771	Barbara	Lord	-		Object	The Plan proposes that over 15ha of greenbelt land in Edenfield is released for development on which it is proposed that 450 houses could be built out of a total of 489 for Edenfield. The scale of this increase on a village with currently only around 900 houses is enormous and would totally change the nature of the village for the worse. Particular problems which do not seem to have been considered adequately if at all are: - Traffic congestion on Market St which is a problem now but would be total gridlock with an additional 1,000 cars resident in the area and substantial construction related traffic for 15 years. - Traffic access from the new developments onto existing roads including construction traffic. - Loss of recreational areas for outdoor recreation including dog walking. - A new school or substantial extensions to the existing schools to provide for hundreds of new children. - Plot on the landscape of a beautiful natural area. -		
772	Kieran	Proffitt-Holmes	-		Object	I believe that all of the proposed new building and housing will change Edenfield from the nice village that it is and completely change the place in a way I don't want to see.		
775	Mathew	Ball	-		Object	I object to the proposed development on the following grounds: - the sheer size and scale of the development will completely destroy the village of Edenfield - Market Street is already almost impassible at certain times of the day due to the number of vehicles. Cars are parked all over the village. there is insufficient infrastructure to support the increased population for such a small village. No bank, no school places, no GP, no post office. - the number of houses being proposed is more than 50% of the existing houses, thus the effects will be felt to a far greater extend that adding these numbers to a already large town. by changing the greenbelt you will be completely at odds with the five stated purposes of including land within the green belt as defined by the National Planning Policy Framework. and i do not see any legal basis where these plans should be able to continue. To check the unrestricted sprawl of large built-up areas -To prevent neighbouring towns from merging into one another - To assist in safeguarding the countryside from encroachment - To preserve the setting and special character of historic towns - To assist in urban regeneration, by encouraging the recycling of derelict and other urban land. - Regards - Mathew		
776	Leslie	Hallam	-		Object	This would increase the numbers of houses in Edenfield by 50 percent. - The roads are busy as it is and more traffic would make it impossible . - Main services sewers , water , gas and electric would need to be doubled.. - The school could not cope , no room for extension . - No doctors or dentists in the village and apparently no possibility of having them . -		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
777	Christopher	Hanson	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village. - - This proposal will also potentially increase the number of vehicles by 1000 which will greatly affect the traffic and parking, which is already at a premium. - - There are only two schools which would not cope with the massive influx of children. - - There are no plans for increasing the GP and Dentist services in Rossendale to cope with the increase in population that this would cause.		-
782	Jean	Plumb	-		Object	Too many houses for this small village to deal with. - The schools cannot cope, both Edenfield Primary and Stubbins Primary schools are over subscribed each year. - I have no doubt that the new estates of houses will have roads to service them as part of the plans but there is still only one road in and out of Edenfield which will find it impossible to deal with the traffic. - There are no amenities in Edenfield, everything is a car/bus ride away. No shops, no dentist, no doctors. The park is nothing special and we have a community centre that just about caterers for the groups that use it at the moment. - This is not a good plan. I object to it strongly. -		-
786	James	Sixsmith	-		Object	I think the building of this many houses would have a negative impact on the Village of Edenfield, the whole character of the village will disappear making it a less desirable place to live. - I also think the infrastructure would not sustain such a development. Local roads are barely passable at busy times of the day so adding maybe a further 500 to 1000 cars is going to cause mayhem if not a bottle neck going through the centre of the village. The local schools, Primary and Secondary, are running to full capacity so how would this be addressed? There isn't a doctor's surgery or a dentist so where would the new residents attend as local doctors and dentist lists are already stretched . - I object to a development of this scale. - James Sixsmith Online survey comments received 07/10/2017: I have been a resident in this village since 1952, it is absolutely ludicrous what Rossendale Council are proposing, and down right disgusted by everyone working there. You are a Disgrace		I object to this development - I think the building of this many houses would have a negative impact on the Village of Edenfield, the whole character of the village will disappear making it a less desirable place to live. - I also think the infrastructure would not sustain such a development. Local roads are barely passable at busy times of the day so adding maybe a further 500 to 1000 cars is going to cause mayhem if not a bottle neck going through the centre of the village. The local schools, Primary and Secondary, are running to full capacity so how would this be addressed? There isn't a doctor's surgery or a dentist so where would the new residents attend as local doctors and dentist lists are already stretched . - I object to a development of this scale. - James Sixsmith

788	Sharon	Jeffrey	-		Object	I work at Haslingden High school and have to drive through this village. My Dad also lives in Edenfield. - I think the building of this many houses would have a negative impact on the Village of Edenfield, the whole character of the village will disappear making it a less desirable place to live. - I also think the infrastructure would not sustain such a development. Local roads are barely passable at busy times of the day so adding maybe a further 500 to 1000 cars is going to cause mayhem if not a bottle neck going through the centre of the village. The local schools, Primary and Secondary, are running to full capacity so how would this be addressed? There isn't a doctor's surgery or a dentist so where would the new residents attend as local doctors and dentist lists are already stretched . - I object to a development of this scale - Sharon Jeffrey		I object to a development of this scale. and I think would ruin the character of the village.
789	Adele	Hanson	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village. - - This proposal will also potentially increase the number of vehicles by 1000 which will greatly affect the traffic and parking which is already at a premium - - There are only two schools which would not cope with massive influx of children. - - There are no plans for increasing the GP and Dentist services in Rossendale to cope with the increase in population that this would cause.		-
807	Brenda	Chadwick	-		Object	I have heard of the Council's plans to remove a large amount of land out of the green belt for development purposes, and I feel that I must object strongly to this. I have been visiting Edenfield since 1978 and have always loved the lovely open aspect which surrounds the village and feel that a development as large as the one proposed would have a very detrimental effect on the area.		-
808	Gordon	Chadwick	-		Object	I have been visiting family members in Edenfield since 1978 and have always enjoyed the lovely open aspect which surrounds the village. I understand that plans are afoot to develop this green belt land and feel that this would be detrimental to the area. The scale of the development is far too large for a village the size of Edenfield and the infrastructure could not cope with this scale of development.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
809	Adrian	Donkin	-		Object	Edenfield has grown organically since it was a simple coaching stop to it's present size of around nine hundred dwellings. Whilst there are undoubtedly some pockets which could accommodate new housing, the huge increase proposed would simply not work. The village's situation and facilities will not sustain an expansion of fifty percent plus in the number of dwellings. - - The quantity of land proposed for release from green belt is almost equal to the area of land currently occupied by the village as it stands. The implication being that the new build housing will drastically change the nature of the village due to it's quantity and character. - - It seems highly unlikely that the folk who might move into the proposed housing would be working within Rossendale. Where is the sense in creating large quantities of housing in an area lacking in employment opportunity. Build the houses and most of these folks will be commuting somewhere, most of them to Manchester. By bus - what bus? By car - on the by-pass? - take a look during morning rush hour and imagine more cars; more congestion; more pollution; more frustration. - The roads of the village are creaking at the moment and the residents get regular glimpses of the future when a lane closure on the by-pass sends re-routed traffic through the village. Or the frequent occasions when morning traffic is so heavy that large numbers of motorists choose a "rat run" through Edenfield in preference to sitting on the by-pass. Even if the roads (and residents) could cope what about the environmental load of all those new commuters. - - Where will the new children go to school? Where will they find a G.P. or a dentist? Where will they shop? Where will they socialise? - - One final question: What chance that any promises made to assuage Edenfield will ultimately be delivered?		-

816	Paul	Petterson	-		Object	I understand that you are planning to remove large areas from the Greenbelt so that the land can be built on. - - I object to the large scale of the proposals which would spoil the character of the village. - - Policy H55: Housing Density - An increase in housing of around 50% is far too big and the current infrastructure of the village would not be able to cope such as the increase of double the cars parked in what is now overcrowded. The increased traffic would have a significant impact on the environment. - - Policy ENV1:. c) Being sympathetic to surrounding land uses and occupiers, and avoiding demonstrable harm to the amenities of the local area. - The amenities in Edenfield are already fully stretched with no GP surgery, no Post Office, one small local grocery shop and the two primary schools fully subscribed. How can any more be sympathetic? - - Chapter 6: Transport Policy TR1: ...Proposals which reduce the need to travel will also be encouraged. Edenfield is already very busy especially at peak times. When there are hold-ups on the Edenfield by-pass, which happen on a regular basis, traffic diverts through the village creating gridlock and is hazardous for adults and children who have difficulty trying to cross the roads. - •Promoting sustainable transport solutions to address congestion and air pollution; - •Ensuring that development that generates significant movement is located where the need to travel will be minimised and the use of sustainable transport modes can be maximised. ; - There is insufficient public transport now and many bus services are being axed. There is now no direct link with Manchester and limited bus services in an evening. Should the East Lancs Railway ever start to be used for commuter travel, this would not have an impact on Edenfield as a car/bus would be needed to reach the station. - An increase of almost 500 homes will almost certainly mean in increase in, possibly around 900, cars accessing the narrow roads in the area. -		-
817	Katie	Barnes	-		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village		-
820	Elizabeth	Lawton	-		Object	I am objecting to the scale of the developments proposed. Edenfield is a village and has a character as a village. Due to the large developments proposed I feel the large increase in the number of houses will detract from village life. There will be a huge increase in the number of cars in the village which will increase pollution and congestion. Having been brought up and lived in the village for 30 years, I now live outside the area but due to having a family had been considering a move back to the village. With the proposed changes I do not feel these would benefit myself or my young family. Due to the impact on the school this has also impacted on my decision to return to the village. I have family still resident in the village and visit on a regular basis and I am aware of the negative impact that large scale development would have on facilities, amenities and resources for the local community.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
822	Chris	Seeley	-		Object	This is Green Belt land - it's protected for a reason. - Do not allow it to be built on !!!		Your are our councillors. We DO NOT want Green Belt land built on. So please see the will of the people is respected, it is your job after all.
823	Lee	Ash	-		Object	I am objecting to the scale of your proposed plan. We have one main road in and out, and if there is an accident on the M66 or the bypass - Edenfield is gridlocked. And what about the lack of schools, doctors, social activity and the multitude of infrastructure that is needed to make Edenfield free flowing and operational? - Edenfield is a lovely village with greenbelt which contributes significantly to fresh air for miles. Building houses close to the bypass is unhealthy and wrong for all citizens. - Parking for cars is also limited as it stands so how will this be rectified with such a large amount of added cars and traffic?!		-
826	Donna	Kean	-		Object	I strongly object to the proposed removal of areas of green belt for the purpose of building a ridiculous amount of houses. The green belt is fundamental to the beauty of living in this area and to remove it would be a travesty. Edenfield is a small village and the addition of approx 490 additional homes is absurd. - Traffic through the village, on my road and on the M66 already backs up extremely quickly at peak times on a routine basis without the burden of the extra homes and their associated vehicles. Added to this is the parking situation in the village which like elsewhere in the area is on street. Additional residents will increase parking issues while accessing local shops which will put an extra burden on the road through the village. - The local services could not cope with such an influx of people e.g. doctor, dentist, schools,council. As a resident of Edenfield for the past two years I have been refused allocation of a green waste bin on the basis that they had all been allocated and even if they could give me one, they wouldn't empty it as the refuse collection round is already at capacity. My house is approx. 100years old so this is not an addition to the route and I am paying my already incredibly expensive council tax, so how is the council going to cope with all these new extra homes? - These proposals are absurd and appear to have been proposed by someone who has no idea about the area they are planning to develop and no consideration of the impact on the existing community or surroundings. The proposals would alter the character of the village irrevocably and should not be allowed to proceed.		-

827	Emily	Formby	-		Object	<p>I write further to Rossendale’s draft Local Plan (the “Plan”) and the ongoing consultation process. - - I have reviewed the information available on the Council’s website including: - - 1. The Plan and the accompanying policies map; - 2. The sustainability appraisal of the local plan 2017; and - 3. The habitats regulation assessment 2016. - - I also attended the consultation meeting at the Edenfield Community Centre on 12 September 2017 with a large number of other residents in the village when I was also able to consider the Lives and Landscapes Assessment for Rossendale Borough Council (dated December 2015 and prepared by Penny Bennett Landscape Architects). - - I am horrified by the proposal to remove from the greenbelt significant areas of land from around Edenfield village in order to facilitate the building of 489 new houses. - - The areas which I am particularly concerned about are set out within reference HS2.71 of the policies map which accompanies the Plan and include: - - The land off Exchange Street, Edenfield; - The land west of Market Street, Edenfield; - The land off Blackburn Road, Edenfield; and - - The land west of Moorlands View, Edenfield. - - The purpose of this letter is to set out my objections to these proposals. - - The need for new housing in Rossendale - - At page 6 of the Plan under the title ‘Chapter 1: Housing’ the Council’s policy HS1 is set out in relation to meeting Rossendale’s Housing Needs. - - The Plan states: - - ‘The need for new housing in Rossendale has been assessed in the Council’s Strategic Housing Market Area Assessment (SHMA) (2016). This study, which is consistent with the Government’s current policy position, examined a range of housing, economic and demographic evidence to assess housing need and demand in Rossendale.’ - - Further to the SHMA the need for additional housing is estimated at 3,975 new homes over the period covered by the Plan (2019-2034). - - Objection 1 - - In relation to Edenfield the Plan proposes that 489 new houses to be built which equates to 12% of the new housing required under the SHMA. - - It is inconceivable to me that Edenfield as a village of approximately 900 homes at present should bear such a significant proportion of the overall burden of new house building in Rossendale. The current population of Edenfield is significantly less than 12% of the overall population of Rossendale. - - Objection 2 - - As set out above when the SHMA was undertaken it was ‘consistent with the Government’s current policy position’. - - I note that the Government’s policy in relation to new housing has now changed to such an extent that it appears that the SHMA is no longer consistent with Government policy. - - On 15 September 2017 the MP for Rossendale and Darwen, Mr Jake Berry, published a post on Facebook which confirmed that under the Government’s new plans which were announced on the same day that the number of new houses required to be built in Rossendale had been reduced to 2,120. - - Under same post Mr Berry called upon the Council to suspend and proposal to remove land from the greenbelt and to prioritise new</p>	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>developments on brownfield and former industrial sites. - - The proposed development in Edenfield would therefore constitute almost 25% of the housing need for the whole of Rossendale. - - In these circumstances it is clear that the SHMA and the Plan are now inconsistent with central government policy and I would invite the Council to suspend the current consultation pending a review and a redrafting of the Plan. - - - The Lives and Landscapes Assessment for Rossendale Borough Council (dated December 2015 and prepared by Penny Bennett Landscape Architects) ("LLA") - - At the consultation event in Edenfield Village Hall on 12 September 2017 hard copies of the LLA were available to be reviewed. - - I note that the LLA is not available on the Council's website in relation to the Plan. Is there any reason why this document has not been published online in the same way as the habitats regulation assessment 2016? - - I note that the LLA states that it was commissioned by the Council to be incorporated within the Council's Site Allocations and Development Management Plan Document. - At section 3.2 of the LLA a description is given of 'Settled Valleys Landscapes Type' and the report states: - - 'Early on in this assessment it became clear that the single definition of Settled Valleys as 8a Irwell, while entirely appropriate for the northern part of the Borough and Whitworth, was not an accurate description of the landscape of the southern section of the Irwell Valley between Rawtenstall and Edenfield which is more rural in nature and importantly has little or no development in the valley bottom. It was decided to create a new Settled Valleys character area: 8b Irwell Valley south which more accurately describes this situation'... - - 'Settled Valleys LCT, extending from the valley bottom in many areas to elevations of 300m or more, can be an appropriate location for development, though dense development on the valley floor is not appropriate in 8b Irwell Valley South because of the much more rural nature of the Valley.' - - The LLA therefore acknowledges that the area described as 8b Irwell Valley south (which includes Edenfield) is rural in nature and is not appropriate for dense development. Given the relative size of the proposed development and the current size of Edenfield I would characterise the proposed development as 'dense'. - - At the end of section 5 of the LLA is a map of the area covered by the Plan titled 'sites overview' and described as 'figure 6'. - - That map highlights the proposed sites being considered for development by the Council and categorises them as either: (1) undevelopable, (2) developable with mitigation or (3) developable. - - I note that in relation to the area covered by HS2.71 in the Plan the vast majority of the proposed land is described as undevelopable with some small areas referred to as developable with mitigation. None of the land is described as developable. - - This appears entirely inconsistent with the proposed development in Edenfield. - - Exhibited to the LLA at volume 4: appendix 9 is the supporting information for the assessed sites (the assessment of the areas around Edenfield are set out at pages 88 to 122 of the same). - - I have set</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	---------	-----------------

out the conclusions reached by the LLA in relation to these specific sites below: - - 1. The outcome of the site assessment for the land at Blackburn Road (pages 88 to 89) is that the land is not suitable for development on landscaping grounds. - - 2. The outcome of the site assessment for the land at Burnley Road (pages 92 to 93) is that the land is not suitable for development on landscaping grounds. - - 3. The outcome of the site assessment for the land at Eden Mill (pages 96 to 99) is that the land described as A- C is suitable for development with mitigation but that the land described as D is not suitable for development on landscaping grounds. - - 4. The outcome of the site assessment for the land east of the motorway (pages 110 to 114) is that the land described as A is not suitable for development on landscaping grounds, the land described as B (being the site of the House and Jockey public house) is suitable for development and areas described as C – D are suitable for development with mitigation. - - 5. The outcome of the site assessment for the land at Pinfold (pages 116 to 120) is that the land described as A suitable for development with mitigation, the land described as B is not suitable for development and area described as C is suitable for development (this land is a small section of open space between 2 existing plots). - - Objection 3 - - Further to the LLA significant areas of the land which under the Plan as drafted will be released from the greenbelt in Edenfield have been described as unsuitable for development. The Council therefore appear to have disregarded a report which they have commissioned regarding the suitability of the land in Edenfield for housing. - - I am aware that the Council is already facing significant criticism and embarrassment as a result of the failed empty homes scheme which is estimated to have cost £4 million. I understand that one of the numerous criticisms of the Council in a report prepared by auditors was the Council overlooked or overrode its internal financial and legal procedures and the opinions of senior officers were ignored. - - I trust that lesson have been learned as a result of the same and that the Council will now urgently review the proposed changes to the greenbelt referred to above. - - The habitats regulation assessment 2016 (HRA") - - At paragraph 1.3.2 of the HRA a description is given of Rossendale as follows: - - 'Its main settlement areas are Bacup, Haslingden and Rawtenstall and there are a number of smaller villages including Facit, Crawshawbooth and Weir.' - - It is telling that Edenfield is such a small village that it is not even referred to by name within the HRA yet under the current Plan it is proposed to permit the building of 489 new properties (which is almost a third of the new properties required to be built in the entire valley. - - At paragraph 1.4 of the HRA it states: - - 'RBC [the Council] have presented Lepus with a list of sites which have been identified as being suitable for housing, employment, tourism, retail, green infrastructure and mixed use development.' - - It would therefore appear that the Council had already taken the decision to ignore the conclusions of the LLA (which

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	---------	-----------------

predates the HRA) when referring the land surrounding Edenfield set out in HS2.71 for consideration for development. - - At paragraph 1.5 of the HRA the policies under which the sites have been considered have been set out. - - I note that this includes the requirement to meet Rossendale's housing requirement. For the reasons set out above this housing requirement has materially changes since the HRA was commissioned and published. The conclusions of the HRA should therefore, in my opinion, be reviewed as a result. - - At paragraph 3.6.3 of the HRA it states: - - The large developments proposed at sites Land at Alder Bottom, Land to the South East of Edenfield and Area of Search to the East of Edenfield may reduce this characteristic linear settlement form and vastly increase the size of Edenfield.' - - The HRA therefore acknowledges that the proposed development will significantly alter the characteristics of Edenfield. - - At paragraph 3.6.5 of the HRA it states: - - 'Development at these sites [Land to the west of Moorland View, Land west of Blackburn Road, Land between Chatterton Hey and Nursing Home and Land at Alder Bottom] may result in the loss of linear settlement pattern and/or possible urban sprawl.' - - At paragraph 3.6.21 of the HRA it states: - - 'A watercourse runs through Land at Alder Bottom, Irwell Vale Mill and Acre Meadow; and Area of search to East of Edenfield and Land to the southeast of Edenfield. Contains springs. The boundary of Edenwood Mill, Land at Market Street, and Land of Blackburn Road (A0 are at high risk of surface water flooding. Areas of surface water flooding are also located inside the boundary of the following sites: - - Land at Alder Bottom; - - Acre Meadow; - - Land between Chatterton Hey and Nursing Home; - - Area of search to East of Edenfield; - - Land to southeast of Edenfield; - - Land off Blackburn Road (A); - - Land west of Blackburn Road; and - - Lunge Mill. - - Development of these sites would be at high risk of surface water flooding. - - Given the impact of the flooding over Christmas 2015 and New Year 2016 I am surprised that concerns regarding potential flooding have been overlooked. - - At paragraph 3.6.25 it is acknowledged that all sites within Edenfield are over 1km from a GP and over 8km from a hospital. It is also acknowledged that the capacity for GP surgeries to take the residents of these developments is unknown. I note that under the Plan no provision has been made for additional facilities such as a GP surgery. - - Reference is made at paragraphs 3.6.30 and 3.6.31 to the location of primary and secondary schools. - - As far as I am aware Edenfield Primary School is already full subscribed and there is only one road from the village to the nearest Secondary School. No reference is made in the HRA to the capacity of these schools to take pupils from the proposed developments and I note that under the Plan no provision has been made for additional facilities such as schools. - - Objection 4 - - The facilities available in Edenfield do not have the capacity to cater for the increased population of Edenfield if the proposed development proceeds. - - Objection 5 - - The HRA sets out a number of reasons for the land contained in HS2.71

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						being deemed unsuitable for development which do not appear to have been given due consideration. - - - The Plan - - The details of the Plan relevant for Edenfield are set out in HS3: Edenfield of the Plan. - - I note that the proposed development for Edenfield is dependent upon a number of factors including a comprehensive development of the entire site. Given the intention to disregard the advice received by the Council regarding the unsuitability of large parts of the area to be developed in Edenfield I presume that the development of the site (26 hectares) would be undesirable or uneconomical if only smaller sites (such as the land at the Horse and Jockey public house) were released for development. - - HS3 also sets out requirements for a scoping study, transport assessment and travel plan to be agreed with Lancashire County Council. - - Reference is also made to ensuring the development promotes the use of public transport, walking and cycling. - - Objection 6 - - Whilst if it proceeds, any development may have plans to maximise the use of public transport, walking and cycling, no consideration appears to have been given to the fact that the vast majority of facilities used by residents are in either Ramsbottom, Haslingden or Rawtenstall. Journeys to these areas require the use of cars. Given the size of the development in relation to the size of the village the road infrastructure will not be able to cope with the resulting increase in vehicles. - - Objection 7 - - Even at the moment (before the significant additional traffic which will be created by the new development) at peak times, such as morning and evening or during the weekend, traffic on Market Street is heavy. During these times Market Street effectively becomes a single track road outside of the shops at the south end of the village for cars and for the whole length of Market Street when buses or lorries are travelling through the village. The infrastructure of the village simply cannot cope with development on the size proposed. - - Please acknowledge safe receipt of this objection and let me know the process and time scales for the remainder of the consultation. -		
829	Dave	Clark	n/a		Object	I would like to object to the sheer scale of the proposed development. My objection is also to the proposed destruction of green belt. This is my children's legacy and must be preserved. There are a number of brownfield sites that can be used but the developers have instead chosen green belt locations - purely down to the profit they can make. I understand there is a requirement to build more houses as we have a growing population, but to target precious green belt for profit is disgusting. The council - as our representatives - have a moral obligation to the people of the borough to choose what is right and not to pander to developers in this way.		This is just wrong. The scale and location of the development should be reconsidered.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
830	Amy	Clark	n/a		Object	I would like to object to the proposed development. My objection is to the proposed destruction of the countryside. There are a number of brownfield sites that can be used but the developers have instead chosen green belt locations - purely down to the profit they can make. I understand there is a requirement to build more houses as we have a growing population, but to target precious green belt for profit is disgusting. The council - as our representatives - have a moral obligation to the people of the borough to choose what is right and not to pander to developers in this way. People have chosen to live here because of the countryside, by removing this you are making the area poorer.		No - the proposal is wrong and should be reconsidered.
832	Susan	Smith	-		Object	The size of this development is too great for the area and would change the whole village of Edenfield. It is the robbery of the Greenbelt and would affect future generations.		Rossendale must have enough brownfield sites for use before looking at existing greenbelt land, e.g in Edenfield there is the land at Rosebank which is just becoming a dangerous ruin and the land off Wood Lane.
834	Melanie	Kay	-		Object	I object to the sheer scale of what it proposed for edenfield as this will dramatically alter the character of the village. There are a number of brownfield sites in rossendale that could be utilised without removing fields from the greenbelt. Areas such as stand football club, Mayfield chicks as examples. - The village can not maintain such an expanse of housing the infrastructure and road network is not suitable .		-
835	Matthew	Leake	-		Object	I object to the sheer scale of the proposals. Edenfield does not have the infrastructure to cope with the increased demand, and the whole character of the village would be adversely affected.		-
836	Matthew	Mead	-		Object	I am objecting to the proposal of turning large areas of Edenfield into brown belt areas and the building of far too many houses to fit inside our villages infrastructure. - My Family has lived in this village since early 1900. They and i have seen the village house population grow bit by bit and the shops close one by one and the bins emptied less and less, the grass cut less and less, the once clean public paths get serviced and cleaned less and less, the schools get fuller and fuller.... - Are nearly 500 houses going to improve any of this? - This is a lovely quiet village and it's on the verge of being ruined by some fat cats that don't even live here. - I am also very concerned about the fact that 6 months ago that most of the proposed land was bought by a large house builder and its lands that the council are putting up to be developed. I feel like there is a conspiracy at work. - Matthew Mead		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
837	Margaret	Jones	-	Along bypass	Object	This is a large single expanse of greenbelt, with no history of development that you are looking to change to residential. It would change the make up of the area with effectively a new village, rather than infilling pockets with in the existing village envelope and brown field sites. There are other sites such as the old Mill sites at dearden clough or Rose bank which are brown field sites. These would be smaller pockets of housing, providing in fill. Yes they would have to be more sensitively developed to accommodate the water as is the he case with Mills, and steeper ground, but, this is the case with much of the borough. The green belt, green field sites should not be given up because they are easy to develop, they are. Far far more important to the nation nevermind the local population than that.		I understand the need for a local plan and the need for a number of properties to be built, and that these have to be properties people want to live in, as just having a house isn't enough in our country. But I feel that giving up large saves of greenbelt to achieve this rather than prioritising the development of derelict Brown field sites of our industrial past is unacceptable approach.
838	Ben	Bentley	-		Object	Having been brought up in Edenfield and still living in Rossendale I object strongly to any removal of green belt land and any large scale building development. - Local schools could not take any increase, I couldnt get my children into Edenfield as they were full. There are no GP services there either. - The impact on health from extra traffic would be immense and the loss of green land which helps purify the air we breathe would be detrimental to us all but in particular to children and future generations. The noise of traffic would be greatly increased. Its already very noisy from the A56 in certain wind conditions. - Edenfield village centre would become a traffic nightmare as cars turned out onto the main rd and trundles through. Rawtenstall roundabout hardly copes as it is. More traffic, more congestion, more fumes more noise. - The charming character of the village and the valley in general would be spoilt by the scale of these developments as we would become a vast sprawling suburb, no longer a 'green' countryside area.		-
839	Lisbeth	Smith	-		Object	I wish to object to the size of proposed development in Edenfield. The current infrastructure will be unable to cope with the influx of potentially an 50 per cent increase in the population and transport to the area. - The current schools within the area will not be able to cope with such an increase in children, there are no plans for an increase in medical facilities. - Transport will be a nightmare, the current M66 and bypass will be unable to cope with the increase in traffic. Public transport has already been drastically cut, there used to be 2 direct bus routes through Edenfield to Manchester (X44 and X35) both these services have been withdrawn with one of the companies stating that drivers found it difficult to get through the village due to congestion! This will be made even worse if the proposed number of houses are built. - The character of the village will be drastically destroyed.		I do not oppose some development but the sheer size of the proposed development is out of sync with the whole area.
840	Joanne	Maddocks	-		Object	There are plenty of sites more suited to being developed such as the field facing the duckworth arms, dearden clough and the land at the side of wood lane. - The developers simply want to build executive homes on land with excellent views, this doesnt fit in with the design of Edenfield and how it has evolved over the years.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
841	estelle	hopwood	-		Object	I object to the scale of propose housing. Edenfield is a tiny village and could not cope with the extra housing. The pollution is already high, schools are full, roads full and narrow. Already to many trucks.No doctors surgery. - - I do not want green belt to be built on		the council had no right to sell this land.
842	jenny	Greenhalgh	-		Object	I object to this plan and the council had no right to sell our green belt.Edenfield is a small village and to add nearly 500 houses is madness. - - there is no benefit to the local resident but just negatives - higher pollution , more traffic problems , more crime, no doctors, schools are full, damage to wild life, roads are crumbling and to narrow. - -		if the council have to build house's, then make sure they fit into the environment, Terrace house's could be built which wont take up much land. But then this is all about money.
843	PAUL	DODD	RESIDENT		Object	I object to the use of Greenfield sites to increase the housing in Edenfield by nearly 50%. The planned massive increase in housing in Edenfield will irrevocably change the character of this small village area: for the worse. In the draft plan I cannot see any rationale or purpose to the increase in housing in this area: especially a reason for using and destroying Greenfield space. - I have lived in Edenfield for over 25 years and the reasons for first moving here have remained more or less the same. This is an area that is small and relatively self-contained; it is unspoilt; and it has plentiful green spaces within a short walk. Whilst the local amenities have contracted and diminished over the years, Edenfield remains a good place to live. Any large - scale increase in housing will, I believe, have a detrimental impact on the village and its environs. - For the above reasons, I strongly oppose any large - scale increase in the number of residential properties in the Edenfield area.		No
844	Lorna	Ball	-		Object	I wish to object to this proposal on the grounds that Edenfield simply does not have the required infrastructure to support expansion on this scale. There are already considerable strains on the area in terms of roads, schools and utilities. I can see no way in which a development of this scale would enhance the local area and feel that it would only prove detrimental. I feel that the environmental impact would be that this would no longer be a rural space but simply an area of urban sprawl with very little concern being shown for its impact on existing residents.		-
845	Joanne	Lewis	-		Object	Keeping the land green belt is vital to preserve the character of our village. There is also the very serious infrastructure and Safety issues that so many new properties would bring - Strain on the schools - Parking on Market street - Additional traffic etc -		Green belt should never be considered for use until all brownfield sites have been exhausted.
846	Paul	Whitehead	-		Object	I am objecting to this on the sheer scale of what is being proposed for Edenfield as this would radically change the character of the village.		No thought has been given to the services that are needed in a community of the size being proposed i.e. Schools, roads, doctors, jobs etc. This village cannot cope with such an increase to the community

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
847	Jean-Pierre Louis	DESPREZ	-		Object	Extremely strong objection to the size of the proposed development in an area already swamped by cars and traffic, limited parking spaces, lack of community facilities (no surgery, no post office etc), Such an alteration to the village would not only alter its character but in the long term destroy it.		None other than those outlined in question 8. Only the cynical comment that the Green Belt is applicable when it suits - see those people who have tried to obtain planning permission in the past for minor improvements.
849	David	Sallis	-		Object	we are a small village and the scale of housing is not feasible. This plan will add pollution, increase traffic, take away green belt, ruin local wild life and spoil the area. We don't want to live in a building site.		but the residents before profit. build low cost house's that locals can afford and house's that fit in the area , like terrace. don't build too many.
850	Denise	Sallis	-		Object	we are a small village and currently have problems with our infrastructure, so to build so many house's is unthinkable. Green belt should stay green belt. Pollution is already high and another 1000 cars will not help. These house's will not be affordable to local people nor fit into the area. The wildlife will be affected. I do not want to live in a building site for 15 years.		the council should put residents before profit and they had no right to sell the green belt.
851	Anthony	Heffernan	-		Object	I wish to object to the scale of the development proposed for Edenfield and the fact that the council intend to give away the green belt land instead of using existing/brown belt. The village infrastructure cannot support a development of this size.		It is an easy option to build on green belt instead of looking for alternative sites.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
855	Michael	Flatley	-		Object	<p>Access and through traffic routes. - Edenfield village is a relatively small area but contains a number of arterial routes that converge in the village. These routes link to Rawtenstall and the adjoining areas, Haslingden through to Blackburn, Ramsbottom through to Bolton, Bury, Rochdale, and of course Manchester. - - These routes all converge to go through the village, though there is a bypass between Edenfield and Rawtenstall. The bypass already struggles during peak periods and as such people also use the main road through the village, which at peak times is already heavily used and is becomes congested. The area around the primary school also suffers with traffic at the start and end of the school day, which is a potential safety issue already! - - This arterial route will not cope with further traffic. The village already suffers with parking due to the existing terrace housing that fronts the road (with no alternative parking) and as such the use of parking restrictions on the road is not an option. Bury road in particular suffers with traffic as this is a direct route from traffic leaving the M66 at the Ramsbottom junction. Bury road suffers with collisions and many near misses. - - Increased traffic through the village is not viable as this will cause major delays and more seriously is a huge potential for accidents. It will also impact heavily on the noise created by traffic and of course air pollution. - - Please also note that any problems on the M66 and the A56 cause huge delays and major congestion through the village. This is becoming a more frequent occurrence, and any increase in housing in Rossendale will have a significant impact. - - Unfortunately the existing roads – Bury road, Market Street and Rochdale road do not lend themselves to alterations to cope with additional traffic. Please also note that there are a high number of elderly residents who are less likely to have vehicles than the average. As the population is refreshed the number of vehicles owned by the residents will increase which will put a strain on existing available parking, and further congest the routes through the village. - - Amenities. - Edenfield has very few amenities, with residents already having to travel out of the village for even the more basic requirements. It does not have any health care as the local doctors surgery relocated to Rawtenstall many years ago. The primary schools are currently full and secondary places in the borough are in the same position. Edenfield does not have a dentist. The community centre and recreational areas are not suitable for an increase in residents. - - Location of the proposed housing. - Many of the proposed houses will be located very near to the bypass. That area has a high noise level, especially during peak periods and when the road is wet. The area will also suffer from a high level of pollution due to the proximity of the bypass and also the increased traffic. - - The character of the village. - Edenfield is a quaint village with a village feel. Increasing the number of houses will make it loose that character. That character is very precious and once gone cannot be replaced. You cannot just build a village with this type of</p>	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	Further comment
						<p>character in the future as this has come through the age and history of the village. - - Use of green belt land. - The green belt was introduced for a reason and once it's gone, it's gone. Has the need for green spaces decreased – NO! If anything the need for these areas is more important today than ever. Don't throw these areas away, they are far too precious. - - As a resident of Edenfield I strongly protest these proposed developments. -</p>	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
856	Karen	Adams	-		Object	<p>How dare you attempt to turn our green Village into a Town. I grew up in Edenfield, my family live in Edenfield, my children attend Edenfield C of E Primary School, we support the local businesses in our area, Myself and my family live just outside of Edenfield on the outskirts of Ramsbottom (another area that is threatened with it's green belt being taken away - that's another local council area so my objections for there will go to Bury.gov). If we all wanted to live in a city we would have moved to the busier places like Bury and Radcliffe but we have chosen to make her homes in a rural area. We chose it because its green and without high level population, we chose it because we like the community feel. City people live in the city because they chose that life for themselves. So how dare you swamp out green belt with more houses and take our rural spaces away from us. - - The roads do not have the capacity to deal with the volume of traffic this number of houses will give us, the Primary Schools have already increased their intake, there is no more room for even further intake. (Have you even been in Edenfield Primary School?). Over the Summer holidays another classroom was added which has sectioned off the inside of the school hall. The beautiful hall has shrunk and it's stain glass windows are now hidden behind a classroom. There is no more room for more children. Rossendale Council cannot even provide us with a School Crossing Patrol Person at our school (we have had no lollipop person since this term started at the beginning of September) our 4-11year old children are currently crossing over an already busy main road without any safety assistance endangering their lives daily. I am led to believe due to council cuts there are no spare staff. So are we expected to believe our council will provide provisions for this large influx of residents? We dont have GP's in the area, we dont have Dentists we all travel into the towns for NHS services. Is their plans to increase GP's, Dentists, Schools in the area? I am certain not. Market Street is such a busy road now already. We do not need the volume of traffic increasing through our already busy village. - - I understand that housing needs to be increased but build near the already populated areas not on our green belt, building in Edenfield is to line the pockets of House Building companies NOT to create affordable housing for first time buyers. Edenfield is a sought after area because it is rural, that automatically puts the prices of homes up so first time buyers are not the people that would be able to afford these homes. I do not believe these homes are for people that are struggling to find affordable homes. It's business and it is simply rich people getting richer. I wonder if those making the decisions to take away our green areas live in highly populated areas themselves (out of choice). I am certain they themselves don't live in densely populated areas, with no greenery and failing road infrastructure and over-subscribed schools. I am certain not. - - Those are my comments.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
859	Roger	Wynne	-		Object	I object to the sheer scale of what the Council is proposing because it would radically alter the Character of the Village		no
861	Carol	Meeks	-		Object	I OBJECT TO THE SCALE OF WHAT THE COUNCIL IS PLANNING BECAUSE IT WOULD RADICALLY CHANGE THE CHARACTER OF OUR VILLAGE. THE EFFECTS ON OUR ROADS AND SCHOOLS ARE ALMOST UNTHINKABLE.		I am grateful to Mr Bradburn for doing these comments on my behalf.
863	Ian	Bailey	-		Object	I strongly object to the sheer scale of this proposed development of Edenfield. It would forever alter the character of the village. There is no infrastructure to handle such an increase in the number of houses. All roads in and around the village are already over capacity. - - This is not an appropriate use of Green Belt land.		I sincerely hope the strength of feeling of the residents of Edenfield are taken seriously. The scale of this proposed development is disgusting. It has taken 5 CENTURIES for the village to evolve to the current 900 houses, and the proposed plan would see 500 more in the space of 15 years. It is sickening.
864	Terence	Kitson	-	Market Street	Object	Whilst very few if any of the proposed housing will address the needs of local affordable housing in Rossendale what is the point. People from outside Rossendale who can afford the extortionate priced luxury houses Taylor Wimpey want to build and want to live in the countryside and commute to work are only exacerbating problems that Rossendale need to address already with the present population of the valley ie infrastructure transport schools health services. Edenfield is in no position to consume this enormous increase in population. - - I wonder if the land to the west of the Edenfield bypass opposite this proposed site has been considered. It is of ample size to accommodate the proposed 4 sites in Edenfield and would alleviate traffic through the village at least access could be made from Hardsough Lane and the bypass at Haslingden. Not that I endorse either site but like someone said Taylor Wimpey didn't buy this land to graze sheep sounds like they have had a nod and wink.		The whole of Market Street is at present reduced to a third of its width by parked vehicles 24/7 so imagine another 800 plus trying to negotiate the village if your current plans go ahead. That's daily and before an incident on the bypass when all traffic is diverted through the village. - - The only primary school in well oversubscribed and parking a nightmare at drop off and pick up. - - There are no medical services in the village again all the nearest are oversubscribed. - - Air pollution should be considered. - - Run off water from the moors will go where if you concrete over 31 acres. - - The whole plan is too big smaller better selected affordable housing once infrastructure is improved might be possible but your plan does not serve the existing population of Rossendale in any way it exacerbates existing problems.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
871	Colin	Campbell	-		Object	I object to the sheer scale of what is being proposed for Edenfield and which I feel would radically alter the character of the village. - -		Edenfield is a desirable village however with the amount of houses proposed it would no longer be a desirable village. It would be more beneficial to the whole of the valley if the amount of houses that need building be shared out over the area, this would absorb the amount of houses within the areas and the strain on doctors, schools, dentists would not be as concentrated. - - The dangers of building so many houses in one place would increase, too much traffic (of which there is already), the heavy building equipment going through the village and parking would put people at risk. Especially children. - - The disruption that will be caused over the years that the proposed housing will be built is totally unacceptable. - - This village cannot cope with the traffic that already passes through it so with more houses and the disruption they will cause whilst being built will put far too much strain and inconvenience far too many people over an unacceptable amount of years. - -
874	Louise	Ogilvie	-		Object	I am objecting to the plans to develop circa 500 houses on green belt land. First I object on the basis that green belt space should be maintained for environmental and leisure reasons. Secondly I object on the basis of lack of sufficient infrastructure to sustain the size of development - roads are small and narrow and developing would create huge traffic problems. - - Thirdly, I object on the basis of lack of local infrastructure such as schools and other public services such as no doctors, dentists or community services available in the village. These services are accessed by residents of Edenfield in surrounding villages and are already overstretched. The development would bring thousands more residents needing such services. - -		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
876	Mervyn	MacDonald	-		Object	I believe the extent and nature of the proposal is on such a scale as to be totally inappropriate to be commensurate with the surrounding area and that it will destroy village life as currently experienced in that existing residents and infrastructure will be overwhelmed. Furthermore the loss of green belt land will reduce air quality both in Edenfield and further afield plus it is potentially dangerous to facilitate residential areas close to motorways/dual carriage-ways in view of the higher incidence of air pollution in these areas.	-	
877	Jacqueline	MacDonald	-		Object	An extra 500ish houses is excessive for a village the size of Edenfield. Everything possible should be done to protect the Green Belt. There were good reasons for establishing Green Belt areas in the first place and these are still valid today and therefore the Green Belt should be left undisturbed for future generations.	-	
878	Chrstine	Caudwell	-		Object	I object to these proposals on the grounds that these large scale proposals would completely change the character of the village for the worse. It would greatly increase the volume of traffic in and around the village, which is already a problem in the area. The village doesn't have services that could cope e.g. Lacks school places, doctors, decent access to local bus services. I am also concerned that by developing this land you could be worsening the effect of flooding both on the bypass roads and the run off down to the river irwell and chatterton and stubbins.	-	
880	Gerald	Bowden	-		Object	I am not against some small developments in the village but I object to the proposals in the Local Plan - as the number of houses proposed (489) is excessive and cannot be supported by the size and structure of the village. - - A one street village is definitely not the place to site a development of the size outlined in the Local Plan. - - 489 houses would increase the properties in the village by over 50% which would result in approx. 1000 cars at those houses. This is impossible to accommodate in our one street village. - - There is no facility for primary school places and secondary education in the area is nearly at full capacity. The services of Doctors and Dentists would also be an additional problem.	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
881	Gordon	Ellis	-		Object	My wife Olive has already stated several objections to the scale of the proposed development, which I agree with, but on further reflection I would like to add the following. - I feel it is vital to protect the Green Belt in the Rossendale Valley. Once it vanishes we will lose forever the benefits of green spaces for the health of the human population, and the wild life corridors essential for maintaining the species diversity for which this area is well known. - It might also be argued that building houses bordering the M66 could be a ticking time bomb for Rossendale Council: it is well documented that noise and particulate matter from heavy traffic pose both physical and mental health problems so encouraging house building there could have legal implications for the Council. - I hope the Council will stand up for Rossendale residents by retaining all the Green Belt which benefits everybody in the Rossendale Valley - Thank you for your attention.		Please fully utilise brown field sites for necessary housing, and do not succumb to Government pressure which seems to think huge numbers of houses are needed here. We do not have the jobs for the proposed increase in local population.
882	James	Byrom			Object	The proposals would completely change the character of the village and not in a good way. The heavier traffic will cause enormous problems for the residents. It will also increase the number of homes by over 50% in a short period. I object to the proposed size of this. The proposals will completely alter the character of the village, in a negative way. The additional traffic will have a detrimental effect and locals will endure difficulties especially at peak times. The main reason however is the fact that the proposals are on green belt land which will ruin the landscape forever.		No
883	Daniel	Ross	-		Object	i strongly disagree to this plan, as it will bring lots of pollution and destroy the habitats of thousands of animals living in the fields.		it will cost too much. i enjoy having beautiful views from my window
884	Jenna	Healey	-		Object	Haveing moved to the area 1 year ago due to the greenery and location and lack of air pollution I am very disappointed in the plans for a number of houses building up the area. I also find it disgraceful that I plan to develop on my own land for a garage which will be built with the character of the area and property that I have to jump through hoops for the permission as I was told by the planning inspector that they tend not to agree planning permission in this area due to the green belt and they do not want a rise in buildings - how can they tell me this when he plans are to hrow up hundreds of houses on that same land. I think it is a little contradicting and does not make sense. I there for submit my objection for this extra reason and hope this is taken on board.		-
885	Lynn	Clegg	-		Object	Leave our greenbelt alone. Traffic is a joke now in the area the roads schools can not cope now.		-
887	David	Hayhoe	-		Not Applicable	Not acceptable		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
891	Michael	Thompson	-		Object	I object to the massive scale of the proposed plan in Edenfield as it will totally alter the the character of the village. - I also object to the use of green belt land when there is brown belt land not being considered. - I have serious concerns that the area cannot sustain such a large increase in population.	-	
893	Morag	Thompson	-		Object	I object to the massive scale of the proposed build in Edenfield as it will radically change the character of the village. - Also the the use of green belt land when brown belt land is not being used.	-	
894	Harry	Stringfellow	-		Object	We object as a community to the scale of this plan as we feel it will ruin the integrity and character of our village. Submitted on 09/10/2017: I object to these proposals on the grounds that the sheer scale of the development plans are far too large and if carried out would ruin the character of the village.		The aforementioned areas are in Edenfield.
895	Verity	Stringfellow	-		Object	We object to the scale and the aim of what is proposed for Edenfield. The plans would radically alter and decimate the character of our village.	-	
897	Michele	Crossley	-		Object	The village is already heavily conjested at times with traffic. Living on Dearden Fold we back into Dearden Clough and Bury Road. It is regular to hear vehicle collisions, near misses and road rage. Bury Road is narrow and conjested with parked cars, the extra traffic with construction vehicles plus the cars from people living in new houses would be to much for Edenfield village. - - Moved back to Edenfield 5 years ago for a healthier, more relaxed, way of life. Now looking at takeing away the green belt from us, the reason we moved back!	-	
898	Hannah	Seeley	-		Object	Edenfield is perfect as it is, and the land (as well as the locals) will not take kindly to more houses being built.	-	
900	Liam	Fahey	n/a		Object	I object in the strongest possible terms to massive unprecedented scale of the proposed development for Edenfield. - - An increase of just under 500 large houses represents an increase of over 50% of the entire house numbers which is completely unsustainable in terms of infrastructure, parking, schooling (local Primary and high school provision), and health. - - The removal of such a huge swathe of the Green Belt land will diminish our community and lives, and siting so many houses, families and young people so close the busy A56 will be a health risk to the proposed new residents.		This huge scale ripping up of the Green Belt land must not, cannot, be allowed. This is not a case of "BIMBYism", I agree some development will be needed, and a managed extension to the village is needed if local children are to be able to stay in the village; but brown field development MUST be examined rather than taking the simple option to allow development on our Green and Pleasant greenbelt Lands which I believe has already been purchased by a major housing developer.
904	Rosemary	Trippier			Object	there is too much traffic in the village already we dont need to add to it		go build some where else

