for developers to identify an appropriate solution in these instances.</p>

Reference HS17 Specialist Housing

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS17	Further comment
1592	Warren	Hilton	Highways England		Not Applicable	<p>HS17: SPECIALIST HOUSING</p> <p>The Policy relating to Specialist Housing states: 'Development proposals for specialist forms of housing will be supported provided that</p> <ul style="list-style-type: none"> o The development is well located so that shops, public transport, community facilities and other infrastructure and services are accessible for those without a car, as appropriate to the needs and the level of mobility of potential residents, as well as visitors and staff' <p>Key Points</p> <p>As mentioned previously in this review, the need for sites to be accessible via a range of travel modes, supported by a Travel Plan as part of a planning application, will be important in reducing the overall traffic impact of any residential development.</p> <p>n terms of specific sites, the Policy identifies three sites for specialist accommodation. These are all small in scale and would be unlikely to have a significant traffic impact in isolation.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS17	Further comment
1771	Mohammed	Ali Ahmed	Lancashire County Council		Not Applicable	<p>Housing is a significant determinant of health and poor housing conditions contribute to many preventable diseases and injuries, including respiratory, nervous system and cardiovascular diseases and cancer.</p> <p>Housing types and standards</p> <p>Rossendale has an oversupply of high density terraced housing and this can be an issue for older residents and those with a disability, as terraced properties can be difficult to adapt to suit changing needs. In order to maintain independent living, adaptations such as creating ground floor bathrooms and bedrooms are frequently necessary but this type of housing does not often offer scope for such changes.</p> <p>Figure 5 below shows the Index of Multiple Deprivation, Living Environment domain of deprivation, by ward and decile. It illustrates that all but one of Rossendale's wards fall within the bottom 50% nationally for this domain.</p> <p>When separating the domain into its separate indoor and outdoor subdomains, it is clear that Rossendale rates poorly in the indoor domain. The indoor domain is concerned with housing quality, the information for which comes from Census data and the English Housing Survey. As shown in Figure 6 below, around half of the borough sits within the bottom 30% nationally.</p> <p>Figure 7 below shows Age Structure and 2025 Population Projections (Office for National Statistics (ONS). The projected shift in the sizes of age groups as a proportion of the population is common throughout Lancashire and England.</p> <p>Figure 8: Age Group Split Population Projections 2016-2025 (ONS) demonstrates, between now and 2025 in Rossendale, the 60-79 age group (as a proportion over the overall population) is only projected to increase by 2% and the 80+ age group is projected to increase by 1%.</p> <p>These population projects provide an alternative age forecast, using a different population project time period (2016-2025) to those presented in the Rossendale Strategic Housing Market Assessment (SHMA) report, which projects to 2034.</p> <p>In the HS17: Specialist Accommodation policy explanation, it is stated that "In relation to supported housing for older people, the SHMA indicates that the number of residents aged over 65 in Rossendale is projected to increase by 6,336 (52.9%) by 2034, in contrast to the overall growth in population of just 5,915 residents (8.6%)."</p> <p>The SHMA population projects to 2034 therefore predict a different age range split to the current ONS projections to 2025. It is recommended that longer term projections (as given in the SHMA) should be treated with a degree of caution, as they can be viewed to be less reliable estimates of future trends. However, whichever population projection timeframe is used, the projections demonstrate that there will be growth in the 65+ and 80+ age groups. It is important to take account of the expected growth and to plan for the provision of specialist housing accordingly. The Rossendale draft plan has two</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS17	Further comment
						<p>housing policies of interest Policy HS6: Housing Standards and Policy HS17: Specialist accommodation.</p> <p>Policy HS17: Specialist Accommodation is also welcomed. The policy supports the provision of specialist housing, including retirement accommodation, extra care accommodation and supported accommodation services, subject to criteria relating to location, accessibility and amenity being provided. The policy also allocates 3 specific sites for specialist housing accommodation, in the 3 localities of Bacup (HS2.19), Waterfoot (HS2.90) and Whitworth (HS2.103). These sites are expected to provide 70 specialist housing units. There is no explanation as to why these sites have been allocated and why no further sites are allocated in the other main urban areas of the local plan area. It is also unclear if 70 specialist housing units will meet the expected needs for this type of housing provision for the whole local plan period, taking account of the population and age range projections previously referred to above.</p> <p>Recommendation:</p> <p>Future housing developments will need to cater for Rossendale's aging population and provide appropriate facilities for Rossendale residents across the age groups.</p> <p>Consideration should be given to allocating other housing sites (as listed in Policy HS2: Housing Site Allocations), under Policy HS17 as specialist housing, subject to evidence of a defined need for specialist housing, in other urban areas located within the local plan area, in addition to the 3 allocated sites. Please see appendix for figures</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS17	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy HS17: Specialist Housing</p> <p>Development proposals for specialist forms of housing, including retirement accommodation, extra care accommodation and supported accommodation services, will be supported provided that:</p> <p>The development is well located so that shops, public transport, community facilities and other infrastructure and services are accessible for those without a car, as appropriate to the needs and level of mobility of potential residents, as well as visitors and staff;</p> <p>The development contains appropriate external amenity space of an acceptable quantity and quality;</p> <p>Adequate provision is made for refuse storage and disposal facilities; and</p> <p>It would not have an unacceptable impact on the character of the area or the amenity of the occupiers of neighbouring properties.</p> <p>The following sites are allocated on the Policies Map specifically for specialist accommodation:</p> <p>HS2.19- Former Bacup Health Centre</p> <p>HS2.90- Waterfoot Primary School</p> <p>HS2.103- Land Behind Buxton Street</p> <p>RCT support HS17 provided it recognises a distinction between Circular 82/69 Category 1 and 2 housing for old people who are mostly able bodied and in retirement and other extra care CQC regulated accommodation proposed for these 3 sites.</p>		
1812	Philip	Carter	Environment Agency		Object	<p>Issue: Sites HS2.19 & HS2.90 are allocated for specialist housing but are located within Flood Zones and are constrained by the presence of Main River watercourses.</p> <p>Impact: These constraints may affect the suitability of these sites for specialist housing as proposed.</p> <p>Suggested solution: Review the suitability of these sites for specialist housing and consider whether or not the proposed densities take account of the site constraints to demonstrate why they are suitable as proposed.</p> <p>Commentary:</p> <p>There is no evidence presented to show that these sites are sequentially appropriate in relation to flood risk. The presence of Main Rivers through and adjacent to the sites may also impact upon the proposed density of development, particularly in relation to HS2.19 as development over a culverted Main River watercourse will not be permitted.</p>

Reference			HS18		Self Build and Custom Built Houses			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS18	Further comment
1764			Taylor Wimpey UK Ltd		Not Applicable	<p>Policy HS18: Self Build and Custom Built Homes</p> <p>2.65 Taylor Wimpey welcome the Council's identification of suitable land to accommodate self-build and custom built houses. Indeed, seven housing allocations have been identified specifically for this type of housing and we fully agree with this approach.</p> <p>2.66 In light of this, we are unsure why the policy then also requires developers to make at least 10% of plots available for sale for self/custom build. Whilst this policy suggests that this will be encouraged as opposed to required, it is considered that the appropriate mechanism to deliver selfbuild and custom-built homes is through specific allocations, as proposed here, rather than a prescriptive requirement for each and every allocated site in the Local Plan.</p> <p>2.67 Requiring private developers to provide service plots available for sale within every housing scheme will place and unnecessary constraints and burdens on those housebuilders, and could potentially lead to delays in delivery while those plots are being marketed; particularly where there may be little market demand. Indeed, the explanatory text to Policy HS18 explains that evidence from the SHMA indicates that the level of demand for self-build plots is currently low in Rossendale.</p> <p>2.68 As such we would request that the allocations remain, but the 10% requirement be removed. Then through preparation of a self-build and custom build housing register, the Council can continue to effectively monitor demand for self-build and custom homes through the process and identify additional sites for this purpose if necessary.</p>		
1781			Rossendale Civic Trust		Support	<p>Policy HS18: Self Build and Custom Built Houses</p> <p>The Council will support individuals who wish to build their own dwelling by identifying suitable serviced plots of land. To ensure a variety of housing provision, where possible, developers will be encouraged to make at least 10% of plots available for sale to small builders or individuals or groups who wish to custom build their own homes.</p> <p>The following housing sites allocated under Policy HS2 are identified specifically for selfbuild and custom build housing:</p> <p>HS2.28- Booth Road/Woodland Mount, Brandwood</p> <p>HS2.34- Land Rear of Highfield Nursing Home</p> <p>HS2.48- Land south of 1293 Burnley Road, Loveclough</p> <p>HS2.57- Land at Conway Road</p> <p>HS2.59- Land to the north side of Hall Carr Road</p> <p>HS2.58- Land At Higher Cloughfold</p> <p>HS2.92- Field at Scout Road, Whitewell Bottom</p> <p>RCT support HS18</p>

Chapter 2: Employment Growth and Employment								
Reference	EMP1	Provision for Employment						
1592	Warren	Hilton	Highways England		Not Applicable	EMP1: PROVISION FOR EMPLOYMENT Policy EMP1 states: 'The Council, together with developers and other partners, will seek to provide sufficient employment land to meet the Borough's requirement of 27 hectares for business, general industrial or storage and distribution for the period up to 2034'. The explanatory section of the Policy states that the Council's Employment Land Review (ELR) (2017) identified a lack of small to medium sized premises for B2 and B8 use classes, and that demand for such premises is highest in the west of the Borough due to the accessibility to the A56(T) and M66. The ELR also highlighted that there is currently an oversupply of B1a office space, in which such premises are generally focused in and around Rawtenstall and Haslingden. The stated required provision of 27 hectares of employment use represents the intermediate figure between a lower figure of 22 hectares (the previous delivery of employment land) and an upper figure of 32 hectares (the maximum possible delivery). The provision of 27 hectares is stated as being aligned with the Housing Objectively Assessed Need (based on a labour supply of 220 dwellings per year). Key Point As would be expected for land uses of this type, the demand for employment sites is greatest in areas where the SRN is more easily accessible, i.e. the west of the borough. In particular, distribution-type land uses are reliant on the use of the SRN and a significant proportion of traffic generated by these developments would be expected to use the SRN.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	EMP1	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy EMP1: Provision for Employment</p> <p>The Council, together with developers and other partners, will seek to provide sufficient employment land to meet the Borough's requirement of 27 hectares for business, general industrial or storage and distribution (Use Classes B1, B2 and B8) for the period up to 2034.</p> <p>RCT support EMP1 and note: The Council's Employment Land Review (ELR) (2017) identifies an overall lack of good quality small to medium-sized industrial premises for industrial and manufacturing (B2 and B8), which is suppressing demand. The high levels of manufacturing and industrial uses, and the need to export products, means that the need for industrial premises is greatest in the west of the Borough where there is ready access to the A56 and M66.</p> <p>In terms of office uses, activity is generally focused to the west of the Borough around Rawtenstall and Haslingden. Whilst there is a current oversupply in the short term the ELR evidences a need for new office accommodation (B1a) in the longer term to meet the forecast growth in the service sector, and suggests that this could be located in Rawtenstall. RCT note a need to appreciate, that as with comparison goods, Rossendale neighbours are more likely to be chosen for larger office users. The LCC involved development at Rising Bridge remained vacant, and became mostly occupied by LCC.</p>

Reference EMP2 Employment Site Allocations

493	J K	Walsmley			Object	<p>Some ten years ago it was decided an area of waste land at Rising Bridge had to be built upon. There was an obvious sham consultation with residents who wanted bungalows/houses thereon. Our views were ignored and we had to have a paint factory. When that scheme fell through we were again ignored and we had to have offices, which were ready for occupation on 1st July 2010. Some still remain unoccupied.</p> <p>Now it has been decreed land at Rising Bridge MUST be built upon. At a time when the Country is crying out for more houses (and it is proving impossible to re-obtain planning permission for a plot on Roundhill lane) it is proposed to visit industrial units upon us. I would much rather the land was left undeveloped but if we are yet again to be ignored I can see no reason whatsoever why a quiet residential area should be turned into a industrial complex.</p> <p>There is already far too much traffic for the adjacent roads. More would bring additional danger therefrom to children at the infants school.</p>

589	Stephen	Langridge			Not Applicable	6. Industrial Development, the plan indicates a massive imbalance between Haslingden and Rawtenstall in the provision of industrial development land, also a similar reversed imbalance in the provision of residential land. Surely a more equitable balance would reduce the need to for people to commute from one town to the next.		
1478	N/A	N/A	Winfields Holdings Ltd and Winfield's Ltd	- Site at Hud Hey	Object	The allocation does not recognise that all of the Britannia Mill component of the wider site has an extant consent for retail use, which has been confirmed as having been lawfully commenced (2008/0753). Table 2, therefore, needs to be amended to refer to the lawful retail use of this building and surrounding land. - - Separate representations with respect to Policy HS2 also consider the background to the site and demonstrate that its allocation should be revised in order that it makes a meaningful contribution to the competing objectives of policy. Please see other the representations submitted on behalf of Winfield's Limited with respect to the site specific allocation.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	EMP2	Further comment
1592	Warren	Hilton	Highways England		Not Applicable	<p>The Council is seeking to allocate 27 ha of B-class employment land in Rossendale over the Local Plan period. The Local Plan states that much of committed employment land supply sites are considered to be of poor quality and do not therefore meet the needs of modern businesses.</p> <p>The Council further states that, as mentioned previously, that there is a need for new sites in the west of Borough where there is good access to both the A56(T) and M66.</p> <p>The new employment sites which have been identified are shown in the figure below: Figure 2-1 – New Employment Site Allocations</p> <p>Of the new sites identified, EMP 2.12 is located west of the A56(T) and east of the B6527. The nearest SRN junction is the A56(T) / A680 / B6527 / Broadway roundabout. There is the possibility of some increased traffic at this roundabout, and at M66 Junction 1, but the majority of development trips generated by this site are likely to impact on the local network without travelling on the SRN.</p> <p>EMP 2.23 and EMP 2.15 are located north of Haslingden at Hud Hey and may have a potential impact on the A56(T) / A680 Rising Bridge roundabout along with the A56(T) / B6232 junction and the A56 / Todd Hall Road junction. These sites are therefore likely to have a significant localised impact on the SRN at these junctions.</p> <p>EMP 2.26 and EMP 2.34 are located in New Hall Hey, in close proximity to the A56(T) / A682 junction, thereby potentially having a significant impact on this junction.</p> <p>EMP 2.35 and EMP 2.38 are located in Rising Bridge and have the potential to impact on the A56(T) / A680 Rising Bridge roundabout. The impact of the development of these sites upon the roundabout junction would need to be assessed by a developer at pre-application stage and impacts and resulting need for mitigation measures discussed with Highways England as part of the planning process.</p> <p>Key Point</p> <p>There are 7 new allocated employment sites, all of which are in excess of 2ha in terms of developable area, and therefore have the potential to create a significant increase in the number of trips accessing the SRN.</p> <p>Each SRN junction may be impacted by developments on more than one allocated site. The cumulative impact of all of the sites is therefore an important consideration and this should be reflected in the highways evidence base required to underpin the Local Plan.</p> <p>No details are provided of the proposed vehicular access to the sites. The main access point from these sites should be from local roads, which is inherently safer than having a reliance on direct access to and from a high-speed trunk road like the A56. Access points and junctions on busy, high speed roads generate weaving and turning manoeuvres by drivers, impacting on safety and</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	EMP2	Further comment
						<p>the reliability of journeys. As a consequence, developers of sites such as these should access their proposals via the local road network or existing junctions on the SRN where they may be capable of catering for increased usage without a severer traffic impact or a reduction in safety.</p> <p>Please see appendix for table</p>		
1771	Mohammed Ali	Ahmed	Lancashire County Council		Not Applicable	<p>There is strong evidence that work is good for health and unemployment is bad for itviii. Work and health is central to the story of people and place and helping people with health issues to obtain or retain work and be productive at work is a crucial part of economic success and wellbeing of every community.</p> <p>Figure 9 below illustrates that the majority of wards in Rossendale are within the 30% most deprived wards nationally for employment deprivation, with two wards Bacup and Stacksteads within the 10% most deprived wards.</p> <p>Figure 9ix: Index of Multiple Deprivation, Employment Deprivation Domain by ward and decile</p> <p>Employment Site Allocations</p> <p>Policy EM2: Employment Site Allocations identifies a total potential employment allocation of 193.64 hectares gross area and 29.17 hectares area available for development. The sites appear to be located throughout the borough. The allocated sites include 7 new site allocations and range in gross site size from 2.76 to 5.67 hectares. The new allocations are located primarily in the Worsley and Longholme wards. Worsley ward is ranked with the top 20 most deprived wards in England as per the Index of Multiple Deprivation.</p> <p>In addition, like new major housing sites, new employment sites (and mixed use sites) have the potential for both positive and negative health impacts, which could affect the immediate locality and neighbouring areas. It is important that any potential health impacts are taken into account during masterplan preparation and through the agreement of a site design code.</p> <p>Recommendation:</p> <p>Consideration should be given in the local plan to how planning policy can be used to create accessible and meaningful employment for the resident populations of Stacksteads (decile 1), Irwell (decile 2) and Worsley (decile 2) wards.</p> <p>We would also recommend the inclusion in the Employment chapter of a specific reference that economic growth can be used as a means of helping to address deprivation and inequalities in income and health outcomes.</p> <p>Consider the provision of detailed guidance/requirements for all new employment site allocations and mixed use allocations, similar to those provided in Policies EMP7 and EMP6.</p> <p>Please see appendix for figures.</p>

1781			Rossendale Civic Trust		Support	<p>Policy EMP2: Employment Site Allocations</p> <p>The following sites shown on the Policies Map are allocated and protected for business, general industrial or storage and distribution (Use Classes B1, B2 or B8 respectively) in the period 2019- 2034. Rossendale Council will require a masterplan or development brief on sites identified with an *.</p> <p>RCT provisionally support EMP2, subject to more detail consideration of sites listed.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	EMP2	Further comment
1812	Philip	Carter	Environment Agency		Object	<p>Issue: Several of the proposed new employment allocations are subject to constraints that may impact on compliance with the NPPF, delivery and yield. Impact: Proposed allocations for employment development are non-complaint with NPPF and NPPG requirements.</p> <p>Suggested solution Demonstrate that relevant environmental constraints have been taken into account when allocating residential sites.</p> <p>Commentary: Table 2 at Appendix 1 identifies where proposed employment allocations are adjacent to or partly within a Flood Zone (2 or 3), within 8 metres of a designated Main River watercourse or located on top of a historic landfill site (so may have contamination issues).</p> <p>1. Flood Zones: In relation to sites within a Flood Zone as defined on the EA Flood Map for Planning, it will be for the Council to demonstrate that any site allocated for development in a Flood Zone satisfies the requirements of the Sequential Test and, where necessary, the Exception test. We have identified all those sites where flood risk may be an issue (including sites that border an area considered to be at risk). We understand that you have completed your Strategic Flood Risk Assessment (SFRA) and that this may provide sufficient evidence for these sites to come forward. Evidence to demonstrate that the Sequential Test and Exception Test have been satisfied for allocations in Flood Zones should be clearly cross-referenced in the Local Plan. Where site specific mitigation measures are necessary to make a development safe in planning terms, these should be specified at an appropriate point in the local plan, possibly as part of Policy ENV11. This may be in the form of excluding parts of the site from inappropriate or unacceptable development or identifying site specific measures that would be necessary for specific allocated sites to make the development safe in a Flood Zone without increasing risk elsewhere.</p> <p>2. Main Rivers: Development within 8 metres of the top of the bank or edge of the retaining wall of a designated Main River watercourse (or culverted watercourse) will require consent from the Environment Agency. Development that restricts access to a Main River watercourse and / or presents a risk of harm to the aquatic environment may not be acceptable. It is essential to ensure that any sites with Main River watercourses in an open channel or a culvert within the development site or within 8 metres of the site boundary take this into account. Where small sites require an easement on either side of a Main River watercourse that may be within the site, this could impact on the density of development that could be achieved. Development over culverted Main River watercourses will not be permitted.</p> <p>3. Historic Landfill sites: Proposals for development of historic landfill sites will need to be supported by sufficient information to demonstrate that the site is suitable for the proposed use without posing a risk to controlled waters. We have no evidence to suggest that these sites cannot be re-developed, but</p>

Reference	EMP3	Employment Site and Premises
-----------	------	------------------------------

731	Emily	Hrycan	Historic England	Object	Policy EMP3 Employment Site and Premises The policy makes reference to significant heritage assets. It is unclear what this means – is this the grade of the asset or the significance of the asset. The policy only makes reference to one of the tests that need to be used to assess the appropriateness of a proposal affecting the historic environment, heritage assets and their setting and excludes the rest. As a result the policy as drafted would not provide the appropriate framework to conserve and enhance the Borough's heritage assets.
-----	-------	--------	------------------	--------	--

1478	N/A	N/A	Winfields Holdings Ltd and Winfield's Ltd	Object	Whilst the policy is supported, It would be appropriate to incorporate some flexibility into criteria (g) as some sites have been long term vacant with no interest arising since their allocation by the 1995 plan (or earlier). They may also have other constraints (such as highways, subsequent consents, and the changing status of buildings within or adjoining them) which require a different approach. - - It may be that a marketing exercise is required, but not necessarily in all cases. The approach for any site should, however, be agreed with the Council, and on this basis a minor amendment is proposed to criteria (g) to the effect; - - “convincing evidence of lack of demand likely to be through a rigorous and active 12 month marketing period.....”
------	-----	-----	---	--------	--

1592	Warren	Hilton	Highways England	Not Applicable	EMP3: EMPLOYMENT SITE AND PREMISES Policy EMP3 states that: 'All existing employment premises and sites last used for employment will be protected for employment use' Notwithstanding the above statement, any change of development use classes from employment to residential, if located in proximity to the SRN, may require assessment of the traffic impacts, bearing in mind that the changing of use classes may increase demand on the SRN during peak periods.

Development Criteria for Employment Generating Development

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	EMP4	Further comment
1592	Warren	Hilton	Highways England		Not Applicable	As stated within the Draft Local Plan, Rossendale Borough Council is keen to reduce the number of individuals who wish to travel to other neighbouring areas for work. Additionally, increasing the amount of medium size enterprises may be achieved through allowing existing small enterprises to easily expand through a streamlined planning process. Within the criteria set by EMP4, is a condition that a proposal should be supported if: 'The traffic generated does not have a severe adverse impact on local amenity, highway safety or the operation or operation of the highways network' The above statement is welcomed and evidently should apply to the strategic as well as the local highway network.		
1781			Rossendale Civic Trust		Support	Policy EMP4: Development Criteria for Employment Generating Development Proposals for new employment generating development, including extensions to existing premises, which provides for or assists with the creation of new employment opportunities, inward investment and/or secures the retention of existing employment within the Borough will be supported provided that: The scale, bulk and appearance of the development is compatible with the character of its surroundings; There is no significant detrimental impact on the amenity of neighbouring land uses and the character of the area by virtue of increased levels of noise, odour, emissions, or dust and light impacts, surface water, drainage or sewerage related pollution problems; The site has an adequate access that would not create a traffic hazard or have an undue environmental impact; The traffic generated does not have a severe adverse impact on local amenity, highway safety or the operation of the highways network; and Appropriate provision is made for on-site servicing and space for waiting goods vehicles. Adequate screening is provided where necessary to any unsightly feature of the development and security fencing is located to the internal edge of any perimeter landscaping; On the edges of industrial areas, where sites adjoin residential areas or open countryside, developers will be required to provide substantial peripheral landscaping; Open storage areas should be designed to minimise visual intrusion; and The proposal will be served by public transport and provide pedestrian and cycle links to adjacent areas. RCT support EMP4

Reference		EMP5		Employment Development in non -allocated employment areas				

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	EMP5	Further comment
1592	Warren	Hilton	Highways England		Not Applicable	EMP5: EMPLOYMENT DEVELOPMENT IN NON-ALLOCATED EMPLOYMENT AREAS The Draft Local Plan states that new, scale small development will be permitted in areas where employment is not the principal designated land use and there would be no detriment to the environment in which such development would be located. Whilst such individual small scale development may not have a significant impact on the SRN, an accumulation of said units may have a noticeable impact upon the network and therefore planning of such sites should be carefully considered.		
1781			Rossendale Civic Trust		Support	Policy EMP5: Employment Development in non-allocated employment areas New small scale employment development (Use Classes B1, B2, B8, and A2 (A2 limited to under 100m2 of new floorspace)), will be permitted in areas where employment is not the principal land use provided there would be no detriment to the amenity of the area in terms of scale, character, noise, nuisance, disturbance, environment and car parking. RCT support EMP5		
Number of comments		EMP5				2		
Reference		EMP6		Futures Park				
1592	Warren	Hilton	Highways England		Not Applicable	This 4.6 ha site is located in the eastern part of the Borough in Bacup and therefore any trips associated with the development would be unlikely to result in a severe impact on the SRN in the west of the Borough, with trips likely to disperse throughout the local highway network.		
1771	Mohammed Ali Ahmed		Lancashire County Council		Not Applicable	It is unclear why the other new site allocations, EMP2.12, EMP2.15, EMP2.23, EMP2.35 and EMP2.38 are not subject to similar policies and requirements. It is also noted that Policy EMP6: Futures Park also requires a masterplan, phasing and infrastructure delivery schedule and agreed programme of implementation. No reference is given to requiring an agreed design code for the site It is also unclear why the other mixed use site allocations of EMP2.22, EMP2.28 and EMP2.52 are also not subject to specific policy requirements similar to Policy EMP6		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	EMP6	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy EMP6: Futures Park</p> <p>Within the area defined on the Policies Map at Futures Park (EMP2.5) new high quality development will be permitted subject to the following:</p> <p>a) Comprehensive development of the site is demonstrated through a masterplan;</p> <p>b) A phasing and infrastructure delivery schedule for the area; and</p> <p>c) An agreed programme of implementation in accordance with the masterplan.</p> <p>The following uses are considered to be acceptable:</p> <p>i. Employment uses comprising B1 (Business), B2 (General Industrial) and B8 (Storage or Distribution);</p> <p>ii. Hotel (Use Class C1), Restaurants and cafes (Use Class A3) and drinking establishments (Use Class A4);</p> <p>iii. Leisure uses (Use Class D2);</p> <p>iv. Retail (Use Class A1);</p> <p>v. Pedestrian and cycle route – “Valley of Stone” Greenway and link to Lee Quarry</p> <p>RCT support EMP6 and note it as: An area comprising 4.6 hectares at Futures Park, Bacup has been identified as having the potential to accommodate a flexible mixed use scheme, subject to national policy in the Framework and other relevant policies of this Local Plan. The area will require a well designed scheme that responds to the sites context, makes the most of environmental and leisure assets, takes account of the nearby Leisure facility at Lee Quarry and delivers the necessary sustainability, transport, connectivity, accessibility (including public transport) and infrastructure requirements. Rossendale Council therefore requires a Masterplan for the development of this site. RCT note the mixed use aims, which need noting in other Policies, such as Retail R1, as a competitor to other centres.</p>		
1812	Philip	Carter	Environment Agency		Support	We support the requirement for a Masterplan for the site given the presence of the River Irwell and the need to incorporate it in to the development as a positive feature while still ensuring protections from the development as proposed.

731	Emily	Hrycan	Historic England		Not Applicable	<p>Policy EMP7 New Hall Hey</p> <p>Whilst we welcome the inclusion of a master plan for the site, the supporting text to the policy includes reference to heritage yet the policy does not mention it. The heritage assessments also do not provide the evidence to support the policy or provide the framework and mitigation/enhancements that would be required for the site. See comments on site allocations below for further information.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	EMP7	Further comment
1592	Warren	Hilton	Highways England		Not Applicable	<p>An area comprising 6 hectares to the south of the A682, sites EMP2.26 and EMP2.34, has been allocated in the Policies Map as being suitable for employment development. The site is stated within the Local Plan as being within a highly accessible part of the Borough and that any development proposals will be, as with site HS2.71 at Edenfield, will be subjected to a Scoping Study, a Transport Assessment and Travel Plan.</p> <p>Key Point</p> <p>☒ This area is located in close proximity to the A56(T) and as a result, it has the potential to have a significant traffic impact on the SRN. The inclusion of the sites in the assessments undertaken as part of the highways evidence base which is required to underpin the Local Plan will allow for a better understanding of the impact of the site. The Edenfield housing site is located in close proximity and the highways evidence base will also allow a better understanding of the combined impact of these sites.</p> <p>☒ The need for the sites to be accessible via a range of travel modes, supported by a Travel Plan as part of a planning application, will be important in reducing the overall traffic impact on the SRN.</p>		
1771	Mohammed Ali Ahmed		Lancashire County Council		Not Applicable	<p>Of the new site allocations only 2 sites EMP2.26 and EMP2.34, with a combined site area of 6 hectares, are subject to a separate policy – Policy EMP7: New Hall Hey. Policy EMP7 requires a site masterplan, an agreed development design code and a phasing and infrastructure delivery schedule. These requirements will also be supported by the provision of a transport assessment and travel plan. The design code provided for Policy EMP7 does include a requirement for the provision of cycling and footpath routes but could be strengthened further by requirements to consider air quality impacts and road safety impacts. We would expect these aspects to also be considered in a transport assessment and travel plan for the EMP7 site.</p> <p>Recommendation:</p> <p>Revise Policy EMP7: New Hall Hey, to require a Health Impact Assessment to be prepared as part of the policy criteria. In addition the design code principles should be reviewed to consider additional requirements for electric vehicle charging points. Design and layout considerations should also consider road safety, particularly for the most vulnerable people (i.e. children, elderly and the disabled).</p>

Chapter 3: Retail

Reference	R1	Retail and Other Town Centre Uses						
1026	sheila whipp	-	the square	Not Applicable	One would hope that the RBC would take the trouble to investigate the use of areas on main roads, e.e. Bacup Road, where Burnley Road East meets Booth Road (where all the factories, Boys properties) etc. all of which have enough derelict properties and boarded up shops, and neglected areas which could be refurbished to provide affordable housing as has been done with Ilex Mill etc. - - I was upset to note your deadlines for comments as I have only just , today, found out about the consultation with Rossendale residents. I read the Free Press, etc. etc. but had no idea what was going on and feel that you, RBC, could have done much more to let residents know about your proposals. - - I am worried that we should not be changing the character of Rossendale..... especially the town centre area which ought to remain an open space. I was never in favour of the development at New Hall Hey because it sucks the character out of the centre of Rawtenstall..... and so it has done. In view of the fact that the steam train service brings tourists into Rawtenstall, we should be making our centre as interesting and in keeping with that of our neighbour, Ramsbottom. It should be noted that tourists are not interested in out of town shopping areas as they are everywhere. We need to be unique, that means, we should be seen as a cotton spinning, shoe manufacturing, heritage place not another shopping mall. - - We should be mindful of our duty to future generations. Already there has been damage done including damage to the Town Hall, a beautiful stone building. We do not want our valley further damaging by eyesores like the former police station RBC built on Kay Street, Rawtenstall. Breeze block!!!!!!	I would have liked the time to think all this through, and I am wondering how many others are in my position and are not even aware of your draft plan. - - I am disappointed that RBC assume that people can fill forms on computers and are computer literate. - - I haven't heard of one public meeting to attend.... and I can say that I am astute person, who is usually well informed on local matters, I read the papers and listen to local radio and I have heard nothing until someone urged me to respond quickly today. I have had no thinking time and not studied the plans in detail as I've not been informed of any consultation venues or meetings.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	R1	Further comment
1592	Warren	Hilton	Highways England		Not Applicable	<p>The Local Plan states that it is expected that major proposals will be directed towards the town centre of Rawtenstall with other large schemes being encouraged to locate in district centres such as Bacup and Haslingden. Retail proposals will be directed to identified Primary Shopping Centres (PSA). It is stated that impact assessment will be required where the floorspace exceeds the following criteria:</p> <ul style="list-style-type: none"> ☑ Rawtenstall Town Centre 400 square metres ☑ Bacup and Haslingden District Centres 300 square metres ☑ Crawshawbooth, Waterfoot, Whitworth Local Centres 200 square metres <p>The Local Plan states that Rossendale Borough Council intend to both further improve and enhance centralised retail locations. The Local Plan proposes that major retail developments will be encouraged to be delivered in the town centre of Rawtenstall. The Town Centre is easily accessible from the SRN. Therefore, any encouragement of delivering major retail projects in Rawtenstall Town Centre should be carefully considered to limit any potential impact on the SRN.</p> <p>Policy R1 states that any proposals that will result in the loss of A1 use in the PSA of the town, district and local centres will only be supported where: ‘There would be no significant adverse impacts on the character of the area, the amenity of local residents, road safety, car parking or traffic flows’</p>

Retail proposals will be directed to the Primary Shopping Areas (PSA). Proposals for non-retail uses appropriate to town centres will be considered favourably within the town centre boundary, which encompasses but extends beyond the PSA.</p> <p>The existing markets at Bacup, Haslingden and Rawtenstall will be retained. Consideration will only be given to relocation where:</p> <p>this forms part of a wider regeneration initiative and it positively reinforces the role of the market</p> <p>Where retail, leisure and office development is proposed outside of the defined centre boundaries, an impact assessment will be required where the floorspace exceeds:</p> <p>Rawtenstall Town Centre : 400 sq.m</p> <p>Bacup and Haslingden District Centres : 300 sq.m</p> <p>Crawshawbooth, Waterfoot, Whitworth Local Centres : 200 sq.m</p> <p>Proposals that require planning permission which would result in the loss of A1 uses in the PSA of the town, district and local centres will only be supported where:</p> <p>It would make a positive contribution to the vitality and viability of the relevant centre;</p> <p>It would not result in a significant break in retail frontage or lead to the loss of retail floorspace at a scale that would be harmful to the shopping function of the centre or which would reduce the ability of local communities to meet their day-to-day needs within the centre;</p> <p>It is compatible with a retail area and would maintain an active frontage and be immediately accessible to the public from the street; and</p> <p>There would be no significant adverse impacts on the character of the area, the amenity of local residents, road safety, car parking or traffic flows.</p> <p>RCT give qualified support to R1, but Note:</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	R1	Further comment
						<p>A. Lower Cloughfold, alongside Bacup Road, is not identified as a neighbourhood centre or parade. Nor are large standalones: Musbury Fabrics in Helmshore, Winfields at Rising Bridge, Tesco at Sykeside, Rossendale Interiors in Stacksteads, and New Hall Hey's 3 Retail Parks.</p> <p>B. NOTE so far not located gross retail areas to compare, BUT the WYG study does tend to confirm Planning Inspector's "is Rossendale shopped out" comment during Core Strategy Hearings in Public 2011. Also come to view that comparison shopping might be better viewed over-all Rossendale, rather than for each centre.</p> <p>C. RCT note in particular these Sections from White Young Green's April 2017 Rossendale Town Centre, Retail, Leisure and Tourism Study. NOTE use of Primary and Secondary Shopping Area boundaries from 2011 Core Strategy, which include more area and longer walks in Rawtenstall than Bacup and Haslingden, and so should be treated with some caution, eg: that the new Morrisons foodstore has not been accounted for as it falls outside the centre's current boundary. If this 2,231 sq.m was included in our analysis, then the proportion of convenience floorspace would be higher than the national average.</p> <p>7.86 One reason for this is that whilst Rawtenstall town centre benefits from a very strong independent comparison goods retail offer, representation by national multiple operators is considered to be low for a centre of this size. An important factor is that Rossendale is surrounded by larger, higher order centres such as Bury, Burnley, Rochdale and Accrington which already accommodate these national multiples. As such, the commercial demand to gain representation in Rossendale as well is more limited, particularly as Rossendale residents are already likely to be travelling to these higher order centres (and retailers) to undertake their comparison goods shopping.</p> <p>7.87 The other key reason is that Rawtenstall is considered to historically have had units of insufficient scale and format to accommodate the business models of many comparison goods focussed national multiples. However, this position is changing with the introduction of New Hall Hey Retail Park, the first phase of which involves a terrace of four large format units, whilst the second (which is under construction) involves a further three and an accompanying restaurant.</p> <p>7.88 It should be noted that comparison goods retailer TK Maxx, which forms part of Phase I of the New Hall Hey scheme, opened following the undertaking of the household shopper survey in February 2016 and as such the influence of this new addition to the Borough's retail offer is not reflected in our results. Given that TK Maxx represents the largest fashion focussed retail unit in Rossendale, it is anticipated that it has had some positive impact on the Borough's ability to retain such comparison goods shopping trips. It has also evidently improved local consumer choice within this goods sector.</p> <p>7.89 With some 1,493 sq.m (GIA) of modern, comparison goods floorspace</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	R1	Further comment
						<p>remaining unlet as part of Phase I of the New Hall Hey scheme and a further 743 sq.m (GIA) available as part of the forthcoming Phase II, it is not considered that the planning authority needs to take any urgent action through their forthcoming plan to address a qualitative need for an improved comparison goods offer in the Borough. The existing and future floorspace proposed at New Hall Hey is considered to have the potential to attract the type of national multiples which are capable of improving the Borough's market share over the short to medium-term.</p> <p>7.90 In terms of future comparison goods provision above and beyond that already approved and constructed at New Hall Hey; where need does arise, in the first instance this should be provided within Rawtenstall town centre's Primary Shopping Area, in accordance with the requirements of national planning policy.</p> <p>D. RCT note that past actions have present consequences, and that New Hall Hey Retail Park was built against Officers advice to Members in their reporting on Application 2005/617 to DEVCON of 5 April 2006, in which they gave this:- Recommendation</p> <p>That planning permission be refused for the following reasons:</p> <ol style="list-style-type: none"> 1) The applicant has failed to demonstrate that a need presently exists for the proposed development of a non-food retail park at this out of centre site of New Hall Hey which is contrary to PPS6: Planning for Town Centres. 2) The proposal fails the sequential approach to site selection in that there exist better located town centre and edge of centre opportunities for comparison shopping development that would better support the existing town centre shopping function and are therefore contrary to PPS6: Planning for Town Centres and Policy 16 (Retail, Entertainment and Leisure Development) of the Joint Lancashire Structure Plan 2001-2016. 3) The applicant has failed to demonstrate that the proposals would not adversely affect the vitality and viability of Rawtenstall town centre which is contrary to PPS6: Planning for Town Centres. <p>RESOLVED:</p> <p>That members of the Committee be minded to approve the application as a refusal would be detrimental to the future of Rossendale and that the Chief Executive in consultation with the Officers and the Chair be given delegated authority to determine the conditions to be attached to the consent together with the Heads of Terms in respect of a Section 106 Agreement and to issue a decision notice if the application is not called in by the Government Office.</p> <p>Reasons</p> <p>Having taken into account all relevant material planning considerations, this committee considers that planning permission for this proposed development should be resolved to be granted (subject to a Section 106 agreement relating to sustainable transport initiatives and highway works) because in our</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	R1	Further comment
						<p>judgement its positive impacts in terms of the wider economic, environmental, social and physical regeneration opportunities and benefits which the scheme will bring to the local community and to the town, are all key issues which, when weighed in the balance with other factors, should be given conclusive weight in this case. In addition, the approval of this application will have very positive and significant sustainable development benefits resulting from the reduction in car-borne journeys made by many people who currently travel out of the Valley to do their non-food shopping and to access leisure facilities that are not available locally. Taken together, it is the view of Committee that these positive regeneration and other benefits plainly outweigh any perceived objections to the development including those based upon retail capacity, need, or potential negative impacts on the town centre's future vitality and viability.</p> <p>E. RCT note, with New Hall Hey Retail Park, these particular Representations, 23/05/2016, on Major Application 2016/0129: Erection of 3no. Retail Units (A1) and a Restaurant/Refreshment Unit (A1/A3/A5) with associated access, car parking, and landscaping. Land off Swanney Lodge Road, Rawtenstall, Rossendale.</p> <p>1. Design and Access Statement submitted by the Applicant shows proposals for 3557 sq.m gross retail area, to add to New Hall Hey Retail Park's existing 6182 sq.m, of which 3,817 sq.m gross is at ground floor level, to give this Out of Centre Retail Park a new gross retail area of 9739 sq.m, and to increase its car parking from 157 to 381 spaces.</p> <p>2. Rawtenstall Town Centre estimated net Primary Shopping Area is 5911 sq.m and its Secondary is 6543 sq.m. Its public car parking for shoppers, workers, commuters and residents is 281 Long Stay + 171 Short Stay = 452 + On-street c118 = Total c570 Spaces.</p> <p>3. Rossendale Local Plan Core Strategy 2011. This was subject to Hearings in Public before a Planning Inspector, who considered it in relation to the new National Planning Policy Framework, and, as adopted by Rossendale Borough Council, it does not support food sales at New Hall Hey:-</p> <p>AVP 4: Strategy for Rawtenstall, Crawshawbooth, Goodshaw and Loveclough New Hall Hey will be safeguarded for bulky goods retail and business use. An extension for business use of land to the south of Hardman's Mill will be favourably considered subject to flood risk issues being fully addressed.</p> <p>4. National Policy on retail locations. RCT note NPPF's S2 Ensuring the vitality of town centres, where the definition of Edge of Centre, shows this as within 300m of a Primary Shopping Area. New Hall Hey is far Out of Centre at c.800m.</p> <p>5. RCT would remind Members that, having given Planning Approval 2007/030 for the erection of 3 retail units measuring 3358 sq.m, 1412 sq.m and 1412 sq.m, these units were constructed by August 2010; and then remained vacant until Members were persuaded in 2014 to allow a variation of the conditions, attached to this 2007 planning permission, so that 1,162 sq.m of the gross</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	R1	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	----	-----------------

floor space (Unit A1) can sell all Class A1 goods, including food, drink and clothing, along with ancillary uses. In order, it appears to RCT, to bring a M&S Simply Food to Rossendale; a decision that looks to have “trumped” both local and national planning policies and their intentions to ensure the vitality of town centres.

6. Rawtenstall Town Centre Retail Growth and Potential. RCT suggest that if a need was not evident in 2006, it certainly isn't now. Did Rawtenstall, or Rossendale, really need this Out of Centre's M&S's 1162sq.m of Simply Food sales, when it had a new Asda, Lidl, Tesco, B&M's 340sqm of food sales in the 3543 sqm ex Focus DIY, the Valley Centre cleared for redevelopment, and the vacated New Hall Hey Station Court: 2181sqm gross, c150 car spaces.

RCT estimate net retail, from VOA data, shows Rawtenstall Town Centre's:- Primary 5911sq.m, Secondary 6543sq.m, Edge 20203sqm to total 32657sqm. The real change for Rawtenstall was Asda's 10986sqm nett, 13106sqm gross. F. RCT note LCC's Lancashire Profiles, which shows gross retail area in Rossendale: 974 - 90,000sqm, 1998 - 92,000sqm, 2008 - 119,000sqm or 29% Lancashire's No 1 for growth in retail space to Hyndburn's 16.6%, and Burnley's 13.5%.

Town	Population	Gross Retail sqm	sqm/head
Chorley	104,000	173,000	1.65
Rossendale	7,300	119,000	1.77
Blackburn+Darwen	140,700	312,000	2.22
Hyndburn	81,600	196,000	2.40
Preston	132,000	257,000	3.46

Does this show the effects of being close to larger centres?

Maybe, but then take the situation of a large town, close to both other large towns, and also city centres. We see Warrington, where a main high street Boots has moved into a Debenhams expanded Golden Square, and its site is now proposed for a smaller Retail Market. Where a population growth from 122,300 in 1968 to 202,228 in 2011, relates to a 55% reduction of town centre shopping floorspace to 4.8 sqft per person – 0.45 sqm/p, but its gross retail of c296,000 sqm is only 1.46 sqm/p.

Or are we also seeing the effects of the change to larger retail units with more efficient use of space: better ratios of net to gross areas: 49-51 Bank Street ex Woolworths' 49% to Asda St Mary's Way's 84%?

So note Rossendale's recent growth: Tesco x 2, a new Asda, a Lidl, Bacup's 2022sqm Morrisons, and a B&M with Planning Permission for 340sqm of food sales in the 3543 sqm ex Focus DIY. Did Rawtenstall or Rossendale need an Out of Centre 1162sqm of food sales in M&S? And now an Aldi as part of 3557 sq.m gross retail area, added to New Hall Hey Retail Park's existing 6182 sq.m.

1592	Warren	Hilton	Highways England		Not Applicable	The Rawtenstall Town Centre redevelopment project involves removal of the former Valley Centre from the PSA and reassigned as a 'Future Primary Shopping Area Extension'. The new extension is expected to accommodate a mixed-use scheme of employment, retail and residential use classes. The mixed-use scheme will generate a varied pattern of traffic associated with the developments and requires careful consideration due to the close proximity of the Town Centre to the SRN. Key Points ☑ Improvement and addition to retail centres that lie in close proximity to the SRN such as Rawtenstall and Haslingden should be carefully considered in order to ensure that any impacts are properly mitigated.		
1781			Rossendale Civic Trust		Support	Policy R2: Rawtenstall Town Centre Extension Within the area defined on the Policies Map within Rawtenstall Town Centre shown as an extension to the Primary Shopping Area, redevelopment will be permitted subject to the following: a) Comprehensive development of the site is demonstrated through a masterplan; b) The implementation of development in accordance with an agreed design code; and c) An agreed programme of implementation in accordance with the masterplan. The following mixes of uses are considered to be appropriate: i. Retail (Use Class A1); ii. Hotel (Use Class C1); iii. Restaurants and cafes (Use Class A3); iv. Drinking establishments (Use Class A4); v. Leisure uses (Use Class D2); vi. Employment uses comprising B1 (Business) vii. Residential units above ground floor level. RCT support the hopes in R2.

485			East Lancs CCG		Not Applicable	View of East Lancashire CCG:- "Both in my role at East Lancashire CCG and more importantly as a local GP, I'm becoming increasingly aware of the impact that fast food outlets are having on the health of the population and many of my fellow health professionals see it as one of the most important health challenges around. The Health profile in Rossendale is very similar to that of the national position, where over a quarter of adults and a third of nine year olds are overweight or obese, many of whom either have or are at risk of developing Diabetes" GP Partner – Dr Mackenzie and Partners and Rossendale Locality GP Lead		
1510	Chris	Holmes	Kentucky Fried Chicken (Great Britain) Limited	Policy R5 bullet points 3 and 4	Object	Kentucky Fried Chicken (Great Britain) Limited (KFC) is committed to working in partnership with government to increase the availability of healthy diet and exercise choices. It agrees with reasonable and fair strategies to increase the availability of healthy diet and exercise choices, but cannot agree with measures, which may be unlawful and simply restrict choice for all members of the public without good evidence of effectiveness. - - The draft policy is not based on any objectively assessed development requirement. It effectively assesses the requirement for hot food takeaways in certain areas as zero, but without regard to baseline levels or any level or distance at which the alleged contribution to obesity is supposed to occur. There is no assessment of how many applications would be refused or the environmental or economic impact of longer journeys and lost jobs. - - There is no evidence of a distance at which the alleged harm will occur or indeed that it necessarily will occur at all, as there is no evidence that hot food takeaways contribute to obesity more than any other land use at which it is possible to purchase or consume food and drink, including coffee shops, bakeries (or, simply, supermarkets) in Class A1, restaurants and cafes in Class A3 or drinking establishments within Class A4. - - The inclusion of primary schools is particularly problematic, as it is clear that children at primary schools are not permitted to leave the premises unaccompanied. Indeed, no account is taken of secondary schools that operate "locked gates" policies at lunchtimes. We suggest that it would be better to focus on ensuring good and broadly equal access to open space, sport and recreation opportunities and on a balanced retail offer.