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
905	Matthew	Scanlon	-		Object	I strenuously object to the purposed development on these grounds. - There is no infrastructure to accommodate a extra 489 house in the small village Edenfield. - Traffic is down to one lane on Market street at present. Because of parked cars. Large vehicles struggle to get through. - If there is a accident or closure on the A56 the traffic diverts through Edenfield. Which causes major traffic jams and problems.I believe the witchway x43 as terminated it Edenfield service because of traffic problems. - School children can not cross the roads safely at present, no zebra crossings no traffic calming measures. Accident waiting to happen. There isn't enough parking at moment. If double yellows on Market street wouldn't work. Because there isn't anywhere else for residents of visitors to park. - All the local schools are over subscribed even though they have all been extended numerous times. Doctors and dentists are over subscribed. - I'm a local plumbing and heating engineer and work with local utilities companies in and around Edenfield. A lot of the utility's are running at full capacity at present. - Greenbelt shouldn't be built on when there are lots of brown field sites which are not being put forward for development. Probably because they are not as profitable for the developers. - Lots of people travel to Edenfield to enjoy the greenbelt and it's openness. Which brings money for local businesses and jobs for people. Building on greenfield sites around Edenfield would ruin the character and nature of this historic village. - There are a few small developments going ahead in Edenfield which I don't have a problem with. Because they will not cause to much damage. 489 in Edenfield houses is a quite unbelievable.		
908	Natalie	Paintin	-		Object	Traffic - the building of more than 450 new homes could result in up to 800 more cars using the already busy roads daily. Market street is already a busy road. - Green belt land - the proposed area is green belt land. It should be kept that way. It's Green belt land for a reason. - Schools - the schools in the area are already full, and very popular. Where are all the children in the area going to go to school?! - Stress to current residents - from driving through edenfield every day and seeing the posters objecting in their windows, and attending local meetings, its obvious that this is creating a great deal of distress for many people who are concerned about houses being built in front of them. They are worried about their children not being able to go to the local schools. They are worried about the increased traffic. -		
910	Stewart and Geraldine	Wilkins	-		Object	We object to the proposed plans as the scale of such plans would radically alter the character of our lovely village. The road through the village is already far too busy with traffic and simply couldn't cope if these plans were to go ahead.		Edenfield is a beautiful quiet village. Please keep it that way.

915	Jonathan	Glover	Private Citizen		Object	Edenfield has not the infrastructure to support such a development- the roads can't cope already with the traffic (including the Scout Moor quarry traffic). Parking will become even more of a nightmare - there is no Doctors Surgery - the two schools will not be able to accommodate such an influx. Badly thought out. -		Wrong development at the wrong place.
919	Russell	White	-		Object	Strongly object to these plans as Edenfield could not cope with the amount of development proposed.		-
920	PETER	HAWORTH	-		Object	The objection is to the removal of the above stated areas being removed from the GREEN BELT and the unacceptable scale of the development that would inevitably follow such action.		-
921	Jennifer	Wolfenden	-		Object	I object to the scale of what is proposed because it will totally change the Character of our village and amongs other things bring hundreds of extra cars onto our roads making it much more difficult, for example, to cross Bolton Rd North to take my children to school since the County Council has removed the Lollipop Lady.		I had difficulty doing the comments myself because I did not know the reference numbers etc and was not sure about some of the jargon viz. Site Allocation or Policy, so I was happy when Mr Bradburn offered to do it for me.
923	Michael	Southern	-		Object	What the council is planning would completely change the village which I absolutely oppose, so I object to the proposals.		I do not have a computer and so am grateful to Mr Bradburn for his offer to make my comments on the plan.
924	Peter	Hardman	-	Several areas of removal of green belt off Exchange st and west of Market St, Edenfield	Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village. Traffic / parking would become a huge problem as would insufficient schools, shops, pubs and other infrastructure. Access to the motorway at the Ramsbottom junction would be impossible in morning's especially and a southern access from the Edenfield junction would be imperative.		-
925	Angie	Pearson	-		Object	I strongly object to the proposed plans to the above areas. I have lived in this beautiful village for many years and these plans will radically change it. Apart from all the obvious problems ie) lack of school/ doctors etc.. We already have a severe traffic congestion problem. There is difficulty on the Main Street.. Market St... As residents have to double park therefore access through the village is chaotic.. This is magnified at rush hours and school hours making the area around the school and church dangerous. I live on a farm which means I use Exchange St several times a day. Exchange St is impassable at times.. Emergency vehicles would not be able to pass .. Any delivery wagon we have and the bin wagon often have to back out on to the main road and redirect through the housing estate.. Which again isn't the safest as many children play out. - The village just isn't set up for increased traffic!!! Also if there is an accident on the bye-pass as there often is... The village takes this extra traffic also - In my eyes it is just a crazy idea! - Angie Pearson		No

926	Paul	Thompson	-		Object	If this plan is implemented it will totally change our village and so I object that. It would generate perhaps as many as 1000 extra cars, how will the roads cope?		I was grateful when Mr Bradburn offered to make these comments on my behalf.
927	John	Castley	-		Object	What is planned would radically change our village for the worse and I oppose it. As I understand it, if implemented the population of the village would increase by over 50% which I believe is wrong.		I am grateful to Mr Bradburn for offering to make these comments on my behalf.
928	Glyn	EWall	-		Object	I object to the scale of what is planned as it would totally change our village.		I am very busy and am grateful that the Residents Association has offered to make these comments on my behalf.
929	Barbara	Denton	-		Object	We object to the sheer scale of what is proposed for Edenfield which will ruin the countryside character of the village		-
930	Claire	Wall	-		Object	I object top the scale of what is planned as it would totally change our village		I and my husband are very busy and are grateful that the Residents Association has offered to make these comments on our behalf.
931	Greg	Wall	-		Object	i object to the scale of what is planned as it would totally change our village.		My husband and I are very busy and are grateful to the Residents Association for offering to make these comments on our behalf.
932	Kirsten	Wall	-		Object	I object to the scale of what is planned as it would totally change our village.		I am very grateful to the Residents Association for offering to make these comments on my behalf.
933	Barbara	Knight	-		Object	I object to the scale of what the Council is planning as it would totally change the character of our village.		I aam grateful to the Residents Association for offering to make these comments on my behalf.
934	Andrew	Higgins	-		Object	I object to a plan which would totally transform Edenfield because of the large number of houses which it includes.		I do not live in Edenfield but have family there and visit regularly, and am appalled by what is planned which in my opinion would change the character of the village for the worse.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
936	A	Hough	-		Object	I object to the scale of the proposed development. Some limited housing would be acceptable but to propose an additional 450 plus houses in the village is totally unacceptable and would ruin the character of the village for ever. - Traffic in the village is a problem now but would become a huge problem should this development be allowed. When the Edenfield bypass is blocked by accidents all the motorway traffic is diverted through the village as happens now from time to time and this would cause gridlock. - The two schools in the village would not cope with the influx of children without building classroom extensions thus adding to the development and further loss of green space. - This proposal to build so many houses in Edenfield is ill conceived and the character of the village must be prtotected. I urge the Council to rethink the policy and drastically reduce the number of houses to be built in our beautiful village.		-
937	David	Giblin	-		Object	The scale of the proposed number of 461 units for this single policy is excessive and disproportionate in the context of the existing numbers of houses in the area. Pursuit of such a policy would bring about a fundamental change in character to Edenfield and would intensify not only calls on facilities in the area such as schools, places of worship, parks, playgrounds and open spaces but also on the highway network which is ill equipped to deal with modern vehicle ownership levels let alone another potential 1,000 vehicles. Local roads cannot cope with such levels and the M66 is already suffering from congestion as commuters move from Lancashire southwards towards Manchester. The M66 is practically at saturation point in terms of capacity and any disruptions due to weather, accidents or road works creates substantial delays and inconvenience to individuals and businesses costing local economies millions. This policy and others in the area are going to compound this problem and no HE RIS or TfN interventions have been identified let alone programmed. - - It is acknowledged that development has to occur somewhere but it must be done in a way sympathetic to the existing surroundings and is inappropriate development. Consequently, HS2.71 needs to be re-evaluated to drastically reduce the currently proposed number of units to something that can be considered sustainable by the area without changing its character. The Green Belt parcels of P39, P43 and P44 were put in place to prevent urban sprawl. Increasing the housing in this area by an additional 50% or more does not comply with this ethos or safeguarding the countryside from encroachment and sits, therefore, in direct contravention of the NPPF with respect to protecting Green Belt land. Very special circumstances cannot be demonstrated for what equates to inappropriate development and so HS2.71 must fail in that respect.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
938	Neil	Clegg	-		Object	I object to the sheer scale of this proposed development. - I do not think the infrastructure will be able to cope with the extra demands placed on it. - This is exemplified when the bypass is closed and traffic is funnelled through the village. - This is a linear village with no parking facilities.. the village would be permanently gridlocked.		-
940	B	Hough	-		Object	I object to the shear scale of the development the Council are proposing in Edenfield which in my opinion would radically adversely alter the character of the village for ever. - - Some limited house building would be acceptable but to desicrate our beautiful village in this way is totally unacceptable. The Council must alter and reduce the proposals. - - The development of over 450 houses would create additional traffic to such an extent that Market Street would not cope without parking restrictions on both sides. This will put more pressure on parking space already at a premium. - - The local schools will find it difficult to cope with the extra pupils without some additional classrooms being built. - -		-
941	Clair	Clegg	-		Object	There are three key issues - 1 : Air quality not just for the residents who would be living adjacent to the bypass , but for all the residents of the village - 2: In order for traffic to be free flowing dbl. yellow lines would have to be put on both sides of the road to accommodate the safe passage of traffic. This compromises the ability of current residents to park their cars in the vicinity of their homes and as there is almost NO off road parking this would be a HUGE problem. - 3: Safety in the village for children attending Edenfield School is already compromised by the sheer weight of traffic passing through the village at present. This traffic increases massively if the bypass is gridlocked or closed for any reason. In addition the 30 mile speed limit is not being adhered to by much of the traffic and indeed the speed should be reduced to 20 mph outside the school - 4. Additional traffic, possibly around 1000 cars, on the roads around the area will also exacerbate the safety problems. - 5: The impact on the green environment of the proposed housing development is massive. The surrounding areas are already at capacity for housing and have more or less merged into one. The green corridor is essential for the health, well being and quality of life that it provides. These are the exact features that should be nurtured and we have a duty to preserve them.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
942	Susan	Brooks	-		Object	I am objecting to the sheer scale of the proposed development. - As a keen walker and lover of the countryside I am concerned about the increased traffic and pollution that would stem from it. - I walk on a daily basis through the village and in the past five years I have noticed a big increase in traffic flow. Not only at peak times but throughout the day. - With the reduction in public transport available to residents(we have had no service on Rochdale Road for years). people, young and old have been forced to travel by car in and out of the village and that would only get worse. - The infrastructure available to young people is nonexistent therefore necessitating travelling out of the village.. which again would have to be by car because there are no buses after 6pm ANYWHERE!!	-	
943	Frank	Brooks	-		Object	I am a keen cyclist and runner in and around Edenfield. - Currently I take my life in my hands cycling through the village as cars are parked on both sides of the road and there is little respect for the speed limit. - We have very large quarry lorries coming through the village in both directions causing pollution and wear and tear to the road surfaces. They often drop large stones and the dirt comes off the wheels causing slippery road surfaces - Market Street ,,the main road through the village is at present classified as a B road: The B6527. - Why would you promote building extra houses alongside a road that was never built to take this amount of traffic?? - This scale of this development is just not feasible.	-	
950	Stuart	Thompson	None	SHLAA16358, SHLAA16255, SHLAA16256	Object	The site and volume of housing proposed will dramatically increase the burden on local site infrastructure such as schools, healthcare, road infrastructure. - Lancashire County Council have already stated that the funding available to further develop these type of services are scheduled to be cut, not increased, in the coming years. This will lead to an unmanageable overload and therefore a deterioration in educational and health provision to the current population which would be significantly exacerbated should the population increase. - A demonstration that funding will be available and all additional support services will be developed/improved from their current condition needs to be clearly stated by local, county and central governing bodies. -	-	
951	Valerie	Haworth	-		Object	I object to the removal of these areas from the Green Belt. It is understood that in excess of 450 houses could be built on this land if it were released from the Green Belt. The village currently has around 900 homes. It is unthinkable that an expansion of this magnitude should be even considered. The Green Belt must be preserved for future generations.	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
952	Justine	Crossley	-		Object	The proposal is a huge scale which will radically alter the nature of the village. My son attended the school which has a small capacity . The traffic is also to busy around the main road area and gets even worse with motorway closures on the m66 and m62.		I no longer live in the village but do travel this way every day. I have concerns about the new generated amount of traffic and volume if residents this would bring. Were are these people going to have a doctors dentist schools etc. There are many factors influencing this decision and hopefully common sense will prevail.
954	Gaynor	Parkes	-		Object	I wish to object to the scale of the proposed development as I feel it will damage the integrity of our village and put an intolerable strain on the local services and infrastructure. To expand the housing stock by 489 dwellings would mean Edenfield was no longer a village community but simply a collection of mixed housing on the periphery of Ramsbottom. We would also lose all the surrounding green belt land which makes Edenfield such a lovely place to live. - I am obviously sympathetic to the need for additional housing in Rossendale and Edenfield should be prepared to accept a proportion of that increase but not to the extent proposed.		I urge the planners to reconsider this plan and support the local community in preserving some green belt areas in Edenfield for both current and future generations.
956	Victoria	Stanley	-		Object	The size and scale of this proposal in Edenfield will radically alter the character of the village. Other issues that i feel will be detrimental to the village include increased traffic volume during the proposed building of these sites from contractors and the volume of traffic following this due to the increase in population of the village.		Other factors that I feel will be an issue will be impact the increase in traffic volume will have on the roads and the rural views that will be permanently spoilt. There will be a negative impact on the local Wildlife which will not recover and I also have concerns about the rate of crime in the area once the population increases.
957	anna	Webster	-		Object	I strongly object to the massive scale of development proposed for Edenfield, it would massively affect so many people, the traffic, schools and our green space that we love so much. - - It is unacceptable to develop so much in such a small area. The roads are already choked and the schools are over subscribed. This will affect people travelling through the village too. - - We love our greenspace and this is not acceptable to change an area so much.		-
958	Karl	Stanley	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village		I would like to object this proposal to build as I believe the increase in population will massively impact the roads and will increase the already increasing traffic that passes through the village. Crime rates will also rise and the village will be permanently changed for the worst.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
959	Susan	Goodchild	-		Object	I object to the scale of the proposed developments plus it will totally change the character of the village. I have lived here for 14 years and whilst I appreciate that more houses need to be built to house our growing population, the amount proposed is way too much considering the size of Edenfield. Thankyou.		-
960	Valerie	Pilkington	-		Object	I object to the sheer scale of the proposals for Edenfield which would radically alter the character of the village. The bypass was originally built to take traffic away from the village but these proposals could result in an additional 500 cars using the roads and cause congestion and increased pollution. Also, the proximity of the proposed developments to the bypass could result in those residing there being exposed to unacceptable levels of pollution.		-
961	Audrey	Davis	-		Object	I strongly object to the proposed removal of green belt around Edenfield. There is precious little left in the valley as it is. The sheer scale of the proposal would dramatically alter the character of the village. The valley is in danger of becoming one large housing estate with little green space left. - If the green belt is removed and subsequently developed how on earth would the infrastructure cope? - The increase in traffic would not only cause severe congestion - Market Street, Bury Road and Bolton Road North struggle now at peak times - but also the increase in pollution would be detrimental to everybody's health. The 'bypass' is also severely congested every morning and evening with accidents occurring on a regular basis. - There are no Doctors or dentists, the 2 primary schools are already over subscribed, the bus service is inadequate, etc. etc... - There are brownfield areas suitable for development throughout the valley, including some in Edenfield - which should be utilised without the need for removal of green belt. -		-
963	Kenneth	Davis	-		Object	I object to the removal of green belt around Edenfield. - Edenfield would be no longer a village if the proposals are implemented. The scale would change it forever. - If it is removed, the potential to enable increased development of more than 50% of the existing housing would cause so many problems, not just for the existing residents of Edenfield, but to any future residents and vistors. The roads and services can barely cope now. - PLEASE CHANGE YOUR PLANS.		-
965	Joseph	Williams	-		Object	I strongly object to the proposed removal of green belt from around the village. - If all the green belt was developed Edenfield would no longer be a village but merely another huge housing estate with no character left. - I have lived here for over 60 years and seen it's loss of services already over the years. - There is insufficient infrastructure to cope with development on the scale proposed. -		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
966	Kathleen	Hutchinson	-		Object	I believe the plan to release the Green Belt land around Edenfield for housing is completely disproportionate. It has taken 400 years for this village to reach 900 homes, but this plan is planning to add nearly 500 more in 10/15 years. - There is no infrastructure in the village to support a development of this scale, which would change the face and character of Edenfield forever. I also believe we should cherish our green spaces wherever possible, they are our green lungs. A development of this scale would drastically increase the pollution of the area to the detriment of us all, but also to people moving in and living so near the by-pass.		I urge you not to release green Bwlt land built to use brownfield sites to reach whatever housing targets the government sets.
967	Hannah	Lovick	-		Object	I object to the scale of the proposal. Traffic is horrendous enough without extra houses. And this volume of new housing would seriously alter the character and life of the village.		-
968	Andrew	Meeks	-		Object	I object to the large scale development proposed for Edenfield. This village cannot cater for such a huge number of additional residencies. The infrastructure is not designed for so many additional people, vehicles and demands on its schools and other facilities. Such a development would turn this village into a large town and would spoil its charm and tranquility.		-
969	Ryan	Lovick	-		Object	I object to this proposal due to the sheer scale of what is proposed. This would ruin the village and seriously compromise our standard of life.		-
970	Beth	MacDonald	-		Object	I believe that building 489 houses in Edenfield will ruin the lovely village and the atmosphere that it beholds. I think building these houses shall bring along other issues eg parking due to the already being difficulties regarding parking.		I object
971	Gary	Tattersall	-		Support	To remove the green belt from Edenfield is to remove an area of natural beauty. There are plenty of brown belt areas to develop throughout the valley which are more appropriate. - - Developer want to make the extra profits of executive housing so little will be achieved against the government s plan to build over 2500 houses in Rossendale. - - Regards - - Gary Tattersall		Do not take away the green belt land
977	Nikki	Pearson	-		Object	I object to the size, I moved here 20 years ago it's a small village, and it's character is such, this would completely change the character of the village by the size of the development. People here don't want that, it would ruin the whole character of the village		Please listen to residents, not land owners and developers, if this goes ahead, it would be a huge disruption

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
978	Claire	Jewell	-		Object	Scale of proposal for the village would radically alter the character of the village. No consideration for flooding appears to have been given did you see the water in December 2015? If the fields were houses where would the Council propose the water running off the hill will go? We currently have an electricity power cut on average every 3 months, to add this number of houses would impact on what is already currently unacceptable in 2017. Infra structure such as broadband does not appear to have been considered, currently unless a household is paying extra for fibre broadband, the speed is unacceptable and would make it impossible for anyone to work from home. For example we are paying for 100mb fibre but get 40mb. To increase demand on already stretch broadband resource would reduce this speed so even the fibre would become ineffective. - The impact of the volume of traffic that would be created by this scale of houses would clearly have a significant impact on the village.		see point 8
981	Graham	Jewell	-		Object	I object to the sheer scale of the proposed plans for Edenfield which would radically alter the character of the villiage. - Traffic is an issue today, as is parking more houses would exasperate this. The current drains do not support the flood risks from rainwater off the hills. - Broadband is quite poor. Adding more houses would reduce speeds even further. - Public transport is infrequent meaning more cars and emissions, impacting local air quality - Edenfield suffers frequent power cuts. - Most of the proposed works are green belt. This should be protected and existing available brown belt locations prioritised - -		-
984	Russ	Chadwick	-		Object	I object to the sheer scale of what is proposed for Edenfield, which would radically alter the character of the village.		-
985	Jodi	Strange	-		Object	I object to the sheer scale of the proposal, which would radically change the character of the village and put a strain on resources.		-
986	Martin	Appleton	-		Object	I'm filling in this form due to the scale of the proposed development and how it will effect Edenfield. I cannot comprehend how the Government think there is the infrastructure in the local area to support the proposed number of houses and it will massively affect all the people currently living in the local area in regards to traffic, schools and amenities. - - I object completely to these proposals on the grounds that the scale of what is proposed is far too large and would ruin the character of the village and surrounding area as a whole.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
987	Catherine	Hignett	-		Object	I wish to object in the strongest possible terms to the proposal to remove the aforementioned land out of the Green Belt. - Whilst understanding the need for additional housing both locally and nationally, this should not be to the detriment of existing communities. The proposal to increase the number of dwellings in Edenfield Village(currently just over 900) by 489 or by over 50 per cent, is unacceptable; this is much too large a scale of development, disproportionate in terms of the current size of the village and would frankly destroy the very appeal Edenfield has as a small community. It would no longer be a village but a sprawling urban mass. - It is vitally important to retain and protect Green Belt, not only for the character of the village but to support healthy living of the community and population, both near and far. - There are a number of brown field sites which should be used first, not only in the vicinity of Edenfield, for example the Mayfield Chicks site at Ewood Bridge, Rosebank Mill area near Stubbins, but across the whole valley including Bacup which would undoubtedly benefit from investment and development. Whilst developers may feel these sites are less attractive, I would expect the Council to support its residents in retaining and protecting the Green Belt and make these brown field sites more attractive to developers. -		Not at this time.
988	Victoria	Small	-		Object	I object to the large scale of this development, as it would totally change the character of Edenfield village & the surrounding areas. The infrastructure of the area is not designed to cope with a development of this size. Traffic congestion and pot holes are already a problem and with recent bus service cuts this will only get worse. Green belt land should be protected to conserve the beauty of the area which in turn attracts Tourism & business to Edenfield and Ramsbottom!		-
989	Shirley	wheeler	-		Object	I appreciate that the council needs to support more house building but I am concerned about the extent of the plans for Edenfield which essentially increase the size of the village by approx. 50%. The infrastructure is not in place to support this level of expansion. This doubling of the village will completely and adversely change the nature of the village. I understand from the document that this plan for Edenfield is the biggest area of development in the whole valley which is outrageous given the size of the valley.		Please reconsider and look at more alternatives

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
990	Jeffery	Hignett	-		Object	I wish to object in the strongest possible terms to the proposal to remove the aforementioned land out of the Green Belt. - Whilst understanding the need for additional housing both locally and nationally, this should not be to the detriment of existing communities. - The proposal to increase the number of residences in Edenfield Village (currently just over 900) by 489, or by over 50 per cent, is unacceptable; this is much too large a scale of development, disproportionate in terms of the current size of the village and would undoubtedly destroy the very appeal Edenfield has as a small community. It would no longer be a village but a sprawling urban mass. - It is vitally important to retain and protect Green Belt, not only for the character of the village but for future generations to enjoy as well as supporting the health living of the community and population as a whole and both near and far. - There are a number of brown field sites which should be used first, not only in the vicinity of Edenfield, for example the Mayfield Chicks site at Ewood Bridge, Rosebank Mill area near Stubbins, but across the whole valley including Bacup which would undoubtedly benefit from investment, development and regeneration. - Whilst developers may feel these sites are less attractive, I would expect and now ask the Council to support residents in retaining and protecting the Green Belt; make the brown field sites more attractive to developers.		Not at this time.
991	Rebecca	Hignett	-		Object	I am writing to register my strong objection to the proposal to remove the aforementioned land out of the Green Belt. - I do understand the need to build additional housing both locally and nationally, however, this should not be to the detriment of existing communities. - I believe the proposal to increase the number of houses in Edenfield Village (currently just over 900) by 489, or by 50 per cent, is unacceptable. This is much too large a scale of development, disproportionate in terms of the current size of the village and would most certainly destroy the very appeal Edenfield has a small community. It would no longer be a village but a sprawling urban mass. - It is extremely important to retain and protect the Green Belt, not only for the character of the village but for future generations (whether they are resident or visiting) so that they too can enjoy and reap the benefits of Green Belt areas. Such areas are essential to support healthy living and benefit all communities. - There are a number of brown field sites which should be used first as well as the numerous empty houses that can be seen across the valley. Bacup is an area that would most definitely benefit from investment and regeneration. - If developers do not find these brown field sites attractive, I look to you, the Council, to address this. I also ask that you support the residents of Edenfield in protecting and retaining the Green Belt.		Not at this time.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
993	Ellie	Whitehead	-		Object	The sheer scale of this proposal is not acceptable. No thought has been given given to the impact on resources and local services. This would radically change the character of Edenfield village.		More thought should be given to the local services that are needed for an expansion of this size. - The infrastructure of the whole village would need to change. - Roads, schools, shops, jobs, medical provision etc. Totally unacceptable!
994	John	Handley	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village and put pressure on resources.		-
995	Natasha	Crompton	-		Object	Object		-
1004	Denise	Cirne	-		Object	500 new houses would surely generate another 1000 cars in a very small village causing chaos at peak times. You only have to look at Haslingden Road with the Moorlands site, not to mention Rawtenstall and the gridlock there. Are you proposing the same for Edenfield? - Are you also proposing new schools or just the extension of existing? I could go on about infrastructure but I would love to know what you are proposing.		No
1006	Ian	Mcglynn	-		Object	I feel that the plans if implemented would overwhelm Edenfield and totally change the character of the village and therefor I am opposed to them.		I do not have a computer and am grateful to the residents Association for enabling me to make these comments.
1008	William & Patricia	Hilditch	-		Object	We oppose the plans which we feel would change the character of the village.		We do not have a computer and are grateful to the Residents Association for helping us to make these comments
1009	Helen	Kelly	-		Object	I object to the sheer scale of what is proposed for Edenfield which I feel would radically alter the character of village. These sites are green belt. Does this not stand for anything anymore ? As far as I can see this plan does not take into consideration the access needed to accommodate such a vast amount of housing. The volume of traffic through the village currently is quite high and heavy at various times of the day. This would multiply by vast amounts if this plan is accepted and passed. What this plan do to our village ? Totally ruin it.		-
1010	Ross & Nina	Atherton	-		Object	We were shocked to see what is included in the pland because this would totally change the character of our village and we oppose it.		We were not sure how to go about opposing the plans so we are very grateful to the Residents Association for helping us in this matter.
1012	Michelle	Green	-		Object	I am opposed to such large scale development in our village which I think would change it for the worse.		I do not have a computer and was unsure how to make my comments so I am grateful to the Residents Association for enebaling me to do so.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1013	Julian	Allpress	-		Object	We object to then shear scale of what is proposed for Edenfield which would radically alter the character of the village.		No
1015	Gerry	Dawson	-		Object	I believe that the scale of what the is in the plan is far too great and I oppose it wholeheartedly.		I do not have a computer and am grateful to the Residents Association for aiding me in making my comments.
1016	Dorothy	Lynn	-		Object	Potential number of houses is far too many for local facilities to cope with especially shops and roads.		-
1021	Stewart	Longworth	-		Object	<p>I strongly object to this proposed development in EDENFIELD; not only to the size and scale of this but also to its concept. Quite simply, this proposal will radically alter the village of Edenfield from its present size, to one of almost small dormitory town proportions. - I consider no thought has been incurred into the potential effects on volume of traffic, access from each of these proposed sites or indeed the effect on the 2 local schools, both of which are already at or near their annual potential maximum pupil intake.</p> <p>Letter received 09/10/2017: I am writing concerning the Council's Local Plan and particularly how the proposals will affect Edenfield. I am given to understand that the Council is proposing to ask the Government to remove large amounts of land from around the village of Edenfield from its current designated 'Greenbelt' title, so as to enable these pieces of land to be used for residential and perhaps other types of new building. The areas I am particularly concerned about are covered by Reference HS2.71 on the site map which accompanies the Plan i.e.</p> <ul style="list-style-type: none"> • Land off Exchange Street, Edenfield • Land west of Market Street, Edenfield • Land off Blackburn Road, Edenfield, and • Land west of Moorlands View, Edenfield <p>Therefore, will you please note that I object to these proposals on the grounds that the area covered by these proposals is far too extensive, and if carried out would effectively ruin the current nature, size and indeed character of the village of Edenfield from its current form. Please acknowledge its safe receipt.</p>		This last 10 years or so I much regret to say that Rossendale Council has not done itself any favours in its handling of most matters concerning its residents. - Its policies appear to be dominated by the infighting between both the Conservative and Labour political groups who are represented on the Council. This has obviously had a stifling effect on its true role and potential aspirations. The officers appear to be mere puppets to the elected councillors - rather than the officers guiding and directing the councillors. - I regret having to be so negative but can only hope that at least with regard to this proposed development for Edenfield, that common sense prevails and despite the so called Government pressur, that Rossendale Council realises the huge mistake it will make if this is approved.
1022	David	Ingham	-		Object	i object to the sheer scale of what is proposed for Edenfield which would radically alter the charter of the village		-

1024	annette	fobister	-		Object	I object to the size of this proposed development on the grounds that it would ruin the character of the village, the scale being far too large to be accommodated in such a confined village setting. - - There are already serious issues with the flow of traffic through the village with tail backs and congestion at busy times, already added to by the Rochdale road quarry traffic. There is also now no parking facilities in the village other than main road which is adding to congestion on market st, Rochdale road and Bolton road. - - The character of the village would be lost		Whilst more housing on a national scale is necessary, I feel it important to understand local impact issues and scale this proposed development down to reflect the infrastructure that exists within this village and that there is a saturation point, far exceeded by this proposal.
1027	sylvia	atkinson	-		Object	It is called a village because of its rural setting which will disappear if this proposal goes ahead. - - Getting in, out and through Edenfield is difficult already and would become a nightmare if all these houses were to be built, each with at least one car. - - The village cannot accommodate the extra facilities needed to furnish such development. - - Parking is non existent now and residents rely on using the main street to access the shops. If this development went ahead traffic would come to a standstill, shops would have to close and there would be a knock on effect on Rochdale road into Turn Village which is already taking extra traffic coming from the quarry.		Please consider this proposal carefully, the future of ours and other villages is under threat. - - We can accommodate some further development, but not on this scale
1030	Trevor	McPartland	-		Object	I object to the scale and site of the proposed development.		Please consider the increased amount of motor traffic and pollution this would bring to Edenfield and beyond.
1031	colin	williams	-		Object	I OBJECT TO THE SHEER SIZE OF THE PROPOSAL FOR A VILLAGE OF EDENFIELDS - SIZE WHICH WOULD RADICALLY CHANGE THE CHARACTER OF THE VILLAGE AND SURROUNDING AREA,		
1032	Antony	Drake	-		Object	Green belt was put in place to protect the land and all that uses it, including nature, to stop greedy developers and bent councilors from getting their pockets lined this is a disgrace Please go and pick on all the brown sites and all the redundant property's elsewhere in Rossendale/Lancashire - Once this is breached you might as well just build on all areas including SSSI (Sites of Specific scientific Importance)so there is no more green fields for all to enjoy. - Also there will be traffic issues the Village is congested at the moment to introduce another 495 Houses will be bedlam.		Green belt was put in place to protect the land and all that uses it, including nature, to stop greedy developers and bent councilors from getting their pockets lined this is a disgrace Please go and pick on all the brown sites and all the redundant property's elsewhere in Rossendale/Lancashire - Once this is breached you might as well just build on all areas including SSSI (Sites of Specific scientific Importance)so there is no more green fields for all to enjoy. - Also there will be traffic issues the Village is congested at the moment to introduce another 495 Houses will be bedlam.