Chapter 4: Environment

Reference	ENV01	High Quality Development in the Borough						
-----------	-------	---	--	--	--	--	--	--

731	Emily	Hrycan	Historic England		Not Applicable	<p>We welcome that the Council recognises the importance of the historic environment in the Borough. However, as drafted the policy does not provide an appropriate framework to ensure that development does not harm heritage assets and their setting. Reference should be made to for example, to ensuring that there is no unacceptable harm to heritage assets and their setting which would be more consistent with the requirements of the NPPF, whilst the policy would also benefit from a specific reference (separate bullet point) to townscape and local distinctiveness.</p>		
1201	Stephen	Anderson	N/A	ENV 1, 2, 3, & 4	Support	<p>I am fully in support of the robust design and heritage policies, whilst recognising the challenges associated with implementing such policies. - - These policies will need to be supported by a robustly implemented validation checklist and other guidance. - - I believe there is also a role for a local design review panel to support the Council's decision making on matters of design and heritage. - - With respect to the proposed Conservation Areas, I am fully in support although hope that this will represent the beginning of review and refinement of existing Conservation Areas, implementation of management plans including potential Article 4 Directions and considering future Conservation Areas, such as Waterfoot. -</p>		On balance, the Draft Local Plan is the best and most well balanced option.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV01	Further comment
1592	Warren	Hilton	Highways England		Not Applicable	POLICY ENV1: HIGH QUALITY DEVELOPMENT IN THE BOROUGH An identified criteria within the Local Plan is the desire for new developments to demonstrate how they will connect to the wider area via public transport, walking and cycling. The Policies Map 2017 indicates that a significant majority of the allocated residential sites are sporadically located around the Borough and that due to both their location and size, it is assumed that they not have significant impacts on the SRN. The allocated residential site at Edenfield, however, is located immediately adjacent to the A56(T). Due consideration should be given to providing a high level of accessibility to the site, which has the potential to significantly reduce the number of vehicle trips.		
1764			Taylor Wimpey UK Ltd		Not Applicable	Policy ENV1: High Quality Development in the Borough 2.69 We support the general principles outlined in Policy ENV1, which are all important factors in delivering high quality development in the Borough. 2.70 Whilst acknowledging the important role that Development Briefs or Design Codes (point m) can play in delivering high quality development, they can sometimes add an additional administrative burden leading to delays to housing delivery. In order to overcome this, if Design Codes or Development Briefs are to be introduced, this process should involve early engagement with Developers on Masterplan concepts. Frontloading such work will save delays down the line, and provide a high quality design framework which both the Council and Developer are happy with. It should be noted, that Taylor Wimpey have already undertaken such engagement with the Council on the development proposals for Grane Village. 2.71 Additionally, Design Codes can sometimes impose constraints on the sale of land to specific housebuilders, if certain standards are outlined which not every housebuilder could deliver. This is something that should be considered as part of dialogue between the Council and developers/landowners for each individual site. 2.72 The above points should be seriously considered given the Council is unable to currently demonstrate a 5-year supply of housing and will be under pressure to have this requirement secured upon adoption of the Plan. Necessitating Development Briefs or Design Codes for each allocated site will simply push back delivery rates.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV01	Further comment
1766			Peel Holdings (Land and Property) Ltd		Object	Design		
						<p>7.14 Policy ENV1 sets out various expectations (items a-q) for design and layout of new development. Peel is committed to high quality design and has previously demonstrated this commitment through the Development Frameworks provided for the proposed development sites in Rossendale. These frameworks are in the process of being updated and will be provided to the Council in due course. In addition, Peel is committed to working with the other landowners to take forward a coordinated approach to design at Edenfield (in accordance with Policy HS3).</p> <p>7.15 Peel considers that the following points in Policy ENV1 are unnecessarily prescriptive. Item m) requires a 'Development Brief or Design Code (as appropriate)', item n) states that where appropriate applications shall be accompanied by an 'independent Design Stage Review', and item j) requires public art. Whilst these tools will be appropriate in some circumstances, it is not considered necessary in all circumstances. These should not be included. Item p) requires consideration of sustainable construction 'including Sustainable Drainage Systems (SuDS)'. The use of SuDs is adequately covered in policy ENV11, and is therefore considered an overly detailed point to include in this policy.</p> <p>7.16 Criterion m) sets out a requirement for a design codes/development briefs in some cases. It is unclear what the reference to "size of development" means and therefore when a design code may be required. The policy should be redrafted such that it is precise and its requirements of developers are clear.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV01	Further comment
1771	Mohammed	Ali Ahmed	Lancashire County Council		Not Applicable	<p>Recommendations: Due to Rossendale's deprivation in the area of indoor living environments, housing quality should be a key concern for Rossendale. Any options to upgrade the existing housing stock should be explored.</p> <p>Design Policy ENV1: High Quality Development in the Borough, requires that all new development takes account of the character and appearance of the local plan area and provides criteria to be considered, including aspects relating to urban design, public realm, amenity, movement patterns, sustainable travel, crime, landscaping, flood risk and design codes. The requirements of the policy are welcomed but could be strengthened further by requiring development proposals ensure that there is no adverse health impacts with regard to air quality and road safety, and where possible the developments should help address existing hotspots. Consideration should also be given to requiring Health Impact Assessments to be required where appropriate for major planning applications and to consider the use of Section 106 agreements or Community Infrastructure Levy (CIL) to deliver measures to improve the health impacts of development.</p> <p>Outdoor Living Environment and Crime The Index of Multiple Deprivation, Living Environment domain, has an Outdoor Living Environment subdomain, which measures air quality and traffic accidents. Figure 12 below shows that for the Outdoor Living Environment subdomain, that for Rossendale, the Greenfield ward is one of the 10% most deprived wards nationally and that a number of other wards in the borough are within the 30% most deprived category, with no wards classified as least deprived. Figure 12: Index of Multiple Deprivation, Outdoor Living Environment Subdomain by ward and decile Figure 13 below, shows that from the most recent available data, Rossendale is significantly above the national average for violent crime (including sexual violence). We therefore commend that Policy ENV1: High Quality Development in the Borough states the aim of "Minimising opportunity for crime, and maximising natural surveillance." Figure 13xiii: Violent crime (including sexual violence) hospital admissions for violence</p> <p>Recommendations: Policy ENV1 should be revised to include criteria requiring that requires development proposals ensure that there is no adverse health impacts with regard to air quality and road safety, and where possible development should help to alleviate existing poor air quality and road accident hotspots. This will help to address the relatively high levels of outdoor environment, living environment deprivation in the Borough</p>

731	Emily	Hrycan	Historic England		Object	<p>Historic England is concerned that the policy proposed (and the Plan as a whole) does not provide an appropriate framework to manage the Borough's heritage assets and their setting.</p> <p>It is not appropriate to just rely on the provisions of the NPPF to determine all applications affecting the historic environment. The NPPF makes it clear that Local Plans are expected to include detailed policies, which will enable a decision maker to determine a planning application. The policy as drafted does not do this.</p> <p>Key issues to be considered include undesignated and designated heritage assets (including significance of, setting, extensions, demolition, alterations, change of use, etc), archaeology including remains of less than national importance, conservation areas, registered parks and gardens, heritage at risk as well as information to accompany an application.</p> <p>The Policy should be clear on what relates to a particular heritage asset – for example the list included in section B of the policy; character and appearance relates to conservation areas and not all types of heritage assets and this appears to be the same within the other bulleted parts of the policy. The policy needs to be amended and structured to ensure that it is clear how the policy will relate to a particular heritage asset.</p> <p>In addition to the above:</p> <ul style="list-style-type: none"> · The policy attempts to determine the significance of heritage assets by listing them. · Shop fronts in conservation areas will be subject to separate tests than for example, scheduled monuments. Yet the policy appears to put them on the same footing. · Bullet II – what does this mean and how is it applied? · Bullet III – this appears to refer to local character and distinctiveness and not the historic environment. The implementation of this bullet would mean that if the proposal fits in with the wider setting then it would be acceptable. This would not meet the tests in terms of heritage assets. · Bullet VI – Surely any work that has been made to a heritage asset that is harmful would most likely not have had Listed Building Consent and would be subject to enforcement. This part of the policy also attempts to define these works – and these relate to built structures but what about other heritage assets. · A design solution that reinforces local distinctiveness may not always be appropriate for a heritage asset but Bullet vii appears to suggest this. · The final paragraph of the policy refers to the demolition or removal of heritage assets or its parts. This is confusing and needs amending. · How does the policy deal with the different levels of harm to heritage assets? · How will the policy deal with different types of assets such as archaeology of national significance? 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV02	Further comment
						· How is the policy locally specific to Rossendale? The Policy overall needs to be rewritten in view of some of the suggestions above and the requirements of the NPPF and the 1990 Act.		
1201	Stephen	Anderson	N/A		Support	I am fully in support of the robust design and heritage policies, whilst recognising the challenges associated with implementing such policies. - - These policies will need to be supported by a robustly implemented validation checklist and other guidance. - - I believe there is also a role for a local design review panel to support the Council's decision making on matters of design and heritage. - - With respect to the proposed Conservation Areas, I am fully in support although hope that this will represent the beginning of review and refinement of existing Conservation Areas, implementation of management plans including potential Article 4 Directions and considering future Conservation Areas, such as Waterfoot. -		On balance, the Draft Local Plan is the best and most well balanced option.
1323	Rachael	Gildert	Valley Heritage	There isn't a number stated on the documents	Support	I am very supportive of the creation of a Conservation area for Newchurch. Although the village was extensively remodelled in the 1960s, there is a still a lot of history left in the fabric of the remaining buildings both externally and internally and the Conservation Area would help to retain this and prevent inappropriate development and alterations of these buildings. - I also think the proposed boundary is suitable too and includes grounds and gardens where appropriate. Valley Heritage thinks the creation of new Conservation Areas within Rossendale is a very positive move towards protecting our historic environment. And it supports the extension to Chatterton and Strongstry Conservation Area boundary as a well justified proposal. - - We suggest the Helmshore site boundary might need to be adjusted slightly to make better reference to existing physical and ownership boundaries - - We also suggest that Haslingden boundaries be extended to incorporate areas of industrial mill workers housing (such as Beaconsfield Street, Park Street and Greenfield Street) and larger houses to the south. It also omits Coal Hey Weavers cottages and back to back properties - the proposed boundary falls a few metres short of incorporating these properties along the western site boundary - - The use of Article 4 Directions in many of these areas is important, as are removing permitted development rights on signage in commercial areas. - - Valley Heritage feel that no significant improvement in most of these areas in terms of loss of heritage features (windows, doors, gutters, roof materials, boundary treatments, shop fronts etc.) are likely to come forward without some kind of grant scheme being introduced, alongside a significant effort on education and enforcement.		With regards to Conservation Areas, it was a shame Waterfoot Centre was not put forward. The town is slowly starting to regenerate and additional protection could help to prevent unsuitable shop fronts, UPVC windows and other inappropriate development

1766			Peel Holdings (Land and Property) Ltd		Object	Heritage 7.17 It is considered that Policy ENV2 is unnecessarily prescriptive. It sets out a requirement for new development proposals to have regard to Conservation Area Appraisals and to the significance, appearance, character and setting of nearby heritage assets. It is considered unnecessary to include criterions i) to vii), which specify an unnecessary level of detail regarding the features which new development assess. The majority of the requirements of these criteria are already enshrined in national policy such that it is unnecessary to repeat them in the local plan. If necessary, the guidance they provide should be set out in the explanatory text rather than in the policy itself.

1781			Rossendale Civic Trust		Support	<p>Policy ENV2: Heritage Assets</p> <p>a) Applications affecting a Heritage Asset or its setting will be granted where it:</p> <ul style="list-style-type: none"> i. Is in accordance with the Framework and relevant Historic England guidance; ii. Where appropriate, takes full account of the findings and recommendations in the Council’s Conservation Area Appraisals; iii. Is accompanied by a robust and thorough Heritage Statement and; <p>b) Applications will be granted where they sustain, conserve and, where appropriate, enhance the significance, appearance, character and setting of the heritage asset itself and the surrounding historic environment and where they show consideration for the following:</p> <ul style="list-style-type: none"> i. The conservation of features and elements that contribute to the heritage asset's significance and character. This may include: chimneys, windows and doors, boundary treatments, original roof coverings, earthworks or buried remains, shop fronts or elements of shop fronts in conservation areas, as well as internal features such as fireplaces, plaster cornices, doors, architraves, panelling and any walls in listed buildings; ii. The use of appropriate materials and design features which respect the asset; iii. A high standard of design that has regards to the positive aspects of the surrounding built form and its wider setting, in terms of design, siting, scale, height and materials used; iv. The reinstatement of features and elements that contribute to the heritage asset's significance which have been lost or damaged; v. The conservation and, where appropriate, the enhancement of the setting of heritage assets; vi. The removal of additions or modifications that are considered harmful to the significance of any heritage asset. This may include the removal of pebbledash, paint from brickwork, non-original style windows, doors, satellite dishes or other equipment; vii. The use of the Heritage Asset should be compatible with the conservation of its significance. Whilst the original use of a building is usually the most appropriate one it is recognised that continuance of this use is not always possible. Sensitive and creative adaptation to enable an alternative use can be achieved and truly innovative design solutions that reinforces local distinctiveness will be positively encouraged; <p>Development involving the demolition or removal of significant heritage assets or parts thereof will be granted only in exceptional circumstances which have been clearly and convincingly demonstrated to be in accordance with the requirements of the Framework and demonstrates that the public benefits achieved by the proposal outweighs the significance of the heritage assets(s).</p>

1790	David	Trivett			Not Applicable	<p>Bacup Townscape Heritage Initiative.</p> <p>From the Bacup Public Realm Proposals Update 25/08/2017 – Councillor Andy MacNae</p> <p>“The existing scheme is then stopped. Whilst this decision may be popular with those who have opposed change I believe that the great majority of people in Bacup will be deeply disappointed that our chance to deliver transformational change to the town centre has been lost because of this opposition.”</p> <p>“County officers will now work closely with our THI team to develop a new public realm plan that can be delivered within the THI timescales.”</p> <p>Although unable to attend the public meeting in July to voice my opinion on the, thankfully now defunct, twin island, shared space proposal I was in opposition to the scheme. Not because I “oppose change” but because I considered it was a badly conceived plan which would have caused severe traffic disruption to the town with, I believe, no benefit to residents or businesses.</p> <p>Bacup town centre is fundamentally a complex, offset junction at the crossing point of the A681 and A671 combined with Lane Head Lane emerging as a blind exit in respect of traffic from the Todmorden Road direction. Ignoring the heritage, retained fountain, discussion completely, I believe the current road layout scheme in place is the best functioning solution for the junction. The traffic flows well in all directions; unless a driver accidently, or deliberately decides to block the single car space entry point to the island from the Todmorden Road. Traffic flow around the island is also restricted if a large vehicle enters the island from the Todmorden Road.</p> <p>Other than under those circumstances the existing traffic system works, as can be seen daily and should remain unaltered. There are adequate street signs and road markings to direct the traffic properly. Two lanes from the Burnley Road direction for left and right turns. Three lanes from Rochdale for turn left to Rawtenstall, straight ahead for Burnley and turn right for Todmorden.</p> <p>The twin roundabout with five pedestrian crossings scheme was nonsensical in the extreme and would have resulted in considerable traffic build up at this junction. Eight pedestrian crossings in close proximity and traffic flow restricted to one lane only in all directions would not be a suitable, or efficient “transformational change” for Bacup in my opinion.</p> <p>The aerial CGI provided in support of the scheme was laughable and not real world Bacup. Bicycles, pedestrians, street furniture, widened pavements, two food vendor vans and only six cars visible. Not a bus or lorry of any description in sight.</p> <p>See recent images. Friday 06/10/17 12.00</p> <p>Tourist - Todmorden to Rawtenstall Rawtenstall to Rochdale Todmorden to Rochdale Todmorden to Burnley</p>

						<p>Todmorden to Burnley using left lane negotiating the island with the bus to Accrington</p> <p>Shared space, for events, centred at the junction of two busy A roads is a complete nonsense.</p> <p>Bacup evolved without a town or market square. Why try now to make something more pedestrian friendly and create, yet another, Rossendale traffic pinch point.</p> <p>Comparing Bacup with Poynton in Cheshire is ridiculous. Two A roads A5149 and A523 T junction with Park Lane. Totally different demographics with a different road layout, different weather in Cheshire so more scope for Al Fresco cafe scene. There is more disposable income in Poynton. I regularly experienced traffic delays travelling from Macclesfield to negotiate this constricting junction road scheme. There are no clearly defined pedestrian crossings visible.</p> <p>Ben Hamilton-Baillie's design to create a village centre with informal "pedestrian desire lines" and repaving to the areas in front of the shops to "enhance the pedestrian environment" cost circa £3 million.</p> <p>The shared space concept being; to slow traffic, using gateways demarking the transition from highway to village centre. From personal experience the scheme is badly lit at night, pedestrian desire lines and highway boundary lines are difficult to identify in the dark and rain and become invisible in snow. Ignoring the cost aspect the road layout is a confusing mess and free for all with the traffic. Pedestrians rely on the goodwill, awareness and due care and attention required from drivers to safely cross the roads.</p> <p>26000 vehicles per day through Poynton!</p> <p>The gateways channel traffic into single lanes resulting in long, slow moving queues in all directions which arrive at two "circles" defined in the roadway using different coloured blocks and then negotiate the junction with no clearly defined right of way other than the instructions in the Highway Code. I understand the instruction for roundabouts is they are to be driven around, not over.</p> <p>Independent assessment of the Poynton junction at the following link. https://aseasyasridingabike.wordpress.com/2014/06/16/poynton/ Accidents by Design: The Holmes Report on "shared space" in the United Kingdom Lord Holmes of Richmond MBE – July 2015 http://www.theihe.org/wp-content/uploads/2013/08/Holmes-Report-on-Shared-Space-.pdf Executive Summary Shared Space described by users as: "Lethally dangerous" (Pedestrian) "Absolute nightmare that I avoid if I can." (Driver) "Shared space is a false promise with poor delivery" (Cyclist)</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV02	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	-------	-----------------

Key findings:

- People’s experiences of shared space schemes are overwhelmingly negative.
- Overzealous councils are risking public safety with fashionable ‘simplified’ street design.
- Over a third of people actively avoid shared space schemes.
- 63 per cent of people who have used shared space schemes rated their experience as poor.
- Significant under-reporting of accidents in shared space.

Key recommendations:

- Immediate moratorium on shared space schemes while impact assessments are conducted.
- Urgent need for accessibility audits of all shared space schemes and a central record of accident data including “courtesy crossings”, which must be defined and monitored.
- Department for Transport must update their guidance so that Local Authorities better understand their responsibilities under the Equalities Act. Bacup is a crossroads town which people, other than residents, pass through on their way to somewhere else. This is something a shared space scheme will not rectify, particularly if the scheme creates the issues noted in the Holmes Report.

Most residents already travel elsewhere to work and shop.

Bacup is not a bad place to live but is not, nor is it likely to be, a tourist destination.

No canal, no railway, no real attractions or restaurants; just a few bike trails in a couple of redundant quarries.

Nothing of interest for “tourists”. I can’t see the street cafe scene working in the town.

Irwell Terrace is the closest to a town centre public space. If more public space is considered necessary; maybe relocate the bus stands. Exchange a couple of car parking spaces in front of the shops for the Accrington bus stop.

More public realm “shared space” will give the local idiots more places to play at night perhaps?

Forgot; no police station in Bacup or Stacksteads!

Maybe combine the police and fire service facilities at Bacup fire station for more efficient use by both services. This will give a faster police response time, instead of the current, blue light and siren charge up the valley from Waterfoot, Rawtenstall, or across from Burnley.

It will be very interesting to see what the next Bacup THI proposal for consultation looks like.

Changes should only be made to the current road layout if they make improvements.

I don’t think the retention of a heritage fountain is the main reason Bacup residents opposed the shared space scheme so strongly. The reports I read of

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV02	Further comment
						<p>the public meeting in July suggests the majority of those attending considered it is neither a practical or beneficial solution for the town.</p> <p>Changes to the road layout purely made to secure the heritage grant aid should not be pursued. Leave the junction as it is now.</p> <p>It is already difficult enough to turn right from Bankside Lane towards Rawtenstall. Why make it worse?</p> <p>I am not opposed to change. I have witnessed the enormous changes to Bacup since we came to live here in December 1980. Many shops and businesses have disappeared. A sad situation reflected in other towns across the country.</p> <p>Please see appendix for photographs.</p>

1764			Taylor Wimpey UK Ltd		Support	Policy ENV4: Landscape Character and Quality and Policy ENV5: Biodiversity, Geodiversity and Ecological Networks 2.74 We support the wording of these policies, which is sufficiently flexible and in line with the provisions of the NPPF.		
1775	Tom	Whitehead	16 different groups		Object	<p>Draft Policy ENV4</p> <p>We object in the strongest terms to draft policy ENV4 as presently worded. The policy wording in itself recognises the value of the landscape, and is to be commended. However, the supporting text (which forms a functional role in interpreting the policy) and the illustration at 'Figure 1' are seriously flawed. The decision of the Secretary of State on the Scout Moor extension proposals, clearly demonstrates that a tipping point has been reached where the landscape along the M66 corridor can no-longer accommodate additional turbines. The Julie Martin study referred to dates back to 2014, is out of date, and has been discredited through the Scout Moor call-in process. Indeed, the council's own landscape consultee to that planning application (as recorded in the officer's report to committee) recommended that the landscape impacts of additional turbines would be unacceptable. Given policies elsewhere in the Plan deal with wind turbines, all reference to turbines in Policy ENV4 should be deleted. Figure 1 should not illustrate turbines as this implies they sit comfortably in the landscape; instead they are regarded as alien in the landscape, contrary to all commentary in the GMSF and Natural England guidelines to this very landscape, and we do not accept that they are an established baseline to be recorded.</p> <p>Signed on behalf of:</p> <ul style="list-style-type: none"> • Rooley Moor Neighbourhood Forum • Holcombe Society • Bury Rural Inequalities Forum • Ramsbottom Heritage Society • Prickshaw & Broadley Fold Area Community Group • Rossendale Harriers club • Friends of Rooley Moor • Whitworth Residents • Turn Village Residents • Townsend Fold Residents • Affetside Society • Lane Head residents group • Edenfield Village Residents Association • Rochdale & Bury Bridleways Association committee • Rural Rossendale Trust Accommodation Providers • Norden Area Forum

1790	David	Trivett			Support	<p>Policy ENV4: Landscape Character and Quality.</p> <p>More consideration needs to be given to this policy in future before approval is granted for more wind turbines. Particularly the unacceptable impact on skylines and roofscapes.</p> <p>As the first paragraph in the Explanation of Policy ENV4.</p> <p>Development needs to conserve and enhance Rossendale's dramatic and attractive natural environment and its built environment. The Borough's landscape is significant in terms of its local identity, cultural value, tourism and general contribution to quality of life and it is essential that it is protected.</p> <p>The Council's planning decision to grant permission for the Scout Moor Wind Farm Expansion neither conserved nor enhanced the dramatic and attractive natural environment. Thankfully the Planning Inspector's recommendations and Secretary of State overturned the decision to preserve the landscape for the future.</p> <p>Similarly the Council's decision to grant permission for the erection of the two turbines at Sheephouse Farm Stacksteads was also flawed. Though smaller size turbines they do give the appearance of overspill from the Scout Moor wind farm group into the moorland fringe.</p> <p>Despite rejection by Councillors the skyline above Bacup is now dominated by the large scale turbines at Reaps Moss and Todmorden Moor.</p> <p>No more wind turbines of similar scale should be allowed to pollute "Rossendale's dramatic and attractive natural environment."</p> <p>"To ensure Rossendale's landscape is protected for future generations....."Policy ENV4</p>

1766			Peel Holdings (Land and Property) Ltd		Object	<p>Biodiversity and Trees</p> <p>7.19 Protection of areas of biodiversity and ecological networks in development proposals is required by Policy ENV 5. Policy ENV6 relates to protection, management, 33</p> <p>enhancement and connection of the green infrastructure network. ENV5 continues to require a net gain for biodiversity where adverse impacts are unavoidable and ENV6 requires a net gain of 20% in biodiversity to be replaced off site. The wording here is considered to be overly onerous and provision of net enhancements is not necessary to ensure that development is acceptable in planning terms.</p> <p>7.20 Peel therefore requests that the policy is amended to omit the net gain requirements and is re-worded to state that new development should mitigate its adverse impacts on ecology and green infrastructure, with improvements or enhancements sought where possible, such that it is consistent with the approach of the NPPF.</p> <p>7.21 Peel reserves the right to comment on the draft SPD proposed relating to Ecological Networks as it emerges.</p> <p>7.25 Peel questions the absence of any reference to 'geodiversity' (save for in the policy title) within the policy text itself and the absence of guidance within the accompanying Explanation to the policy. We understand 'geodiversity' to encompass the variety of rocks, minerals, fossils, landforms, sediments and soils, together with the natural processes which form and alter them as well as links that these establish with the local population and culture. It is suggested that either 'geodiversity' is removed from the policy title, or the policy text and accompanying Explanation is augmented to provide criteria and guidance relating to geodiversity interests.</p>

1809	Alex	Rowe	Natural England		Not Applicable	<p>Chapter 4: Environment</p> <p>Policy ENV5: Biodiversity, Geodiversity and Ecological Networks</p> <p>The protection and enhancement of biodiversity is addressed in Policy ENV5 of the Draft Local Plan. Overall Policy ENV5 sets out a strategy for the protection and enhancement of biodiversity and geodiversity that includes strategic policies to deliver this and promotes a network for future habitat creation and enhancement. The Draft Local Plan Policy ENV5 states:</p> <p>“Development proposals that have potential to affect a national or locally-designated site and it’s immediate environs as shown on the Policies Map or protected habitats or species will be expected to be accompanied by relevant surveys and assessments detailing likely impacts, proposals to avoid harm and where possible enhance biodiversity, and where necessary appropriate mitigation and on and off-site compensatory measures to offset the impact of development.”.</p> <p>In consideration of the above the Policy ENV5 has not fully demonstrated the requirements of the mitigation hierarchy as stated in the NPPF (paragraph:118). Development Management policies should set out criteria to firstly avoid, then mitigate and, as a last resort compensate for adverse impacts on biodiversity, which the Draft Local Plan for Rossendale currently does not clearly demonstrate. More guidance on how to advise on avoidance, mitigation and compensation can be found here: Application of the mitigation hierarchy in local plans.</p> <p>Environment Policy ENV5 needs to clearly set out that any proposal that adversely affects or causes significant harm to a Site of Special Scientific Interest (SSSI) will not normally be granted permission. With regards to local sites, the Draft Local Plan should set criteria based policies to guide decision on developments impacting upon local sites. Appropriate weight should be given to the importance of local sites and the contribution they make to the wider ecological network. Draft Local Plan Policy ENV5 states:</p> <p>“Development proposals should protect areas of biodiversity and ecological networks and where possible enhance sites and linkages. Any unavoidable adverse effects should be minimised and mitigated against, and where this cannot be achieved, compensated for with a net gain for biodiversity demonstrated.”.</p> <p>The above Draft Local Plan Policy ENV5 includes policy wording that overall seeks to minimise impacts to biodiversity and ecological networks, as well as where possible provide enhancements. For priority species and habitats the Draft Local Plan should promote the protection and recovery of priority species and habitats, which should be linked to national as well as local targets. For further information see: Habitats and species of principal importance in England lists priority species and habitats (i.e. those material to planning).</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV05	Further comment
						<p>Net gain is discussed in the Draft Local Plan Policy ENV5 as an outcome of compensation, which is not consistent with the NPPF. Natural England would like to see additional wording added to this policy that makes it clear that the Draft Local Plan seeks to achieve a net gain in biodiversity. The NPPF (paragraph 9) states: "Pursuing sustainable development involves seeking positive improvements in the quality of the built, natural and historic environment as well as in people's quality of life, including (but not limited to):... moving from a net loss of bio-diversity to achieving net gains for nature.". It is not clear that there is an aim to achieve a net gain in biodiversity, in the current Draft Local Plan that is inconsistent with the NPPF (paragraph 9). This has not been fully reflected in the current policy wording. Moreover, the NPPF (paragraph 109) also states: "The planning system should contribute to and enhance the natural and local environment by... minimising impacts on biodiversity and providing net gains in biodiversity where possible..., contributing to the Government's commitment to halt the overall decline in biodiversity, including by establishing coherent ecological networks that are more resilient to current and future pressures.". In consideration of the above the Draft Local Plan Policy ENV5 does not fully encompass the NPPF's principles for a net gain policy, rather the currently policy only seeks to implement a net gain approach at the compensation stage.</p> <p>We welcome the Ecological Networks that have been identified in the Draft Local Plan Policies Map, as well the designated ecological areas referred to as "Greenlands". The Draft Local Plan Policy ENV5 also states: "Opportunities to enhance components of the Ecological Network and the linkages between them will be supported with development proposals affecting them expected to identify how this is being addressed. A Supplementary Planning Document (SPD) will be produced setting out more fully the elements within and the role of Ecological Networks."</p> <p>Natural England welcomes the above policy wording in the Draft Local Plan and specifically the opportunities for enhancement, as well as the specific comments relating to Ecological Networks. On this point, we would like to see details of specific habitat types that would be most appropriate for enhancement, placing the emphasis on increase size, quality and quantity of priority habitats within cores areas, corridors or stepping stones that improves connectivity for habitats and movement of species. The SPD that will set out in detail the specific elements and role of Ecological Networks that is welcome and a document that Natural England would like to be consulted upon at the earliest possible stage.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV05	Further comment
1812	Philip	Carter	Environment Agency		Support	We support the proposed preparation of a Supplementary Planning Document to provide further details on the ecological networks in Rossendale. Given the significance of river corridors and networks in contributing the value of the biodiversity assets in the borough, we look forward to being involved in the preparation of the SPD.

1805	Lynton	Green			Not Applicable	Thank you for your help. Unfortunately that reference is only to do with making electric vehicle charging a condition around all new HOUSING developments. It says nothing about public or retail car parks. Can I request that this is reconsidered as part of a formal response to the draft local plan. I would be grateful if you could pass this on to the Planning Manager and for the planning manager to acknowledge receipt of my comments.		
1812	Philip	Carter	Environment Agency		Object	Issue: In relation to the impacts of new development on surface water and groundwater, a successful way of reducing the risk of pollution to the water environment is to ensure that foul drainage discharges to a public sewer unless it can be demonstrated why this is not feasible. Impact: By not requiring new development to connect to the public sewer where feasible, there is a risk that development may seek to use inappropriate methods of foul drainage in publicly sewered areas. Suggested solution: Revise the wording of the policy to include reference to the expectation that foul drainage from new development in publicly sewered areas will be expected to discharge to the public sewer to reduce the risk of pollution to controlled waters. Commentary: Government guidance on non-mains drainage in NPPF paragraphs 109 and 120, and national Planning Practice Guidance (Water supply, wastewater and water quality – considerations for planning applications, paragraph 020) stresses that the first presumption must be to provide a system of foul drainage discharging into a public sewer. Only where having taken into account the cost and / or practicability it can be shown to the satisfaction of the local planning authority that connection to a public sewer is not feasible, should non-mains foul sewage disposal solutions be considered. Making reference to the need to connect foul drainage to the public sewer where practicable will reduce the risk of developers pursuing less-sustainable alternatives.

600	Scott	Howard	Manchester Airport		Not Applicable	<p>Thank you for consulting and inviting comments from Manchester Airport on the Rossendale Draft Local Plan. We appreciate the opportunity to respond to this consultation and our response is centred around the safeguarding of Manchester Airport. Manchester Airport is a vital component within the UK's infrastructure network, and particularly within the Greater Manchester region, serving as the global gateway for the North of England. Annual passenger throughput is currently around 27 million, with over 70 airlines operating to over 200 destinations worldwide with a wide mix of full service, charter and lowcost operators. Manchester Airport is the 3rd largest passenger airport and the 4th largest cargo airport in the UK and the only airport outside London offering a dense network of scheduled and long-haul flights. The Airport has the potential to support 45 million passengers per annum and the projected growth at Airport City North and World Logistics Hub would ensure that the Manchester Airport economic area is a leading job creation region in the North. It is estimated that the Airport directly supports over 22,000 jobs in total and has an economic footprint in the North West region of £1.7 billion in GVA. Manchester is also an important cargo airport handling over 100,000 tonnes of freight in 2015, supporting a large number of businesses across the region with their exports. We firmly believe that Rossendale is ideally placed to capitalise on this growth and fully realise the economic benefits of these developments.</p> <p>Our comments are in relation to the environmental policies, specifically, Policy EN8: Wind Turbine Areas of Search and Policy EN9: Wind Farms and Individual Turbines, which are set out within Chapter 4 of the Plan.</p> <p>Policy EN8 refers to the individual areas of search for wind turbine development that have been identified on the Policies Map. Although the Airport Company welcomes and encourages the promotion of sustainable energy proposals and fully appreciates the need to identify suitable locations for these, we take a particular interest in the siting of wind turbine developments due to the potential impact they have upon radar and aircraft operations. In particular, we fully support the inclusion of "Air traffic radar reception" as a consideration in the decision-making process within Policy ENV9.</p> <p>Wind turbines can present a danger to aircraft and air traffic control (ATC) systems – they are often large physical obstacles and their rotating blades create electromagnetic disturbance that can present false returns on radar displays, which could be mistaken for or mask genuine aircraft returns causing incorrect information to be received by air traffic controllers. Although any aviation issues would be recognised at planning application stage through consultation with the appropriate aviation consultees (DfT/ODPM Circular</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV08	Further comment
						1/2003 details the consultation that would be required with Manchester Airport), it is important to be aware of the need to protect the safe and efficient operation of aircraft and air traffic control (ATC) systems when deciding the final site allocations and development principles for wind energy schemes within the borough. Thank you again for providing Manchester Airport with the opportunity to comment on the draft version of your Local Plan. We hope that our comments have been useful and please don't hesitate to contact us if you have any questions or wish to discuss any of the issues raised in more detail.		
1592	Warren	Hilton	Highways England		Not Applicable	The above stated policies included within the Local Plan relate directly to wind power generation within the Borough. Construction of the wind turbines typically requires abnormal loads to use the SRN. Therefore, it is recommended that the construction management plans for such schemes takes into account the potential impact upon the SRN and adopts off-peak travel patterns to minimise any potential disruption upon the network.		
1766			Peel Holdings (Land and Property) Ltd		Not Applicable	Wind Turbines 7.29 Policy ENV8 states that "Wind energy developments would be required to address the detailed requirements of Policy ENV10 on Wind Farms and Individual Turbines". Reference to Policy ENV10 is in error and should read Policy ENV9. 7.30 It also states that "The Written Ministerial Statement on Wind Energy Development (June 2015) indicates that all new Wind Energy development should have the backing of the public, and need to be located in "Areas of Search" shown in the Local Plan". This is not properly reflective of the content of the Written Ministerial Statement, which actually states: "...following consultation, it can be demonstrated that the planning impacts identified by affected local communities have been fully addressed and therefore the proposal has their backing..." 7.31 This clearly and properly places the onus on RBC to determine in its role as decision-maker whether "...impacts identified by affected local communities have been fully addressed...". We therefore suggest that this part of the Explanation is re-written accordingly.

1772	Peter	Wood			Object	<p>Representation on the Rossendale Local Plan with regard to Wind Turbines. The Rossendale Borough Council covers a large area of the Rossendale Valley. The purpose of this representation is to show the devastating effect on the vistas enjoyed by local people and visitors to the area and the setting of heritage assets and that no further turbines can be accommodated in the Rossendale Valley and surrounding areas.</p> <p>This representation is by no means complete and there are an incalculable number of vistas and heritage assets which have not been included. In less than eight short years the Rossendale Valley has gone from having no wind farms to seeing the construction of Scout Moor Wind Farm, Haslingden Moor Wind Farm (now with planning permission for additional four turbines), Crook Hill Wind Farm, Reaps Moss Wind Farm, Todmorden Moor, Crown Point Wind Farm, Hameldon Hill Wind Farm, Cliviger Wind Farm, Four smaller turbines near Deer Play plus a large number of singletons dotted haphazardly around the valley.</p> <p>The Rossendale Valley was given the name of 'The Golden Valley' during the Industrial Revolution. My photographic website the-golden-valley.uk is my humble attempt to capture and communicate the beauty of 'The Valley'. In terms of the long history of the valley, almost overnight the numbers of turbines have gone way beyond saturation and the landscape and its character cannot accommodate anymore turbines.</p> <p>The photographs in this presentation are all stills with no movement. What they do not capture and communicate is the effect of turbines known as 'flicker'. For myself, when I walk up to the moors, the continuous movement of the turbines attracts my eye, it is unrestful, distracting and makes me feel unwell. I find now when I walk up the moors I have to look in a different direction to how I am walking due to the turbines flicker, or look down at the ground, removing my natural experience of the moors which I had always enjoyed since early childhood, walking the very paths my ancestors have walked and sharing in their experiences.</p> <p>For myself and many other locals, the moors are our place of solitude, our place for quiet contemplation, rest and relaxation. We love the views and dramatic landscape and are very proud of our native valley. To see it being ruined by all these turbines is causing great suffering and depression. Please see appendix for photos.</p>

1775	Tom	Whitehead	16 different groups		Object	<p>We object to this policy in the strongest terms.</p> <p>The policy and supporting text talk in positive terms about areas 'being suitable' for turbine development. One thing that is clear from the appeal and call-in decisions referred to earlier in this representation is that the appropriateness or otherwise of turbine development within a landscape is a hugely complex matter; a pro-turbine policy such of ENV8 fails to recognise this complexity.</p> <p>The draft supporting text refers to the June 2015 Written Ministerial Statement, and recognises the importance of local opinion emphasised in that WMS. The Scout Moor public inquiry heard that 97% of respondents to that application were against the proposal. This reflects the sentiment of the local community when the existing Scout Moor development was consented a decade ago (at that time Rossendale refused the planning application). Turbines are not welcome in this landscape, and the community does not wish to see additional turbine development.</p> <p>The draft policy again refers to the Julie Martin study, which dates back to 2014; we'd restate that that document is out of date, and has been discredited through the Scout Moor call-in process. Indeed, the council's own landscape consultee to the planning application (as recorded in the officer's report to committee) recommended that the landscape impacts of additional turbines would be unacceptable.</p> <p>There is no need for a 'wind turbine area of search'; it is not a requirement on the LPA.</p> <p>Policy ENV8 should be deleted, and the tests set out in draft policy ENV9 instead relied upon (subject to our further comments to that policy).</p> <p>Signed on behalf of:</p> <ul style="list-style-type: none"> • Rooley Moor Neighbourhood Forum • Holcombe Society • Bury Rural Inequalities Forum • Ramsbottom Heritage Society • Prickshaw & Broadley Fold Area Community Group • Rossendale Harriers club • Friends of Rooley Moor • Whitworth Residents • Turn Village Residents • Townsend Fold Residents • Affetside Society • Lane Head residents group • Edenfield Village Residents Association • Rochdale & Bury Bridleways Association committee • Rural Rossendale Trust Accommodation Providers • Norden Area Forum

1781			Rossendale Civic Trust		Object	<p>Policy ENV8: Wind Turbine Areas of Search</p> <p>Areas of Search for Wind Turbines have been identified on the Policies Map. Single, and exceptionally, small groups of Turbines of up to 59m may be suitable in the “Enclosed Uplands Wind Turbine Area of Search” shown on the Policies Map. Larger turbines of up to 125m may be considered on the “High Moorland Plateau Wind Turbine Area of Search” shown on the Policies Map. Development of new wind turbines would not be supported outside these areas.</p> <p>All areas of the Borough are considered to be potentially suitable for single turbines of up to 25m in height.</p> <p>A. RCT objects to ENV8, and in particular to the Areas of Search as shown on the Policies Map, and note evidence base is: The Landscape Capacity Study for Wind Energy Developments in the South Pennines by Julie Martin Associates (JMA2010), its map for Rossendale should be added or linked to the Policy Map and should be brought, up to date, to now include, as well as the present Scout Moor and other Wind Turbines, those that were refused A, and those that were approved B, by the Secretary of State’s decisions in 2017 on Scout Moor:-</p> <p>A. the proposed turbines sited near to the edge of the moor would have a significant adverse effect on the landscape character and visual amenity.would result in significant adverse visual effects and would harm the appearance of the area for local receptors to the north and west of Scout Moor.</p> <p>B. the proposal would be largely contained within the footprint of the existing wind farm and would have a negligible effect on the local landscape..... would integrate well with the existing wind farm and would have a localised visual effect of minor significance.</p> <p>It should also locate important open view areas, such as to west of Burnley Road, Loveclough, that have been included in Local Plans and supported at Planning Appeals.</p> <p>B. RCT object to no provision in ENV 8 to secure compatibility with developing Local Plans and Spatial Frameworks of adjoining areas: how larger turbines are visible for the greatest distance; RCT note:-</p> <p>October 2016 First Draft Greater Manchester Spatial Framework, in its 242 pages, is silent on renewable and other energy sources: solar, shale, nuclear, wind, hydro, biomass, or even district heating in GM15 Carbon Emissions. A Second Draft is expected in 2018.</p> <p>GMSF’s 2015 Background Infrastructure and Environment section on Carbon Emissions: 16.5 In the case of wind turbines, national planning guidance directs that “a planning application should not be approved unless the proposed development site is an area identified as suitable for wind energy development in a Local or Neighbourhood Plan. Wind energy development</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV08	Further comment
						<p>will need to have been allocated clearly in a Local or Neighbourhood Plan. Maps showing the wind resource as favourable to wind turbines or similar will not be sufficient". The question for the GMSF is therefore (a) is there sufficient potential for renewable energy generation in Greater Manchester (b) should this be within the scope of the GMSF and (c) is the available evidence sufficient?</p> <p>GMSF's Background Paper Greater Manchester Spatial Energy Plan 2016 Evidence Base Study: While technical potential can be identified there are considerable challenges in getting new onshore wind projects through the planning system which is likely to be constrained by the current policy position (DCLG, 2015)** A recent series of studies carried out for GM (JBA Consulting, 2014) identified a number of potential sites for wind turbines across 6 of the districts in GM.....Across the 6 districts a total of 60MW of potential wind resource has been identified (JBA Consulting, 2014). Using the output factor from existing wind in the GM area this could provide 141GWh per year. This is 1.1 % of the total 2015 electricity consumption in GM. There are large wind sites within Greater Manchester (Scout Moor), but the electricity and carbon savings are not attributed to GM but to neighbouring counties.</p> <p>C. RCT notes from **Written Ministerial Statement on Wind Energy Development (June 2015): In applying these new considerations, suitable areas for wind energy development will need to have been allocated clearly in a Local or Neighbourhood Plan. Maps showing the wind resource as favourable to wind turbines, or similar, will not be sufficient. Whether a proposal has the backing of the affected local community is a planning judgement for the local planning authority.</p>

1785	Chris	Woods			Object	<p>I am writing in response to your Draft Local Plan Consultation. First I would like to congratulate you on the wide ranging, careful and detailed analysis in the Plan.</p> <p>I would like to confine my response to Chapter 4: Environment and in particular the moorland landscape and wind turbines.</p> <p>In the Draft Plan at Policy ENV1 you mention the need for landscaping as an integral part of the development, protecting existing landscape features and natural assets, habitat creation, providing open space, appropriate boundary treatments and enhancing the public realm. You also mention that is important that proposals do not increase the risk of flooding on the site or elsewhere, and have regard to the surface water drainage hierarchy.</p> <p>At Policy ENV2 the Plan states that applications affecting a Heritage Asset or its setting will be granted where they sustain, conserve and, where appropriate, enhance the significance, appearance, character and setting of the heritage asset itself and the surrounding historic environment. Then again at Policy ENV3 proposals which would result in the total or partial loss of a locally listed heritage asset, and which require planning permission, will only be permitted where it can be demonstrated that the benefits of the proposal clearly outweigh the harm. Then again at Policy ENV3, development proposals which would result in the total or partial loss of a locally listed heritage asset, and which require planning permission, will only be permitted where it can be demonstrated that the benefits of the proposal clearly outweigh the harm.</p> <p>At Policy ENV4 the Plan states The Council will expect development proposals to conserve and, where possible, enhance the natural and built environment, its immediate and wider environment and take opportunities for improving the distinctive qualities of the area and the way it functions and not to have an unacceptable impact on skylines and roofscapes.</p> <p>At Policy ENV5 the Plan makes clear that Rossendale contains a diverse range of national, county level and locally designated sites which need to be protected and enhanced. Then again at Policy ENV6 the need for green infrastructure is mentioned and its important role in providing habitats and migratory routes for many plants and animals, and reducing flood risk through initiatives such as Natural Flood Management.</p> <p>At Policy ENV8 with respect to wind turbine development there are large areas of the Borough including Enclosed Uplands and the High Moorland Plateau where large scale wind turbine development might be allowed to take place. Mention is made of the considerable amount of wind energy development that has taken place in Rossendale in recent years. In parts of the Borough there has been cumulative visual impact, including with adjacent schemes outside Rossendale. Different heights and designs of turbine can have discordant visual effects. Other impacts include that of noise, shadow flicker and effects on hydrology. The Written Ministerial Statement on Wind</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV08	Further comment
						<p>Energy Development (June 2015) indicates that all new Wind Energy development should have the backing of the public.</p> <p>At Policy ENV9 proposals for wind farms and individual turbines within Areas of Search shown on the Policies Map will be supported provided that:</p> <p>The scale, height and siting of the turbine(s) and all supporting information is appropriate to the area taking into account of a large list of criteria including; the topography and openness of the landscape, visual clutter, effect on land marks and land scape, on amenity, heritage assets and their setting, noise and amplitude modulation, peat and hydrogeology, recreational assets, the de-commissioning and removal of the turbines and the restoration of the site.</p> <p>The Framework and national guidance on renewable energy highlights the importance of increasing the amount of energy from renewable technologies to help make sure the UK has a secure energy supply, reduce gas emissions to slow down climate change and stimulate investment in new jobs and businesses.</p> <p>In summary, The Draft Plan emphasises the need to protect the existing landscape and Natural and Heritage Assets, to conserve and enhance the natural environment. to prevent developments that have an unacceptable impact on skylines and to do nothing that increases the flood risk.</p> <p>There are large areas of the Borough including Enclosed Uplands and the High Moorland Plateau where large scale wind turbine development might take place. Many criteria are included which have to be met before turbine development is permitted. I believe there should be no Areas of Search for wind farm development on the Rossendale Moors</p> <p>The recent Public Inquiry involving the Scout Moor Windfarm Extension addressed most of the issues discussed above and it was found that wind turbine development particularly on the moorland uplands was not compatible with those issues. Wind turbine development has an unacceptable effect on our precious landscape, the enjoyment of that amenity, natural heritage assets such as Waugh's Well and the Cotton Famine Road, peat, and hydrogeology.</p> <p>I may be mistaken but neither Waugh's Well nor the Cotton Famine Road are listed as heritage assets. Both are of local, county and National importance and should be in the Draft Plan as important heritage assets. Both would be adversely affected by wind turbine development as was demonstrated at the Scout Moor Inquiry.</p> <p>Much of Rossendale moorland is now a Site of Special Scientific Interest and is therefore protected from development as such.</p> <p>Renewable Energy is clearly important to mitigate Climate Change but with respect to wind energy the accent now is now very much on off-shore wind. The unreliability of on-shore wind makes it a terribly inefficient form of energy production. Another important advantage of off-shore wind is that there is no disruption of the blanket bog and peat of the moorlands which are essential</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV08	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	-------	-----------------

for natural carbon capture and flood prevention. It is likely that the huge quantities of concrete that go into the turbine bases together with the interlinking roads mean that the moorland cannot soak up excess rain or prevent its run-off. It is likely that the recent severe flooding in Rochdale and Ramsbottom was exacerbated by the Scout Moor Wind Farm.

Perhaps the most telling point from the Scout Moor Inquiry was that the local community did not want any more wind turbines. The Written Ministerial Statement on Wind Energy Development (June 2015) states that all new Wind Energy development should have the backing of the public.

For all of the above reasons I do not believe wind turbine development is appropriate on the precious moorland within the Rossendale Borough and should not be included in the Plan. The area has done its bit for on-shore wind development. It is time to call a halt.

1809	Alex	Rowe	Natural England		Not Applicable	<p>Policy ENV8: Wind Turbine Areas of Search</p> <p>Natural England has reviewed the Wind Turbine Areas of Search (Policy ENV8) identified in the Draft Local Plan and recommends that areas containing deep peat are avoided. Natural England generally regards deep peat as peat of 40cm or deeper. The above point specifically relates to peaty soils not priority habitats.</p> <p>The Draft Local Plan needs to address priority habitats, such as Blanket Bog. For priority habitats the NPPF paragraphs 117 and 118 that applies the mitigation hierarchy of avoidance, mitigation or as a last resort compensation is applicable in this context. No blanket bog should be included in the wind farm area of search because removing and relocating deep peat will invariably present significant habitat degradation and potential carbon release. All deep peat (40cm or deeper) is understood by Natural England to be Blanket Bog. We recommend that all Blanket Bog should be removed from the Area of Search. As there may be deep peat in the Area of Search that is currently not mapped as Blanket Bog we recommend that further investigation is carried out into the Wind Turbine Areas of Search (Policy ENV8) to determine the areas of deep peat and priority habitats for this area.</p> <p>To help provide guidance on the siting we refer your authority to the following report: Assessing Impacts of Wind Farm Development on Blanket Peatland in England Project Report and Guidance (2009) by Maslen Environmental (please see Annex 1 for further information).</p>

600	Scott	Howard	Manchester Airport		Support	<p>Thank you for consulting and inviting comments from Manchester Airport on the Rossendale Draft Local Plan. We appreciate the opportunity to respond to this consultation and our response is centred around the safeguarding of Manchester Airport. Manchester Airport is a vital component within the UK's infrastructure network, and particularly within the Greater Manchester region, serving as the global gateway for the North of England. Annual passenger throughput is currently around 27 million, with over 70 airlines operating to over 200 destinations worldwide with a wide mix of full service, charter and lowcost operators. Manchester Airport is the 3rd largest passenger airport and the 4th largest cargo airport in the UK and the only airport outside London offering a dense network of scheduled and long-haul flights. The Airport has the potential to support 45 million passengers per annum and the projected growth at Airport City North and World Logistics Hub would ensure that the Manchester Airport economic area is a leading job creation region in the North. It is estimated that the Airport directly supports over 22,000 jobs in total and has an economic footprint in the North West region of £1.7 billion in GVA. Manchester is also an important cargo airport handling over 100,000 tonnes of freight in 2015, supporting a large number of businesses across the region with their exports. We firmly believe that Rossendale is ideally placed to capitalise on this growth and fully realise the economic benefits of these developments.</p> <p>Our comments are in relation to the environmental policies, specifically, Policy EN8: Wind Turbine Areas of Search and Policy EN9: Wind Farms and Individual Turbines, which are set out within Chapter 4 of the Plan.</p> <p>Policy EN8 refers to the individual areas of search for wind turbine development that have been identified on the Policies Map. Although the Airport Company welcomes and encourages the promotion of sustainable energy proposals and fully appreciates the need to identify suitable locations for these, we take a particular interest in the siting of wind turbine developments due to the potential impact they have upon radar and aircraft operations. In particular, we fully support the inclusion of "Air traffic radar reception" as a consideration in the decision-making process within Policy ENV9.</p> <p>Wind turbines can present a danger to aircraft and air traffic control (ATC) systems – they are often large physical obstacles and their rotating blades create electromagnetic disturbance that can present false returns on radar displays, which could be mistaken for or mask genuine aircraft returns causing incorrect information to be received by air traffic controllers. Although any aviation issues would be recognised at planning application stage through consultation with the appropriate aviation consultees (DfT/ODPM Circular</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV09	Further comment
						1/2003 details the consultation that would be required with Manchester Airport), it is important to be aware of the need to protect the safe and efficient operation of aircraft and air traffic control (ATC) systems when deciding the final site allocations and development principles for wind energy schemes within the borough. Thank you again for providing Manchester Airport with the opportunity to comment on the draft version of your Local Plan. We hope that our comments have been useful and please don't hesitate to contact us if you have any questions or wish to discuss any of the issues raised in more detail.		
731	Emily	Hrycan	Historic England		Not Applicable	Policy ENV9 Wind Farms and Individual Turbines Proposals should be assessed on whether they may harm heritage assets and their setting and this cannot be determined by the proximity to the asset as stated in the Policy. Heritage assets can be harmed by development that is not within a prescribed distance and this needs to be assessed individually in accordance with the requirements of the NPPF and the Plan's Policies. The policy should be amended to ensure that it deals with all levels of harm and not just significant harm – e.g. refer to unacceptable harm.		
1520	Alan	Heyworth			Object	The conditions listed under this heading (ENV9) clearly exclude any further wind farm development in the borough. There are no sites which would not result in unacceptable intrusion on the skyline. Protection of the skyline was, for many years, a main concern of the Council. Unfortunately, turbines which contravene these conditions have already been installed. - The Inspector's report on the Rooley Moor appeal Inquiry gives explicit reasons as to why no further proposals should be entertained. It will also make it much less likely that the council will be influenced by the fear of large penalties in the case of successful appeals. - Any proposals for a wind farm in Rossendale should have to provide a detailed explanation as to why it should be permitted here but would not be entertained in other parts of the country with no greater landscape value. What is it about Rossendale that apparently makes it an easier target? - The characteristic topography and skyline of Rossendale make it particularly susceptible to unacceptable damage to the landscape by large-scale turbines.	-	
1592	Warren	Hilton	Highways England		Not Applicable	The above stated policies included within the Local Plan relate directly to wind power generation within the Borough. Construction of the wind turbines typically requires abnormal loads to use the SRN. Therefore, it is recommended that the construction management plans for such schemes takes into account the potential impact upon the SRN and adopts off-peak travel patterns to minimise any potential disruption upon the network.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV09	Further comment
1766			Peel Holdings (Land and Property) Ltd		Not Applicable	<p>7.32 In relation to the specific requirements identified in Policy ENV9:</p> <ul style="list-style-type: none"> • The criterion stating "...The perceived vertical height and horizontal expanse of the topography..." should be amended to include reference to "actual" height, as it is important that judgements are made with reference to facts. • The criterion stating "Shadow and Reflective Flicker impacts on buildings and Public Rights of Way are fully assessed with a precautionary approach taken to mitigation" should be amended to exclude reference to PROWs. It is not possible to predict when a public right of way will be used and to what intensity. Moreover, use of such rights of way is transitory in nature and thus the impact – if any – will be short-lived as people move through the area. This is in contrast to buildings where occupation can be predicted and effects will not be transitory. Government and industry guidance is clear that shadow flicker is an issue for buildings, not open landscapes (see Paragraph: 020 Reference ID: 5-020-20140306, Revision date: 06 03 2014 of the online Planning Practice Guidance). In this respect, the policy criterion is not consistent with Government and industry guidance. • The criterion stating "...The proposal would not have an unacceptable impact on the setting of a settlement..." should be deleted. Settlements do not have any statutory protection. The key issue is instead resident amenity, which is addressed by other criteria.

1790	David	Trivett			Not Applicable	<p>Policy ENV10: Other forms of Renewable Energy Generation</p> <p>It is good to see the Council are considering the energy mix for the future. The anticipated growth in demand for electricity to power the growing number of electric vehicles needs to be based on a stable supply platform.</p> <p>Wind turbines contribute but the industry has recently conceded the numbers given for reduction in CO2 have been inaccurate. Future supply stability needs a flexible approach to generation and energy storage. This mix to exclude coal but will include; Nuclear (Internationally contentious) Wind (on and offshore) with the balance for me leaning toward offshore. Gas, Solar, Biomass, Hydro, Energy from Waste. Fracking (contentious)</p> <p>Good to see the Borough Council is already using solar panels and more are appearing locally on industrial and domestic roofing. I think all new houses should be constructed with solar heating of some description.</p> <p>Gas will be necessary for some time to come and is an efficient way of generating electricity quickly as load demand fluctuates.</p> <p>Small scale Hydro Electric schemes will be a useful contribution in the future. A line of small scale turbines in the Irwell and other rivers would be a clean and sustainable generation source. There is an opportunity close to the Council offices at Futures Park where the Irwell passes under the road bridge. A deep channel with one or two turbines in place could form the basis of a generating station owned and operated by the Borough.</p> <p>With the numerous redundant quarries in the Borough there is an opportunity to create a pumped storage supply network which could help mitigate the flood risk. The large 2.7million gallon capacity storm water attenuation tank facility installed by United Utilities in Stacksteads in 2013 to reduce pollution to the river Irwell being an example of the type of structure which when connected to a moorland top quarry lake, or reservoir could be used for a pumped storage generating station. The Deerplay Mine Water Treatment facility, though used to clean the pumped mine water which polluted the Irwell, is another example of easily constructed water storage pounds which could be used as for pumped storage electricity generation. The Borough and or Lancashire could be self sufficient with electricity generation using a network of similar stations using the local hills and rivers.</p> <p>The Secretary of State for Business, Energy and Industrial Strategy, Greg Clark launched the Faraday Challenge on 24/07/17 with £246 million investment in battery technology. There are opportunities here for the future also to maintain stability of electricity supply and power vehicles. The UK has hundreds of tons of radioactive, nuclear waste in storage ponds. Scientists have already demonstrated that this material has the potential to store considerable amounts of electrically generated power.</p> <p>Hydraulic fracturing for gas should be allowed to proceed with the safeguards noted in the Draft in place.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV10	Further comment
						<p>It has already been used in the offshore wells around the UK to fully exploit reserves and is already a proven technology. Liquid natural gas, extracted using this method, is being imported from the US. We should be using our available resources efficiently to ensure continuity of strategic supply avoiding the possibility of the taps being turned off elsewhere.</p> <p>Biomass already implemented is good news and should be developed further. An Energy from waste station could be located within a large scale, redundant quarry which would be better than filling it with domestic waste. The roadways already set up for the transportation of extracted stone could enable the plant construction and waste delivery vehicles. Connection to the National Grid infrastructure would also be straightforward using the same route.</p> <p>Methane extraction boreholes into the coal seams of the redundant mines in the Borough?</p> <p>Natural Gas extraction may not be considered sustainable development but it is naturally occurring, strategic, resource that should be exploited while the country makes the transition to its clean energy goals.</p>		
1812	Philip	Carter	Environment Agency		Object	<p>Issue: The Environment Agency would have a regulatory role in relation to hydropower schemes, but this is not referenced in the policy or supporting statement.</p> <p>Impact: Those proposing hydropower schemes through the planning system may not be aware of the need to ensure that their scheme will also have to comply with several Environment Agency regulatory regimes.</p> <p>Solution: Revise the policy or supporting statement to make it clear that hydropower schemes will also need to comply with legislation governed by the Environment Agency. Developers should be advised to speak to the Environment Agency before submitting any planning application for a hydropower scheme.</p> <p>Commentary:</p> <p>To ensure that any hydropower schemes that emerge are compliant in relation to both planning and permitting regimes, it is strongly recommended that developers speak with the Environment Agency to discuss their proposals at an early stage.</p>

1766			Peel Holdings (Land and Property) Ltd		Not Applicable	7.28 Policy ENV 11 sets out various requirements in relation to flood risk, drainage and water management. It is considered that in general terms the policy is broadly appropriate. However, it is noted that the requirement for applications for minor schemes to demonstrate that SuDS solutions have been considered is not consistent with the requirements of the Framework and the related ministerial statement. It is requested that the policy be amended accordingly so that demonstration of SuDS solutions considered is only required for major development (over 10 dwellings).		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV11	Further comment
1777	Adam	Brennan	United Utilities		Support	<p>Policy ENV11: Surface Water Run-Off, Flood Risk, Sustainable Drainage and Water Quality:</p> <p>United Utilities fully supports this policy which seeks to maximise the use of permeable surfaces/areas of soft landscaping, and the use of Green Infrastructure as potential sources of storage for surface water run-off. We are pleased to see that the policy states that development should not increase on-site or off-site surface water run-off rates and, where practicable, should seek to reduce surface water run-off; and that the policy expects all proposals for major development (and minor development where appropriate) to incorporate Sustainable Drainage Systems (SuDS). However, we would wish to see the following inserted to supplement the wording in ENV11:</p> <p>“Surface water should be discharged in the following order of priority:</p> <ol style="list-style-type: none"> 1. An adequate soakaway or some other form of infiltration system. 2. An attenuated discharge to watercourse. 3. An attenuated discharge to public surface water sewer or highway drain. 4. An attenuated discharge to public combined sewer. “ <p>United Utilities fully supports the use of appropriate conditions and/or legal agreement(s) to secure the implementation of SuDS and associated management and maintenance measures.</p> <p>We also support the inclusion within the policy of the requirement for developments to be served by separate surface water and foul wastewater drainage, and that development proposals which discharge surface water runoff to foul drainage connections or combined sewers will only be supported where there is no alternative available and the proposal would not exacerbate the risk of flooding or have a harmful impact on water quality.</p> <p>United Utilities recommends that the following be inserted into Policy ENV11: “The treatment and processing of surface water is not a sustainable solution. Surface water should be managed at source and not transferred. Every option should be investigated before discharging surface water into a public sewerage network. A discharge to groundwater or watercourse may require the consent of the Environment Agency.”</p> <p>We wish to emphasise our preference that development on Greenfield sites should not discharge surface water into the public combined sewerage network and should not increase the rate of run-off into the public surface water network.</p> <p>On previously developed land, applicants should target a reduction of surface water discharge in accordance with the non-statutory technical standards for sustainable drainage produced by DEFRA (or any replacement national standards). In demonstrating a reduction in discharge, applicants should include clear evidence of existing positive connections from the site with</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV11	Further comment
						<p>associated calculations on rates of discharge as part of the application submission material.</p> <p>Policy recommendations</p> <p>As mentioned above, there may be requirements for infrastructure improvements to accommodate the proposed growth in the Draft Local Plan. United Utilities would like to recommend the insertion of the following into the plan in order to allow such infrastructure to be provided in a timely manner and to prevent delays on allocation delivery. The recommendation(s) can be amended at will to fit your boroughs specific needs/requirements.</p> <p>Policy text – “In considering development proposals, it may be necessary to co-ordinate the timescales for delivery of development with the timescales for the delivery of infrastructure. For large development sites, which may be constructed over a number of years and by various developers, it will be necessary to ensure a coordinated and rounded approach to the delivery of infrastructure, especially drainage infrastructure through the requirement for site wide strategies which establish principles to be adhered to during the construction process.”</p> <p>Explanation – “The Council encourages such proposals and other relevant policies in the Local Plan. Applicants should be aware that redevelopment proposals in these locations can place different pressure on infrastructure. It will be necessary to consider the impact of any redevelopment proposal on infrastructure as part of an application submission. It may be necessary to co-ordinate the delivery of development with the delivery/ upgrading of infrastructure”</p>

1781			Rossendale Civic Trust		Support	<p>Policy ENV11: Surface Water Run-Off, Flood Risk, Sustainable Drainage and Water Quality</p> <p>All Development proposals will be required to consider and address flood risk from all sources. Planning permission will only be granted for proposals which would not be subject to unacceptable flood risk or materially increase the risks elsewhere. This should be informed by consideration of the most up to date information on Flood Risk available from the Environment Agency, the Strategic Flood Risk Assessment (SFRA) and from the Lead Local Flood Risk Authority.</p> <p>All development proposals will be required to manage surface water as part of the development and should seek to maximise the use of permeable surfaces/areas of soft landscaping, and the use of Green Infrastructure as potential sources of storage for surface water run-off. New development should not increase on-site or off-site surface water run-off rates and, where practicable, should seek to reduce surface water run-off.</p> <p>Proposals for major development as identified by the Town and Country Planning (Development Management Procedure) (England) Order 2015 and subsequent amendments will be expected to incorporate Sustainable Drainage Systems (SuDS) which manage any surface water run-off arising from the development and minimise the risk of flooding on the development site and in the surrounding area. The proposed drainage measures should fully integrate with the design of the development and priority should be given to SuDS techniques which make a positive contribution to amenity, biodiversity and water quality as well as overall climate change mitigation. Alternatives to SuDS will only be permitted where it is demonstrated that SuDS are impractical or there are other exceptional circumstances. All SUDS schemes should incorporate clear implementation, management and maintenance arrangements.</p> <p>Proposals for minor development should also consider the incorporation of SuDS into the design of the scheme in accordance with the drainage hierarchy set out within the Framework. Any drainage proposal for minor schemes should at least demonstrate that SuDS solutions have been considered</p> <p>Development proposals which discharge surface water runoff to foul drainage connections or combined sewers will only be permitted if it has been demonstrated that:</p> <ul style="list-style-type: none"> ☐☐ Separate surface water drainage is not available and cannot be practicably provided; ☐☐ Sufficient capacity exists in the foul or combined sewer; and ☐☐ The proposal would not exacerbate the risk of flooding or result in deterioration in water quality. <p>RCT support ENV11, and note that the Council commissioned JBA Consulting to undertake a Level 1 and Level 2 Strategic Flood Risk Assessment (2016) for</p>

						<p>Rosendale8. This study looked at a large number of potential development sites in the Borough and made recommendations in relation to their potential flood risk. The Council has taken the recommendations into account when considering individual site assessments for the Local Plan. RCT note that Rosendale has many wet and well spring'd slopes, and of the long tradition of private culverts to water courses and even to public sewers, which with the private sewers transfer, we should gradually see being recorded, and possible need's to require SuDS works.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV11	Further comment
1812	Philip	Carter	Environment Agency		Object	<p>Issue: The policy states that 'planning permission will only be granted for proposals which would not be subject to unacceptable flood risk or materially increase the risks elsewhere'. This does not take account of the fact that some development types are inappropriate in flood zones and should not be permitted regardless of whether or not the risks can be managed.</p> <p>Impact: The wording of the policy does not comply with the requirements of Paragraph 100 of the NPPF and the associated Flood Risk Tables included in the Flood Risk and Coastal Change section of the NPPG</p> <p>Solution: Reword the policy to ensure that inappropriate development will not be permitted, i.e. 'planning permission will only be granted for proposals which are not classed as inappropriate in a Flood Zone, would not be subject to unacceptable flood risk or materially increase the risks elsewhere'</p> <p>Commentary: Not all development types are appropriate in a Flood Zone, even if a FRA demonstrates that the risks can be appropriately managed. The provision of a FRA will not make such developments acceptable and so the wording of the draft policy should be amended to ensure that it is clear that only development classed as appropriate can be permitted in a Flood Zone.</p> <p>Issue: Where necessary, planning applications will need to be supported by a Flood Risk Assessment (FRA) but this is not clear based on the policy or supporting statement.</p> <p>Impact: A lack of clarity over the need for a FRA could lead to planning applications being submitted contrary to the requirements of Paragraph 103 of the NPPF.</p> <p>Solution: Revise the policy and / or supporting statement to ensure that the need for a FRA to consider and assess flood risk is clear and sufficient detail is provided to ensure applicants know what they will be expected to submit with their planning application.</p> <p>Commentary: Paragraph 103 of the NPPF identifies when planning applications should be accompanied by a FRA. While we are not suggesting that Policy ENV11 should repeat this criteria, we would suggest that making reference to the need for all applications to be accompanied by a FRA in accordance with paragraph 103 of the NPPF provides more clarity and avoids any doubt.</p> <p>Issue: There is no cross-referencing between the policy and the Strategic Flood Risk Assessment (SFRA)</p> <p>Impact: Any mitigation measures identified in the SFRA to make any allocations acceptable in terms of NPPF requirements have not been identified so it is unclear whether all the proposed site allocations are NPPF compliant</p> <p>Suggested solution: Review the policy and supporting statement and revise /</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV11	Further comment
						<p>amend as necessary to ensure that any SFRA requirements can be clearly cross-referenced and secured through the application of Policy ENV11 when considering planning applications on any allocated sites with known flood risks.</p> <p>Commentary: Where site specific mitigation measures are necessary to make a development safe in planning terms, these should be specified at an appropriate point in the local plan and it logical that they would form part of Policy ENV11.</p>

Reference	ENV12	Trees and Hedgerows
-----------	-------	---------------------

1766		Peel Holdings (Land and Property) Ltd	Object	<p>7.22 Protection of trees in development proposals is the subject of ENV12. The policy sets out the requirements for justification of the loss of any trees and woodlands as part of an Arboricultural Implications Assessment to be submitted with the application. The policy further states a number of requirements (items a – e) for development proposals and sets out a requirement for compensatory planting at a ratio of 2:1, unless compensatory measures are proposed.</p> <p>7.23 It is considered that this policy is inconsistent with the Framework (para 118) which is more explicit in stating that such losses may be acceptable in planning terms where “the need for, and benefits of, the development in that location clearly outweigh the loss”. A replacement ratio of 2:1 is excessive and an unrealistic expectation for on site replacement within development proposals. No methodology for defining ‘compensatory measures’ where the 2:1 replacement can’t be met is identified, but it is anticipated that this would take the form of a financial contribution. Peel therefore requests that this requirement is removed, in favour of a more balanced, appropriate and site specific expectation.</p> <p>7.24 Furthermore, there is a lack of clarity in the policy, where it states that development proposals should “a) not result in the loss of trees or woodland which are subject to a Tree Preservation Order or which are considered worthy of protection”. The meaning of ‘worthy of protection’ is open to interpretation and should be removed from the policy. Proposals for the amendments of TPOs can be considered through the application process.</p>
------	--	---------------------------------------	--------	---

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	ENV12	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy ENV12: Trees and Hedgerows</p> <p>Development proposals must seek to avoid the loss of, and minimise the risk of harm to, existing trees, woodland, and/or hedgerows of visual or nature conservation value, including but not limited to ancient and veteran trees. Where trees and/or woodlands are to be lost as a part of development this loss must be justified as a part of an Arboricultural Implications Assessment (AIA) submitted with the application The Council will expect developers to plan for retention by using an AIA to inform site layout, in advance of the submission of any application. Where trees, woodland and/or hedgerows lie within a development site, they should wherever possible be incorporated effectively within the landscape elements of the scheme Development proposals should:</p> <ul style="list-style-type: none"> a) not result in the loss of trees or woodland which are subject to a Tree Preservation Order or which are considered worthy of protection; b) not give rise to a threat to the continued well-being of retained trees, woodlands or hedgerows; c) not involve building within the canopy or root spread of trees, woodlands, or hedgerows which are to be retained, except where it can be proven that the construction can be carried out in accordance with the most up-to-date British Standard and an appropriate method statement is fully adhered to; d) make a positive contribution to Green Infrastructure where it is within or adjacent to identified Green Infrastructure networks; and e) make a positive contribution to biodiversity. <p>To ensure that the benefits of the proposed development outweigh the harm resulting from the loss of trees, woodlands or hedgerows, compensatory planting must take place at a ratio of at least 2:1. Where this ratio cannot be achieved this must be fully justified with compensatory measures proposed clearly justified.</p> <p>Trees within a Conservation Area that are 75mm diameter or above at 1.5m above ground level, and trees protected by tree preservation orders will be given detailed consideration when considering planning consent. Any planning proposal must seek to retain these trees unless there are sound arboricultural reasons (as justified within the AIA) for their removal.</p> <p>RCT support ENV12 and note that Rossendale generally has a low level of tree coverage and the retention and protection of trees, woodland and hedgerow is critical in terms of biodiversity and also to protect the Borough's individual landscape and character. Trees and hedges also have an important role in management of climate change including urban cooling effects. Core woodland areas exist at Whitworth, Buckshaw Brow, Edenfield and the Ogden Reservoir Valley and these areas are connected by "stepping stone" habitats as identified on the Lancashire Ecological Network Maps. RCT note the legacy of Lancashire County Council and Rossendale Groundwork's often Countryside</p>

Chapter 5: Leisure and Tourism

Reference LT1 Protection of Playing Pitches, Existing Open Spaces and Sport and Recreation Facilities

155	Jo	Furtado		Support	5. LTI The statement on the value of playing pitches is very welcome ... but with one caveat. The statement that development on such pitches will only be permitted if a replacement of equal or higher standard is provided "elsewhere in the Borough" should reasonably read "within the township": a super-duper pitch coming on stream in Whitworth is not much use to a team dispossessed in Haslingden, nor vice versa, is it? Support, if the wording is changed.
-----	----	---------	--	---------	---

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	LT1	Further comment
1614	Helen	Ledger	Sports England		Not Applicable	<p>3. Policy LT1 – support for the first two bullets but the final two cause concern. The full range of this policy should be led by the research in the PPS and not a vague judgement about bigger and smaller areas, this is quite subjective. If you have a very large multisport site of 2 ha; the 3rd bullet would allow loss of a small section, maybe as much of a junior pitch, provided improvements were made to other pitches, but what if this is contrary to the PPS?</p> <p>Final bullet is OK but reference is needed to current and future needs to future proof the policy. Suggest adding red text here:</p> <ul style="list-style-type: none"> • In the case of school playing fields, the development is for education purposes or the Department for Education is satisfied that the land is no longer required for school use and its loss would not result in a shortfall in recreational open space/playing pitches for the local community now or in the future. <p>4. Mission – built sports facilities should have the same or similar protection to pitches. These are often on school sites, can bullet 4, policy LT1 be amended to take this into account? Has the council carried out any evidence gathering on built sports facilities to understand supply and demand and current and future potential deficits, similar to the PPS? Sport England recommend our methodology to study this, see: https://www.sportengland.org/facilities-planning/planning-for-sport/planning-tools-and-guidance/assessing-needs-and-opportunities-guidance/</p> <p>5. Should the council also consider allocating new land for playing fields and sports facilities? It looks like the PPS conclusions mean it is possible to remedy youth football shortages through existing stock so this may not be needed, but how will proposals for new playing field sites or artificial grass pitches be considered under this draft plan? The latter can create very controversial applications. Maybe worth considering a policy of this nature. Without any evidence on built sports facilities it is hard to say whether any sites need to be allocated. An evidence gap on this could raise soundness issues at submission stage.</p>

Reference LT2 Community Facilities

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	LT2	Further comment
33	Katie	Richardson	-		Not Applicable	There is a play park on Station Road, Healey Dell currently consisting of a few pieces of equipment (slide, swings rocker etc) it doesn't appear to be plotted on the local plan/map. - I appreciate the land may not be plotted as it doesn't fall under the 'change of use or loss' category, for which I suppose we should be grateful. However I'd like to raise that this park has been overlooked for quite some time and I'd like to hope it can be added to the future redevelopment plans for improvements. In doing this you would 'enhance quality of life' within the area for residents and the many visitors that frequent Healey Dell, parking on Station Road and walking in. It attracts lots of families as it is only 100metres from the Fairy Bridge / Waterfalls of the Dell and is close to a local convenience shop which is supported by the visitors. - I would very much like to here what the plans are for this facility in future. - Thank you -		
1781			Rossendale Civic Trust		Support	<p>Policy LT2: Community Facilities</p> <p>Development proposing the change of use or loss of any premises or land currently or last used as a community facility (including public houses, post offices, community centres, village and church halls, places of worship, children's centres, libraries, cultural facilities, theatres, parks and open spaces and health facilities) will be permitted where it can be demonstrated that:</p> <p>a) The facility no longer serves the local needs of the community in which it is located; and</p> <p>b) Adequate alternative provision has been made, or is already available, in the settlement or local area; and</p> <p>c) The use is no longer financially viable; and</p> <p>d) The facility is in an isolated location remote from public transport routes; or</p> <p>e) There is an amenity or environmental reason why the facility is no longer acceptable.</p> <p>RCT support LT2 and note that the provision and retention of community facilities is considered to be integral for ensuring that communities are sustainable in the long term. The Council will however safeguard community facilities against unnecessary loss, particularly where this would reduce the community's ability to meet its day to day needs locally, unless it is demonstrated that the facility which would be lost is no longer required or suitable or that an appropriate replacement facility would be provided. RCT note the 1974 Local Government Reorganisation legacy of spending balances and loading future generations, still retains, the over budgeted Haslingden Sports Centre, Marl Pits Swimming Pool and Sports Facilities, and Whitworth Swimming Pool. However Bacup no longer has its Leisure Centre, and it's unclear how far the facilities at Fearn's Comprehensive School were intended to be a Joint User Project by Lancs CC, as Bacup BC did not appear to provide funding. Hence East Rossendale is less well provided for.</p>

Reference		LT4		Overnight Visitor Accommodation				

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	LT4	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy LT4: Overnight Visitor Accommodation</p> <p>The Council will take a positive approach to new high quality visitor accommodation. This includes hotels, bed and breakfast establishments, self-catering facilities, bed and tack, camping barns and sites used for camping and caravanning. Proposals will be supported particularly where use is made of existing buildings.</p> <p>Proposals will be supported at locations both within and outside the urban boundary where:</p> <ul style="list-style-type: none"> ☐☐ They are appropriate to the locality; ☐☐ They are complementary to existing tourism facilities; ☐☐ There is suitable access by a variety of modes; ☐☐ The capacity of the existing infrastructure is adequate; ☐☐ There are no adverse impacts on visual amenity, landscape or nature conservation and ☐☐ The development will not reduce the amount of land for the purposes of open space and recreation. <p>All ancillary facilities should be designed (in terms of style and materials) to take into account their functions and blend into their settings, with appropriate landscaping and boundary treatments.</p> <p>Ancillary facilities such as cycle storage or horse paddocks will be encouraged in locations such as along bridleways or the cycle network.</p> <p>Any large scale hotel proposals (40 bedrooms or over) should be located in or adjacent the centres of Rawtenstall, Haslingden or Bacup. Outside these centres, large scale hotel proposals will only be supported where they form part of a wider regeneration scheme, can demonstrate a wider community benefit and access to the site can be provided by a variety of modes.</p> <p>RCT support LT4 and note A key finding of the 2017 Town Centre, Retail, Leisure and Tourism Study is that whilst the tourist economy in Rossendale is improving, the Borough is lacking in overnight accommodation, with ‘staying visitors’ accounting for just 22% of the total ‘visitor days’ recorded in the Valley in 2015 (compared to 31% at the county level). As the tourism offer improves in the Borough it expected that the number of overnight stays will increase. STEAM data from 2015 noted that Rossendale only has 268 visitor ‘beds’ distributed throughout the Borough, with no modern hotel space available. Accordingly this Report recommended that the Council should prioritise overnight accommodation and look to promote delivery of a modern ‘budget’ hotel to serve the Rossendale area. However RCT also note past unsuccessful developer’s aims for hotels in New Hall Hey, and site of demolished Accrington and Rossendale College. RCT is concerned that the notion of a “budget” hotel, as a priority, is not just looking for a use to go onto the Council/RTB’s site of the demolished Valley Centre. Could more rooms close to local pubs, restaurants and Just Eat “takaways” be as attractive for</p>

155	Jo	Furtado			Object	<p>3. Roads/traffic (TR1?)</p> <p>Page 84 of the DLP says, "Rossendale has high levels of out-commuting ... levels are particularly high to Rochdale, Bury and Burnley."</p> <p>After that there is, in the DLP, NO further mention of the congestion on the A671 south to Rochdale, despite the fact that most of the out-commuting to Rochdale either originates in Whitworth or passes through it - the focus is entirely upon escape from Rawtenstall via the M66/ELR. It is approximately 2 miles from the Rossendale boundary at Healey Corner to the centre of Rochdale, and whichever of the two roads one chooses at Healey Corner during the morning rush-hour there is significant congestion: queues back up on the A671 to within a quarter of a mile of Healey Corner routinely. Whitworth residents who must commute already make jokes about the need to leave home the night before in order to get to work on time(n the morning.</p> <p>The Infrastructure Delivery Plan correctly notes that on the section of the A681 from Toll Bar through Stacksteads there is no alternative parallel route, which can be problematic in the case of accident or roadworks.</p> <p>However, there is no mention in the IDP of the 3 sections of the A671 in Whitworth where there is no alternative route - from the top of New Line to the Halfway House at Facit; from the bottom of Coppice Drive to the northern junction with Tonacliffe Road; and from the southern end of Tonacliffe Road to Healey Corner. Just recently on the occasion ofthe unannounced demolition of Albert Mill those of us travelling the 3 miles to Rochdale were obliged to turn around and go via Bacup, Walsden and Littleborough.</p> <p>The IDP makes absolutely NO mention of Whitworth's infrastructure (road) problems. It's as if we have none; or they are considered too trivial to mention; or there may be issues, but no-one's bothered to find out; or because the regular congestion happens, on a daily basis, Monday to Friday, beyond the boundaries of Rossendale it doesn't concern Rossendale, even though it is partly Rossendale citizens who cause the congestion and Rossendale citizens who absolutely have to suffer it.</p> <p>More housing on any significant scale will only make things worse. Oppose.</p>

1437	Joanne	Finn	-		Object	<p>I would like to object to the proposed number of homes to be built in Rossendale over the next 15 years. Whilst I recognise that there are legal obligations etc placed upon the Council by the Government to provide a prescribed number of homes I don't feel that such a high number is feasible given the geography of the valley and the pressures that the area is already under particularly with regards to schools and most crucially traffic as well as the impact this will have upon the appearance of the valley. - Many of the Valley's roads are already under considerable strain, particularly as you have identified the Rawtenstall gyratory which is impacting upon people's quality of life, additional houses would compound this especially as to afford these aspirational homes most people would have to work outside the Valley. I don't feel that realistically there is anything that can be done to improve traffic congestion around Rossendale or into Manchester given the geography and financial constraints and this Plan makes the right noises as it has to do but in reality can achieve virtually nothing. Whilst there is a good bus system into Manchester, aside from the getting to the busstop lack of parking problem it only benefits those who work near the City Centre, which I'd think the majority don't, like myself, currently a stay at home Mum but I spent years commuting to Salford, Warrington and Liverpool where public transport isn't an option. Minor tinkering of traffic light timings etc or improving Siminster Island won't really make a difference, the rail link has been talked about for years but as far as I'm aware nothing tangible has or is likely to happen and park and ride will have some value for people to the west of the Valley and neighbouring areas but not much. I feel that this drive to build is ruining the enjoyment for those that live here. - -</p>		<p>I'm not sure that this is the right place to put it but I'd also like to comment on the Consultation process for this and plans etc including Lives and Landscapes .Whilst I'm sure you will comply with the legal minimum requirements Most people I spoke to didn't know about the Consultation we only found out because a neighbour knew there was a proposal for the field but didn't know the process. We've found out about things retrospectively in the past. People generally feel this is deliberate to minimise likelihood of objections. I'd expect it to be better advertised, including more often in the local paper and on the front page on your website. Even knowing of it's existence you have to hunt to find it on the website.</p>

1592	Warren	Hilton	Highways England		Not Applicable	<p>POLICY TR1: STRATEGIC TRANSPORT</p> <p>The Draft Local Plan highlights the high levels of out-commuting to the neighbouring authorities, of which a significant majority travel to Rochdale, Bury and Burnley. It also draws attention to the increasing issue on the M66 regarding peak hour congestion.</p> <p>In regard to the SRN, a significant proportion of the congestion in Rossendale is located around the gyratory and the Haslingden Tesco roundabout. The issue regarding congestion associated with the Haslingden roundabout is further exacerbated by those wishing to travel from Rawtenstall and the eastern part of the Borough in a northbound movement along the A56(T). The Local Plan states that Rossendale Borough Council will continue to work with the Local Highway Authority, Lancashire County Council, in examine ways to improve traffic flows whilst also working collaboratively with Highways England to ensure effective management of the A56(T) / M66 corridor. This approach is welcomed.</p> <p>Although a significant proportion of the Borough's residents travel to work in the neighbouring areas of Burnley, Rochdale and Bury, the suggested upgrading of the East Lancashire Railway would provide an alternative mode of transport for commuters who currently rely heavily on the A56(T) / M66 corridor for travel.</p> <p>The Council has also stated that they recognise the importance that bus services play to the area and state that a new bus station is currently being constructed at Rawtenstall and that they will continue to explore additional avenues to improve services.</p> <p>Proposals which reduce the need to travel will also be encouraged. The Policy states that the main focus will be placed upon:</p> <ul style="list-style-type: none"> ☑ Improving links to Greater Manchester; ☑ Development of East Lancashire Railway to enable commuting; ☑ Developing strategic cycle network; ☑ Addressing congestion hotspots, especially the gyratory at Rawtenstall ; ☑ Promotion of sustainable transport solutions; ☑ Integrating transport more effectively; and ☑ Ensuring that development that generates significant movement is located where need to travel is minimised and use of sustainable transport modes is maximised. 		
1764			Taylor Wimpey UK Ltd		Support	<p>Policy TR1: Strategic Transport</p> <p>2.76 Taylor Wimpey welcome the focus on developing the potential of the East Lancashire Railway for both transport and tourism purposes, as this would introduce a further sustainable transport mode into the area, and reduce the reliance on the private car for commuting purposes.</p>

1771	Mohammed	Ali Ahmed	Lancashire County Council		Not Applicable	Road Safety Figure 14 illustrates the rate of Killed and Seriously Injured (KSI) casualties and shows that Rossendale KSI indicator has been significantly worse than the England average for 2012-2014 and 2013-2015. Figure 14xiv: 1.10 Killed and Seriously Injured (KSI) on England's roads Recommendations: Future developments in Rossendale should support a reduction in the current rate of people killed or seriously injured on roads whilst also promoting active travel in a way that is safe and sustainable and it is commendable that so many policies stipulate consideration of "highway safety". We recommend further work is undertaken with Lancashire County Council's Safe and Healthy Travel team to understand Rossendale road safety data in more depth and any steps that can be taken to address this public health indicator. We recommend that new developments in or around accident hot spots should demonstrate consideration and practical measures aimed at reducing KSIs and improving general road safety. Policy TR1: Strategic Transport, could be amended to include reference to a requirement for development proposals to have no adverse impact on road safety and to also where appropriate help to address existing accident hot spots. With regard to air quality, the policy could also require that development proposals include the provision of electric charging points. Please see appendix for figures		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	TR1	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy TR1: Strategic Transport</p> <p>Opportunities to enhance the Borough’s external and internal connectivity will be actively supported. Proposals which reduce the need to travel will also be encouraged. Working closely with partners inside and outside the Borough, focus will be on the following:</p> <p>Improving links to Greater Manchester and the M60/M62;</p> <p>Developing the potential of the East Lancashire Railway for both transport and tourism purposes;</p> <p>Developing the strategic cycle network (Valley of Stone Greenway/National Cycle Route 6) including links between the different routes and to neighbouring authorities;</p> <p>Addressing congestion hotspots, especially the gyratory in Rawtenstall;</p> <p>Promoting sustainable transport solutions to address congestion and air pollution;</p> <p>Integrating transport more effectively into proposals to improve the public realm where there are opportunities to do so, for example, the area outside Bacup Library and pedestrian links between Rawtenstall Railway Station and town centre; and</p> <p>Ensuring that development that generates significant movement is located where the need to travel will be minimised and the use of sustainable transport modes can be maximised.</p> <p>A site for “Park and Ride” facilities will be protected at Ewood Bridge and is shown on the Policies map.</p> <p>RCT support TR1 and note that Traffic congestion in Rossendale is most pronounced around the gyratory in Rawtenstall but is also evident from Crawshawbooth into Rawtenstall, Haslingden Tesco roundabout, in Waterfoot and Stacksteads. A new bus station is currently being built in Rawtenstall as part of the Spinning Point development and the Council will explore other opportunities to improve bus services. However RCT sees a need to remind us all of the roles in Rossendale of GOV UK:-</p> <p>A. Rossendale in Lancashire’s Roads.</p> <p>While there is now only a heritage railway, some parts of Rossendale are well served by roads. More were to be, but as you can see from this 1965 LCC Major Road Proposals Plan, the M65 is not there, nor the use of the Haslingden Bye-pass as an A56T diversion instead of the Crawshawbooth Bye-pass.</p> <p>This left Rawtenstall with just the dual carriageway of St Mary’s Way, meeting, at “Tup Bridge”, the single carriageway Burnley Road. There are many local memories of its original Queens Square Bus Station on the site of what’s now the Fire Station.</p> <p>And there’s an abandoned section of Pedestrian Underpass, intended for a new Queens Square Bus Station; but this was, RCT believe, prevented by?</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	TR1	Further comment
						<p>Yourselves, the highway authority, or the North West Roads Construction Unit who were responsible for the design and construction of these roads?</p> <p>B. The A56T Diversion from Rawtenstall to Haslingden.</p> <p>RCT see that the 1970s abandonment of the Crawshawbooth Bye-pass, with up to 4 alternate routes, has moved the focus for new development towards the M66/A56T Corridor. What's now classed as Rossendale West: Edenfield, Helmshore, Haslingden, Acre, and Rising Bridge, has since the 1980s seen the construction of new housing estates, business parks, and retail outlets. Compare Haslingden Sykeside Tesco's Business Rates of £210/sqm with Rawtenstall Bocholt Way Tesco's £180/sqm, the X41 Transdev commercial bus service from Blackburn to Manchester via Rising Bridge, Acre, Haslingden and Helmshore with no reason to detour to a Rawtenstall Bus Station. Rawtenstall is reached by the 464 Rosso from Accrington to Rochdale. But as for "sustainable transport modes" in terms of NPPF 2012, RCT note the long walks between bus stops in Haslingden for these services – Not quite Super Stops? Not part of a "Hub and Spoke" bus route pattern. How sustainable to need to look at car park charges to help with running costs of Rawtenstall Bus Station – no grant "free money".</p> <p>C. RCT note these proofs of how Rossendale's roads were "sorted" with no local say:</p> <p>Hansard 29 March 1972</p> <p>Mr Michael Heseltine. Alternative routes for the northern end of the Edenfield-Rawtenstall by-pass to the Calder Valley fast route, details of which were announced by my hon. Friend the Minister of Local Government on 17 March, are currently being investigated. In the meanwhile work on detailed plans for the Crawshaw-booth bypass had been suspended. However minor improvements to the A56 are being considered.</p> <p>Haslingden Bye-pass Public Enquiry Inspector Philip M Vine 17 June 1976:</p> <p>75. Bearing in mind the above facts, I reach the following conclusions:-</p> <p>1 With regard to the Department's intention that the Haslingden Bye-pass shall form the outhern section of a diversion from Bent Gate to Huncoat of the existing A56 from Rawtenstall to Burnley, I am unable to reach the conclusion that such diversion is preferable to an improvement on the line, or approximate line, of the existing A56. Although the diversion of the A56 as proposed by the Department may well be the preferred solution to the undoubted inadequacy of the existing A56, insufficient evidence was tendered by the Department to justify such a conclusion.</p> <p>No evidence, or insufficient evidence was given as to:-</p> <ol style="list-style-type: none"> a) comparative costs of construction, b) comparative costs of land acquisition, c) comparative quantified travel benefits or disbenefits, d) comparative numbers of properties affected, 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	TR1	Further comment
						e) comparative environmental impact, f) comparative predicted traffic flows.		
1790	David	Trivett			Support	<p>Policy TR1: Strategic Transport</p> <p>Fortunately I no longer need to join the queues heading out of and then back home to the Valley.</p> <p>The traffic from Bacup down to Rawtenstall to access the Motorway network was always an issue necessitating an early start and late return to miss the congestion.</p> <p>Unfortunately I don't see a solution to the traffic issues on the roads in the valley.</p> <p>We are victims of the 1960's decision to move away from rail to road before sustainable development was created.</p> <p>The valley would be a completely different place if the railway connection had been left intact. Considered inefficient in 1963 but what a benefit it would be to the valley now.</p> <p>Good to see the continuing support for the East Lancashire Railway. It could be useful link in the future.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	TR1	Further comment
1820	Kelly	Holt	Lancashire County Council		Not Applicable	<p>The Highway Authority would expect the Highway Capacity Study, that is currently underway by Mott MacDonald, to provide the necessary evidence to demonstrate the cumulative impact of the sites on the highway network and highlighted any mitigation measures that are required. Many of the individual sites fall below the threshold to provide a full Transport Assessment and therefore the Highway Capacity Study will provide an important tool for the Highway Authority when assessing the smaller sites individually and the larger sites that come forward piecemeal.</p> <p>The larger development sites will be subject to a full transport assessment and Travel Plan in accordance with National and Local Policy and the evidence collected in the Highway Capacity Study . The Highway Authority will seek a detailed design to determine the impact upon the highway network and any mitigation measures will be investigated by the developer.</p> <p>The sustainability of all sites will be a key consideration for the Highway Authority and improvements to local public bus services and infrastructure will be requested where necessary. Existing Public Rights of Way must be integrated into any development and improved where necessary. Internal road layouts in accordance with the Manual for Streets will be necessary to maximise permeability onto the highway network with high quality pedestrian and cycle links to maximise sustainability.</p> <p>The site allocations plans do not provide details of potential access points onto the highway network so some assumptions have been made where connections exist or could be made within the land highlighted on the plans. The Highway Authority have provided comments on the main sites that have been of concern to local residents, as highlighted on your email during the consultation period.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	TR2	Further comment
1042	John	Lord	LANXESS Urethanes UK Ltd		Object	In the area adjacent to our property, we query the accuracy of the right of way shown on the proposals Map (shown as a yellow line) where it joins and then follows the line of the companies' access road. The Proposals Map claims this as existing PROW. We believe this to be wrong, as apart from a short stretch which runs to the south of our access road, this is not existing PROW. Our access road is used exclusively by the company, largely for heavy tanker traffic and is therefore unsuitable for pedestrians or cyclists. - - The company has been in negotiation with Lancashire County Council for some months with regard to the route of a PROW in this area (National Cycle route 6 - footpath and cycle path), and within these discussions the line shown yellow is an option proposed by LCC. The company has strongly objected to the proposed PROW passing close to its existing operational boundary and the related COMAH area, for security and health and safety reasons. We are currently awaiting a response from LCC regarding our objection. - - Notwithstanding that the majority of this proposal is not existing PROW, in light of these ongoing discussions, we believe it would be highly inappropriate to include this proposed PROW in the Local Plan, in advance of agreement between LCC and the company. -		
1764			Taylor Wimpey UK Ltd		Not Applicable	Policy TR2: Footpaths, Cycleways and Bridleways 2.77 We do not have general comments in relation to this policy, however it is relevant to the Grane Village allocation (HS2.78). This policy states that proposals to improve, extend or add to the existing footpath, cycleway and bridleway network in the Borough and in new development will be supported. National Cycle Route 6 is listed as a key route in the Borough. This policy would therefore support the development of the Grane Village site, as it will link directly to National Cycle Route 6, which runs down the eastern boundary of the site. It will also improve the existing Public Rights of Way which are currently poorly maintained and demarcated and will introduce new walking and cycling routes through the site, improving connectivity between the Cycle Route and urban area to the east, and the Grane Valley and reservoirs to the west.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	TR2	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy TR2: Footpaths, Cycleways and Bridleways</p> <p>The Council will support the development and enhancement of a strategic Public Rights of Way network including enhancements to surfacing, signage and feeder routes. Key routes are shown on the Policies Map and include: The “Valley of Stone Greenway” (Rawtenstall to Rochdale)</p> <p>National Cycle Route 6 (Bury-Accrington)</p> <p>Rawtenstall to Clowbridge Reservoir</p> <p>Pennine Bridleway (Mary Townley Loop)</p> <p>Irwell Sculpture Trail/ Rossendale Way.</p> <p>Proposals to improve, extend or add to the existing footpath, cycleway and bridleway network in the Borough and in new development will be supported providing they:</p> <ul style="list-style-type: none"> a) Are integrated with existing routes to facilitate access on foot, by bicycle and by horse; b) Where appropriate, identify gaps in the existing network and map potential new link routes, particularly in areas where there is a high level of demand; c) Facilitate access to the network of footpaths, bridleways and cycleways by requiring new development adjacent to existing pedestrian, bridleway or cycle routes to provide direct, safe and secure links to these routes where possible. d) Do not harm residential amenities; e) Do not harm nature conservation interests; f) Take into account the needs of agriculture; g) Are located and designed to minimise the risk of crime; h) Have regard to the needs of people with impaired mobility; and i) Have regard to other users of the route and vehicular traffic. j) The development would not reduce, sever or adversely affect the use, amenity or safety of a Public Right of Way (PROW), or prejudice the planned development of the network, if acceptable provision is made to mitigate those effects, or divert or replace the right of way before the development commences. Any replacement or diverted PROW must be no less convenient or safe, and of no lower quality than the facility being replaced; Where developments are directly related to the Public Rights of Way network contributions may be sought for their enhancement. <p>RCT support TR2 where Although Rossendale has the densest public rights of way network in Lancashire, much of the network is in a poor condition and there is an identified need to develop, extend, upgrade and improve access to the network. However RCT see need to note the legacy of Lancashire County Council, and Rossendale Groundwork’s creation of many new pedestrian, cycle and horse riding routes, such as Alan Fishwick Way, Lench Valley Cycleway, Cloughfold Greenway, often from “free money” grants from Countryside Commission, and which are not part of the LCC network, and</p>

467	Colin	Francis			Not Applicable	Now that the government has announced only electric cars can be purchased from 2040 how are we going to charge them My house is situated directly on the main road (no off road parking) After a conversation with a spokes person from Rossendale borough council I have been told I must not trail a charging cable across the pavement How can I charge my car?			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	TR4	Further comment
1764			Taylor Wimpey UK Ltd		Object	<p>Policy TR4: Parking</p> <p>2.78 This policy requires compliance with the parking standards set out in Appendix 1. However, Appendix 1 sets out maximum standards (with some exceptions) which are no longer supported by government policy following the written ministerial statement, entitled 'Planning Update March 2015', which states that: "Local planning authorities should only impose local parking standards for residential and nonresidential development where there is clear and compelling justification that it is necessary to manage their local road network."</p> <p>2.79 Therefore, unless such justification is provided it is recommended that the maximum standards provided in Appendix 1 should be deleted.</p>		
1766			Peel Holdings (Land and Property) Ltd		Not Applicable	<p>Parking</p> <p>7.33 Policy TR4 requires all proposals for new development to meet the parking standards, included at Appendix 1 of the DLP, unless an evidence based approach for alternative provision is presented.</p> <p>7.34 The flexibility included in the wording of the policy is welcomed. However, it is considered that the inclusion of parking standards as 'maximum' in the DLP does not adequately reflect the Framework or the ministerial statement abolishing national maximum parking standards⁵⁷. The ministerial statement states that 'Local planning authorities should only impose local parking standards for residential and non-residential development where there is clear and compelling justification that it is necessary to manage their local road network', alongside the Framework requirement for a contextual approach when setting local parking standards (NPPF, para 39).</p> <p>7.35 It is therefore requested that the parking standards are revised to allow for a site specific approach to determining parking levels for new development.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	TR4	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy TR4: Parking</p> <p>All proposals for new development will be required to meet the parking standards set out within Appendix 1 unless the applicant can provide an evidence based approach as to why a different level of provision would be appropriate, to the satisfaction of the Local Highway Authority.</p> <p>Where parking is being provided to serve new development or to address specific local parking problems in existing residential and business areas, the Council will expect the parking provision to:</p> <ul style="list-style-type: none"> Be conveniently located in relation to the development it serves; Be safe, secure and benefit from natural surveillance; Be designed to ensure that the use of the parking provision would not prejudice the safe and effective operation of the highway network; Not dominate the street scene or detract from the character of the area; Incorporate secure, covered cycle parking in line with the Parking Standards set out in the Local Plan unless otherwise agreed; Incorporate charging points for electric vehicles where the Council considers it appropriate to do so; and <p>Where appropriate, incorporate adequate soft landscaping and permeable surfaces to avoid the over-dominance of parking and to limit surface water run-off.</p> <p>Proposals to redevelop existing garage colonies will only be supported where: It has been demonstrated to the satisfaction of the Council that the garage colony is vacant or underused and there is unlikely to be any future demand for the facility; and</p> <p>The redevelopment of the site would not result in a significant increase in on-street parking which would have an adverse impact on the street scene or on highway safety.</p> <p>RCT support TR4 and note that Residential Garages will not be counted towards parking provision figures unless suitable evidence is provided. A creative approach should be taken to residential parking design building in principles in “Manual for Streets” (2007) to ensure that layouts are not car dominated. However this needs to state – unless at least 3 metres internal width. Gradients of parking spaces in many developments are irresponsibly too steep, and where located running down to key access roads, such as Hollins Way; the Council should be prepared to accept their past actions by providing grants to remodel, closer to level, such private parking areas</p> <p>Rossendale Civic Trust support TR4’s retention of Core Strategy parking standards, but note some inequalities in Rossendale’s Public Car Parking, and, see below, have specific objections to present policies affecting Bacup. Areas and Numbers. - 2 February 2013</p> <p>Core Strategy Parking Standards for A1 Retail with accessibility reductions: Food: 1 Space / 15 - 22sqm</p>

74	Edmund	Dixon	-	Rossendale Infrastructure Delivery July 2017	Object	1 RAIL INFRASTRUCTURE - The Infrastructure Delivery paper cites the Jacobs Study which indicated that a functional rail link for Rawtenstall would cost £50m and need a subsidy of £500,000 pa. I have read in the local free press that a rail link could be opened on existing tracks to an interchange with the Bury metro just south of Bury. This could give a faster journey time to Manchester than via Heywood, at a cost of ca £10m. - - If a levy on 4000 new homes at £1000 per home were made, this would deliver nearly half the money, and perhaps the MP responsible for the northern 'Powerhouse' could prevail upon the Minister for Transport to raise matched funding. - - 2 ROAD ACCESS - The Infrastructure study notes that performance of the M66/A56 is forecast to continue to deteriorate over the Plan period. - I do not understand how you can plan for 4000 more homes without specific SMART (timed, measurable) objectives for improving flows on this strategic transport corridor.		POLITICS: both main parties have recently campaigned to 'Keep Rossendale Green.' If you have any integrity you will ensure that Dobbin Wood remains green and is not built on, in accordance with the original CPO (1983) 'for the purposes of preserving or enhancing the beauty' of this key local asset. - - METHODOLOGY: over 10% of homes in my road (BB4 7PD) appear to have been unoccupied for the last 5 years. The local plan should factor in the number of vacant homes and bring these into use before desecrating irreplaceable areas of woodland within the urban boundary. - - HOLISTIC PLANNING: the Council and local MP need to prevail upon the government to develop a holistic approach to planning, delegated to local level which respects our topography and local housing needs, not imposed national targets, and maintains police stations, health and education infrastructure and museums of national significance if the local economy is to be developed; or, if austerity is to be imposed, plan on building fewer houses and accept that the local population will shrink. -

481	John	Atherton		SHMA	Not Applicable	<p>Sorry, we are late getting back to you from the Open Day – we said we would write to you regarding the Strategic Housing Market Area (SHMA) and the affordability of housing in Rossendale:–</p> <p>We mentioned to you (at the Evidence Base Open Day) details of a report by the Overview and Scrutiny Committee (7 sept' 2015) about Greenvale homes and the housing register not being kept up to date – there were 1567 applicants on the housing register but 923 of these applicants are not making any bids for properties. The reason we mentioned this was because we do not think that the report by the Overview & Scrutiny Committee was considered in the SHMA - the report showed good evidence of some of the practices used by Greenvale Homes in managing the housing stock of social housing in Rossendale, including the number of re-lets.</p> <p>Another issue we would like to mention is that in the executive summary of the SHMA – it refers to building more aspirational housing to stop the high net out migration of people to surrounding districts, which the Planning Department has mentioned in the new Local Plan - but the SHMA does not supply any evidence that building more 4/5 bedroomed detached housing would stop people moving out of the area? (it seems wrong to assume without evidence, that people are moving out of the areas because there is not enough aspirational housing – there could be many reasons e.g.: road congestion getting worse, moving nearer workplace, children finishing education, aging population downsizing home etc.)</p> <p>Also, pages 60-61 of the SHMA shows evidence of a net in migration of people into Rossendale – it's a bit confusing.</p> <p>On the issue of affordability of housing in Rossendale, the SHMA report (table 4.9) says that 82% of newly forming households in Rossendale cannot afford to buy lower quartile priced property and that 72% of all households cannot afford to buy lower quartile priced property. To say that 72% of all households cannot afford to buy a property seems hard to understand. Using even the simplest scenario of calculating affordability of housing, using the lowest quartile property and using the legal minimum and living wage rates, show that a dual household in full time employment can easily afford to buy and rent this type of a property.</p> <p>Two people coming together to buy or rent a house today is the norm – example: Two people, both are 25 years old and working in Rossendale, meet, fall in love, and decide to buy a home together. Both people are working full time and earn the living wage (£7.50 per hr) - what housing would be affordable? and using the same scenario but these two people are between 19 and 24 years old, earning the minimum wage (£7.05 per hr) . These scenarios could be two friends, siblings, extended family members etc. buying or renting property together.</p> <p>The table below shows the details of this simple scenario, by using the lowest</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
						<p>structure for newly forming households - because the minimum wage is the minimum wage – there is no lower wage.</p> <p>We hope that you will consider our points, we think this information is important and could help in deciding the correct number of affordable houses to be built in Rossendale.</p> <p>Hope to hear from you and please do not hesitate to contact us if you have any queries.</p>