1034	Helen	Iggulden	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village. The schools are already full , there are no GP or dental services , access would cause severe traffic congestion on the main service road, with no room to widen it. The proposal suggests a more than 50% increase and threatens future "urban sprawl" towards Irwell vale and Rawtenstall, which Green Belts are meant to forestall.		Rossendale has a pilot Brownfield Site register which should be made publicly available to the residents of Edenfield to ascertain whether full use is being made of these sites for housing development to meet need, and whether Edenfield is being disproportionately targeted to maximise profit for developers rather than meet local housing needs for the local community.
1040	John	Rostron	-		Object	I object to the sheer scale of the proposal, which will radically alter the character of the village.		Rossendale Borough Council has already proved to me that it is inept as a planning authority; it fails to adequately consult, it is behest of local businesses and does not consider road safety, privacy, noise. etc.
1041	Denise	Rostron	-		Object	I object to the sheer scale of what is proposed for Edenfield, which will radically alter the character of the village.		-
1043	Sarah	Monaghan	-		Object	I do not object to houses being built in Edenfield as I understand that houses need to be built in Rossendale according to government plans, but why have so many houses been allocated to Edenfield and not other parts of Rossendale. I object to the sheer scale of houses being built and being built on greenbelt land. Market Street can't cope as it is with the amount of traffic that passes through Edenfield as residents double park, consequently traffic struggles to pass. Edenfield only has one primary school, which is full. There is no doctors, post office, petrol station, and there is only one shop. How will the sewers cope? There is no job opportunities in Rossendale. Also the proposed plans for these houses to be built alongside a busy bypass is dangerous. There will be an increase in accidents, air quality will reduce due to noxious fumes and tyre/road debris and consequently increase respiratory conditions like asthma; especially in children. There will also be an increase in noise pollution. - I was brought up in TunrVillage and have consequently chose to settle in Edenfield to bring up my own children as I love the area. I love the open space, green fields, being able to step out my front door and set off walking in the countryside, which are of educational and recreational use to my children. You are now planning to change all that. You plan to change the character of one of the few remaining true villages in Rossendale by building on greenbelt land which is there to provide the people of the village with good quality air, access to the countryside, and protect the unique character of the village.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1044	David	Smith	-		Object	Building more houses on that scale with such a minor main road is completely crazy. There will be about 750 extra cars which the roads can't take. there will also be about an extra 750 children with no extra school places to take them in. Even the secondary schools are full. There are no doctors facilities and how will Blackburn and Bury hospitals cope with all the extra population increase in the area. The worst thing that happened to Rossendale was the motorway arriving in the 70's. It should have been left to develop like other small towns like Hebden Bridge, Todmorden, Haworth, etc. What did it bring - a shambles of a town that is Rawtenstall. This house building madness will only bring further problems. You can't even get a town centre developed correctly, so how can you be trusted with all this mass house building. It'll be another 30 years of madness by some idiot who doesn't have to live with the consequences. Rossendale will just become a part of Manchester like Bury and Ramsbottom, and dragging up the dregs from that area yet again, dragging us down to their level, like they have done since the 70's. You can't move around Bury town centre now, what do you think it will be like trying to get round the roundabout in Rawtenstall with thousands of extra cars, nothing is going to move at peak times. - You people must be living in another universe if you think all this is going to work.		-
1046	CAROL	JARY	-		Object	* There are still ample brown field sites in the north-west on which to re-develop for housing, instead of taking (what appears to be) the easy option of building on green field sites - * The amount of properties proposed would contribute to an increase in traffic through the village substantially; the narrow road through the village centre is already a bottle neck at peak times. Any access in conjunction with Market Street particularly would simply increase the traffic problems that already exist - * One of the reasons for proposing Edenfield was for its pleasant aspects; these would be eradicated with the removal of the green fields sites - * Local social infrastructure is generally poor - eg. no doctors or health facilities, full schools		-
1051	janet	brooks	-		Object	we object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1059	Elizabeth	Bridge	-		Object	I object to the above mentioned land being removed from Green Belt and also to the scale of the development. - I believe the scale to be relevant because: - The character of Edenfield would be radically changed; - Traffic in The Village is already excessive. This would vastly increase and the roundabout access to and from Rochdale Road and Turn Village would prove a major hold up; - There is a lack of school places, few shops, very limited bus service, no doctor's surgery and very little parking. Therefore present facilities are minimal and could not take increased pressure on such a scale - In addition, the number of wildlife corridors would be affected. -		I think it more appropriate to use Brown Field sites available in Rossendale before considering the removal of land from Green Belt
1062	Kate	Hildred	-		Object	The bulk of our Finance is plowed into Bacup and Rawtenstall whilst the basic needs of other areas are neglected. Adding 50% more houses here may result in further neglect. 489 houses with 2 adults and 2 children in each is 978 adults and 978 children. - - Once built and Bacup has been transformed, will the council have any funds available to clean up the additional mess and rectify the addition damage that is caused. - - Once Built will there have to be more take-aways, a supermarket, a MacDonalds and their associated mess? - - How will the additional 978 children be accommodated in these schools? - - How will they safely get to the schools? - - How will the roads (particularly Market St) cope with the increase in cars? - Presumably a road from the large site will be required onto Market Street because Exchange Street alone would not suffice. - - We would then have to have lollypop ladies and traffic lights, reinstated bus service, larger play area, the list goes on. - - Will The council also look at the problem of collapsed culverts to ensure that the flooding through our gardens is not made worse? - - Edenfield is, for the most part, a village environment with a good number of residents who take pride in and do their very best to look after the area. As LCC/RBC have no regard or pride in Edenfield and other outer areas of Rossendale, I can only surmise that we would suffer greatly. - The whole character of the village will change and the infrastructure would not cope.		-

1063	Marc	Monaghan	-		Object	I do not object to the houses being built in Edenfield as I understand that houses need to be built in Rossendale according to government plans. However how come so many houses have been allocated to Edenfield and not other parts of Rossendale. I object to the sheer scale of houses being built and being built on greenbelt land. Market St can't cope as it is with the amount of traffic that passes through Edenfield as residents double park, consequently traffic struggles to get through. Edenfield only has one primary school which is full. There is no doctors, post office, petrol station, and there is only one shop. How will the sewers cope? There is no job opportunities in Rossendale. Also the proposed plans for these houses to be built along the bypass is dangerous. There will be an increase in accidents, air quality will reduce due to noxious fumes and tyre/road debris, consequently respiratory conditions like asthma will increase, like asthma in children. There will also be an increase in noise pollution. - I'm originally from Helmshore and moved to Edenfield with my wife who is from the area, and our children. You are planning to destroy the reason we moved to Edenfield. We enjoy living in the countryside and being surrounded by green open space and want our children to be able to enjoy it as they get older. By building so many houses in Edenfield you will change the character of one of the few remaining true villages in Rossendale. By building on greenbelt land your denying the villagers of good quality air, access to the countryside, and you are not protecting the unique character of the village.		-
1073	Richard	Brace	-		Object	Edenfield will be overwhelmed with the large number of new homes proposed under this plan. The village will be altered and present residents will experience an increase in numbers in the village.		Only to repeat my objections to this planned development
1074	Jacqui	Brace	-		Object	The village of Edenfield will be altered by the new proposals to the detriment of the area		The present plans require too much building
1075	Zac	Brace	-		Object	Any development of this size in Edenfield will alter the village for the worse		-
1076	Lesley	Barlow	-		Object	I object to the massive number of proposed houses to be built. The village will no longer be a village and will be congested.		-
1077	Robyn	Brace	-		Object	An introduction of a high number of residential homes in the village will change the character of the village forever. The high number of vehicles this will bring to the area will result in large queues throughout the area and grid lock. Local services will be unable to cope with the demand and existing residents will suffer the consequences as a result.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1078	Alexandra	Black	-		Object	<p>Whilst I am not opposed to some development in and around Edenfield, it is the scale of the planned development and the amount of greenbelt affected that concerns me. - Traffic - Market Street already struggles to deal with the volume of traffic and cannot accommodate 2-way traffic due to parked cars, particularly if large vehicles such as tractors or busses need to pass. The road becomes particularly congested by The Rostrons mini roundabout and outside the primary school. - Yellow lines on Market Street – most existing residents that live in the terraced properties on Market Street would have nowhere to park, as there is no off-road parking or side-streets they could use as an alternative. I also believe that yellow lines along Market Street would be damaging for local businesses as people would stop using their services if they couldn't park. - The area is not adequately serviced by local bus routes, trains or trams. There are no high schools within walking distance of the village. - The A56 is the main route into Manchester / motorway network from The Ribble Valley, Blackburn and Burnley. I believe the A56 is already operating at full capacity and would struggle to accommodate the volume of additional traffic the proposed plans would generate. Once the A56 becomes congested, or in the event of an accident/road-works, all traffic is diverted off the A56 through Edenfield and along Market Street, which brings the area to a standstill. - Schools - The local primary school has been extended in recent years and I cannot see how it could be extended further at its current site. The school was over-subscribed last year and has been for a number of years. There are no other primary schools in walking distance. The closest alternative primary schools were also over over-subscribed in recent years. The two local high schools, BRGS and Haslingden, are heavily over-subscribed, as are Alder Grange, All Saints and Woodhey. Local - Utilities - I believe many of the local utilities in Edenfield are already running at full capacity. - Greenbelt – we need to protect local greenbelt and consider brown field sites that local residents would encourage development of. Many people visit Edenfield and the surrounding area due to the wealth of walking and biking opportunities it offers; bringing money and outside investment into the area.</p> <p>Letter received 10/10/2017: I am writing with regards to the Council's Local Plan, specifically the proposed development of Edenfield and your plans to request to remove large amounts of land around the village from the greenbelt in order to build houses. Please find below a list of the areas I am particularly concerned about, covered by reference HS2.71. Land off Exchange Street, Edenfield land west of Market Street, Edenfield Land off Blackburn Road, Edenfield Land west of Moorlands View, Edenfield</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>PLEASE NOTE I HAVE ALSO OBJECTED ONLINE - THIS LETTER IS TO SUPPORT THE ONLINE OBJECTION</p> <p>Whilst I am not opposed to some development in and around Edenfield, it is the scale of the planned development and the amount of greenbelt affected that concerns me. I have outlined my primary concerns below:</p> <p>Traffic and Congestion on Market Street</p> <p>Market Street is currently the only road in and out of the village, and it is my understanding that access to the new homes would be via Market Street. The road already struggles to deal with the volume of traffic and cannot accommodate 2-way traffic due to parked cars, particularly if large vehicles such as tractors or busses need to pass. The road becomes particularly congested by The Rostrons mini roundabout and outside the primary school. The road outside the primary school is already hazardous particularly when children are starting/finishing school due to the fact cars approach from 4 different places.</p> <p>The suggestion of yellow lines on Market Street concerns me greatly - most existing residents that live in the terraced properties on Market Street would simply have nowhere to park, as there is no off-road parking or side-streets they could use as an alternative. I also believe that yellow lines along Market Street would be damaging for local businesses, as people would stop using their services if they couldn't park.</p> <p>The area is not adequately serviced by local bus routes - The Witchway service into Manchester was terminated a number of years ago, leaving only an intermittent local service. The area is not serviced by local trains or trams. There are no high schools within walking distance of the village.</p> <p>The A56 is the main route into Manchester / motorway network from The Ribble Valley, Blackburn and Burnley. I believe the A56 is already operating at full capacity and would struggle to accommodate the volume of additional traffic the proposed plans would generate. Furthermore once the A56 becomes congested, or in the event of an accident/road-works, all traffic is diverted off the A56 through Edenfield and along Market Street, which brings the area to a complete standstill.</p> <p>Schools & Public Services</p> <p>The local primary school has already been extended in recent years and I fail to see how it could be extended further at its current site. Even with the extension the school was over-subscribed last year and has been for a number of years. There are no other primary schools in walking distance. The closest alternative primary schools - Stubbins, Broadway and Helmshore - were also over subscribed in recent years. Forcing residents to consider schools further afield would compound the traffic problems even further.</p> <p>The two local high schools, BRGS and Haslingden, are heavily over-subscribed, as are those further afield such as Alder Grange, All Saints and Wood hey. Additional homes would place extra strain on already over-stretched public</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
					services. Local Utilities It is my understanding many of the local utilities (gas, electricity etc) in Edenfield are already running at full capacity, and could simply not cope with hundreds more homes. Greenbelt Finally I would like to raise my concerns with regards to developing on greenbelt. Whilst I appreciate the need to build new homes, I firmly believe we need to protect our greenbelt and consider brown field sites local residents would encourage development of. We should use the need to build homes as a way to help regenerate some of the areas across Rossendale that need investment, rather than simply where the most profit lies for landowners. Many people visit Edenfield and the surrounding area due to the wealth of walking and biking opportunities it offers; bringing money and outside investment into the area. I firmly believe that the over development of Edenfield would affect local businesses and local residents, but also people across Rossendale and beyond who currently enjoy what the area has to offer.			
1079	Sharon	Mullineau	-		Object	I object to the scale of what is proposed for Edenfield . - It would ruin the whole character of our lovely village. - How would the village cope with such a large increase in people, traffic etc. - How would the schools and roads cope. -	-	
1082	Paul	Mounfield	-		Object	I am concerned that this plan will adversely affect the village feel as the scale of the development will swamp the existing village. We have four grandchildren growing up in the village and are concerned about the vast increase in the volume of traffic. Apparently there will be no increase in medical and dental facilities. This development has not been thought through and is not practical.	-	
1083	steven	bennett	-		Object	i OBJECT STRONGLY TO THIS PROPOSAL AS I FEEL THAT A DEVELOPMENT OF THIS SCALE WILL HAVE A DETRIMENTAL EFFECT ON THE VILLAGE AND PUT UNDUE PRESSURE ON ROADS AND LOCAL SERVICES. i ALSO THINK THAT THIS WOULD IMPACT NEGATIVELY ON THE CHARACTER OF THE VILLAGE..	-	
1084	David	Wolstencroft	-		Object	The traffic on Bury Road Edenfield already makes life difficult for the residents so with hundreds more cars on the roads of the village this plan can only make matters much, much worse.		I do not have email and so am grateful to the Residents Association for enabling me to make my comments about the plan
1085	Alice	Wozencroft	-		Object	The traffic passing my door on the lower part of Bury Road is very heavy and this development would make matters much worse, so I am very much opposed to it.		I DO NOT HAVE EMAIL AND SO AM GRATEFUL TO THE rESIDENTS ASSOCIATION FOR ENABLING ME TO MAKE MY COMMENTS.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1086	Elizabeth	Mounfield	-		Object	- I am concerned that this plan will adversely affect the village feel as the scale of the development will swamp the existing village. We have four young grandchildren growing up in the village and are concerned about the vast increase in the volume of traffic and more parked cars will cause extra hazard. Apparently there will be no increase in medical and dental facilities. This development has not been thought through and is not practical.	-	
1087	Derrick	Lawson	-		Object	I am opposed to what the Council is proposing because it will change our village for the worse and bring hundreds of extra cars onto our streets.	-	
1088	Richard	Lester	-		Object	I object to the sheer scale of the proposals for Edenfield, which would seriously affect the character of the village and which require the village to bear a disproportionate amount of the new housing required in the Borough as a whole. - I object also to the cavalier approach in the proposals to the removal of land from the Green Belt and the insufficient regard for the Green Belt's essential characteristic of permanence and for the contribution of the sites in question to the purposes of the Green Belt. - Development on the scale proposed would test the capacity of the local classified road network.	-	
1089	Denis	Chadwick	-		Object	I object to the plan because of the huge change it will bring to the village, it will change out of all recognition.	-	
1090	Sheila	Chadwick	-		Object	I am opposed to the plan because of the drastic changes it will make to our village.	-	
1091	Steve	Davies	-		Object	The proposal is both unrealistic and would undermine the history and environment of what is currently a local village. - - As a life long resident in the village, and growing through the changes we have had, there has always been a culture of village life that has been maintained by residents respecting the value this brings. The attraction here would be removed by the cost and frustration that urban chaos would bring. - - The sheer volume of people, traffic, upheaval of construction of not only highway changes, unsightly buildings and removal of our heritage, but we would lose the standards and quality of life that we lived here for in the first place. - - The proposals are not to generate affordable housing due to population demands, but to generate more wealth for the few. There are several sites across the valley that are prime for development, but do not have the value that residence in the village bring, and would not take away the countryside and scenery we have. - - Allowing this proposal to be implemented with the requirements it would need such as new sewage systems local facilities traffic controls and general havoc for 10 years would not only be devastating to experience, but would "kill" the village all together and with it all the history and memories. - - - - -		Please do not pursue this plan out of greed, and lack of respect for others!

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1092	Catherine	Hulme	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village. - - The amount of further traffic, school and supporting services for many more families will cause traffic chaos in Edenfield and surrounding areas. - - All this on top of the wind farm recently erected in Edenfield which has afflicted and blighted the lives of the local residents.		-
1094	Wayne	Hulston	-		Object	I am objecting on the grounds of the scale of the proposals, the loss of so much of our greenbelt would completely alter the aesthetics of the village. Also there would be major problems with infrastructure, schools, traffic and parking.		Completed at the request of Mr Hulston by Elizabeth Latham
1095	Ian & Lynda	Holt	-		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.		No
1096	bohdan	kowalczuk	-		Object	Dear Sir/Madam, - - I strongly object to the councils plan to build such a huge amount of new houses on greenbelt land around our small village of Edenfield. - - This will have huge impact on the level of traffic coming to the area as well as the financial possibility of House prices going down. - - Greenbelt land is there for a reason and such a vast expanse of new houses will severely damage the character of our village. - - Kind Regards - - Bohdan - - - -		-
1097	Sandra	Hulston	-		Object	I am objecting because of the scale of the proposals and the loss of the greenbelt which would completely alter the character of the village. Also because of the problems that would be caused in terms of transport, traffic, parking and schools.		Completed at the request of Mrs Hulston by Elizabeth Latham
1098	susan	kowalczuk	-		Object	Dear Sir/Madam, - - I strongly object to the councils plan to build such a huge amount of new houses on greenbelt land around our small village of Edenfield. - - This will have huge impact on the level of traffic coming to the area as well as the financial possibility of House prices going down. - - Greenbelt land is there for a reason and such a vast expanse of new houses will severely damage the character of our village. - - Kind Regards - - Susan -		-
1101	stephen	bowater	-		Object	the council should not be selling green belt and this number of house's is not sustainable for a small village. Our infrastructure within the village can not cope with such a mass influx of people. - The pollution is all ready high .Building by a bypass is a health risk . The wildlife will be disturbed.		other sites should be investigated before green belt is lost.
1102	Michael	Sixsmith	-		Object	I troltally object to these planning proposals, this is a small village,with narrow roads,and to build 489 houses is dam right LUDICROUS, IT will take away the character of the village, will put stress on all the residents living here, put strain on the already under sized schools , would increase cars in the village more than double. Go and build your new village somewhere else		Although i understand there is a housing shortage, I dont believe Edenfield need 489 expensive houses building on greenbelt land, the sheer size of the plan is crazy
1104	Michaela	Coulson	-		Object	I Totally Object,		DONT BUILD THESE HOUSES.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1105	Karen	Farquhar	-		Object	<p>1. Scale of development would irrevocably alter the character of the village. -</p> <p>2. 489 additional houses would result in a large increase in noise and disturbance due to increased traffic; this has an adverse impact on the residential amenity. -</p> <p>3. The loss of view for many existing properties will have an adverse impact on the residential amenities of many properties, particularly those affected by the proposed developments on Blackburn Road and west of Moorland. -</p> <p>4. There is a lack of infrastructure and a lack of general amenities to support this number of potential additional residents. Significant additional investment would be required by the council to remediate this. -</p> <p>5. Inability to access the A56 Southbound at Stubbins will result in a greater volume of traffic through the village on narrow roads, increasing congestion and pollution. -</p> <p>6. The development will increase local traffic generally which will have an impact on highway safety. -</p> <p>7. Any loss of on-street parking as a result of measures taken to alleviate traffic congestion will mean the loss of a valuable residential amenity. -</p> <p>8. There is no frequent direct public transport link between Edenfield and Manchester. There is no public transport through the village after 8pm. This means new residents would need to utilise cars, further supporting my objections 5, 6, and 7. Significant financial subsidies by the Council to bus companies would be required to satisfactorily provide such public transport services to adequate levels. -</p> <p>9. Recent years have shown flooding is a problem on the A56 / Edenfield bypass and surrounding areas. This must be considered in the flood assessments and will affect any new development in that area. -</p> <p>10. Open vistas would be severely impacted by mass development. This applies especially to the village boundary at "Fingerpost", Blackburn Road.</p>	-	-
1110	Julie	Bailey	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village		There aren't enough services available to accommodate the amount of houses that you propose to build.
1111	James	Yates	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1113	Greta	Wood			Object	I object to the sheer scale of what is proposed for Edenfield, this would radically change the character of the village. - The time scale that would be involved is totally unacceptable, the disruption to the village during such a length of time would be dangerous, add far too much congestion, the pollution, dirt and noise would impact and could seriously affect the health of many people, especially those who have existing conditions such as asthma. - the infrastructure of the village would not sustain the amount of people of this excessive amount of new houses. the schools are already over subscribed as are the doctors and dentists. - Edenfield is a desirable village to live, it is close to the motorway network. However, the village can barely cope with the sheer volume of traffic that passes through it and this is impounded by the parking. The motorway and bypass can barely cope with the amount of traffic on it now and this also has an impact on the route to get to the motorway and queuing in the rush hour traffic is the norm already. This would get far worse and the desirable village would be no longer! This adds to the safety of the village residents and the school children going to school. - It appears there is very little other building going to be happening in the rest of Rossendale and Edenfield is getting the lions share. It would make far much more sense to build in other parts of the valley and such a scale of building would then be absorbed without the impact it would have on one particular place. - Greenbelt is there for a reason, to protect our land, there is plenty of brown belt that should and could be used before destroying the beauty of our countryside. Once the greenbelt is gone it has gone forever. There is no logic on ruining our greenbelt when there are other areas that can be used.		-
1114	Kathleen	mawdsley			Object	We object to sheer scale of what is proposed for edenfield which would radically alter character of village. - -		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1117	Shona	Campbell			Object	I object to the sheer scale of the proposed building of houses in Edenfield that would radically change the character of the village. Edenfield is a desirable place to live, this will not be so if the proposed amount of houses are built here. The time scale is totally unacceptable because of the disruption, pollution, safety, noise this would cause for the residents. - - Edenfield already has too many parked cars, many parking in illegal places making it very dangerous for other road users and pedestrians, this is impacted by the amount of traffic through the village. the amount of traffic that would result with such a grand scale development during and after building would bring the village to gridlock, which it is when there is something on the bypass/M66 causing cars to come through the village, which is more often than not. - - Our doctors and dentists in Rawtenstall and Ramsbottom are already full as are our schools oversubscribed. If the rest of Rossendale were to have their fair share of new builds the impact and volume would be absorbed. Bacup and Whitworth are also within easy access of the Motorway network as are Haslingden, Helmshore and Waterfoot. - - Before Greenbelt is lost forever should Brownbelt not be used for building upon? Should it not be People before profit not the other way round? - - This plan is not sustainable.		
1119	Chris	Ross	-		Object	I have been a resident of Edenfield for over 20 years. - I realise that you are obliged to find sites to enable the fulfilment of the requirement for housing numbers in the Borough, and that a majority of people would object to any proposals "in my back yard" , but the impact upon the village of Edenfield would be catastrophic, and would change this place beyond recognition. - To impose a 50% increase in the existing housing numbers with all that entails in respect of the provision of infrastructure, schools etc , which would have to be funded by the Borough, together with the loss of more Greenbelt land, would be something I could not have envisaged when settling here in 1995. - Your proposals also reflect the greed of the previous landowners, who were only too willing to sell their assets to property developers. - I am sure that my feeble objection will have no impact whatsoever upon the outcome of this matter, but I am sure also, that I reflect the feelings of the majority of people here who's lives will be changed forever. -

1120	David	Clements	-	Edenfield (HS2.71) plus Helmshore	Object	<p>I wish to object to the application as presented in the Local Plan for the following reasons:-</p> <ul style="list-style-type: none"> - - Significantly increased Danger of Flooding: We were flooded in Meadow Park, Irwell Vale on Boxing Day 2015 when nearly 3 feet of water entered our Bungalow. This was the result of ground and surface water from surrounding areas, Edenfield and Helmshore, not being able to get away because of the high levels of the Rivers Ogden and Irwell flowing through the Village. - Many developments in recent years in the higher reaches of the River Irwell and River Ogden, particularly the River Ogden in Helmshore, have exacerbated this situation. Very little has happened in the area in the past 2 years since the Floods to resolve potential flooding following heavy rainfall. With the proposed massive increase in housing in Edenfield, where water flows down the hills and through the porous railway embankment and into the bottom of the valley, plus more developments in Helmshore, and the resultant effects that brings, it is imperative that all new developments within the Rossendale Valley ensure that measures are taken to ensure that land and properties downstream do not suffer from inadequate removal of ground and surface water that these developments automatically bring; plus of course the additional pressure on the sewerage systems which are inter linked. Practical, robust and well maintained drainage systems need to be developed to ensure all are safe from flooding within the Valley. - - Edenfield (HS2.71): The local infrastructure around Edenfield in terms of Roads, Doctors, Dentists, Schools etc is currently totally inadequate and therefore for a massive expansion in housing as currently proposed will mean that existing and new residents will not have the support services that are required. - - Helmshore has similar infrastructure problems and Schools in the area already have classes that are full. - - Increase in Traffic: We understand a number of key junctions within the Valley are being reviewed. This is far too simplistic. - We currently travel through Edenfield on a regular basis at varying times of the day and it is currently very difficult because of the parking and the narrowing of the road at either end of the Village to drive through without any disruption. With the current very significant expansion in housing being proposed in Edenfield this will make a bad situation intolerable. - Helmshore also has traffic flow problems and the “mini roundabout junction” at the crossroads of Helmshore Road and Broadway is already very dangerous. - Within the Valley currently if ever there are Roadworks or an Accident the consequential knock-on effects and delays on the A56 / M66 and surrounding ‘alternative’ roads in Edenfield, Haslingden, Rawtenstall etc are significant, with the resultant ‘Gridlock’. Similarly within other areas of the Rossendale Valley such as Bacup, Waterfoot, Crawshawbooth etc there are significant delays on all roads, particularly at busy times. To increase the housing stock within Rossendale as proposed, will just exacerbate an already very difficult situation. - - Public Transport / Parking: While those travelling are encouraged to use Public 		All included under Section 8.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>Transport the current services available fall well short of what is required. In addition currently there is far too little parking facilities to encourage those who travel out of the area to use Public Transport services as either part or the whole of their journey. - - Air Pollution: Currently with existing road problems there is too much slow moving and stationary traffic. With a significant increase in housing and hence the population as proposed, and the resultant increase in traffic problems, the Air Quality is going diminish even further with even more slow moving and stationary traffic, making a bad situation even worse. - - Doctors: There are already inadequate resources in the area and it is currently very difficult to get a GP appointment when required. With significant increases in the population and requirement for these services both existing and new residents will suffer even more. - - Dentists: For many years there has been a shortage of NHS Dentists in the area with problems trying to recruit more, so that many residents have already been forced to seek 'Private Services'. If given there are these problems with the current population in the area, for which a solution has not been found over many years, what is going to happen with significant increases in the population? - - Schools: A number of expansions to existing Schools has taken place in recent years particularly in the Edenfield area in order to respond to increasing demand for places, with unfortunately the consequential loss of some previously existing facilities for the Children. Massive increases in development in the area will mean these resources, currently struggling, will not be able to cope with these proposed increasing numbers. - - Green Belt / Conservation Areas: The Local Plan proposes changes to both the Green Belt and Conservation Areas: It is very important that these areas which were set up to protect and benefit local communities and residents are maintained and are not altered in order to allow further housing developments. - - - David Clements - Meadow Park, - Irwell Vale.</p>		
1121	NICOLA	ROSS	-		Object	I do not object to their being more housing in Edenfield but not on this scale. a 50% increase to existing housing numbers is excessive and to lose so much of our Greenbelt land is totally unacceptable.	-	
1123	Peter	Daggett	Na		Object	I have great concerns with this development. Due to the enormity of this plan. - Removing green belt land for this amount of homes and the developing of new infrastructure To accommodate them, will radically change the character of edenfield village.	-

1125	Marylyn	McKell	-		Object	I am particularly concerned about school places in the village if this plan is implemented. The two schools in the village are, I understand full now, so where will perhaps up to 700 or 800 new children go, two more new schools? Also the traffic, the plan would generate hundreds more cars on local roads, is there sufficient capacity, I doubt it.		I am not very good with computers so I am grateful to the Residents Association for enabling me to make these comments.
1126	Milan	Puhar	-		Object	Your proposals would make Edenfield look like a Concentration Camp minus barbed wire and search lights.		-
1129	ALAN	DUCKWORTH	-	THE DESTRUCTION OF EDENFIELD	Object	NO DOCTORS SURGERY AND NO PLANS.I HAVE LIVED HERE FOR OVER 40 YEARS AND WAS TOLD YEARS AGO INFRASTRUCTURE WAS EXHAUSTED WITH EVEN THE SEWERS FULL NOW YOU WANT DOUBLE THE HOUSES BY BUILDING ON GREENBELT LAND DO NOT PRETEND THAT THIS WILL BE SOCIAL HOUSING EITHER THERE IS PLENTY OF BROWNBELT LAND THROUHOUGHT THE BOROUGH .		COMMON SENSE ,PLEASE TRY AND USE IT

1130	Janet	Smith	-		Object	I am a resident of the village and strongly object to the scale of this proposal which I believe will have a number of adverse affects. Not only will it change the character of the village and overwhelm it, but traffic congestion will become worse affecting air quality and increase the risk of accidents. There will be a knock on effect on traffic congestion through Ramsbottom at peak times which is already bad. - - I also do not feel that there is sufficient infrastructure to support such a huge increase such as schools, post office, health services, and bus services. - - This is a greenbelt site used for recreation, exercise and relaxation purposes and provides an area of beauty, rest and relaxation not only for villagers themselves but also visitors to the area. The lovely views from the surrounding hills would be diminished.		-
1131	Victoria	Smith	-		Object	I was a resident of the village for a number of years. My mother and brother still live there. I live locally and visit regularly. I was very shocked to learn of this proposal and after discussing this with my mother we share the same concerns as follows: - - I strongly object to the scale of this proposal which I believe will have a number of adverse affects. Not only will it change the character of the village and overwhelm it, but traffic congestion will become worse affecting air quality and increase the risk of accidents. There will be a knock on effect on traffic congestion through Ramsbottom at peak times which is already bad. - - I also do not feel that there is sufficient infrastructure to support such a huge increase such as schools, post office, health services, and bus services. - - This is a greenbelt site used for recreation, exercise and relaxation purposes and provides an area of beauty, rest and relaxation not only for villagers themselves but also visitors to the area. The lovely views from the surrounding hills would be diminished. -		-
1132	Samuel	Smith	-		Object	I am a resident of the village and object along with my family to the scale of this proposal which I believe will have a number of adverse affects. Not only will it change the character of the village and overwhelm it, but traffic congestion will become worse affecting air quality and increase the risk of accidents. There will be a knock on effect on traffic congestion through Ramsbottom at peak times which is already bad. - - I also do not feel that there is sufficient infrastructure to support such a huge increase such as schools, post office, health services, and bus services. - - This is a greenbelt site used for recreation, exercise and relaxation purposes and provides an area of beauty, rest and relaxation not only for villagers themselves but also visitors to the area. 1133	Timothy	Ashworth	-		Object	I am a regular visitor to Edenfield as I have family who live there. Having been made aware of the development proposal for village and having discussed it with my family I share concerns as follows: - I strongly object to the scale of this proposal which I believe will have a number of adverse affects. Not only will it change the character of the village and overwhelm it, but traffic congestion will become worse affecting air quality and increase the risk of accidents. There will be a knock on effect on traffic congestion through Ramsbottom at peak times which is already bad. - I also do not feel that there is sufficient infrastructure to support such a huge increase such as schools, post office, health services, and bus services. - This is a greenbelt site used for recreation, exercise and relaxation purposes and provides an area of beauty, rest and relaxation not only for villagers themselves but also visitors to the area. The lovely views from the surrounding hills would be diminished. -		-
1135	Jennifer	Ashworth	-		Object	This is a huge miscalculation surely of houses proposed!! This would ruin the whole heritage of our village, our tradition, and the neighborhood. We are not in a position to build 50 more house let alone that amount!!! This is due to existing parking, amenities etc, I hugely object. Itll be a very sad day if this happens, a very sad day.		-
1137	Sarah	Hunt	-		Object	I object to the proposal as it is much too large a scale for our village the area simply could not cope the facilities are not there we only have two schools which are both full no doctors surgery or dentist and the roads are already at full capacity it would completely destroy the character of our village which is a beautiful place to raise a family.		No
1138	Darren	Done	-		Object	It's to large a scale for the area		No
1147	Angela	Fisher	-		Object	I object to the sheer scale of the proposed for Edenfield which would significantly alter the character of the village.		-
1148	Heather	Murphy	-		Object	I do not wish this green belt of land to be taken for housing.		-
1150	Abbie	Knowles	-		Object	I have concerns regarding the proposal in relation to the impact it will ultimately have on the village, including its character, increased traffic, and impact on local amenities (especially schools).		As a resident living in the village I strongly object.
1151	Martin	Knowles	-		Object	I object as it will radically change the character of the village		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1155	Susan	Openshaw	-		Object	I object to the scale of what is proposed for Edenfield which would radically alter the character of the village		Notwithstanding the fact that the scale of the proposals are disproportionate to the current village environment the environmental impact, the lack of additional essential resources to support such an increased population in the area, schooling, medical facilities etc should also be taken into account. - - The current entry and exit routes into the village are already frequently congested and with heavy quarry and wind farm traffic which the road structure cannot sustain frequent repairs are needed. This situation will substantially worsen with a 50% addition to the housing stock in the area. - - The narrow roadway through the village with roadside residential parking a necessity due the existing cottage style terraced properties (the vast majority without any parking facilities) creates many difficulties for traffic currently and would be compounded with the addition of the proposed number of houses. This would create an increased traffic and pollution issue and a safety risk. - - Existing shops in the village already suffer as lack of the ability to attract passing traffic who cannot park and many have been lost to the village over the years. The risk to such businesses as currently remain should not be disregarded. - - The precise need for additional housing needs to be taken into account with regard to the proposed locations e.g. accessibility, proximity to shops, work and services. The relevance of any housing stock likely or proposed to

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
								<p>be built needs to be seriously considered vis a vis the needs of the Rossendale Borough population as many current houses within the village have remained for sale on the market for some considerable time indicating that this is not necessarily an area in which local people either want to, or can afford to, live and the demand within the Edenfield area for this number of additional houses should be seriously called into question</p>