731	Emily	Hrycan	Historic England	Infrastructure Delivery Plan	Not Applicable	<p>Consultation Rossendale Infrastructure Delivery Plan (IDP) July 2017</p> <p>Historic England is the Government's statutory adviser on all matters relating to the historic environment in England. We are a non-departmental public body established under the National Heritage Act 1983 and sponsored by the Department for Culture, Media and Sport (DCMS). We champion and protect England's historic places, providing expert advice to local planning authorities, developers, owners and communities to help ensure our historic environment is properly understood, enjoyed and cared for.</p> <p>Thank you for consulting Historic England on the above, this letter details the expectations of the Infrastructure Development Plan (IDP) and the historic environment.</p> <p>The preparation of an Infrastructure Delivery Plan in support of the Local Plan provides an opportunity to acknowledge and respond to the many opportunities that exist to help secure the conservation and enhancement of the area's historic environment.</p> <p>Evidence Base</p> <p>Throughout the plan-making process, it is important that the Council produces a draft Local Plan that it is fully informed by an adequate, up-to-date and relevant evidence base for the historic environment. This is important to ensure the appropriate consideration of infrastructure at both a strategic and local authority-wide level, as well as for individual sites and for specific localities and 'area-based' plans. This will ensure that the Council has a better understanding of the demands that new development may place on the areas in which it takes place and the potential implications and opportunities this may have for the historic environment.</p> <p>A Positive Strategy for the Historic Environment</p> <p>Many infrastructure projects may be associated with the repair and maintenance of heritage assets and it is now well established that heritage is not an adjunct to a healthy economy, but an important component of growth and a source of employment.</p> <p>Infrastructure is typically grouped according to three main categories covering physical, green and social (and community) infrastructure. Each of these categories can and should be broadly interpreted to include opportunities for the sustainable management of the area's historic environment and its heritage assets. It is important that as part of the Local Plan, that it contributes towards delivering a positive strategy for the conservation, enhancement and enjoyment of the historic environment as outlined in the NPPF (National Planning Policy Framework) (NPPF).</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
						<p>Infrastructure</p> <p>The NPPF endorses the protection and enhancement of the historic environment as an integral part of sustainable development (paragraphs 7 and 9) and recognises the wider social, cultural, economic and environmental benefits it can bring (paragraph 126). The IDP should ensure that it is clear on the range of ways in which the historic environment can contribute to and benefit from the infrastructure and investment needs required to create and maintain sustainable communities.</p> <p>Physical Infrastructure</p> <p>Heritage assets can help to deliver a range of infrastructure needs associated with, for example, housing, economic development and sustainable transport networks. Historic buildings within or in the vicinity of a settlement may offer opportunities for residential reuse, including for affordable housing. Many heritage assets are economic assets in their own right, supporting not just the tourism sector but the broader regeneration and economic growth of the area. For example, the adaptive reuse and repair of historic buildings may offer opportunities for business or employment use in both urban and rural contexts (see: Constructive Conservation – Sustainable Growth for Historic Places and The reuse and conversion of historic farm buildings on the Historic England website https://historicengland.org.uk/advice/constructive-conservation/sustainable-growth-for-historic-places/).</p> <p>More generally the investment in heritage assets (e.g. heritage at risk), and the wider historic character of a place (e.g. conservation areas at risk) may also serve to strengthen and reinforce the attractiveness of a place to retain and attract economic development and to stimulate and support the area's tourism offer. Investment could be directed to establishing or extending area-based schemes aimed at regenerating valued historic townscapes, as exemplified by Townscape Heritage Initiatives supported by the HLF and Historic England's current programme of partnership working. Specific opportunities may also exist to further develop the tourism offer of established heritage assets open to the public (such as those managed by the National Trust or English Heritage) and their links to nearby communities. Historic England also has a number of other publications that illustrate other practical examples of where the protection and adaptation of historic places through active management (constructive conservation) can deliver social and economic benefits, this includes Valuing Places: Good Practice in Conservation Areas (https://historicengland.org.uk/images-books/publications/valuing-places/) and Constructive Conservation In Practice (https://historicengland.org.uk/imagesbooks/publications/constructive-conservation-in-practice/).</p> <p>Improvements to the public realm in town and village centres can help encourage walking and cycling and support the delivery of sustainable</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
						<p>transport objectives. Investment in the public realm can also support the delivery of the objectives for the historic environment through helping to deliver conservation area management plans and tackling issues related to heritage at risk. Improvements could include promoting community based de-cluttering audits and the better coordination of signage and street furniture. Improvements in the overall quality, character and indeed functioning of areas can also contribute to wider policy aims linked to tourism, the economy and the built environment.</p> <p>In certain cases direct investment in a heritage asset might be required to support the development of an area - for example, investment in the improvement and or maintenance of an historic bridge where it is part of the transport infrastructure for the planned development. In this regard, the local authority should give consideration to any historic assets, particularly those identified as at risk, which could be targeted for investment for their repair and appropriate reuse in support of the economy. The IDP should also recognise the historic value of green infrastructure and it should ensure that it has considered areas of the public realm which could be highlighted for future investment, especially where the local area is likely to receive future development and increased use and pressure.</p> <p>Social and Community Infrastructure</p> <p>Historic buildings, including places of worship, can accommodate many social and community services and activities as well as represent a focus for the community in their own right. Investment in their continued or improved maintenance would help extend the capacity of existing infrastructure. Promoting the adaptive reuse of a vacant or underused building or facilitating the multiple-use of existing buildings for a wider range of community services might also offer the opportunity to support the repair and maintenance of historic buildings, particularly where identified nationally or locally as being at risk.</p> <p>The community transfer of assets may also be an option for delivering infrastructure and the sustainable management of heritage assets. Guidance and case studies for local authorities, public sector bodies and community groups on the transfer of ownership and the management of historic buildings, monuments or landscapes is available on the Historic England website including Pillars of the Community: The Transfer of Local Authority Heritage Assets (https://historicengland.org.uk/images-books/publications/pillars-of-thecomunity/). In supporting access to green space and encouraging walking and cycling, extensions to the public rights of way network can help increase access to heritage assets and their improved interpretation and enjoyment. The provision of open space might also be linked to improving public access to historic landscapes in the vicinity.</p> <p>Social and community infrastructure may also include cultural facilities such as</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
						<p>local museums. Investment may offer opportunities to widen and improve their use by existing and new communities as well as supporting the tourism economy. The IDP should identify historic buildings that are capable of delivering social and community based services and facilities which are in need of investment for their repair and or future maintenance.</p> <p>Green Infrastructure</p> <p>The historic environment and heritage assets can make a valuable contribution to the green infrastructure network and its wider functions; providing, for example, leisure and recreation opportunities, encouraging walking and cycling and strengthening local character and sense of place. Historic parks & gardens, archaeological sites, the grounds of historic buildings and green spaces within conservation areas can all form part of a green infrastructure network, as well as underpin the character and distinctiveness of an area and its sense of place. Other heritage assets can also offer a range of opportunities such as churchyards and the wider countryside including networks of 'green-lanes', common land and historic parkland.</p> <p>Funding</p> <p>In the context of the Community Infrastructure Levy, a wide definition of infrastructure continues to be promoted in terms of what can be funded by the levy and is needed for supporting the development of an area. This can include:</p> <ul style="list-style-type: none"> · Open space: as well as parks and green spaces and green infrastructure networks, this might also include wider public realm improvements encompassing historic areas and townscapes possibly linked to a Heritage Lottery Fund scheme and drawing on relevant conservation area appraisals, management plans and characterisation studies; · Repairs and improvements to, and the maintenance of, heritage assets where they are an infrastructure item as identified by the 2008 Act, such as educational or sporting or recreational facilities which may be hosted in an historic building or area; · Maintenance and ongoing costs which may be relevant for a range of heritage assets, for example transport infrastructure such as historic bridges; and · 'In kind' payments, including land transfers which could include the transfer of an 'at risk' building to a new owner as part of a comprehensive regeneration scheme. <p>Development-specific planning obligations continue to offer further opportunities for funding improvements to, and the mitigation of, adverse impacts on the historic environment, such as archaeological investigations, access and interpretation, and the repair and reuse of buildings and other heritage assets.</p> <p>Historic England urges the local authority to ensure that the IDP gives</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
						appropriate consideration to the full range of funding opportunities, including the Community Infrastructure Levy (CIL), which can serve to support the implementation of a positive strategy for the conservation, enhancement and enjoyment of the area's historic environment and its heritage assets.		
731	Emily	Hrycan	Historic England	Sustainability Appraisal	Not Applicable	<p>Sustainability Appraisal of the Rossendale Local Plan - Reasonable Alternatives</p> <p>Historic England is the Government's statutory adviser on all matters relating to the historic environment in England. We are a non-departmental public body established under the National Heritage Act 1983 and sponsored by the Department for Culture, Media and Sport (DCMS). We champion and protect England's historic places, providing expert advice to local planning authorities, developers, owners and communities to help ensure our historic environment is properly understood, enjoyed and cared for.</p> <p>Historic England has produced a document, which you might find helpful in providing guidance on the effective assessment of the historic environment in Strategic Environmental Assessments. This can be found at https://www.historicengland.org.uk/images-books/publications/sustainabilityappraisal-and-strategic-environmental-assessment-advice-note-8/.</p> <p>In light of Historic England's response to the Local Plan consultation and our recommendations, Historic England will not be responding on the Sustainability Appraisal at this stage.</p>		
1002	David	Morris	-	5 Year Housing Supply	Object	<p>Under current the draft DCLG - Standardised Methodology - the calculation of housing numbers will change - leading to a reduction in the amount of housing needed in the borough. - From a current OAN of 265 dwellings per annum; the figure will be 212 on the proposed formulae. - This reduces the overage need from 2650 to 2120 over the plan period - a change of 530 dwellings. - - This reduction should be on the proposed greenbelt release sites. -</p>

1592	Warren	Hilton	Highways England	Infrastructure Delivery Plan	Not Applicable	<p>INTRODUCTION</p> <p>The Rossendale Infrastructure Delivery Plan has been published alongside the Draft Local Plan, as part of the evidence base required by NPPF.</p> <p>In terms of the delivery of new highway infrastructure within the borough, the introductory chapter highlights the challenges that this brings:</p> <p>“the physical constraints of Rossendale mean that delivery of infrastructure can be significantly affected by the topography of the area. Flat or easy to develop land is at a premium. High levels of flood risk are a feature of the area. Because of the highly urbanised nature of the Borough it is challenging to introduce new infrastructure, such as bypasses or new roads without adversely affecting what is already built.”</p> <p>3.2 TRANSPORT INFRASTRUCTURE</p> <p>The Transport section of the IDP refers to Lancashire County Council’s East Lancashire Transport Masterplan, prepared by Jacobs and published in December 2016. It states that this Study recommended that the following options should be progressed:</p> <p>Figure 3-1 - East Lancashire Transport Masterplan Options</p> <p>In terms of junction improvements on the A56, as stated in the IDP, Highways England recently completed a scheme to introduce traffic signals to control each arm of the A56 roundabout at Rising Bridge (A56 junction with A680). To clarify the position of Highways England in regard to the upgrading of the M66 to SMART motorway, the identification and prioritisation of improvements such as this fall within the scope of preparations for the second Roads Investment Strategy (RIS2). Following a period of public consultation during winter 2017/18, DfT and Highways England will each develop outline proposals for RIS2 during 2018, which will then be subject to an efficiency review by the Office of Rail and Road (ORR). Taking ORR’s advice on board, an agreed RIS2 will then be published in 2019. At that point, it will be known which major improvements such as this are likely to be funded during the period 2020-25. At this stage, the content of RIS3 (2025-30) isn’t known, with evidence-gathering preparations beginning for this from 2022 onwards.</p> <p>The IDP states that Highways England would be likely to resist the construction of new accesses onto its network in Rossendale in line with DfT Policy Circular 02/2013 ‘The Strategic Road Network and the Delivery of Sustainable Development’, because the scale of development would not be classified as strategic development in national terms. This statement is correct, in that the Circular sets out a presumption against new accesses and junctions being created on high-speed routes such as the A56(T), except at the plan-making stage where it can be demonstrated that it would facilitate ‘strategic, planned growth’. It is Highways England’s view that the scale and of these proposed allocated sites would not meet the criteria of being ‘strategic’ in the context of the Policy Circular / Highways England Licence. It is</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
						<p>recommended that careful consideration is given to the access arrangements for all of the allocated sites and that Highways England is kept informed of this. The IDP refers to the geotechnical issues with the A56 embankment in Edenfield that would need to be addressed in any adjacent development proposals. This issue is discussed in this review under the Edenfield Policy of the Drat Local Plan.</p> <p>The IDP states that the Highway Authority is working with the Borough Council and Highways England to assess key transport issues within the Borough including modelling improvements at key locations. It states that the scope of the Study has yet to be finalised but will form a key component in the development of the Plan, with the following junctions identified by Highways England:</p> <ul style="list-style-type: none"> ☐ Rising Bridge ☐ Todd Hall Road access (only if this left-in/left-out access to the northbound carriageway forms a route into the wider employment allocations E04 / E03) ☐ Grane Road (probably a lower priority; most influenced by the housing site on the corner of Grane Rd and Holcombe Rd) ☐ Haslingden Interchange / Tesco roundabout. ☐ A683 Rawtenstall Spurr roundabouts (in terms of queues back from the roundabouts and onto the A56). ☐ A56 / M66 'Junction 0' at Edenfield <p>Whilst the above statement acknowledges the fact that a transport study is required and will form a key component in the development of the Plan, as stated elsewhere in this review, it is now essential that this highways evidence base is produced as soon as possible, to enable Highways England to come to a view on the traffic impact of the Local Plan proposals on the SRN and thereby provide a full response to the consultation. Without it, there may be delays to future stages of the plan-making process. The production of an appropriate highways evidence base will also be used to inform future iterations of the IDP, which is a live document and can therefore be subject to revisions throughout the course of the Local Plan period.</p> <p>Please see appendix for figure 3.1</p>

1766			Peel Holdings (Land and Property) Ltd	Infrastructure Delivery Plan	Not Applicable	<p>Infrastructure Delivery Plan</p> <p>5.31 The DLP is accompanied by an Infrastructure Delivery Plan (IDP). This notes that the Borough's infrastructure will be the subject of investment on a case-by-case basis as new development comes on stream. The purpose of the IDP is to identify the infrastructure which may be required. The IDP notes that this may provide a "...baseline for any contribution requests if the Council decides to pursue the Community Infrastructure Levy (CIL)...". The content and potential implications of the IDP is discussed below.</p> <p>Infrastructure requirements</p> <p>5.32 The IDP is relatively high level and will be further developed as the emerging Local Plan is progressed. However, it is clear that a significant proportion of infrastructure identified within it is strategic in nature and that there is already a need for it. Peel agrees that new development must contribute to infrastructure provision. There are clear legal and policy parameters for how this can be achieved. Contributions must be proportionate to the scale and nature of the development proposed. It is unrealistic to expect that developments can fund new infrastructure without public sector investment where that infrastructure is strategic in nature and relates to existing capacity issues. The NPPF establishes clear tests in this regard; developer contributions must be "...fairly and reasonably related in scale and kind to the development...". This test is enshrined within legislation. If the scale of the contributions which are sought for new infrastructure are not proportionate, it will undermine the viability of development.</p> <p>5.33 The immediate priority must be to assemble a robust and comprehensive IDP. This should include engagement with Government and infrastructure providers regarding the investment needed to secure growth in the Borough. This should include exploring options for public sector investment in strategic new infrastructure. Peel would welcome discussions with RBC in respect of this matter. This will inform the continued preparation of the IDP and determine the scale of obligations which may be required, having regard to development viability and relevant statutory and policy tests.</p> <p>Community Infrastructure Levy</p> <p>5.34 The introduction of CIL has the potential to raise questions and uncertainty for landowners and developers, which could deter investment. It is Peel's view that CIL may not form the most suitable vehicle for delivering the infrastructure required in the Borough.</p> <p>5.35 RBC will no doubt be aware that a national review of CIL has been undertaken on behalf of the Government. It has concluded that the current system for developer contributions is not as fast, simple, certain or transparent as intended. It therefore recommends the implementation of a new system which will bring back the use of Section 106 Agreements as the primary basis for delivering infrastructure to support development sites,</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
						<p>particularly where they are strategic in nature. The Housing White Paper confirms that the Government is considering those recommendations and will announce its decision on how to proceed alongside the Autumn Budget. This renders the future of CIL somewhat uncertain.</p> <p>5.36 It is important that the process and mechanism(s) for infrastructure delivery are progressed before the emerging Local Plan is progressed to the next stage.</p>		
1766			Peel Holdings (Land and Property) Ltd	Development viability	Not Applicable	<p>Development viability</p> <p>5.37 Peel provides comments on the viability evidence published alongside the DLP in a standalone representation which is included at Appendix 1 of this report.</p> <p>Please see appendix</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
1766			Peel Holdings (Land and Property) Ltd	The Green Belt Assessment	Not Applicable	<p>The Green Belt Assessment</p> <p>5.26 The preparation of the DLP and, in particular, the identification of proposed development allocations has been informed by the Green Belt Review⁴⁸ (GBR). It considers the contribution that specific parcels of land make to the purposes of the Green Belt and the potential degree of harm which might result from the development of that land. Peel notes, however, that the parcels of land which are considered in the GBA in many cases do not relate to the sites which were submitted for consideration via the “call for sites” process or the sites which have been selected for release by the DLP. As such, the findings of the GBR are not directly related to the potential development land available to meet the housing needs of the Borough.</p> <p>5.27 For example, land parcel ref. 25 in the GBR equates to a swathe of land south of Rawtenstall and north of Edenfield (see Figure 5.1 below). Peel has promoted the release of a small area of land to the north of that wider parcel (the merits of this site are discussed in detail in chapter 6). Given its relative size and attributes, that small area makes a much less significant contribution to the Green Belt purposes than the wider land parcel assessed by the GBR. It is therefore considered that the findings of the GBR should be revisited to consider the merits of potential development sites rather than wider parcels of land which are more strategic in nature.</p> <p>5.28 Notwithstanding the above, the methodology of the GBR in assessing specific parcels of land is considered to be broadly appropriate. It is, however, noted that in relation to the second purpose of Green Belt, the GBR considers both the extent to which a parcel maintains the separation of settlements which are physically separate and the role it plays in preventing further coalescence of settlements (or parts of the urban area) which have already merged to varying degrees. Peel does not agree with this approach.</p> <p>5.29 The NPPF clearly identifies that the purpose of Green Belt in this regard is to “...prevent neighbouring towns from merging into one another...”⁴⁹. If two towns have already merged then the Green Belt cannot prevent them from merging, because it has already occurred. This is the case across various parts of Rossendale, in which many formerly separate settlements and communities have merged over time to form a single contiguous urban area. It is important that merging of settlements is seen in this context. It is acknowledged that Green Belt land can play a role in preventing further merging between settlements which have already coalesced. However, in such cases the contribution that the land makes to the ‘merging’ purpose cannot be considered “strong” because it can only prevent further merging and cannot maintain their physical separation. Land can only make a “strong” contribution to this Green Belt purpose where settlements are physically separate.</p> <p>5.30 As such, the GBR has insufficient regard to the nature of the form of the</p>

----	-----------	---------	--------------	-----------------	-----------	---------	-------------	-----------------

urban area in Rossendale in considering the role of the Green Belt around the settlements. It should be amended in this regard to make clear how land that is between areas of the conurbation – rather than between separate settlements – has been assessed.

1781			Rossendale Civic Trust	Infrastructure Delivery Plan	Not Applicable	<p>Infrastructure Issues: RCT note areas, see in bold, where present capacity ought to affect where and when development should take place.</p> <p>A. Education</p> <p>Current data provided by Lancashire County Council School Planning Team indicate that there is a projected shortfall of primary school places across the Rawtenstall and Ramsbottom areas within the next 5 years of the local plan. Secondary schools currently show a surplus across the district, Fearn is the main High School with available space. Currently LCC have indicated they are not actively looking for additional secondary schools sites and continue to monitor the housing to be brought forward to understand the impact across secondary schools in Rossendale.</p> <p>B. Transport</p> <p>The Highway Authority is working with the Borough Council and Highways England to assess key transport issues within the Borough including modelling improvements at key locations.</p> <p>The valley nature of the Borough and the high degree of urbanisation along main roads means that there is little option for widening or making junction improvements to the existing network. Significant congestion occurs in the peak periods around Rawtenstall especially on the Gyrotory which is expected to reach capacity by 2023; at the bottom end of Bank Street and at Tup Bridge junction. Waterfoot roundabout and Toll Barr, Stacksteads are also sites of significant congestion.</p> <p>There is currently no proposal for upgrading the M66 to a Smart Motorway and this would need to be considered for funding as part of next Roads Investment Strategy (RIS) which covers the period 2020-2025. However the route is one of those being looked at in the Transport for the North (TFN) Central Strategic Corridor Study which will feed into the overall TfN Strategic Plan due to be published in the summer of 2018.</p> <p>Highways England would be likely to resist the construction of new accesses onto its network in Rossendale in line with Circular DfT Policy Circular 02/2013 'The Strategic Road Network and the Delivery of Sustainable Development'. This is because the scale of development would not be classified as strategic development in national terms. Some existing junctions onto the A56, such as at Carrs Industrial estate, are substandard.</p> <p>There are geotechnical issues with the A56 embankment in Edenfield that would need to be addressed in any adjacent development proposals.</p> <p>C. Utilities</p> <p>Water and sewerage United Utilities has identified no in principle concerns regarding the proposed development.....may be necessary to coordinate the delivery of development with infrastructure improvements through planning condition. It is also important to note that not all development comes forward on allocated sites and therefore the cumulative impact of development can be</p>

						<p>different in reality as a result of windfall sites.</p> <p>Electricity Specific development proposals within the Rossendale area are unlikely to have a significant direct effect upon National Grid's electricity transmission infrastructure. The local electricity supply network is operated by Electricity North West. The network is generally performing adequately but there are a number of substations which are operating at capacity, e.g in Edenfield and which will require enhancement before more major development can be accommodated.</p> <p>D. Health At the projected rate of population increase (assuming an equal distribution of growth) all the GP practices would be full in the first five years of the Plan. In practice the distribution of growth is likely to put the greatest pressure of growth on Bacup and Rawtenstall. The capacity of GP practices outside the area, e.g., in Ramsbottom were the proposed growth of Edenfield to progress, would also be a factor.</p> <p>As with much of the country Rossendale faces the challenge of an ageing population. Lancashire County Council plays a major role in delivering adult social care alongside the CCG. Delivery of this function is facing financial pressures with the potential to affect both the provision of new facilities and the quality of care.</p> <p>E. Emergency services There are no current plans to alter facilities but there is a recognised need to improve the performance of the Gyrotory in Rawtenstall, within which Rawtenstall Fire Station is located. This would require relocation of the existing fire station. NOTE living accom recently provided.</p> <p>F. Community Facilities Edenfield Community Centre RCT NOTE no Library in Edenfield – Ramsbottom???</p>

1809	Alex	Rowe	Natural England	Habitats Regulation Assesment (HRA)	Not Applicable	<p>Habitats Regulation Assessment (HRA)</p> <p>Natural England has the following comments with regards to the HRA: The HRA has not shown how each policy and allocation has been screened out. Natural England would like to see a full audit trail and an explanation for why each policy and allocation will not have a significant effect. Changes in hydraulic conditions (4.7) Natural England agrees with the statements in the HRA but it could be an option to provide further explanation for why there are no impacts. Public access, outdoor sports and recreational activities (4.9) Recreational disturbance has not been addressed in the HRA because of the lack of available data. Further clarification is required to explain how the HRA proposed to address recreational disturbance. Physical modification (4.12) Further explanation is required for point 4.12.4 to explain why no part of the plan is likely to contribute to the pressure/threats of physical modifications. This could be because of the proximity of allocations, which requires further details. We would be happy to comment further should the need arise but if in the meantime you have any queries please do not hesitate to contact us.</p> <p>Annex 1: Planning consultation: Draft Local Plan for Rossendale (Regulation 18) Location: Rossendale Assessing Impacts of Wind Farm Development on Blanket Peatland in England Project Report and Guidance (2009) by Maslen Environmental: 5.4 Siting of Wind Farms on Blanket Bog “The following guidelines should be followed: 1. Where there is a mixture of habitats the infrastructure should be concentrated on the non-blanket bog areas, as indicated by the depth of peat, rather than by contemporary vegetation. 2. In general infrastructure should avoid areas of deep peat (i.e. greater than 0.5 m depth). On many sites there are areas of deep and shallower peat – the deep peat should be avoided in the site design. There should be evidence in the EIA that deep peat has been avoided where choices exist. 3. Where the blanket bog is reasonably intact and not dissected by gullies which cut the full thickness of the peat, the roads should be located away from deep peat. 4. If roads do cross deep degraded peat they should constructed in a manner not to disrupt the flow of water through or over the bog, but to stem the flow through the gullies in favour of a wide spread over the peat surface. 5. The hydrological impact of a wind farm on degraded peat where the peat body is dissected into a number of separate peat areas may be less than on an</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Evidence Ba	Further comment
						<p>intact bog, though if poorly designed can simply exacerbate an already bad erosive condition. The design of the wind farm layout, location of turbines, roads and mitigation measures has the potential to help or hinder the future restoration of the blanket bog.</p> <p>a. Construction of tracks crossing gullies has the potential to be used to partially block the gullies and to construct partial blocking of gullies, to reduce erosion, runoff and promote blanket bog restoration. Care will be needed to manage this geotechnically, to avoid peat slippage.</p> <p>b. The orientation of roads has the potential to be located either parallel or across the natural drainage through the peat, and consideration of the impacts of this needs to be made.</p> <p>i. Drainage associated with tracks located parallel to natural drainage, need to be designed so that there are checks in the drainage channels to reduce runoff rates and velocities to background levels.</p> <p>ii. Tracks perpendicular to natural drainage lines will disrupt the diffuse nature of flow, but may also impede flow which may be currently directed down erosional channels.</p> <p>The impact of this needs to be assessed in the EIA.</p> <p>6. It is very important that the mitigation measures indicated in the EIA are carried forward to the construction method statement and so implemented on site. For this purposes it is important that the mitigation measures are specific and quantified. Use of contractors familiar with working on peat sites is an advantage. The use of mitigation measures and proposed restoration should be controlled via a planning condition. Monitoring may also be specified in planning conditions.</p> <p>7. Provision should be made for the potential to incorporate restoration measures into the site design. These could include:</p> <p>a. Blocking of erosional drainage channels;</p> <p>b. Promoting of re-vegetation of degraded areas.”.</p>		
1809	Alex	Rowe	Natural England	Sustainability Appriasal	Not Applicable	<p>Sustainability Appraisal</p> <p>We have not reviewed the Sustainability Appraisal (SA) because of time constrains and instead decided to concentrate our advice by concentrating our efforts on key parts of the Draft Local Plan for Rossendale.</p>

1823	Janet	Baguley	Natural England		Not Applicable	<p>In relation to the Rossendale Borough Environmental Network Study by TEP (Jan 2017) one of my colleagues on our Uplands Team has had a look through and provided some brief comments which I hope you find useful:</p> <p>We strongly support the work being done on preparing an environmental network study for Rossendale which will be a valuable tool when allocating development and seeking opportunities to enhance the natural environment. The following comments identify some areas where the study could be strengthened/improved.</p> <p>We feel the study currently overlooks the important connection between the uplands and elsewhere in the borough. There is little reference to the importance of the upland areas for retaining water and slowing the flow through appropriate management/restoration. The study gives more attention to managing watercourses and the benefits of tree planting overlooking the extensive area of peatland in Rossendale. For management of some corridors action needs to start at the top of the hill. Appropriate management and restoration of peatlands on a catchment level will have benefits to water management, reducing flood risk, biodiversity & peoples enjoyment.</p> <p>The following paragraphs link to this matter:</p> <p>Para 10. sub-catchments only refers to woodland planting benefits – remember peatland restoration benefits.</p> <p>Para 19. valleys flood proofing - remember action needed in the uplands to achieve this.</p> <p>Para 21. policy relating to managing land to increase biodiversity should include reference to safeguarding priority habitats, reference to latter in 7.84/7.91.</p> <p>Para 5.17. benefits of green infrastructure reference to SUDS/urban GI, overlooks rural action i.e. management of water flow above valleys. Need combination of GI & land management in uplands to maximise benefits.</p> <p>Para 5.34. comment here regarding the challenge of risk of flooding illustrates the importance of managing the catchments, i.e. peatland to slow the flow.</p> <p>Para. 7.24. seems to overlook importance of holding back the water on the moors through appropriate management/restoration only referring to</p>

17	Gary	Cunliffe	-		Not Applicable	after attending the river side today 27th july i have to say your plans and reality seem to be 2 very different things. your looking at adding 400 or thereabouts houses within whitworth and shawforth yet no extra facilities, schools or transport links outside of the cycle route which has now been pushed back from 2019 to 2020 according to your plans. let alone the little fact no one seems able to say who will actually maintain the cycle route. - - your evidence claims that no schools in whitworth are over subscribed, which is at the very least false or a blatant lie as both tonnercliffe and whitworth high school where refusing any more students the past year even from local residents! - - no new gp's or improvements to the roads and not even a hint of acknowledgement that the ONLY road through the valley gets bad at rush hour or whenever it gets dug up. the plan also states the busses run every 15 mins. sure mon to fri from 6am up to 7pm depending on direction they do. but after that its every half hour and saturday is similar sunday though every half hour between 9am and 9am give or take a few mins. - - the plan overall does seem to have been slapped together to have the most information possible while not giving straight answers or the correct information where needed. and no proper scope for the need for more jobs in whitworth just more housing which we have more than enough now with the lack of investment over the past decades. this needs a lot of work and possibly by local residents who know the area and its issues.		-
31	Rachelle	Whalley	-		Not Applicable	I feel the whole draft plan, it's language and navigation is not easily accessible to many of the people being consulted and this concerns me. - I am also very concerned that the council are taking a 'back door' approach to development, stating that planning will be approved quickly to those boosting development makes the valley attractive to large chain business taking away from the unique and unusual benefits of local shopping in Rossendale. This is something I feel should be exploited with more support for small independent businesses and financing. - Waterfoot (central) in particular is now needing an economic boost with no more takeaways or tattooists given planning permission and funding for the start up of new independent retailers. - This draft plan sees some parts of the valley left behind, and more importantly the layout and accessibility of this consultation means that the very communities you claim to want to engage are excluded.		-
65	Matthew	Devlin	-		Support	It's great to see Bacup having investment, plans and upgrades being considered. Keep up the great work!		I support the local policy plan!

155	Jo	Furtado			Not Applicable	<p>1. Map</p> <p>The map accompanying the Draft Local Plan that I read online three days ago was very unclear.</p> <p>Yesterday I went to Whitworth Library, where the map was much better, though still unclear in one or two areas, and not altogether accurate. Firstly, it shows only two areas of shopping in Whitworth, one just south of Tong Lane and another around Station Road, Facit: it omits the shops around the junction of Market Street and Hall Street.</p> <p>Secondly, it shows the cycle path through Facit as continuous: it is not, because there is a stretch from the corner of Cowm Park Way North and Station Road heading north which does not exist, necessitating a diversion (signed) onto the A671 before re-joining the cycleway via a road opposite the bottom of Studd Brow.</p> <p>Both these things are trivial in themselves, but the fact that they exist feels of a piece with a much more significant omission which I'll come to later.</p> <p>2. Schools/GP surgeries</p> <p>The building of more houses implies a rise in the population. The DLP itself has nothing to say about the pressures on schools/GP surgeries. However, the Infrastructure Delivery Plan notes that Whitworth schools have very little spare capacity: locally we are told that the High School is oversubscribed; as a parent/grandparent I have considerable experience of the traffic congestion/danger at school start and finish times; as an ex-teacher I suffered 19 years in an inadequate "temporary" portakabin when my school expanded its intake beyond its capacity to cope. I am told that our local GP surgery is full to bursting too.</p> <p>I am surprised that these fundamental issues have no place in the Draft Local Plan, which in many other ways is an admirably holistic piece of work.</p> <p>6. Online DLP</p> <p>Getting started is not easy -the user has to make some assumptions about which of those boxes to go to. If your aim is to encourage participation in the democratic process the front page should tell the user, step by step, what they should be doing. Once in, how sensible is it to present your page. 'n two columns, which requires the user to be constantly scrolling up and down! The process becomes even more fiddly because the columns are taller than the screen. Keep it simple - from the reader's perspective, not that of the person whose job it is to get the document onto the computer.</p> <p>7. Online questionnaire</p>			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>Somewhere I read that the online questionnaire would allow me to comment on 10 issues, whether of policy or site allocation. I found getting started on the questionnaire difficult, but persisted. By question 33 I'd commented on five items, some very briefly, and the questionnaire said I'd used up 46% of my allocation. I added another page, taking me to q.38, where the comment was very brief, only to find that I was now at 85%. How? More to the point, it meant that the next page would ask me if I had anything else to add, signalling the end of my questionnaire, which thus did not allow me to comment on alii wished to comment on in any structured way. I wondered if I could delete the whole questionnaire and start again, but could not see a way to do that.</p> <p>I feel like I have wasted a lot of time, which is deeply irritating. The process makes me feel foolish, which I resent. The whole episode makes me wonder if there is an attempt, conscious or otherwise, being made to exclude from consideration all those of us who are not computer-savvy enough, which is annoying because I don't like conspiracy theories.</p> <p>I am a reasonably thoughtful, reasonably articulate resident of Rossendale, and this letter represents my contribution to the DLP consultation process. I ask three things: 1. That this letter be accepted as such. I accept that it is reasonable for someone in your team to rework the totality of my comments into a format that can be tallied according to your own structures. 2. That someone on your team acknowledges receipt of this letter, as presumably would be automatically the case had I proceeded to the end of the questionnaire and submitted electronically. I'd prefer receipt by mail, please. SAE enclosed. 3. That next time you do a consultation you work harder to make the process idiot-proof. (For the sake of clarity -/ am the idiot.)</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
167	Peter	Ruane			Object	<p>At reading the proposed Rossendale Borough Council (RBC) Emerging Local Plan for Rossendale and the proposals for Whitworth, I feel it reads rather like a wish list than a serious attempt at sustainable development. Although mentioning the historical background behind Whitworth's ribbon-like growth on either side of the A671 due to its geographical location, it then proceeds to ignore it in much the same manner as Planners in the past have failed to improve the infrastructure, (Paragraph 7+ 21 National Planning Policy Framework March 2012), and not improving the situation, which would have allowed growth that enhances Whitworth. -"The purpose of planning is to help achieve sustainable development. Sustainable means ensuring that better lives for ourselves don't mean worse lives for future generations. (Rt Hon Greg Clark MP Minister for Planning National Planning Policy Framework (NPPF) March 2012 - Department for Communities and Local Government)</p> <p>The Emerging Local Plan (Policy HS 1) sets out how the criteria has been met and is therefore justified in changing the status of Green Belt to Greenfield. This can then be used to meet a Government target for House building, and not any local requirements- It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. (Paragraph 1 NPPF March 2012 Department for Communities and Local Government).</p> <p>The Emerging Local Plan ignores Paragraph 79 of the NPPF March 2012 and the importance of Green Belt in preventing Urban Sprawl</p> <p>There is plenty of Newspaper coverage of how the current Council Leader and the current MP have recently returned from London with a reduction in the Governments' required figure for Rossendale. (Evidence that it is a Government rather than a Local need.)</p> <p>It may be 'stating the obvious', that in putting together this Emerging Local Plan, RBC has employed a number of people and spent a lot of money. In doing so they have generated a large number of documents for Residents to read and understand, to enable them to give the matter their full attention and offer an informed comment or objection. With this in mind, I would like to state my objections to the local plan specifically for the Whitworth Area, and in particular Site Ref SHLAA16001 and Site Ref SHLAA16002.</p> <p>I am a resident of Meadow Head ave and I have lived here since February 1978. I remember when the two areas (Site Ref SHLAA16001 and Site Ref SHLAA16002), were defined as Green Belt because of their unsuitability for development. (Inspector's Report September 1994 Gill. D and Sustainability Appraisal May 2017 {3.16.7})</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>The objections raised back then and their causes have not 'gone away', they are just as valid now. In fact, there are more reasons for maintaining the areas as Green Belt. The problems expressed then have multiplied rather than decreased. The junction of Tonacliffe Road and Tonacliffe Way is now a nightmare for parents dropping off their children at Tonacliffe School. Bus Services have decreased from Rochdale and Rossendale through Whitworth. A couple of years ago RBC threatened to remove the subsidy for evening Bus services through Whitworth, as part of a cost cutting exercise. Yet the Emerging Local Plan states there is an adequate Bus Service. Shift workers have to use their own cars or car sharing. There has been an increase in bicycle use and the last resort, Taxis, because there are no Buses available. The Schools, Tonacliffe School, St Anselms School, St Bartholomew's school, St Michael and St John School and the one High School are almost at capacity now. The planning area of Whitworth will show a limited number of places remaining across schools in that planning area If local schools are unable to meet the demand of a new development there is the potential to have an adverse impact on the local community, with children having to travel greater distances to access a school place. (Rossendale Infrastructure Delivery July 2017)</p> <p>There is one GP Surgery, one Dentist and one Pharmacy, NHS Clinics that were available when I first moved here are now gone. Pennine Acute and East Lancashire Hospitals are situated at Rochdale, Oldham, Fairfield, Manchester, Burnley, and Blackburn. Not what one would call Local.</p> <p>After the Community successfully got together in favour of keeping the Library open, Whitworth retains its Library.</p> <p>Local employment has reduced, meaning that employed residents have to travel further afield to their jobs. This has seen an increase in traffic on the single route in and out of Whitworth. (A671) The local plan adds to this burden without offering any alternatives .</p> <p>... .. creating a high quality built environment, with accessible local services that reflect the community's needs and support its health, social and cultural well-being; (Para 7 - NPPF March 2012.)</p> <p>The Rossendale Infrastructure Delivery July 2017 mentions in detail what will happen to the Rawtenstall and Rising Bridge end of the Valley, but sadly no mention of how we are to update and increase the ability of the Whitworth section of the A671 to deal with the projected influx of Ratepayers.</p> <p>Site Ref SHLAA16001 and Site Ref SHLAA16002 are misleading in that they make no mention of the Topography of both these areas. The Play areas are situated such that a child would have to cross Tonacliffe Road and the A671 to reach the play areas. Residents make full use of the open aspect of the Green Belt that surrounds them.</p> <p>Also, are the stated figures; Comments within 800m to playground to the south of Albert Mill (Site Ref SHLAA16002) and Access to a park or play area</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>access within 1.5km (approximately 1 mile) (Site Ref SHLAA 16001) for 'as the crow flies'? If so then the crow used by the planners must be thankful it didn't have to walk the distances given. It would certainly have complained about the extra distance caused by the 'up and down' terrain. Which also means that travel, for the Elderly and Disabled and young mothers with their prams, to and from, the 'local' amenities' will also involve increased use of a vehicle rather than 'shanks' pony'. 'The physical constraints of Rossendale mean that delivery of infrastructure can be significantly affected by the topography of the area.' (Rossendale Infrastructure Delivery July 2017)</p> <p>Paragraph 30 of the NPPF requires Local Plans to facilitate the use of sustainable modes of transport. The Local Plan has no section devoted to transport in Whitworth, and has not used any supporting document, which addresses transport issues in the Whitworth area. (Rossendale Infrastructure Delivery July 2017)</p> <p>This particular local plan appears to be a response to central government's order to build new houses, (at any cost) rather than a recipe for sustainable development at a Local level.</p> <p>The Emerging Local Plan for Rossendale appears to ignore rather than comply with the guidance set out in the National Planning Policy Framework 2012: (Ministerial foreword Rt Hon Greg Clark MP Minister for Planning National Planning Policy Framework March 2012 Department for Communities and Local Government)</p> <p>Enough Case Law exists to say that alterations to a Green Belt need "Exceptional Circumstances," and preparation of a Local Plan does not, of itself, justify "Exceptional Circumstances," in order to affect a change from Green Belt to Greenfield.</p> <p>Policy EMP4 of the Emerging Local Plan has some interesting points; some of them could be applied to House Development inasmuch as;</p> <p>There is no significant detrimental impact on the amenity of neighbouring land uses and the character of the area by virtue of increased levels of noise, odour, emissions, or dust and light impacts, surface water, drainage or sewerage related pollution problems;</p> <ul style="list-style-type: none"> • The site has an adequate access that would not create a traffic hazard or have an undue environmental impact; • The traffic generated does not have a severe adverse impact on local amenity, highway safety or the operation of the highways network; <p>This Emerging Local Plan suffers from a number of flaws, in that the government has insisted that local councils have the power to enforce the law against pavement parking.</p> <p>(https://www.gov.uk/government/news/freeing-pedestrians-from-pavement-parking-blight)</p> <p>Yet, without the residents being able to park on the pavements outside their homes, there would be no free flow of traffic along the streets defined in the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>plan as, suitable access roads, to the new developments. However modern and well designed the new streets are promised to be (Manual for Streets 2007 and Emerging Local Plan Policy TR4: Parking) in reality, they will have to interface with the existing problematic traffic system we have come to know so well. The A671 has an anaemic quality to its Cycle lanes as it passes through the Valley. Because of parked cars, pedestrians have to step onto the A671. We find in Whitworth the A671 can have pedestrians, cyclists and motor vehicles all adding to the 'furring of the Artery' that is the A671. Another reason for no pavement is the placing of Green and Blue bins. So placed to enable the Bin men to collect them safely. One officials' solution was for the pedestrians to "cross the busy road, walk the length of the blockage and re-cross the busy road." Nowhere in the Local Plan is there any mention of upgrading or enabling the existing system to deal with a modern flow of people and vehicles.</p> <p>Paragraph 5.1.39 of the Sustainability Appraisal (Lepus Consulting for Rossendale Borough Council May 2017) needs to be revised. The car is the main mode of transport that residents use to; " ... support its health, social and cultural well-being;" (NPPF March 2012)</p> <p>In the Emerging Local Plan, Horsefield ave, Meadow Head avenue and Belle Isle avenue are shown as access points. Meadow Head avenue is closed by a pavement and is therefore classed as a cul-de-sac. (http://www.dictionary.com/browse/cul-de-sac)</p> <p>Belle Isle avenue was 'closed' following the recommendation in the Inspectors report (1994) by trees and fences.</p> <p>National Planning Policy Framework</p> <p>safe and suitable access to the site can be achieved for all people: and improvements can be undertaken within the transport network that cost effectively limit the significant impacts of the development. Development should only be prevented or refused on transport grounds where the residual cumulative impacts of development are severe.</p> <p>The 'Bin Lorry' reverses into Meadow Head ave and Belle Isle ave to safely collect the Bins. This is possible because the resident's cars are parked on the pavement. It is not possible to say that only one car is allowed at each Household, and therefore can park on their drive. Father can have a car, Mum can have a car, Number 1 child can have a car, and Number 2 child can have a car.</p> <p>Moreover, if mum or dad both drive vehicles due to their employment, these can be attached to the Household. Potentially 6 cars parked at one household. This doesn't include visitors.</p> <p>(Emerging Local Plan Policy TR4: Parking Be designed to ensure that the use of the parking provision would not prejudice the safe and effective operation of the highway network;</p> <ul style="list-style-type: none"> • Not dominate the street scene or detract from the character of the area;) 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>"Because of the highly urbanised nature of the Borough it is challenging to introduce new infrastructure, such as bypasses or new roads without adversely affecting what is already built. " (Rossendale Infrastructure Delivery July 2017) and Paragraph 7 National Planning Policy Framework March 2012 ... An economic role - contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure; .</p> <p>Local Authorities, it seems, also have "Powers and Incentives to access and bring into use more empty homes, for example New Homes Bonus." The New Homes Bonus is currently paid each year for 6 years. It is based on the amount of extra Council Tax revenue raised for new-build homes, conversions and long-term empty homes brought back into use. There is also an extra payment for providing affordable homes.</p> <p>(https://www.gov.uk/government/collections/new-homes-bonus-provisional-allocations-for-2016-to-2017-and-consultation-on-reforming-the-bonus)</p> <p>The Communities and Local Government spokesman also stated that Councils have the flexibility to impose a Council Tax Premium of up to 50% (on top of the council tax bill), on properties that have been empty and substantially unfurnished for more than two years."</p> <p>(http://www.telegraph.co.uk/news/2017/02/03/number-empty-homes-hits-highest-rate-20-years-calling-question/)</p> <p>I haven't read of empty homes being included in the Emerging Local Plan in order to reduce the need for 'Urban Sprawl' or meet Government objectives.(Paragraph 79 of the NPPF)</p> <p>Paragraph 151 of the NPPF states that Local Plans must be prepared with the objective of contributing to the achievement of sustainable development. The Ministerial foreword to the document clearly states that sustainable means ensuring that better lives for ourselves don't mean worse lives for future generations. In attempting to release Green Belt, the Emerging Local Plan seems to be ignoring one of its attributes, which is an essential characteristic of permanence (i.e. for all generations to benefit from) and is instead 'cherry picking' information to meet the Governments instructions rather than Local Requirements.</p> <p>Imposition masquerading as negotiation.</p> <p>Rossendale Infrastructure Delivery July 2017 is at pains to point out the problems at the West end of the Valley while minimising any difficulties the East end will experience. It should be pointed out there are two High Voltage Power lines passing through Rossendale, not one as stated in the Rossendale Infrastructure Delivery July 2017. (National Grid High-Voltage Cable location) The one they didn't mention passes Site Ref SHLAA16001 and is within 100</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						yards of my residence. As I stated at the beginning of this objection, this Local Plan reads more like a wish list and I will go even further; when Henry Ford began mass producing Motor Cars he famously said, "You can have any colour you want; providing it's black!" The Emerging Local Plan is lacking in any credible attempt at Sustainable Development as far as Whitworth is concerned. It will however improve the revenue to RBC from the Residences of Whitworth helping them to develop the Town Centre of Rossendale, Rawtenstall.(Paragraph 23 National Planning Policy Framework March 2012) The emerging Local Plan seems to be lacking in studies of alternative sites. The one element missing from this Emerging Local Plan for Whitworth is 'Informed Choice'.		
286	Christina	Pieper	-		Object	Whitworth is already an overcrowded village. It is not suitable to build more houses it does not have the amenities. - It is a village not a town and can nor accommodate more house builds.	-	
295	T	Shore	Whitworth Action Greenbelt Group		Not Applicable	Would be interested in information of the action group and agree with the statements made about the village.		
468	James	Dalgleish			Not Applicable	- Policy R5, bullet point 1. I think that the word 'not' is missing. - Policy EMP3. I think that the title should read 'sites' rather than 'site'.		
472	Natalie	Miller			Not Applicable	From memory this is now the third time that we have had this review, does the council really have that much money to waste?		
473	Siobhan	Carney			Not Applicable	The pdf files you have provided online are not of sufficient quality to view in appropriate detail. Additionally, it is rather misleading for you to quote download times based on a 56k connection (20 year old technology). Large, unrealistic download times of nearly half an hour may discourage less technology-savvy people from clicking on the links. In reality, they only take a second to download on broadband. It is not particularly convenient for us to visit the maps at the locations you specify as we have two children under four and both work. Please can you make some higher quality maps available.

479	Pat	Myers			Not Applicable	<p>I yesterday received a letter from yourselves dated 25th July in relation to the above. I sat down to read it today to find that our local venue, the Riverside, is available today to view these plans.</p> <p>I would suggest that if you are serious about consulting with the people of Whitworth we require a bit more notice, rather more advertising (as there hasn't been any) and a time to view which doesn't exclude most people who are working.</p> <p>I will be very surprised if the numbers attending tonight are high as 99.9% of people won't know about this.</p> <p>Can I request therefore that you re-book the Riverside (or an alternative venue eg Library, Day Centre), advertise the fact that people can look at the plan and do it at a time when people who are working can attend. If you are not willing to do this then you are not willing to consult properly.</p>

482	Paul	Bayliss			Not Applicable	<p>I would say that in my humble opinion the current infrastructure in the Whitworth area is already under constant pressure, a lack of obtainable medical facilities: Its common knowledge that trying to get an appointment at the local medical centre is already extremely difficult. Additionally education is always under pressure. The main thoroughfare through Whitworth is a nonstop flow of speeding and often dangerous traffic. The highways are constantly being dug up due to poor antiquated utilities, which causes further congestion on the roads. Of course when Market street is closed there is no other route through to Bacup and area's beyond. I hope you weren't responsible for the fiasco when they closed the road to demolish the mill, that was a debacle, so many different communications as to when the road was actually closed, in the end they had to use a fire engine to block one end of the road, which happened around midday as opposed to 6am or whatever the schedule was, how unprofessional was that, the demolition team had no hard hats and had no appropriate safety clothing, the same is to be said for the guys constructing the cycle. Which concerns me as the standard of contractors the council engage with.</p> <p>Therefore if the council truly believes in meeting sustainable development. ; meeting the needs of the present (which I don't think it does) without compromising the ability of future generations. Then before any consideration is given to providing additional housing the infrastructure needs to put in place before any housing developments are considered. It makes me laugh when you say we identifying infrastructure requirements well you don't need to ask private sector bodies et al. The residents of Whitworth know what the requirements are.</p> <p>Here's a simple question on providing for the present; why is there no proper park for children to play in Whitworth? We do not have an area of open space with a proper children's playground or an area where they learn to ride their bikes or run around or play football with their friends. That is a very basic amenity which children on this town do not have.</p>

500	John	Clements			Object	The policy will result in increased flooding resulting from increased tarmac and concrete areas on new estates - roads and driveways and roofs (coupled with climate change giving more rainfall and fiercer storms) Other problems:- Unacceptable: congestion on roads, medical centres and schools		Why does the council allow householders to dig up their front lawns to put down block stone paving. To double their car parking ? This has occurred at Nos 35 & 40 (Recently), and Nos 5, 16, 18, 20 (in the past) sand & weeds are in the cracks giving fast run off contributing to future flooding. Some councils do not allow this practice. Why does Rossendale BC given it's flooding record. Please make the point to government that the situation is their fault in allowing the population to increase. The only acceptable result for Rossendale due to the steepness of it's valleys is no new housing. If you are forced, insist on developers utilizing brownfield sites. If they refuse report them to government for being anti-social. Find a way of forcing them to use brownfield sites
525	Ann	Hodgkiss	-		Object	Such a questionnaire needs to be made more readily available for residents to complete with objections. - - It is hard to believe that the council propose to build on greenfield sites where there is far more opportunity to build brownfield, or regenerate. Infrastructure is rarely improved to accommodate changes, in the past for Helmshore, nothing has changed yet we have had approx. 150 dwelling development within a square mile causing issues for residents that the council ignore. - - There is little point in objections as the council will continue with the plan regardless, greed being the leader on the project. Unfortunately residents feelings and concerns are never taken into account. Makes one wonder why we ever bother to vote. You will be changing areas beyond recognition and ruining some beautiful places.		The wind farm refusal was the correct decision, shame the same human being cannot be on this council to see common sense.

552	Alyson	Mousley	-	Local plan 17-26	Not Applicable	I vote for the option of organic growth protecting the environmental and social benefits of Rossendale. I do not agree with the go for growth idea. - - The building of the proposed number of houses (4000) is madness before the current infrastructure of the borough is updated roads, public transport, school, health care etc. - - I am specifically concerned about the huge number of houses proposed at the old Broadleys site. This road is already congested with traffic and local schools are over subscribed. - - Suggestion - - More should be made to bring empty properties into use. - For every 500 built the council need to provide social outdoor space especially for teenagers, every house builder should contribute 1% of its first sale price or valuation to this slush fund - All roads, payments & footpaths should be adopted/made good before next phase development is permitted. - Public transport needs to be improved. - Schools cannot cope with the parking (often badly) of parents more houses will make this worse unless safeguarding is improved around schools. - - To build a great property you need firm foundations and that's what Rossendale Council hasn't got yet!		Please can some consultations be in Crawshawbooth & during school hours. - You need to make the consultation reference obvious if you want us to use it.

589	Stephen	Langridge			Not Applicable	<p>General comment,</p> <p>1. Whilst I understand the need to provide space for and control future development within the Borough, it is important to understand that the Borough is made up from several townships and communities, each of which have their own quirks and identities and as such, it would be wrong to ignore that individuality.</p> <p>The authority should resist dictats from on high to identify so much land for this or that without understanding the needs wants of those who have made the valley into the splendid place that it is.</p> <p>Rossendale is not, nor should it become, simply a suburb of the continuous concrete sprawl that Bury, Manchester and beyond have become.</p> <p>(...)</p> <p>5. Pockets of land, I understand that if a housing development of under 100 houses takes place, then this is deemed as having no impact on local schools, doctors and other services. However, with developments such as Yarn Avenue, (off Holcombe Road) 60+ houses, Limewood Close (off Helmshore Road) 20+ houses and The Power Mill development (off Holcombe Road) then the accumalative effect is the same as a single 100+ development. Helmshore Primary School and Broadway Primary School are both running at full acapacity whilst Haslingden High School is running at or near full capacity. Where are the children from these new houses going to go to school? or Doctors? or Dentist?</p> <p>Lancashire County is already strapped for funds, how are additional places to be sourced or funded.</p> <p>If other pockets of land are identified by developers - e.g. the site of the recently demolished St. Veronicas Church in Helmshore - will this then allow for the removal of other pockets of already identified land from the local plan?</p>

635	Ross	Hemsley	-	All	Support	I broadly agree with Option 3		<p>Rossendale is an amazing place to live and to work and is blessed with some unique and stunning landscape which should be protected. - - The fact that it is generally in a valley means that the amount of land available is finite and can only support so much development. - - If there is to be growth it must be made in a manner which can be supported by the surrounding infrastructure. Anybody trying to get to Haslingden or even worse Manchester in the morning is faced with long traffic queues and delays. Recently the traffic has backed up to Newhallhey roundabout several times as the M66 cannot cope with the volumes joining it from the A56 and A682 simultaneously. - - There has been talk of turning the railway into a commuter line, that is highly unlikely. - - I have always been a keen cyclist but despite talk of developing safe cycling routes the volumes of traffic just continue to rise, making cycling at any other time than early mornings at weekends extremely dangerous.</p>

731	Emily	Hrycan	Historic England		Not Applicable	<p>The NPPF makes it clear that the significance of heritage assets can be harmed through development within their setting. There is a requirement in the Town and Country Planning Act 1990 that 'special regard' should be had to the desirability of preserving listed buildings, their setting or any features of special architectural or historic interest which they possess. It is also the duty of the Council to preserve or enhance the character or appearance of its conservation areas and their setting. Where potential development sites appear to include non-designated assets including the possibility for archaeology, their potential should be investigated and retention/exploration should be promoted.</p> <p>Consequently, before allocating any site there would need to be some evaluation of the impact, which the development might have upon those elements that contribute to the significance of a heritage asset including their setting, through undertaking a heritage impact assessment. The assessment of the sites needs to address the central issue of whether or not the principle of development and loss of any open space is acceptable. It needs to evaluate:</p> <ol style="list-style-type: none"> 1. What contribution the site in its current form makes to those elements which contribute to the significance of the heritage assets. For a number of these heritage assets, it might be the case that the site makes very little or no contribution. 2. What impact the loss of the area and its subsequent development might have upon those elements which contribute to the significance of those heritage assets. 3. If it is likely to result in harm, how might that harm be removed or reduced to an acceptable level. 4. If the harm cannot be reduced or removed, what are the public benefits that outweigh the presumption in favour of the conservation of the heritage asset? <p>The selection of sites for development needs to be informed by an up-to-date evidence base and the Plan should avoid allocating those sites which are likely to result in harm to the significance of the heritage assets of the Plan area. Where adverse impacts are unavoidable, the Plan should consider how any harm might be mitigated. This could include measures such as a reduction of the quantum of development at a site, amending the types of development proposed or locating the development within another part of the site allocation. Such initiatives need to be fully justified and evidenced to ensure that such measures are successful in reducing identified harm.</p> <p>The allocation of sites for development may also present better opportunities for the historic environment. For example, new development may better reveal the significance of heritage assets or may provide an opportunity to tackle heritage at risk.</p> <p>Where relevant, policies for allocated sites may need to make reference to</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>identified historic environment attributes in order to guide how development should be delivered. For example, this might require the policy to include detailed criteria or providing supplementary information with the supporting text.</p> <p>Comments on the Local Plan Site Allocations</p> <p>In view of the above, Historic England is concerned that there does not appear to be any robust assessment of the historic environment to accompany the site allocations. The information supplied by the Council's published report (Heritage Impact Assessment of Housing Sites September 2017) to support this, provides little detail on how the above has been dealt with. It would be helpful if the report could detail the background information to accompany the summaries provided. For example, the report refers to whether something is deliverable or not, refers to the need for mitigation measures to be undertaken and that careful consideration is required to ensure that the development does not harm setting. Is there any evidence to back up the summary contained in this table? If the table refers to the acceptability only on condition of the mitigation measures, then there should be an assessment to support this statement. If so, what are the mitigation measures that would be required to remove any harm? This needs to be demonstrated within the report and detailed within the Plan.</p> <p>In view of this, Historic England is unable to comment on the proposed Housing Site Allocations contained in Policy HS2 and those included in EMP2 (Employment site allocations).</p> <p>Strategic Cross Boundary Issues</p> <p>Strategic cross boundary issues that affect the historic environment are issues that can only be effectively addressed at a larger than local scale and may cover the issues listed below, this is not an exclusive list and strategic issues will have to considered on an area by area basis.</p> <ul style="list-style-type: none"> · extensive designated and non-designated heritage assets, e.g. World Heritage Sites, historic landscapes, major heritage based tourism attractions, the management of which may impact upon more than one Authority · major quarries for building and roofing stone, e.g. Portland stone · major changes to green belt which affect the preservation of the setting and character of historic towns · major development proposals likely to affect important heritage assets in a neighbouring authority, e.g. major urban extensions, infrastructure proposals <p>These strategic issues will not necessarily and always be the same as the strategic polices for the protection and enhancement of the historic environment included in a Local Plan but are likely to be a sub-set of them. Indeed local circumstances may indicate that strategic approaches may not</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>always be needed. The sustainability appraisal scoping report should help to identify what is important for a particular plan area.</p> <p>Historic England strongly advises that you engage conservation, archaeology and urban design colleagues at the Council to ensure that you are aware of all the relevant features of the historic environment and that the historic environment is effectively and efficiently considered in the development management policies, in the allocation of any site and in the preparation of the SEA. They are also best placed to advise on local historic environment issues and priorities, including access to data held in the HER. This will ensure that there is joined up and robust approach is undertaken to historic environment issues.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment	
731	Emily	Hrycan	Historic England		Not Applicable	<p>Rossendale Local Plan – Regulation 18 consultation</p> <p>Thank you for consulting Historic England on the above. This response details the expectations of the Local Plan for Rossendale and the historic environment and also specific comments on the draft content of the document.</p> <p>Historic England is the Government’s statutory adviser on all matters relating to the historic environment in England. We are a non-departmental public body established under the National Heritage Act 1983 and sponsored by the Department for Culture, Media and Sport (DCMS). We champion and protect England’s historic places, providing expert advice to local planning authorities, developers, owners and communities to help ensure our historic environment is properly understood, enjoyed and cared for.</p> <p>Historic England has produced a number of good practice advice notes on the historic environment, in particular the Good Practice Advice Note on the Historic Environment and Local Plans (http://historicengland.org.uk/images-books/publications/gpa1-historicenvironment-local-plans/), which provides supporting information on good practice in planmaking, and the Historic Environment and Site Allocations in Local Plans (https://historicengland.org.uk/images-books/publications/historic-environment-and-siteallocations-in-local-plans/) may be useful in the production of your Plan.</p> <p>The Local Plan for Rossendale will be expected to include a proper description, identification and assessment of the historic environment and the supporting evidence base is expected to include heritage information. The Plan will need to demonstrate how it conserves and enhances the historic environment of the area and guide how the presumption in favour of sustainable development should be applied locally. This includes ensuring that the sites, which it is proposing to put forward for development, will assist in delivering such a strategy.</p> <p>Evidence base</p> <p>A sound local plan should be based on an up-to-date evidence base which includes reference to the historic environment. The Council needs to ensure that the evidence base needs to identify:</p> <ul style="list-style-type: none"> · What contribution the historic environment makes to the character of the area, to its economic well-being and to the quality of life of its communities; · What issues and challenges is it facing and likely to be facing in the future; · What opportunities the historic environment offers for helping to deliver the other objectives in the Plan area. <p>When undertaking this exercise, it is important to bear in mind that it is not simply an exercise in listing known sites but, rather understanding their value to society (i.e. their significance). There is a need to identify the subtle</p>			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>qualities of the Borough and its local distinctiveness and character which can easily be lost. There will need to be an assessment of the likelihood of currently unidentified heritage assets including sites of historic and archaeological interest being discovered in the future. It may also be necessary to identify heritage assets outside the Council's area where there are likely to be setting impacts caused by any development proposals put forward in the area. It is also important to bear in mind that some asset types are not currently well recorded. For example, the Register of Parks and Gardens of Historic Interest in England, is thought to represent only around two thirds of sites potentially deserving inclusion. Evidence gathering can also help to identify parts of a locality that may be worthy of designation as a conservation area and identify assets that are worthy of inclusion in a local list.</p> <p>Potential sources of evidence include:</p> <ul style="list-style-type: none"> · National Heritage List for England · Historic Environment Record · Conservation Area Appraisals and Management Plans · Local Lists · National and Local Heritage At Risk Registers · Historic Characterisation Assessments · World Heritage Site Management Plans · In house and local knowledge expertise <p>Where the evidence base is weak, the Council will need to commission additional work to ensure that the historic environment is adequately dealt with and can be used to inform the Plan.</p> <p>Spatial Portraits</p> <p>The Local Plan should include a proper description and assessment of the historic environment in the Borough and the contribution it makes to the area (NPPF, Paragraph 169).</p> <p>The Plan needs to describe the historical growth of the area and identify its historic environment. It should also clearly identify the different places their character and identity and the contribution it makes to all aspects of life in Rossendale. The Plan as drafted does not appear to include this.</p> <p>Local Plan Policies</p> <p>One of the twelve principal objectives of planning under the NPPF is the conservation of heritage assets for the quality of life they bring to this and future generations (NPPF, Paragraph 17). Conservation means maintaining what is important about a place and improving this where it is desirable. It is not a passive exercise. It requires a Plan for the maintenance and use of heritage assets and for the delivery of development within their setting that will make a positive contribution to local character and distinctiveness.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>Local Plans should include policies to conserve and enhance the historic environment of the area and to guide how the presumption in favour of sustainable development should be applied locally. It is vital to include both strategic and development management policies for the historic environment in the local plan as the plan will be the starting point for decisions on planning applications and any Neighbourhood Plans that come forward are required to be in general conformity with the strategic policies of the Local Plan.</p> <p>The policies for the historic environment will derive from the overall strategy to deliver conservation and enjoyment of the area's heritage assets for generations to come. These may be policies that concern themselves specifically with the development of types of heritage asset. But delivery of the NPPF objective may also require strategic policies on use, design of new development, transport layout and so on. Indeed every aspect of planning, conceivably can make a contribution to conservation. Plan policies in all topics should be assessed for their impact on the strategic conservation objective. Conservation is not a standalone exercise satisfied by standalone policies that repeat the NPPF objectives. The Local Plan should also consider the role which the historic environment can play in delivering other planning objectives:</p> <ul style="list-style-type: none"> · Building a strong, competitive economy · Ensuring the vitality of town centres · Supporting a prosperous rural economy · Promoting sustainable transport · Supporting high quality communication infrastructure · Delivering a wide choice of high quality homes · Requiring good design · Protecting green belt land · Meeting the challenge of climate change, flooding and coastal change · Conserving and enhancing the natural environment · Facilitating the sustainable use of minerals <p>In formulating the strategy it is advisable and often necessary to consider the following factors:</p> <ul style="list-style-type: none"> · How the historic environment can assist in the delivery of the vision and the economic, social and environmental objectives for the plan area; · How the Plan will address particular issues identified during the development of the evidence base including heritage at risk; · The interrelationship between the conservation and enhancement of the historic environment and the other Plans policies and objectives; · The means by which new development in conservation areas and within the setting of heritage assets might enhance or better reveal their significance; · How local lists might assist in identifying and managing the conservation on nondesignated heritage assets; · How the archaeology of the Plan area might be managed; · How CIL funding might contribute towards ensuring a sustainable future for 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>individual assets or specific historic places and whether or not certain heritage assets might need to be identified;</p> <ul style="list-style-type: none"> · Whether masterplans or design briefs need to be prepared for significant sites where major change is proposed; · What implementation partners need to be identified in order to deliver the positive strategy; · What indicators should be used to monitor the effectiveness of the strategy. <p>Comments on the Local Plan Policies</p> <p>Historic England is concerned that the Plan policies do not contain policies that will deliver the conservation and enhancement of the historic environment in Rossendale and to guide how the presumption in favour of sustainable development should be applied locally. The policies as drafted do very little to detail what elements of the Rossendale area will be conserved and enhanced including specific references to its historic environment and the Plan needs to be amended to detail this.</p>		
743			Whitworth Town Council		Not Applicable	<p>The Council also made the following general points about the consultation:</p> <ul style="list-style-type: none"> •The consultation has come from a demand from central government to build 4000 new homes in Rossendale this figure has now come down to around 2600 but even at this level this figure is disproportionate to our current population. •The physical infrastructure is not sufficient to support all this house building. There have been several water leaks and power outages recently and this is a regular occurrence locally. More houses would put greater pressure on this infrastructure. •The main problem in Whitworth is the single road in and out and currently this is a problem for commuters who queue to travel southbound and northbound. More houses would mean yet more traffic on an already busy road with no alternative route. Additionally this flow of traffic causes the surface of the road to deteriorate quickly meaning it is regularly in poor condition and needing repair. •Rossendale Borough Council Forward Planning have been asked to produce plans to identify areas which could be built on, even if these areas end up on the Local Plan they maybe wouldn't go forward for development. •For a 4 bedroom house, you could anticipate 1.8 children, planning and building for a school takes around 7 years so this would need to be addressed urgently. Currently all the primary schools are busy and the local high school is oversubscribed already. These issues must be addressed. 		
890	Debbie	Stewart	-		Object	<p>Government policy is to protect and enhance the natural and historic environment in both rural and urban areas. A high level of protection should be given to the most valued townscapes and landscapes, wildlife habitats and natural resources - . I believe your policy goes against national policy</p>	no

1120	David	Clements	-		Object	<p>I wish to object to the application as presented in the Local Plan for the following reasons:-</p> <ul style="list-style-type: none"> - Significantly increased Danger of Flooding: We were flooded in Meadow Park, Irwell Vale on Boxing Day 2015 when nearly 3 feet of water entered our Bungalow. This was the result of ground and surface water from surrounding areas, Edenfield and Helmshore, not being able to get away because of the high levels of the Rivers Ogden and Irwell flowing through the Village. - Many developments in recent years in the higher reaches of the River Irwell and River Ogden, particularly the River Ogden in Helmshore, have exacerbated this situation. Very little has happened in the area in the past 2 years since the Floods to resolve potential flooding following heavy rainfall. With the proposed massive increase in housing in Edenfield, where water flows down the hills and through the porous railway embankment and into the bottom of the valley, plus more developments in Helmshore, and the resultant effects that brings, it is imperative that all new developments within the Rossendale Valley ensure that measures are taken to ensure that land and properties downstream do not suffer from inadequate removal of ground and surface water that these developments automatically bring; plus of course the additional pressure on the sewerage systems which are inter linked. Practical, robust and well maintained drainage systems need to be developed to ensure all are safe from flooding within the Valley. - Edenfield (HS2.71): The local infrastructure around Edenfield in terms of Roads, Doctors, Dentists, Schools etc is currently totally inadequate and therefore for a massive expansion in housing as currently proposed will mean that existing and new residents will not have the support services that are required. - Helmshore has similar infrastructure problems and Schools in the area already have classes that are full. - Increase in Traffic: We understand a number of key junctions within the Valley are being reviewed. This is far too simplistic. We currently travel through Edenfield on a regular basis at varying times of the day and it is currently very difficult because of the parking and the narrowing of the road at either end of the Village to drive through without any disruption. With the current very significant expansion in housing being proposed in Edenfield this will make a bad situation intolerable. - Helmshore also has traffic flow problems and the “mini roundabout junction” at the crossroads of Helmshore Road and Broadway is already very dangerous. - Within the Valley currently if ever there are Roadworks or an Accident the consequential knock-on effects and delays on the A56 / M66 and surrounding ‘alternative’ roads in Edenfield, Haslingden, Rawtenstall etc are significant, with the resultant ‘Gridlock’. Similarly within other areas of the Rossendale Valley such as Bacup, Waterfoot, Crawshawbooth etc there are significant delays on all roads, particularly at busy times. To increase the housing stock within Rossendale as proposed, will just exacerbate an already very difficult situation. - Public Transport / Parking: While those travelling are encouraged to use Public 		All included under Section 8.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>Transport the current services available fall well short of what is required. In addition currently there is far too little parking facilities to encourage those who travel out of the area to use Public Transport services as either part or the whole of their journey. - - Air Pollution: Currently with existing road problems there is too much slow moving and stationary traffic. With a significant increase in housing and hence the population as proposed, and the resultant increase in traffic problems, the Air Quality is going diminish even further with even more slow moving and stationary traffic, making a bad situation even worse. - - Doctors: There are already inadequate resources in the area and it is currently very difficult to get a GP appointment when required. With significant increases in the population and requirement for these services both existing and new residents will suffer even more. - - Dentists: For many years there has been a shortage of NHS Dentists in the area with problems trying to recruit more, so that many residents have already been forced to seek 'Private Services'. If given there are these problems with the current population in the area, for which a solution has not been found over many years, what is going to happen with significant increases in the population? - - Schools: A number of expansions to existing Schools has taken place in recent years particularly in the Edenfield area in order to respond to increasing demand for places, with unfortunately the consequential loss of some previously existing facilities for the Children. Massive increases in development in the area will mean these resources, currently struggling, will not be able to cope with these proposed increasing numbers. - - Green Belt / Conservation Areas: The Local Plan proposes changes to both the Green Belt and Conservation Areas: It is very important that these areas which were set up to protect and benefit local communities and residents are maintained and are not altered in order to allow further housing developments. - - - David Clements - Meadow Park, - Irwell Vale.</p>

						<p>Transport the current services available fall well short of what is required. In addition currently there is far too little parking facilities to encourage those who travel out of the area to use Public Transport services as either part or the whole of their journey. - - Air Pollution: Currently with existing road problems there is too much slow moving and stationary traffic. With a significant increase in housing and hence the population as proposed, and the resultant increase in traffic problems, the Air Quality is going diminish even further with even more slow moving and stationary traffic, making a bad situation even worse. - - Doctors: There are already inadequate resources in the area and it is currently very difficult to get a GP appointment when required. With significant increases in the population and requirement for these services both existing and new residents will suffer even more. - - Dentists: For many years there has been a shortage of NHS Dentists in the area with problems trying to recruit more, so that many residents have already been forced to seek 'Private Services'. If given there are these problems with the current population in the area, for which a solution has not been found over many years, what is going to happen with significant increases in the population? - - Schools: A number of expansions to existing Schools has taken place in recent years particularly in the Edenfield area in order to respond to increasing demand for places, with unfortunately the consequential loss of some previously existing facilities for the Children. Massive increases in development in the area will mean these resources, currently struggling, will not be able to cope with these proposed increasing numbers. - - Green Belt / Conservation Areas: The Local Plan proposes changes to both the Green Belt and Conservation Areas: It is very important that these areas which were set up to protect and benefit local communities and residents are maintained and are not altered in order to allow further housing developments. - - -</p>		
1160	Jody	McGarraghy	-		Object	<p>Any building work will cause many construction vehicles to enter & leave Whitworth, on the one single road we have through our village. This will cause major traffic disruption, noise pollution & damage to our already fragile roads. Should the building work involve housing, we already have a village of people with over subscribed schools, including one single high school & only one GP surgery. The demand this will place on public services that are already stretched, will be huge. Any building work will affect the local landscape & wildlife negatively on a huge scale. Many people in Whitworth were born here & have lived here all their lives, so know what is appropriate for the village in terms of growth & change, their views therefore need to be listened to & answered accordingly.</p>	-

1201	Stephen	Anderson	N/A	Developer Contributions	Support	I was unable to locate anything within the Local Plan around Developer Contributions through S106 Agreements, CIL or any other form. - - Whilst viability is currently challenging within Rossendale for any type of commercial development, there are significant infrastructure issues which will come under increasing pressure through the life of the plan as noted in the Infrastructure Delivery Plan document. - - There are also development needs which private sector developers cannot necessarily address, such as affordable homes within marginal viability sites. - - A robust and targeted plan for developer contributions would therefore be valuable to begin to provide funding to address Rossendale's needs. - - Of particular personal interest is the poor state of heritage across Rossendale. Viability is particularly challenging in historic buildings and settings. Rather than compromising heritage assets, a developer contribution derived and heritage focused grant scheme, perhaps focusing in on buildings and site considered particularly 'at risk,' would permit these historically important parts of Rossendale to be brought forward and become positive assets for their local communities. - - Given the focus on the tourism potential of Rossendale within the emerging Local Plan, it would seem particularly important to conserve the historic environment as a key characteristic of the area and something which adds to its tourism potential.		On balance, the Draft Local Plan is the best and most well balanced option.
1222	Michael	Whitworth	-		Object	Whitworth is heavily over developed already with immense pressure on local services that are badly strained. It is located in a narrow valley and served by a single road in and out. The valley is so narrow for much of its length that even if the council had the will it could not put in a second road for access. It's possibly the worst site for development anywhere in the Valley and this plan takes no account of this.		This council is supposed to represent the view of the people it was elected to represent. The people of Whitworth are unanimous in opposition to further development in their village which has been already over developed given its location, and poor resources, services and communication links.

1223	Alwyn	Davies	-		Object	<p>The document does not have an introduction that explains to the reader what this document is and what its purpose. It fails to demonstrate that Rossendale Council has a vision of what it hopes to achieve from its local plan other than a haphazard and unjustified approach to allocating land for development across the borough. The council fails to outline a case for change as to why these changes are required or an options appraisal to enable people to have a voice in what they feel is required in terms of housing and employment needs which is disrespectful to the residents of Rossendale. Page 4 States: "Planning applications that accord with the policies in this Local Plan will be approved without delay, unless material considerations indicate otherwise." It is not clear what is meant by this statement – does this mean that decisions regarding building on approved land within the local plan will go ahead without consultation? It is concerning those statements that have no context have been included in this draft plan. Page 5 Policy SD2: Urban Boundary and Green Belt – this section does not stipulate what the council's intentions are in relation to the protection of Green Belt land and what constitutes exceptional circumstances to build on Green Belt Land. - The document states: "All new development in the Borough, will take place within the Urban Boundaries, defined on the policies map, except where development specifically needs to be located within a countryside setting which enhances the rural character of the area. The council does not stipulate what exceptional circumstances are or how a warehouse in a countryside setting will enhance the rural character of the area. Chapter 2: Employment Growth and Employment Page 30. Employment Levels have declined in Rossendale since 1997. This document fails to provide a context or evidence of declining employment levels in Rossendale. Information should be supplied to demonstrate the exceptional circumstances that have led to the need to develop 27 hectares of employment land. - - There are a fundamental number of unanswered questions in relation to this for example: - • What is the current level of employment in Rossendale? - • Reason/rationale for current levels of unemployment in Rossendale? i.e. age, disability lack of jobs, which types of jobs? - • Wage levels for Residents of Rossendale are generally lower than average, is building more industrial, strategic and distribution centres going to improve this and how? - • Outcommuting to neighbouring authorities to work is a major issue for the council. Has the council considered that many career opportunities cannot be achieved within the borough i.e. working in a hospital, working in aviation, working within a court, working in theatre or entertainment, working for large retail stores that are only provided in large cities i.e. John Lewis, area sales manager positions etc. - • How many current vacancies are there to work in factories, offices, industrial storage in Rossendale? Are businesses in Rossendale able to recruit to all of their vacancies do we need more? - • How does this plan fit into strategic</p>		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>employment initiatives such as, Apprentice, Fit for Work, Work and Disables people, Lancashire Skills and Employment Strategy? - - I believe the council has not sought the views of the people of Rossendale in asking what they would like to achieve from employment opportunities and have made assumptions to justify those outlined in the local plan. I would argue that Rossendale Council does not have the needs of the population of Rossendale at heart through the development of these plans. - - Some statistics that may contradict the council's assumption that building warehouses is the answer to employment and encouraging individuals to work in warehouses in Rossendale are: - - • Lancashire County Councils (LCC) Working age population summary report identifies that only 61.8% of the population is of a working age. - • East Lancashire has seen the proportion of the population which is economically active fall in recent years and almost twice as quickly as in Lancashire as a whole. - • Employment rates amongst women In East Lancashire are significantly lower than the county and nationally in part as a result of ethnic mix within the population. - • Just less than 30% of the working population is economically inactive which reduces the pool of labour which local businesses can draw upon. Meaning that recruitment is already difficult without adding further businesses. - • The shift towards residents having higher skills is increasing at a significant rate. Are industrial buildings going to meet the demands for our residents? - • The Lancashire Joint Strategic Needs Assessment demonstrates that we have an aging population; our Children are thriving in school and this is continuing to improve and we will see an increase in 0-15 year olds over the coming years. This contradicts the council's assumption that we need to develop more employment opportunity based on demand. - - The council has come to the conclusion through one independent review that 27ha of land is needed for employment. I would like to pose the question to Rossendale Council – how are you assured based on 1 independent review that the scale of the proposed change and the impact that that this will have on resident of Rossendale that this is justified? - - The Local Plan fails to accurately and clearly outline what vacant space is currently available for the use of general, industrial or storage and distribution (classes B1, B2 and B8) across the borough. Thus the council cannot demonstrate the exceptional circumstances required to build on additional land including that on Greenbelt. The information within the Local Plan has clearly not been well thought out. - - On Page 31 the local plan references the Green Belt review which suggests that the recommendation is that building should take place on Green Belt land. This is significantly misleading as much of the land allocated within the local plan was not identified for release within the Green Belt review 2016. - - On Page 31 Policy EMP5: Employment Development in non-allocated employment areas it states that “New Small scale employment development will be permitted in areas where employment is not the principle land use provided that there would be</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>no detriment to the amenity of the area in terms of scale character, noise, nuisance, disturbance, environment and car parking. I would ask the council to stipulate the processes for coming to decisions. It could also be argues that this will mean that no land development will take place which I am sure will make everyone (who is not the local planning team) happy. - - I would conclude that the Chapter 2 Employment Growth and Employment has not been carefully thought out or considered by Rossendale Council. The lack of vision and case for change to justify the expansion for employment land is lacking and contradictory to all demographic information about the population of Lancashire and Rossendale. I fail to see how the expansion of employment land to Rossendale will bring anything more than more empty offices and buildings which do nothing to enhance the character of our valley. I would ask the council to retract unneeded plans and instead engage with the population of Rossendale to consult on employment opportunities on Rossendale need to look like in the future. I appreciate that this is harder than sitting behind a computer screen developing plans that nobody wants or needs. I would request that the council investigate how the Local Planning Team have been able to launch a draft consultation on a document that that been clearly not been thought out, lacks basic information and explanation and provides inaccurate, false and misleading information which opens the council up to significant (and perhaps legal) challenge.</p>

1371	Daniela	Ripa	-	Spatial approach - Haslingden, Rawtenstall, Edenfield and Whitworth	Not Applicable	<p>I welcome the proposal to allocate land for employment development in Haslingden. However, I am of the opinion that, without prejudice to the site specific comments below, insufficient land is proposed to be allocated for housing in both Haslingden and Rawtenstall, the most readily accessible areas in the Rossendale Borough with good motorway and public transport links to Manchester, Lancashire and the wider Greater Manchester area. The allocation of land for employment in Haslingden and the promotion of employment opportunities should go hand in hand with the allocation of land for residential development and the creation of new homes in the Borough's two most accessible areas, Haslingden and Rawtenstall. - - The under provision of land for residential development in Haslingden and Rawtenstall leads to a resultant overprovision of land for residential development in other areas, namely Whitworth and Edenfield. - - Whitworth has significant accessibility constraints due to the fact it is linear in character - the Council's Adopted Core Strategy (2011, page 37) identifies this as a constraint ('.....with the main road a single carriageway so improvements are limited...'). Although it is part of Rossendale, the closest town is Rochdale to the south. There are only two routes to Rochdale from Whitworth: the A671, which leads to the junction of Whitworth Road with John Street, St Mary's Gate and Yorkshire Street - a signalised junction known as 'Townhead'; and the B6377, which leads to the junction of Falinge Road and Sheriff Street (a roundabout). At peak times and predominately during the morning (AM) peak, these junctions operate over capacity, with significant queuing of in excess of 20 minutes to pass through these junctions. Of particular concern is the roundabout, which from my observations appears to exceed absolute capacity in the AM peak. There is an added complication in respect of highway infrastructure as both of these junctions are in Rochdale and appropriate mitigation would therefore require input from Rochdale Borough Council. - - In addition, the Infrastructure Delivery Plan identifies a need for health and education facilities in Whitworth (the single local doctors surgery has over 900 patients registered and Whitworth primary school has very limited capacity), but no land is proposed to be allocated for health purposes and the Infrastructure Delivery Plan proposes education 'improvements will be dealt with on a case by case basis'. - - Edenfield is a village and its character would be irreversibly damaged should land be allocated for more than 450 homes in 2019-2034. Whilst I support the allocation of land for residential development in Edenfield in principle, the scale of the expansion proposed is excessive and should be reduced as it would result in significant harm to the social dimension of sustainable development through the disproportionate population increase relative to the existing population.</p> <p>I am planning professional and manage a team of development management</p>

						<p>officers within a neighbouring authority, although I write this representation in my capacity as a resident of the Rossendale Borough. I have lived in the Borough since 1988 with the exception of intervening periods of work and study. In a professional capacity, I have experience in local plan processes both pre and post adoption of the National Planning Policy Framework and have previously accompanied an appointed Core Strategy Inspector on viewings of sites proposed to be allocated for development. - The Draft Local Plan (2019-2034) includes the allocation of land for development and the release of land from the Green Belt. - - This representation contains comments in support of some proposals within the Draft Local Plan (2019-2034) and in objection to others. I would welcome the opportunity to discuss these comments in more detail should this assist Rossendale Council in producing a robust Submission Version of the Local Plan that will withstand scrutiny at examination. - - In addition to the site specific comments, I would like the Council to consider the following two points: - - 1. The Rossendale Hospital Site has been redeveloped and its retention in the Green Belt no longer meet the five purposes of including land within the Green Belt. The Policies Map should be updated to reflect this development as it presently shows the now demolished Rossendale Hospital - it is therefore out of date. - 2. The land to the south west of parcel HS2.62 marked 'IWS' on the Policies Map should be allocated as a Recreational Area within the Green Belt. It provides a valuable area of informal recreation.</p>			
1430	Billy	Hanson	-		Not Applicable	<p>Good morning ,I am sending this email to enquire if there are going to be any leaflets sent out to the people of Bacup to inform them of the planned new houses to be built as I no lots of people are notgoing to be aware this is going on as is wat happened last year.I await your reply.</p>			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
1438	Jo-Anne	Donnelly	-		Object	<p>Infrastructure does not exist in Rossendale to support the building of any more houses. There are few school places (primary and secondary) available, doctors and dentists are not taking new patients and roads are in a bad state of repair and cannot take any more traffic. The new traffic management system in Rawtenstall failed to deal with all crossing areas and has left once major intersection dangerous and unusable by certain members of the public. Rawtenstall is usually at a standstill with roadwork's to try to fix the failing roads and delays are the norm in all surrounding towns. There was a plan to develop Rossendale as a centre of tourism but tourists will not come to walk in the hills if they have been built on. The direction has obviously changed so that all available land is used for housing and shopping malls. Rossendale has the opportunity to attract people from Manchester but only if a rail link is established as the bus is not a good enough option. Focus on bringing people in to the valley to improve the housing stock already here and force landlords to renovate instead of sitting on empty buildings. There are mills that can be converted and eye-sore buildings that can be knocked down to make way for housing, do not spoil the landscape. The heritage is being ripped out of the towns; restore these, don't rip them down to build glass monstrosities (bus station). Rossendale has great primary schools and an excellent Grammar school and wonderful scenery, with a rail link it could become an attractive place to move. Housing in Rossendale is affordable to everyone-anyone on a low income can afford to buy in many of the towns; they choose not to because of the look of neighbouring houses, but if landlords were made to renovate houses and bring them to an acceptable standard, those close by would sell and the overall appearance of the area would improve over time. Building new houses only masks this issue. More employment sites are desperately needed in Bacup and Stacksteads to cut the level of people claiming benefits in these areas; raising levels of income and standard of living which will lead to an improvement of these areas.</p>		The planning department are not able to effectively deal with the increase in work load and complexity of cases.

1457	Fiona	Buchanan	-	Regulation 18 Draft - Rossendale Local Plan (2019-2034)	Object	- I object to the use of Greenbelt land on principle. Current government policy - also objects to the use of greenbelt land unless in 'exceptional circumstances'. All opportunities to redevelop brownfield sites should always be considered first if further building is justified. - The one road through the town is already overburdened with the weight of traffic. - Local schools are oversubscribed as are the single doctors and dental surgeries. - Although Whitworth has already seen frequent new building the existing amenities have never been expanded to cope with the extra demand. Even sewers and drainage are already overloaded. - The increase in traffic of from more residents would add air and noise pollution and pose an increase risk to the safety of existing pedestrians and residents. - Some areas have had planning applications refused previously - the case against granting permission has only increased. - Further development and especially the loss of greenbelt land will have a considerable negative impact on local wildlife, some of which are endangered species. - Greenbelt land is in areas of questionable suitability for building. A recent new housing estate where planning permission was previously denied because the greenbelt land was considered unsuitable, has already started showing signs of subsidence in places. - There are numerous signs that the town has already exceeded capacity for the existing infrastructure and amenities. -		
1483	Shelia	Rowley	-	ENV1 EVN6 EVN7	Object	- - Infrastructure (no police, schools, no high school, roads, public transport, doctors, dentists, no hospital) - Width of roads (congestion) - Width and lack of paths (especially for the elderly, disabled and parents with prams and young children - Surface drainage problems, possible flooding in some of the areas (e.g. Bankside Lane) - Sewerage problems - Access roads - Traffic in and out of Bacup at peak times - Wildlife - Areas of natural beauty - Empty houses in Bacup -		
1508	Rachel	Cornwell	-		Object	I object to the whole of the "local" plan. The infrastructure of rossendale cannot cope with the extra thousands of houses proposed in the local plan. The roads are gridlocked at peak times now and schools are oversubscribed meaning classrooms are full to bursting. The "local" plan isn't for local residents and how to make things better for them. I have lived in rossendale all my life and feel as if these huge plans for our valley are taking away what character is left here and the plan is just making the valley into a massive housing estate sat at the end of the m66. Local plans should involve local people and what they want and this certainly does not do that. The houses are being built further and further up the sides of the valley and there will be no green fields left and rural Rossendale will be a thing of the past.		Drainage/run off and flooding is already a problem for the valley and I feel all this building will increase that problem.

1575	David	Hempsall	Limey Valley Residents Association		Not Applicable	<p>On 11 September 2017, the association hosted a presentation given by Mr X, Principal Planner with Rossendale Borough Council. The LVRA is grateful to Mr Smith and to his colleagues who staged a roadshow at the Top Club, Loveclough in advance of the presentation as both events gave residents an insight into the consultation process surrounding development of the Local Plan.</p> <p>The LVRA appreciates that the current proposals must be seen in the context of pressure from central government which, at the time of writing, has still not published agreed criteria. The LVRA is mindful of recent press coverage in which Mr Jake Berry MP is reported as taking credit for the reduction in the demands made of Rossendale Borough Council (RBC) to provide for over 5,000 new dwellings to a total around 3,700. Given the area's topography, some further downward movement in expectations should be pursued.</p> <p>It will be recalled the LVRA came into existence in response to the development of RBC's previous draft strategic plan. In response to the planners' three options for the Rawtenstall area (which included Crawshawbooth, Goodshaw and Loveclough), the then-nascent LVRA tabled its own Option 4. It is the association's understanding that of all the responses to RBC's draft proposals then, over 35% came from what became the LVRA's area of operation. Since then, relations with RBC and its planners have matured, so that the LVRA sees itself now as the council's "critical friend". Far from being nimby-ish, the association sees merit in the notion of managed development.</p> <p>In this response, the association notes that in the SHLAA 2017, many sites shown in its predecessor reappear. Appendix E – Site Assessment – shows 26 sites offering some 572 houses. Of these several appear as land allocated for housing in Rossendale Draft Local Plan July 2017, HS2 Housing Site Allocation. The association has examined these in some detail and from its investigation, wishes to highlight three areas in particular.</p> <p>The LVRA is concerned by the proposals. The association's area of operation is one of ribbon development. As such, the association genuinely doubts its ability to absorb the scale of what is being considered.</p> <p>There are the self-evident issues of infrastructure: access to doctors, dentists and – for many – schools. These flow from the sole means of access being (directly or indirectly) the A682 Burnley Road. The association estimates conservatively at 400 x 2 per day the number of additional vehicle movements if all the schemes notified here were to be implemented. In the LVRA's view, the main road – and additional infrastructure – simply cannot bear this level of additional burden and especially so when, at the southern end, first Crawshawbooth and then Rawtenstall are pre-existing bottlenecks.</p> <p>In closing, the LVRA has ideas of its own which it is happy to share with planners. For example, the association – in collaboration with shop</p>			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	---------	-----------------

proprietors in Crawshawbooth - would wish to see the now defunct public WCs in the village demolished to provide some (admittedly limited) new parking. This would relieve the community of an eyesore and RBC of any legacy commitment.

For example – and thinking outside the LVRA’s own “box” - Park & Ride might be considered for the New Hall Hey development. For example, Rossendale will remain a dormitory backwater unless and until ideas to reconnect Rawtenstall with Greater Manchester by rail are brought to fruition. And so on. The LVRA welcomes the opportunity to comment on the proposals tabled by RBC and its planners and hopes most earnestly that consideration will be given to its recommendations.

1592	Warren	Hilton	Highways England		Not Applicable	<p>1 INTRODUCTION</p> <p>1.1 PREAMBLE</p> <p>Highways England has been appointed by the Secretary of State for Transport as a strategic highway company under the provisions of the Infrastructure Act 2015. Highways England is responsible for operating, maintaining and improving the Strategic Road Network (SRN) in England, in accordance with the Licence issued by the Secretary of State for Transport (April 2015) and Government policies and objectives.</p> <p>Highways England's approach to engaging with the planning system is governed by the advice and guidance set out in:</p> <p>The Strategic Road Network Planning for the Future - A guide to working with Highways England on planning matters (2015).</p> <p>The document is written in the context of statutory responsibilities as set out in Highways England's Licence, and in the light of Government policy and regulation, including the:</p> <p>National Planning Policy Framework (NPPF);</p> <p>Town and Country Planning Development Management (Procedure) Order (England) 2015 (DMPO); and</p> <p>DfT Circular 02/2013 The Strategic Road Network and the delivery of sustainable development ('the Circular').</p> <p>As a statutory consultee in the planning system, Highways England has a regulatory duty to cooperate. Consequently Highways England are obliged to give consideration to all proposals received and to provide appropriate, timely and substantive responses.</p> <p>Highways England's desire to be a proactive planning partner goes beyond this statutory role, but follows the spirit of the Licence, which stipulates that Highways England should:</p> <p>"Support local and national economic growth and regeneration"</p> <p>With regard to the preparation of Local Plans, Highways England's key guidance document, 'The Strategic Road Network: Planning for the Future' (2015) states:</p> <p>"The preparation of local plans provides an opportunity to support a pattern of development that minimises the need for travel, minimises journey lengths, encourages sustainable travel, and promotes accessibility for all. This can contribute to the achievement of environmental objectives and reduce the cost to the economy arising from the environmental, business and social impacts associated with traffic generation and congestion."</p> <p>Paragraph 65 sets out the role of Highways England take in facilitating this:</p> <p>"For all these reasons we are keen to contribute to the plan-making process. We can help you identify the most suitable locations for development that make best use of the capacity on the SRN, so encourage you to engage with us from the earliest stages of thinking."</p>			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>This review also pays cognisance to Paragraph 67, which states: “In supporting and considering draft local plans, we will seek to influence the scale and patterns of development so that it is planned in a manner which makes best use of capacity on the SRN and will not compromise the fulfilment of the primary function of the SRN. Ideally, development locations should be chosen that would minimise the need for travel and facilitate the use of sustainable transport.”</p> <p>1.2 OVERVIEW</p> <p>WSP has been commissioned by Highways England to undertake a review of the Rossendale Draft Local Plan consultation documents. The documents to be reviewed include: Rossendale Draft Local Plan and Policies Maps; and Rossendale Infrastructure Delivery Plan.</p> <p>Although the current adopted Rossendale Core Strategy (2011 – 2026) is not considered out-of-date, the Council is now required by the UK Government to prepare a Local Plan. The emerging Local Plan is intended to last over a 15 year period from 2019 – 2034 and will designate land and buildings for future uses to meet the Borough's needs and set out what developments should look like and how they should fit in with their surroundings. Once it is adopted, the Local Plan will replace the Core Strategy.</p> <p>The Draft Local Plan was published in July 2017 and the consultation period for the document ends in October 2017. The Council has expressed its desire for a revised Local Plan to be submitted to the Planning Inspectorate in 2019 for examination, with formal adoption expected in 2020. Rossendale Borough Council is asking for comments on the Draft Local Plan and as a statutory consultee, it is Highways England's role to provide comments, raise potential issues and make recommendations where appropriate.</p> <p>1.3 THE SRN WITHIN ROSSENDALE</p> <p>In terms of the extent of Highways England's Strategic Road Network within the Borough of Rossendale, this consists of the A56 trunk road, which joins the M66 motorway at the southern boundary of the Borough at Edenfield and runs in a northerly direction on its route to join the M65 motorway at Junction 8. On its route, the A56 serves the core settlements within the Borough of Rawtenstall and Haslingden as well as the more dispersed settlements on the local routes that have junctions with the A56. All other roads within the Borough comprise the local highway network, under the responsibility of the local highway authority, Lancashire County Council.</p> <p>In terms of the A56 itself, as a trunk road it is of a modern, high standard comprising of dual carriageways with a national speed limit, with the exception of a 50mph single carriageway section on the curve at Haslingden and is comparable in character to a motorway.</p> <p>Against this background, and its vision to upgrade all trunk roads by 2040, Highways England's position is to take a presumption against supporting sites</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>that would necessitate new and dedicated direct accesses onto the A56. Indeed, given the high-speed nature of the A56, there would be a presumption against any new connections, with Highways England's focus instead being on upgrading the existing junctions on the route to improve safety and traffic flow. This position is supported by the DfT Policy Circular 02/2013 'The Strategic Road Network and the Delivery of Sustainable Development' which has a presumption against the creation of new junctions and direct connections to motorways and high-speed trunk roads except where it can be demonstrated that such connections are essential to deliver 'strategic, planned growth'.</p> <p>1.4 PREVIOUS COMMENTS BY HIGHWAYS ENGLAND ROSSENDALE LOCAL PLAN 2 (2015)</p> <p>Rossendale Borough Council was in the process of developing its site allocations in 2015, known as 'Local Plan 2', but this work was subsequently abandoned. Highways England provided comments to the Council in August 2015.</p> <p>Whilst Highways England raised no objection in principle in the proposals, it was noted that the majority of allocated residential sites were located in Rawtenstall, while the majority of employment sites are allocated in the Haslingden and Rising Bridge area, along the A56 corridor. As such, it considered that there was potential for a significant increase in the number of trips accessing this short section of the SRN.</p> <p>At that time, the majority of allocated residential sites were on a relatively small scale, with only two sites exceeding 100 dwellings in terms of capacity. It was stated that the resultant impact on the SRN from residential developments would therefore be likely to stem from cumulative increases in traffic generated by many different sites, rather than from large individual sites. This point remains a valid consideration in this review of the Draft Local Plan site allocations, and is reiterated in the 'Housing' section.</p> <p>In terms of employment sites, five allocated employment sites were in excess of 2ha in area, and were therefore identified as having the potential to create a significant increase in the number of trips accessing the SRN. Several of the sites remain in the Draft Local Plan allocations, or are adjacent to other allocated sites. Hence, several comments made in the 'Employment' section of this review are similar to those made previously by Highways England in 2015.</p> <p>In terms of vehicular access to the employment sites, Highways England highlighted that the main access point from the sites should be from the local highway network, which is inherently safer than having a reliance on direct access to and from a high-speed trunk road like the A56. It was stated that access points and junctions on busy, high speed roads generate weaving and turning manoeuvres by drivers, impacting on safety and the reliability of journeys. As a consequence, developers of the sites should access their proposals via the local road network or existing junctions on the SRN.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>Highways England undertook some initial calculations using a spreadsheet based tool to assess the potential impact of the allocated sites on the SRN. The results of this indicated that the most significant pressure point would likely be the northern end of the M66, on the northbound carriageway between Junction 1 and the start of the A56(T), in the PM peak. The key junctions likely to be impacted by allocated site development traffic were identified as being the A56(T) / A680 roundabout at Rising Bridge, and the A56(T) / A680 / B6527.</p> <p>Highways England stated that they would welcome any further opportunity to comment on the emerging Local Plan and encouraged maintaining a close working relationship with Rossendale Borough Council to ensure that the Borough achieves its growth potential whilst maintaining the safe operation of the SRN.</p> <p>COMMENTS ON DRAFT LOCAL PLAN ALLOCATIONS (2017)</p> <p>Highways England was provided with details of the potential housing, employment and mixed-use site allocations by Rossendale Borough Council on a confidential basis in advance of the start of the Draft Local Plan consultation. In response, Highways England provided comments to Rossendale Borough Council on 18th July 2017.</p> <p>In its response, Highways England expressed its concern over the lack of any highways evidence base supporting the Draft Local Plan or Infrastructure Delivery Plan. This was highlighted as being key to enable Highways England to gauge the impacts of the additional development upon the SRN and any associated network improvements required to facilitate it which (if outside of its existing programme of improvements) the Council will need to promote through its IDP. It was also stated that this should also take into account the effects of existing public transport provision as well as realistic assumptions on the timing and deliverability of future public transport provision in relation to the timescale of the Plan. The highways evidence was highlighted as enabling Highways England to identify and support a pattern of development that is sustainable, reduces the potential for creating congestion on the SRN and does not reduce the safety of the network.</p> <p>As a result of the above comment, Highways England advised that a body of highways impact evidence linked to the proposed site allocations is produced for review by Highways England before the draft land allocations can be finalised. In the absence of this evidence, Highways England highlighted that its response to the Draft Local Plan consultation would be likely to culminate in a recommendation that a suitable evidence base is produced. It stated that without this supporting evidence, the Local Plan is likely to be found unsound by an Inspector, which will result in delay later on.</p> <p>As is highlighted at the appropriate points in this review, it is apparent that the Draft Local Plan and Infrastructure Delivery Plan have been published for consultation without the required highways evidence base referred to above.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>As such, the comments made by Highways England to Rossendale Borough Council on 18th July 2017 remain valid and are reiterated in this review. The remainder of this report will take the following structure: Section 2: Review of Rossendale Draft Local Plan Section 3: Review of Rossendale Infrastructure Delivery Plan; and Section 4: Summary and Next Steps.</p> <p>4.1 OVERVIEW</p> <p>WSP has reviewed the Rossendale Draft Local Plan on behalf of Highways England and made a number of comments and recommendations regarding those policies that may have relevance on the operation of the SRN. The following paragraphs summarise our recommendations:</p> <p>☒ As a general point, no information is provided in relation to access arrangements. Due to the topography of the Rossendale Valley, in many places there are limited existing access points or opportunities, which creates pressure for new accesses onto the A56(T). It is known that some existing employment sites are served by outdated and substandard 'leftin/ left-out' access arrangements and any material increase in traffic using these as a primary access to new site allocations would be of concern. Policy Circular 02/2013 sets out a presumption against new accesses and junctions being created on high-speed routes such as the A56(T), except at the plan-making stage where it can be demonstrated that it would facilitate 'strategic, planned growth'. It is Highways England's view that the scale and of these proposed allocated sites would not meet the criteria of being 'strategic' in the context of the Policy Circular / Highways England Licence. It is recommended that careful consideration is given to the access arrangements for all sites and that Highways England is kept informed of this.</p> <p>☒ The lack of any transport evidence base in the Draft Local Plan or accompanying Infrastructure Delivery Plan means that it is not possible to conclusively comment on the suitability of an allocated site or whether there should be phasing or contributions towards additional mitigatory infrastructure. Production of this evidence is essential to enable Highways England to provide a full response to the consultation and without it, there may be delays to future stages of the plan-making process.</p> <p>☒ The production of an appropriate highways evidence base will also be used to inform future iterations of the IDP, which is a live document and can therefore be subject to revisions throughout the course of the Local Plan period.</p> <p>☒ Overall, as the Local Plan is further developed, Highways England requires that the following approach is taken by Rossendale Borough Council:</p> <ul style="list-style-type: none"> o In order to fully evaluate the impact on the SRN, an impact assessment should be undertaken of the aggregate impact of all proposed allocated sites, alongside assessments of those individual allocations which are expected to 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>result in the most significant traffic impact;</p> <p>o Due to the extent of the local highway network within the borough when compared to the extent of the SRN, it is recommended that the local highway authority, Lancashire County Council take a leading role in assisting Rossendale Borough Council in preparing the required highways evidence base. Highways England will work collaboratively with both parties throughout this process. A key role of Highways England will be to review the evidence and to assist in developing solutions for any specific pinch points which are identified on the SRN.</p> <p>☒ Highways England should expect to be consulted on the emerging transport evidence documents and may need to be involved in the design of mitigatory measures where</p>		
1615	Darren	Tweed	Hyndburn Borough Council		Not Applicable	<p>Thank you for consulting us on the Reg18 Rossendale Local Plan consultation. I am emailing to confirm that Hyndburn Borough Council has no specific formal comments to make on the draft Local Plan. We are of the opinion that comments formerly provided to the 'Lives and Landscapes' consultation in 2015 have been taken into account adequately in preparation of the new Local Plan.</p> <p>We wish you the best of luck with the consultation process and continued progress towards Publication and Submission.</p>		
1619	Michael	Onley	Planning Sense NW		Not Applicable	<p>(...)On behalf of three client households I would advise that:</p> <ul style="list-style-type: none"> • Confusion has arisen during the public consultation process in respect of mis-identification of sites in the Higher Cloughfold – Newchurch corridor, and some clarification would welcomed (...)