1159	Doris	Springhall			Object	The increase in housing proposed would have a cataclysmic effect on village and residents of Edenfield. Its scale is not proportionate to good town planning which should be measured and have a beneficial effect. The plan should be evolutionary rather than dramatic which a 50% increase in domestic dwellings would be.		The plan needs a radical taking into account how it affects the character of the village and impinges on current residents.
1161	Angela	Welsh	-		Object	I am contributing to this consultation on the Councils Local Plan and how it will affect Edenfield. I understand that the proposal is for the Council to ask the Government to remove large amounts of land around our village from the greenbelt to allow it be built upon. Having considered the proposals set out in the plan my objection to them is based upon their scale which is simply too large. If carried out the character of the village would be ruined beyond recognition.		-
1163	Amelia Frances	Welsh	-		Object	I am submitting my objection to the Local Plan based upon the proposed scale of the land identified for development and building around Edenfield. The proposed removal of such a huge amount of the greenbelt would alter the villages character and put too much strain on the road (and other) local infrastructure.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1164	gerard	Fisher	-		Object	I am not against development in Edenfield, I believe a responsible increase in housing could be a good thing. However a potential increase of 489 houses in a village of only 900 houses is irresponsible and would change the character and quality of life in the village for the worse. To increase the village size by 50% would mean a new school would have to be built to support the 2 already oversubscribed and small schools in the village. New developments of this size would bring over 900 extra cars into the village where parking is already a problem due to the old housing stock which does not have off road parking. Also new developments are built with profit first, meaning they also have little space given over to parking, driving round any new development will show how cramped and tightly packed the houses are. In summary I don't think Edenfield can cope with this many new houses and it would change the village irreparably for the worse		No
1165	Wendy	Philbin	-		Object	I object because I feel that the infrastructure of the village could not cope with such a large number of houses over such a relatively short period.		I am very grateful to the Residents Association for helping me make my comments as I am intensely busy at the moment with some private business.
1167	Bob	Saggerson	-		Object	I object to the scale of what is planned, which I feel will overwhelm the infrastructure of the village, making life for existing residents much worse.		No
1168	Tim	Reid	-		Object	I object to the scale of what the Council is proposing. in my view if implemented this would completely change the village for the worse.		-
1169	Michael	Trofimczuk	-		Object	There is currently too much traffic especially heavy vehicles servicing Scout Moor Quarry. Releasing this land from Green Belt will only add to the almost intolerable situation.		-
1170	Micheala	Burton	-		Object	Scale of what the council is proposing in which i object. Which in my view would compleatly change the carator ofthe village		-
1176	Diana	Brooks	-		Object	Traffic density in Edenfield has increased relentlessly in recent years and it is hard to believe that the roads or the residents could bear the strains brought on by increasing the size of the village by over fifty percent. Schools, health care and much other infrastructure is lacking for plans of this magnitude.		-
1180	Joanne	Lovick	-		Object	I object due to the sheer scale of the proposals as Edenfield would change dramatically and would not have the same village character as a result		No
1183	Annabel May	Welsh	-		Object	I am wishing to participate in this online consultation with regard to the Councils Local Plan, specifically relating to the proposals set out relating to Edenfield. - - I am particularly concerned with regard to the greenbelt land identified in the plan to be built upon. ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1186	Len	Hawarth	-		Object	I wish to object to the removal of the green belt land for the construction of so many dwellings. - There are brown sites that could be utilised first and the environment will be very effected with so many more vehicles we also do not have the facilities such as schools employment opportunities or other things - We have more environmentally possibilities of flooding due to wind farms this could make matters even worse. -	-	
1187	Anne	Partington	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village	-	
1188	VALERIE	CARROLL	-		Object	THE PROPOSED BUILDING OF 489 HOUSES WITHIN EDENFIELD IS RIDICULOUS, THERE IS NOT THE SCHOOL CAPASITY FOR SO MANY HOUSES ALSO THE TRAFFIC IS ALREADY OVER LOADED AT CERTAIN TIMES OF THE DAY. THE VILLAGE BECOMES A TRAFFIC JAM WHEN AN ACCIDENT OR WHEN THE BYPASS IS CLOSED NOW , SO IF MORE RESIDENTIAL TRAFFIC IS HERE THEN WE WILL BECOME A REAL DANGER TO ALL THE PUBLIC TRAVELLING THROUGH AND LIVING HERE. MORE HOUSES MEANS MORE POLLUTION AND MORE WASTE, AND A GREATER RISK TO OUR SAFETY. (MORE CRIME) WE DON'T HAVE THE POLICEING CLOSE ENOUGH ALREADY . NO, NO, NO, NO, NO MORE HOUSES KEEP OUR VILLAGE A VILLAGE AND NOT A TOWN!!!!	-	
1191	Suzanne	Crompton	-		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village	-	
1193	Robert	Lord	-		Object	Although I and my family live in Helmshore we regularly visit Edenfield to meet with parents, my sister and nieces and nephews. My parents also regularly come to Helmshore to collect our two children from school. We then have to collect them from Edenfield early evening. The traffic congestion particularly at school out time and the evening rush hour is bad now but would become impossible if over 400 houses were to be built in Edenfield resulting in hundreds more schoolchildren coming out of school and up to a 1,000 more cars on the roads. - Also we love visiting Edenfield because of it's beautiful green spaces compared to our now built up Helmshore. It would be a great shame to lose this green belt	-	
1194	Elizabeth	Dalby	-		Object	I am objecting to the number of properties you are considering building. This would not only radically change the size/look of our village but what about the required schools, doctors, dentists, parking etc. These are all already an issue.	-	
1195	Philip	Dalby	-		Object	I am objecting to the total number of properties you propose to build. This is meant to be a village and no thought seems to have been made in respect of our already over subscribed schools, doctors, dentists, parking etc. These are all already an issue of concern.	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1196	Jonathan	Dalby	-		Object	I am objecting to the proposed new build. Our 'village' would be no longer a 'quaint village' but just an extension of Ramsbottom/Stubbins. No thought seems to have been given to the increased number of school places that would be required, doctors, dentists, parking etc. These are all already an issue.		-
1197	Brian	Langrish	-		Object	The proposed developments and change of land usage would cause an unacceptable change of character to Edenfield..The sheer scale of the proposals would have a grossly detrimental effect and is out of proportion. The parking and traffic in the village is already reaching unacceptable levels and the road infrastructure would not support the proposed increase in population and the associated increase in vehicular traffic.		-
1198	Matthew	Dalby	-		Object	I wish to object. There will be no such thing as a village in a few years time if such numbers of new homes are built on our fields. We are meant to be 'a village' NOT 'a town'.		-
1205	Andy	Darcy	-		Object	I object to scale of what is planned and because it will change the village so much and in particular I am concerned about the volume of traffic which will be generated onto the viage's already crowded roads. -		I am exceptionally busy at the moment and am grateful to the Residents Association for enabling me to make my comments in time.
1207	Simon	Hill	-		Object	This scale of development is not appropriate or necessary in Edenfield. The village would be totally changed, character would be lost. There is not the infrastructure to cope with this volume of new properties. Green belt was created for a reason. These reasons are just as valid today and should be respected.		These plans are to make up numbers required by central government. They are not relevant to the needs of Edenfield or Rossendale.
1209	Ben	Hope	-		Object	I object to the sheer scale of what is proposed for our village which would alter it's character frankly beyond recognition.		-
1210	Tim	Hope	T S Hope & Co Chartered Accountants		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of he village.		-
1211	Christian	Avery	-		Object	I am objecting to the sheer scale of what is proposed for the Edenfield Village. It would no longer be a village with another 489 houses built. The impact this would have on the roads, local nurseries, schools, dentist's & health centre's. We moved to Edenfield 12 months ago as it is a relatively quiet village, this wouldn't be the case.		Please re-consider these plans.
1214	Nicola	Foster	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1215	Elizabeth	Murray	-		Object	I feel that building such a large number of houses within edenfield would negatively affect the village. It has no infrastructure to support such an influx of people, the local schools are overstretched, there are no doctors or dentist and those in ramsbottom and rawtenstall unable to take on more people. It will endanger the children of the village by increasing the vehicles using the already crowded roads.		-
1216	Susan	Crook	-		Object	I object to the scale of the proposal which would radically alter the character of the village of Edenfield - The traffic would be a major problem, it is already gridlocked at rush hour on the M66 and traffic routes are challenging through the small village. Parking would also be impossible particularly for residents outside their property. The infrastructure which is in place could not cope with the additional population particularly schools and health services. Whilst I appreciate the need for development and housing although will it be really "affordable" the scale is too great for such a small village		As above
1217	Ann	Durie	-		Object	I object to these proposals on the grounds that the sheer scale of the plans is too large when account is taken of the current size of Edenfield, and would radically alter the character, not only of the village but of the surrounding area.		-
1219	Simon	Paintin	-		Object	I object to the sheer scale of what is proposed. This would change the fabric and character of the whole village. The resources are not there to support this volume of new properties and residents. Schools are already stretched and roads too busy. - -		-
1220	Nigel	Stacey	-		Object	I object to these proposals on the grounds that the sheer scale of the plans is too large when account is taken of the current size of Edenfield, and would radically alter the character, not only of the village but of the surrounding area.		-
1221	Barbara	Fisher	-		Object	I object to the large scale of the Proposals. The number of new homes seems excessive for the size of our village. The character of Edenfield would be fundamentally altered. - It seems unfair that Edenfield is being singled out as the main development area for Rossendale, and it would be better if the development was shared out in a more even way. - The extra vehicles would be problematic as parking etc. is already at a premium and extra hundreds of cars coming and going particularly at rush hours would not be desirable. - Local amenities are also fully stretched now, a new estate on the scale planned could probably fill either of the existing primary schools twice over. Existing schools are already full. - There is no doctor or dentist in the village and local doctors in surrounding areas are already fully subscribed.		-
1225	Judith	Turner	-		Object	We object to the sheer scale of what is proposed for Edenfield which could radically alter the character of my village. We have only two small primary schools and no provision for doctors surgery. No post office and roads that are already busy.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1226	Craig	Duxbury	-		Object	Edenfield simply could not cope with the influx of traffic, the only two schools are already over subscribed and other public services are stretched to breaking point.	-	
1227	lisa	Mounfield	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically change the character of the village.	-	
1229	Mark	Mounfield	-		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.	-	
1230	Xanthe	Langrish	-		Object	I object to the proposed removal of green belt land and building of a disproportionate number of houses this will destroy the character of Edenfield. Place a strane of existing infrastructure and make it a less desirable place to live.	-	
1231	Isabella Elizabeth	Lpftouse	-		Object	I object to the plan because of the drastic effect it would have on the character of the village.		I am very grateful to the Residents Association for enabling me to make my comments online.
1234	Anya	Mounfield	-		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.	-	
1235	Natasha	Bardney	-		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.		A ruin to the local village and the reason e moved here.
1237	Andrew	Willenbrook	-		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.	-	
1238	Earnest Joseph	Lofthouse	-		Object	I object to the plan because of the drastic effect it would have on the character of the village.		I am very grateful to the Residents Association for enabling me to make my comments online.
1239	Neil	Binns	-		Object	I object to the scale of what is proposed for Edenfield for the following reasons: - - It would radically alter the character of the village - - The existing infrastructure around Edenfield would not cope with the additional number of residents - - New development should be spread around Rossendale on brown field sites - - All brown field sites should be used up before any green field development should be considered	-	
1240	Rebecca	Simpson	-		Object	I object to the sheer scale of what is proposed for Edenfield as it will dramatically alter the character of the village. This number of dewllings is not appropriate as the village does not have the road infrastructure or services ie, doctors, dentist etc needed.	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1245	Janice	Adams	-		Object	I am objecting to the number of houses proposed for Edenfield. I understand that there is to be some building but the sheer scale of the numbers proposed would impact on the village dramatically. - - On Exchange Street at the moment parking is so bad that the emergency services are not able to get through if needed. So if building was to go ahead on the scale you propose the extra cars that this would give rise to (approx. 2 per household. an extra 489 houses would mean approximately an extra 1,000 cars) would be impossible to accommodate. The infrastructure in the village is such that only 1 vehicle at a time can pass along Market Street as cars park on both sides. A large influx of vehicles would lead to massive congestion. - - The village would lose its character and the schools and other vital services would not be able to cope with the increased volume. - - At the moment we do not have a crossing person for Edenfield Primary on Market Street and there does not seem that one is going to be appointed in the near future. Therefore the increase in traffic volume could potentially cause an accident resulting in a child being injured. - - I am not against new houses being built in the village but the volume proposed is excessive. Due to the size of the village it would double the vehicles and inhabitants.		-
1248	Stuart	Fisher	-		Object	I object to the scope and extent of this proposal for Edenfield as it would permanently change the character and fundament of the village. I was born here and have lived 62 years of my life here. - - I understand the need for more housing both here and nationally, and do not object to more housing per se, but this proposal concentrates Rossendale's share too heavily in one place. - - As planners you have a duty to all of your existing residents in addition to your duty to make new housing available to those in need of accommodation. - - Additional housing needs to be spread more equitably throughout the borough.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1249	Leslie	Adams	-		Object	My objection is with the number of houses proposed for Edenfield. 489 extra houses would result in doubling the size of the village and a potential 1000 extra vehicles. Given that most houses have at least 2 vehicles each. - - The Village would lose its character, and whilst I appreciate that new houses must be built. I feel that the sheer size of the proposal would not be sympathetic to the village environment. - - 1000 extra cars would impact enormously on the congestion in the village. At the moment only 1 vehicle at a time can pass along Market Street as cars are parked on both sides. and the school on Market Street currently has no crossing person so a large increase in vehicles would result in possible accidents occurring. - - Exchange Street is currently virtually impassable as cars are parked on both sides. Any Emergency vehicle would really struggle to get through. So the street would not be able to cope with any extra traffic that the building work would incur let alone the extra residents vehicles. - - The drains on Market Street flood in severe weather. Would the drainage system cope if the village doubled in size? - - Edenfield infrastructure is not built to withstand a potential 100% increase		I do not have objections to new homes being built in Edenfield but please be sensible we are only a small village.
1256	jean	partington	-		Object	we object to the sheer scale of what is proosed for Edenfield which would radically alter the character of the illage		-
1259	Stephen	Wilcox	-		Object	I object to the sheer scale of the proposal for Edenfield which would radically alter the charactor of the village. It is obvious that no thought has been given to the inforstructure of the village, ie roads, extra cars, the local schools are at bursting point already.		-
1261	Katy	Hayhoe	N/a		Object	Although development and expansion of settlements is expected within urban areas, I consider the 489 houses proposed under this consultation to be excessive for within a single plan period for the area of Edenfield. This would significantly affect the rural settlement feel of the village and have impacts on the wider infrastructure such as roads and schools. Parcels of the land allocated are also used for light recreation and have been for many years. With the development of these houses, where would this open space be? Although we are surrounded by countryside, for the general residents it's the pockets of 'flat' open space that are used the most. - - It does feel that Rossendale are trying to fit a large proportion of their housing targets in this area (at the edge of their planning boundary), due to the proximity to the M66 and Manchester. I can understand this as it is a desirable area, but without a joined up plan of how this large number of houses would work, I feel it would end up being a network of 'noddy boxes' cramped into fields that would ultimately create a unattractive area. - - To expand Edenfield in such a dramatic way would turn a rural village into a small town. - - I don't oppose all development as we do have to be forward thinking and understand the housing need, but this excessive number surely can't happen within the proposed timescales you are consulting on.		Poor mapping data provided at the consultation events! - - Unclear and convoluted way to find this consultation comments section. If you were not used to the internet then you would certainly struggle!

1264	Heidi	Moran	-		Object	Dear Sir or Madam - Please note my urgent concerns and objection to the above plan: - Irwell Vale and Meadow Park have suffered from serious flooding over the years. I have lived in Meadow Park since 1973. During this time flooding occurred on many occasions to various degrees, BUT the incidence and severity of the floods has increased dramatically over the past 6 years. Very little has been done to protect us since the last huge flood on Boxing Day 2015. - Major causes of flooding during heavy rain are: - 1) Ground and surface water from the hills overwhelm the low lying area of Irwell Vale and flow into the rivers Ogden and Irwell which meet in the village run through Meadow Park. Developments in the surrounding higher situated villages of Helmsore and Edenfield have added to the strain placed on this area. - 2) As stated, the rivers Irwell and Ogden meet in our village and overflow, causing serious flooding in the Village and on Meadow Park. - 3) It has emerged that the houses on Meadow Park have been built on a Flood Plane. It appears,, the Council has given Planning Permission to the developers at the time, who build 28 houses on a designated Flood Plane. - Can we on Meadow Park now ask Council not to add insult to injury by further increasing the risk of our houses being flooded? - Further to the Flood Risk in the area, the general infrastructure in Edenfield cannot accommodate the added strain on - > traffic congestion - > air pollution - > nurseries - > parking problems - > shortage of facilities and amenities i.e. doctors / dentists / schools / shops / children's play areas - and, last not least, more changes to a Green Belt and Conservation Area. - We need to protect and nurture our local communities for the benefit of the residents, our children and the future. - - Heidi Moran - Meadow Park - Irwell Vale -		No.
1268	Michelle	Daggett	-		Object	I object to the scale of the proposed developments within Edenfield, they would result in a massive change in character of the village		-
1280	John	Callaghan	-		Object	I object because such a plan if implemented would radically change the character of the village. Also how are our roads to accommodate possibly a thousand more cars and will there need to be a new school or even two more schools.		I am not very good with computers and am grateful to the Residents Association for enabling me to make my comments online.
1282	Paula	Entwistle	-		Object	I feel this will spoil the village, traffic is already bad going through EDENFIELD VILLAGE, also parking is a concern. Schools could not cope with the massive influx of children. There is no Doctors or Dentist to cope with the extra people.		-
1284	Margaret	Callaghan	-		Object	I object to the plan because such a plan if implemented would radically alter the character of the village. Also how are our roads to accommodate possibly a thousand more cars and will there need to be a new school or even two more new schools?		I am not very good with computers and am grateful to the Residents Association for enabling me to make my comments online.
1285	Trevor	Kenyon	-		Object	I don't feel the infer-structure couldn't cope with this amount of extra housing plus using brown fill seems a better option		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1286	Natalie	Chapman	-		Object	The building of these homes will spoil the greenery that is lovely about Edenfield and makes it different from all the other built up areas which if allowed to go ahead Edenfield will turn into.... the traffic on the roads through the village is already I feel an issue and the school are already full and Edenfield children struggle to get in to there village school.	-	
1287	Beckie	Farnworth	-		Object	I object to the sheer scale of what is proposed to Edenfield which would radically alter the character of the village.	-	
1288	Michael	Brindle			Object	I am strongly objecting to the scale of the proposals is such that it will completely change the character of the village detrimentally.		I think a scale of these proposals will be extremely detrimental to the village of Edenfield. It will completely spoil the environment, cause increased pollution, damage the local amenity for residents and completely overwhelm the local infrastructure including the road system in and around the village.
1289	Susan	Farnworth	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.	-	
1292	C	Thomas	-		Object	The proposed plan to build around 400 new homes in Edenfield, should be rejected or significatly amended. - - The plan would increase the number of homes in the village by a considerable margin and would have siginicant adverse impact on the existing community. - - Current infrastructure, schools and roads as examples are l'll equipped to cope with the extra demands which would be placed on them. - - Developer profit should not be put above the impacts on the village or wider community. Development would be better served in areas with brown field sites and or better access and amenities	-	
1293	Roy	Cain	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village.	-	
1295	Zoe	Kenyon	-		Object	I am learning to drive and feel the traffic is bad now so building these extra house will only make this worse. Edenfield is a lovely village,extra house will spoil our countryside.	-	
1297	Hannah	Ratcliffe	-		Object	We object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village. - The proposition to more than double the size of Edenfeild village with new housing developments would not improve the economic, social and environmental condition of the village. - Currently the village benefits from a close 'ribbon' layout along the main road, Burnley road- market street and bury road. This maintains the open character views of moorland and hills to both sides of the road which enhances the rural position and environment.	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1304	Judson	Smythe	-		Object	This proposal would radically alter the feel of this quintessential English village. To go ahead with the changes would be to disregard the very reason residents enjoy living here.		Edenfield has village life at its core, please rethink this bizarre undertaking.
1309	Holly	Kenyon	-		Object	I strongly object!!! As a Student, I've learnt about the damage of getting rid of green belt lands. By building more houses you'll be getting rid of all the fields and the woods. From living at my house for 20 years now I have seen plenty of wildlife wander through the fields, such as foxes, rabbits, birds, squirrels and deers. I witnessed a deer with its offspring a few weeks ago and if you go ahead with this planning permission you will destroy their natural migration pattern. The village itself would not be able to cope with an increase of population, there's not enough room in the schools and not enough jobs. Not to mention doctors! Edenfield will no longer be a desirable place to live as it will be overcrowded. The price of my parents house will decrease due to the overlooking of properties which you plan on building which is unfair and thoughtless. I have noticed that there are plenty of houses for sale in Edenfield so why would you build more unnecessary houses? I feel very strongly about building on green belt lands as there is not enough around and we need to be looking after our planet in every way we can, by chopping down the thousands of trees you will be contributing to climate change! 1312	David	Potter	-		Object	Sheer size of proposals will result in Edenfield losing village character it has, together with traffic chaos when there is enough through traffic already		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1315	Lindsay	Stringfellow	-	BLO OHW	Object	This expansion will totally destroy our village, we haven't got the schools, services or roads to cope with the footfall.		-
						Submitted on 09/10/17: I object to these proposals on the grounds that the scale is far too large and if carried out would ruin the character of the village.		
1316	Dorothyann e	Ashton	-		Object	Object to withdrawal of green belt land for property development		-
1317	Kieran	Langrish	-		Object	I object to so much being built in a small village of Edenfield which would ruin the village life and ruin the environment around. We have a lot of bird life the jays are returning an eagle was spotted this year by a few people woodpeckers. Too many houses would ruin this on area.		We should not be going into green belt land when there is plenty of brown and other land that can be used. We already have too much traffic on the by pass, this will only make things worse for traffic. The village itself would not cope with extra traffic through & our local infrastructure is not up to it.
1318	Laura	Tattersall	-		Object	Object to building houses on green belt land.		-
1320	Shaun	Ashton	-		Object	Object ro houses build on green belt		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1322	Janice's	Tyms	-		Object	<p>I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village, it is a village not a town! Rossendale does not have the infrastructure in place, not enough schools, health care, the current roads struggle to support the current traffic on our local roads, The amount of extra traffic through Edenfield will be huge 2 x cars per new property!!! We already have poor roads that are continually patched up.The Bypass is already a very busy part of the road and as traffic comes down Manchester/Blackburn Road towards Edenfield I already find it very difficult to get across the road As a bus user to work, public transport is inadequate and already struggles at peak time to get through Edenfield due to current levels of traffic. . You will be destroying beautiful green sites and the character of this small village. We have no police presence in Rossendale, our bins are not always collected on time, how will the council cope with this?. Down Exchange St, there is a sex offenders hostel/ unit, not a suitable place to build any new houses. There are plenty of houses for sale in Rossendale without building more, from 2 bedrooms to more luxury homes.We live in an area of high and likely flooding throughout the year for many current houses this will just add to the problem as the council don't keep the streets and drains clear at the moment.</p>		<p>The council must seriously reconsider and not allow the plans for these houses to go ahead. I urge you to walk from Ramsbottom, Irwell Vale, Helmshore or Turn and ending up in Edenfield, it's beautiful, amazing, something the people and the council should be proud of, once you build on the proposed sites, you can't go back, you destroy the area and the lives of the current villagers. We have small village schools where the children who attend receive the best education in an environment enriched by their village surrounding. I strongly object to these building proposals. Do not make Edenfield just another "commuter" town. If these houses are built it will mean higher council tax for all Rossendale residents in the future. How will the council pay for any changes to infrastructure? Crime rates will rise, more nice cars and houses to target. As the residents of these new houses and current residents get ill and unwell who/ how will this care be paid for/ provided. Our nearest A and E is Blackburn or Bury, our walk in centre at Rawtenstall is no longer available for that purpose. Finally, please please leave our beautiful village and surrounding areas alone, please don't destroy them.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1324	Peter	Borkus	-		Object	<p>1) The sites are too large and will destroy the character of the village. In effect "urbanising" a community that has generally retained a rural character. The community has developed over a few hundred years. The size of the sites would double the size of the community overnight. 2) It is obvious that since the previous consultations of 2015 when these sites were not even considered to be removed from " Green Belt " that the Council has bowed to pressure from National developers to release larger plots of " Green Belt " land , and i am concerned that you will be recommending the removal of these areas to the Government. - As the land in question has already been purchased by the developers " At Risk " they are obviously confident that this will be the case. - How can decisions made in 2015 just be ignored - the Government has reduced the number of houses required since that date. - " A desirable place to live " is not a pre- requisite for the development of " Green Belt " land . The purpose of designating " Green Belt " land in the first place is to safeguard it - to stop development! - This land also provides an environmental buffer zone between the by-pass and the existing development. - 3) There is insufficient local amenities to sustain the increased community i.e School size,Doctors etc. 4) The developments are not sustainable:- 95% of the new residents would not work in the Rossendale area i.e a satellite estate for Greater Manchester with the corresponding car useage and pollution. - A development of say 200 houses with 2/3 cars on plot produces 400-600 car movements. The sites earmarked combined will have a greater density. - 5) Public transport :- Buses only serve the Bury - Rawtenstall axis. As stated in 4) above the vast majority of the new residents would work in Manchester - with no public transport links. Even with a new road link to the A56 / M66 (Which the developers would probably offer to contribute to the costs as an obvious incentive to the Council) would not alleviate the traffic issues that will develop. - The main road through Edenfield at present gets highly congested through the day compounded by heavy goods vehicles such as quarry vehicles.</p>		The percentage of " Green Belt " land being proposed for release in Edenfield alone is disproportionate to the percentages for other areas. -

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1326	Elizabeth	Moorhouse	-		Object	Although I don't live in Edenfield, I work in the village looking after primary school aged children. I live on the main road that run from Haslingden to Edenfield and from my house I see the A56. The A56 is a major road that allows traffic to bypass Edenfield. This road is on a regular basis at at slow to standstill in the mornings and frequently during the day. This has a significant effect on the road through Ewood Bridge and Edenfield as drivers try to avoid the delays on the A56. Residents in Edenfield park cars on the main road on both side which makes the road single file to traffic. There are also issues with school traffic and at the moment no crossing person at the primary school. Cars frequently go through the give way sign at the lights without stopping to allow traffic who have right of way. These issues put children and their families as well as residents at risk. - Edenfield is a village with narrow pavements there is one zebra crossing, at the opposite end of the village to the school. There is no doctors or post office. The local businesses struggle due to the lack of parking. The schools are full. Residents live in Edenfield and Ewood Bridge for the beautiful location and views not to look at housing estates and gridlock roads. - Please allow Children, their families and friends to enjoy all the beautiful and wonderful things that Edenfield has. Don't take it away by building more houses.		-
1328	Jacqueline	Booth	-		Object	We object to the impact and the scale of what is proposed. This would have a significant and detrimental effect on the village and wider community.		-
1329	Gaynor	Brady	-		Object	I am concerned about the impact on the village the proposed number of properties will have. Particularly in terms of traffic into the site and through the village. It is not obvious how such a large number of properties could be accessed without a big impact on existing residents. - I understand that additional housing is required in the area but am not convinced that this high increase in population would be sensible. Both the local schools are full so it would be essential for additional places to be provided early in any development. - Another area for concern would be drainage. There is already considerable run off onto the Market street area from the hills to the east of Market Street, the land where the development is proposed has a high water table already, additional building could seriously exacerbate the issue. -		I hope that consultation with local residents will continue throughout the planning process to enable villagers to ask questions and express concerns as things develop.
1332	Vincent	Brady	-		Object	I am not opposed to the building of additional homes in Edenfield, but I do object to the large number of houses proposed for this relatively small area, The impact on the local schools would be significant, drainage is a big cause for concern as the proposed building land currently becomes water logged very easily. Parking along Market Street is already an issue so an increase in houses would increase the volume of traffic further. It is a small, linear village with a large number of terraced properties which do not have access to private parking. I feel this issue would need to be addressed when considering any future development.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1333	James	Cassell	-		Object	Poor planning is creating havoc within our local communities. Building additional houses is not an issue provided proper infrastructure is considered and services can support the additional population. - Merely taking chunks of land and putting as many houses on site as possible only contributes to social friction. 489 houses are proposed in a village of only approx. 900, an increase of over 50% - this is ludicrous. - Traffic and parking would be a huge concern with potentially 1000 extra vehicles on village roads. The two schools would not cope with the influx of children and as there are no plans for additional GP and dental services the already under pressure services would not cope resulting in more people using 'walk in' centres and A& E services which ultimately puts the NHS under more pressure which everybody knows is a local and national problem. - One of the biggest tensions in our communities is created by bad planning - shared drives, lack of car parking around properties and streets and clearly the number of vehicles is not going to decrease. - Clearly planners should be visionaries and not live in a world of denial trying to justify bad decisions and policies. - I object to these proposals on the grounds that the scale of the plans are far too large and will create more problems for the whole area. - - I personally would like planners and local politicians to come out of their cocooned existence and come out and see what real families want and need in their communities and realise that bad decisions today ruin lives for decades to come.		-
1335	Robert	Booth	-		Object	We object to the proposed development in terms of scale and the impact in the community.		Build on brownfield areas first.
1342	Catherine	Stockdale	-		Object	I object to the proposed number of houses planned to be built in Edenfield. We, quite simply, do not have the infrastructure to host such a build. Market street itself is full of parked cars belonging to existing residents. Driving through the village now is difficult at times. At a meeting at the community centre, the housing company stated that the traffic situation wasn't "their problem" and was the council's Highways divisions problem. A very poor attitude to have towards both community and council		This doesn't seem to have been thought through properly, from a practical and realistic point of view, more from a point of greed
1344	Paul	Jones	-		Object	I object to the scale of this project and the adverse affect it will have on traffic in the area. We do not have the infrastructure in the village to accommodate the influx of people and before that construction workers. - The village becomes gridlocked whenever the bypass has a problem, what will it be like firstly with the vehicles associated with building the houses and then the traffic created by the those living in the houses - Our cellars already shake when HGVs travel up Market Street, how will they cope with the traffic created by what us proposed. Finally this proposal will ruin the appearance and feel of what is a lovely village		The scale of this proposal is obscene, we just can't understand why so many houses so quickly

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1350	Andrea	Elson	-		Object	I object to these proposals on the grounds that the scale of what is proposed for Edenfield would radically alter the character of the village. Not to mention the increase in traffic which is already too much for the existing roads that lorries use and damage. Rush hour traffic is horrendous through our village and in a valley like this we don't have room for massive housing estates. Property value would decrease and the countryside would be ruined.		No
1351	Nathan	Walsh	-		Object	I object to the quantity and size of the proposed developments. The plans would alter the character of the village and extra pressure on the local schools.		-
1356	Cathryn	Walsh	-		Object	I object to the building on greenbelt land in Edenfield because it will drastically alter the countryside character of our lovely village.		-
1357	Paula	Rose	-		Object	The proposed site needs to be retained as protected green belt area. Traffic congestion in the village would be a massive problem affecting the quality of village life to all residents.		-
1358	Julie	Brindle	-		Object	I am strongly objecting to the scale of the proposals is such that it will completely change the character of the village detrimentally. I think a scale of these proposals will be extremely detrimental to the village of Edenfield. The proposal is to large for the village increasing it by nearly 50%. This will completely spoil the environment, increase pollution,overwhelm the local infrastructure including the road system in and around the village.		Just because there is land does not mean it should be developed for houses, the greenbelt areas help to define Edenfield as a village.
1366	Elizabeth	Murray	-		Support	I object to the scale of the proposed sites and their impact on Edenfield and surrounding area. Whilst I generally welcome development in the area, suitable additional infrastructure is needed to minimise impact on / expense of the quality of life of established, long-standing residents. - This is especially the case with roads within the village; to / from village to main routes, especially going to and from Manchester.....the latter is bad enough as it is!		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1370	Jane	Hartley Jacques	-		Object	I object to the size of the project and what is being proposed for Edenfield which will alter the character of the village. Recently far fewer houses were overturned as unsuitable for the village. - The road through the village and down Bury road to the motorway is busy and around 800 -1000 new cars, based on the number of planned new houses. This is unrealistic for such a confined road in rush hour. Most people will go to work outside Rossendale where the well paid jobs are, such as Manchester. To plan otherwise is unrealistic. - Most of the building will take place on greenbelt land. This has always had a protected status from building. - There are no current plans for infrastructure. What plans are there for Drs, hospitals, schools, transport, roads throughout Rossendale for the extra homes? The plan is supposed to be sustainable but it cannot be if it does not take into account the basics of community. What are the plans for social care for those needing support? This may need to be worked out with other councils, but still need planning, also hospital services. - What kind of houses will be built on the green belt of Edenfield? Will affordable housing be built? Will only affordable housing be built, or social housing? - There is a reference to transport using buses, cycling, walking and the East Lancs. railway. Buses are constantly being cut due to shortage of Council Funds. This is unlikely to get any better. When using the Heritage Railway as a commuter line, this line is owned by the East Lancs Railway. How could it be used as a commuter line and how many £millions would it take to upgrade? Where would this line go to? How are people expected to cycle and walk to their place of work if this is some place away? To put this in as an option is unrealistic. It is in there to look good and tick boxes. Not because people will do it. - I also note the land allocated for the new houses go right up to the bypass. They will be right next to the path of heavy traffic such as HGVs and buses and numerous cars. There will be many with deisal engines and particulate exhaust and pollution.Plus maybe other pollutants?? How will that affect building for families and children so near the bypass? Has any health risk assessment been done? - I attended the consultation day in Edenfield Community Centre. I did not see any record of numbers attended, nor of comments and responses.		-
1377	Bev	Jenner	-		Object	We object to the plans for edenfield village. The plans would significantly change the character of the village. - It would also mean an increase in traffic on market street- we are in the process of buying a property here. The proposed changes will have a huge effect on the quality of our lives- as we have moved to be close the open space for our health.		Schools and doctors are already full. How can this be justified?!
1385	Deborah	Binns	-		Object	The scale of these plans is very disturbing. There is already heavy traffic on the road and the village could not cope with the additional pressures on resources such as schools and parking. Green Belt should be held as sacred. There is plenty of brownfield sites locally that should be developed if housing is an issue.		no

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1390	J. Philip	Dunne	-		Object	The proposals are too extensive and utterly out of scale for the Edenfield village character and community. There is no consideration given as to how and where access traffic would be accommodated. If from Market Street this would create an impossible burden on an already growing traffic and parking problem in a village already suffering from present traffic at times. It needs to be remembered that the vast majority of existing linear terraced development along the only main thoroughfare, Market Street, has little or no available land for residents' safe and convenient parking needs. To summarise: - 1. Village character. - 2. Road safety and traffic flow.		No.
1393	Kay	Fletcher			Object	Firstly I object about the land which is being removed from the 'green belt'. Greenbelt land is so important to this country and its slow reduction will never be reversed and can completely change the dynamics of the surrounding area. This green belt gives the area its character and its attraction for many to come and live in the village of Edenfield. - - The main road running through Edenfield is a very busy road with commuters, school traffic, business and quarry vehicles racing down the road. Parking for many residents is at the side of the road and this can be clogged due to the sheer number of cars. The two local school in the area are already oversubscribed and we do not have a doctors or dentist in the village. What on earth would happen if the proposed building took place!! - - To massively increase the number of houses in the area is of huge concern, obviously, due to the complete change in the village this will bring with extra residents and traffic and putting extra strain on the facilities in Edenfield and the nearby areas. There are no plans to increase the doctors or dentist numbers locally and also where are the children going to go to school? Edenfield will become a small town and loose its village identity and become just another clogged faceless and stretched area, losing its appeal for many. While many people are not opposed to having small increases in housing, this development is far too large for the area and will cause many problems. - -		- Once an area is ruined and loses its character it can never be regained, nobody expects to live in a village, but to flood a small area with hundreds of families is ludicrous and not increasing facilities/parking etc, will cause no end of stresses.
1395	Brian	Gorrie	-		Object	I object to these proposals mainly on the grounds of the potential impact, with regards to road safety, it would have on our already congested village streets. It would also put a strain on our local schools. Last but not least, it would have an immense visual impact to the overall character of the village.		No further comments.
1407	Ian	Stringfellow	-		Object	These developments would swamp the village of Edenfield's infrastructure causing traffic chaos. - I object to the enormous scale of the proposed developments for Edenfield which would radically alter the character of the village.		-
1412	Jack	Stringfellow	-		Object	I object to these proposals on the grounds of the huge increase in vehicle traffic volumes on the already overcrowded roads and the scale of the plans are far too large and if carried out would ruin the character of our village.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1413	Anthony	Robertson	-		Object	I object to the sheer scale of the proposals . Our area is popular BECAUSE it is Greenbelt . The overcrowding to the area will be impractical and not functional for anyone . there has been no mention of the need for the infrastructure being built to cope with the volume of people and the traffic . There has been no consideration to the existing noise pollution ; air pollution, and filth and danger created by the Quarrying and its heavy vehicles ripping through our villages . building more will be intolerable increase the danger ; noise ; air pollution and filth and cause chaos to the traffic as it is already hard enough trying top get children to school and then get to work . years of this will will be impractical and not functional for the community . when new residents then arrive it will still be chaos with traffic ; increase of crime ; increase in damage to the already abandoned poor condition of the roads . this is unacceptable . The proposals will irreversibly ruin the peace ; condition , and character of the area .		I am outraged at the existing disregard by the council and lack of effort put in to the upkeep of the local area . What will be done to support the council tax payers when further use of the area by industrial vehicles and a hugely increased population to the area exponentially degrades the roads ; sense of safety/security ; pollution ; rubbish on the streets, and public transport is not restored ? - - 1 . road sweepers only sweep certain streets when ours needs doing . we pay for this - - 2 heavy vehicles could go the other direction to the motorway through Rochdale where there are more roads . ours are only one main road through the villages which is dangerous especially for our children . they are also constantly aggravating because of the noise and filth aand continued contribution to road damage on existing very poor road conditions . - which we pay for . - 3 we need a more practical supply of public transport for people especially for work and companies are only removing service to us . what will be done to rectify this now as we need it now not because of a huge volume of proposed residents ? how will the scant service serve them ? - - 4 If the area loses its appeal because of its Greenbelt , and becomes more 'Towny' and unkempt will our council tax reduce ? we have reduce refuse collection - which we pay for but no reduction in council tax - will there be further reductions as there will be double the population to collect from ?