1623	Richard	Clowes	Transport for Greater Manchester		Not Applicable	<p>Thank you for consulting Transport for Greater Manchester (TfGM) on the development of Rossendale's Local Plan. TfGM recognises that growth can bring benefits to the wider region including Greater Manchester. However it is important to ensure the growth of the wider region can be managed within the capacity of the available infrastructure.</p> <p>TfGM welcomes Rossendale's focus placed on promoting sustainable transport solutions to address issues of congestion and air pollution, as well as locating development where the need to travel will be minimised and the use of sustainable transport modes can be maximised .</p> <p>TfGM appreciates the challenges of accommodating growth. Significant housing and growth in Rossendale will generate additional demand on local and regional transport networks including the Strategic Road Network and Key Route Network within Greater Manchester due to the high levels of out-commuting. TfGM looks forward to working with Rossendale Borough Council and other stakeholders to address these challenges. While increased demand is symptomatic of growth, it can act as a constraint on future growth, and it is therefore essential to accommodate travel needs as sustainably as possible. It will therefore be important to ensure that the Local Plan emphasises that all future development should be designed in a way that prioritises and encourages sustainable and active travel options.</p> <p>I hope the above comments will be helpful in the progression of the Rossendale Local Plan, and I look forward to working together in future. If you wish to discuss any of the issues raised, please do not hesitate to contact me.</p>

1635	Joan	Glanfield			Object	<p>I have a number of concerns relating to your local plan. I have seen all the plans, and there seems to be a lot of green spaces that are going to disappear. There are enough brown field sites in this valley you can use for these houses without using one inch of green belt land. I already sent you a list of some of them, and lets face it these houses are not for local people, none of them are,"affordable,"</p> <p>The other thing that concerns me is where are all the cars going to go, the mornings and home time are very bad NOW what on earth is it going to be like when over 2000 more homes are built here, that is at the very least 4000 cars. The traffic now is nose to tail. Nowhere on those plans did I see any information about this. How many more schools are you going to build, the children in the valley now cannot get into the schools of their choice, there parents are having to bus their children miles to school. Roads are blocked now, I am thinking in particular of Bank Side Lane, Bacup, ambulances, fire engines and local people who live up there struggle now, how on earth will they cope with the amount of houses you are proposing to build up there. This is not the only narrow road in the valley, so this is problem that is going to be repeated again and again.</p> <p>My conclusion is that you have not been out of your offices and walked this valley and seen what chaos your plans are going to cause without some significant better infrastucture being put in place. I suggest that you do this, you will find all the brown field sites and you will have a better idea of what will happen here if these plans go ahead.</p> <p>I would not like you to think the £4,000,000 has been forgotten, if that had not been,"lost," you would have no need to build so many houses, a lot of them are already here. They might not be the big posh ones you like, but at least ordinary valley people would have benefited from them. They would have been affordable.</p>		
1764			Taylor Wimpey UK Ltd		Support	<p>Conclusions on Strategic and Development Control Policies</p> <p>2.80 Overall, Taylor Wimpey are supportive of the Draft Plan, subject to the comments and suggestions above.</p>

1766			Peel Holdings (Land and Property) Ltd		Not Applicable	<p>1. Introduction</p> <p>1.1 This representation is prepared by Turley on behalf of our client Peel Holdings (Land & Property) Limited (hereafter “Peel” or “our client”). It provides comments to Rossendale Borough Council (RBC) in respect of the Rossendale Draft Local Plan1 (July 2017) (‘DLP’) which is currently the subject of public consultation.</p> <p>Peel Group</p> <p>1.2 The Peel Group is a major investment company and is one of the leading infrastructure, real estate, transport and investment enterprises in the UK. Peel is a major investor, infrastructure provider, landowner and developer. We have major interests and assets across the United Kingdom. Our diverse network of businesses ranges from ports to airports; land to leisure; media to hotels; wind farms to shopping centres, nature parks to canals, residential sites to agricultural uses.</p> <p>1.3 Peel’s track record is one of delivering transformation and creating vibrant places through regeneration and innovation. We invest for the long term. For example, at MediaCityUK in Salford we delivered our £650 million investment in Europe’s largest construction project during the recession. Our £400 million investment in the Port of Liverpool will open up new export markets for the North.</p> <p>Peel Land and Property</p> <p>1.4 Peel Land and Property has extensive real estate assets which consist of 1.2 million m2 (13 million ft2) of investment property and over 15,000 hectares (37,000 acres) of strategic land and water throughout the UK, with particular concentrations in the North West of England, Yorkshire and the Medway. The breadth of Peel Land and Property’s assets covers transformational developments including MediaCityUK and Liverpool Waters. Our landholdings accommodate offices, retail and business parks, shopping centres, leisure and sports venues, residential developments, agricultural land and a ground rent portfolio.</p> <p>Peel in Rossendale</p> <p>1.5 RBC will be aware that Peel is the owner and/or promoter of the following sites for residential development:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden • Land at Haslam Farm, Rawtenstall • Land at Blackburn Road, Edenfield • Land at Burnley Road, Edenfield • Land at Rossendale Golf Course, Helmshore <p>Background and Context</p> <p>1.6 Peel has consistently and historically engaged with the plan-making process for Rossendale. This has included the submission of detailed representations to the previous Core Strategy2 and the emerging Lives and</p>			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>Landscapes DPD. The preparation of the Lives and Landscapes DPD was, however, abandoned by RBC on 9th December 2015 in favour of the preparation of a new full Local Plan. The current DLP is the first stage of consultation on the new Local Plan.</p> <p>1.7 Peel welcomes the progress which has been made on the emerging Local Plan and supports, in principle, the proposals for development within it. In particular, our client strongly supports the allocation of land at Kirkhill Avenue in Haslingden, Haslam Farm in Rawtenstall, and Blackburn Road in Edenfield. It is noted, however, that additional work is required to ensure that the emerging Local Plan is capable of meeting the full development needs of the Borough. This will necessitate the allocation of additional land for residential development, which is required to meet the Borough's identified housing needs. Peel has promoted additional land to that proposed for allocation in the DLP which can help RBC to meet those needs. It is also evident that additional work in respect of the evidence base will also be required.</p> <p>1.8 This Report provides detailed comments on the content of the DLP. Updated Development Frameworks in respect of the sites identified above will follow shortly. Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan and the merits of the sites promoted for residential development in due course.</p> <p>1.9 A range of evidence base documents have been prepared by RBC and are published alongside the DLP. They are not, however, the subject of public consultation. It is considered that this approach is contrary to best practice as set out throughout the National Planning Policy Framework (NPPF) and Planning Practice Guidance (PPG).</p> <p>1.10 Peel considers that it is critical that evidence base documents are prepared with meaningful engagement with key stakeholders, including the development industry, to ensure that the evidence is robust and accurate. The lack of engagement is therefore a key flaw in the plan-making process for Rossendale, which could be rectified by public consultation on draft evidence base documents. This report presents some initial high level comments regarding key evidence base documents and is accompanied by a standalone critique of RBC's Viability Assessment³. Peel does, however, reserve the right to provide further comments on the evidence base documents and encourages RBC to ensure that they are all subject to formal consultation.</p> <p>Structure</p> <p>1.11 The remainder of this Report is structured as follows:</p> <ul style="list-style-type: none"> • Section 2: Reviews the policy context for this representation. <p>2 Core Strategy Development plan Document: The Way Forward (2011-2026), Rossendale Borough Council (November 2011)</p> <p>3 Updated Economic Viability Study in Relation to Affordable Housing, Keppie Massie and WYG (June 2017)</p> <ul style="list-style-type: none"> • Section 3: Makes comment on the need for a clearer spatial vision, 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>objectives and strategy in the Rossendale Draft Local Plan.</p> <ul style="list-style-type: none"> • Section 4: Considers and comments upon the evidence of housing need for Rossendale, the growth options presented in the DLP, the delivery of types of housing and the plan period. • Section 5: Comments on the DLP's approach to the proposed release of land from the Green Belt and the allocation of development sites to meet the needs of the Borough. • Sections 6: Comments on other relevant policies of the Rossendale Draft Local Plan, particularly those which are pertinent to the Development Management process. • Section 7: Concludes the representation. <p>1.12 A Viability Assessment is provided at Appendix 1.</p> <p>1.13 Separate 'Site Opportunity' representation documents are submitted alongside this overarching representation in relation to each of the sites promoted by Peel for inclusion in the DLP.</p> <p>2. Policy Context</p> <p>2.1 The National Planning Policy Framework (NPPF) provides the overarching policy context for the preparation of the emerging Local Plan. It is a material consideration for the plan-making process. In this regard, insofar as its policies are relevant to this representation, we highlight that the NPPF requires local planning authorities (LPA) to:</p> <ul style="list-style-type: none"> • "...boost significantly the supply of housing..." (paragraph 47); • "...ensure that their Local plan meets the full objectively assessed needs for market and affordable housing..." (paragraph 47); • "...identify the size, type, tenure and range of housing that is required in particular locations, reflecting local demand..." (paragraph 50); • Ensure that their Local Plan incorporates "...sufficient flexibility to adapt to rapid change..." (paragraph 14); • "...plan positively to support local development, shaping and directing development in their area..." (paragraph 16). Indeed, the need for a Local Plan to be "positively prepared" is one of the four tests of soundness; • Ensure "...that the planning system does everything it can to support sustainable economic growth..." (paragraph 19); • Ensure that Local Plans are "...aspirational but realistic..." (paragraph 154); • Ensure that their Local Plan not only meets needs but also responds "...positively to wider opportunities for growth..." (paragraph 17); and • Conserve and enhance the natural environment (paragraph 109). <p>2.2 In addition to the above, the NPPF highlights the importance of protecting Green Belt land from inappropriate development. However, it confirms that Green Belt boundaries can be altered in "...exceptional circumstances..." (paragraph 83) via the plan-making process. Such exceptional circumstances include an inability to meet development needs, as is currently the case in Rossendale.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>2.3 When releasing land from the Green Belt, LPAs should, inter alia:</p> <ul style="list-style-type: none"> • Identify areas of ‘safeguarded land’ between the urban area and the Green Belt which are capable of meeting longer-term development needs; • Satisfy themselves that Green Belt boundaries will not need to be altered at the end of the plan period; and • Define new Green Belt boundaries clearly using physical features that are readily recognisable and likely to be permanent. <p>2.4 We refer to other policies of the NPPF, as well as the Planning Practice Guidance (PPG), elsewhere in this Report.</p> <p>Planning Policy and Guidance Changes</p> <p>2.5 In February 2017, the Government published its Housing White Paper, which reaffirmed its appreciation of the scale of the national housing crisis and the need for ‘radical, lasting reform that will get more homes built right now and for many years to come’4.</p> <p>2.6 On 14 September 2017, the Government published its proposals for consultation, titled ‘Planning for the right homes in the right places’. This incorporates a new methodological approach for calculating housing needs, with the Government publishing an indicative housing need figure for each authority in England based on the proposed method. The consultation period runs until 9 November 2017, with the Government setting itself the ambition of incorporating updates to current guidance alongside a revised NPPF in spring 2018.</p> <p>2.7 The new approach presents a stripped down set of methodological steps which continue to treat the 2014-based sub-national household projections (SNHP) as a ‘starting point’ before adjusting to take account of a single market signal, with the overall scale of adjustment capped at 40% above recently adopted housing requirements, or household projections if higher.</p> <p>2.8 There is evidently a high degree of uncertainty as to the extent to which current consultation proposals will be translated into statutory policy and guidance. On this basis we have presented high level views on the implications where relevant within the subsequent sections. These are presented without prejudice to the development of separate representations by Peel to the DCLG consultation.</p> <p>3. Vision, Objectives and Strategy</p> <p>3.1 RBC has begun the preparation of a new Local Plan for the Borough due to the clear need arising for future development. However, whilst the DLP is relatively wide-ranging, its vision, objectives and proposed approach are somewhat unclear. This is in part because:</p> <ul style="list-style-type: none"> • It does not establish a spatial Vision for the future of Rossendale, which identifies the key aspirations of the Borough and the goals which will have been fulfilled by the end of the plan period. • It does not identify strategic aims or objectives, which make clear what the Borough is seeking to deliver and achieve over the timeframe of the emerging 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>Local Plan.</p> <ul style="list-style-type: none"> It does not articulate a spatial strategy which sets out how and where the key aims and objectives of the Borough will be fulfilled in different locations within it. <p>3.2 The NPPF does not strictly speaking set out a requirement for a Local Plan to contain each of the above. However, they are notable by their absence and have the effect that the proposed purpose, direction and approach of the emerging Local Plan to meeting the needs of the Borough are somewhat unclear. Peel therefore encourages RBC to develop these aspects of the emerging Local Plan.</p> <p>The Plan Period</p> <p>3.3 The NPPF identifies that Local Plans should "...be drawn up over an appropriate time scale, preferably a 15-year time horizon..." (paragraph 157). The DLP proposes to cover a plan period from 2019 to 2034. Whilst this is a 15-year time horizon, it is dependent upon the Local Plan being adopted in early 2019. RBC's Local Development Scheme5 (LDS) currently anticipates that the Local Plan will be adopted in March 2020. This will mean that it covers only a 14-year time horizon up to 2034. This is considered to be a conservative estimate given the prospect that the adoption of the Local Plan might be delayed at various stages of preparation. Peel therefore considers that the plan period should be extended to at least 2036 in order to ensure that it accords with the guidance set out in the NPPF or that the flexibility to extent the plan period as may be required due to delay is included within the emerging Local Plan.</p> <p>(...)</p> <p>8. Summary and Conclusion</p> <p>8.1 This representation has been prepared by Turley on behalf of our client Peel in respect of the Rossendale Draft Local Plan. The representation made is in the context of Peel's ongoing engagement in the Rossendale plan making process.</p> <p>Draft Local Plan</p> <p>8.2 The progress of the emerging Local Plan is welcomed and the allocation of Peel's land at Kirkhill Avenue in Haslingden, Haslam Farm in Rawtenstall, and Blackburn Road in Edenfield is strongly supported.</p> <p>8.3 It is noted, however, that additional work is required to ensure that the emerging Local Plan is capable of meeting the full identified development needs of the Borough. This will necessitate the allocation of additional land for residential development. It is also evident that additional work in respect of the evidence base will be required.</p> <p>8.4 The representation considers the national policy context of the NPPF, Housing White Paper and Government consultation 'Planning for the right homes in the right places' which includes a new draft methodological approach for calculating housing needs. Of particular relevance are the NPPF</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>requirements to plan positively for growth through local plan making, and the considerations for alterations to Green Belt boundaries in order to meet development needs.</p> <p>8.5 Peel requests RBC develop aspects of the spatial vision, objectives and strategy in the DLP. A clearer approach to identify the key aspirations of the Borough during the plan period, objectives for delivery and the locations for achieving those objections would be welcomed.</p> <p>Housing Need and Supply</p> <p>8.6 The representation looks at the scale of housing need in Rossendale, as evidenced in the Strategic Housing Market Assessment and set out in the DLP. The impact of the Government's recent consultation on draft methodology for calculating housing needs is reviewed. Peel considers that the Council has assembled a robust evidence of housing needs in Rossendale and should use this as the baseline for the figures in the DLP.</p> <p>8.7 The growth plan option presented in the DLP provides for at least 265 dwellings per annum over the plan period. This aligns with the lower end of the range concluded within the SHMA, albeit covering a different period. It is considered that this would not provide for the higher levels of housing growth needed to grow the labour force and support future growth in the Borough's economy, given the SHMA's conclusion that 335 dwellings per annum will be needed to support a continuation of the Core Strategy's job target. In planning for housing need, and in the interest of supporting planned levels of job growth in the Borough, Peel recommend that the Council plans to provide housing to accommodate its evidenced need for 335 homes per annum.</p> <p>8.8 In relation to housing types, Peel considers that in order to support the objective of diversifying the housing stock towards larger, better quality dwellings, it is imperative that RBC directs allocations towards areas where this higher quality family housing can be viably delivered. A balanced spatial distribution is required which takes account of these qualitative factors and development viability, and delivering housing of the quality needed will likely require allocations in areas of higher market demand. Peel requests that addition housing allocations are made in areas that can support viable provision of family housing that is in demand.</p> <p>8.9 Given the timescales for process and adoption of the Local Plan, Peel recommends that the plan period be extended to 2036, to allow for a 15 year timescale post adoption. Housing delivery targets and allocations would need to be increased accordingly.</p> <p>8.10 The representation reviews in detail the DLP's presented development needs in the Borough against the extant housing land supply and proposed allocations. A significant 'gap' is identified of approximately 1,518 dwellings based on the housing requirements for the plan period (4,425 dwellings for the period to 2034) and the potential supply identified (2,907 dwellings).</p> <p>8.11 The Draft Local Plan proposes areas for release from Green Belt, allowing</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>for a delivery of a further 715 dwellings. It is therefore evident that the Green Belt releases proposed by the DLP need to be more than doubled if the emerging Local Plan is to be found sound. Releases for at least another 803 dwellings are required, before taking account of the requirement for flexibility and safeguarded land, as well as matters relating to the scale, location and type of development needed.</p> <p>8.12 Peel strongly agrees with RBC that there are clear exceptional circumstances (as defined by NPPF para 83) to undertake targeted Green Belt release in order to make land available for development to meet the Borough's needs. Indeed, the release of such land is critical if the Borough is to grow sustainably and deliver its ambitions for growth.</p> <p>8.13 Peel supports the release of green belt land in the Borough to meet development need and requests that further land is proposed for release in order to provide the necessary supply to meet the anticipated economic and housing growth demands.</p> <p>8.14 It is noted that the DLP is overly reliant on small sites and has overestimated the potential housing delivery which can be secured from the extant land supply. The inclusion of reserve sites in the plan is recommended, to reflect the risk of non-delivery of sites in the supply, as is the identification of safeguarded land to take account of longer-term development requirements beyond the plan period.</p> <p>8.15 Peel requests that the DLP makes provision for additional housing allocations, including larger plots and reserve sites, in order address this.</p> <p>8.16 The critical need to develop an Infrastructure Delivery Plan is highlighted. Peel agrees that new development must contribute to infrastructure provision; as such, requirements must be in line with legal and policy parameters and with contributions proportionate to the scale and nature of the development proposed. The proposed introduction of a Community Infrastructure Levy is not supported as the most suitable vehicle for delivering the infrastructure required in the Borough; the Government review of the CIL system should taken into account by RBC.</p> <p>8.17 Peel welcomes the opportunity to comment on the Infrastructure Delivery Plan and Community Infrastructure Levy / developer contribution requirements as they emerge.</p> <p>8.18 Development viability is reviewed in detail at Appendix 1. Proposed Development Opportunities</p> <p>8.19 In relation to Peel's land interests in the Borough, this representation considers four sites which have been subject of previous Development Frameworks and representations in the context of the Local Plan development. Updates to these frameworks will be provided to RBC in due course, setting out a clear vision and proposals for the development of these sites.</p> <p>8.20 'Site Opportunity' representations submitted alongside this report</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>provide an initial review of the development opportunities, including details of the site and its location, consideration of the site in the Strategic Housing Land Assessment (SHLAA) and planning policy; and a Green Belt appraisal, commenting on the findings of the Green Belt Review which forms part of the evidence base to the DLP.</p> <p>8.21 Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan and the merits of the sites promoted for residential development.</p> <p>8.22 Land at Kirkhill Avenue and Moorland Rise, Haslingden: Part of this site has been allocated for housing development in the DLP. Peel supports this allocation. The SHLAA identifies the remainder as having potential for development, but with landscape impact as the major constraint; the DLP proposes it remain within Green Belt. Peel considers that the site can be developed with sensitivity to landscape features, and together with the allocated site, there is potential for a logical extension to the west side of Haslingden. The updated Development Framework to follow this representation will further illustrate the opportunity for the development of this site and give comfort that it should reasonably be released for development.</p> <p>8.23 Peel requests the designation of Land at Kirkhill Avenue and Moorland Rise, Haslingden in its entirety as a housing allocation.</p> <p>8.24 Land at Haslam Farm, Rawtenstall: The northern part of this site has been allocated for housing development in the DLP. Peel supports this allocation. The SHLAA identifies the remainder as having potential for development in 6-10 years subject to addressing site constraints. The Green Belt Assessment has included this land within a far larger plot extending to the south. The land to the south has a greater value in Green Belt terms, and considering the Peel site in isolation, release for development would not have a significant impact on the Green Belt. Peel supports the SHLAA conclusion and considers that the site should be included as an allocation in the DLP to meet the Borough's housing needs. The updated Development Framework to follow this representation will further illustrate the opportunity for a comprehensive development at Haslam Farm.</p> <p>8.25 Peel requests the designation of Land at Haslam Farm in its entirety as a housing allocation.</p> <p>8.26 Land at Blackburn Road, Edenfield: This site is within the HS3: Edenfield DLP housing allocation, proposed for release from Green Belt. Peel supports this allocation and is preparing an updated Development Framework to illustrate the development opportunity. Peel is committed to working with the other landowners within the allocation as required by the policy and in order to achieve quality in placemaking.</p> <p>8.27 Peel supports the designation of Land at Blackburn Road as a housing allocation.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>8.28 Land at Burnley Road, Edenfield: The SHLAA identifies the Site as having potential for development, subject to mitigating site constraints; the DLP proposes it remain within Green Belt. Peel considers that the site can be developed with sensitivity to landscape and heritage features, and together with the large scale allocation to the west (HS:3 Edenfield), there is potential for this site to form part of the extension to the village. The updated Development Framework to follow this representation will further illustrate the opportunity for development of this site and give comfort that it should reasonably be released for development.</p> <p>8.29 Peel requests the designation of Land at Burnley Road as a housing allocation.</p> <p>8.30 Rossendale Golf Course: This site is a more recent development opportunity being promoted by Peel, and has hence not been considered in the SHLAA or DLP. The site could reasonably for a discreet extension to the village of Helmshore. The Development Framework to follow this representation will further illustrate the opportunity for development of this site and give comfort that it could reasonably be released for development.</p> <p>8.31 Peel welcomes further discussion on the land at Rossendale Golf Course as a housing allocation.</p> <p>Development Management</p> <p>8.32 The representation makes a number of comments on the proposed development management policies of the DLP. Of note, Peel requests:</p> <ul style="list-style-type: none"> • Affordable housing and open space / garden requirements should be considered on a site by site basis and reference viability measures. • Requirements for contributions to playing pitch provision should be adequately flexible and relate to site context and viability • Design policies should not be simplified and less prescriptive • Policy relating to biodiversity should be amended to reflect NPPF • Removal of the proposed 2:1 tree replacement policy • Removal of the requirement for electric car charging points in all developments • Removal of maximum parking standards, in line with NPPF <p>Please see appendix</p>

1771	Mohammed	Ali Ahmed	Lancashire County Council		Not Applicable	<p>2 Comments Relating to Education</p> <p>Section 14 of the Education Act 1996 dictates that Lancashire County Council's statutory obligation is to ensure that every child living in Lancashire is able to access a mainstream school place in Lancashire. Some children have Special Educational Needs for which they access school provision outside of Lancashire. Special Educational Needs provision is managed by LCC's SEND Team and is not covered by this response. The Strategy for the provision of school places and school's capital investment 2015/16 to 2017/18 provides the context and policy for school place provision and schools capital strategy in Lancashire. Over the coming years, Lancashire County Council and its local authority partners will need to address a range of issues around school organisation in order to maintain a coherent system that is fit for purpose, stable, and delivering the best possible outcomes for children and young people.</p> <p>Pressure for additional school places can be created by an increase in the birth rate, new housing developments, greater inward migration and parental choice of one school over another. If local schools are unable to meet the demand of a new development there is the potential to have an adverse impact on the infrastructure of its local community, with children having to travel greater distances to access a school place.</p> <p>In a letter from the DfE to all Chief Executives, the Minister of State for Housing and the Parliamentary Under Secretary of State for Schools jointly stated that 'where major new housing developments create an additional need for school places, then the local authority should expect a substantial contribution from the developer towards the cost of meeting this requirement'.</p> <p>The SPT produces an Education Contribution Methodology document which outlines the Lancashire County Council methodology for assessing the likely impact of new housing developments on school places, where necessary mitigating the impact, by securing education contributions from developers. In order to assess the impact of a development the School Planning Team consider demand for places against the capacity of primary schools within 2 miles and secondary schools within 3 miles. These distances are in line with DfE travel to school guidance and Lancashire County Councils Home to School Transport Policy.</p> <p>Planning obligations will be sought for education places where Lancashire primary schools within 2 miles and/or Lancashire secondary schools within 3 miles of the development are:</p> <ul style="list-style-type: none"> • Already over-subscribed, • Projected to become over-subscribed within 5 years, or • A development results in demand for a school site to be provided. <p>This latest consultation follows on from information provided to Rossendale</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>Borough Council planning officers by the School Planning Team, to be included in the Infrastructure Delivery Plan (IDP) July 2017. In the response SPT set out the challenges facing school provision across the district of Rossendale and the spatial area it covers.</p> <p>To enable further understanding of the challenges ahead, Lancashire County Council recently met with Rossendale Borough Council planning officers to discuss the issues and the location of strategic and non-strategic housing developments and the demand of new housing developments on the current infrastructure.</p> <p>The purpose of the liaison meetings is to understand the overall scale of housing, and the phasing across the life of the local plan from planning officers at Rossendale Borough Council. In return SPT provide the current provision across the mainstream schools, primary and secondary. The latest meeting took place on 11 September 2017; at the meeting it was highlighted the need for additional primary education places across the district. The situation across Rossendale and across East Lancashire where hot spots have emerged due to a combination of circumstances and now there is an urgent need to create additional places. Achieving additional places can be created through the expansion, or unlocking potential within existing space, and/or the potential need for a new school to meet the demand.</p> <p>The meeting was also attended by a representative from LCC Pupil Access Team who provided an overview of the issues of school placement across the district. The current situation is that many of the primary schools are at capacity with only a selected few with some capacity. The situation has been further compounded by additional children migrating in to the area who have not been in the Lancashire education system previously. Pupil Access are concerned an increased number of children are not obtaining their first choice of school and have to make key decisions over the intake criteria.</p> <p>The main areas of concern are close to the strategic site at Edenfield and developments in Whitworth, Waterfoot and Crawshawbooth and Bacup, however the majority of primary schools across the district are currently at capacity with new housing coming forward that will impact on the current and long term provision of schools located close to the developments.</p> <p>Currently there are 31 primary schools across the district, 28 of them are classed as outstanding or good by Ofsted, with three requiring improvement or inadequate. Lancashire County Council's policy would be to only expand schools good or outstanding schools and require schools falling below this to be classified as good before any expansion options would be considered.</p> <p>The situation in secondary schools follows the same pattern with most of the schools at capacity with only Fearn's showing to have capacity, however the school currently has an inadequate Ofsted rating. Parental choice may result in the remaining schools to be at or over capacity. Lancashire County Council continue to work closely with Fearn's to resolve the situation, however this</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>can take time.</p> <p>The shortfall across the district is based on the 5 year Housing Land Supply supplied by Rossendale Borough Council annually and inputted in to the housing forecast; this assumes all of the housing will be delivered, applying a worst case scenario of all dwellings to be 4 bedroom until additional information is received at reserved matters stage. School Planning are able to forecast with some confidence up to 5 years, beyond this certain assumptions are applied.</p> <p>The forecasting information provides Rossendale Borough Council with the information there will be the requirement for additional school sites or expansions to existing schools, and the need of developer contributions through Section106 agreement or Community Infrastructure Levy CIL to fund infrastructure projects. In particular the development at Edenfield which is subject to master planning and identifies a need for a suitable school site within or close to the development and look to planning officers at Rossendale to negotiate this matter with developers of the site and ensure the site meets the needs to develop a new school.</p> <p>The situation across the district of Rossendale requires a detailed review based on the understanding of the Rossendale Borough Council housing site allocations 2017 – 2032. The issue of capacity within mainstream schools is becoming an issue within Rossendale and across East Lancashire with several hot spots emerging based on the housing to be brought forward, impacting on the education infrastructure. Housing developments remains the main contributor, however, inward migration from bordering districts and the migration of foreign nationals to fulfil employment gaps has resulted in additional impact not taken into account as part of the SPT housing forecast. Lancashire County Council continue to liaise with the district council to understand and address the situation and on would like to thank Rossendale planning officers for the continued engagement.</p> <p>3 Comments Relating to Health</p> <p>Rossendale Borough Council has requested input from the Public Health Wider Determinants Team at Lancashire County Council into the development of Rossendale's Emerging Local Plan. This briefing is in response to this request for Public Health advice.</p> <p>The comments have been drafted using evidence available at the time of writing and seek to examine how the planning policies can maximise their potential to improve health and wellbeing and reduce health inequalities in Rossendale.</p> <p>This document will make numerous references to the Index of Multiple Deprivation (IMD). The 2015 IMD also allows us to view deprivation by electoral ward and this can assist us in understanding the geographic areas affected by deprivation. 1 ward in Rossendale, Stacksteads ward, sits in</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>national decile 1 which puts it in the 10% most deprived nationally. National decile 2 includes wards that are in the 20% most deprived nationally. 2 wards in Rossendale feature in decile 2. These are Irwell ward and Worsley ward. The IMD 2015 provides us with subdomains of deprivation, several of which are considered in more detail within this document. The seven domains that contribute to the IMD are:</p> <ul style="list-style-type: none"> • Income • Employment • Health Deprivation and Disability • Education, Skills and Training • Barriers to Housing and Services • Crime • Living Environment <p>Built and natural environments are key environmental determinants of health and wellbeing and the National Planning Policy Frameworkii recognises that "the planning system can play an important role in facilitating social interaction and creating healthy, inclusive communities".</p> <p>The document 'Rossendale Draft Local Plan' includes a range of policies that have the potential to contribute to improvements in health and wellbeing and reductions in health inequalities. For this potential to be maximised it is important that the proposed policies are adopted universally across Rossendale but also delivered proportionately dependent on need.</p> <p>The document 'The Marmot Review: implications for Spatial Planning'iii explains that 'in order to reduce the steepness of the social gradient in health, actions must be universal, but with a scale and intensity that is proportionate to the level of disadvantage. This is called proportionate universalism. Greater intensity of action is likely to be needed for those with greater social and economic disadvantage, but focusing solely on the most disadvantaged will not reduce the health gradient, and will only tackle a small part of the problem. Action is needed to improve health for all, but must be focussed proportionately more for those lower down the gradient, with the aim that all have the health Outcomes of the most advantaged - this is called "levelling-up."'</p> <p>As we can see in Figure 2, the majority of Rossendale's electoral wards sit within deciles 1 and 2 in the Health and Disability domain of the Index of Multiple Deprivation – this places most of the borough within the bottom 20% nationally.</p> <p>PHE: "The charts below show life expectancy for men and women in this local authority for 2011-2013. Each chart is divided into deciles (tenths) by deprivation, from the most deprived decile on the left of the chart to the least deprived decile on the right. The steepness of the slope represents the inequality in life expectancy that is related to deprivation in this local area. If there were no inequality in life expectancy as a result of deprivation, the line</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>would be horizontal".</p> <p>Figure 3v: Life expectancy: inequalities in Rossendale</p> <p>In order for the Rossendale Local Plan to achieve its potential in improving health and wellbeing and tackling health inequalities it is important that the policies it proposes reflect a commitment to this approach. 'The Marmot Review: implications for Spatial Planning' recommend this with a specific focus across the social gradient on the policy areas of:</p> <ul style="list-style-type: none"> ☑ Improving active travel ☑ Improving good quality open and green spaces ☑ Improving the quality of food in local areas ☑ Improving the energy efficiency of housing ☑ Support locally developed and evidence-based community regeneration programmes <p>Recommendations:</p> <p>As a general principle, policies that relate to the 5 areas above should be written with the aim of improving health outcomes for the whole population, with a particular emphasis on the areas of highest need (as evidenced by the Index of Multiple Deprivation and overarching health indicators). We recommend that this principle is embedded in the review process as the Local Plan is revised and updated.</p> <p>Public Health and JSNA data and intelligence should be used to further inform the local plan evidence base for health and wellbeing. Planners and public health practitioners should work in partnership with regard to the outcomes of increasing life expectancy and reducing health inequalities.</p> <p>Further Relevant Data and Intelligence: Social Isolation</p> <p>With changing family and community structures and an ageing population, increasing numbers of people, especially older adults, are becoming socially isolated or lonely. Chronic social isolation can reduce life expectancy by an equivalent amount to smoking, with chronic loneliness increasingly recognised as having far reaching consequences for the health and wellbeing of both individuals and wider communities.</p> <p>Figure 19xx: Households in Rossendale at risk of Social Isolation by Quintile</p> <p>Using Mosaic to model social isolation Lancashire County Council estimates that currently there are approximately 1,100 socially isolated households in Rossendale.</p> <p>As the map illustrates, these households are concentrated around Rawtenstall and Bacup. Furthermore, figure shows that Rossendale has a significantly higher than average proportion of older residents living in deprivation.</p> <p>Figure 20xxi: Index of Deprivation for Rossendale by Income, Child Poverty and Older People</p> <p>Future developments in Rossendale should give consideration to how the design of environments promotes physical activity in older people and reduces</p>

1774	Melanie	Lindsey	The Coal Authority		Not Applicable	<p>Background on the Coal Authority</p> <p>The Coal Authority is a Non-Departmental Public Body sponsored by the Department for Business, Energy & Industrial Strategy. The Coal Authority was established by Parliament in 1994 to: undertake specific statutory responsibilities associated with the licensing of coal mining operations in Britain; handle subsidence claims which are not the responsibility of licensed coalmine operators; deal with property and historic liability issues; and provide information on coal mining.</p> <p>The main areas of planning interest to the Coal Authority in terms of policy making relate to:</p> <ul style="list-style-type: none"> •The safeguarding of coal in accordance with the advice contained in The National Planning Policy Framework and Planning Practice Guidance in England, Scottish Planning Policy in Scotland, and Minerals Planning Policy Wales and MTAN2 in Wales; •The establishment of a suitable policy framework for energy minerals including hydrocarbons in accordance with the advice contained in The National Planning Policy Framework and Planning Practice Guidance in England, Scottish Planning Policy in Scotland, and Minerals Planning Policy Wales and MTAN2 in Wales; and •Ensuring that future development is undertaken safely and reduces the future liability on the tax payer for subsidence and other mining related hazards claims arising from the legacy of coal mining in accordance with the advice in The National Planning Policy Framework and Planning Practice Guidance in England, Scottish Planning Policy in Scotland, and Planning Policy Wales and MTAN2 in Wales. <p>Background on Coal Mining Issues in Rossendale</p> <p>Surface Coal Resources, Development and Prior Extraction</p> <p>As you will be aware, the Rossendale area contains coal resources which are capable of extraction by surface mining operations. These resources cover approximately 36.55% of Rossendale.</p> <p>The Coal Authority is keen to ensure that coal resources are not unnecessarily sterilised by new development. Where this may be the case, The Coal Authority would be seeking prior extraction of the coal. Prior extraction of coal also has the benefit of removing any potential land instability problems in the process.</p> <p>Coal Mining Legacy</p> <p>As you also will be aware, Rossendale has been subjected to coal mining which will have left a legacy. Whilst most past mining is generally benign in nature, potential public safety and stability problems can be triggered and uncovered by development activities.</p> <p>Problems can include collapses of mine entries and shallow coal mine workings, emissions of mine gases, incidents of spontaneous combustion, and</p>			

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>the discharge of water from abandoned coal mines. These surface hazards can be found in any coal mining area, particularly where coal exists near to the surface, including existing residential areas.</p> <p>Within the plan area there are approximately 851 recorded mine entries and around 148 coal mining related hazards have been reported to The Coal Authority. A range of other mining legacy features are present including a mine gas site, past surface coal mining, recorded shallow coal workings and unrecorded shallow coal workings..</p> <p>In total The Coal Authority High Risk Development Area covers approximately 19.59% of the Council area. Mining legacy is therefore a significant issue in the context of Rossendale.</p> <p>Mine entries may be located in built up areas, often under buildings where the owners and occupiers have no knowledge of their presence unless they have received a mining report during the property transaction. Mine entries can also be present in open space and areas of green infrastructure, potentially just under the surface of grassed areas. Mine entries and mining legacy matters should be considered by Planning Authorities to ensure that site allocations and other policies and programmes will not lead to future public safety hazards. No development should take place over mine entries even when treated.</p> <p>Although mining legacy occurs as a result of mineral workings, it is important that new development recognises the problems and how they can be positively addressed. However, it is important to note that land instability and mining legacy is not always a complete constraint on new development; rather it can be argued that because mining legacy matters have been addressed the new development is safe, stable and sustainable. The presence of mine entries can be a constraint as new development should not be permitted over or within the influencing distance of a mine entry.</p> <p>As The Coal Authority owns the coal and coal mine entries on behalf of the state, if a development is to intersect the ground then specific written permission of The Coal Authority may be required.</p> <p>Conclusion</p> <p>The Coal Authority welcomes the opportunity to make these comments. The Coal Authority wishes to continue to be consulted both informally if required and formally on future stages.</p>

1775	Tom	Whitehead	16 different groups		Not Applicable	<p>REPRESENTATION TO THE ROSSENDALE LOCAL PLAN, DATED 9 OCTOBER 2017</p> <p>Please accept this representation on behalf of a collective of individuals and community groups who came together to resist the Scout Moor Windfarm extension proposals (Rossendale), and the Rooley Moor Windfarm proposals (Rochdale).</p> <p>Following these two successful campaigns, as well as campaigns against other individual turbine proposals locally, the group's purpose has evolved and now includes resisting inappropriate wind turbine development in the wider north-Manchester uplands, including land in Rossendale, Bury, Rochdale and Blackburn with Darwen.</p> <p>The group has serious concerns as to the draft Rossendale Local Plan policies pertaining to wind turbine development, and these are elaborated on below. Requests to amend policy are highlighted blue for ease of reference.</p> <p>A schedule of the signatories to this submission is set out at the foot of this representation.</p> <p>REGIONAL IMPORTANCE OF THE 'UPLANDS' By way of a context, the October 2016 draft Greater Manchester Spatial Framework (GMSF) identifies "the north Manchester uplands" as a regionally important landscape, for the benefit and utility of people from the wider city region (Policy GM10). The uplands provide a valuable visual, environmental and recreational resource to the region, and are precious in their very 'open-ness'.</p> <p>Whilst Rossendale is not within Greater Manchester, its administrative area lies intimately between and around the GM authorities of Bury and Rochdale, and the moorland and upland in Rossendale's south-western sector (notably Scout Moor and the moorlands north and east of Ramsbottom) function inescapably as part of this greatly valued Greater Manchester regional upland resource. To demonstrate this regional importance, the draft GMSF policy said: "The distinctive upland landscape, including large scale sweeping moorlands, pastures enclosed by dry stone walls, and gritstone settlements contained in narrow valleys, will be protected and enhanced as part of the wider Pennine area extending to the north and east of Greater Manchester.</p> <p>The achievement of the following priorities will be particularly important:</p> <ol style="list-style-type: none"> 1. Significantly extend the area of active blanket bog, both through the protection of existing sites and the restoration of degraded areas, thereby helping to retain and capture carbon, support priority species and habitats, improve water quality, retain water, manage run-off and reduce soil erosion; 2. Enhance the full range of moorland habitats as part of an ecologically connected network, including improving upland meadows, to support increased wildlife populations and enable them to adapt to climate change; 3. Maintain the sense of remoteness, protect historic landscape features, and enhance views of and from the area, as key aspects of local distinctiveness, tranquillity and identity; 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>4. Enhance public access and promote the enjoyment of the landscape, in a manner compatible with conserving the environmental and historic qualities, thereby supporting a high quality of life, healthy lifestyles and the attractiveness of Greater Manchester for visitors.”</p> <p>Whilst in draft, this policy was included in the GMSF from the outset, and clearly demonstrates a recognition at the GM level the value of these uplands. This position reflects the position of Natural England, who identify this area as within the South Pennine Character Area.</p> <p>Given this regional significance, the north Manchester uplands are to be read as one collective of spaces, despite the considerable expanse of area they occupy, and despite straddling various different local authority administrative areas.</p> <p>LOCAL PRECEDENT & LANDSCAPE VALUE</p> <p>The decisions of three recent planning applications for turbines or groups of turbines within this GM uplands area have been taken at either Secretary of State or Planning Inspectorate level. We identify these decisions below, and in each instance, summarise the reason for refusal: 1. Scout Moor Windfarm Extension (DCLG reference APP/B2355/V/15/3139740; refused at SoS call-in; decision dated 6 July 2017); the proposed development would be visible from Ramsbottom and surrounding Bury settlements. The SoS observed that "the proposal sits within an area of valued landscape because of its openness, tranquillity and attractive views", and "would introduce prominent views of turbines where none currently exist"; in concluding, the Secretary of State factors in to the planning balance the energy-generation benefits of the proposal, and yet concludes in "weighing the benefits of the scheme against the likely harm...the planning balance falls against granting planning permission". The SoS also gave considerable weight to the level of opposition expressed by 'Affected Communities' (a term introduced by the June 2015 Written Ministerial Statement for onshore turbine development). 2. Rooley Moor Windfarm, Rochdale; reference 14/00877/FUL, determined 25 June 2015. Reasons for refusal included "Rooley Moor is specifically identified as 'unenclosed moorland' with a wild and tranquil landscape character. The proposed development of twelve turbines would have a detrimental impact on the landscape character of the area, from both short range and longer distance views and both individually and cumulatively when viewed with existing and proposed wind farm developments in the area."</p> <p>3. Turbine at Gatehouse Farm, Bamford Road, Ramsbottom (Turn Village), Bury, BLO ORT; appeal reference: APP/B2355/W/16/3152975, dated 29 November 2016. The inspector found that 'the totality of harm would not be outweighed by the environmental benefits'. It is clear that, despite claimed energy-generation benefits of turbine development, the adverse landscape impacts of such developments across this north-Manchester upland area clearly outweigh any claimed benefits. Given the regional significance of the</p>

1777	Adam	Brennan	United Utilities		Not Applicable	<p>Thank you for your consultation seeking the views of United Utilities as part of the development plan process.</p> <p>United Utilities aims to facilitate sustainable development whilst safeguarding our service to customers; and assist in the development of sound planning strategies, to identify future development needs and to secure the necessary long-term infrastructure investment.</p> <p>We wish to build a strong partnership with all stakeholders to aid sustainable development and growth within the North West. We aim to proactively identify future development needs and share our information. This helps:</p> <ul style="list-style-type: none"> ensure a strong connection between development and infrastructure planning; deliver sound planning strategies; and inform our future infrastructure investment submissions for determination by our regulator. <p>Water and wastewater services are vital for the future well-being of your community and the protection of the environment. When developing your future planning policies and supporting documents it is important to consider the impacts on its community and environment and ensure infrastructure capacity is available.</p> <p>United Utilities can most appropriately manage the impact of development on its infrastructure if development is identified in locations where infrastructure is available with existing capacity. It may be necessary to co-ordinate the delivery of development with the delivery of infrastructure in some circumstances.</p> <p>United Utilities has commented on previous stages of the Draft Local Plan preparation. Our response to your Council's previous planning policy consultations; planning applications; pre developer enquiries and planning policy liaison meeting comments are still valid and should be taken into consideration when developing your Local Plan and supporting policies.</p> <p>United Utilities now wish to submit comments to the Council for consideration as part of its Draft Local Plan which runs until 5pm on Monday 9th October 2017. The Local Plan is a key planning document for Rossendale, setting out the Development Management Policies which will be used to determine planning applications, including the allocation of sites to deliver specific types of development, over the plan period 2019-2034.</p> <p>GENERAL COMMENTS</p> <p>United Utilities wishes to highlight that we will seek to work closely with the Council during the Local Plan process to develop a coordinated approach for delivering sustainable growth in sustainable locations.</p> <p>We note that the Local Plan is proposing a number of large development sites. We would like to emphasise that new development should be focused in sustainable locations which are accessible to local services. We will be able to</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>most appropriately manage the impact of development if it is in locations where there is access to infrastructure with capacity. As more information becomes available on development proposals such as the approach to surface water drainage and the timing for the delivery of development, which is often only available at the planning application stage, it may be necessary to co-ordinate the delivery of development with the delivery of infrastructure. Many of the rural areas of the Borough will be supported by infrastructure which is proportionate to its rural location. Therefore disproportionate growth in any settlement, especially small settlements, has the potential to place a strain on existing water and wastewater infrastructure.</p> <p>Generally Greenfield sites have limited or no supporting water supply and/or sewerage infrastructure assets; they may be adjacent to existing infrastructure assets that are located on the fringe/limits of the existing water supply and/or sewerage infrastructure networks which are of a small diameter and have limited capacity to support additional capacity. Providing supporting infrastructure to Greenfield development sites could result in the need to upsize the existing assets to support the additional capacity needs; therefore this may result in a need for a co-ordinated approach to phased development in line with any supporting infrastructure works.</p> <p>We would therefore ask any future developer(s) to contact United Utilities as early as possible to discuss water and wastewater infrastructure requirements for specific sites, to ensure that the delivery of development can be co-ordinated with the delivery of infrastructure.</p> <p>We wish to highlight our free pre-application service for applicants to discuss and agree drainage strategies. We cannot stress highly enough the importance of contacting us as early as possible. Enquiries are encouraged by contacting: Developer Services - Wastewater Tel: 03456 723 723 Email: WastewaterDeveloperServices@uuplc.co.uk Website: http://www.unitedutilities.com/builder-developer-planning.aspx Developer Services – Water Tel: 0345 072 6067 Email: DeveloperServicesWater@uuplc.co.uk Website: http://www.unitedutilities.com/newwatersupply.aspx</p> <p>In accordance with the National Planning Policy Framework, we also wish to highlight the importance of surface water draining in the most sustainable way. The hierarchy to be investigated by a developer / applicant when considering a surface water drainage strategy is set out below in the following order of priority:</p> <p>a) An adequate soak away or some other adequate infiltration system, (approval must be obtained from local authority/building control/Environment Agency); or, where that is not reasonably practicable; b) Attenuated discharge to watercourse (approval must be obtained from the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>riparian owner/land drainage authority/Environment Agency); or, where that is not reasonably practicable;</p> <p>c) Attenuated discharge to surface water sewer (approval must be obtained from United Utilities); or, where that is not reasonably practicable;</p> <p>d) Attenuated discharge to combined sewer (approval must be obtained from United Utilities).</p> <p>Summary</p> <p>We trust the above comments will be afforded due consideration by the Council in the preparation of its Local Plan. United Utilities would welcome the opportunity to meet with Rossendale Borough Council to discuss our response in detail.</p> <p>In the meantime, if you have any queries or would like to discuss this representation, please do not hesitate to contact me.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
1781			Rossendale Civic Trust		Not Applicable	<p>1. Overview – Local Plan’s local history:</p> <p>A. 4 years Delayed Progress: Rossendale Civic Trust, after seeing Rossendale Borough Council deliver a Core Strategy well before others such as Bury and Blackburn, then saw progress slowed by reduced staffing and politically driven policy changes, and note these 2011 Planning Inspector’s expectations:- Report to Rossendale Borough Council by Roland Punshon BSc Hons, MRTPI an Inspector appointed by the Secretary of State for Communities and Local Government 10 October 2011...concludes that the Rossendale Borough Council Core Strategy Development Plan Document provides an appropriate basis for the planning of the borough over the next 15 years. The Council has sufficient evidence to support the strategy and can show that it has a reasonable chance of being delivered.....</p> <p>24. PPS12 requires that the CS should provide a policy basis for at least 15 years from the date of adoption. The Council expects adoption to take place in 2011 and, in line with the guidance, the plan period ends in 2026. I have taken into account concerns that, by the time the Council’s Site Allocations DPD is prepared and adopted, only about 13 years of the plan period would remain.....</p> <p>25. The fact that the Site Allocations DPD may not be in place until 2013 should not prevent the Council from giving pragmatic consideration to development proposals before that time.....</p> <p>B. RCT, after RBC’s 15 September reply to Freedom of Information Request – FOI/3684 on LOCAL PLAN POLICY 2 – DENSITIES DELIVERED 2011-2015, came to conclusion. Rossendale could soon be “built out” with low density developments surely not in accordance with the Local Plan’s Core Strategy, nor a way to deal with our national need to build for an increasing and not that rich population; and a need to take note of Census occupancy figures.</p> <p>C. RCT then saw 24th February 2016 the formal Notice of Withdrawal of draft Local Plan Part 2 “Lives and Landscapes” and:-</p> <p>3 Mar 2016 - We have started a campaign “Keep Rossendale Valley Green” and our Council Leader Alyson Barnes has written a letter to David Cameron ...</p> <p>The Tory Government want to build over 5,000 new houses in Rossendale. We know that there is a national housing shorting and we want to play our part but the number of new houses is just too much for Rossendale to cope with. Rossendale is set in steep valleys which leave little room for building. Large areas of green belt land will need to be built on to accommodate 5,000 houses.</p> <p>We have started a campaign “Keep Rossendale Valley Green” and our Council Leader Alyson Barnes has written a letter to David Cameron asking him to reverse his government’s decision to force the Council to build houses that will damage our Valley forever.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	General	Further comment
						<p>We want as many people as possible to join the campaign and so we are asking you to add your name to Alyson's letter asking David Cameron to reconsider. You can sign the letter and read more about the campaign at: http://www.keepprossendalevalleygreen.co.uk/</p> <p>D. RCT now see, from Jake Berry MP Rossendale and Darwen 14 September 2017:-</p> <p>One of my priorities at the last election was to defend our local countryside from over development so I'm really pleased to confirm that our local housing figures, which have caused such controversy are set to be dramatically slashed. There was outrage last year when plans were published to build up to five thousand new houses across the Rossendale Valley, when the Council controversially selected playing fields, countryside and football pitches for development.</p> <p>Under the Government's new plans announced today, currently being consulted upon, Rossendale will see it's housing figures cut by over half from the plans previously proposed by Labour. The numbers for Blackburn with Darwen Borough council have also been reduced.</p> <p>I'm delighted that after raising this issue at the highest levels that I've been able to get the housing figures reduced to protect more of our local green spaces. Rather than playing political games, I've got on with the job, working on a cross-party basis and I'm so pleased that we have succeeded. This is a victory for everyone here in Rossendale & Darwen.</p> <p>Given the reduction we have managed to secure - I'm calling on the Councils to now suspend any proposal to remove land from our green belt and prioritise new developments on brownfield and former industrial sites. The Government's new figures apply from April 2018 and are subject to consultation but they confirm that the number of new homes required for Rossendale over the next 10 years has been reduced to just 2,120 and the numbers for Blackburn with Darwen have been cut to just 1,530.</p> <p>RCT note how practicalities must not stand in way of politics.</p>

1789	Jackie	Copley	CPRE		Not Applicable	<p>1. The Lancashire Branch of the Campaign to Protect Rural England (CPRE Lancashire) is pleased to comment on Rossendale Council's draft Local Plan Regulation 18 consultation document.</p> <p>2. CPRE as the leading countryside charity is an advocate of plan-led 'sustainable development', with a focus on urban concentration, so that harm to the countryside and green space in urban places is minimised. We recommend the use of sustainable development to make the best use of existing infrastructure and to halt built intrusions into rural landscapes.</p> <p>3. Of course, we want to see the Borough's needs properly planned as this leads to more sustainable development than sporadic speculative development especially in rural areas. Rossendale's countryside is a natural asset of considerable local pride and enjoyment to residents, businesses and visitors.</p> <p>4. Yet every year our countryside is under increasing threat from development, and despite commitments from both national and local Government to protect it, beautiful countryside is 'unnecessarily' lost. CPRE campaigns for the re-use of available, previously used land, where not of environmental value, in advance of sacrificing our green fields. Once countryside land is built, it is gone forever.</p> <p>5. The adoption of a 'sound' local plan will help Rossendale Council allocate enough land for new development in sustainable locations. We wish the forward planning team every success in this challenge and we set out comments to specific policies below: (please see specific policies)</p> <p>Summary</p> <p>25. CPRE Lancashire wishes Rossendale's Forward Planning Policy Team every success with progressing the Local Plan documents. We hope that the value of previously developed land to the delivery of new jobs and homes will be effectively realised in the document to save 'preventable' countryside and green space loss, especially Green Belt designated land, so that it will be protected and enhanced in the future.</p> <p>26. If you require any further information, please do not hesitate to contact us.</p>

Please see plan in appendix

164	Philip + Tilly	Hellawell			Support	<p>Dear Natalie,</p> <p>Thank you for your time on the telephone earlier today.</p> <p>Following our conversation and as promised, I am enclosing an indicative plan of our field adjoining Todmorden Road. It has the benefit of straightforward and uncomplicated access from Todmorden Road and so it appears to make sense to consider its inclusion in your latest consideration of potential for housing and is right next to land already included in the recently published long range plan for the Borough's housing needs. The difference is that our field is much more accessible.</p> <p>I should add that access to Bull Hall Barn's field would, I imagine, involve partial use of the very narrow lane to Bull Hall. That also raises the difficulty of a high, collapsing retaining wall supporting the lane behind the 2 semi detached houses(Chapel Villas). That lane is at a raised level and directly looks towards the rear bedrooms of the two houses just a few feet distant and at the SAME level..</p> <p>You could expect an understandable concern by the owners of both houses on both material counts.</p> <p>That alone may merit a planner visiting to inspect these predictable issues.</p> <p>Please acknowledge receipt and we'd love to hear whether and how we might progress our suggestion. If so we would approach our lessor who we believe may be interested in collaboration.</p>

461	Lee	Jeys			Support	<p>Dear Sir / Madam</p> <p>Representations on Emerging Local Plan Land south of Lumb Village, Ramsbottom, Bury, Lancashire</p> <p>We are instructed by Lee Jeys to submit these representations objecting to the omission of his land as a housing allocation for up to 5 dwellings in the emerging Local Plan. A site location plan accompanies these representations, and the site's location is marked (very crudely) by the red asterisk on the extract from the draft Proposals Map below.</p> <p>Mr. Jeys' land is well known to the Council and has recently been the subject of an allowed appeal in respect of a timber building constructed for the purposes of working and storing wood (ref: APP/B2355/C/15/3139574).</p> <p>We contend that this is a brownfield site that ought to be released from the Green Belt and allocated for up to 5 houses.</p> <p>In the spirit of openness, we acknowledge that the appeal Inspector presented a contrary view concerning the status of the land in her paragraph 16 : 'The Council takes issue with the contention that the land is a previously developed site. Whilst the site in the past accommodated several buildings, including a mill, these buildings were demolished in the 1990's. Over the years the land has become largely covered over by vegetation and has the character and appearance of woodland, open clearings and riverbanks. Whilst there is some evidence of foundations, fragments of walls, roads and hardstandings these industrial remains are such that they have blended into the landscape. Having regard to the definition of "previously developed land" at Annex 2 to the Framework I am inclined to agree with the Council that the site cannot be regarded as previously developed land.'</p> <p>Notwithstanding that, we continue to maintain that the land is previously developed and that the Inspector's judgement in that regard is flawed. Inspectors can and do of course reach incorrect judgements, as evidenced by a long series of legal challenges that have overturned appeal decisions.</p> <p>Our client's stance is that much of his land is indisputably brownfield. Very large expanses of stone and concrete foundations and walls are evident, and while the site may appear verdant in parts, that is very much around its periphery. The Council presented historic photographs of the site as part of its appeal evidence, which offered the appearance of dense woodland on the site. What those photographs do not reveal is that that 'greenery' was little more than a sea of Himalayam Balsam and small, poor quality self set saplings struggling to grow through narrow gaps in the foundations of the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	New site	Further comment
						<p>former mill. It is also worth highlighting that our client operated on the advice of the Forestry Commission, and associated correspondence was presented in support of the above appeal.</p> <p>It is also worth highlighting that Himalayam Balsam is an invasive weed, and carries a particular threat close to rivers and streams (as in this case). The following advice is reproduced from the website of the Royal Horticultural Society :</p> <p>What is Himalayan balsam? Introduced to the UK in 1839, Himalayan balsam is now a naturalised plant, found especially on riverbanks and in waste places where it has become a problem weed.</p> <p>Himalayan balsam tolerates low light levels and also shades out other vegetation, so gradually impoverishing habitats by killing off other plants. It is sometimes seen in gardens, either uninvited or grown deliberately, but care must be taken to ensure that it does not escape into the wild.</p> <p>Appearance Himalayan balsam is a tall growing annual, 2-3m (6-10ft) in height. Between June and October it produces clusters of purplish pink (or rarely white) helmet-shaped flowers.</p> <p>The flowers are followed by seed pods that open explosively when ripe.</p> <p>The problem Each plant can produce up to 800 seeds. These are dispersed widely as the ripe seedpods shoot their seeds up to 7m (22ft) away.</p> <p>The plant is spread by two principal means;</p> <ul style="list-style-type: none"> • The most widespread distribution tends to be by human means where individuals pass on seed to friends • Once established in the catchment of a river the seeds, which can remain viable for two years, are transported further afield by water <p>As such, while our client has openly cleared parts of his land, it is important that the LPA does not labour under the impression that he has removed a rich Tolkeinesque ancient woodland. He has simply sought to remove a serious, unattractive and dangerous problem, which if left would have spilled out into the adjacent countryside and further downstream.</p> <p>Notwithstanding any debate about greenfield versus brownfield (and bearing in mind that the Council is in the process of proposing the release of far larger and greener / more attractive swathes of Green Belt land elsewhere in the Borough), we suggest that the site is ideally suited for a small, bespoke, high quality housing scheme – up to 5 large detached dwellings of excellent design and strong sustainability credentials. Such a development would not only make a</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	New site	Further comment
						<p>meaningful and much needed contribution towards Rossendale’s housing land supply, but it would also efficiently and sustainably reuse what we continue to maintain is brownfield and unsightly land, and could cross subsidise environmental improvements through tree and ecological mitigation and maintenance.</p> <p>The site barely fulfils any meaningful Green Belt function. Aside from being barely visible, it is unattractive in appearance, with large expanses of concrete, stone footings and remnants of walls and other structures. Public views towards the site from the wider Green Belt are very limited / glimpsed, such that the site does not read as part of the wider open landscape or countryside. It is essentially a self contained mini-parcel that does not fulfil a wider Green Belt role, and - unlike some of the other sites that are being proposed by the Council for release - it is not readily visible from wider vantage points and does not fulfil the purposes of Green Belt designation.</p> <p>Considering the five purposes of the Green Belt as set out in the NPPF, we comment as below :</p> <p>To check the unrestricted sprawl of large built-up areas</p> <p>A small, discrete and high quality housing scheme would not result in the unrestricted sprawl of a large built up area. The site is an ideal site for release from the Green Belt, for reasons of its self4 containment; its relationship with Lumb as a small but sustainable settlement; its clear, defensible boundaries; and its lack of overall visibility. The careful and sensitive design of much needed homes, with substantial areas of open space that adjoin the adjacent Green Belt could not sensibly be seen as ‘urban sprawl’.</p> <p>To prevent neighbouring towns merging into one another</p> <p>We acknowledge that – in two dimensional (plan) form - the wider parcel of Green Belt (of which the site forms a minute part) plays an important role in preventing the merging of built up areas, but the specific role the application site plays in that is negligible, and certainly when the site and context is considered in three dimensions. The erection of up to 5 houses on the site (having regard to its limited visibility and substantial boundary features) will be barely perceptible when considering both the actual and perceived gap between settlements.</p> <p>To assist in safeguarding the countryside from encroachment</p> <p>The site does not read as part of the wider countryside, partly because of its poor and largely brownfield condition, and partly because it is barely visible from any public vantage point. Building houses on this site would not therefore constitute material encroachment into the countryside.</p> <p>To preserve the setting and special character of historic towns</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	New site	Further comment
						<p>The site does not fulfill any role in preserving the setting or character of any town.</p> <p>To assist in urban regeneration, by encouraging the recycling of derelict and other urban land</p> <p>It is very evident that, while the emphasis correctly remains on reusing brownfield land, there is insufficient brownfield land to accommodate the future needs of the Borough. The extremely low brownfield target (20%) set out in the emerging Plan is testament to that, as is promotion of sizeable Green Belt sites across the Borough. The emerging Local Plan recognises that :</p> <p>‘Previously developed (brownfield land) has been identified wherever possible but the supply of sites without significant constraints within urban areas is limited.’</p> <p>As such, we contend that retaining the application site within the Green Belt plays no part in the encouragement of the recycling of derelict or other urban land.</p> <p>In conclusion, we contend that the site is an excellent site for release in respect of its self-contained nature; its clear defensible boundaries; its relationship with the established residential area (Lumb); its relative lack of constraints; its modest scale and the modest amount of new houses proposed (up to 5 homes); its lack of visibility from the wider Green Belt and most public vantage points; and in turn the limited extent it ‘reads’ as part of the wider Green Belt in respect of its openness.</p> <p>We anticipate that the LPA might point to §55 of the NPPF, which indicates that new housing should not be approved in ‘isolated’ locations. We suggest that the site should not be viewed as isolated in the true sense, simply because it does not form part of a settlement. The site was, of course, home to a major mill that was constructed close to homes for its workers. The site has a ready made vehicular access well suited to serve a small number of homes.</p> <p>The aerial image above shows the site in relation to the settlement of Lumb (to the north). The 100 metre line marks the distance from the centre of the site to what we understand to be a recently built new dwelling approved under application ref: 2014/0335 at Vale Lodge, Lumb. While we have failed to extract the details of that application from the Council’s website, the following description confirms that a new dwelling was approved in this location : ‘Demolition of part of existing dwelling house and construction of proposed new detached dwelling while retaining remainder of Vale Lodge as a separate detached dwelling. (Design and details of proposed detached house as approved scheme 2014/0127) [approved on 7 October 2014].</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	New site	Further comment
						<p>The relevance of that planning permission is that the LPA clearly did not consider that new dwelling at nearby Vale Lodge to be in an 'isolated' location. Had it done so, that application would have been refused. Our client contends that his land is no more or less 'isolated' than Vale Lodge.</p> <p>The aerial image above also shows the proximity of the site to the closest property in Edenfield (marked by the 200 metre annotation).</p> <p>Our client's site is served by mains water immediately at its periphery, with an electricity transformer. Foul sewerage could readily be accommodated in septic tanks, and we understand that the current nearby cottages pump their foul up to a treatment plant. We therefore suggest that this site should not be considered 'isolated'.</p> <p>The site is readily available and owned by a single willing owner, and is ideally suited to accommodate the type of housing required in Rossendale within the next 5 years, as is recognised by the emerging Local Plan :</p> <p>'The SHMA particularly highlights a need for larger, aspirational property types in Rossendale to rebalance the stock away from small terraced properties and reduce the high levels of outmigration to adjoining areas.'</p> <p>We therefore request the Council to give due consideration to the release of this site from the Green Belt and its allocation for up to 5 houses.</p> <p>We look forward to confirmation of receipt and validation of these representations, and please do not hesitate to contact Richard Gee at these offices if anything further is required.</p> <p>Please see appendix for attachments.</p>		
465	Christine	Lamb		Brearley St garage	Support	Christine Lamb came in and was asking again about the Brearley St garage colony site in Stacksteads. She and Jackie Oakes are really keen to have it included in the Plan because there are continuing problems with vandalism, etc. It seems the northern half is owned by Together Housing but the remainder is unregistered. As we are now open to sites of 5 houses and over she thought it could now be reconsidered.		
639	Roy	Lister	-		Not Applicable	(...) - Please try and concentrate on developing any Brownfield sites along with redundant buildings and former Industrial sites. - - SUGGESTED SITES:- - 1) The old Poundland store site on Newhalley Rd. - 2) The old Broadley Factory site on Burnley Road (A682) - 3) Land opposite the bottom of Woodcroft St. (A682) The old White Factory site. - 4) Land at the old Social Services day care centre on Haslingden old road. - (This building has been closed for over two years at least) - 5) Site of "Horncliffe House" on Bury Rd. (Ex A56) Closed and in disrepair. - 6) Site of former Holmfield Garage on Burnley Rd (A682) - -	-

740	Linda	Bohen			Support	I wish to submit a development site to your attention for consideration for housing when consulting on the draft Local Plan. Please see appendix for attachments		
944	N/A	N/A	Britannia Hotels Limited	HS2	Object	Land to the south of east of Tonacliffe Way / Meadowhead Avenue should be allocated for housing development. - - The land is identified on the accompanying drawing (Prestwich Design Group drawing No.01-Rev.A) as Site 2, being about 0.5 hectares of land. The site has in the past enjoyed the support of the local authority officers and Members for housing development, but was lost to an unexpected Green Belt designation. It remain one that is suitable for housing development and has potential to accommodate in the order of 15 units. The landowner is a willing and well financed developer, ready to bring the land forward for development that can contribute towards meeting the current shortfall in the Borough's housing development numbers The relatively small scale development in this location is readily accessible from Tonacliffe Way and would be a logical extension to an existing area of housing, which can be accommodated without adverse visual or other impacts small. Please see appendix for attachment.	No	
1550	Shelley	Carter			Support	The Brownfield area on Burnley Road (A671) which is currently occupied by the derelict Leisure Hall would be an ideal social housing site, as it is within walking distance of Bacup town centre. Another Brownfield site on Burnley Road (A671) is even nearer to Bacup town centre. This is the derelict Waterside Mill which is to be included in the Bacup Town Centre Conservation Area. I personally think that it's unlikely that this site will ever be used for commercial purposes in the future. Due to the present state of dilapidation and the cost of repairs to bring the building into use, its only hope for preservation would be to convert it into apartments, as in the case of Ilex Mill at Rawtenstall.

67	Adam	Taylor		SHLAA16072	Object	<p>with ref the above document that was recently published on the Rossendale Local Plan 2019-2034, I wish to voice my objection to this proposal. There are several points in the report that would suggest this has not been thought through properly. Firstly, the land suggested is not public land, and is not currently in a derelict condition. Its home to a farm/riding stables and grazing business. The proposal also states that the landowners intentions are “unknown or not willing to release the site” - coupled with the fact its being used on a daily basis suggests that its not available. Access to the site is via a single width unmade private road, which passes directly behind the houses at the top of The Moorlands. Any building work is going to require years of noise, heavy machinery, constant wagon deliveries, road widening, and dirt/mud everywhere. The unmade road would need widening to accomodate two lanes of traffic, and this could entail the removal of a large number of trees from the woodland directly behind The Moorlands. This increased road size, and traffic will also reduce the current levels of privacy. This would be a huge problem for anyone living on The Moorlands, severely impacting upon both quality of life and the property valuations. One of the factors in deciding to buy my house on The Moorlands is because when the searches were done (only two months ago). There was no suggestion the land behind would ever be anything other than farmland. Road access in Weir is already very restricted. There are only two minor roads that feed traffic from the estate onto the main road, so all traffic from the entire village pass through The Moorlands or Heald Lane. Adding a new estate behind The Moorlands will only increase the already busy traffic flow so that not only will it be in front of the houses, but also passing directly behind as well. Add to this the Burnley Road is just a few metres away to the west and suddenly a relatively peaceful backgarden will become almost unusable because of the road noise and exhaust fumes.. Facilites in Weir are almost non-existent. No doctors, shops, schools. There is one primary school located on the main road at the lower end of Weir, but i doubt it has the capacity to accept many more pupils. The road does become incredibly congested at school start/end times. More pupils will mean more congestion and an increased risk of traffic related accidents. The nearest shops and Doctors surgery are almost two miles away. Bus services in Weir are very limited. The result is that private car journeys have to be relied upon for everything, so adding a new estate will multiply the number of journeys being made. A walk around the existing village reveals that almost every house owns at least two cars. Thus it can be surmised that for 62 proposed new properties 120 cars will</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>be adding to the traffic.</p> <p>The wider Rossendale area may also be affected by increasing the traffic to and from Weir. The nearest access to the motorway network is approximately 6 miles northwards, 8 miles away westwards, or over 10 miles to the south. The roads in all those directions are single lane carriageways that are always busy. There is very little scope for adding more traffic without causing major holdups for everyone. There are also few alternate routes due to the geography of the region.</p> <p>Although i have not yet experienced a winter in Weir, several people have told me how snow is more of a problem than for other lower lying towns. When others get rain, Weir gets snow, and the first signs of snow mean many people park their cars on the main road to ensure easier road access. Again, adding more cars will exacerbate the current problems and could impact on the Gritters ability to ensure the roads remain clear!</p> <p>I completely disagree with the assesment that the land is viable for long term development. There are far too many improvements required to the current infrastructure and to the village as a whole that would require funding and implementing before such a proposal could be considered.</p> <p>Shops, schools, better road networks would all need to be in place.</p> <p>And i haven't even mentioned the negative impact all of this would have on the landscape, and the surrounding natural habitats.</p> <p>One of the challenges set out on the Lancashire County Councils Environment Directorate "Woodland Vision, 2006" document relates specifically to the Enclosed Uplands area of Rossendale: "Protect the open character of the upland summits" - building a new estate at the highest point in Weir certainly does nothing to achieve that goal!</p> <p>It also states amongst the Opportunities for Enclosed Uplands:- Enhance the habitat mosaic of the Enclosed Uplands Landscape Exploit opportunities for woodland creation on less viable agricultural landholdings.</p> <p>So the land being earmarked should be considered for Woodlands, if its not viable as agricultural land (which it is currently being used as). the document can be read online at http://www.lancashire.gov.uk/media/191686/Composite-1-5.pdf regards</p>		
334	Joe	Littlewood	-	Land adj to Guide Court	Object	<p>Development of Land adjacent to Guide Court, (Rawtenstall side) ? Pimhole. I only moved in August 2016. I gather an application for development was refused in 2015. My neighbour at X Guide Court advises me that the main reason for rejection was potential flood peril. I fully support the views that he offers.</p> <p>Inadequate Infrastructure. Destroys Village characture.</p>		Not at the moment.

463	Sean	Taylor		SHLAA16314	Object	Hello, thank you. I am still keen to pursue the residential possibility in the future. I believe the green belt boundary should begin at my boundary with Langwood since it cannot be stated reasonably that my land is green belt, considered to be open countryside, when it has residential development on 3 of its 4 sides. However, I understand there is more goes into these decisions that just that and the parcel considered included neighbouring land and my land was not a consideration as a standalone parcel. Thanks for your helpful links,		
466	Sharon	Brown		Between Meadows Drive and Thirlmere / Ullswater	Support	<p>I wanted to let you know that I am pleased to hear that the Council have decided not to action the plans to build 11 houses between Meadows Drive and Thirlmere/ Ullswater and that the site is currently not being taken forward to build on.</p> <p>i sure, on making this decision, the Council have taken into consideration the following points:</p> <p>The historic English Heritage site, Goodshaw Chapel, which is visited by people from all over the World. Visitors come to the graves, researching their family tree and taking part in special ceremonies. I have even seen burials taking place. It is a very peaceful area.</p> <p>Families are frequently seen playing football and enjoying the open space. Rossendale Valley is a very beautiful place to live that I am proud to be a resident of, but I also want to protect areas that are popular to visitors. I often see hikers walking along 'the back lane' marvelling at the views and families walking down the lane to the local primary school in Crawshawbooth. In the afternoon, they walk back up the lane to go home. They take this route as opposed to the busy main Burnley Road because it is such a beautiful area, their children can run on in front without the worry of heavy traffic.</p> <p>The Council may not be aware but the area is very popular with the Jewish community who like to come to Rossemdale on the X43 bus for a day out. They walk along the lane to the Reservoir, they are appreciative of the lovely Rossendale countryside. I hope the Council and myself never become complacent and always find ways of promoting and protecting this wonderful visitor attraction, The Rossendale Valley.</p> <p>If Councillor Farrington has plans to plant bulbs, weed this area to further enhance its beauty, I would be happy to get involved.</p>		
471	Veronica	Rees-Davies		Back of Goodsure Ave.	Support	I am writing to send my whole hearted thanks for denighing building of new houses on the back of Goodsure Ave. by Goodsure Chapel, Loveclough. We were particularly worried as we live in x Chapel View. Loveclough.

478	Sara	Young		SHLAA16096	Not Applicable	I am a little confused by the new local plan in relation to a plot of land near to my home. Could you please advise if the area of land – ref SHLAA16096, off heap moss farm/greens lane– is still being considered as a building plot. I cannot see it on the ROSSENDALE DRAFT LOCAL PLAN Regulation 18 Consultation but have found it on Appendix E sites assessment. Could you please advise.		
483	Nabil	Isaac		Pinfold site	Not Applicable	Email received 21/08/2017: Hello I would like to inquire whether Pinfold site in Edenfield is included in the current consultation or not? We reside at BL0 0GL and we strongly oppose removing it from green belt as will destroy the scenery as we do regular walking along Burnley Road. Also water drainage pours into the low level land protecting our house from flash flooding.

490		Vines, Jackson & Preston		SHLAA16180	Not Applicable	<p>Land at Marl Pits, Newchurch Road, Rawtenstall</p> <p>We are instructed by Mr M Vines, Mrs K Vines, Mrs L Jackson and Mrs A Preston (as joint owners) to submit these representations objecting to the omission of their land as a housing allocation in the emerging Local Plan. We contend that this is an accessible and sustainably located site that ought to be allocated for up to 60 dwellings. The site's location is marked (very crudely) by the red asterisk on the extract from the draft Proposals Map below.</p> <p>A separate location plan is enclosed, as produced by RGP Architects (drawing ref: 04). That shows the full and precise extent of our client's landownership, and superimposes the proposed settlement boundary extracted from the draft Proposals Map. It will be noted on the RGP drawing that almost the entirety of our client's land falls within what is proposed to be the amended settlement boundary. That is welcomed by our client.</p> <p>This is clearly an excellent housing site. It is located sustainably on the edge of the built up area, close to established housing of good quality and value. The fact that the site currently falls just outside the defined settlement boundary is noted, but so too is the proposed 'extension' of the settlement boundary on the draft Proposals Map to include the overwhelming majority of our clients' land. That 'extension' is welcomed and supported, but our clients maintain that that represents only stage one of what ought to be a two stage process – namely that the site calls to be allocated specifically for housing (in much the same way that the Council has treated other comparable sites – for example, nearby site ref: HS2.53).</p> <p>It is worth noting that highways-related advice from DTPC has confirmed that – from a technical perspective – a safe and efficient access into the land can readily be delivered.</p> <p>In the Core Strategy (CS), the site does not fall within any designation. The Proposals Map extract below marks the site (red arrow), and it will be seen that it falls just outside (to the north of) the defined Urban Boundary (marked by the dark red line). The eastern section of the site falls within the large green area associated with the leisure centre. Policy 2 of the Core Strategy outlines the housing requirement in Rossendale over the plan period, with a target of 247 dwellings per year stated. In the CS, the aim is to achieve 65% of new residential development on previously developed land (PDL) (and so, by definition, 35% will be on greenfield sites), and encourage higher density development (50+ dwellings per hectare) in sustainable locations, including those within or adjacent to Rawtenstall. A minimum density of 30 dwellings per hectare across the borough will be expected.</p> <p>In that regard, it is interesting to note that the draft Local Plan is suggesting a much lower 20% target for brownfield land, which is further recognition of the need to release greenfield land if the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>Borough's housing needs are to be accommodated. Our client contends that the Council ought to be releasing their site in advance of the numerous Green Belt and other arguably less sustainable sites that are being promoted for housing elsewhere in the draft Plan. The site was of course considered as part of the Council's Strategic Housing Land Availability Assessments 2015, and as the assessment form demonstrates that – in spite of scoring a '0' for access as "a major constraint" (which we consider to be incorrect, based on dedicated highways advice from DTPC) – it was proposed to be allocated for housing as a 'Phase 2' site. That assessment / conclusion is clearly helpful in taking matters forward, and is a further reason why this land should be the subject of a housing allocation in the Local Plan.</p> <p>The site is ideal to accommodate the type of housing required in Rossendale, as is recognised by the emerging Local Plan : 'The SHMA particularly highlights a need for larger, aspirational property types in Rossendale to rebalance the stock away from small terraced properties and reduce the high levels of outmigration to adjoining areas.' We therefore request the Council to give due consideration to the allocation of this site for up to 60 dwellings. We look forward to confirmation of receipt of these representations, and please do not hesitate to contact Richard Gee at these offices if anything further is required.</p> <p>Please see appendix for attachments</p>		
498	John	Barnes		SHLAA16343	Object	<p>Re the plans for the future development for Rossendale Borough Council. I enclose "2" two plans of land that has been requested by three developers for future development.</p> <ol style="list-style-type: none"> 1. Land at Rising Bridge road, suggested for 24/26 no old peoples, one bedroom bungalows? 2. Land for housing/industrial development. Please look to the inclusion of these land for the future development. <p>Thanking you. Please see appendix for attachments</p>

535	Claire	Downes	-	shlaa16395	Not Applicable	I have contributed to the previous consultation (July 2015). It appears that the land which concerns my family ie 'The Land at Moorland Rise, Haslingden' (H92 in the previous consultation) has now been safeguarded as Green Belt in the new consultation proposal. I firmly support this and thank the planning team for their recognition of the value of the Greenbelt land for the community. - - The land to the East of Moorland Rise, behind Moorland Cottages, and stretching towards the new development at the Rossendale Hospital site is highly used recreational land, benefitting walkers, dog owners, cyclists and horse riders. It is beautiful and highly visible across the valley. It is lightly farmed and contains a wide variety of wild flowers and wild life. - - Development of the land would be a great loss to the local community and would blight the landscape for ever. I believe that this particular area has already carried enough of the burden of local development with the many houses on the Rossendale Hospital Site and the proposal of further housing developments behind Kirkhill Rise and adjacent to the current Hospital development. - - - - -		I appreciate that you have to find a certain amount of land for new housing. Skyline/highly visible developments in our beautiful valley should be avoided at all costs, as should the destruction of the countryside by profiteering landowners/developers eg
606	M	Hargreaves		Goodshaw Lane	Object	I object most strongly to the possible boundary change on Goodshaw Lane, Goodshaw. According to the planning officer at the meeting in Kay St. Baptist Church the change has been requested by 'three or four people' presumably the land owners who want to make the area an even more attractive proposition to developers. Any such change brings the appalling prospect of even more traffic on a narrow, single track already dangerous road which is used by numerous children going to and from school, walkers, cyclists and people taking their pets to the recently opened kennels. Goodshaw Lane becomes almost blocked and parking totally impossible when St mary's the remaining church of england church in the area is used for services, baptisms, weddings and funerals. At most times emergency service vehicles have a difficult task trying to negotiate both Goodshaw Avenue and Goodshaw Lane ---- without the prospect of more traffic. Site reference SHLAA16196 Suitability ---Comments ---Goodshaw Lane is at high and medium risk of surface water flood risk. Anyone using the lane after a 'downpour' will acknowledge the truth of this.		
618	DENISE	SYKES	-	land between Blackwood Road and Greens Lane Stacksteads	Not Applicable	I am relieved that the land between Blackwood Road and Greens Lane Stacksteads has not been included as suitable for development in the local plan . The area has poor access and drainage would be a problem . The land is a valuable green space with benefit to wildlife . - It is sad that the land is currently unused , it is valuable grazing land which could be utilised by livestock owners in the area		No

677	Phil	Ramsden	Lindon Park Development Park Road s Ltd	site off Lindon	Not Applicable	In summary, this representation has commented upon and highlighted concerns regarding various policies within the Draft Local Plan, with particular reference to the Representor's site off Lindon Park Road, Ewood Bridge, Haslingden. - - The Representor is of the view that the proposed and allocated sites in the Draft Local Plan need to be fully reviewed to ensure unnecessary pressure is not put upon existing urban areas and the associated infrastructure. In addition, a degree of flexibility should be incorporated into policies HS4, HS5 and HS6, with a particular emphasis in ensuring the sustainability and viability of development. - - The Representor proposes a change of designation of their site off Lindon Park Road from Green Belt to Housing, which could reduce the pressure on urban areas and their infrastructure and reduce the overall amount of greenfield land which must be allocated for development. Such a change in allocation would be suitable given the extant planning permission for housing which exists on the site and would be particularly useful in meeting housing targets, given the borough's history of poor delivery rates due to lack of suitable, viable and available development sites. -		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
756	John	Simpson	-	SHLAA16306	Object	There appear to be some discrepancies about this site. - On the site assessment, the area is given as 2.14 hectares and the plan shows the entire area of open land between Helmshore Road and York Avenue. On the Corrected Policies Map 2017 with street names, the site is given no designation, reference number etc. apart from one part of it being shaded green for Green Infrastructure. What exactly is the area which it is proposed to be given over to housing? - In terms of legal constraints on the site, it should be remembered that, according to Rossendale Borough Council's own records, at least 2.7 acres of the site (about 1.09 hectares) was to be left as an open space for play etc. as a substitute for that part of Victoria Park that was to be lost to the Haslingden by-pass. Unless the Borough Council intends to renege on this agreement, the area available for possible housing development is about 1.05 hectares, not 2.14. -		RBC should concentrate on the conversion of former commercial property in towns into residential properties: - 1. High street shopping has changed with the number of supermarkets in the valley and online shopping. Towns do not need the same number of shop units. Banks etc which are closed are never going to reopen as banks and so again could be converted into apartments (at least in part, e.g. the upper storeys of the former Barclays Bank in Haslingden). - 2. This would reduce the need to build on so much of the Green Belt as is proposed, especially if, as is alleged, central government has reduced targets for the number of new houses that have to be built. - 3.Flats etc. would be more affordable for first time buyers, single people (one in three people in the UK now live alone) etc. - 4. Such developments provide a realistic attempt to address the problem of the homeless, which three and four bed-roomed houses etc do not. -
764	Chris	Aspin	Helmshore Local History Society	SHLAA 16306	Object	When the Haslingden By-pass was built, a section of Victoria Park was lost. The land at Helmcroft was opened up in compensation.		Helmshore has more than enough houses. More would place an extra burden of the local schools and the Health Service. More cars, more problems.

783	Lucinda	Dudarenko	-	SHLAA1616249	Object	Regarding Green Belt Land at Haslam Farm Ref: H23 Townsend Fold - - Would you kindly consider my objections to the above land being removed from its present 'Green Belt' status. Whilst I am aware that you are obliged by a Government directive to build houses, I am also aware that there are lots of Brownfield sites available around the valley and I respectfully say these should be considered first before robbing people and the future generations of what little green space we have. This area in particular is, in my opinion, too small to be used for any other purpose than what it is used for namely 'it is grazing animals and a beautiful wildflower meadow. It has a plethora of wildlife (Hares, Bats, Rabbits, Foxes, Badgers and many different species of bird) All this would be lost if you closed this gateway into Rawtentall. - - Another major consideration would be logistics – namely entry and exit onto the site. The site on one side is too steep and the other side too narrow (and both ways Dangerous!!!) Parking on Bury Road especially in Winter is nigh on impossible, the first sign of frost and cars from the neighbouring hilly roads have to find space somewhere on Bury Road, if – as is proposed – 45 properties are build most of which would own one vehicle (maybe two) it would cause even more congestion on a massive scale. - - Schools places would also present a problem; it is a genuine concern for parents to find a place for existing children without adding to the situation with more youngsters to find places for. - - Visitors coming into Rawtenstall on the train (hopefully to spend money here) would I'm sure rather see the entrance to a lovely market town than a 'housing estate'. We have already lost out cottage hospital and what was replaced by the Asda monstrosity. If this goes on I fear for our cricket pitches. - - But seriously this small 'Green Belt' site at Haslam farm is like the lungs of the valley and should be left alone for everyone to enjoy.

784	Doris	Paul	-	SHLAA16249	Object	The land at site ref H23 Haslam farm is currently legally designated as 'Green Belt' and I feel very strongly that it should remain so. It is currently grazed by sheep and provides a good harvest of meadow hay at least twice a year. I is a haven for native wildlife and It provides a beautiful backdrop to the East Lancashire Railway and the Irwell Sculptor trail, it is, without doubt, a beautiful gateway into the valley. - - Whilst I appreciate the need for the expansion of housing stocks in the next decade it would be tragic to trade in the 'Green Belt' of our green and pleasant land. Lancashire (and Rawtenstall) as a backbone of the Industrial Revolution still has a more than adequate number of Ex Industrial/Brown field site to more than supply the required number of properties as laid down by central government directives before we sacrifice the 'Green Belt' sites which are the lungs of our communities. - - The site itself is very steep and surrounded by protected trees (over 100 years old!). I personally feel access will be an issue especially in the Winter months when Bury Road is already clogged with vehicles who cannot ascend the hills of the surround housing developments, I just fail to see how Townsend fold could cope with this extra traffic. - - There are certainly currently insufficient school places within the catchment area and the lack of local employment opportunies will only exacerbate the already congested motorway links into Manchester and the surrounding cities. -	-	
944	N/A	N/A	Britannia Hotels Limited	SHLAA16003	Object	Land to the south of Bar Terrace, Tonacliffe should be allocated for housing development. - The land is included as part of SHLAA site 16003 and identified on the accompanying drawing (Prestwich Design Group drawing No.01-Rev.A) as Site 1, being about 0.6 hectares of land. - The site has in the past enjoyed the support of the local authority officers and Members for housing development, but was lost to an unexpected Green Belt designation. It remain one that is suitable for housing development and has potential to accommodate in the order of 23 units. The landowner is a willing and well financed developer, ready to bring the land forward for development that can contribute towards meeting the current shortfall in the Borough's housing development numbers - The relatively small scale development in this location is accessible from Bar Terrace and can be accommodated without adverse visual or other impacts small. Please see appendix for attachment.	No	
980	Julie	Cawtherley	-	SHLAA16295	Object	The infrastructure is not strong enough to accommodate more houses.		There are too many housing developments being considered. The infrastructure is Helmsore can not accommodate the new residents

1017	Martin	Cain	-	SHLAA16282	Support	This site was identified in the report as brownfield whilst being situated in the greenbelt It has been omitted from the proposed list of developments for inclusion in the plan for Rossendale . - However as there are buildings(housing) opposite and buildings (Tor View School) on either side.The later of which is constantly being developed, as growth in pupil numbers would support.The geographic location of the proposed plot I would suggest represents an ideal infill site in this area without any serious encroachment of the greenbelt.Minimal alteration to the boundary would be required. - Land adjacent which is also in the greenbelt was recently released for use as a lorry storage area Alden Green on Manchester Rd (Slaters ?) - The proposed release of greenbelt land in Edenfield will certainly have a greater impact on the landscape than this proposed release and it would appear this proposal has already met with a great deal of anger and opposition. - - In light of the above it would appear there is little or no consistency as to how these decisions are arrived at. - - I would also query the site development area which is shown as 0.18 hectares.This I would challenge as an error.The land area being offered is approximately 1.5/2 acres which would accommodate 10/20 units whilst falling well within the usual density allocation. - The site is ideally place for all local amenities and the infrastructure required to support such a development.Whilst having minimal visual impact on the area and approach into the valley.Having mentioned this to local residence I would suggest there would be minimal opposition to development. - - There is in addition a further 4.5 acres of which has not been offered but part or all of this could possibly be utilized if it was felt appropriate. - I would therefore ask you to reconsider this offer and include it in the proposed development site listings.		I would be grateful if you can acknowledge receipt of my application and a response to the queries raised. - Many Thanks
1019	Rachel	Dulson		SHLAA16302	Object	Helmshore is not equipped for additional homes to be built. Roads and schools are inadequate for the current population already. Current issues have not been addressed and now you are planning to throw even more people into the mix, as well as the disruption to traffic flow that building work brings. - Build us a new school, improve our roads and perhaps once that is done, redevelop the existing old buildings that are abandoned and in disrepair and then think about building new homes.	no

1045	Keith	Loughlin	-	SHLAA 16105	Support	<p>PLEASE NOTE THIS WEBSITE EXCLUDES THE POSSIBILITY TO INCLUDE ASSOCIATED PHOTOGRAPHIC AND OTHER DOCUMENT FILES I INTENDED TO INCLUDE, THERFORE I HAVE ISSUED THE FULL DOCUMENT VIA EMAIL ATTACHMENT, DIRECT TO THE PLANNING DEPARTMENT - - - Rossendale Local Plan Consultation Summer 2017 - Commenting on a policy - - The comments below are provided as SUPPORT to the conclusion of the SHLAA in relation to site identified as No 16105 (Waterbarn Chapel, Rakehead Lane and adjoining land Stacksteads). The conclusion states: “not developable or not to be included in the SHLAA” and describes its development potential as, “not suitable”. The SHLAA justification references that the land as “high surface water flood risk” and is also “contrary to the Playing Pitch Strategy”. - The Chapel itself being a derelict Grade II listed building with graveyard, as described under the Planning (Listed Buildings and Conservation Areas) Act 1990 - list entry number 1361948, and the land being a long-term substantial greenfield area well used by resident and other bodies. - - 1. CURRENT POLICY AND DEIGNATION - The site is currently designated as “Recreation” in guidance (Local Plan Policy E2 of the “Continuation of Local Plan: Saved Policies through the Core Strategy DPD” document, dated 2010) and is registered with Sport England as an active sport facility (Site ID 1208540). It has been used as such for over 100 years by the local community, and a great loss if allowed to be developed. In fact the Council’s own commissioned Playing Pitch Strategy, dated April 2016, for the borough recommends protection of all existing facilities due to a shortfall in sporting provisions. - - 2. FLOOD RISK - The Environment Agency has produced maps indicating an area of high degree of flood risk of the land and the attached map indicates their view of degrees of risk of flooding from low to high. Their “high risk” area indicates a minor percentage of the site area and is reflected in the Local Plan assessment criteria sections. - However, actual flooding of the land which has recently, and physically occurred, was more extensive than that indicated by the Environment Agency (document excluded by this website) - - The photo below shows the land actually flooded during Storm Eva on Boxing Day 2015 (taken from the north side of the land – River Irwell to left of photo) the result of which ultimately flooded existing Victorian terraced properties bordering the north boundary to a depth of some 2-3 feet(photos excluded by this website) - - 3. SITE ACCESS – (graveyard / sight lines / Jnctn of Brandwood Rd and Newchurch Rd) - The only vehicular access available within the ownership boundaries of the site (Chapel and Land) requires an access point to link with an existing highway situated over the open land to the side and behind the Chapel, which would also have to cross the existing graveyard (whose remains are numerous and include a Rawtenstall notary, Lord Tricket, a peer of the realm). Due to the juxtaposition of high neighbouring walls and the Chapel building itself this junction will fall foul of Tables A & B of the</p>		None

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>Development Control Advice Note 15 for Vehicular Access Standards, which show the “sight-lines” required at junctions. Development would also impact the number of vehicles using an existing restricted width junction between Brandwood Road and Newchurch Road. - - - 4. PROPOSED DEVELOPMENT SITE DENSITY / OWNERSHIP - I note the SHLAA indicates housing numbers on the site as “Yield Calculated 32”, but also “Yield Proposed by Applicant 42”, as per an initial proposal block plan; which I understand was discussed with Planners by a previous owner, as part of a pre-application meeting. You may be aware the site has recently changed ownership, having been sold via a property auction site in early September 2017 to a company called TMJ Contractors Ltd, based in Ashton-under-Lyne (contact telephone: 0845 634 0096). Therefore, it is now uncertain what the current owners propose for development numbers and therefore assumptions made in the SHLAA need to be removed/corrected. (document excluded by this website) -</p> <p>5. Eco Viability - Chapter 4 of the Core Strategy DPD document adopted in 2011, and in particular AVP2 covering Stacksteads, inter alia, states “The area’s distinct sense of place is to be retained and enhanced, with vacant sites and buildings to be occupied and open spaces retained “. By changing land use from Recreation to Housing does not support the spirit of this directive. - - Item No 6 of Policy 2 of the Core Strategy DPD, states that housing development should safeguard “the character of established residential areas from over-intensive and inappropriate new development”, and Item 7 requires the prioritising of “the development of previously developed land. However, development of un-allocated greenfield land will be permitted where: - i. It is for 100% affordable and/or supported housing schemes; or - ii. It forms a minor part (upto 15% of overall site size) of a larger mixed use scheme or major housing proposal (10+ dwellings) on previously developed land or - iii. It delivers a significant social, economic, or environmental benefit” - Item 3 of Policy 3 of the same DPD document states development in “ ...Stacksteads... will be permitted having regard to ... capacity of infrastructure” - Item 2.a of Policy 4 of the same DPD document states that affordable/supported housing should be “a minimum of 30% on Greenfield sites over 8 dwellings...” and in 2.c “unless otherwise agreed with the Council, a relaxation of the above requirements will only be considered if ... development being financially unviable ... based on viability assessment approved by the Council.” - I contend that the proposal to allow development fails to comply with all of the above criteria of existing/adopted Core Strategy DPD documents, as the character of the area will be significantly affected by the loss of such a large and well used community space; the local road infrastructure is insufficient to take additional vehicles; the other local infrastructure facilities are insufficient e.g schools, businesses, replacement recreational space etc; the area is well catered for in affordable housing as Together Housing have a large stock already and any such proposed additional</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						stock ("100% on un-allocated greenfield land") would skew the mix with existing standard residential facilities - - 6. Other Factors - The land has been used several times by the Helicopter Emergency Service for major trauma cases from nearby industrial facilities. There is no other facility near to these industrial sites, and loss of this open space negates this optional and vital use. - - 7. Conclusion - - In lieu of all of the above I would request the SHLAA conclusion remains intact and not changed to facilitate change of use of the land from its current designation, and thus allow any development of housing. - -		
1060	Stephen	Davies	Resident	SHLAA16295	Object	I agree housing needs to be built. But there are no plans to support infrastructure in the area. Grane road for example has a lot of traffic issues since joining up to the M65. Another 160 homes on that road trying to get out and in to the development will be a nightmare. Also there are plenty of brown field site to build on especially in Blackburn. Helmshore is a village we pay premium prices for homes in the area to have this life style we don't not want it spoilt. Large firms/ housing contractors build quick homes cutting corners all the time. Where are the children going to go to school with all schools in the area full and some of our children already having to travel to bury for school.		We need homes but well thought out planned homes. With good investment in roads, gp surgeries, schools, parks etc. We can not keep cutting into our countryside for the sake of making shareholders rich they don't love here we do please don't have the wool pulled over your eyes for all our sakes and children's.

1106	sheila	newton	-	SHLAA 16218	Support	I would also like to comment on 2 further sites which were included in the SHLAA but are not currently up for consultation in the plan. - These are SHLAA 16218 site of the Kenross factory. - And SHLAA 16217 land North of Goodshawfold Road. - I am very glad to see that these sites are not being considered in the plan, initially because they are outside the urban boundary. They are also on the West side of Burnley Road which the council has undertaken to protect from development and are in close proximity to a Conservation area. (...) SHLAA 16218, the Kenross site is part greenfield but mainly Brownfield and is an active employment site which the Council surely needs to retain as it currently has only 16.4 hectares of B class in the borough and needs to increase this to 27 in the course of the plan. If this large site were to go to housing, the strong precedent already set in protecting the West side of Burnley Road would be lost and it is known that there are already unscrupulous owner/developers in the area who would leap on the bandwagon to develop an equally large site hypothetically resulting in total decimation for the village of Goodshawfold.		
1106	sheila	newton	-	SHLAA 16217	Support	I would also like to comment on 2 further sites which were included in the SHLAA but are not currently up for consultation in the plan. - These are SHLAA 16218 site of the Kenross factory. - And SHLAA 16217 land North of Goodshawfold Road. - I am very glad to see that these sites are not being considered in the plan, initially because they are outside the urban boundary. 1290	Deborah	Chapman	-	SHLAA16305	Object	The village of Helmsore has been steadily expanding and merging into Haslingden. The green spaces are disappearing and the character of the landscape is changing. These proposed developments will be detrimental to the environment and the wildlife in the area. The Greens lane site is already congested at school times and there is a wealth of wildlife on the golfcourse (I hear a rumour about more proposed building along the golf course backing onto Cherry Tree Way). There are foxes, hedgehogs, too many bird species to mention. - - The roads and parking are at a premium in this area. The land at Snig Hole and Curven Edge are places where children play - more houses would mean more traffic and parking problems. A new park has just been built and crossing as it was dangerous and parking at Snig Hole along Station Rd (Bowl Alley) is a problem already. - - The Grane site backs on to Grane Road which is already completed congested and a rat run to the M65. The road network, , drainage, schools and amenities cannot take any more in this area. The council do little to look after the area - - building more houses mean we would loose the beautiful walks around here.		
1294	Michael	Chapman	-	SHLAA16295	Object	These developments will alter the community feel of Helmsore. - The school infrastructure isn't suitable. - The green belt should be protected. - -		
1294	Michael	Chapman	-	SHLAA16302	Object	These developments will alter the community feel of Helmsore. - The school infrastructure isn't suitable. - The green belt should be protected. - -

1299	David	Bemment	-	SHLAA16380	Object	There is too much development in and around Helmshore, The roads cannot cope with an increase in traffic volume.		I vigorously object to any further development in and around Helmshore. - The majority of the open spaces have been built on and the few remaining ones should be left alone, especially the one off Curven Edge, SHLAA16288. This area has been used by children as a play area since I moved here in 1990 and before that. - The local roads are gridlocked in the mornings and late afternoons, any increase in traffic volume would be intolerable. The other routes out of Helmshore are gridlocked as well e.g. Grane rd, M66 and Haslingden Rd. - The schools are full already and children from Helmshore can't always get into a school in Helmshore. - I think the development of Helmshore as a suburb of Manchester has gone far enough. -

1345	Gerard	Greenhalgh	-	SHLAA16305	Object	This is a slow creep into the open countryside. - Holcombe Road is a natural boundary to Green Belt development.		Not at this time
1345	Gerard	Greenhalgh	-	SHLAA16295	Object	This area leads onto the local countryside it would destroy this area of unspoilt beauty. - It would have a severe impact on the area and spoil the start of the rural countryside. - Access is restrictive to this area so will impact on the roads. - Don't build on unspoilt countryside!!		Not at this time
1355	Rebekah	Haworth	-	SHLAA16302	Object	The area recently average speed check cameras have be implemented to improve the safety of the road, if you have ever tried to exit Holcombe road in peak traffic to either head to Blackburn or Haslingden you would would appreciate the 160 extra houses would only add to this problem. - I also am concerned by how local schools will be able to accommodate extra pupils. I myself moved closer to our local primary school, as I know that year on year there is increasing pressure on children to get a place in a good ofsted rated school, and each year there are more and more stories of children having to travel to ramsbottom as they have not been able to get a place in their local school. - Also currently our nearest NHS dentist is in rawtenstall a few miles down the road, and to try and get a appointment within a week at my local GPs is almost impossible. I am not against building more housing, however the current infrastructure will not support these extra houses. And will only lead to further problems.

1371	Daniela	Ripa	-	playing fields for development in Whitworth	Support	I recently attended the Draft Local Plan (2019-2034) consultation event at Futures Park and would like to extend my thanks to X (Principal Planner), who was approachable, welcoming and helpful to myself and other members of the public at this event. - - I understand that the Council resolved to withdraw the Draft Local Plan Part 2 – Site Allocations and Development Management Policies DPD (2015) on 24th February 2016 and commence work on a new local plan to replace the Adopted Core Strategy (2011). - - The withdrawn Draft Site Allocations document proposed the allocation of land currently used as playing fields for development in Whitworth. Playing fields provide a valuable resource for communities, making a significant contribution to the social dimension of sustainable development and the health and wellbeing of local communities. I welcome the omission of these proposals from the Draft Local Plan (2019-2034).		
1381	Andrew	Lord	Haslingden Cricket Club	SHLAA16284	Support	Haslingden Cricket Club would like to correct some of the information held on this assessment (SHLAA16284) as it is either incorrect or incomplete. - - Land ownership; The land is owned predominantly by HCC and the landowner is willing to release this site for development. - - Recreational Value; the site is not a playing pitch currently in use by the club and hasn't been used as such for many, many years. - - Conclusion, Justification; Intentions of the landowner (as above). The land is not in active use as a cricket practice area and should therefore be considered available in our view.		Would appreciate confirmation of receipt of these corrections and happy to discuss further if necessary

1406	Ian	Cameron	Haslingden Cricket Club	SHLAA16284	Support	<p>Haslingden Cricket Club are fully support of the allocation of the land to the rear of our club being selected for potnetial housing development. - - We are however currently concerned with the conclusions reached in the most recent consultation document issued (that unfortunately we did not receive until this weekend) and we would like to correct a number of the assumptions used which should mean a revised conclusion would be reached highlighting this as suitable piece of land for development and in the shorter term. - - The corrections / amendments are as follows : - - Land Ownership - the land is owned predominantly by Haslingden Cricket Club and the landowner is willing to release this site for development. (In fact the sale and development of this land is absolutely vital to securing the long term future of the club). - - Recreational Value - the site is NOT currently a playing pitch or practice area in use by the club and in fact the land has not been used as such for many years (since mid 1980's). The area currently is surplus to our requirments and is an ongoing cost to the club as it is simply maintained by the club in order to prevent the piece of land becoming an eyesore to our members and just as importantly to our neighbours. - - Conclusion - we do not believe the conclusion reached of "not suitable" is correct. As noted above the justifications for this is given that the intentions of the land owner are unknown and also that the land is in active use as a cricket practice area. these two justifications are incorrect as described above and they need correcting and amending please.</p> <p>Email received 09/10/2017: First of all, apologies for the lateness in sending this email. Unfortunately it was not until this weekend that we had been made aware that the piece of land situated to the rear of our cricket club had been included within this consultation document. On reading the document, we are also concerned in relation to the conclusion reached regarding our land and the justifications given for this decision in relation to the unknown intentions of the landowner and that the land is in active use as a cricket practice area. As noted in my survey response, the landowner (HCC) is willing to release this site for development and seeks to use this opportunity to secure the long term future of the Cricket Club (explained more fully below). Secondly, the piece of land is NOT in active use as a cricket practice facility and hasn't been as such for a vast number of years (since mid 1980's). The quality of the surface and drainage is in fact inadequate for a cricket practice facility. The land is currently just an ongoing cost for the club as we spend time and money simply maintaining the general appearance of the land in order for it not to become an eyesore to our members or to our neighbours. As noted on my online survey response to the Rossendale Local Plan Consultation Summer 2017, this is a further email to explain in High Level</p>		We will send a separate email in relation to the land and the current position of the club to outline our aspirations to you in terms of how we believe we are best to secure the long term future of Haslingden Cricket Club and how this will help us to improve our facilities and make them sustainable for future generations to enjoy. - We would be happy to discuss this further and would appreciate confirmation of receipt of these corrections.