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1415	Simon	Parker	-	Edenfield all areas	Object	The proposed building of homes in Edenfield would cause the village and surrounding area to be in gridlock. The roads through and around Edenfield are currently most difficult to use at most times of the day and at the start of school and end of school they are even worse. Edenfield has not got the capacity for any more houses. The roads are not capable carrying any more traffic	-	
1418	kristina	forrest	-		Object	I OBJECT TO THE SHEER SCALE OF WHAT IS PROPOSED FOR EDENFIELD WHICH WOULD RADICALLY CHANGE THE CHARACTER OF THE VILLAGE, ALSO THE VILLAGE CANT COPE NOW WITH THE VOLUME OF CARS THAT DRIVE THROUGH LET ALONE HUNDREDS MORE.	-	
1422	Sam	Pearson	-		Object	I object to the Councils Plan for Edenfield 100% !! - You are asking the government to remove large areas of land around the village from the Greenbelt so that it can be built on - The Greenbelt protection was for a reason .. Why do you forget this? - Also the scale of the plan is far to large. It would ruin Edenfield and the village couldn't cope with it. It is already congested enough!! With not enough facilities to accomodate any more - Sam Pearson	-	
1423	Christopher	Higginbotham	-		Object	I object to the size of the proposed project, this would have an adverse effect on the whole of the village of Edenfield. I object to the change of use of the land from greenbelt to building land.	-	
1428	Howard	Hulme	-		Object	Objections as to scale of proposed redevelopment, which is out of proportion for Edenfield Village as it is currently, the character and nature of the village would be much transformed and for the worse.	No	
1434	D. Margaret	Dunne	-		Object	The scale of the potential development is unacceptable in Edenfield, a village of character. There are already serious traffic problems, brought about by increasing traffic flow along Market Street, negotiating a narrow ribbon road. The terraced houses which make up much of the present housing have nowhere other than the roadway of Market Street to park. Therefore access is already difficult and dangerous. The local community character of village life would be destroyed by these proposals.	No.	
1439	Antony	Wild	-		Object	This is a village which needs infrastructure, not a dormitory estate. Therefore any plan should include amenities, particularly, recreation areas, additional shops, schooling, and a larger community hall for the elderly etc.. - - As most village dwellers are low paid, any new build should be affordable (<£80000), - - As the village is already suffering from traffic problems, the development should have access from the link road (Via Eden Avenue area and the road to Haslingden. It will also be important to include new off street parking for those currently parking on the High Street. - - You have an opportunity to create employment in the village by including modern workshop units, since future environmental considerations will make commuting undesirable..		What happened to the Green Belt and using up Brown Field sites first (instead of sanctioning M&S and the myriad of other supermarkets)? - -

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1443	SCOTT	LEEMING	-		Object	I OBJECT TO THE PROPOSED BUILDING OF 489 HOUSE IN EDENFIELD VILLAGE, DESTROYING THE GREENBELT	-	
1445	VICTORIA	MANNING	-		Object	I OBJECT TO THE PROPOSED BUILDING OF 489 HOUSES IN EDENFIELD VILLAGE, DESTROYING THE GREENBELT AND CREATING CONGESTION TO ROADS THAT ARE ALREADY OVER CAPACITY	-	
1449	Amanda	Thomas	-		Object	Edenfield is a small village with amenities and facilities appropriate to its size. The sheer scale of the development which is proposed would destroy the character of the village and the access to green space that residents enjoy. There are no proposals for facilities to deal with the proposed increase in population such as schools and road improvements.	-	
1450	Carol	Mosses	-		Object	I am not against house building but; - - It should not go ahead without the necessary planning and funding and organisation to implement support services for the area, including educational, medical, transport and environmental consideration. - - There should also be an agreed, controlled and enforced mix of affordable housing.	-	
1451	Margaret	Leeming	-		Object	The proposed actions would totally ruin the village atmosphere and drastically increase congestion.	-	
1456	Paula	Fahey	-		Object	I object to the sheer scale of what is proposed for Edenfield which would totally change the character of the village.	-	
1459	Laura	Turner	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village. I also object to building on green belt.	-	
1460	Peter	Unsworth	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of our village. I am also opposed to building on greenbelt	-	
1468	Melanie	Goedhart	-		Object	Edenfield Village will be changed from a country village into a sprawling housing estate. Greenland should be left as Greenland otherwise what makes this area so beautiful will be destroyed. - The traffic is currently busy and this amount of extra housing will cause gridlock around the roads leading to the M66 and the by pass. - Travel times to Manchester have doubled since I moved into the area 20 years ago. - - Parking on the main rd in Edenfield is already an issue for the current residents with cars parked on both sides of the rd. - The Rostron Arms has even installed a paying car park! - There are not enough schools or GP surgeries to accommodate such a large amount of new houses. - - I am amazed and appalled that this new building development is even being considered	-	
1472	Ralph	Cirne	-		Object	A total lack of infrastructure and the amount of traffic generated by this housing scheme is my problem. Please don't tell me that another set of traffic lights will be the answer. You only have to look at Haslingden Rd in Rawtenstall to know that they just cause more delays and inconvenience for all concerned.	No.	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1476	Simon	Kaden Smith	-		Object	i am worried about a number of issues with this proposed development. Firstly, the amount of traffic that the proposal will create. The village already has alot of traffic whenever there is a problem on the bypass and this development will only exacerbate the traffic issues in the village. I fear we will end up like Nuttall Lane/Whittingham Drive ins Ramsbottom with just one road in and out to a huge amount of properties. Secondly, the proposal to build on greenbelt is only going to make the air pollution around here even worse. Living close to the bypass I already worry about the air quality with that number of vehicles and the greenbelt actively helps to protect us against the dangerous CO2 emissions. There are plenty of brownfield sites in the area that should be developped and yet you are taking the easy option of offering greenbelt to developpers. - Finally, there is no infrastructure in Edenfield to support this influx of residents and they will all have to use cars to travel to the dentist, school or doctors- again contributing to a increase of traffic on the roads. - - I have looked at the plan which is supposed to be for the borough of Rossendale and ask why has Edenfield been targeted? Share the development and make it a borough wide plan rather than an Edenfield plan. -		-
1477	James	Cryne	-		Object	Hello - - I object to the sheer scale of the plan and the number of houses which would radically alter Edenfield as a village. - - Schools - Traffic - Parking - - Traffic and parking are already terrible, busy and dangerous for children.		-

1509	karen	embrey	-		Object	I object to the sheer scale of what is proposed for Edenfield which would radically alter the character of the village. The local infrastructure would not cope with the increased volumes in traffic, school children and health care facilities. Parking is already at maximum capacity in the village		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1511	ANTHONY	FARRELL	-		Object	I take my three grandchildren to school in Ramsbottom from their house on Blackburn Road, Edenfield and I notice every morning and afternoon, how very busy Market street is through the centre of Edenfield. The cars are parked on both sides of the road and often traffic has to wait if a bus or large vehicle is travelling through the village. With school children crossing the road to Edenfield CE School near the traffic lights at the junction of Blackburn Road and Bury Road this is also an additional cause for extremely busy traffic. - To have so many houses, as suggested in this ill thought out plan. built in an area which already is suffering from over capacity, in terms of traffic, street parking and school places seems a recipe for disaster in terms of the environment. - Has anyone form the council visited the village during the morning rush hour, during the day and during the afternoon school run? It seems from this plan, not to be the case. I suggest someone in authority from the council takes several visits to assess the situation in the village centre. - The scale of the plans are too large and would ruin the character of this village, which serves as a major route between Rochdale and Blackburn and Rochdale and Haslingden and Rawtenstall. - It also acts a a major route between Ramsbottom and Rawtenstall and Bury and Rawtenstall. Although there is a nearby bypass, many motorists find it more convenient to commute through Enfield, rather than round it using the by.-pass. - I strongly object to this proposal on behalf of myself and the future of Edenfiled, my three grandchildren. - A. Farrell		No
1513	Stefan	Mann	-		Object	I strongly object to the scale of what is proposed for a small village which currently struggles with its poor infrastructure as it is. The village does not want all these new houses and many of us use our beautiful green belt areas.		-
1514	Sarah	Mann	-		Object	I strongly object to the scale of what is proposed for a small village which currently struggles with its poor infrastructure as it is. The village does not want all these new houses and many of us use our beautiful green belt areas.		-
1516	Anne Margaret	Holt	-		Object	Our local village will not be able to cope with this new addition of houses resources are already stretched. once the land has been taken you can not rebuild land!!!!		-
1518	Gabrielle	holt	-		Object	Edenfield is a small village and will not be able to cope with the increased traffic, resources such as schools, doctors, dentists and local hospitals are at their full capacity. once you take land you can not get it back!!!!		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1519	James	Fisher	-		Object	I was brought up in Edenfield having been born at Rossendale Hospital in 1977. Although I left the village in 1995, I return regularly each year to visit family and friends. I recently heard of the Taylor Wimpey development plans for Edenfield and wish to object. My objection relates to the fact that it would transform the village to be unrecognisable effectively creating a small town. I cannot see how the road network, schools and other amenities would cope with the intended change, not to mention the environmental aspects. I understand that the proposals include the redesignation of green belt land to building land and would result in housing being built very close to a major road. These houses would no doubt be designed and built to attract families but those families would in fact be putting their children at risk due to the now well known health risks of living close to a busy road. - Therefore, rather than destroy a beautiful landscape and put generations of children at high risk of asthma and other long-term conditions, I urge you to reconsider the plans, opting instead for the existing brown field sites elsewhere in the valley or maybe consider redevelopment of the hundreds of empty properties that are available to you elsewhere.		-
1526	Stephen	Mellish	-		Object	Whilst I'm all in favour of development, this many houses in Edenfield is not sustainable, as a local governor at our primary school we have extended and are always full each year, there is no way we can fit any more children in! - - In addition the roads are not capable of taking the additional traffic, it's already a rat-run going through Edenfield, increasing this by several hundred cars will only impact things further. - - As a resident of Meadow park, we have been flooded several times part of this is run off from the hills above us, building on this land will only make these matters worse.		-
1530	Joshua	Coulson	-		Object	I object to the scale of this application, this would mean a radical change to the character of the village.		-
1532	Morgan	Rothwell	-		Object	The sheer scale of this development would radically change the character of the village.		-
1533	G	Scranage	-		Object	We object to the sheer size of the project to build 489 homes, (more than 50% of the present number of houses) which would cause over crowding, traffic congestion and ruin the village as we know it. - - This proposal has upset a lot of residents & would be a tradgerdy! - - Yours faithfully Mr G Scranage		-
1534	Irene	Lomax	-		Object	It will ruin the village life, it cannot cope with increase in traffic		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1541	Vanessa and Mike	Pitrick			Object	<p>I write about the Council's local Plan and how it will affect not only Edenfield but the surrounding villages that you have to drive through, walk and live in that are right next to Edenfield.</p> <p>I understand that you are planning to ask the government to remove large amounts of land around our villages from the greenbelt so that it can be built on. These are the areas I am particularly concerned and are covered by reference HS2.71 on the site map which accompanies the Plan:</p> <p>land off Exchange Street - Edenfield land off West Market Street - Edenfield land off Blackburn Road - Edenfield land West of Moorlands Vieww - Edenfield.</p> <p>I object to these proposals on the grounds that the scale of the plans are far too large and if carried out would ruin not only the character of the village but the surrounding areas leading to and from Edenfield. I live in Shuttleworth - address above and Whalley Road connecting and leading up to Edenfield is already far far too busy ... I have nearly been knocked down by speeding cars many times over the years I have lived here What on earth will happen if you get this planning through??? As we know each household now has at least 1 car with some having 2 ... all the traffic, all the people, pollution and waste and that's not to mention facilities 1 butchers shop and 1 bakery and then there is safety. It really is outrageous to have a beautiful village ruined - it would no longer be a village. There are not enough schools or jobs for everyone and also the transportation is shocking - X35 Bus has just stopped - X44 Bus stopped a few years ago It just does not make sense at all.</p>		
1543	A	Casey			Object	<p>With regard to the Council's Local Plan and how it will affect Edenfield, Land off Exchange St Edenfield, Land west of Market St Edenfield, Land off Blackburn Road Edenfield and Land west of Moorlands View Edenfield. I object very strongly to this development. It is awful to think it is using Greenbelt land. Once this Greenbelt is used it can never be regained. As well as that objection, I strongly, very strongly, object to extra housing in Edenfield. The roads cannot take any more traffic, the Schools are full, the drains are old and should not be put under extra strain.</p> <p>With regards to the roads they often are completely at a standstill already, the road through Edenfield is the only road that goes through to the Motorway connection at the top of Walmersley brow. After Rawtenstall the road through Edenfield carries all the traffic to the Motorway and to Bury. Cars park on both sides of the road and the roads each side of the village are more often than not single lane. Using a pedal cycle is currently dangerous but if the traffic is increased it will be suicidal. Please, please do not build extra houses in Edenfield.</p>

1555	David	Casey		SHLAA16263, SHLAAA16262, SHLAA16256, SHLAA16255	Object	<p>I wish to object very strongly to the proposed developments: "Land off Exchange St Edenfield, Land west of Market St Edenfield, Land off Blackburn Road Edenfield and Land west of Moorlands View Edenfield". '</p> <p>The nature of this tiny hamlet will be overwhelmed and turned into something of the form of dormitory town. Its character as a contributory part of a tourist area will be lost forever.</p> <p>More importantly, the roads are already inadequate under the heavy usage that's grown up over the years. The councils are already under pressure and are clearly unable to maintain the narrow roads. Scores of Potholes go unrepaired for months, even years.</p> <p>Traffic is already congested and at certain times of the day, the narrowness of the roads, especially the A56, is a danger to pedestrians, cyclists and other car users especially as cars regularly park on foot paths and if they don't then the roads become single lane which they do in places anyway, despite cars on pavements. Worst still, the area suffer~ from an already heavy usage of HGV s which are frightening in the already congested roads. The A56 has already become it car park throughout most of the area that will be affected, including to the south. It is dangerous!</p> <p>Furthermore, imagine the congestion in Rawtenstall as this and Haslingdon will be the nearest motorway access in both direction; Manchester to the South and to the towns to the North. It is already problematic entering Rossendale at certain times 'and this will become much much worse.</p> <p>Even the bypass and Motorways are not up to the task, they already suffer heavy congestion to the north and south.</p> <p>What about the other services? Sewerage, drainage etc, will all be under pressure.</p> <p>NO NO NO, not only will this degrade the area but is dangerous, crazy! Who will benefit? Certainly not the existing Rossendale residents nor their families. Only the developers and investors will be beneficiaries and possibly the immigrants from other areas.</p>

1573	M	Hoyle			Object	<p>2. Housing allocation site HS71</p> <p>A large percentage of the housing allocation seems to be focused in the southwest of Rossendale especially in the Edenfield area, with over 406 houses proposed. The large scale of the development goes against the recommendation in the site reports in the SHLAA document (SHLAA16262, SHLAA16256 and SHLAA 16271) and in Green Belt Review. These include: - Both the Green Belt proposal and SHLAA recommend housing on the sites SHLAA16262, SHLAA16256 and SHLAA 16271 should be low density. However, all the proposed areas have a density of 30 dwelling per hectare that is above the recommended Government Guidance is 18 dwellings per hectare</p> <p>The Landscape study recommends that site SHLAA 16262 land to the west of Market Street is inadequate for a major housing development as it would have an impact on the linear settlement of the village.</p> <p>Rossendale Council has failed to support the use brownfield sites. It has failed to identify brownfield sites in the Edenfield area or in the borough in general. Rossendale Council has taken the easier option of identifying Greenfield site, which are preferred by developers over the more difficult Brownfield sites. Planning Inspectors guidance does require LA to look into all brownfield sites before amending the green belt in area (Local Government Ass and Plan Advisory service document 2017 - Cheshire East Council). Rossendale Council seem to have failed to consider this requirement and only considered the easier higher yielding Greenfield sites.</p> <p>Rossendale Council should reconsider including the above sites in draft Local Plan, Evidence and information from various documents has shown that sites SHLAA16262, SHLAA16256 and SHLAA 16271 are not suitable for large scale housing developments, resulting in negative impact on surrounding countryside and community.</p>

1625	D	Warren		Alderwood House (SHLAA16261)	Support	<p>Email received 05/10/17: My client has a site in Edenfield which he would like to be considered in the Local Plan revue. The site is Alderwood which is just off Market Street and would be suitable for 20/25 houses. I know the plan is in the process of being reviewed. Is it still possible to have this site considered.</p> <p>Letter received 12/10/17: Dear Sir, I would like you to consider the site within the grounds of Alderwood House in the local planning revue. We have applied before for some development and we would be in support of the plan. Yours sincerely</p>		
1626	Ronald	Hinson			Object	<p>I write concerning the Council's Local Plan and its impact upon the rural community of Edenfield. The proposals contained within the plan include the removal of 'Greenbelt' land from the immediate area of Edenfield to facilitate the building of 489 houses.</p> <p>I wish to object to this plan on the following basis:</p> <ul style="list-style-type: none"> • Site allocation & issues with additional car movements. Edenfield is already suffering from large numbers of cars and lorries travelling through the village which would be exacerbated by new housing development • Use of Green Belt when there remain significant areas of brown land undeveloped <p>Yours faithfully</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
1641	Bob	Crawford			Object	<p>I write to object to the development of the above parcels of land within Townsendfold and Edenfield on the basis of the following;</p> <ul style="list-style-type: none"> •At a high level the core strategy plan maked reference in the 2010 consultation of the importance of the development of a rail commuter link to Manchester and the current core strategic objective number 1, SO1-makes reference to public transport improvements; •Both of these aspects therefore have to be considered vital to the sustainable development of the area; •By developing the land parcel within Townsendfold/Edenfield we immediately reduce at best or even potentially remove any future option for the communication corridor alongside the M66 to be able to accept a tramline or trainline enhance commuter system; •This strategic level error also does not support other strategic objectives such as S07-enhancement/protection of natural environment- we destroy the natural environment by developing houses on greenbelt land-removing soil/habitat/biodiversity which is vital to the ecosystem should we build on these landbanks; •We also do not include narrative that states we will deliver "no net loss of biodiversity" in the acceptance criteria for developments-therefore the commitment to such aspects in the plan is simply not strong enough or indeed well aligned between strategy and implementation plans; and •The plan states that we have 122 hectares (2008)-which is obviously not been fully developed in the period. The document states states some 300 brownfield sites have been considered but many have significant constraints (no details are supplied),which I consider to be insufficient information; and •By way of background I work for a business that deals with Sustainable Development (SD) and if we accepted such aspects without bringing new ideas and innovation to such projects on how to overcome the constraints, we would have no business. <p>I would suggest that the Council fully address such aspects in relation to the brownfield area before any amount of area of greenfield land is considered-no matter what pressure is on to provide additional affordable homes.</p> <p>I would equally suggest that the issues indicated with the current housing stock be tackled-even if it means private business money to improve the energy/carbon/quality aspect of the stock before more affordable homes are built. It is simple too easy to build more and not face the problem, head on. There are businesses out there that would consider funding and delivering such projects should the Council seek dialogue.</p> <p>I hope the feedback is considered in a positive light. It it not meant to be any criticism of the Council in any way.</p> <p>But to deliver ecological development of human ecosystems an approach known as the "Stadt-schaft principle" is best practice and I would recommend</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						that the Council consider such within the current approach to SD. Red, amber, green type assessments for SD as exhibited within the plan do not go far enough-even at outline levels. I am afraid to say I am unable to accept your development proposals.		
1685	Leslie A	Scott			Object	I write about Rossendale Council's Local Plan and how it will affect Edenfield. I understand that you are proposing to ask the government to remove large amounts of land from the Greenbelt around the village so that it can be built on. The areas listed below are of particular concerned about and are covered by your Reference HS2.71 on the site map which accommodates the plan. Land off Exchange Street, Edenfield. Land west of Market Street, Edenfield. Land off Blackburn Road, Edenfield. Land west of Moorlands View, Edenfield. I object to these proposals on the grounds that the scale of which is proposed is far too large an area and would ruin the character of the village.		
1686	Raymond	Rideough			Object	I write concerning Rossendale Council's Local Plan and wish to express my concerns on these proposals and how it will have a detrimental affect on the village of Edenfield and it's residents. You are proposing to ask the Government to remove an extensive amount of land from the current greenbelt protection around the village for building development. The areas listed below are of particular concern and are covered by your Reference HS2.71 on the site map which accommodates the plan. Land off Exchange Street, Edenfield. Land west of Market Street, Edenfield. Land off Blackburn Road, Edenfield. Land west of Moorlands View, Edenfield. I object to these proposals on the grounds that the scale of which is proposed is far too large an area and would destroy the character of the village and the surrounding district. I trust the concerns of residents will be considered when a decision is made on this issue.

1757	Chris	Whiting			Object	<p>I would like to raise the strongest objection possible with regard to the proposed developments in Edenfield, Ref HS2.71. I feel this proposed development is completely out of place within this small linear rural village. It will completely swamp the existing community and destroy the character of the village. There is no provision or even mention of the effects of the increased traffic onto Market Street or where a new school and health facilities would need to be sited.</p> <p>This is a poorly thought out plan lacking in any insight into the needs of the local community and I suspect an expedient political option to obviate the need for more considered and constructed options.</p> <p>I am a resident of Crawshawbooth and am not, therefore, writing from a 'NIMBY' point of view.</p>		
1760	Angela	Moss			Object	<p>I write about councils local plan and how it will affect edenfield. I understand that you are planning to ask the government to remove large amounts of land around our village from the greenbelt so that it can be built on.</p> <p>These are the areas which I am particularly concerned and are covered by reference HS2.71 on the site map. Which accompanies the plan;</p> <p>Land off Exchange Street, Edenfield land west of Market Street, Edenfield Land off Blackburn Road, Edenfield Land west of Moorlands View, Edenfield</p> <p>I strongly object to these proposals on the grounds that the scale of the plans are far too large and if carried out would have a catastrophic effect on this tiny village.</p> <p>The roads through the village can barely cope now as they are very narrow especially at the Edenfield school strs snf sll of Market Street with residents already parking on both sides of the road. The traffic coming from Rochdale, the quarry, etc. make for very hazardous conditions. When the motorway/bypass is closed because of an accident this additional traffic also comes through the village. Including HGVs, petrol tankers, buses etc.</p> <p>We as residents must be given consideration, the infrastructure simply cannot cope even now and 500 extra homes means at least 800 or more cars using the roads to get to work and children to school.</p> <p>We have no doctors here. Schools are already full. When the bad weather comes snow ice etc. We are always way down the list with gritting, salt bins are almost non-existent.</p> <p>The council and government have a duty of care towards the people who already reside in this village and must consider all of the above when making any further decisions.</p>

1764			Taylor Wimpey UK Ltd		Support	<p>3. LAND WEST OF MARKET STREET, EDENFIELD (ALLOCATION HS2.71)</p> <p>3.1 Taylor Wimpey are the legal owner of a 12.5 Ha Green Belt site west of Market Street, Edenfield.</p> <p>3.2 The site was submitted to the Council's call for sites process in June 2016 and this was followed with the submission of a Development Statement in September 2016, which is attached at Appendix 1.</p> <p>3.3 The site (SHLAA Ref: 16202) is now proposed as part of large housing allocation Site HS2.71 which covers 26 hectares of land across four individual sites. The combined allocation has an indicative capacity of 451 which accounts for 12.5% (or 1/8) of all the allocations in the Borough, indicating its importance to the delivery of the plan. This is also reflected in Policy HS3, which we address on the next page.</p> <p>3.4 It must also be noted that this allocation will be important for the delivery of the type of aspirational family housing in Rossendale which is currently lacking, and this will serve to improve its Council Tax profile and increase receipts.</p> <p>3.5 The attached Development Statement and evidence submitted to date have demonstrated that this is a sustainable and deliverable site in accordance with the NPPF, which is capable of delivering up to 273 units, commencing within the next 5 years. Indeed, Taylor Wimpey own the site outright and therefore there will be no delay in converting the land sale. This will allow the development arm of the business to promote a full application as soon as practically possible post adoption of the Local Plan and its removal from the Green Belt, assuming a separate master planning process, SPD or Design Code is inserted into the site allocation policy.</p> <p>3.6 We do not dispute the Council's assessment in Table 1; albeit it is suggested that the site area is corrected, as the Taylor Wimpey land measures 12.5 Ha not 9.12 Ha.</p> <p>Evidence Base – Market Street, Edenfield.</p> <p>3.16 We now provide comments on the evidence base documents that assess the Edenfield site including:</p> <ul style="list-style-type: none"> • Green Belt Assessment, November 2016, • Lives and Landscape Assessment, July 2015, • Strategic Housing Land Availability Assessment (Stages 1 and 2), May 2017, and • Sustainability Appraisal, May 2017. <p>Green Belt/ Landscape Assessment</p> <p>3.17 The Council commissioned a Green Belt Assessment (prepared by LUC in November 2016) and Landscape Assessment (prepared by Penny Bennett Landscape Architects in July 2015) as part of their evidence base for the</p>

						<p>emerging Local Plan.</p> <p>3.18 Whilst we agree with many of the findings of these two documents, we express concern with some of the conclusions in relation to the Land West of Market Street, Edenfield.</p> <p>3.19 Randall Thorp have provided a comprehensive rebuttal statement which provides commentary on the findings of these two reports, which can be found in Appendix 4. The Randall Thorp report should be read in conjunction with these representations, and the key findings are summarised as follows:</p> <ul style="list-style-type: none"> • The site provides a weak contribution to Green Belt purposes 1 and 3, rather than a moderate contribution as concluded in the 2016 Green Belt Assessment. • The potential level of harm caused by the release of the site from the Green Belt, in accordance with the 'Framework for assessing harm' at Table 4.2 of the Assessment, should be 'low'. This differs from the findings of the Green Belt assessment which suggests 'medium'. • The Landscape Assessment's conclusion that the site 'is not suitable for development on landscape grounds' is incorrect. When taking into consideration the broader context of the site in landscape terms as well as proposed mitigation measures, the site is entirely acceptable in landscape terms. The Assessment should therefore conclude that the Market Street, Edenfield site is 'suitable for development with appropriate mitigation'. <p>3.20 Accordingly, this rebuttal reinforces the Council's conclusions that this is a sustainable and deliverable site with limited landscape and Green Belt landscape terms and provides further justification for its allocation within the emerging Local Plan.</p> <p>Strategic Housing Land Availability Assessment- Stages 1 and 2 (May 2017)</p> <p>3.21 The site was assessed in the SHLAA under site reference 16262. Whilst we fully agree with the overall conclusions that the site is suitable, achievable and developable in the medium to long term, we have a few comments in relation to some of the findings. The Council already consider this site a suitable housing allocation, however, in our view, the site actually performs even better in certain categories of the SHLAA as explained below:</p> <ul style="list-style-type: none"> • Heritage Assets- whilst the site does adjoin the Grade II Listed Building of Edenfield Parish Church, the scoring of the site as red in this category does not allow for consideration of detailed design matters. Whilst it is appreciated that the remit of a SHLAA is for a highlevel assessment of constraints, further information has been provided in the form of the Development Statement which confirms that this Listed Building has been taken into consideration as part of an Illustrative Masterplan. As such, when taking into consideration design matters and the illustrative masterplan, the site should not score red in the heritage assets section. • Landscape Value- as noted previously we disagree with the findings of the 2015 Landscape Assessment, which have fed through to the SHLAA noting a 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>'high landscape impact' and therefore scores red in this regard. The Randall Thorp report (Appendix 4) explains in detail the broader landscape context and landscape mitigation measures which can be implemented on site, concluding that it is suitable for development with appropriate mitigation. In light of these findings, the site will not have a high landscape impact and should not be scored as red in this category within the SHLAA.</p> <p>3.22 We also consider that the site should have been scored higher in the ecological value and recreational value sections, which are currently amber. This relates to a more general observation that the scoring methodology and scope of the SHLAA does not allow for detailed considerations such as masterplanning and proposed design/mitigation.</p> <p>3.23 The Illustrative Masterplan illustrates how the existing public right of way does not pose a constraint on site, on the contrary it can be well-integrated into development proposals. Additionally, the Development Statement attached at Appendix 1, which the Council are in receipt of, concludes that there are no ecological constraints preventing the development of the site and that appropriate mitigation will be provided where necessary.</p> <p>3.24 To conclude, whilst we agree with the overall findings of the SHLAA that the site is suitable, achievable and developable, the comments above further demonstrate this. Accordingly, the evidence base fully supports the Council's decision to allocate this site for housing.</p> <p>Sustainability Appraisal (May 2017)</p> <p>3.25 The Council have commissioned a Sustainability Appraisal (SA) of the Rossendale Local Plan- Reasonable Alternatives report in May 2017. A general point to note is that the SA does not make it clear exactly where the sites assessed are located. There is no accompanying map and the site names do not always correlate with the descriptions in the SHLAA. It is therefore unclear and hard to establish exactly which sites are being assessed. It is therefore requested that the Council provide further clarity on this matter, which would aid in commenting further on the findings of this SA.</p> <p>Conclusions on Market Street, Edenfield Site</p> <p>3.26 Overall, Taylor Wimpey are wholly supportive of the Edenfield allocation and are committed to the comprehensive masterplanning process, subject to the comments and queries raised above on Policy HS3 and the evidence base.</p> <p>4. CONCLUSION</p> <p>4.1 Overall, Taylor Wimpey fully support the Edenfield allocation (HS2.71) subject to the comments and suggestions made above, which note that:</p> <ul style="list-style-type: none"> • The overall housing requirement should be increased to take account of economic aspirations and to provide flexibility to accommodate any unmet need generated by the adjacent authorities in Greater Manchester; • The Council should consider allocating additional sites, both as long-term

reserve sites to provide some headroom in their overall supply, and smaller short term sites to boost 5 year supply, given the current shortfalls;

4.2 This representation has shown that the site is deliverable and developable in line with the NPPF, and has also demonstrated its importance for housing delivery in Rossendale, representing over 7.5% of the total allocated dwelling numbers (with the wider Edenfield Allocation contributing 12.5%) and will make a significant contribution to 5-year supply.

4.3 Taylor Wimpey have been promoting Edenfield for a year and will continue to work alongside the Council and other respective land owners to demonstrate that it can begin delivering in the next 5 years.

1766			Peel Holdings (Land and Property) Ltd		Support	<p>1. Introduction</p> <p>1.1 This representation is prepared by Turley on behalf of our client Peel Holdings (Land & Property) Limited (hereafter “Peel” or “our client”). It provides comments to Rossendale Borough Council (RBC) in respect of the Rossendale Draft Local Plan (July 2017) (‘DLP’) which is currently the subject of public consultation.</p> <p>1.2 This document relates exclusively to the promotion of land at Blackburn Road, Edenfield, as a development opportunity. It should be considered in conjunction with the overarching representation submitted by Turley on behalf of Peel.</p> <p>Draft Rossendale Local Plan</p> <p>1.3 As set out in the overarching representation submitted, Peel has continuously and historically engaged with the plan-making process for Rossendale. This has included the submission of detailed representations to the previous Core Strategy and the draft Lives and Landscapes DPD (since withdrawn), including Development Frameworks that set out the development potential at four sites:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden (allocated in part) • Land at Haslam Farm, Rawtenstall (allocated in part) • Land at Blackburn Road, Edenfield (allocated) • Land at Burnley Road, Edenfield (not allocated) <p>1.4 Peel welcomes the progress which has been made on the emerging Local Plan and supports, in principle, the proposals for development within it. In particular, Peel strongly supports the allocation of land at Kirkhill Avenue in Haslingden, Haslam Farm in Rawtenstall, and Blackburn Road in Edenfield, which include some or all of three of the sites previously put forward (as above).</p> <p>1.5 It is noted, however, that additional work is required to ensure that the emerging Local Plan is capable of meeting the full development needs of the Borough. Additional land will need to be allocated for residential development, above that which has been identified in the DLP.</p> <p>1.6 This opportunity is being taken to make representations in relation to the sites previously identified by Peel as capable of accommodating development in the Borough that have not been put forward in the DLP for allocation and/or Green Belt release. Peel is preparing updated Development Frameworks which will promote and justify its landholdings within Rossendale. Matters addressed below and in the overarching representation which directly affect its landholdings will be discussed in detail in each Development Framework.</p> <p>Additional Site Allocations</p> <p>1.7 In the context of the need for the Rossendale DLP to allocate additional land for development, Peel wish to reiterate the development opportunities at each of the four sites previously identified, as well as proposing a further</p>

						<p>potential site at Rossendale Golf Club.</p> <p>1.8 These sites can each provide a deliverable housing development site in sustainable locations adjoining existing settlements. Initial reviews of site constraints and opportunities, landscape and highways have indicated that there are no significant barriers to development.</p> <p>Development Frameworks</p> <p>1.9 Further site appraisals are being undertaken to inform updated Development Frameworks which will be provided to the Council in due course.</p> <p>1.10 The updated Development Frameworks will:</p> <ul style="list-style-type: none"> • Provide analysis of the site constraints and opportunities. • Where relevant provide details of the findings of further technical assessment (such as highways, flood risk, ground conditions). • Consider the key principles for development of the site. • Present a proposed site layout plan illustrating development parcels, access, landscaping, etc. • Comment on the economic benefits of development. • Address comments / observations made within the recently published evidence base for the emerging Local Plan. <p>Proposed Development Opportunities</p> <p>1.11 In advance of the full Development Frameworks, the individual site representations are submitted providing initial reviews of the development opportunities.</p> <p>1.12 The Sites are represented as follows:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden • Land at Haslam Farm, Rawtenstall • Land at Blackburn Road, Edenfield (this document) • Land at Burnley Road, Edenfield • Land at Rossendale Golf Course, Helmshore <p>1.13 This representation relates to land at Blackburn Road and includes:</p> <ul style="list-style-type: none"> • Section 2: A description of the site and its location • Section 3: Details of the consideration of the site in the Strategic Housing Land Assessment (SHLAA)2 and a review of the planning policy context including the Draft Local Plan • Section 4: A Green Belt appraisal, commenting on the findings of the Green Belt Review • Section 5: Concluding comments <p>1.14 Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan</p> <p>2. Opportunity Site</p> <p>Site Description</p> <p>2.1 The land at Blackburn Road is located approximately 0.7 km miles north of Edenfield Village Centre (see below). It extends to around 2.2 ha (5.4 acres) and is broadly rectangular in shape, comprising an open field in the north and</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>a mature wooded area in the southern part of the site.</p> <p>2.2 The site is located to the west of Blackburn Road which forms part of the eastern site boundary along with existing residential properties. The A56 dual carriageway forms the western boundary to the site beyond which lies open fields.</p> <p>2.3 A small group of houses are located to the immediate south east of the site, comprising a short row of terraced houses fronting Blackburn Road; and a small, inward facing cul-de-sac of modern houses.</p> <p>2.4 Church Lane bounds the site to the south, with the Grade II* listed Edenfield Parish Church and graveyard located on the opposite side of the Lane. To the north the site is bound by an open field</p> <p>Local Facilities</p> <p>2.5 The site is located within easy walking distance of Edenfield Village Centre (approximately 8 minutes walk) which has a number of services and amenities including a butcher, bakery, chemist, post office and two public houses. The town of Rawtenstall is 3.5 km north east of the site and includes a wide variety of traditional town centre uses including supermarkets, national banks and building societies, dentist, high street chemist and a number of restaurants and bars.</p> <p>2.6 Edenfield Church of England Primary School is located around 50m south west of the site on the opposite side of Blackburn Road. The closest High School to the site is Haslingden High School, located approximately 1.9 km; there are 4 other secondary schools within 5 km of the site.</p> <p>2.7 There are bus stops located on Blackburn Road, c. 300 m north and 225m south of the site respectively. These stops are served by the half hourly 482 and 483 bus services, which connects Edenfield with Bury in the south and Burnley and Bacup in the north. There is a Metrolink station in Bury (c. 9 km south of the site) which connects to the wider Greater Manchester tram network. The site is also well connected to both the local and national highway, with the A56 0.5 km from the site which connects to the M66 (2 km) and in turn the M62 and M60 (15 km).</p> <p>3. Planning Policy Context</p> <p>Consideration in SHLAA</p> <p>3.1 The Draft Local Plan evidence base includes the 2017 Strategic Housing Land Availability Assessment (SHLAA), which aims to identify the land supply for housing within the administrative boundary of Rossendale within the next 15 years (2017 – 2032).</p> <p>3.2 The Site, along with adjoining land to the north, is promoted in the SHLAA (Site Ref 16256). The SHLAA Site Assessment confirmed that it is a viable and achievable site for up to 63 homes in the medium term (6-10 years). Peel consider the site could accommodate 65 dwellings.</p> <p>Local Plan Part 2: Site Allocations and Development Management DPD</p> <p>3.3 The Draft LP Part 2 was withdrawn. The plan did not propose to release</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>this site from the Green Belt; representations made by Peel in response to that Plan challenged that proposal.</p> <p>Saved Policies</p> <p>3.4 As the Local Plan Part 2: Site Allocations and Development Management DPD” (LP Part 2) was not taken forward by Rossendale BC, in relation to site allocations and designations, the Proposals Map and Saved Policies remain relevant as part of the development plan.</p> <p>3.5 The Proposals Map identifies the Site as outside the Urban Boundary (Policy DS1) and Site Context in the Green Belt (Policy DS3).</p> <p>3.6 However, Policy 1 of the Core Strategy states that the Urban Boundary defined in Local Plan Saved Policy DS1 and the Green Belt boundary defined in Saved Policy DS3, will be reviewed and where necessary amended in the Site Allocations DPD. The reviews would take into account criteria set out in Policy 1 including:</p> <ul style="list-style-type: none"> • Where small scale selective rounding off of Green Belt boundaries would promote sustainable development opportunities. • An extension/amendment to the urban boundary would not adversely affect aspects of the natural environment. <p>3.7 Core Strategy Figure 15 identifies Edenfield as an area for Green Belt review.</p> <p>Rossendale Draft Local Plan</p> <p>3.8 As discussed in the overarching representation, the Draft Local Plan (DLP) recognises that some release of Green Belt land will be required to meet the housing requirements and the NPPF requirement for the Council to maintain a 5 year land supply of deliverable sites (DLP, page 12).</p> <p>3.9 The evidence presented in the DLP indicates that 4,425 dwellings will need to be delivered over the period to 2034. Considering the under provision of 425 dwellings since the adoption of the Core Strategy and the potential land supply from non- Green Belt sources of 2,907 dwellings, there is a significant gap of approximately 1,518 dwellings.</p> <p>3.10 The DLP proposes areas for release from Green Belt, allowing for a delivery of a further 715 dwellings. It is therefore evident that the Green Belt releases proposed by the DLP need to be more than doubled - to accommodate 1,518 dwellings - if the emerging Local Plan is to be found sound.</p> <p>3.11 In relation to this Site specifically the DLP identifies this as one of four parcels of a larger site allocation for housing development under Policy HS2: Housing Site Allocations, identified as:</p> <ul style="list-style-type: none"> – Site HS2.71 ‘Land between Blackburn Road and A56’, site size 2.09ha, 63 units, delivery in 1-5 years. <p>3.12 The other three parcels identified under allocation HS2.71 would yield an additional 388 homes, bringing a total of 451 new homes that could be delivered as result of this allocation. All four sites are identified as having a 6-</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>15 year delivery time frame.</p> <p>3.13 This allocation would bring the Site within the Urban Boundary and effectively remove it from Green Belt. Policy SD2: Urban Boundaries directs all development within such boundaries ‘except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area.’</p> <p>3.14 The DLP notes the NPPF requirement for the Council to maintain a 5 year land supply of deliverable sites that can meet housing needs. It recognises that some release of Green Belt land will be needed to meet this requirement (page 12) and a Green Belt review⁴ forms part of the evidence base for the DLP.</p> <p>3.15 As above, it is clear that there is a significant gap between the housing land supply identified in the DLP and the demand, which cannot be met by non-Green Belt sites alone.</p> <p>3.16 This housing allocation HS2.71 is wholly supported by Peel. The following section considers this in greater detail.</p> <p>4. Green Belt Appraisal</p> <p>4.1 The Site is currently designated as Green Belt. A Green Belt review⁵ (GBR) forms part of the evidence base for the DLP which has informed the plan’s proposed removal of the Site from Green Belt along with land to the south (Site Ref. HS2.71).</p> <p>4.2 The strategic purpose of this area of Green Belt is to provide separation between Haslingden and Rawtenstall in the north/ north west, from Edenfield to the south.</p> <p>4.3 The Site sits to the north of Edenfield village centre, and to the west of development along Blackburn Road. It corresponds with the southern part of GBR Parcel 39, see below.</p> <p>Figure 4.1: P39 (Site location indicated)</p> <p>4.4 The GBR rates the contribution of the land parcel to the five Green Belt purposes.</p> <p>4.5 It is important to note at the outset that there are very clear and accepted exceptional circumstances which justify the release of significant amounts of land from the Green Belt to meet Rossendale’s housing and employment needs. All land within the current Green Belt, fulfils at least some aspects of Green Belt purposes. As such, it will not be possible to meet the identified housing needs of Rossendale without some impact on the Green Belt.</p> <p>4.6 It is also important to note when considering what land to release from the Green Belt to be clear that the “golden thread” which runs through plan making and decision taking is the achievement of sustainable development. The NPPF confirms this at paragraph 84 when it states that “...when drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development...”. In considering the release of land from Green Belt it is therefore essential to</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>consider what releases of land will achieve sustainable development while minimising the impacts on the purposes of Green Belt.</p> <p>Purpose 1: To check the unrestricted sprawl of large built-up areas</p> <p>4.7 The GBR identifies that the parcel plays a moderate role as, although urbanising features are limited and there is a sense of openness, the A56 dual-carriageway detracts from this openness in parts.</p> <p>4.8 It is considered that the Site can be released from Green Belt for development without compromising this purpose. Parcel 39, along with the parcels P44 and P43 to the south respectively, would extend the developed area of Edenfield within the clearly defined boundary of the A56. Open countryside areas would remain surrounding the settlement to the west, north and east, checking unrestricted sprawl.</p> <p>Purpose 2 - To prevent neighbouring towns merging into one another</p> <p>4.9 The GBR considers that the role of P39 in this respect is weak. It notes that the settlements of Edenfield and Helmshore at this point are more than 2km apart with limited intervisibility. It notes that the parcel, along with neighbouring parcels, forms part of the settlement gap but it is not of critical importance and does not play an essential role in preventing the merging or erosion of the visual and physical gap between these settlements.</p> <p>4.10 Peel supports this assessment and is in agreement that the development of this land does not have an important role in preventing towns from merging.</p> <p>Purpose 3 - To assist in safeguarding the countryside from encroachment</p> <p>4.11 The GBR found a sense of encroachment within the parcel as a result of the visual influence of the adjoining settlement edge to the east, and the presence of the A56 dual-carriageway which defines the western boundary, as well as a small row of terrace houses on the eastern boundary. The parcel contains areas of open agricultural land and displays some of the characteristics of the countryside. However, it is a narrow parcel located between the settlement edge and a large road; consequently it lacks a strong and intact rural character. For these reasons its contribution was considered moderate.</p> <p>4.12 This assessment is supported by Peel; the Site itself sits between the development along Blackburn Road and the A56, in an area which is not of rural character.</p> <p>Purpose 4 - To preserve the setting and special character of historic towns</p> <p>4.13 The GBR recognised that P39 did not make any contribution to this purpose. As, in practice it would have little to no intervisibility with the historic settlements of Ramsbottom and Rawtenstall Town Centre. The openness of the land within the parcels was not considered to be important to setting or historic significance.</p> <p>4.14 Peel agrees with this assessment.</p> <p>Purpose 5 - Assist in urban regeneration by encouraging the recycling of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>derelict and other urban land</p> <p>4.15 The GBR notes that all parcels make an equally significant contribution to this purpose.</p> <p>4.16 The DLP proposes to optimise the re-use of brownfield sites to meet development needs and in doing so support ongoing urban regeneration.</p> <p>4.17 As noted above, and in the overarching representation, the supply of deliverable brownfield land is insufficient to deliver the number and type of new homes and employment land required. As such, the extent of urban regeneration which can be achieved is not enough to meet Rossendale's sustainable growth needs and must be accompanied by development on Green Belt land. Exceptional circumstances to justify Green Belt release have been proven through the Greater Manchester Spatial Framework. The release of land from the Green Belt will not therefore undermine this purpose.</p> <p>Degree of Harm and Mitigation</p> <p>4.18 The GBR concludes that in proposing the release of this parcel for development there would be a 'Medium' degree of harm to the Green Belt. It notes that its release 'would not relate well to the existing settlement form and would introduce an element of sprawl to the north-western edge of Edenfield and along the B6527 (Blackburn Road). However, it is considered that the strategic release of the neighbouring parcels P44 and P43 to the south, before parcel P39 may not be perceived as sprawl as the development would be contained by a strong boundary (the A56), which would limit the potential for future sprawl. The planned release of parcel P44, P43 and P39, in that order, could be perceived as the main block of settlement within Edenfield growing incrementally north and filling the gap between the A56 and the linear settlement along Market Street. This could create a stronger Green belt boundary and settlement edge.'</p> <p>4.19 The intentions of this proposed mitigation are understood and it is noted that the DLP allocation requires a masterplan approach to be taken, which is discussed earlier in this document.</p> <p>Green Belt Appraisal Conclusion</p> <p>4.20 The strategic purpose of this area of Green Belt is to provide separation between Haslingden and Rawtenstall in the north/ north west from Edenfield to the south (with Ramsbottom/ Bury urban area beyond).</p> <p>4.21 The site does not perform a strategic Green Belt function. Its development would not result in encroachment into the wider countryside which surrounds Edenfield. The A56 effectively separates the village from the more open countryside to the west and is a prominent urban feature.</p> <p>4.22 It would not result in urban sprawl or lead to the merger of separate settlements and would not reduce the gap between existing settlements. It would not have a significant impact on ongoing urban regeneration. In fact by providing for good quality family housing including elements of aspirational housing the development of this land would support the ongoing economic</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>regeneration of Rossendale, and that the proposed boundary will provide a long term defensible Green Belt boundary – built development to the east; Church Lane to the south; the A56 to the west; and a field boundary to the north that can be strengthened with additional landscaping.</p> <p>4.23 It is considered that this Site is suitable for development and is in a highly sustainable location. Its release from the Green Belt will therefore contribute to a sustainable pattern of development which makes the most of proximity to nearby highway infrastructure. There are therefore clear exceptional circumstances to justify its release from the Green Belt.</p> <p>4.24 Peel strongly supports the allocation as proposed in the DLP.</p> <p>5. Conclusion</p> <p>5.1 In relation to Peel’s land interests in the Borough, this document concerns one of four sites which have been subject of previous Development Frameworks and representations in the context of the Local Plan development. Updates to these frameworks will be provided to RBC in due course, setting out a clear vision and proposals for the development of these sites.</p> <p>5.2 This representation provides an initial review of the development opportunity at Blackburn Road, Edenfield, including details of the site and its location, consideration of the site in the Strategic Housing Land Assessment (SHLAA) and planning policy; and a Green Belt appraisal, commenting on the findings of the Green Belt Review which forms part of the evidence base to the DLP</p> <p>5.3 Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan and the merits of the sites promoted for residential development.</p> <p>5.4 The site is within the HS3: Edenfield DLP housing allocation, proposed for release from Green Belt. Peel is preparing an updated Development Framework to illustrate the development opportunity. Peel is committed to working with the other landowners within the allocation as required by the policy and in order to achieve quality in placemaking.</p> <p>5.5 Peel strongly supports the designation of land at Blackburn Road as a housing allocation.</p> <p>Appendix 1 Please see appendix</p>