						<p>terms our aspirations and plans at HCC in order to secure a long term sustainable future for cricket to be played at Bentgate ground.</p> <p>Our aspiration is to be able to demolish the existing pavilion and to rebuild a new sustainable and modern structure built from long lasting and hard wearing materials that will be suitable for the next several generations of cricket players, members, supporters and visitors and which will allow better access for all. This new facility has to facilitate better access for all and be 'more fitting' for full cross community participation. This project would possibly allow for a repositioning of the pavilion (including changing rooms) and allow for better car park planning than we have at present. Running alongside the pavilion issues is the fact that our cricket pitch itself is also in need of 'refurbishment' including drainage works and the levelling and gradual relaying of the main cricket square. Our groundsman's store is also in need of refurbishment and some of our essential ground keeping machinery is also ageing. Of course there is a massive potential cost to all of this which is impossible to finance from 'normal' activity.</p> <p>As such, we see the potential sale of the surplus and redundant land to the rear of the club as 'key' in being able to achieve this and protect the provision of cricket at HCC for the long term. Such a sale would allow for the works above to be done and should also provide a 'war chest' to allow the future executive officers of HCC to maintain all the facilities appropriately. We might also be able to benefit from some new members from the new neighbours to our rear.</p> <p>As the first step in this process, the club have been forward thinking and even in the absence of any grant funding, at considerable expense and with great credit to our members and supporters we have self financed the construction of a state of the art practice all weather practice facility on a small piece of surplus land near to Grasmere road. (This is within the bottom right hand corner of the red marked area on the plan shown in the consultation document). This still leaves a large piece of surplus land remaining and ensures that the club have practice facilities available effectively all year round in addition to our playing field itself.</p> <p>Why do we have the need to do this ?</p> <p>On site we currently have a large Pavilion (extended since original construction) which incorporates a members bar area, function room, kitchen, two sets of male & female toilets and upstairs changing rooms. The original part of the structure was built in the early 1970's and this was extended in the 1980's. It is a largely wooden structure with an exceptionally large flat roof. Due to the structure insulation is poor and with wooden exterior walls and a large flat roof, heating this building and maintaining it is very costly and time consuming and a drain on resources. Realistically it has a very limited lifespan remaining. The changing rooms are situated upstairs with the only access via</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>an external staircase. This means there is no realistic access for mobility restricted players and there is only one shared shower area meaning it is difficult to accommodate and integrate female cricketers. The building was constructed and extended before any of the current guidelines for disability access and as such this gives us further issues to overcome.</p> <p>Our playing field needs attention – the square (where the wickets are cut) requires works to be done and we are also experiencing drainage issues on the outfield. Whilst there are grants available from time to time for improvement works, these are not guaranteed and this work needs addressing in order to maintain the standard of cricket field required for a club participating in one of the best amateur cricket leagues in the UK.</p> <p>I hope this gives a useful high level background to the position at HCC. We can ensure you that we would be happy to discuss this further with yourselves such that we can work together to preserve the long term future of cricket in Haslingden and provide a site for new housing.</p>		
1424	Pamela	Beech	-	SHLAA16305	Object	<p>I find it hard to believe that Rossendale council are planning to take away designated green spaces, which have been in place for many years. - The outlined plan for green belt land to have housing built on it is disgraceful. - They say there is a housing shortage in the Rossendale area, perhaps if the council looked at the many empty houses in the area and encouraged building company's to look at these rather than continually wanting to build new. - The Helmshore area is already over populated, the schools are over subscribed with children having to travel some distance to attend school. The traffic congestion in the area is getting worse, what should be a 20 minute drive to work takes me 40, 20 mins just to get out of Helmshore. - The proposed site at sing hole, I feel would lead to many accidents, even with the new crossing it is still a challenge to cross the road, 3 weeks ago when taking my granddaughter to the park when waiting to cross a bus was going so fast I did not think he was going to stop, he slammed is breaks on, then as we crossed a car over took the bus and nearly ran us down. - This would be even worse with cars trying to get out of the entry as well. - - Rossendale golf club seem to think that every time they run out of funding that it is ok to try sell off land and build houses, maybe they should look at the accounts team who manage there finances. - The impact of houses been built on the golf course, will affect not only the population increase but will have a major impact on the wildlife. - - Therefore as a resident of Helmshore I strongly object to the proposed plans. -</p>

1465	SEE AGENT DETAILS	SEE AGENT DETAILS	B AND E BOYS LIMITED	HS2	Not Applicable	<p>PLEASE SEE SUBMITTED REPRESENTATION REPORT.</p> <p>Email received 11/10/17:</p> <p>1. INTRODUCTION 1.1 Rossendale Borough Council (RBC) is preparing a new Local Plan which will guide the future planning and development of the area. Following the adoption of the Local Plan Part 1: Core Strategy in November 2011, RBC commenced work on its Local Plan Part 2: Site Allocations and Development Management Policies. However, this document was halted in favour of the preparation of a full new Local Plan which has now been issued for consultation from Monday 24 July to Monday 9 October 2017. This edition of the Local Plan comprises the Regulation 18 consultation document which sets out the Council's preferred approach to future housing, employment and leisure uses over the Plan period. Once adopted the Local Plan will replace the Core Strategy (2011).</p> <p>1.2 Within the draft Local Plan, sites have been proposed for development (for housing or employment use), for environmental protection and for recreation uses, as identified on the Draft Policies Map. Changes are also proposed to the existing Green Belt and the Urban Boundary. Also, four additional Conservation Areas, along with an extension to an existing Conservation Area, are being considered. 1.3 Documents included in the Draft Local Plan Consultation are the Draft Local Plan (Written Statement), the accompanying Policies Map (including the 6 area maps) and the Infrastructure Delivery Plan. 1.4 The evidence base which supports the Local Plan comprises the following documents:</p> <ul style="list-style-type: none"> • Strategic Housing Land Availability Assessment (SHLAA) (2017). • Strategic Housing Market Assessment (SHMA) (2017). • Employment Land Review (2017). • Green Belt Review (2016). • Environmental Network Study (2017). • Gypsies and Travellers Accommodation Assessment (2016). • Town Centre, Retail, Leisure and Tourism Study (2017). • Playing Pitch Strategy (2016) (previously published). • Strategic Flood Risk Assessment (SFRA) (2016). • Local Plan Viability Study 2015 and Updated Viability Study in relation to Affordable Housing (2017). • Landscape Study (2015) (previously published). • Landscape capacity study for wind energy developments in the South Pennines (2014) (previously published). • Heritage Impact Assessment of Housing Sites (2017). <p>1.5 In addition to the above documents, the Council's Sustainability Appraisal, although not strictly evidence, has informed the development of the draft policies.</p> <p>BACKGROUND</p> <p>1.6 Hourigan Connolly is instructed to review and comment on the emerging</p>

						<p>Local Plan in relation to land at Oakenhead, Haslingden Old Road, Rawtenstall. The site is not allocated for a particular use within the Draft Local Plan, though it falls within the Urban Boundary of Rawtenstall.</p> <p>1.7 The site comprises a purpose built former resource centre and is constructed in reconstituted stone with a pitched, tiled roof with a central light well. The site is located in the urban area of Rawtenstall within walking distance of a plethora of local services, including supermarkets, restaurants, Primary Healthcare Centre and schools. Haslingden Old Road is also a bus route. As a result, the site is very sustainably located.</p> <p>OVERVIEW</p> <p>1.8 The starting point for consideration of the emerging Local Plan document is the well-established principle embodied in Paragraph 158 of the National Planning Policy Framework (hereafter referred to as the Framework) that Development Plans must be based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.</p> <p>2. LEGISLATIVE & POLICY CONTEXT</p> <p>INTRODUCTION</p> <p>2.1 In this Chapter we set out the relevant legislative and policy context before going on to examine the Council's Local Plan document.</p> <p>LEGISLATIVE CONTEXT</p> <p>2.2 Part 2 of the Planning & Compulsory Purchase Act 2004 (As amended) deals with Local Development.</p> <p>2.3 The RBC Local Plan is being brought forward following changes to the Development Plan making system in England which are set out in the Localism Act 2011. Part 6 Sections 109 – 144 of the Localism Act deal with Planning.</p> <p>2.4 Following revocation of the North West Regional Strategy (RS) in May 2013, Council's such as RBC will set their own housing and employment targets against objectively assessed needs.</p> <p>2.5 The Town & Country Planning (Local Planning) (England) Regulations (SI No. 767) came into force on 6 April 2012 and guide the preparation of Local Plans.</p> <p>MINISTERIAL STATEMENTS</p> <p>2.6 In his Written Statement of 23 March 2012 the then Minister for Decentralisation and Cities the Rt. Hon Greg Clark MP referred to a pressing need to ensure that the planning system does everything it can to help England secure a swift return to economic growth. He urged local planning authorities to make every effort to identify and meet the housing, business and other development needs of their areas.</p> <p>2.7 The National Planning Policy Framework (hereafter referred to as the Framework) (see below) was subsequently published on 27 March 2012 and urges local planning authorities to boost significantly the supply of housing.</p> <p>2.8 In his Written Statement of 6 September 2012 the Secretary of State for</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>Communities and Local Government the Rt. Hon Eric Pickles MP noted an increase in house building starts between 2009 and 2011 but said that there was far more to do to provide homes to meet Britain's demographic needs and to help generate local economic growth.</p> <p>2.9 There can be no doubt that house building is a driver of the local economy besides providing homes for local people.</p> <p>FRAMEWORK REQUIREMENTS</p> <p>2.10 Paragraphs 150 to 185 of the Framework deal with Plan-making.</p> <p>2.11 The importance of the Local Plan is identified as the key to delivering sustainable development and a cornerstone of the development management process (Paragraph 150 refers).</p> <p>2.12 The requirement for Local Plans to be prepared with the objective of contributing to the achievement of sustainable development is embodied in Paragraph 151 of the Framework and stems from the requirements set out under Section 39(2) of the Planning & Compulsory Purchase Act 2004. Local Plans must also be consistent with the principles and policies of the Framework.</p> <p>2.13 Paragraph 152 of the Framework requires local planning authorities to seek opportunities to achieve and secure net gains for each of the three dimensions of sustainable development. These three dimensions are defined in Paragraph 7 of the framework as economic, social and environmental. According to Paragraph 7 of the Framework these dimensions give rise to the need for the planning system to perform a number of roles:</p> <ul style="list-style-type: none"> • “an economic role – contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure; • a social role – supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community's needs and support its health, social and cultural well-being; and • an environmental role – contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy”. <p>2.14 Paragraph 8 of the Framework states that the roles mentioned in Paragraph 7 should not be undertaken in isolation, because they are mutually dependant and should be sought jointly and simultaneously through the planning system.</p> <p>2.15 The importance of Local Plans taking into account local circumstances is</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>highlighted in Paragraph 10 of the Framework to ensure that they respond to the different opportunities for achieving sustainable development.</p> <p>2.16 Paragraph 152 of the Framework goes on to deal with adverse impacts on any of the dimensions of sustainable development and sets out three tests:</p> <ul style="list-style-type: none"> • Firstly significant adverse impacts on any of the dimensions should be avoided, and where possible, alternative options which reduce or eliminate such impacts should be pursued. • Where adverse impacts are unavoidable, measures to mitigate the impact should be considered. • Where adequate mitigation measures are not possible, compensatory measures may be appropriate. <p>2.17 Paragraph 154 of the Framework requires Local Plans to be aspirational but realistic and address the spatial implications of economic, social and environmental change.</p> <p>2.18 The requirement for local planning authorities to set out strategic priorities for their areas in their Local Plans is established in Paragraph 156 of the Framework. Such policies are required to deliver:</p> <ul style="list-style-type: none"> • “the homes and jobs needed in the area; • the provision of retail, leisure and other commercial development; • the provision of infrastructure for transport, telecommunications, waste management, water supply, wastewater, flood risk and coastal change management, and the provision of minerals and energy (including heat); • the provision of health, security, community and cultural infrastructure and other local facilities; and • climate change mitigation and adaptation, conservation and enhancement of the natural and historic environment, including landscape”. <p>2.19 The importance of using a robust and proportionate evidence base for Plan making is dealt with in Paragraphs 158 to 177 of the Framework. Paragraph 158 is of particular relevance to these submissions: “Each local planning authority should ensure that the Local Plan is based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area. Local planning authorities should ensure that their assessment of and strategies for housing, employment and other uses are integrated, and that they take full account of relevant market and economic signals”.</p> <p>2.20 A number of topics are discussed and for the purpose of this document we will focus on housing (Paragraph 159), business (Paragraphs 160 – 161), infrastructure (Paragraph 162) and environment (Paragraphs 165 – 168).</p> <p>HOUSING</p> <p>2.21 Paragraph 159 outlines the importance of preparing a Strategic Housing Market Assessment (SHMA) to assess full housing needs and a Strategic Housing Land Availability Assessment (SHLAA) to establish realistic assumptions about the availability, suitability and the likely economic viability</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>of land to meet the identified need for housing over the plan period.</p> <p>2.22 Of particular importance is the requirement for the SHMA to identify the scale and mix of housing and the range of tenures that the local population is likely to need over the Plan period which:</p> <ul style="list-style-type: none"> • “meets household and population projections, taking account of migration and demographic change; • addresses the need for all types of housing, including affordable housing and the needs of different groups in the community (such as, but not limited to, families with children, older people, people with disabilities, service families and people wishing to build their own homes); and • caters for housing demand and the scale of housing supply necessary to meet this demand”. <p>BUSINESS</p> <p>2.23 Paragraph 160 of the Framework outlines the importance of local planning authorities having a clear understanding (from a robust evidence base) of business needs within the economic markets operating in and across their area.</p> <p>2.24 Paragraph 161 of the Framework establishes the importance of understanding business needs (both quantitative and qualitative) and ensuring that sufficient suitable land (both existing and future) is available to meet needs.</p> <p>INFRASTRUCTURE</p> <p>2.25 An objective of government policy is the delivery of growth. Central to this objective is ensuring that infrastructure has the capacity or can be enhanced to deliver growth. A number of factors are outlined in Paragraph 162 of the Framework which need to be considered at a local level including transport, water, foul drainage, energy, telecommunications, waste, health, social care, education, flood risk and coastal change management.</p> <p>ENVIRONMENT</p> <p>2.26 Paragraphs 165 to 168 of the Framework deal with environmental matters and set out the requirement that a sustainability appraisal which meets the requirements of the European Directive on strategic environmental assessment should be an integral part of the plan preparation process, and should consider all the likely significant effects on the environment, economic and social factors.</p> <p>SOUNDNESS</p> <p>2.27 Paragraph 182 of the Framework deals with the examination of Local Plans. The Local Plan will be examined by an independent inspector whose role is to assess whether the plan has been prepared in accordance with the Duty to Cooperate, legal and procedural requirements, and whether it is sound. Local planning authorities are required to submit Plans for examination which they consider “sound” – namely that they are:</p> <ul style="list-style-type: none"> • “Positively prepared – the plan should be prepared based on a strategy 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>which seeks to meet objectively assessed development and infrastructure requirements, including unmet requirements from neighbouring authorities where it is reasonable to do so and consistent with achieving sustainable development;</p> <ul style="list-style-type: none"> • Justified – the plan should be the most appropriate strategy, when considered against the reasonable alternatives, based on proportionate evidence; • Effective – the plan should be deliverable over its period and based on effective joint working on cross-boundary strategic priorities; and • Consistent with national policy – the plan should enable the delivery of sustainable development in accordance with the policies in the Framework”. <p>NATIONAL PLANNING PRACTICE GUIDANCE – LAUNCHED 6 MARCH 2014</p> <p>2.28 On 28 August 2013 the government launched its draft National Planning Practice Guidance (NPPG). The draft NPPG was subject to consultation for 6 weeks and was launched on 6 March in its final form. The NPPG replaces some 230 planning guidance documents but will result in no amendments to the Framework.</p> <p>2.29 The Housing and Economic Land Availability Assessment section of the NPPG is worthy of specific mention in relation to this Report, in particular paragraph 030 (reference ID: 3-030-20140306 confirms): “Housing requirement figures in up-to-date adopted Local Plans should be used as the starting point for calculating the five year supply. Considerable weight should be given to the housing requirement figures in adopted Local Plans, which have successfully passed through the examination process, unless significant new evidence comes to light. It should be borne in mind that evidence which dates back several years, such as that drawn from revoked regional strategies, may not adequately reflect current needs.”</p> <p>2.30 The NPPG deals with deliverable sites as follows at paragraph 031 (Reference ID 3-031-20140306): “WHAT CONSTITUTES A ‘DELIVERABLE SITE’ IN THE CONTEXT OF HOUSING POLICY? Deliverable sites for housing could include those that are allocated for housing in the development plan and sites with planning permission (outline or full that have not been implemented) unless there is clear evidence that schemes will not be implemented within five years. However, planning permission or allocation in a development plan is not a prerequisite for a site being deliverable in terms of the five-year supply. Local planning authorities will need to provide robust, up to date evidence to support the deliverability of sites, ensuring that their judgments on deliverability are clearly and transparently set out. If there are no significant constraints (e.g. infrastructure) to overcome such as infrastructure sites not allocated within a development plan or without planning permission can be considered capable of being delivered within a five-year timeframe. The size of sites will also be an important factor in identifying whether a housing site is deliverable within the first 5 years. Plan makers will need to</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>consider the time it will take to commence development on site and build out rates to ensure a robust five-year housing supply.”</p> <p>2.31 In regards to how often a Local Plan should be reviewed, the NPPG states at paragraph 008 of the section titled ‘Local Plans’ (Reference ID 12-008-20140306) that: “HOW OFTEN SHOULD A LOCAL PLAN BE REVIEWED? To be effective plans need to be kept up-to-date. Policies will age at different rates depending on local circumstances, and the local planning authority should review the relevance of the Local Plan at regular intervals to assess whether some or all of it may need updating. Most Local Plans are likely to require updating in whole or in part at least every five years. Reviews should be proportionate to the issues in hand. Local Plans may be found sound conditional upon a review in whole or in part within five years of the date of adoption.”</p> <p>GOVERNMENT CONSULTATION ON STANDARDISED METHODOLOGY FOR HOUSING NEED (SEPTEMBER 2017)</p> <p>2.32 On 14 September 2017 the Government announced a consultation on a Standardised Methodology for Assessing Local Housing Need, the basis of which was included in the White Paper (February 2017) and is aimed at helping local authorities plan for the right homes in the right places.</p> <p>2.33 As the consultation document sets out, the root cause of the dysfunctional housing market in the UK is that for too long we have not built enough homes. The Government is aiming to deliver 1.5 million new homes between 2015-2022 and is attempting to create a system which is clear and transparent for local authorities. The new methodology will apply to all future plans, with the exception of those which have been submitted or will be submitted before 31 March 2018.</p> <p>2.34 The standard methodology is principally aimed at tackling problems of affordability as the proposed formula simply uplifts the household projections figure, based on market signals.</p> <p>2.35 For Rossendale the proposed standard methodology has little impact on the annual housing requirement (which, it is suggested should be 212 rather than the current 265 dwellings per annum). However, it should be noted that the proposed standard methodology is currently on consultation and may therefore be subject to changes in due course. It is also worth noting the heavy speculation that the proposed methodology focuses on growth in the south east to the detriment of other parts of the UK, in particular the north west.</p> <p>3. OAKENHEAD – A RESIDENTIAL DEVELOPMENT OPPORTUNITY INTRODUCTION</p> <p>3.1 Land at Oakenhead provides an opportunity for sustainable residential development within the Urban Boundary of Rawtenstall. The site has not been allocated for any particular use in the draft Local Plan document, though it does fall within the urban boundary.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>Figure 1: Extract from Draft Proposals Map (with site location indicated by red arrow)</p> <p>3.2 The suitability and delivery of the site for such a use will shortly be confirmed by a planning application for residential development which is to be submitted imminently. During the course of pre-application discussions RBC has provided positive feedback in relation to the development of the site for residential use.</p> <p>SUBMISSIONS</p> <p>3.3 With reference to draft Policy HS1 of the emerging Local Plan, we note that over the plan period RBC will seek to provide at least 4,000 additional dwellings (equating to 265 dwellings per year), whilst addressing a prior under-provision of 425 dwellings within the first five years. Policy HS1 further seeks to deliver 20 percent of all new dwellings on previously developed land across the Borough.</p> <p>3.4 We consider that the Oakenhead site, which is no longer in active use, will assist RBC in meeting its residential development target in the early part of the plan period, with a planning application and subsequent development being imminent. The site will also contribute to the target of delivering 20 percent of development on brownfield land. As recognised within the explanatory text to Policy HS1, the supply of previously developed sites which do not have significant development constraints and are within the urban area are limited within the Borough. Suitable brownfield sites such as this one should therefore be prioritised for development.</p> <p>3.5 There are two primary schools directly to the north of the site, and residential development to the east, south and west and therefore residential use is entirely appropriate in this location.</p> <p>3.6 As a result, it is considered that the emerging Local Plan should identify the Oakenhead site as being a suitable residential development site and it should be allocated as such within draft Policy HS2: Housing Site Allocations.</p> <p>PROPOSED MODIFICATION</p> <p>3.7 The Council is respectfully requested to add land at Oakenhead to the list of allocation residential sites as identified under draft Policy HS2. It is considered that the 0.7ha site will deliver approximately 23 dwellings and that the allocation should allow for “up to 25 dwellings”.</p> <p>3.8 In view of the fact that this site is deliverable and development is forthcoming, it should be formalised and recognised as a residential allocation within the emerging Local Plan.</p> <p>4. CONCLUSIONS</p> <p>4.1 The starting point for consideration of the Council’s Local Plan is the well - established principle embodied in Paragraph 158 of the Framework that Development Plans must be based on adequate, up-to-date and relevant evidence about the economic, social and environmental characteristics and prospects of the area.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						4.2 It has been highlighted in this Representation that the Oakenhead site is a sustainable brownfield site which is no longer in use. A planning application for residential use is forthcoming following positive discussions with RBC. The site presents an opportunity to contribute to the required level of housing to be delivered over the plan period. In order to formalise this and ensure a smooth delivery of the site for such purposes, we consider that land at Oakenhead should be allocated for residential development under the provisions of Policy HS2. Please see appendix		
1550	Shelley	Carter		SHLAA16072	Support	I am pleased that the Urban Boundary to the north of Weir Village is to end at The Moorlands and the previously proposed housing site at Lower Old Clough Farm (SHLAA 16072) has been removed from the Draft Plan. As the Officer's comments had noted, this site does little to meet any of the current development criteria.		
1559	Ken	Iveson		SHLAA16196 - Land East of Goodshaw Lane, Crawshawbooth	Object	I object most strongly to the possible boundary change on Goodshaw Lane, Goodshaw. I am appalled that the request of a few people to change a boundary can result in this being something that can be entertained. I am afraid, is this is allowed, then next time plans are reviewed a precedent would have been created for self build and builders to encroach even more into the green area. It is an inescapable fact that in present days more houses brings more cars with the frightening prospect of even more traffic on a narrow, single track already dangerous road that has a poor provision of parking and pavements. Goodshaw Lane is used by numerous children going to and from Crawshawbooth Primary School, walkers, cyclists and horses, their riders using the road to connect with bridal ways. Goodshaw Lane becomes almost blocked and parkign totally impossible when St Mary's the reamining church of england church in the area is used for services, baptisms, weddings and funerals. At most times emergency vehicles and council service vehicles have a difficult task trying to begotitate both Goodshaw avenue and Goodshaw Lane ----- without prospect of more vehicular movement. Site reference SHLAA16196 SUITABILITY ---Comments ---Goodshaw Lane is at high and medium risk of surface water flood risk.

1575	David	Hempsall	Limey Valley Residents Association	SHLAA16382	Object	<p>Area C</p> <p>HS2.47 SHLAA16382 Land to rear of the former Glory public house, Burnley Road, Loveclough (45 houses):</p> <p>Much the same arguments apply to this area as to Area B (supra). It was subject to a Planning Appeal by the developer of what was formerly The Glory. Rejecting the appeal - APP/B2355/C/16/3158284 – the Planning Inspector upheld the notion of maintaining the rural aspect looking west from the A682 Burnley Road. As with Area B, there is the prospect of a further 45-90 vehicles being added the A682 Burnley Road’s volumes.</p> <p>Access via Commercial Street is already problematical, its being the sole point of ingress and egress from the Penny Lodge Estate and homesteads on the western hillsides. The provision of a new junction on the A682 would simply replicate existing issues.</p> <p>It is the LVRA’s view that for the reasons outlined, this proposal should be withdrawn in whole.</p>

1749	M	Morton		landgate lane, shawforth	Object	<p>As a member of Shawforth Flood Forum I am concerned about a proposal to build houses above landgate lane, shawforth.</p> <p>Unfortunately the environment agency has assessed the area as being at low risk for prolonged flooding but this overlooks the fact that we regularly have times of flash flooding. It is for that reason our group os on the environmental agencies list of contacts to inform when there is the threat of heavy rainfall. The pattern of flash flooding was totally underestimated when the LCC carried out a million pound landscaping project in landgate quarry just over 10 years ago.</p> <p>They had to re-engineer the temporary water catchment area as it totally failed in the first flash flood.</p> <p>Most recently the engineers on the Wind Farm Road made exactly the same errors and work carried on adjustments over the 18 months of the project. The effect of building this road has been to oncrease the speed of the water draining off the moor in heavy rain. As a result the LCC has recently re-drained and resurfaced the area of landgate lane immeadiately below the wind farm road. (At rate payers expense!) The result is the water no longer drains slowly, it shoots into the stream and joins the river spodden 300 metres below. This results in the level of the river riding more quickly. One effect is it rises to block the culvert coming down on the opposite side of the road and causes flooding for the residents on Old Lane, Shawforth.</p> <p>As landgate lane narrows beyond the cattle grid any house building would require the lane to be widened, once again requiring re-organisation of the stream. Added to speed of the water draining from the hard landscaping from houses this could cause further distress from flash floods for the residents in Edge Moor Close flats and those living on the main Road along side the River. I hope the planners will take seriously the risk of flash floods in this area, for as members of this forum. We have seen the distress it causes to residents caught up in the aftermath.</p>

1766			Peel Holdings (Land and Property) Ltd	Land at Burnley Road, Edenfield	Object	<p>1. Introduction</p> <p>1.1 This representation is prepared by Turley on behalf of our client Peel Holdings (Land & Property) Limited (hereafter “Peel” or “our client”). It provides comments to Rossendale Borough Council (RBC) in respect of the Rossendale Draft Local Plan1 (July 2017) (‘DLP’) which is currently the subject of public consultation.</p> <p>1.2 This document relates exclusively to the promotion of land at Burnley Road, Edenfield, as a development opportunity. It should be considered in conjunction with the overarching representation submitted by Turley on behalf of Peel.</p> <p>Draft Rossendale Local Plan</p> <p>1.3 As set out in the overarching representation submitted, Peel has continuously and historically engaged with the plan-making process for Rossendale. This has included the submission of detailed representations to the previous Core Strategy and the draft Lives and Landscapes DPD (since withdrawn), including Development Frameworks that set out the development potential at four sites:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden (allocated in part) • Land at Haslam Farm, Rawtenstall (allocated in part) • Land at Blackburn Road, Edenfield (allocated) • Land at Burnley Road, Edenfield (not allocated) <p>1.4 Peel welcomes the progress which has been made on the emerging Local Plan and supports, in principle, the proposals for development within it. In particular, Peel strongly supports the allocation of land at Kirkhill Avenue in Haslingden, Haslam Farm in Rawtenstall, and Blackburn Road in Edenfield, which include some or all of three of the sites previously put forward (as above).</p> <p>1.5 It is noted, however, that additional work is required to ensure that the emerging Local Plan is capable of meeting the full development needs of the Borough. Additional land will need to be allocated for residential development, above that which has been identified in the DLP.</p> <p>1.6 This opportunity is being taken to make representations in relation to the sites previously identified by Peel as capable of accommodating development in the Borough that have not been put forward in the DLP for allocation and/or Green Belt release. Peel is preparing updated Development Frameworks which will promote and justify its landholdings within Rossendale. Matters addressed below and in the overarching representation which directly affect its landholdings will be discussed in detail in each Development Framework.</p> <p>Additional Site Allocations</p> <p>1.7 In the context of the need for the Rossendale DLP to allocate additional land for development, Peel wish to reiterate the development opportunities at each of the four sites previously identified, as well as proposing a further</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>potential site at Rossendale Golf Club.</p> <p>1.8 These sites can each provide a deliverable housing development site in sustainable locations adjoining existing settlements. Initial reviews of site constraints and opportunities, landscape and highways have indicated that there are no significant barriers to development.</p> <p>Development Frameworks</p> <p>1.9 Further site appraisals are being undertaken to inform updated Development Frameworks which will be provided to the Council in due course.</p> <p>1.10 The updated Development Frameworks will:</p> <ul style="list-style-type: none"> • Provide analysis of the site constraints and opportunities. • Where relevant provide details of the findings of further technical assessment (such as highways, flood risk, ground conditions). • Consider the key principles for development of the site. • Present a proposed site layout plan illustrating development parcels, access, landscaping, etc. • Comment on the economic benefits of development. • Address comments / observations made within the recently published evidence base for the emerging Local Plan. <p>Proposed Development Opportunities</p> <p>1.11 In advance of the full Development Frameworks, the individual site representations are submitted providing initial reviews of the development opportunities.</p> <p>1.12 The Sites are represented as follows:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden • Land at Haslam Farm, Rawtenstall • Land at Blackburn Road, Edenfield • Land at Burnley Road, Edenfield (this document) • Land at Rossendale Golf Course, Helmshore <p>1.13 This representation relates to land at Burnley Road, Edenfield, and includes:</p> <ul style="list-style-type: none"> • Section 2: A description of the site and its location • Section 3: Details of the consideration of the site in the Strategic Housing Land Assessment (SHLAA)2 and a review of the planning policy context including the Draft Local Plan • Section 4: A Green Belt appraisal, commenting on the findings of the Green Belt Review • Section 5: Concluding comments <p>1.14 Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan and the merits of the sites promoted here for residential development.</p> <p>2. Site Opportunity</p> <p>Site Description</p> <p>2.1 The land at Burnley Road site is located c. 0.7 km miles north of Edenfield</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>village centre. It extends to c. 1.07 ha (2.6 acres), is broadly rectangular in shape, comprising an open field currently used for grazing.</p> <p>2.2 The site is located to the east of Burnley Road which forms the western site boundary. It is surrounded by residential development to the north, south and west</p> <p>2.3 Buildings and wooded areas to the east help to provide a sense of enclosure. Beyond these are open fields as the land rises towards a low ridge. The southern boundary comprises modern residential properties and playing fields associated with the adjacent Edenfield Church of England Primary School.</p> <p>Local Facilities</p> <p>2.4 The site is located within easy walking distance of Edenfield village centre (approximately 8 minutes walk) which has a number of services and amenities including a butcher, bakery, chemist, post office and two public houses. The town of Rawtenstall is 3.5 km north east of the site and includes a wide variety of traditional town centre uses including supermarkets, national banks and building societies, dentist, high street chemist and a number of restaurants and bars.</p> <p>2.5 Edenfield Church of England Primary School is located around 50m south of the site on the same side of Blackburn Road. The closest High School to the site is Haslingden High School, located approximately 1.9 km; there are 4 other secondary schools within 5 km of the site.</p> <p>2.6 Bus stops are located on Burnley Road, c. 300 m north of the site and on Market Street c. 225m south of the site. These stops are served by the half hourly 482 and 483 bus services, which connects Edenfield with Bury in the south and Burnley and Bacup in the north.</p> <p>2.7 There is a Metrolink station in Bury (c. 9 km south of the site) which connects to the wider Greater Manchester tram network. The site is also well connected to both the local and national highway, with the A56 0.5 km from the site which connects to the M66 (2 km) and in turn the M62 and M60 (15 km).</p> <p>3. Planning Policy Context</p> <p>Consideration in SHLAA</p> <p>3.1 The Draft Local Plan evidence base includes the 2017 Strategic Housing Land Availability Assessment (SHLAA), which aims to identify the land supply for housing within the administrative boundary of Rossendale within the next 15 years (2017 – 2032).</p> <p>3.2 The Site is promoted in the SHLAA (Site Ref 16258). The SHLAA Site Assessment confirmed that it is a viable and achievable site for up to 25 homes in the medium to long term (6-10 years, 10+ years). It is noted that more than 10% of the site is at high risk of surface water flooding, and that heritage and landscape impacts would need to be addressed given the proximity to Elton Bank (grade II listed building) and the location within the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>Settled Valleys landscape character.</p> <p>Local Plan Part 2: Site Allocations and Development Management DPD</p> <p>3.3 The Draft LP Part 2 was withdrawn. The plan did not propose the release of this site from the Green Belt. Representations made by Peel in response to that Plan challenged this proposal.</p> <p>Saved Policies</p> <p>3.4 As the Local Plan Part 2: Site Allocations and Development Management DPD” (LP Part 2) was not taken forward by Rossendale BC, in relation to site allocations and designations, the Proposals Map and Saved Policies³ remain relevant as part of the development plan.</p> <p>3.5 The Proposals Map identifies the Site as outside the Urban Boundary (Policy DS1) and in the Green Belt (Policy DS3)</p> <p>3.6 However, Policy 1 of the Core Strategy states that the Urban Boundary defined in Local Plan Saved Policy DS1 and the Green Belt boundary defined in Saved Policy DS3, will be reviewed and where necessary amended in the Site Allocations DPD. The reviews would take into account criteria set out in Policy 1 including:</p> <ul style="list-style-type: none"> • Where small scale selective rounding off of Green Belt boundaries would promote sustainable development opportunities. • An extension/amendment to the urban boundary would not adversely affect aspects of the natural environment. <p>3.7 The Core Strategy Figure 15, identifies Edenfield as an area for Green Belt review.</p> <p>Rossendale Draft Local Plan</p> <p>3.8 As discussed in the overarching representation, the Draft Local Plan (DLP) recognises that some release of Green Belt land will be required to meet the housing requirements and the NPPF requirement for the Council to maintain a 5 year land supply of deliverable sites (DLP, page 12).</p> <p>3.9 The evidence presented in the DLP indicates that 4,425 dwellings will need to be delivered over the period to 2034. Considering the under provision of 425 dwellings since the adoption of the Core Strategy and the potential land supply from non- Green Belt sources of 2,907 dwellings, there is a significant gap of approximately 1,518 dwellings.</p> <p>3.10 The DLP proposes areas for release from Green Belt, allowing for a delivery of a further 715 dwellings. It is therefore evident that the Green Belt releases proposed by the DLP need to be more than doubled - to accommodate 1,518 dwellings - if the emerging Local Plan is to be found sound.</p> <p>3.11 In relation to this Site specifically, the DLP does not propose to extend the Urban Boundary and the site would remain designated Green Belt. Policy SD2: Urban Boundaries directs all development within such boundaries ‘except where development specifically needs to be located within a countryside location and the development enhances the rural character of the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>area.'</p> <p>3.12 The DLP notes the NPPF requirement for the Council to maintain a 5 year land supply of deliverable sites that can meet housing needs. It recognises that some release of Green Belt land will be needed to meet this requirement (page 12) and a Green Belt review⁴ forms part of the evidence base for the DLP.</p> <p>3.13 As above, it is clear that there is a significant gap between the housing land supply identified in the DLP and the demand, which cannot be met by non-Green Belt sites alone.</p> <p>3.14 Peel contends that the inclusion of this Site as a housing allocation and its release from Green Belt would be in keeping with the NPPF and would assist in addressing the shortfall of land within the Borough necessary to meet the evidenced housing land demand. The following section considers this in greater detail.</p> <p>4. Green Belt Appraisal</p> <p>4.1 The Site is currently designated as Green Belt. A Green Belt review⁵ (GBR) forms part of the evidence base for the DLP which has informed the plan's proposed retention of the Site within the Green Belt.</p> <p>4.2 The strategic purpose of this area of Green Belt, is to provide separation between Haslingden and Rawtenstall to the north/ north west from Edenfield to the south.</p> <p>4.3 The Site sits to the north of Edenfield village centre, and to the east of development along Blackburn Road and Burnley Road. It corresponds with the central part of GBR Parcel P38.</p> <p>Figure 4.1: P38 (Site location indicated)</p> <p>4.4 The GBR rates the contribution of the land parcel to the five Green Belt purposes.</p> <p>4.5 It is important to note at the outset that there are very clear and accepted exceptional circumstances which justify the release of significant amounts of land from the Green Belt to meet Rossendale's housing and employment needs. All land within the current Green Belt, fulfils at least some aspects of Green Belt purposes. As such, it will not be possible to meet the identified housing needs of Rossendale without some impact on the Green Belt.</p> <p>4.6 It is also important to note when considering what land to release from the Green Belt to be clear that the "golden thread" which runs through plan making and decision taking is the achievement of sustainable development. The NPPF confirms this at paragraph 84 when it states that "...when drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development...". In considering the release of land from Green Belt it is therefore essential to consider what releases of land will achieve sustainable development while minimising the impacts on the purposes of Green Belt.</p> <p>Purpose 1: To check the unrestricted sprawl of large built-up areas</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>4.7 The GBR identifies that this parcel plays a moderate role in respect of this purpose. It notes that the parcel is adjacent to Edenfield which forms part of the large built up area of Ramsbottom/Bury. There are few urbanising features within the parcel apart from a detached house with surrounding large yard area and a detached bungalow. The influence of these urbanising features is limited with the parcel displaying a relatively strong sense of openness.</p> <p>4.8 This assessment is contested. The DLP proposes to extend the urban boundary on the west side of Blackburn Road and allocate that land for some 450 homes. In allowing additional limited development to the east side of Burnley Road, adjacent to the newly extended urban boundary, would enable additional housing to be delivered without compromising this Green Belt purpose. A similar release to the suggested is proposed at site HS2.74.</p> <p>Purpose 2 - To prevent neighbouring towns merging into one another</p> <p>4.9 The GBR considers that the role of P38 in this respect is weak. It notes that there is limited intervisibility between Edenfield and Rawtenstall which at this point are more than 2km apart with intervening steep valley sides. It notes that the parcel forms part of the settlement gap but it is not of critical importance and plays a limited role in preventing the merger. A loss of openness in the parcel is unlikely to be perceived as reducing the gap between the settlement areas.</p> <p>4.10 Peel supports this assessment and is in agreement that the development of this land does not have an important role in preventing towns from merging.</p> <p>Purpose 3 - To assist in safeguarding the countryside from encroachment</p> <p>4.11 The GBR found that the parcel's contribution in this respect was moderate. It found a sense of encroachment within the parcel as a result of the visual influence the adjoining settlement edge to the west and a residential property with large yard area located along the eastern boundary. Open pastoral land and characteristics of the open countryside were noted, but with a somewhat weakened rural character. Importance of the contribution to safeguarding large area of open countryside to the east was noted.</p> <p>4.12 Peel does not agree with this assessment. Large areas of open countryside are present to the east of the site and beyond Rossendale's Borough boundary. The development of this site would sit within the redefined urban boundary of Edenfield, between existing development along Burnley Road and with a direct relationship to existing and anticipated development of the village. Existing field boundaries lined with trees on the eastern perimeter would define the extent of the village and form a buffer with the open countryside to the east.</p> <p>4.13 Whilst it is accepted that it is important to protect the countryside from encroachment, it is considered that the release of the Site would be a logical</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>small scale extension to the village, together with the allocation to the west, and that any limited harm in this respect would be outweighed by the benefit of meeting housing land supply requirements in a sustainable location such as this one.</p> <p>Purpose 4 - To preserve the setting and special character of historic towns</p> <p>4.14 The GBR recognised that P38 did not make any contribution to this purpose. As, in practice it would have little intervisibility with the historic settlements of Ramsbottom. The openness of the land within the parcels was not considered to be important to setting or historic significance.</p> <p>4.15 Peel agrees with this assessment.</p> <p>Purpose 5 - Assist in urban regeneration by encouraging the recycling of derelict and other urban land</p> <p>4.16 The GBR notes that all parcels make an equally significant contribution to this purpose.</p> <p>4.17 The DLP proposes to optimise the re-use of brownfield sites to meet development needs and in doing so support ongoing urban regeneration.</p> <p>4.18 As noted above, and in the overarching representation, the supply of deliverable brownfield land is insufficient to deliver the number and type of new homes and employment land required. As such, the extent of urban regeneration which can be achieved is not enough to meet Rossendale's sustainable growth needs and must be accompanied by development on Green Belt land. Exceptional circumstances to justify Green Belt release have been proven through the Greater Manchester Spatial Framework. The release of land from the Green Belt will not therefore undermine this purpose.</p> <p>Green Belt Appraisal Conclusion</p> <p>4.19 The strategic purpose of the area of Green Belt which the Site forms part is to provide separation between Haslingden and Rawtenstall in the north/north west from Edenfield to the south (with Ramsbottom/ Bury urban area beyond).</p> <p>4.20 The site does not perform a strategic Green Belt function. Its development would not result in encroachment into the wider countryside which surrounds Edenfield and it would relate well to existing development along Burnley Road and to new development under the housing allocation proposed to the west of Blackburn Road to the A56.</p> <p>4.21 It would not result in urban sprawl or lead to the merger of separate settlements and would not reduce the gap between existing settlements. It would not have a significant impact on ongoing urban regeneration. In fact by providing for good quality family housing including elements of aspirational housing the development of this land would support the ongoing economic regeneration of Rossendale.</p> <p>4.22 The proposed boundary will provide a long term defensible Green Belt boundary with the field boundaries to the east and south being strengthened with additional planting.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>4.23 It is considered that this Site is suitable for development and is in a highly sustainable location. Its release from Green Belt will therefore contribute to a sustainable pattern of development which makes the most of proximity to nearby highway infrastructure. There are therefore clear exceptional circumstances to justify its release from the Green Belt.</p> <p>4.24 Peel recommends the Council allocate this land for development to ensure the identification of sufficient land to meet the housing needs of the borough.</p> <p>5. Conclusion</p> <p>5.1 In relation to Peel's land interests in the Borough, this document concerns one of four sites which have been subject of previous Development Frameworks and representations in the context of the Local Plan development. Updates to these frameworks will be provided to RBC in due course, setting out a clear vision and proposals for the development of these sites.</p> <p>5.2 This representation provides an initial review of the development opportunity at Burnley Road, Edenfield, including details of the site and its location, consideration of the site in the Strategic Housing Land Assessment (SHLAA) and planning policy; and a Green Belt appraisal, commenting on the findings of the Green Belt Review which forms part of the evidence base to the DLP.</p> <p>5.3 Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan and the merits of the sites promoted for residential development.</p> <p>5.4 The SHLAA identifies the land at Burnley Road as having potential for development, subject to mitigating site constraints; the DLP proposes it remain within Green Belt. Peel considers that the site can be developed with sensitivity to landscape and heritage features, and together with the large scale allocation to the west (HS:3 Edenfield), there is potential for this site to form part of the extension to the village. The updated Development Framework to follow this representation will further illustrate the opportunity for development of this site and give comfort that it should reasonably be released for development.</p> <p>5.5 Peel requests the designation of land at Burnley Road as a housing allocation and welcomes further discussion on this.</p> <p>Please see appendix for map</p>

1768	Jerry & Abid	Malik & Hussain		Land off Burnley Road, Loveclough	Object	<p>These representations are submitted by Indigo Planning on behalf of Mr Jerry Malik and Mr Abid Hussain in respect of the Draft Local Plan published in July 2017.</p> <p>The representations relate to our clients' site which is located west of Burnley Road (A682) in Love Clough. Please see the accompanying Title Plan which clarifies the extent of their site.</p> <p>Our clients request that the Policies Map and Local Plan is amended to allocate their site for residential development. Part of our clients' site was assessed in the Council's Strategic Housing Land Availability Assessment (SHLAA ref: 16216). The SHLAA's appraisal of part of the site queried its availability and expressed concerns about its suitability due to surface water flooding.</p> <p>These representations provide context on the site and demonstrate its suitability and availability. The representations are supported by details of the site ownership – our clients acquired the site in June 2016. A site appraisal and illustrative masterplan prepared by Brewster Bye Architects is enclosed which demonstrates how residential development could be assimilated into the surrounding landscape.</p> <p>The proposed indicative masterplan demonstrates that at least 55 houses could be provided on the site. A Flood Risk, Ground Condition and Drainage Assessment has also been prepared by Curtins which provides appropriate drainage solutions.</p> <p>Each of these matters is considered in more detail below.</p> <p>Policy Background</p> <p>The National Planning Policy Framework (NPPF) places an emphasis on housing delivery and states at paragraph 47 that local planning authorities should boost significantly the supply of housing.</p> <p>Paragraph 47 requires LPAs to ensure their Local Plan meets the full, objectively assessed housing need in the housing market area and to identify and update annually a supply of specific deliverable sites.</p> <p>To be 'deliverable' sites should be "available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years and in particular that development of the site is viable".</p> <p>Draft Policy HS1 of the emerging Local Plan states that 4,000 additional dwellings (net) need to be delivered within Rossendale between 2019 and 2034. This equates to 265 dwellings a year. The draft policy also identifies that the council needs to address an under-provision of 425 dwellings (as of 31st March 2017) within the first five years of the plan period.</p> <p>The subject site could provide an additional 50 houses (at least) and contribute towards achieving these policy objectives.</p> <p>Site Context</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>The extent of our clients' site is shown on the attached Title Plan and covers an area of approximately 2.7ha.</p> <p>The site is immediately adjacent existing residential areas located on the western side of Burnley Road. It therefore forms a suitable extension to the existing village envelope due to its location. The site would form an appropriate infill between Goodshaw Fold Road and Burnley Road and an appropriate extension to the existing settlements located within the river valley from Rawtenstall to Love Clough. The site is within the 'Settled Valley' landscape character area as defined by the 'Lives and Landscape Character Assessment' (2015) which forms part of the evidence base for the Local Plan.</p> <p>The site slopes from east to west following the river valley. The site is bounded to the north by an existing public footpath and to the south by residential properties. Burnley Road forms the eastern boundary of the site. Burnley Road is the main route through the village of Love Clough and the speed limit along this stretch is restricted to 40mph. The site is accessible off this road. The nearest bus stop lies within 100m of the site, providing access to Burnley, Skipton and Manchester City Centre.</p> <p>The site is not located within any sensitive ecological or heritage designations. The Environmental Network Study 2017, which forms part of the evidence base to the Local Plan, does not identify any potential environmental constraints to the developing this site.</p> <p>There is a Public Right of Way (PROW) which runs along the northern boundary and across the western portion of the site. As explained further below, the development of housing on the site could provide an opportunity to improve this section of the PROW.</p> <p>Part of our clients' site was assessed in the council's SHLAA 2016 (ref: SHLAA16216). The site assessment identified the site (1.1ha) was suitable for the delivery of 28 dwellings in the long term (11 to 15 years) once ownership constraints and potential flood risk have been addressed. It is important to note that the site identified in the SHLAA was only part (1.1ha) of the overall site promoted for housing in these representations.</p> <p>The council's SHLAA identifies that the site benefits from good access to parks/ play areas. The site is not located in or adjacent to any Biological Heritage Site or Local Geodiversity Site, or within close proximity of a Listed Building or Conservation Areas. The site is also not known to be contaminated or lie within a HSE consultation zone and there are no risks to mineral sterilisation from the redevelopment of the site.</p> <p>Furthermore, the site lies within an appropriate distance from local convenience shops (within approximately 1mile), and primary schools. The nearest secondary schools and GP surgeries are located within 3 miles and can</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>be accessed by bus.</p> <p>The SHLAA identifies that the site lies within Flood Zones 2 and 3 due to surface water flooding as opposed to flood risk from a river. However, this risk can be successfully mitigated and further information is provided below and in the attached Flood Risk Assessment prepared by Curtins. The SHLAA also identifies that the site is subject to multiple ownerships and queries its availability which is not the current position. Both matters are addressed below.</p> <p>Site Assessment</p> <p>National policy requires sites allocated for housing to be deliverable and developable. This requires sites to be available now and in a suitable location for development.</p> <p>Site Availability</p> <p>The site is available now and could be developed within 5 years to potentially deliver over 50 houses. Our clients acquired the site in June 2016 and therefore the SHLAA's commentary on the site ownership is incorrect. A title plan is provided in support of this submission and shows the land within our clients' ownership. The area shaded in blue has a dated covenant relating to coal mining activity which has resulted in this small part of the site being left undeveloped to include a landscaped buffer in the accompanying indicative masterplan. The remainder of the site is developable, under the ownership of our clients and deliverable for housing to address the existing shortfall in housing supply.</p> <p>Site Suitability</p> <p>The key considerations to address in relation to suitability are flood risk and the relationship of a housing scheme with the wider landscape.</p> <p>Surface water flooding</p> <p>The enclosed Flood Risk Assessment prepared by Curtins confirms the site is suitable to be allocated for housing. The accompanying report from Curtins provides an indicative surface water and foul water drainage solution which takes into account the identified surface water risk.</p> <p>The Environment Agency Planning Flood Map shows the site area to be located in Flood Zone 1 thus flood risk to the site can be considered low from all primary sources. Secondary flood risks including surface water flooding have also been assessed and the site is considered to be at low risk from all sources providing existing flow routes through the site are acknowledged in the detail design as they currently are shown on the Brewster Bye Architects masterplan and Curtins indicative site drainage layout.</p> <p>It is acknowledged that, as the site is over 1ha, any application will need to be supported by a Flood Risk Assessment.</p> <p>Design, Landscape and Visual Impact</p> <p>It's clear from draft Policies ENV1 and ENV4, the supporting evidence base for the Local Plan and the planning history for the area that the relationship</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>between a housing proposal on this site and the wider landscape is a key consideration. The attached masterplan prepared by Brewster Bye Architects shows an appropriate design response to developing this site.</p> <p>The site lies on the edge of the existing settlement and forms a logical extension to the existing urban form. The site respects the historic pattern and character of development at Loveclough.</p> <p>The indicative scheme responds to the site's topography, the necessary drainage, the existing PROW and the character of the area. The scheme is relatively low density at 20 dwellings per hectare which is in accordance with draft policy HS5 and reflects the character of the area as illustrated on page 20. The housing mix, as shown on Page 19, also responds to the local character. The scheme will provide 46 semi-detached houses and 9 detached houses.</p> <p>The access and layout responds to the site's topography and the housing steps down in line with the site's gradient. The images of the scheme on pages 20 and 21 demonstrate that this type of housing scheme can be successfully integrated into the wider setting in the river valley.</p> <p>The PROW can be retained and could be improved further. We note the draft Local Plan policy TR2 states; "Although Rossendale has the densest public rights of way network in Lancashire, much of the network is in a poor condition and there is an identified need to develop, extend, upgrade and improve access to the network".</p> <p>Residential development will complement and enhance existing development through design which supports and promotes the character and heritage of Rossendale and the surrounding area. The layout of the site will maintain the ruralurban interface and development will seek to integrate the rural with the urban environment to reduce its prominence. Page 23 illustrates the potential design typologies which could be utilised. These indicative designs are an interpretation of traditional agricultural buildings, would be appropriate in this context and further help to integrate the scheme into the wider setting.</p> <p>The site is sustainably located within close proximity to public transport links and helps support the creation of a safe and inclusive community at Loveclough. The site benefits from good pedestrian accessibility and pedestrian linkages into the village of Loveclough.</p> <p>In accordance with paragraph 47 of the NPPF the site is a suitable location for development and should be considered favourably.</p> <p>Summary and Conclusions</p> <p>This submission demonstrates that the allocation of this site for housing is appropriate given it is in a highly sustainable location, adjacent the existing settlement boundary and there are no constraints which would render the site undeliverable. The site is deliverable and developable.</p> <p>This cover letter and the accompanying reports address the concerns</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Site not allo	Further comment
						<p>previously raised by the council to demonstrate there are no ownership or flooding constraints which would restrict its development potential for residential use. The site is therefore suitable and deliverable and represents a good opportunity for the delivery of additional dwellings in Loveclough. These will make a significant contribution in the short to medium term to Rossendale's five-year housing land supply.</p> <p>In accordance with paragraph 47 of the NPPF our client's site is entirely suitable for residential development and will complement and enhance the existing community at Loveclough.</p> <p>As such, we request the following amendments to the draft Local Plan:</p> <ul style="list-style-type: none"> • The Policies Map is amended to include our clients' site within the Urban Boundary and to allocate the site for housing; and • Policy HS2 is amended to allocate our client's site. <p>We trust that these representations will be considered and will inform the future preparation of the Local Plan.</p> <p>Please see appendix</p>		
1790	David	Trivett		SHLAA16068	Not Applicable	<p>Brownfield. Urban Boundary. Currently Bacup Leisure Centre. Yield calculated 14 units. Excellent existing access off A671.</p> <p>I understood Euro Garages had purchased this site for use as a garage and drive thru retail outlet?</p> <p>This would be a good example of a sustainable development and would certainly benefit Bacup by introducing competition for the one other outlet near the town.</p> <p>It would also be very useful as a brownfield residential development if permission is not granted for the anticipated garage forecourt operation.</p>		
1790	David	Trivett		SHLAA16074	Not Applicable	<p>SHLAA16074 - Land to the rear of Highfield Bacup.</p> <p>Greenfield site. Countryside adjoining the urban area. Currently Grassland and private/storage garden area. Yield calculated 48 units. Access off Maden Road, is poor and will require the felling of mature trees. Access via Meadow Way is better but situated in a different ownership. It is to be noted that Bankside Lane which is a mandatory access point is narrow and steep.</p> <p>The above proposed development is not shown on the Policies Map or listed in Table 1 Housing site Allocations.</p>

1819	Sylvia	Wrigley		Land west of Rising Bridge Rd	Object	I write to you with reference to the letter sent to us dated 22nd September 2017 re the land west of Rising Bridge Road, between Rising Bridge Road and the A56, as not being proposed for development. We as owners do strongly object to this and request the land be removed from the Green Belt, and allocated for housing. An ideal site for approximately 24 (twenty four old people bungalows) which in turn would release larger houses for family occupations. We trust that you will reconsider this derelict land as proposed. The land being of no other use what so ever. Awaiting your reply so we can then consider a way forward.

Statement of Community Involvement

Reference	SCI	Statement of Community Involvement
-----------	-----	------------------------------------

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SCI	Further comment
1223	Alwyn	Davies	-		Not Applicable	<p>"Statement of Community Involvement Policy 2014 - - The link to the current Statement of Community Involvement is not available on the Councils Consultation webpages. This version of this document can only be found through searching on the council's website. - - On Page 9 section 2.3 the council sets out its commitment to consult with stakeholders in the development of planning processes which includes, residents, business, developers, agents and landowners. This is in line with the Consultation Principles published by the Cabinet Office in 2016 which states: "Consultations should be targeted. Consider the full range of people, business and voluntary sector affected by the policy and whether representative groups exist. Ensure they are aware of the consultation and can access it. Consider how to tailor the consultation to the needs and preferences of particular groups, such as older people, younger people, or people with disabilities who may not respond to traditional consultation methods. " - - It can be evidenced that Rossendale Councils Consultation process has failed to adequately consult with residents affected by proposed developments set out in the local plan. - As a resident who would be affected by the current draft plan I had no knowledge of the proposal until a concerned neighbour canvassed the area and highlighted the council's consultation process to us in a letter that he had produced. For context the proposal in the local plan would mean that my house would be encapsulated by employment space (Warehouses and Factories) on what is currently Green Belt Land. - - The council confirmed at a meeting held in Haslingden Library on the 19th September 2017 that the council had promoted the consultation by putting one article in the Rossendale Free Press (This is a local paper which must be purchased), a post on Facebook (which excludes a vast majority of the residents of Rossendale) and posted the information on the Councils Websites (which with the greatest of respect unless you need information on your bin collection one would have no reason to access it). It is clear that this falls significantly short of a targeted consultation process and it could be argued that the council has done the opposite and tried to engage with as few residents as possible. As a resident significantly affected by the proposal the council has made no effort to consult with me or to gain my views and has it not been for a concerned resident I would not have been able to express my views or exercise my right to respond to this consultation. - - The council lists the methods its uses to consult as: - -</p> <ul style="list-style-type: none"> • Other electronic media e.g. Twitter. • Leaflets Brochures • Notices of Consultation on lamp-posts • Formal Written Consultation / Community surveys • One to one meetings with individual stakeholders, • Public Meetings, • Area Forums • Planning Aids <p>- - As the draft local plan was finalised at the end of July 2017 and the consultation began on the 27th July one can only presume that the lack of engagement is to rush through, under the radar of the public a plan which will affect the lives of thousands of</p>		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SCI	Further comment
						<p>resident in Rossendale. It is clear that this has not been a targeted consultation process. - - It is clear that information is not sufficiently detailed as to enable consultees to understand the proposal and make meaningful representations from it. To comment on the consultation document firstly I have had to read Rossendale Draft Local plan which contains information that is complex, specialist and not explained. To contextualise the draft plan and prepare my response for the consultation I have also had to read guidance of a similar nature which included: - - •Rossendale Green Belt Review 2016 - •The planning inspectorate report to Rossendale Council in 2010 - •The Sustainability Appraisal of the Rossendale Local Plan May 2017 - •Authority Monitoring Report June 2017 - •Statement of Community Involvement 2014. - - The documents all contain information presented numerically, tables and maps. I have seen no evidence that the council has made any attempts to provide this information in easy to read formats or provided a consideration for those like me who are not experts in Local Planning policies and procedures. I have also found no evidence of how the council has considered those who's first language is not English or those who have learning difficulties. It is clear that the council has not provided information in a form that is comprehensible to the general audience of consultees, the residents of Rossendale. I would like to bring your attention to Case Law R South West Care Homes V Devon CC and Royal Brompton and Harefield NHS Foundation Trust V Joint Committee of Primary Care Trusts and Anor which detailed that 'Prescription to Fairness' is an aspect of fairness in that a consultation document presents the issues in a way that facilitates an effective response, another aspect of fairness lies in the representation of the information of which the views of consultees should be sought. - - At the meeting we posed this to X the planning manager who advised that that they have not written to residents as they generally throw information in the bin as they did with the consultation to the local plan (Core Strategy in 2011). I asked X how the council has come to this conclusion for example; had an evaluation of the previous consultation evidenced that people threw the information in the bin? If so how many people? I wanted to understand how the council had evidenced that this was an ineffective means of consulting with people. I asked X if I submitted a Freedom of Information request asking for this information would it be available. X confirmed that this decision has been taken following chat within her team which was not a minuted meeting. Separately to commenting on the consultation process this worries me as to how the council generally conducts its business. - - I would also like for consideration to the the timings of the consultation meetings to be given which were held between the hours of 4-7pm in the evening. This significantly reduced the opportunity for those in employment to be able to attend the meeting(s). - - At the meeting the Senior Planning Officer and X Planning Manager advised that the landowners of EMP2.15 has been written to and</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SCI	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	-----	-----------------

consulted with and it was very promising that the land would be sold to support the local plan. The landowner was contacted during the meeting who confirmed that they had not been contacted or written to and they had no knowledge of the consultation process. I highlighted to X that it was my understanding that it was illegal to provide false and inaccurate information during a consultation process and the process can now be classed as flawed. X acknowledged that this was a significant failing from her team. - We discussed our concerns with Councillor X who was unable to comment or advise on consultation process and when questioned about what an exceptional circumstance is to build on greenbelt land replied if there a 'Horse' on the land you should be fine – My only comment is respect of this is that it must be a concern to the council that members represent them in this manner. It is clear that the consultation process thus far has fallen short of commitment made by the council in the Statement of Community involvement 2014 and is fundamentally and significantly flawed. It would suggest that the council has breached its own policies and procedure has had not provided a fair, equitable and reasonable opportunity for resident of Rossendale to Contribute to the Draft Local Plan 2017. I have submitted a complaint in relation to this consultation process to central government as I feel that an investigation into the failure to adequately consult is required to determine if we have a dishonourable and incompetent council in