1794			The Methodist Church		Not Applicable	<p>1.0 Introduction</p> <p>1.1 We are pleased to submit, on behalf of our client The Methodist Church, representations in relation to the Rossendale Draft Local Plan Regulation 18 Consultation (July 2017).</p> <p>1.2 The Methodist Church are promoting land off Exchange Street in Edenfield for residential development. The Development Statement now provided at Appendix A demonstrates how land off Exchange Street represents an available, suitable, achievable and deliverable site for housing. Reference is also made to the fact that this site, along with land to the immediate north, has been identified as a Draft Housing Allocation in the Draft Local Plan.</p> <p>1.3 These representations relate to the Council's calculation of development needs and associated land requirements, and set out The Methodist Church's views on the Council's preferred spatial strategy, with reference made to relevant evidence base documents where appropriate.</p> <p>2.0 Response to Individual Policies</p> <p>2.1 We set out below our comments in relation to some of the draft Policies contained within the Draft Local Plan.</p> <p>Policy SD2: Urban Boundary and Green Belt</p> <p>2.2 The Policies Map 2017 (Regulation 18) confirms the intended Urban Boundaries following the proposed revisions to the Green Belt boundary. It is clear that Green Belt release is necessary of Rossendale is to be able to fulfil its development requirements during the plan period and The Methodist Church are fully supportive of the new boundary as it relates to the settlement of Edenfield.</p> <p>2.3 From a Green Belt release perspective, the A56 represents a clear and logical Green Belt boundary preventing further encroachment. With reference to the Green Belt Review, this parcel of land has also been identified as making a weak contribution towards the purposes of including land within the Green Belt and is the only parcel considered suitable for release around the perimeter of Edenfield.</p> <p>2.4 Other elements of the Evidence Base also support the release of Green Belt land in Edenfield, in particular the Strategic Housing Market Assessment (SHMA) prepared by Lichfields (December 2016). The SHMA clearly points towards the need to accommodate housing growth in the south of the borough and specifically in Edenfield. Affordable Housing needs are also particularly acute in this area of the borough, with Tables 8.2 and 8.3 of the SHMA confirming that the Helmshore & Edenfield sub area has the highest proportion of both existing and newly formed households unable to purchase market housing.</p> <p>2.5 There is insufficient land available within the existing settlement boundary of Edenfield to accommodate this affordable housing need and indeed there is</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>a lack of available and deliverable brownfield opportunity sites across the borough as a whole to meet the overall housing requirement during the plan period. Exceptional Circumstances therefore exist, in line with paragraph 83 of the NPPF, to justify the release of Green Belt in the Borough for development.</p> <p>2.6 The Urban Boundary now proposed around Edenfield is therefore considered to be eminently logical and soundly based as it is fully supported by and responds to the findings of the evidence base, in particular the Green Belt Review and SHMA.</p> <p>(...)</p> <p>Policy HS2: Housing Site Allocations</p> <p>2.9 The Methodist Church fully support the inclusion of Land off Exchange Street as a Housing Allocation under Policy HS2 (Ref: HS2.71). The identification of this site, along with the land to the north, responds to the need to deliver additional housing in the south of the borough and in Edenfield in particular as identified within the evidence base. However it is considered that this parcel of land is capable of accommodating around 90 dwellings, rather than the 70 dwellings identified in Table 1 and an amendment is requested accordingly.</p> <p>2.10 Footnote 11 to Paragraph 47 of the National Planning Policy Framework confirms that to be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing can be delivered within the next 5 years. Land at Exchange Street can be considered deliverable in this context and the reasoned justification for this is now provided.</p> <p>Available</p> <p>2.11 The Exchange Street site is under single ownership. This Statement confirms that the landowner is supportive of development of the site for residential dwellings. The land is not subject to any ransom strips or any covenants that would restrict its development for new housing.</p> <p>2.12 As such, these representations confirm that the site is available.</p> <p>Suitable</p> <p>2.13 The settlement benefits from a range of local facilities and services, as well as frequent public transport connections to nearby higher order settlements. New housing development in the village would help to sustain the existing local community and facilities.</p> <p>2.14 What is more, the site is considered the most suitable site on the edge of Edenfield to deliver new housing. Its close proximity to the village centre means it is within a more sustainable location than other potential housing sites in the south or east of the village, maximising opportunities for new residents to use existing village facilities and provide a boost to the local community. The site is also located in a less sensitive location in terms of landscape impact and the future durability of the Green Belt, as confirmed in the Green Belt Review.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>Achievable</p> <p>2.15 The site is not covered by any statutory biodiversity or landscape designations, nor are there any technical factors that would automatically prevent development of the site.</p> <p>2.16 To further confirm the deliverability of the site, a Development Statement has been produced that justifies the inclusion of Land at Exchange Street as a Housing Allocation under Policy HS2 (as part of the wider Housing Allocation ref: HS2.71) and this is provided at Appendix A to this representation.</p> <p>2.17 In addition, CBO Transport have provided specialist highways advice relating to the development of the site for housing and this concludes that the local highway network is capable of accommodating the intended level of housing. This note can be found at Appendix B to this representation and it relates to land at Exchange Street only.</p> <p>3.0 Land at Exchange Street, Edenfield</p> <p>3.1 The Methodist Church are promoting land off Exchange Street for residential development. Further details relating to the site are provided in the Development Statement at Appendix A.</p> <p>3.2 The Development Statement confirms that the site has the capacity to deliver around 90 dwellings. It provides confirmation that the site is available, suitable, achievable and deliverable.</p> <p>3.3 The site forms part of a wider Housing Allocation and The Methodist Church have already begun to work with the other landowners, Taylor Wimpey and Peel Holdings, to ensure that the whole allocation is brought forward in a comprehensive manner. The Methodist Church fully intend to continue working closely with the adjoining landowners, Rossendale Council and other key stakeholders to ensure that the wider allocation is brought forward in the correct manner.</p> <p>3.4 The site is therefore well placed to make a contribution towards the need for additional housing identified Edenfield and Rossendale as a whole. Accordingly, The Methodist Church submit that land off Exchange Street, and indeed the wider parcel of land identified under Draft Policy HS3, is fully justified to be released from the Green Belt and should remain as a Housing Allocation in the Local Plan.</p> <p>Appendix A: Exchange Street, Edenfield – Development Statement October 2017</p> <p>1. INTRODUCTION</p> <p>The site comprises predominantly greenfield land, with the buildings and grounds of Chatterton Hey care home in its north west corner. The site lies to the immediate north west of the settlement of Edenfield and is surrounded by man-made features on all sides. It is in close proximity to the services and facilities in the centre of the village and would represent a sustainable and logical extension to the existing settlement.</p>

						<p>Purpose of this Document</p> <p>This document provides an overview of the technical constraints and opportunities presented by the site and demonstrates that the site is available, suitable, achievable and can therefore be considered deliverable and well placed to contribute towards meeting future housing needs in Rossendale.</p> <p>It demonstrates how with regard to relevant technical and design considerations, the site is able to accommodate approximately 90 dwellings. The remainder of this document is structured as follows:</p> <ul style="list-style-type: none"> • Site Location and Description • Planning Context • Green Belt Assessment • Sustainable Location • Deliverable Site • Design Principles • Summary and Conclusions <p>2. SITE LOCATION AND DESCRIPTION</p> <p>The Site</p> <p>Land off Exchange Street (“the site”) lies to the immediate north west of the village of Edenfield. The site comprises part brownfield/ part greenfield land and extends to approximately 5.3 hectares. In the north west corner of the site is a complex of approximately 4 buildings which make up the Chatterton Hey care homes which are managed by the Langley House Trust. A belt of dense woodland surrounds the Chatterton Hey complex. The rest of the site comprises approximately 4.4 hectares of un-used greenfield land.</p> <p>The site is accessed via Exchange Street to the east, which connects to Market Street in the centre of the village. A single lane road extends from the end of Exchange Street providing access to Chatterton Hey care home and this forms the north eastern and northern boundaries of the site. A designated public right of way also runs along this road.</p> <p>To the east of the site, on the other side of the access road, is Edenfield Recreation Ground, east of which is built development comprising a mix of commercial and residential properties fronting onto Exchange Street and Market Street. To the north of the site are pastoral fields and beyond these the A56 dual carriageway.</p> <p>The western boundary of the site is formed by a belt of established woodland, beyond which runs the A56 dual carriageway in a north-south direction.</p> <p>To the south east and south, the site abuts existing residential properties along Eden Avenue, Oaklands Road and Woodland Road. A wooded ditch runs along the southern boundary of the site, to the rear of the adjacent houses and gardens.</p> <p>The site is predominantly grassland, with existing trees and hedgerows mostly limited to the southern boundary around the watercourse, the woodland in</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>the westernmost part of the site and the woodland around the care home. The main part of the site forms a relatively flat plateau before dropping away in the west towards the care home and the A56.</p> <p>Surrounding Area</p> <p>Edenfield is located in the south of the Borough. It is approximately 2 kilometres to the north east of Ramsbottom, and approximately 4 kilometres to the south of the built up area of Helmshore, Haslingden and Rawtenstall. It lies to the east of the M66 which ends at the village and continues northwards as the A56 dual carriageway. The village lies within the Rossendale Valley, with the land rising in the east up to Scout Moor and in the west up to Holcombe Moor. The main built up area of Edenfield lies to the immediate south of the site. The A56 dual carriageway lies to the west of the site, beyond which are further agricultural fields and the River Irwell. To the north of the site are pastoral fields and ribbon development along Market Street leading north out of the village.</p> <p>The Chatterton and Strongstry Conservation Area is located on the other side of the A56 from the site. It is wholly screened from the site by virtue of the dual carriageway and the dense woodland along the site's western boundary. There are no listed buildings or other designated heritage assets on or adjacent to the site.</p> <p>The site lies only approximately 200 metres from the centre of the village. It is therefore easily accessible to the range of local shops and services within Edenfield. This includes several pubs and takeaways, a bakery, a butchers, a barbers, a pharmacy, a newsagents, Parish Church and cricket club. Edenfield Church of England Primary School is located approximately 750 metres walking distance from the site on Market Street. An equipped children's play area and recreational open space (including football pitches) are located adjacent to the site on Exchange Street, both within 200 metres walking distance. Further detail about the proximity of the site to local services and facilities is contained in Section 5.</p> <p>The dwellings adjacent to the site to the south, along Eden Avenue, Oaklands Road and Woodlands Road are a mix of detached, semi-detached and mews properties. These are predominantly two storeys, although there are some bungalows along Eden Avenue.</p> <p>The existing dwellings are a mix of materials including red brick, stone and clay tile roofs.</p> <p>Photos of the site and surrounding area</p> <p>3. POLICY CONTEXT</p> <p>Adopted Development Plan</p> <p>The currently adopted Development Plan for the area comprises the Rossendale Core Strategy (2011-2026) which was adopted in November 2011.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>The site is located within the designated Green Belt which tightly surrounds the existing settlement of Edenfield.</p> <p>Emerging Rossendale Local Plan (2019-2034)</p> <p>The Council are currently progressing a new Local Plan (2019-2034) in order to take account of up-to-date evidence on the Borough's growth needs as required by the National Planning Policy Framework ('the Framework').</p> <p>The Council recently published several evidence base documents prepared to inform the emerging Local Plan. Those of most relevance to the site are considered further below.</p> <p>The regulation 18 consultation of the Draft Local Plan identifies land off Exchange Street as part of a wider housing allocation under Policy HS3. This policy sets out that the site, as part of a wider 26-hectare parcel, has the potential to deliver residential development within the plan period. The accompanying Policies Map 2017 identifies the site, as part of a wider parcel under Housing Allocation HS27.1, capable of delivering 451 homes, of which 70 and be delivered on land at Exchange Street.</p> <p>Extracts from Policies Map 2017</p> <p>Evidence Base</p> <p>Strategic Housing Market Assessment (SHMA) December 2016</p> <p>A Strategic Housing Market Assessment (SHMA) has been produced to provide up-to-date evidence on housing need in the Borough. The SHMA December 2016 was published in June 2017. It recommends that the objectively assessed housing need (OAN) for Rossendale over the upcoming plan period 2014 – 2034 is between 265 to 335 dwellings per annum (dpa).</p> <p>Strategic Housing Land Availability Assessment (SHLAA)</p> <p>The Council also published an updated SHLAA (May 2017) in June 2017. Land off Exchange Street (the site) is identified in the SHLAA under reference SHLAA 16263, having been promoted by the landowner through the Call for Sites exercise. The SHLAA anticipates the site as having capacity for 70 dwellings. The site is identified as being available with no known legal or ownership constraints and both suitable and achievable for housing development. The overall conclusion of the SHLAA was that the site is developable in the medium to long term (within 6 to 10 years, or after 10 years) with the following justification:</p> <p>"The site is available now and can become suitable for development provided that the vehicular access is improved, the potential landscape impacts are mitigated, the woodland area is preserved and the character of the local area is maintained or enhanced. The development is considered viable and considered achievable in the medium to long term."</p> <p>The SHLAA considers the potential constraints to development on the site. The rest of this Statement goes on to provide further detail of these constraints and confirms the achievability of the site, thereby demonstrating there is nothing that would preclude development of the site in the short</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>Green Belt Review</p> <p>A review of the Green Belt within the Borough has also been undertaken. The site is assessed as part of wider parcel of land (identified under Parcel ref: 44) which includes the recreation ground to the east, and extends further south than the site to include a wooded strip of land between the A56 and the properties on Oaklands Road.</p> <p>Crucially, the Green Belt Review (GBR) assesses the site as having the potential for release from the Green Belt. It is assessed as making the following contribution towards the five purposes of the Green Belt as set out in paragraph 80 of the Framework.</p> <p>The findings of the GBR are considered in more detail in Section 4.</p> <p>4. GREEN BELT ASSESSMENT</p> <p>The site is currently within the Green Belt which tightly surrounds the existing settlement of Edenfield. A Green Belt review, undertaken in July 2017 to inform the emerging Local Plan, concluded that the site is potentially suitable for release from the Green Belt. The Rossendale Draft Local Plan has gone on to identify a 26 hectare parcel of land, including the Exchange Street site, to the north west of Edenfield, for release from the Green Belt. This section considers the findings of the Green Belt Review in more detail and demonstrates that the site makes an overall limited contribution towards the purposes of the Green Belt such that it represents a suitable release for residential development.</p> <p>Paragraph 79 of the Framework establishes that the fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open.</p> <p>Paragraph 80 states that Green Belt serves five purposes:</p> <ol style="list-style-type: none"> 1. To check the unrestricted sprawl of large built-up areas; 2. To prevent neighbourhood towns merging into one another; 3. To assist in safeguarding the countryside from encroachment; 4. To preserve the setting and special character of historic towns; and 5. To assist in urban regeneration, by encouraging the recycling of derelict and other urban land. <p>Green Belt Assessment of the Site</p> <p>As set out above, the Green Belt Review (GBR) assesses the site along with the recreational ground to the immediate east together - under the reference 'Parcel 44'. It provides the following overall assessment of the Parcel's contribution towards the five purposes of the Green Belt set out in paragraph 80 of the Framework.</p> <p>Table 4.1: Overall Assessment of Parcel 44 in GBR.</p> <p>Parcel Ref. 44</p> <p>Purpose 1: To check unrestricted sprawl of large built-up areas Moderate</p> <p>Purpose 2: To prevent neighbouring towns merging into one</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>another Weak</p> <p>Purpose 3: To assist in safeguarding the countryside from encroachment Weak</p> <p>Purpose 4: To preserve the setting and special character of historic towns No Contribution</p> <p>Purpose 5: To assist in urban regeneration, by encouraging the recycling of derelict and other urban land n/a*</p> <p>Overall Assessment Medium</p> <p>*all parcels are assessed as making the same contribution towards this purpose</p> <p>The GBR states:</p> <p>“This parcel is adjacent to Edenfield which forms part of the large built up area of Ramsbottom/ Bury...The A56 dual-carriageway defines the western boundary forms a strong barrier feature to prevent the possible outward sprawl of development. The northern boundary of the parcel comprises an access road and dry stone wall and does not form a strong defensible barrier to prevent the outward sprawl of development. The parcel contains little urban development, although the presence of the A56 and adjacent urban edge has weakened the rural character. Its release is unlikely to have substantial negative effect on the function of neighbouring parcels under purpose 3. Releasing this parcel is unlikely to have a substantial negative effect on the integrity of the wider Green Belt.”</p> <p>In Appendix 4.1, the GBR provides the following more detailed commentary of the assessment of the Parcel against each purpose. Having reviewed the GBR, we strongly support its conclusions in respect of the site.</p> <p>Purpose 1: To check the unrestricted sprawl of large built-up areas</p> <p>GBR Assessment of Parcel 44</p> <p>This parcel is adjacent to Edenfield which forms part of the large built up area of Ramsbottom/ Bury. There are few urbanising features within the parcel apart from a small cluster of residencies in the north-west. The influence of these urbanising features is limited with the parcel displaying a sense of openness. However, the A56 dual-carriageway defines the western boundary and detracts from the sense of openness in parts.</p> <p>Rating: Moderate Contribution</p> <p>Purpose 2: To prevent neighbouring towns merging into one another</p> <p>GBR Assessment of Parcel 44</p> <p>This parcel is adjacent to Edenfield and lies directly between Edenfield and Helmshore. At this point the settlements are more than 2km apart with limited intervisibility. The parcel, along with neighbouring parcels forms part of the settlement gap but it is not of critical importance and does not play an essential role in preventing the merging or erosion of the visual and physical gap between these settlements.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>Rating: Weak Contribution</p> <p>Purpose 3: To assist in safeguarding the countryside from encroachment</p> <p>GBR Assessment of Parcel 44</p> <p>There is a sense of encroachment within the parcel as a result of the visual influence the adjoining settlement edge to the east and south and the A56 dual-carriageway which defines the western boundary. The majority of the parcel comprises open farmland and a recreational grounds, it displays some of the characteristics of the open countryside but lacks a strong and intact rural character.</p> <p>Rating: Weak Contribution</p> <p>Purpose 4: To Preserve the Setting and Special Character of Historic Towns</p> <p>GBR Assessment of Parcel 44</p> <p>Digital analysis, based on bare earth height data, indicates that this parcel is theoretically visible from the historic settlement of Ramsbottom. In practice, this parcel has little to no intervisibility with this historic settlement. The openness of the land within the parcel is not considered to be important to its setting or historic significance.</p> <p>Therefore, any new development that took place within the parcel is considered unlikely to affect the special character of this historic settlement.</p> <p>Rating: No Contribution</p> <p>Purpose 5: To assist in urban regeneration, by encouraging the recycling of derelict and other urban land</p> <p>GBR Assessment of Parcel 44 All parcels make an equally significant contribution to this purpose.</p> <p>The following extract of the GBR demonstrates that Parcel 44 is one of only three sites in Edenfield that are assessed as having the potential for release, all of which lie to the east of the settlement between the existing development and the A56 dual-carriageway.</p> <p>The subsequent identification of this parcel of land as a Housing Allocation can therefore be fully justified.</p> <p>Plan 2: Extract from Green Belt Review showing Parcel 44 having the potential for release.</p> <p>The GBR identifies how, in contrast to Parcel 44, land to the east of Edenfield makes a strong contribution towards Purpose 1 of the Green Belt (to check the unrestricted sprawl of large builtup areas) due to limited urbanising features and a strong sense of openness in this area. Several of the parcels to the east of Edenfield were also assessed as having a greater role to play than Parcel 44 in safeguarding the countryside from encroachment (Purpose 3). This is in view of their relationship with the large area of rising open countryside of Scout Moor and Dearden Moor to the east which have distinctive moorland landscape characteristics.</p> <p>The other two parcels identified as having the potential for release (Parcel 43 and 39) lie to the immediate north of the site, and comprise the wider area of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>land between the built development along Market Street to the east and the A56 dual-carriageway to the west.</p> <p>The GBR then describes how: “The planned release of parcel P44, P43 and P39, in that order, could be perceived as the main block of settlement within Edenfield growing incrementally north and filling the gap between A56 and the linear settlement along Market Street. This could create a stronger Green Belt boundary and settlement edge.”</p> <p>Mitigation Measures For those parcels identified as being potentially suitable for release in Green Belt terms, the GBR also provides an overview of some potential mitigation measures which could be incorporated into development to minimise effects on the wider Green Belt. For Parcel 44, the following potential mitigation measures are suggested:</p> <ul style="list-style-type: none"> • Development within the parcel should be restricted to appropriate and attractive small scale and low-density housing. • New properties should be a maximum of two storeys to minimise the negative impact on the openness of the adjacent Green Belt land. • The belt of mature woodland along the western boundary of the parcel should be retained and enhanced to preserve the visual screen of the A56 and to help screen any new development from Green Belt land to the west. • The existing line of trees should be retained and a framework of new planting along the northern boundary should be developed to soften the appearance of any development from the adjacent Green Belt land to the north. • A new dry stone wall should be built along the minor road which defines part of the northern boundary of the parcel. <p>The Green Belt Review demonstrates that the site makes the most limited contribution towards the purposes of the Green Belt when compared with all other Parcels assessed around Edenfield. From a review of the evidence base, it is apparent that Parcel 44 represents the most immediately suitable and sensible site for release from the Green Belt in the short term and therefore its identification for release in the Draf Local Plan is fully justified.</p> <p>5. SUSTAINABLE LOCATION A wide variety of services and facilities are available within a short walking and cycling distance of the site and as a result it is considered to be an entirely sustainable location for new housing.</p> <p>Shops and Services The site is within an easy walking distance of a range of local shops and services being only 200 metres from the centre of the village. Here, a number of amenities are available at the Exchange Street/ Market Street/ Bury Road junction.</p> <p>The site is approximately 1500 metres away from facilities within nearby</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>Stubbins, including The Village Chippy and Stubbins Tandoori. It is approximately 3 kilometres from the centre of Ramsbottom which provides a greater range of facilities including a Morrisons supermarket and Tesco Superstore. The centres of the larger settlements of Haslingden and Rawenstall are both approximately 5 kilometres away, just a 20 minute journey via a frequent bus service from the village.</p> <p>Ref: Name of Facility Distance from Site (metres)</p> <p>1 Rostron Arms (Public House) 200</p> <p>2 Valentines Butchers 200</p> <p>3 The Village Barbers 200</p> <p>4 Sixsmith Bakery 200</p> <p>5 My Plaice Fish and Chips 200</p> <p>6 Golden Kitchen Chinese Take Away 220</p> <p>7 The Drop Off Café 300</p> <p>8 Edenfield Mini Market Convenience Store 500</p> <p>9 The Coach at Edenfield 700</p> <p>10 Morrisons Supermarket, Ramsbottom 3000</p> <p>11 Tesco Superstore, Ramsbottom (including ATM) 3000</p> <p>Community Facilities</p> <p>There are a number of community facilities within Edenfield village, including opportunities for outdoor recreation.</p> <p>Further facilities are available in Rawtenstall and Ramsbottom which are within 5 kilometres of the site.</p> <p>Ref: Name of Facility Distance from Site (metres)</p> <p>1 Edenfield Recreation Ground 200</p> <p>2 Children's Play Area 200</p> <p>3 Community Centre 200</p> <p>4 Edenfield Cricket Club 350</p> <p>5 Edenfield Parish Church 800</p> <p>6 Rossendale Golf Club 2500</p> <p>7 Ramsbottom Pool & Fitness Centre 2400</p> <p>Education</p> <p>The site is well located in relation to Edenfield Church of England Primary School which is approximately 800 m away on Market Street.</p> <p>Secondary School provision is available in either nearby Haslingden or Ramsbottom.</p> <p>Ref: Name of Facility Distance from Site (metres)</p> <p>Primary Schools</p> <p>1 Edenfield Church of England Primary School 800</p> <p>2 Ramsbottom Stubbin Primary School 1100</p> <p>3 Peel Brow School, Ramsbottom 3000</p> <p>4 Rossendale School, Ramsbottom 3200</p> <p>5 Rawtenstall Balladen Community Primary School 3500</p>

						<p>Secondary Schools</p> <p>6 Rossendale School, Ramsbottom 3200</p> <p>7 Haslingden High School and Sixth Form 3000</p> <p>8 All Saint's Roman Catholic High School, Rawtenstall 4500</p> <p>Post-16 Education</p> <p>9 Haslingden High School and Sixth Form 3000</p> <p>10 Rossendale School, Ramsbottom 3200</p> <p>11 All Saint's Roman Catholic High School, Rawtenstall 4500</p> <p>Plan 3: Local Facilities in Edenfield</p> <p>Plan 4: Local Facilities further afield</p> <p>Healthcare Provision</p> <p>There are a number of doctors and dentist surgeries in the local area.</p> <p>Ref: Name of Facility Distance from Site (metres)</p> <p>1 Parkhouse Dental Practice, Ramsbottom 2600</p> <p>2 Ramsbottom Health Centre, Ramsbottom 2700</p> <p>3 Bolton Street Dental Practice, Ramsbottom 2800</p> <p>4 Ramsbottom Dental Surgery, Ramsbottom 3000</p> <p>5 Fairmore Medical Practice, Rawtenstall 4600</p> <p>6 Haslingden Health Centre, Haslingden 4700</p> <p>7 Dr F W Moujaes & Partner, Haslingden 4800</p> <p>8 Rossendale Valley Medical Practice, Haslingden 4800</p> <p>Public Transport</p> <p>The site is within 400 metres of bus stops on Market Street that are served by the 482/483 service providing multiple services each hour to nearby Rawtenstall, Bacup and further afield to Burnley and Bury. The stops are also served by the 273 which provides services to Rawtenstall, Ramsbottom and Bolton and the 892 which goes to Rawtenstall, Ramsbottom, Greenmount and Tottington.</p> <p>The site is well located within walking distance of a range of local services and facilities and with access to good public transport links. It is therefore in a suitable and sustainable location for new housing.</p> <p>6. DELIVERABLE SITE</p> <p>Footnote 11 to Paragraph 47 of the National Planning Policy Framework confirms that to be considered deliverable, sites should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing can be delivered within the next 5 years. Land at Exchange Street can be considered deliverable in this context and the reasoned justification for this is now provided.</p> <p>Available</p> <p>The entire site is under single ownership. This Statement confirms that the landowner is supportive of development of the site for residential dwellings. The land is not subject to any ransom strips or any covenants that would restrict its development for new housing.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>As such, these representations confirm that the site is available.</p> <p>Suitable</p> <p>The settlement benefits from a range of local facilities and services, as well as frequent public transport connections to nearby higher order settlements. New housing development in the village would help to sustain the existing local community and facilities. The sustainable location of the site, within close walking distance to the centre of the village has been considered in Section 5.</p> <p>The suitability of the site for residential development in terms of relevant physical characteristics and constraints is set out below.</p> <p>What is more, the site is considered the most suitable site on the edge of Edenfield to deliver new housing. Its close proximity to the village centre means it is within a more sustainable location than other potential housing sites, maximising opportunities for new residents to use existing village facilities and provide a boost to the local community. As described in Section 5, the Green Belt Review identifies how the site is also located in a less sensitive location in terms of landscape impact and the future durability of the Green Belt.</p> <p>Land to the east of Edenfield has a strong sense of openness and a greater role to play in checking urban sprawl and safeguarding from encroachment.</p> <p>Achievable</p> <p>The following is a summary of the technical factors associated with development of the site.</p> <p>It can be confirmed that there are no physical constraints which would prevent the site from coming forward for housing in a manner which would respond appropriately to the site's constraints and context.</p> <p>Access and Highways</p> <p>CBO Transport Consultants have been commissioned to advise on the potential for residential development at the site. The existing access to the site is currently via Exchange Street. Lancashire County Council (LCC) Highways records show Exchange Street is adopted meaning that the public highway can be extended into the site without constraint from third party ownerships. The existing carriageway width on Exchange Street is 5.5 metres which is a standard width for a residential road and would pose no constraint to the proposed development of the site. There is an existing footway along the south side of Exchange Street which provides pedestrian connectivity between the site and the village centre. This existing footway is 1.3 metres in width which is considered sufficient to serve the proposed development.</p> <p>The assessment undertaken by CBO Transport Consultants has found that a safe and suitable access can be achieved to the site to serve the proposed development of 90 dwellings.</p> <p>Ecology</p> <p>Given the vegetation on the main part of the site is limited to grassland, the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>majority of habitats to be found here are likely to be common and of limited value. The existing trees and woodland do however provide opportunities for wildlife. The SHLAA states that about 1 hectare of the woodland is identified as Stepping Stone Habitat for woodland. The woodland and the majority of trees will be retained and incorporated as part of any future development. The site lies within the Impact Risk Zones of the Hodge Clough SSSI (approximately 1000 metres to the north west) and the Lower Red Lees (approximately 2 kilometres to the south west). These SSSI's are separated from the site by the River Irwell and the M66/A56 such that there is very limited connectivity between the site and these habitats.</p> <p>Overall, given the nature and location of the site, there are not anticipated to be any overriding constraints to its development in terms of ecology and development on the site can come forward in a manner which provides appropriate mitigation and biodiversity enhancements in line with local and national policy.</p> <p>Arboriculture</p> <p>Existing vegetation on the site is limited predominantly to the boundaries – with several mature trees lining the southern boundary of the site along the stream. An area of dense woodland surrounds the buildings and grounds of Chatterton Hey in the north western corner of the site.</p> <p>It is anticipated that existing trees and woodland will be retained and incorporated into the scheme and will play an important role in screening the new development from the surrounding existing properties and softening its visual impact in the surrounding area. Opportunities to enhance the green infrastructure on site will also be provided through a careful landscape led approach to design such that there will be an overall net gain in vegetation on the site.</p> <p>Landscape Character Impact</p> <p>In order to inform the preparation of the Site Allocations and Development Management Plan (Local Plan Part 2), the Council commissioned the 'Lives and Landscapes Assessment' (July 2015) to appraise the landscape sensitivity of sites within the Borough. Whilst the Local Plan Part 2 was subsequently withdrawn in February 2016 to focus efforts on producing the New Local Plan, it is still considered relevant to have some regard to the findings of this Assessment as the Council's latest evidence on landscape impact.</p> <p>The 'Lives and Landscapes Assessment' (July 2015) assesses the site as part of a much wider parcel which comprises all the land between the north western edge of the existing settlement and the A56 dual-carriageway. The parcel is identified as being within the 8b Irwell Valley south Settled Valley Landscape Character Area. The Assessment divides it into 4 areas – A to D, with the site identified as 'Area D'.</p> <p>The Assessment recognises that Area D is less visible than the more open land to the north by reason of the existing vegetation. It describes how the site</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>could be 'developed sensitively and incorporated successfully into the village boundary', concluding that the site is suitable for development with mitigation.</p> <p>The site was one of the few sites in the village to be assessed as being 'developable with mitigation', with the majority of other potential housing land considered to be 'undevelopable' with regard to landscape character impact.</p> <p>Flood Risk and Drainage</p> <p>The entire site is located within Flood Risk Zone 1 with reference to the Environment Agency flood maps. Residential development would therefore be entirely acceptable in line with national guidance on flood risk. There is a watercourse running along the southern boundary of the site but this does not present a flood risk. It is anticipated that adequate drainage for the site could be designed in a manner which utilises the natural topography of the site.</p> <p>Utilities</p> <p>There are no power lines or public sewers crossing the site to act as a constraint to development. It is anticipated that residential development on the site will be able to connect to the existing utilities networks which serve the area. Further investigations and enquiries would reveal any improvement works or on site provision deemed necessary.</p> <p>A review of technical considerations has confirmed that there are no physical characteristics or other constraints that would prevent the delivery of housing at the site. Overall, it is demonstrated that the site is available, suitable, achievable and therefore deliverable.</p> <p>7. DESIGN PRINCIPLES</p> <p>An Indicative Masterplan has been produced by Broadway Malyan on behalf of The Methodist Church to demonstrate how the site could be delivered for residential development in a manner which responds appropriately to the specific opportunities and constraints of the site and integrates itself into the surrounding area.</p> <p>Context of the Surrounding Area</p> <p>The site is located to the immediate north west of the existing settlement of Edenfield. The boundaries of the site are clearly defined by the access road along the northern and eastern boundaries, and the established woodland and strong boundary of the A56 to the west. Along the southern boundary, separated from the site by a watercourse and belt of trees, are the rear gardens of properties along Eden Avenue, Woodlands Road and Oaklands Road.</p> <p>Whilst responding to the architecture of the adjacent existing development, it is important that development of the site respects the rural character of Edenfield and the edge of settlement location of the site.</p> <p>The dwellings adjacent to the site to the south, along Eden Avenue, Oaklands</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>Road and Woodlands Road are a mix of detached, semi-detached and mews properties. These are predominantly two storeys, although there are some bungalows along Eden Avenue.</p> <p>The existing dwellings are a mix of materials including red brick, stone and clay tile roofs. Older stone properties are located along Exchange Street and Market Street.</p> <p>Semi-detached Houses on Eden Avenue</p> <p>Terraced houses on Exchange Street</p> <p>Plan 5: Site characteristics</p> <p>Site Considerations</p> <p>Architects Broadway Malyan have undertaken an analysis of the physical characteristics of the site and identified the opportunities and constraints which will be important considerations in the design of the development. These are shown on the Site Analysis Plan below.</p> <p>The following physical features will be important considerations when establishing the design principles for the development:</p> <ul style="list-style-type: none"> • Trees and Hedgerows. There are existing areas of woodland around the buildings of the Chatterton Hey care home and in a belt along the western and southern boundaries of the site. These trees offer important buffers to visually screen the development from the adjacent A56, the existing Chatterton Hey care home and the residential properties to the south. The woodland will also mitigate against noise from the A56. Accordingly, the existing trees on site should be retained as far as possible and integrated into a green infrastructure network. • Ecology. The trees on and adjacent to the site could provide habitats for some species, including birds and bats. The watercourse along the southern boundary could also provide some value for wildlife. These features should be retained and enhanced where possible. • Relationship with adjacent properties. The development must be carefully designed to respect the adjacent residential properties and ensure the amenity of existing neighbours is preserved. • Topography. The main part of the site forms a plateau which falls away towards the southern and western boundaries of the site. Development should be designed to work with the natural topography of the site. • Connectivity to village centre. The site is located in close proximity to the local facilities in the centre of Edenfield and good pedestrian connectivity is crucial to maximise this sustainable location. The site also presents the opportunity to relate positively to the adjacent Recreation Ground. • Relationship with Chatterton Hey care home. <p>The development must be designed to ensure compatibility with the adjacent care home.</p> <ul style="list-style-type: none"> • Relationship with wider countryside. <p>Development needs to respect and preserve the rural character of the village</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>and minimise any landscape visual or character impact ensuring strong and durable Green Belt boundaries for the future.</p> <p>Indicative Masterplan</p> <p>The design principles shown on the Indicative Masterplan and how they respond positively to the context of the site and surrounding area can be described as follows:</p> <ul style="list-style-type: none"> • Existing trees and areas of woodland are retained and new landscaped greenspace is proposed to soften the development ensuring a rural feel, and bolster the buffer between the new housing and existing residents to the south and the care home in the north west. This is in line with the suggested mitigation measures for the site in the 'Lives and Landscapes Assessment' (July 2015). • As well as providing character and visual screening, these areas of landscaping will also provide opportunities for ecological mitigation and enhancement and for Sustainable Urban Drainage systems including swales and ponds. • At a density of approximately 25 dwellings per hectare, the proposals are for a relatively low-density development of two-storey dwellings. This is in line with the suggested mitigation measures in the Green Belt Review (November 2016) and will soften the visual impact on the adjacent Green Belt land. • The primary access to the site forms a continuation of Exchange Street and leads into a primary route which loops through the site. This design approach helps achieve permeability in the layout. • Opportunities to maximise pedestrian connectivity are also shown on the Masterplan, with an improved pedestrian link suggested to Woodland Road helping to integrate the development with the rest of the village. • The existing access road to Chatterton Hey is retained providing a clearly defined edge to the new development and a new durable Green Belt boundary. This can be reinforced by careful boundary treatment, in line with the recommended mitigation measures of the Green Belt Review (November 2016) which envisages a dry stone wall along this boundary. • Development of approximately 90 dwellings is arranged in parcels with important frontages identified. Careful design will be essential to ensure a development which is legible, has an attractive sense of place and most of all is in keeping with and adds to the existing character of Edenfield. <p>Emerging Masterplan for the wider allocation</p> <p>Following the identification of the wider parcel of land to the north as a Draft Housing Allocation under policy HS3, a comprehensive masterplan for the whole allocation is to be produced that builds upon the principles established here.</p> <p>Pedestrian and cycle connections are to be provided to the immediate north and into the recreation area to the east in order that development of the site</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>fully integrates itself into the proposed wider allocation.</p> <p>The Indicative Masterplan demonstrates how appropriate mitigation measures can be incorporated to achieve a sensitive development which would be experienced as a natural extension to the existing settlement with limited harm caused to the wider landscape character or purposes of the Green Belt.</p> <p>Plan 6: Proposed indicative masterplan</p> <p>8. SUMMARY AND CONCLUSIONS</p> <p>Land off Exchange Street represents a sustainable, logical opportunity for housing development on the edge of Edenfield. It is ideally placed to contribute towards meeting local housing needs in the village and across Rossendale as a whole.</p> <p>The site is being actively promoted by the landowners and is considered capable of delivering around 90 new homes in a manner which responds positively to the context of the site and surrounding area.</p> <p>This Development Statement has demonstrated the following:</p> <ul style="list-style-type: none"> • Land off Exchange Street is well related to the existing settlement of Edenfield and its development will form a natural extension to the village. • The site is in a highly sustainable location, within 800 metres walking distance to the majority of local facilities in the village centre including Edenfield Primary School, a convenience store, several pubs and a butchers and bakers. • Frequent public transport to the nearby larger settlements of Ramsbottom, Helmshore and Rawtenstall is also accessible from the site. • The Council's Green Belt Review (November 2016) has found that the site makes a relatively limited contribution towards the five purposes for including land within the Green Belt set out in paragraph 80 of the Framework. From a review of the evidence base, it is apparent this is a suitable and sensible site for release from the Green Belt. • The Council's Draft Local Plan (July 2017) has identified the site for potential release from the Green Belt (Policy HS3) and has allocated the site, as part of a wider Housing Allocation (ref HS2.71). • There are no physical or other technical constraints which would prevent the development of the site for housing. • The Indicative Masterplan establishes key design principles which would ensure the development responds positively to its context – preserving the existing woodland on site, protecting the amenity of neighbouring residents and achieving a durable new boundary to the surrounding Green Belt. The emerging masterplan for the wider housing allocation will enforce that this site is fully integrated into the development proposed to the north, building upon these key principles. <p>Land off Exchange Street represents a sustainable, logical opportunity for housing development on the edge of Edenfield. It is ideally placed to</p>

						<p>contribute towards meeting local housing needs in the village and across Rossendale as a whole.</p> <p>The site is being actively promoted by the landowners and is considered capable of delivering around 90 new homes in a manner which responds positively to the context of the site and surrounding area.</p> <p>It has been demonstrated that the site is eminently suitable for release from the Green Belt and should be allocated for housing in the new Local Plan. The site is available, suitable, achievable and therefore a deliverable site, capable of facilitating new homes in the short term.</p> <p>Please see appendix.</p> <p>Appendix B: Highways Note prepared by CBO Transport</p> <p>1 Introduction</p> <p>1.1 CBO Transport (CBO) has been commissioned to advise on the potential for residential development on land at Exchange Street, Edenfield. The location of the site is shown in Figure 1 and the Title Plan is shown in Appendix A. We have been to site to inspect the local road network and the access arrangements to the site.</p> <p>1.2 The land appears to have been undeveloped and forms the grounds of a large house which we understand is owned and used by the Methodist Church. We understand the site has the potential to accommodate about 90 dwellings.</p> <p>1.3 Access to the site is currently from a continuation of Exchange Street as shown on the Title Plan. Exchange Street is a residential road and forms part of an area of residential development located to the south west of Edenfield village centre. The area of residential development has two points of access to the wider highway network, via Exchange Street on the B6527 Market Street and via Eden Avenue on the A680 Bolton Road North.</p> <p>1.4 The A680 Bolton Road North links with the A56 at the junction at the north end of the M66. There is no access to the motorway heading southbound but most traffic from Edenfield heading south to Greater Manchester would use this junction. Similarly traffic heading north to Rawtenstall and the East Lancashire towns would use this junction.</p> <p>2 Accessibility of the Site</p> <p>2.1 The site is located to the west of Edenfield village centre. There are local services in the village centre which would be about a 400m walk distance to the western most parts of the site and closer to the eastern sections. There is a primary school to the north of the village.</p> <p>2.2 There are bus stops in the village centre which provide services every 15 minutes to Bury and Ramsbottom to the south and Rawtenstall and Backup to the north.</p> <p>2.3 In the context of a large village location the site is in an accessible location and suitable in transport terms for residential development.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>3 The Local Road Network</p> <p>3.1 Exchange Street runs east west from the village centre to the site access. It is a residential street with a relatively high level of on street parking. Most of this parking is associated with frontage property but it appears to be also used for parking for the village centre. Photo 1 shows Exchange Street looking west towards the site from close to the junction with Market Street. Photo 2 shows Exchange Street looking east from the site access.</p> <p>3.2 There are no waiting at any time (double yellow lines) in the vicinity of the junction between Exchange Street and Market Street meaning the on street parking does not impede traffic at the junction. The junction corner radii at the junction are relatively small and visibility onto Market Street is limited. That said the junction is consistent with the village centre environment and there have been no injury accidents at the junction in the past five years.</p> <p>3.3 At the eastern end there are footways on both sides of Exchange Street but at the western end there is only a footway on its southern side.</p> <p>3.4 Photo 2 shows the junction between Exchange Street and Highfield Road which is some 30m to the east of the site access. Highfield Road is also a residential road and provides a link to Eden Avenue which in turn provides access to the A680. Photo 3 also shows the junction between Exchange Street and Highfield Road looking south along Highfield Road. There is less on street parking on the northern section of Highfield Road but closer to the junction with Eden Avenue the level of on street parking intensifies.</p> <p>3.5 Eden Avenue is also a residential road with some on street parking. Both Highfield Road and Eden Avenue have footways on both sides of the road.</p> <p>3.6 The junction between Eden Avenue and the A680 also has tight corner radii and visibility is restricted to a degree by frontage walls and on street parking. There have however been no injury accidents at the junction in the past 5 years. There have also been no injury accidents within the residential area formed by Exchange Street, Highfield Road and Eden Avenue.</p> <p>3.7 The 30m section of Exchange Street between the Highfield Road junction and the site access only provides access to the site – there is no access to any other property from this section of road. As such this section of road has been somewhat neglected and there appears to be no footway on either side of the road and the carriageway appears to narrow as it approaches the boundary wall of the site. Photo 4 shows the site access and the access road narrowing as it passes through the boundary wall of the site.</p> <p>3.8 On close inspection however there is evidence of a former footway on the south side of the road as shown in Photo 5, where there is an old back of footway edging kerb just visible.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>3.9 This is an unusual section of road which could potentially be not or only partially adopted. To understand to what degree this could effect a future residential access to the site it was necessary to understand the extent of adoption. In this context the adopted highway details have been obtained from Lancashire County Council and these are shown in Appendix B.</p> <p>3.10 The plan shows that this section of road is adopted and that the unmaintained footway on the southern side of the road is included within the adopted highway. The line of adoption extends to the boundary wall of the site and therefore includes the section of unmaintained carriageway in front of the wall.</p> <p>3.11 The existing site access runs through a gap in the boundary wall and serves the existing buildings on the northwest corner of the site. The access track is not adopted but it does form a public footpath which runs along the eastern and northern boundaries of the site. The track and public footway extend to the north of the buildings and cross the A56 on a narrow bridge. The road over the bridge is not adopted and therefore the access via Exchange Street is the only existing connection to the public highway.</p> <p>4 Access Opportunities</p> <p>4.1 The extent of adoption on Exchange Street means that the public highway can be extended into the site without constraint from third party ownerships.</p> <p>4.2 The existing carriageway width of Exchange Street is some 5.5m wide (as measured on site) which is standard width for a residential road and would pose no constraint to the development capacity of the site. The normal assumption is that at least 100 units can be served from a residential road of this width without an emergency access (many authorities would accept a lot more than 100) and that with an emergency connection a 5.5m wide road can serve a lot more.</p> <p>4.3 There is only a footway on the south side of Exchange Street. This is not considered to represent a constraint to the capacity of the site. Even with 90 units on the site this would be a very lightly trafficked section of road and therefore requiring some pedestrians to cross the road to use the footway would not be a material road safety concern.</p> <p>4.4 The Plan in Appendix C shows the principle of extending Exchange Street into the site to provide access to a potential residential development. Footways could be provided on both sides of the road within the site with a crossing point provided in the vicinity of the site boundary to access the existing footway on the southern side of Exchange Street.</p> <p>4.5 As there are no other points of contact with the adopted highway the use of the existing access represents the most straight forward approach to providing access to the site and based on the above would not represent a constraint to the capacity of the site. The only other option would be to acquire frontage property on Eden Avenue on the southern boundary of the site and provide an access to Eden Avenue although based on the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>above analysis this is clearly not necessary.</p> <p>4.6 It would of course not be possible to provide an access to the A56 even if the western boundary of the site was contiguous with the highway boundary.</p> <p>4.7 A development of 90 units would generate about 35 trips in the peak direction during the busiest hours (out from the site in the morning and returning in the evening). There are some constraints in the local network as referenced above, including the level of on street parking on parts of the local road network and the visibility constraints at the Exchange Street / Market Street junction and the Eden Avenue / A680 junction.</p> <p>4.8 However these roads and junctions provide access to a notable area of residential development already without an identified road safety issue - there are no recorded accidents on the local roads or at the two junctions – and the level of trip generation from 90 houses is unlikely to materially change this.</p> <p>4.9 In terms of restricted visibility at the junctions is also worth noting that research presented in Manual for Streets 2 did not find a direct link between visibility provision at priority junctions and safety. It questions the view that visibility levels below current guidance levels are immediately a safety concern and notes that the where drivers and cyclists on the main road have good forward visibility to vehicles using the side road (as is the case at both these junctions) they can adjust accordingly.</p> <p>5 Photos</p> <p>6 Summary</p> <p>6.1 CBO Transport (CBO) has been commissioned to advise on the potential for residential development on land at Exchange Street, Edenfield. The site has capacity for 90 units.</p> <p>6.2 In the context of a large village location the site is in an accessible location and suitable in transport terms for residential development.</p> <p>6.3 Access to the site is currently from a continuation of Exchange Street. This section of road has been somewhat neglected and there appears to be no footway on either side of the road and the carriageway appears to narrow as it approaches the boundary wall of the site. There is however evidence of a former footway on the south side of the road.</p> <p>6.4 LCC records show this section of road is adopted including the unmaintained footway on the southern side of the road and section of unmaintained carriageway in front of the boundary wall.</p> <p>6.5 The extent of adoption on Exchange Street means that the public highway can be extended into the site without constraint from third party ownerships.</p> <p>6.6 The existing carriageway width on Exchange Street is 5.5m. This would not present a constraint to the development capacity of the site.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.071	Further comment
						<p>6.7 The single sided footway on Exchange Street is not considered to represent a constraint to development. Even with 90 units on the site this would be a very lightly trafficked section of road and requiring some pedestrians to cross the road to use the footway would not be a material road safety concern.</p> <p>6.8 There are no other points of contact with the adopted highway. Other than the extension of Exchange Street into the site the only other realistic access option would be to acquire frontage property on Eden Avenue on the southern boundary of the site and provide an access to Eden Avenue. On the basis of the above analysis this is clearly not necessary. It would of course not be possible to provide an access to the A56 even if the western boundary of the site was contiguous with the highway boundary.</p> <p>6.9 A development of 90 units would generate about 35 trips in the peak direction during the busiest hours (out from the site in the morning and returning in the evening). There are some constraints in the local network but with a trip generation of this level these are unlikely to restrict the development capacity of the site.</p> <p>Figure 1 Site Location Appendix A: Title Plan Appendix B: LCC Adoption Plan Appendix C: In Principle Access Arrangement Appendix C: Joint Statement prepared by The Methodist Church, Taylor Wimpey and Peel Holdings in respect of Policy HS3 and associated Opportunities and Constraints Plan</p> <p>Please see appendix.</p>

950	Stuart	Thompson	None	SHLAA16273	Object	The site and volume of housing proposed will dramatically increase the burden on local site infrastructure such as schools, healthcare, road infrastructure. - - Lancashire County Council have already stated that the funding available to further develop these type of services are scheduled to be cut, not increased, in the coming years. This will lead to an unmanageable overload and therefore a deterioration in educational and health provision to the current population which would be significantly exacerbated should the population increase. - - A demonstration that funding will be available and all additional support services will be developed/improved from their current condition needs to be clearly stated by local, county and central governing bodies. - -	-

270	Stephen	Terry	-		Object	This whole plan is unacceptable as the scale of the development and the number of houses proposed would radically change the character of Edenfield village		Hi, I am a resident of Edenfield and have been horrified to find out about the development proposals to add around 500 new 'units' or homes to our village, as it will destroy the village as we know it and much of the Greenbelt land that generations of residents to Edenfield and surrounding communities have enjoyed. I also do not see any proposals to help the local schools cope with the extra influx of pupils or any plans to deal with the extra traffic this will inevitably cause. Also the ecological impact will be devastating and irreversible! With the land in question being used by Dear that I see on a regular basis as well as other wildlife such as birds of prey As well as the destruction of plants and trees that provide the community with a much need link to nature. The only reason I can see that this development is even being considered is so the council can make money off selling the land and then continue to reap the extra revenue of extra council tax payments with no consideration to the current residents of the village or the future of the community this development will destroy. Regards,

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.073	Further comment
338	Janine	Hartley	-		Object	<p>I object to the sheer scale of development proposed for Edenfield, particularly the sites mentioned above. - I understand that Edenfield has been chosen as the main site for new housing in Rossendale, due to its perceived desirability. However, this desirability is largely due to the fact that the area is not overcrowded or dominated by housing. Should these plans go ahead, this will no longer be the case. - I firmly believe that these proposed plans would have a radical, detrimental effect upon the character of Edenfield. It is a small village and simply will not cope with such a vast amount of new housing.</p> <p>Letter received 18/09/2017: I write about the Council's Local Plan. It is my understanding that you plan to ask the government to remove large amounts of land around Edenfield from the Greenbelt, so that it can be built on. I am particularly concerned about the following areas: Land south of Wood Lane Land west of Market Street Land off Exchange Street Land off Blackburn Road Land west of Moorlands View These are covered by references HS2.73 and HS2.71 in the local plan I object to these proposals on the grounds that the scale of the plans is too large. If carried out, these plans would ruin the character of our village and put unmanageable pressure upon schools and health services in the area. While I understand that there is a need for additional housing in Rossendale, I feel it is unfair that Edenfield should be singled out as the primary area for this, particularly as it is such a small village, which would suffer significantly under such wide-scale change</p>

349	Jonathan	Casey	-		Object	<p>My objection is to the scale of development proposed for Edenfield. - I understand that the area has been singled out as the main site for new housing in Rossendale, because of the desirability of housing in Edenfield. - In my opinion, this desirability is largely due to the fact that the area is not overpopulated and has a significant amount of green belt land, which comprises unspoilt scenery. Should the proposed plans go ahead, this would be ruined. This would destroy the character of Edenfield (as it is only a small village to begin with) and would reduce the value and desirability of housing in the area. - There would also be a detrimental impact upon schools, dentists and GP services in the area, as the village simply isn't large enough to cope with such a sudden increase in its population. - -</p> <p>##### LETTER COMMENTS #####</p> <p>I write about the Council's Local Plan. It is my understanding that you plan to ask the government to remove large amounts of land around Edenfield from the Greenbelt, so that it can be built on.</p> <p>I am particularly concerned about the following areas:</p> <p>Land south of Wood Lane Land west of Market Street Land off Exchange Street Land off Blackburn Road Land west of Moorlands View</p> <p>These are covered by references HS2.73 and HS2.71 in the local plan</p> <p>I object to these proposals on the grounds that the scale of the plans is too large. 950	Stuart	Thompson	None	SHLAA16270	Object	The site and volume of housing proposed will dramatically increase the burden on local site infrastructure such as schools, healthcare, road infrastructure. - - Lancashire County Council have already stated that the funding available to further develop these type of services are scheduled to be cut, not increased, in the coming years. This will lead to an unmanageable overload and therefore a deterioration in educational and health provision to the current population which would be significantly exacerbated should the population increase. - - A demonstration that funding will be available and all additional support services will be developed/improved from their current condition needs to be clearly stated by local, county and central governing bodies. - -	-

1018	Paul	Turnbull	Turnbull Prints Ltd		Support	<p>On behalf of the land owners we support the allocation of this site for residential development. - The site, due to its location, does not serve any of the purposes ascribed to Greenbelt as outlined in paragraph 80 of the NPPF. The site also already has had the the benefit of a planning permission permission for redevelopment (2004/513) which established the suitability of the site for residential use. There is acknowledged local need to see the site brought back into use. - The land owners are committed to bringing this site forward for development within the 1-5 year period, not the 6-11 year period suggested in the SHLAA. To assist in this process the land owners have already commissioned surveys and reports including: - Highways report and access design; Topographical survey; Ecological survey; Architect layout design and site masterplan - The site can accommodate between 30 and 35 units. - The site is adjacent to SHLAA site 16270. The proposed allocation of this adjoining site for development will allow for the simpler and more effective redevelopment of both sites. In particular the possibility of creating an alternative access to Edenwood Mill will give greater flexibility over the future design response to the mill site and remove one of the main constraints identified in the SHLAA site assessment . There are practical benefits in developing proposals which deal with certain technical matters which affect both sites such as drainage, access and services. It is most likely that the sites would come forward together in the 1-5 year period. - The extent of the brownfield element of the site is incorrectly shown on the proposed HS2.73 site designation. The extent of the previously developed land is much greater and includes the mill pond, outbuildings and hardstanding areas. An initial assessment of the site potential shows it can accommodate up to 30 units. The site area plan needs to be corrected to include all the PDL, and the number of units increasing to match the potential 25-30 units supported both the site area and the previous consent. A separate plan has been provided to show the correct extent of the site and has been sent via email - The site is deliverable, available and suitable for new housing and it's allocation for housing would result in new homes being built on site early in the plan period. The principle of at least 25 units on the site has already been established by the previous consent.</p> <p>Please see map in appendix.</p>		-

1020	Liz	Faulkner	-		Support	<p>On behalf of the land owners we support the allocation of this site for residential development. - The site, due to its location, does not now serve any of the purposes ascribed to Greenbelt as outlined in paragraph 80 of the NPPF. The site location (following the completion of the road network) means that its allocation as greenbelt is now totally inappropriate. The site also already has the benefit of a full planning permission for redevelopment of part of the site for stables. - The land owners are committed to bringing this site forward for development within the 1-5 year period. To assist in this process the land owners have already commissioned surveys and reports including: - Highways report and access design - Topographical survey - Ecological survey - Architect layout design and site masterplan - The site is relatively level, easily developed and can be accessed without any major infrastructure alterations from Wood Lane. - The site can accommodate between 17 and 25 units. - The site is adjacent to the derelict Edenwood Mill (SHLAA 16271) which has a historic planning consent for redevelopment. The allocation of site SHLAA 16270 will allow for creation of links between Edenwood Mill and the site, allowing for the simpler and more effective redevelopment of both parcels. In particular the possibility of creating an alternative access to Edenwood Mill will give greater flexibility over the future design response to the complex mill site. This benefit in delivering the wider site redevelopment should weigh heavily in favour of the site's forward allocation for development. The site can however be developed independently of Edenwood Mill if required, being accessed directly off Wood Lane. - The site is deliverable, available and suitable for new housing and its allocation for housing would result in new homes being built on site early in the plan period -</p>		
1415	Simon	Parker	-		Object	<p>The proposed building of homes in Edenfield would cause the village and surrounding area to be in gridlock. The roads through and around Edenfield are currently most difficult to use at most times of the day and at the start of school and end of school they are even worse. Edenfield has not got the capacity for any more houses. The roads are not capable carrying any more traffic</p>		
1468	Melanie	Goedhart	-		Object	<p>Edenfield Village will be changed from a country village into a sprawling housing estate. Greenland should be left as Greenland otherwise what makes this area so beautiful will be destroyed. - The traffic is currently busy and this amount of extra housing will cause gridlock around the roads leading to the M66 and the by pass. - Travel times to Manchester have doubled since I moved into the area 20 years ago. - - Parking on the main rd in Edenfield is already an issue for the current residents with cars parked on both sides of the rd. - The Rostron Arms has even installed a paying car park! - There are not enough schools or GP surgeries to accommodate such a large amount of new houses. - - I am amazed and appalled that this new building development is even being considered</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.073	Further comment
1641	Bob	Crawford			Object	<p>I write to object to the development of the above parcels of land within Townsendfold and Edenfield on the basis of the following;</p> <ul style="list-style-type: none"> •At a high level the core strategy plan maked reference in the 2010 consultation of the importance of the development of a rail commuter link to Manchester and the current core strategic objective number 1, SO1-makes reference to public transport improvements; •Both of these aspects therefore have to be considered vital to the sustainable development of the area; •By developing the land parcel within Townsendfold/Edenfield we immediately reduce at best or even potentially remove any future option for the communication corridor alongside the M66 to be able to accept a tramline or trainline enhance commuter system; •This strategic level error also does not support other strategic objectives such as S07-enhancement/protection of natural environment- we destroy the natural environment by developing houses on greenbelt land-removing soil/habitat/biodiversity which is vital to the ecosystem should we build on these landbanks; •We also do not include narrative that states we will deliver "no net loss of biodiversity" in the acceptance criteria for developments-therefore the commitment to such aspects in the plan is simply not strong enough or indeed well aligned between strategy and implementation plans; and •The plan states that we have 122 hectares (2008)-which is obviously not been fully developed in the period. The document states states some 300 brownfield sites have been considered but many have significant constraints (no details are supplied),which I consider to be insufficient information; and •By way of background I work for a business that deals with Sustainable Development (SD) and if we accepted such aspects without bringing new ideas and innovation to such projects on how to overcome the constraints, we would have no business. <p>I would suggest that the Council fully address such aspects in relation to the brownfield area before any amount of area of greenfield land is considered-no matter what pressure is on to provide additional affordable homes.</p> <p>I would equally suggest that the issues indicated with the current housing stock be tackled-even if it means private business money to improve the energy/carbon/quality aspect of the stock before more affordable homes are built. It is simple too easy to build more and not face the problem, head on. There are businesses out there that would consider funding and delivering such projects should the Council seek dialogue.</p> <p>I hope the feedback is considered in a positive light. It it not meant to be any criticism of the Council in any way.</p> <p>But to deliver ecological development of human ecosystems an approach known as the "Stadt-schaft principle" is best practice and I would recommend</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.073	Further comment
						that the Council consider such within the current approach to SD. Red, amber, green type assessments for SD as exhibited within the plan do not go far enough-even at outline levels. I am afraid to say I am unable to accept your development proposals.		
1820	Kelly	Holt	Lancashire County Council		Not Applicable	HS 2:73 – Proximity of site access to J1 M66 and visibility splay requirements for actual road speed (40mph speed limit) Wood Lane are a concern. The development of the site limits the possibility of a southbound on slip road onto the M66 at J1.

1325	Hannah	Dunne	-		Object	I object to the proposed housing development for the following reasons: - - Environment: there appears to be no consideration for the green belt and how taking this away from the local residents will impact them. Edenfield is a lovely place to live due to the fact that it is surrounded by greenery. the impact of the proposed housing will also impact the wildlife, there are deer that frequent the valley and a number of hares that have been spotted in the proposed development area. the impact of additional traffic on the area is also of concern with an increase of air pollution in an area where there are a number of primary schools and children. - - Traffic: there are already problems with the M66 highway on a weekday morning traffic has been backed up to edenfield. with 400+ houses proposed there is likely to be an unsustainable impact on the traffic. There would need to be a complete rethink on local traffic issues in the village which have not been issued as part of the plan. I cannot support this kind of pressure on the traffic and therefore the infrastructure of the villiage. - - Local Services: there are currently 2 primary schools that serve edenfield that are already over subscribed. There would need to be a rethink as to the impact of such a development on the local community and how the propsoed families would be supported. - - access to the site: there appears to be only one point of access to the housing development which raises concerns as to the traffic system in Edeneild and also access for emergency services. - -		Edenfield is nice place to live by virtue of the fact that it is a villiage. Should this propsoal go ahead then it would change the face of the village

Reference		HS2.076		Land at Snig Hole, Helmshore				
449	Alexandra	Buchan	-		Object	I feel that building on this site will be extremely detrimental to the local area as it will 1) destroy land that is currently used for grazing sheep 2) will create a higher volume of traffic on an already very busy section of road 3) possibly create further parking congestion 4) may create a greater use of the pedestrian pavements for leaving rubbish bins out for collection 5) will completely ruin the outlook over this land from the surrounding buildings.		I think that the use of green belt areas for developing new housing is entirely unnecessary when there are plenty of derelict buildings an abandoned pieces of land that would benefit from redevelopment and would have a greater, more beneficial impact on the area.
524	Susannah	Penney	-	HS2.76, HS2.77	Object	Too many houses in an area of countryside already.		-

572	H. Keith	Smith	-		Object	<p>The site is in Green Belt and in this sensitive location should be kept as such. - - The land is not easily developable due to access restrictions and the steepness of the site. The access sight lines off Helmshore Road will be severely restricted by the bowling club retaining wall. The access of the lane to Snig Hole is part of a bridleway and cycleway B6. - - It is public land donated by the Poritt family for the people of Helmshore and as such requires the villagers' permission. The Poritt family would not have wished that others would profit from their generosity to the people of Helmshore. - - The lane is narrow, has just this year been resurfaced thanks to LCC. The subgrade of the road is non-existent and there are very large regional distribution services under the lane. The site cannot therefore be developed sustainably. The increase of houses down this lane will endanger walkers, horse riders and children and is a Health and Safety risk to all. - - People use this lane to access the beautiful park and river walk down to Irwell Vale and beyond to Ramsbottom and Bury. It is the start of a 'country park' heritage landscape which is much appreciated by all residents of Helmshore. - - This field is part of the ambience of the place and the Holme Vale and should be the last site to be developed in Helmshore. - - Green Belt should not be released for development except in very special circumstances. These are NOT special circumstances and will only benefit a very few people who only have their own interests at heart, who do not care for their neighbours, the heritage in the village or the natural landscape that we have access to in Helmshore. -</p> <p>Letter received 23/09/2017: I wish to make the following comments which relate to the above site referred to in the current Local Plan Review. This village of Helmshore has undergone many changes in the last 30/40 years. There have been many houses built, principally on large estates on Green Field sites but outside the Green Belt. There has also been selective infilling on Brown Field Sites. The local authority has been mindful in the past of the value of the Green Belt which was created to protect the unrestricted sprawl of large built up areas, to assist in safeguarding the countryside from encroachment, to preserve the setting and special character of (historic) towns and to assist in urban regeneration by encouraging the recycling of derelict and other urban land. In particular the tract of land known as Snig Hole Park/Holme Vale is located at the north west tip of a large section of land which comprises the Green Belt P30,31 and 42. For the residents of Helmshore it is the start of a much appreciated, unique valley which wends its way down to the hamlet of Irwell Vale. This is considered not only an asset of the village but also a place for recreation for people who live outside the immediate area. The sides of the valley (or vale) are formed initially by fields (including the land</p>		I request that the council impose tree preservation orders (TPOs) on all trees that are within and in the proximity of this site so that they are protected from felling and lopping without the council's permission. - - This to protect the parkland setting from any further wanton destruction.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>HS2.76) to the immediate north east together with the former railway cutting and the river, allotment gardens, B6214 and more fields bounding the south west side.</p> <p>Environmentally the park is framed and protected by the adjacent land, there being very little of the surrounding existing development evident due to the topography and landscaping. This is an important and valuable asset. Visually the adjoining fields are seen as very much part of the pastoral scene which is experienced the moment a visitor walks through the park gates. The park which was originally donated to the inhabitants of Helmshore by the Porritt family, together with its setting forms a distinct, identifiable whole which has been left intact for many years.</p> <p>Please refer to Google Earth screen shot Docs. 1A and 1B where the integrity of the park and its setting can be readily appreciated.</p> <p>It can also be seen how the annexation of site HS2.76 which is surrounded on 3 sides by green Belt, could be termed piecemeal development, thus initiating the erosion of the green belt which at present has a clearly defined, regular boundary. If this land is given over to housing there is very little reason why other neighbouring land would not eventually suffer the same fate. In this location it could be the thin end of the wedge.</p> <p>The residents of Helmshore must decide whether the council is acting in the best interests of the people. If they believe that the officers have not made a rational decision in promoting site HS2.76 for housing they must lobby for it to remain the green belt.</p> <p>Please refer also to photos numbered Docs 2-11 inclusive which illustrate the important part that this plot plays in the general character of the area and street scene over the space of only 2 hours on Sunday morning, 17th September 2017 I collected a sample of 52 no. signatures from walkers and passers-by See Doc 12.</p> <p>Very few people refused to sign the petition and it was noteworthy that the people who did decline gave reasons such as "it won't do any good, they (RBC) will do what they want to do" and "I haven't heard anything about it" many people who signed the petition gave the reason that "there were already too many houses in helmshore" and "it will be just more houses without the necessary infrastructure"</p> <p>The above comments not only indicate how little local people knew about the draft local plan proposals but also how passionately they felt about more land being allocated to new housing in particular with regard to site HS2.76, the senseless erosion of the Green Belt in this location.</p> <p>In recent years, due to the persistence and voluntary action of local residents spread over several years, Snig Hole Park has undergone a transformation. The childrens play area has been renewed, the football pitch drained and levelled and returfed, a riverside path complete with sculptures created and trees planted.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>Very little, if any, local authority money was used in this very expensive recreational project.</p> <p>Work carried out by Lancashire County Council in spring/summer this year on resurfacing and draining the single track lane down to Snig Hole (holme vale), which is not constructed to county highway standards, has completed this section of cycleway B6.</p> <p>It is well known that Rossendale Borough Council is very vigilant and unsympathetic towards illegal development, unapproved alterations to listed buildings etc so it seems very inconsistent that they are able to consider the piecemeal annexation of a very critical part of the green belt in this particular location. A site which could be considered part of the entrance to very important recreational area which extends all the way down the Irwell Valley to Bury.</p> <p>I submit that there are probably still more Brown Field Sites which have not been considered in other parts of the borough where redevelopment should take place as a priority not only to ensure economic regeneration but also to provide a decent environment, fit for the people who already live there.</p> <p>In their site checks for the local Plan Review RBC indicate whether the owners of the land are prepared to develop their plots and a time scale is indicated. It does not come as a surprise that owners of land in green belt welcome the change of use to housing land as the value of their land will increase beyond their wildest dreams. Their willingness to develop land in their ownership only indicates their insensitivity to the needs of their neighbours and the local community and their greed for the acquisition of personal wealth.</p> <p>I submit that the fact that an owner is willing to develop land in green belt should not influence its land use status, the release of this land for development or affirm/give credibility to its suitability.</p> <p>RBC have expressed their desire to identify 'sustainable sites' for new housing development.</p> <p>I submit that annexing Green belt land is neither desirable nor a sustainable use of land which should remain open for future generations and be considered a permanent, valuable asset for all time.</p> <p>We will not have a second chance.</p> <p>Site HS2.76</p> <p>The site is bounded on the north western boundary by Helmshore road (B6214), a single track lane leading to Snig Hole (Holme Vale) down to south western side, a public footpath to the south east, the top part of a private drive to Tor View Barn, Tor View Farm/Cottage and their access on the north eastern side and the Helmshore Bowling Green at the junction with Helmshore Road.</p> <p>The land is used for the general grazing of animals - a perfectly adequate use for good pasture. There is a small garden enclosure along part of the north eastern boundary.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>The land has bad vehicular access due to slight line restrictions uphill at the access to Tor View Farm/Cottage. The slight lines are severely compromised by the retaining wall for the bowling club/green on the northern corner of the site. Traffic proceeds both up and down the hill at a pace. There always residents cars parked on the uphill side of the carriageway which further restrict the road width at this point.</p> <p>The junction of station road/helmshore road is nearby which is also opposite the park entrance.</p> <p>Any access via the lane to Snig Hole is inappropriate as this is single track with no passing places. The lane surface was formerly unmetalled and has only a thin asphalt has been relayed this year by LCC as part of Cycleway B6.</p> <p>In any case the land is in public ownership, reserved for the use of pedestrians, horse riders and the residences that it serves. It is outside the jurisdiction of the owner(s) of site HS2.76.</p> <p>The land is regularly used by horse,riders and the residents of Holme Vale and Tor View Barn.</p> <p>There are large services present under the lane, notably a 14" (?) water distribution main, a gas distributor main and other unknown services.</p> <p>The lane is within the curtilage of the memorial park and public recreational area now under the jurisdiction of Rossendale Borough Council.</p> <p>You will recall that this land was given to the residents of Helmshore for their enjoyment in perpetuity by the Porritt family. Whilst there are probably no covenants known regarding the land's use, I doubt that the Portitts donated the land for the financial benefit (profit) of others.</p> <p>We, the residents of Holme Vale have striven to retain the stone park gate posts during the recent work on the lane. We have ensured that all 3 gate posts were retained, despite rumours that one was to be permanently removed. We lobbied RBC to ensure that at least a modicum of the stone sets were reinstated across the crossing, maintaining that these we 'part and parcel' of the original architectural character of park entrance. We think that we have achieved this without any support from RBC. We do not want the open, rural character of the land to be destroyed, nor do we wish the historic park gateposts and new setted crossing to be removed.</p> <p>The ground level within HS2.76 is high in relation to Helmshore Road. Any development with the site will be consequently at a high level and will compromise the prospect of the cottages along the north west side of the road. The prospect of the cottages along the north west side of the road. The prospect of Tor View farm/cottage/barn will also be affected.</p> <p>It must be born in mind however that the land under consideration is in the ownership of some ot those who live in this exisiting settlement. It is anticipated that there will be little objection to any change in the status of site HS2.76 or a proposed housing development as there clearly exists a bias towards the use of the land.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>Tor view cottages are well set along the crown of the sloping field. Whilst the field cannot be termed 'steeply sloping', it is by no means level.</p> <p>The land is frequently water-logged in the winter months and a suspected ground water spring issues onto the lane on the left hand side of the gated opening to the drive up to Tor view barn.</p> <p>The plot of land at the southern tip of HS2.76 is isolated by the drive up to Tor View barn. I believe that it is in a different ownership to the main field under consideration although this doesn't appear to be clear in the review. This portion has been used for poultry and latterly the grazing of ponies. The reason that it appears redundant is because the owner chooses to leave it like that.</p> <p>The construction of a menage has effectively cut this original parcel of land in two. The drive is a private drive being surfaced in mass concrete. It is not suitable for access to more than 1 no. dwelling.</p> <p>When planning permission was granted for the barn I believe that RBC insisted that a separate, independent vehicular access be created in order not to increase the traffic onto Helmsford Road at the northern point of the site.</p> <p>How is it possible that RBC can promote the development of site HS2.76 for 7 houses with identical access restrictions?</p> <p>I submit that upon consideration of the above facts site HS2.76 should not be taken out of the Green belt nor is it suitable for sustainable housing development.</p> <p>People who elect to live in the green belt do so because they value the protection that planning legislation provides. They appreciate that successive governments have attached great importance to green belts and that local authorities have a duty to plan positively to enhance the beneficial use of the Green belt. They are also encouraged to provide opportunities to provide access, outdoor sport and recreation, to retain and enhance landscapes, visual amenity and biodiversity.</p> <p>I submit that to allow the construction of new houses on this virgin site will achieve none of those things and furthermore it will undermine the very reasons why people choose to live within or adjacent to the green belt in this particular instance.</p> <p>I understand that current government policy is changing in the next year and the new housing provision required of Rossendale may be reduced thus providing an even stronger argument for this small site not to lose its green belt status.</p> <p>I would be grateful if you would give the above comments serious consideration when considering the realignment of the green belt boundary.</p> <p>Please see appendix for attachments</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
589	Stephen	Langridge			Not Applicable	4. HS276 Snig Hole, I can only assume that access to this site would have to be via the entrance to Memorial Park with the effect of increasing traffic flow directly adjacent to the childrens play area and the cycleway leading towards Raven Shore. Is the existing gateway be wide enough? or would that have to be 'got rid of'? Or maybe it would be a 'token' private road (as has already happened with the partial gating off of Sunnybank Road).		
593	Brian & Tess	Williams			Object	<p>We strongly object to the proposal to remove the field immediately located to the left of Snig Hole Park Gates from green belt.</p> <p>Our reasons are the following:</p> <p>Green belt is green belt and should remain so.</p> <p>The Council has a duty to protect the environment.</p> <p>The very successful children's park must be protected from additional traffic for obvious reasons.</p> <p>The Memorial Park should be honoured by not encumbering it with additional development and traffic.</p> <p>It is irresponsible to add additional traffic to a cycle way.</p> <p>Please consider that Helmshore does not need additional development. It is still bears the scars of its industrial past and the County Council has chosen to damage it further by closing the Textile Museum.</p> <p>Please consider the future character of Helmshore. Respect the green belt. Do not build on it. Do not make opportunist decisions which cannot be reversed.</p>

594	Colin	Mitchell			Object	<p>I consulted the draft local plan (2019-2034) with reference to the above number and I was horrified to note that part of the proposed development was my land. I had no knowledge of this and the whole thing came as a complete surprise and shock. I therefore ask that this development be withdrawn immediately until this matter is sorted out.</p> <p>I am so angry about this that I am prepared to take the matter further i.e. the courts if this is necessary.</p> <p>Even if this planning anomaly had not happened regarding my land, the fact that the development encroaches on a country park, that has had a great deal of money spent on it by local residents and is used by hundreds, especially in fine weather, would constitute a real danger to the public and a hazard especially to toddlers, mothers with prams and any small children using the park access.</p> <p>I understand that Lancashire County Council has designated this right of way as a special route for cyclists and horse riders and not an area that would have to cope with a housing development and all that that entails. With the proposed number of houses (7) there would be at least another 14/20 cars regularly using the park access and entrance.</p> <p>This parkland was given to Helmshore by the Porritt family as an amenity for the whole village to enjoy and use as a country park. It is part of Helmshore's heritage. The memorial garden is also part of this park, several hundred people attending services there each year. This therefore cannot be reduced to being a pleasant sort of access to some building site and future housing development without there being retaliation and hostility from Helmshore residents.</p> <p>Finally I require an immediate response by you, regarding the fact that my land has been included in this development without my knowledge and consent, realising that the final date for comments from residents is 6th October 2017 this becomes an urgent matter and needs your earliest response.</p>		
595	N	Ratcliffe			Object	<p>I have lived in Holme Vale for 25 years and seen the park developed into a lovely place for children. I have always been pleased that it is so well used and that many, many people walk their dogs down here.</p> <p>Despite driving very carefully and slowly up and down the lane I have had a couple of very near misses with children. One darting through the hedge and one running out from the path in front of their parents. I constantly wait for people to put their dogs on the lead. There are walking groups who go past with as many as 20-30 walkers and horses use the bridleway quite regularly. I just can't imagine any more traffic and would not like these young families and walkers to feel unsafe when it is an area specially created for recreation.</p>

607	Alan and Barbara	Phillipson			Object	<p>As a family we certainly object to the proposed planning HS276 the area around snig hole park to the side of Sunnybank Social Club.</p> <p>The area is a very busy area having constructed a very beautiful park for children of all ages.</p> <p>We live in Sunnybank Close which sees dozens of families not only at week-ends but every day after school, so much so there is a lot of dangerous parking at times.</p> <p>We have only just had a new crossing to make it safe getting to and from the park.</p> <p>I watched just yesterday a small low loader vehicle struggle to get between the old posts into snig hole, if any builder trucks use the only lane to and from the park children will be at risks.</p> <p>Only 3 weeks ago the Free Press made a point that a young 4/5 year old girl was unable to gain a place in a local primary school and Haslingden Health Centre is always very busy with appointments very hard to make.</p> <p>I also beleive this plot of land is Green Belt ?</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
633	Peter	Wilson			Object	<p>I wish to object to the proposals contained in the "Draft Local Plan(2019-2034)" for the following reasons: -</p> <p>1) Work was carried out this year to resurface and complete the cycleway, which runs down the single track access road to Holme Vale. This is also used by pedestrians (including small children access the park area, dog walkers etc), it is also a regularly used bridle path, vehicle access for the existing residents, vehicle access for any trades/ deliveries etc. This lane is also used for the Armistice Day Parade each year. Re-positioning the green belt boundary would allow the land to be developed for housing thereby increasing the amount of traffic onto this access road which is unacceptable, and could be considered dangerous. In addition the road joins Helmshore Road within the restricted "zig zag" area of the recently installed pedestrian crossing where due to restricted visibility due to existing buildings, and parked traffic there would be added dangers to all road users and pedestrians.</p> <p>2) Should development be allowed on the land in question, there would be a substantial visual impact as the land is at some height above the access road / memorial garden etc - this would take away the "enjoyment" given to the residents of Helmshore when the land was donated by the Porritt Family - not something I feel they would want! -</p> <p>3) I am led to understand that any refuse collection would take place from the access road for any new housing - creating an unsightly blot on the environment. This was also a reason RBC abandoned plans to force all Holme Vale residents to use rubbish bins sited at the entrance to the access lane previously.</p> <p>4) there have been a number of flooding issues over recent years, and any movement of the green belt boundary allowing development has the potential further exacerbate the flooding problem for the existing properties, as less land would remain to absorb and deal with the rainfall / water run off.</p> <p>5) The likely development is a small number of houses - 7 to 8- which could quite easily be sited on other brown field sites within Rossendale and alleviate the need to move the current green belt boundary. This could also be beneficial / could become part of any regeneration plans.</p> <p>6) Government policy is changing next year, and this I believe will reduce the requirement for additional housing provision. This as a stand alone issue, give RBC the opportunity not to include the area of land within the new Green Belt area. - -</p>		-
634	Christine	Wright			Object	<p>This site is not appropriate for further housing development. It is adjacent to a park which is well used but also has NO parking space. The Memorial Gardens are also an important facility for this area. - - There is very poor vehicle access to the site. Congestion on Helmshore Rd and Broadway would be worse, causing increased risk to children travelling to the 4 schools in the area. - - The local primary schools are already over subscribed.</p>		Helmshore and Haslingden have had huge amounts of building in the last 40 years, no extra infrastructure has been added. No extra school places, shops or family facilities. - - This area can sustain no more.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
641	Geoff	Woodall	N/A		Object	<p>This development would put a great strain on the adjacent road junction from Station Rd. - - This is already a problem area for parking, especially since the re development of the park at Snig Hole. This has proved a great success and is now used by hundreds of children a week. - Parking around Helmshore road and Station road has been an issue in recent months and using the junction ,especially coming from Station Rd to turn left up the hill is often dangerous. - On top of the current situation the local residents are eagerly awaiting the re opening of the old Bridge end pub with the extra call on parking that will be brought. Currently the public are using this private car park but will soon be unable to do so putting additional strain on parking spaces. - Regarding the matter of children using the adjacent park, I feel that these proposed new houses could add to mobile and foot traffic on the lane down to Snig hole and as this is only one car wide it will be dangerous as a lot of the children involved are quite young. - Another issue is the water run off, currently this area is a field and allows water to soak in but with houses and hardstandings this will run off down towards Snig hole lane and the river where we recently had flooding issues anyway. - Given these points I object to the development.</p>		
643	Owen	Stanton			Object	<p>This site could not be more unsuitable for the proposed use. The development would create safety issues to current users of this public right of way with the very real potential for injury especially as the only means of access is frequented by children and adults with infants .As you will no doubt be aware the adjacent playground (recently refurbished and improved) is a popular location not only for children resident in helmshore but since being upgraded has drawn families and children from further afield. This has resulted in increased traffic density both vehicular and pedestrian both on the highway around the access and along the lane itself. As you will also be well aware there are also high numbers of cyclists who travel along this lane and it is also popular with horse riders . The proposal would therefore detract from a very well used local amenity , place vulnerable members of the community in risk of danger or injury . The work required to develop this site would result in noise and disruption for the nearby residents non more so than t.. he people who live in what are refered to as Snig Hole Cottages. The proposed development would most certainly destroy the ambience of the Memorial Park which is one of the prime assets of the village. It is also worth noting that the Government strongly support the retention of green belt land EXCEPT IN VERY SPECIAL CIRCUMSTANCES . I do not feel the case has been made in this proposal to warrant that exception and would therefore like to register my objection to this proposal.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
655	Stuart	McDonald	-		Object	<p>Snig Hole Park Helmshore is both a Memorial Gardens of nearly 100 years and, more recently, a Country Park enjoyed by children and their parents as it is a protected environment in the sense that minimal road traffic, and occasional horse and bike traffic at weekends uses the access road. - - With the Country Park now containing a large and very well used play area for children, introducing a new housing area of approx. 7/8 houses, will bring at least that many cars and probably more. On top of that you will get visitors who will assume they can bring their cars too, especially as there is no public parking in the immediate vicinity. Visitors will, regardless on any traffic regulations, use the lane to park on and cause immediate chaos. Having additional road traffic using that access road will cause chaos and have the potential for conflict between road users and pedestrians. - Access to and from the road is uncontrolled and, being by the recently installed crossing, will bring additional chaos to an already busy Helmshore Road at virtually any time of the day or night. Adding extra traffic will only exacerbate that situation. - - The Snig Hole Park also has a Memorial Gardens that is well used by us locals at all times of year and especially so on Remembrance Sunday when it is taken over by the annual commemorative event. - -</p>		<p>Helmshore is already over populated and an infrastructure that has not been upgraded to cope with the additional populace of recent building projects in the village. - - The area in Station Road, closest to the junction with Helmshore Road, is still chaotic at the best of times and especially so when the weather is good as this attracts parents and children to the park. Regardless of the token parking restrictions, parents still park wherever they can and invariably ignore these parking restrictions as there is no one to enforce them. Introducing potentially additional traffic to that area will only make it more chaotic and, with a constant flow of children in the summer months there will be an accident. - - The landowner obviously has no care for the local community and has seen an opportunity make a profit from selling land that they are unable to, or unwilling, to cultivate or landscape. With the obvious slope of the land, both towards the lane and the main road, none of the proposed building will fit in with the current image of Helmshore as a village - traditional, local, and not too busy. As residents, whilst we accept that we live in a modern society, we don't like building something just for profit. As council, you just sign it off; we have to live with the after effects of more people, more cars, etc.</p>

657	Ruth	Povey	-		Object	As a life long resident of Helmshore I have always enjoyed the open spaces and country feel to the area, as it is part of the character of the village. Building houses would take away the character of the village but also create so much more congestion on roads that already struggle to cope with the through traffic and amount of expansion so far. - - Do not build at snig hole, please be considerate to all of the existing residents.		-
658	Charlotte	Lees	-		Object	I struggle to see how this site can possibly be viable and make any meaningful difference to the 'apparent' requirement for additional housing in Rossendale. It is relatively small and very sloped. - - Access to Snig Hole Park is already extremely poor, with parking on the road for people wanting to go to the park meaning that the main road is already very congested. The access is also at a busy junction. Additional housing would make this extremely dangerous, particularly for children walking to and from school, and also who are going to the park. - - It is also a beautiful area of open land which leads on to Snig hole park and then goes down to Irwell Vale. This is a cycling route to Ramsbottom which has recently been invested in, and what is proposed would make this dangerous for cyclists and walkers alike. - - It is absolutely ridiculous that anyone can think building on there is a positive thing to do for Helmshore.		-
659	Lauren	Taylor	-		Object	I don't support this application, due to the location. The area can become very congested, and with it being so close in proximity to the playground, development on this land would make the problem worse. The area is a lovely green space.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
664	Miles	Holt	-		Object	The proposed alteration of the green belt and the subsequent development of this site is an unnecessary and unacceptable situation for the residents of Helmshore. - There are several issues with the site being developed : - a) The area adjacent the site is a public space, and is enjoyed by local families. - b) Any additional traffic entering Helmshore Road from this site would cause a critical risk to pedestrian and other road users. - c) The site is surrounded by open fields and farms, and any development would cause a deterioration of the overall natural landscape and wildlife and farm animals. - d) Any additional services that would be required would add unnecessary traffic and risk to the locality. - e) The surrounding area to the site is a bridle way and part of the national cycling route. Any development of the site, with the added traffic would cause a detrimental impact to the walkers, cyclists and horse riders. - In summary, I represent the views of the overwhelming majority of residents. I haven't met one single person who supports the development of this site in any way. - It must be retained as part of the Green Belt. - The village is already full of housing, and simply cannot take any more development. It's a beautiful part of the county, and I feel I must stand up to this commercially driven initiative. - Rejecting this proposal is simply morally the right thing to do. - Please look elsewhere for this type of development, there are so many other brown field sites that need investment.		Please respect the wishes of the local residents that will be effected by the development of this site. - I just cannot believe that this site is being given consideration for a development of any kind. - Please do the right thing.
665	Julie	Darbyshire	-		Object	A high risk proposal to further develop an area so close to a very well used young children's playground. Access arrangements are totally impractical for this development.		-
668	Anne	Morrison	-		Object	We are rapidly running out of green areas in Helmshore. Every spare piece of land is being built on. The roads are very busy now due to all the new developments along Holcombe Rd and the primary schools at full. - We do not need anymore housing in Helmshore especially not on green belt areas.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
673	Rosemary	Kearney	-	SHLAA16384	Object	We strongly object to the above planning applications for a number of reasons. - - Helmshore as an area is struggling to cope providing the amenities at present with the residents there are at the moment. The local primary schools are already over subscribed and children from the area are having to attend school in other towns. - - There has been a lot of money (self funded) spent on Snig Hole play area which is a great place for children to play safely and away from the main road. If there are more houses built there, the new resident's cars will have to drive right past the area which is unsafe for children. - - The planning for Rossendale Golf Club on Greens Lane again affects local school children as Haslingden High School is located on Greens Lane. This road is already busy especially at school times and more housing will only exacerbate the situation. - - The land off Curven Edge is one of the only green grass areas that children can play on safely. Especially as the local playing fields have been fenced off on Helmshore Road. This area is known locally for holding water as a culvert flows directly under it so I would not expect it to be a good area for development.		-

697	Julie	Woods	-	HS279, hs278, hs278, hs277 hs276	Object	Helmshore village is being swamped with more and more houses and the roads and local services are becoming less and less able to cope. We have already seen huge building programmes including the Power Mill and the Loom on Holcombe Road, Weavers Dene, Alden Brook apartments and Broadway housing development which has only added to the pressure to all the local services. Trying to exit onto Helmshore Road from Fairhill or Curven Edge is already very dangerous due to the amount of traffic at peak times and raises real safety concerns due to visitors and new residents cutting through the village. Trying to get a doctors appointment is already difficult. The proposal of 15 houses on Greens Lane is so impractical. The traffic around St Veronicas and Haslingden School is so congested people are blocking in drive ways and making it impossible for residents to park. The road on Brooklands Avenue is so narrow it is impossible to pass at peak times and residents are already complaining to the schools about the parking issues. My main concern is Rosendale Golf Club who are now holding a meeting on 7th October to discuss selling the land at the rear of the houses on Cherry Tree Way. They have already sold the land on Greens Lane and are now proposing to sell the land at this location, they are threatening the players that if they do not vote for it that they will put up their golf fees. They have no consideration for the people who live in the houses on Cherry Tree Way and are basically blackmailing the players into voting for the decision to go ahead. Should this proposal go ahead the roads on the estate will not be able to cope with the additional traffic, (we are unsure where they are proposing to gain access) not to mention the value of our houses decreasing. I am very worried about this proposal for obvious reasons and where will it all stop if they are allowed to continue. We moved to Helmshore more than 20 years ago and chose the area because of the village feel, it was relatively quiet but had all the local amenities. The Golf course provides us with a green space between the continual growth of our village and we would like reassurance that they will not be able to continue to sell of land to greedy developers

733	Catherine	Palmer			Object	<p>I am writing to convey my deep concern about the proposal to build on an iconic area of Green Belt land adjacent to the Park and Memorial Gardens in Helmshore.</p> <p>This beautiful tree lined lane constitutes one of the few countryside walks now left in Helmshore that has not been ruined by modern development. The proposed site runs parallel to the single track lane recently designated as part of the National Cycle Network from Helmshore to Irwel Vale.</p> <p>There is a narrow entrance to the lane from the main, marked by historic Victorian pillars. The entrance is used by children going to the play area in the park, families with toddlers and prams, dog walkers, hikers, horses and cyclists.</p> <p>In addition, it is the only access route for 6 houses further down the lane , plus service vehicles</p> <p>The view while walking down the lane is stunning, marked by old stone walls, hedges and trees.</p> <p>On the left side (the proposed development) there is a view looking up over the field to a picturesque old farmhouse, set in natural surroundings of trees and bushes The field has always been used for grazing, mainly donkeys and sheep. Hundreds of people visit the park, and the walk because of the beauty of the scenery.</p> <p>The proposed development site is not a flat field, as indicated n the councils information, it is quite sloping - a hill in fact. The wall boundary of the field on the main road side is well over two metres in height to the surface level of the field.</p> <p>There is no viable access to the site from the single track lane due to the narrowness of the lane and its numerous users. To have access for traffic for housing would constitute a severe danger of accidents to pedestrians, including many children, bikers, horses, dog walkers etc</p> <p>In information given to the council the distance from the site to the park and play area was some distance away - in fact the site boundary on the lane is only 3 metres away - the other side of the lane in fact.</p> <p>The site would in no way constitute an easy development due to the limited access and additional traffic. The proposed yield of 7 - 8 houses appears unsustainable in any case, unless crammed in, with no space around and no viable access.</p> <p>It is quite ridiculous to think this area of Green Belt land could be developed in any case due to its proximity to the park and the country walk. Unfortunately the greed of landowners and developers is obviously a part of this.</p> <p>Surely there are lots of brown field sites in other parts of the Rossendale Valley that should be developed first rather than ruin one of the few remaining sites in Helmshore that constitutes the beginning of beautiful Green Belt land.</p>

						I very much hope that this does not happen		
745	Paul	Scholefield			Object	<p>I would like to formally object to the proposed development of the land next to Snig Hole.</p> <p>As a local resident (X Riverside Walk) I am concerned regarding the junction at the bottom of station road opposite Snig Hole.</p> <p>Also with young children obviously using the park there is insufficient access for more cars in and around that area. Indeed a new pelican crossing has only just been installed to facilitate safer crossing into the park. Furthermore numerous cars are already consistently parked on the pavement of Station Road, blocking access etc...</p> <p>As said I would like to formally object to any proposed development of the site and trust you will consider my concerns in any review of this proposed application.</p>		
748	Christian	Frost			Object	<p>I'm writing to object about the plan for future housing in Helmshore, both at the snig hole site and the curven edge site, I have lived in Helmshore for forty two years and have seen many fields and small areas of land built on, my concerns are as follows:</p> <p>Access from the side of the Sunnybank on to the main road applies both ways – in busy times this will cause problems</p> <p>Parking – residents struggle now, not to mention when the Bridge end re-opens</p> <p>Road safety for children/pedestrians – adding extra cars to the village</p> <p>Loss of green areas in the village – Helmshore was once a lovely little village with plenty of green areas</p> <p>Drains – unable to keep up with flood water now!! Drains not cleaned for at least the last two years</p> <p>Houses built which don't suit the surrounding area – weavers dene – built in yellow and orange stone – eye sore</p> <p>We don't have any flood protection anymore, so this means that low level housing will feel the brunt of it all.</p> <p>Local amenities won't be able to keep up with the increase of people</p> <p>Roads and pathways – Helmshore's roads and pathways are in a poor state of repair, this will only become worse</p> <p>For some reason Helmshore seems to be forgotten by RBC or it seems that way, footpaths are never cleaned, drains are full of road grit from two years ago when there were dressed, trees cover foot paths making it hard for people to pass with children and buggies. Surely we should address these problems before you add to them.</p>

749	Fred	Barlow			Object	<p>I have been looking at the proposed plans for helmshore,holcombe road area. (1) Land off curven edge;This bit of land is the only play area this estate has,it has a culvert running under it,the land itself is infill ,the site is an old lodge belonging albion mill,it was something like 30ft.deep at the road end and I would say totally unsuitable for building on.I also believe some of the infill came from the bleach works site at Holden Wood where it was considered unfit for building on.</p> <p>(2) snig hole site;This sight has got problems with road junctions ,the river, road access ,it has parking problems connected with Sunnybank social club,it is overlooked by the bowling green.This land is also GREEN BELT land. Both sites will suffer from lack of school places,Helmshore school is full up now.The bus service is hopeless.</p> <p>I would like to object to the Plans for the above reasons.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
756	John	Simpson	-		Object	<p>1. Site location: Unnecessary removal of site from Green Belt and alteration of urban boundary when there are sufficient Brown Field sites available. RBC should be looking at the development of former commercial premises in town centres to provide flats which would be more affordable for first time buyers etc. For example, in Haslingden there are the half completed flats in the former Roebuck pub in Lower Deardengate; flats above former NatWest Bank in Lower Deardengate; former Methodist manse on Manchester Road; empty flats above property at corner of Dale Street. A recently example of conversion of former commercial premises can be seen at 176 – 180, Blackburn Road, Haslingden, where a disused antique shop has been made into three houses. -</p> <p>2. Land ownership: Not in single owner. Not all owners agreed to the submission of the site in 2016. Therefore of dubious legality to put forward the site at all. -</p> <p>3. Legal constraints/ownership issues: see above -</p> <p>4. Topography (comments): Site is not 'virtually flat' -</p> <p>5. Vehicular access: Vehicular access to site would be along narrow lane to Snig Hole from a busy junction on Helmshore, which has recently been upgraded to improve road safety for pedestrians. More traffic here would create a dangerous situation both at the junction and along the lane. -</p> <p>6. The lane adjoining the site is being incorporated into National Cycle Route 6 and is already heavily used by walkers, cyclists and horse riders. An increase in traffic on the lane would have an adverse effect on this route and its users. -</p> <p>7. Ecological value: It is incorrect to say the site is not adjacent to a Biological Heritage Site. It is within a few hundred yards of the BHS at Snig Hole/Ravenshore and is connected to it by neighbouring fields and the Memorial Grounds (Snig Hole park). Nature does not recognise lines drawn on a map and the site is an important link in the Environmental Corridor that runs through Helmshore from Ravenshore via Snig Hole, Riverside Walk, former railway lines etc. No or few artificial fertilizers have been used on the field for at least 30 years which is likely to have increased its biodiversity. This is in contrast to the neighbouring Memorial Grounds, which, although part of the Environmental Corridor, have been more intensively managed. -</p> <p>8. Any housing development would have an adverse impact on the setting of Helmshore Memorial Grounds (Snig Hole park), the children's play area of which has been upgraded and is heavily used. This land was given as a memorial to men killed in the First World War and according to the deed of gift in 1925 includes the lane from Helmshore Road to Snig Hole. It would be unacceptable to take any land from the park to widen the lane or to allow the setting of the gateway at the entrance on Helmshore Road to be altered. To take land from the field to widen the lane would reduce the acreage and make a development unviable. -</p> <p>9. Constraints due to utilities: sewers, gas pipes etc. to neighbouring properties underlie the site. -</p>		<p>RBC should concentrate on the conversion of former commercial property in towns into residential properties: -</p> <p>1. High street shopping has changed with the number of supermarkets in the valley and online shopping. Towns do not need the same number of shop units. Banks etc which are closed are never going to reopen as banks and so again could be converted into apartments (at least in part, e.g. the upper storeys of the former Barclays Bank in Haslingden). -</p> <p>2. This would reduce the need to build on so much of the Green Belt as is proposed, especially if, as is alleged, central government has reduced targets for the number of new houses that have to be built. -</p> <p>3. Flats etc. would be more affordable for first time buyers, single people (one in three people in the UK now live alone) etc. -</p> <p>4. Such developments provide a realistic attempt to address the problem of the homeless, which three and four bed-roomed houses etc do not. -</p>

764	Chris	Aspin	Helmshore Local History Society		Object	Too near main road, children's playground and Memorial Gardens. Part of the vital green belt - alongside River Ogden. No easy access.		Helmshore has more than enough houses. More would place an extra burden of the local schools and the Health Service. More cars, more problems.
767	Suzanne	Moules	-		Object	At a time when open public spaces mean so much to local people, it seems such a shame to compromise a parcel of land so close to the park and a popular walking route, all for the sake of the building of just seven new homes. This is not a plea for more homes on the site, but for no housing development at all. - The road to the site is single-track and would have to be widened. This in itself will lead to loss of amenity. The increased traffic will be a hazard to pedestrians - particularly to the elderly and to children - and could well prove off-putting. The whole point of green spaces and parks is for the community to be able to enjoy them safely. Putting in a crossing to encourage such use is a waste of money if safety closer to the public amenity is compromised. - Dog walkers - myself included - enjoy the quiet beauty of this small but precious area. Why should it be threatened for so little gain? - Wildlife, which recognises no boundaries, thrives in this place. Does its habitat really need to be encroached upon and perhaps destroyed? - I would respectfully ask the Council to reconsider this Housing Allocation. The land in question is quite steep and therefore problematical. As it stands, it provides a green border that helps create a secluded area for public enjoyment and I urge the Council to allow it to remain as such.		-
795	Michael	Lord	-		Object	We don't need 8 more houses down a narrow lane opposite a very well used local playing area. Put these house somewhere else.		-
799	Sarah	Lord	-		Object	This is a pleasant narrow country lane, leading to countryside walks and a very nice children's play area, also the village WW1 and WW2 memorial monuments are located adjacent to this area. Adding more houses in this restricted area would ruin the surrounding area as well as creating traffic issues due to the restricted access. Helmshore only has 2 green areas left and current plans seem to be looking towards building houses on both of them.		-
831	Robert	McRorie	-		Object	Objection for the following reasons. - - Increased traffic - next to cycle path, bridleway and children's play area affecting the safety of all users of these leisure facilities. - - Noise and environmental pollution during works and also from increased traffic from the new homes. Along with unsightly bins. - - The memorial park / new play area is a recently regenerated area that has successfully attracted more children (accompanied and unaccompanied) who are the most vulnerable people in society to increased traffic which increases the risk of accidents.		I wholeheartedly object. - - There are other areas within Helmshore village where extra homes could be built that would not invite extra traffic into an area where there are numerous unaccompanied children playing en masse.

860	Stephen	Harris	-		Object	<p>This a greenfield site at significant height over the surrounding area and close to the Memorial Gardens in Helmshore. There is concern at the likely "domination" of that area by proposed new housing. Local residents have welcomed the long-awaited redevelopment of the children's playground at Snig Hole. However, this has unfortunately led to a significant increase in traffic around the area and major parking problems along Station Road/Bowl Alley, with visitors from outside the area travelling by car to use the playground. Very recently a zebra crossing was installed outside the entrance to deal with the increased pedestrian traffic. The construction of further properties would undoubtedly lead to further traffic and increased problems with vehicles parking. People visiting the playground have now resorted to parking also outside the row of terraced houses in front of Sunnybank Social Club (and also parking illegally on double yellow lines, creating a significant traffic hazard). An elderly lady (aged 97) lives in one of these houses and it has recently become very difficult for friends to stop anywhere near her house to pick her up and take her home again as there is sometimes nowhere nearby to park. It appears there will also be increased traffic problems through the narrow gateway to Snig Hole and a potential danger to children walking through. The large stone gate posts, restricting the width, are a notable feature which could not be removed as they have clearly been in place at least since the 19th century.</p>		<p>I object in principle to the proposed use of green belt land for housing, which should be kept as green belt, as originally intended. It seems to me that there are other possibilities, such as brownfield sites, which have not been satisfactorily explored. Also, there should be greater restrictions on the number of houses proposed in any given area. There seems to be a policy of "nibbling away" every few years at the established green belt. Ultimately</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
909	Alastair	Harris	n/a		Object	<p>I have major concerns about access and egress from the plan site development. Access can either be from Helmshore Road or from the existing service road which runs through Helmshore Memorial Park and Play area (locally known as Snig Hole). - [1] Access onto Helmshore road would be onto a downhill road with limited vision, parked residents cars which restrict the roadway and a few yards from a zebra crossing and road junction. The area is already a dangerous location and this would further compound the problem. - [2] The other access would be through the entrance to Helmshore Memorial Park and play area which is dangerous for a number of reasons. The service road which is not wide enough for two cars enters Helmshore Road at a Cross Roads with a zebra crossing. It is a busy junction particularly at peak times but also is at the foot of a hill with cars, vans, lorries and cyclists often breaking the speed limit. - Light controlled junction would be a great improvement however it does not solve the problem of a narrow one car entrance from Helmshore Road into the Memorial Park and play area. - There is a heavy footfall using the road in spring summer and autumn with children accessing the play area and dog walkers, cyclists and horse riders accessing the service road which leads through to Irwell Vale. The service road is also a dedicated National Cycle track and the increase in traffic flow from the 7 house development would cause problems as most houses nowadays have an average of 2+ cars per house. - It has taken 4 years to have a zebra crossing outside the park entrance however the preferred solution would be light controlled but there are technical issues to implement this which further compounds the risks.</p>		<p>The road traffic risks cannot be understated. It has been difficult to even get the zebra crossing because there is no incident history associated with the road junction beside where the 7 house development will be. - - The site traffic during the building stage, the extra cars when it is built and the general increase in traffic will put a considerable strain on the safe entrance and exit whether to the housing development or the play park. - - The development of the play park has increased the number of parked cars and between that, the bowling green, the development of the Bridge Inn as a Café Bar and retail unit will significantly increase the parked cars in the area. - - Helmshore Road is used as a cut-through by traffic from Bolton accessing the M66 and the bypass and Station road is a cut through for traffic from and to the Grane road and Blackburn / M65. - - Further housing developments in the area at Holden Pub will increase the traffic flow in the vicinity. - - The 7 house development will not make a paradigm shift in the traffic flows but will add to the traffic congestion.</p>

949	Philip	Lawson	-		Object	HS2.76 is in an area opposite a newly refurbished children's play area. The only access to the play area, and to HS2.76, is along a single car width lane off Helmshore Road. The entrance to this lane is in the immediate vicinity of a newly built pedestrian crossing on Helmshore Road. Since the parks refurbishment both the vehicle and pedestrian traffic has increased substantially and families with children have first to park(no provision for this) cross the very busy main road then walk along the single width lane (no footpath along this stretch) which itself is the only access to houses and cottages already established in Snig Hole so already has traffic issues. I believe this all creates a very dangerous access particularly as there are lots of children involved. Also moving the access away from this one would still be in the immediate vicinity and add to the dangers as above.		Infrastructure in this area is struggling to cope with the already present numbers of populous in terms of schools over-subscribed, facilities being closed, roads crumbling and dangerous, links to Manchester clogged and accident prone, police presence almost non-existent, doctors and dentist numbers too high with long waiting times. Funding from central government to LCC and RBC gets cut at each review so worsening the above situation and yet these proposals plan to add another 4000 plus homes to the mix? Either funding must be provided to get us into a viable, workable borough or this plan should be abandoned until central government realises 'the north' needs funding similar to 'the south'.
950	Stuart	Thompson	None	SHLAA16384	Object	The site and volume of housing proposed will dramatically increase the burden on local site infrastructure such as schools, healthcare, road infrastructure. - - Lancashire County Council have already stated that the funding available to further develop these type of services are scheduled to be cut, not increased, in the coming years. This will lead to an unmanageable overload and therefore a deterioration in educational and health provision to the current population which would be significantly exacerbated should the population increase. - - A demonstration that funding will be available and all additional support services will be developed/improved from their current condition needs to be clearly stated by local, county and central governing bodies. - -		
964	Joanne	Smithson	-	SHLAA16384	Object	This is ridiculous. Grane road has many well documented issues with regard to traffic and you want to build more property on nearby Holcombe road?? - Where will these peoples children go to school? We already have issues with families not getting their choice of school due to oversubscription! - What little green land we have we need to preserve!		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
973	Deborah	Haworth	-		Object	I object to more houses being built in Helmshore, and specifically on green belt land. It's already difficult to get an appointment at the doctors without more residents moving in. Our schools are already over subscribed. Our roads are already busy, the roads and pavements are already a disgrace they can't cope with more strain. Helmshore is supposed to be a village, it's fast becoming a town. We need to protect our green spaces, our wildlife and our clean air. We need to reduce carbon monoxide, road traffic accidents and the happiness and wellbeing of our residents. Is all you care about money? You need to listen to the residents of Helmshore, we live here, many of us were brought up here and are already shocked by how ,ugh it has changed. I'm only 45 but have lived here all my life and I'm shocked to see just how many more people and houses have appeared. Look after our heritage, if we need more residences then convert some of the old disused buildings rather than build on our green land killing wildlife and contributing to global warming.		-
976	Gillian	Stephens	-	SHLAA16384	Object	The access to Snighole Park is very restricted. The fact that the Park is heavily used by children and adults seems a ludicrous choice for building a large amount of houses. Helmshore is already bulging to capacity. The Schools are overflowing, the commuter links are virtual at a standstill. A journey which once took twenty five minutes will now take over an hour and half. It can some mornings take over ten minutes trying to get acces to the main roads from the side roads. Helmshore has been over developed for years and I would appeal to the Council to look at other options rather than devastate a small village. Please think of future generations and what sort of outdoor life will be available to them. An example of when people make snap decisions with hugh impacts was Mr. Beaching who closed the rail links and the road chaos now in place.		Please consider the views of the local people who inevitably know their areas better than the Councillors. You cannot keep allowing one area to be built on over and over again until there is nothing left.
983	Neil	Leeming	-		Object	That junction is bad at the moment building traffic the 15 extra houses will add to it. And it is right next to a play ground with children going back and forth, plus dog walkers, cyclist,and horse riders.		by building on green belt sites you are taking away our village way of life and wildlife areas within the village.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
996	Gillian	Bower	-		Object	<p>I am very concerned about any development on this site (Snig Hole) for the following reasons: - 1) Safety of park users (zebra crossing has already had to be installed in attempt to improve safety for park users.) There is already a substantial amount of traffic using this small lane to access the properties at Snig Hole. Parents with prams, toddlers and young people would be further endangered with even more traffic. - 2) This lane has already been made into a National Cycleway, B6, and is currently used by many cyclists who would be endangered by more traffic in this area. - 3) The track is also used by many horse riders on a daily basis as a connection route to Irwell Vale. Again, the safety of both riders and horses should be paramount. There are very few off road tracks available to horse riders, therefore this route needs protecting. Perhaps RBC could provide more off road tracks for horse riders. - 4) The Memorial Park needs to be a peaceful reflective place. The land including the lane and Memorial Park was given to Helmshore by Mr Porritt of Tor Side Hall for the benefit of the Helmshore residents and not to be used as a thoroughfare or housing estate. - 5)The park at Snig Hole is a 'country' park and should not be surrounded by more concrete and buildings. Our heritage should be valued and maintained not eroded. The fields and countryside are why people choose to live in Helmshore. I personally have chosen NOT to live on a housing estate or even adjacent to one and therefore resent any thought of a build in this location. - 6) The Green Belt has been moved by RBC to accommodate development on this site. We were promised by RBC that the Green Belt would not be moved and now it has been moved and there are new lines on the Local Plan to indicate Green Belt areas to include this proposed site for building. This means that the Green Belt is being eroded with subtlety, and as a Helmshore resident I wish this to stop immediately. There should be no encroachment into Green Belt land. - 7)The site in question is very boggy and excess water runs continually onto the lane so much so that Lancs County Council have tried to address this by installing extra drains along the lane. - 8) Dustbins are stacked along the lane for collections of refuse on Fridays. These are constantly being tampered with by people visiting the park especially when they are not emptied on time. More dustbins would cause more congestion and make the entrance into the park unsightly. - Local residents, "Friends of Helmshore" have paid for the park themselves (not RBC) and people travel from far afield to visit the country park. It is therefore not appropriate that such a pleasant park be surrounded by extra dustbins and rubbish which is unsightly. I remain very embarrassed at the number of dustbins cluttering the roadsides on the way into Hasingden from Baxenden. I would not like to be further embarrassed by more dustbins along Snig Hole. - 9) A housing estate or building in this area would devalue all the properties in the vicinity especially those overlooking the site in question. One local resident recently chose their property because of its outlook on to</p>		<p>The proposed site for 160 houses adjacent to the Grane Road will also impact on our status as a village and erode into our green fields. The unused derelict buildings should be redeveloped into affordable housing to avoid the expansion of more concrete and buildings. We wish to remain a village with open green spaces, countryside surroundings and pleasant views not a built up urban sprawl. - -</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						green fields and would not expect this to change. - 10) I don't think many Helmshore residents understand what RBC are planning for their village and have not been informed clearly enough about proposed changes. Viewings of the plans were not widely advertised and many people will not be aware of the proposals. -		
998	Jill	Jihkson	-		Object	Helmshore is already overdeveloped thanks to the Taylor Wimpey hideous estate on holcombe road. The roads are in a terrible state and too crowded you can't get off holcombe rd or up helmshore road. The schools are already at full capacity. There is not enough infrastructure to continually add hundreds more houses to this village. We have no train links. Just the bottle neck m66 - People need to listen to residents we have had enough we have no support from local council - Stop building in helmshore green belt before we have no green spaces left		Listen to the complaints that people are raising
999	Lindsay	Morris	-		Object	Loss of greenbelt - Inappropriate development on greenbelt land - Highway safety - Loss of visual amenity		-
1002	David	Morris	-		Object	Several of the 5 greenbelt tests have NOT been satisfied to justify the release. - 1. Purpose 3 - To assist in the safeguarding of the countryside from encroachment - - this area forms an important low density semi rural buffer to the countryside and would lead to further encroachments if allowed to happen - 2. Purpose 4 - To preserve the setting and special character of historic towns - - the area around snig hole park contains historical important features to the village and requires sensitive protection - 3. Purpose 5 - To assist in urban regeneration by encouraging the recycling of - derelict and other urban land - - the land is green and therefore would NOT assist. - - - In addition to the above fundamental reasons the site should be rejected on the following planning points:- 1. Highway safety - there is limited scope to create a safe access point into the site - 2. The immediate area has a number of conflicting road and pathway users being on the entrance to protected open space (Snig Hole Park), a national cycle way, pedestrian and horse riders. - 3. Inappropriate development in the greenbelt - -		-
1014	Geoffrey	Hallam	-	Land adjacent Helmshore Park	Object	This green land is part of the lungs of our village an open space near a park to breath in. Surely residents are entitled to have green space in their village and not wall to wall housing.		-
1019	Rachel	Dulson		SHLAA16384	Object	Helmshore is not equipped for additional homes to be built. Roads and schools are inadequate for the current population already. Current issues have not been addressed and now you are planning to throw even more people into the mix, as well as the disruption to traffic flow that building work brings. - Build us a new school, improve our roads and perhaps once that is done, redevelop the existing old buildings that are abandoned and in disrepair and then think about building new homes.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
1026	sheila	whipp	-		Object	Too much development in too smaller space. Too much traffic, dustbins etc. - Spoils immediate environment and countryside park used by many. - New cycleway destroyed. - All valued by those who live in the vicinity and village (at the moment).		I would have liked the time to think all this through, and I am wondering how many others are in my position and are not even aware of your draft plan. - - I am disappointed that RBC assume that people can fill forms on computers and are computer literate. - - I haven't heard of one public meeting to attend.... and I can say that I am astute person, who is usually well informed on local matters, I read the papers and listen to local radio and I have heard nothing until someone urged me to respond quickly today. I have had no thinking time and not studied the plans in detail as I've not been informed of any consultation venues or meetings.
1060	Stephen	Davies	Resident	SHLAA16384	Object	I agree housing needs to be built. But there are no plans to support infrastructure in the area. Grane road for example has a lot of traffic issues since joining up to the M65. Another 160 homes on that road trying to get out and in to the development will be a nightmare. Also there are plenty of brown field site to build on especially in Blackburn. Helmshore is a village we pay premium prices for homes in the area to have this life style we don't not want it spoilt. Large firms/ housing contractors build quick homes cutting corners all the time. Where are the children going to go to school with all schools in the area full and some of our children already having to travel to bury for school.		We need homes but well thought out planned homes. With good investment in roads, gp surgeries, schools, parks etc. We can not keep cutting into our countryside for the sake of making shareholders rich they don't love here we do please don't have the wool pulled over your eyes for all our sakes and children's.

1254	Sian	Davies	-	SHLAA16384	Object	Objection to loss of green spaces in Helmshore		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
1276	Margaret	Turner	-		Object	<p>I wish to strongly object to development on this site - - Helmshore is a small village surrounded by green space and forests being open and accessible to all. Snig Hole park and the memorial gardens has for decades been a safe and family friendly area which has allowed multiple generations to enjoy the park, the open space and the access to pathways and bridleways. Should dwellings be permitted next to this site then local residents and the public would lose the countryside view and this would encroach on our enjoyment of such. The rural setting should not be the victim of development but should be protected. - - The village has seen many developments in the last few years and housing stock in this area has significantly increased on mostly brown field sites such as Limewood Close, Airtours and ongoing development of the Wavel and Holden Vale areas. These areas are still being developed and, as such, have not yet fully impacted on the amenities, traffic etc. We have already reached saturation point and I object to any plan looking to take our precious green field spaces. Any such development would provide limited dwellings but maximum disturbance to the children of the area and the community as a whole. - - As the numbers of residents increase this naturally has an impact on the residential amenities – doctors and schools have not increased. Helmshore residents have amenities only in the village itself and then only in one direction being Haslingden as there are no amenities on Holcombe Road (towards Holcombe Village) or Grane Road. Our schools, doctors and roads have reached capacity. - - The local residents have finally been given a zebra crossing in recognition of the fast road and need to protect children and ensure their safety entering and leaving the park. Any dwellings on this site would at least double the cars entering and leaving this zone which is inappropriate given the proximity to the park. The entrance to the park and memorial gardens is via a pair of stately stone gateposts which are part of the areas heritage and which only allow one car to pass through. It would be a travesty to demolish them meaning that a new entrance would have to be created feeding onto Helmshore Road. Helmshore Road is already a busy highway with a steep gradient making it an unsuitable road to feed into. This is coupled with Station Road opposite which is already difficult to come out of as a driver and nearly impossible to cross as a pedestrian. The local council must agree with this as the yellow lines were recently extended to grant a wider view to emerging traffic from Station Road. Further the pavement on Helmshore Road next to the proposed site is already small allowing only single access and again would cause endangerment of pedestrians should an access road be added. - - Noise and disturbance resulting from increased housing stock would negatively impact the feel of the park, memorial gardens and village as a whole. - - The council has a duty to play its part in nature conservation and this is not just with pockets of parkland but to consider the wider environment being the journey to the park and the surroundings of the</p>	No	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>park. Nature's boundaries are not hard and wildlife needs to be able to thrive. - - The high level of rainfall in Rossendale and therefore Helmshore must also be taken into account and the green fields and trees on this proposed site are currently a flood plain defence in that the rain water naturally heads down Helmshore road and into the Ogden River in Snig Hole Park. The area around the river and football pitches have always been boggy meaning that the surrounding field are doing their job of soaking up the water to allow the river not to become overfull and burst its banks. Taking away any surrounding land and trees would negatively affect the current balance of flood protection. The council has allowed bungalows to be built on Sunnybank Close and houses on Station Road which in living history have been a flood area. We continue to see water levels increase and the river in Snig Hole becoming unable to cope with the level of rain which in turn has meant the river has burst its banks. In allowing more concrete and less fields and trees on this site the natural knock on effect is less rainwater being soaked up and more rainwater flowing into the river increasing the risk of raised water levels and increasing the risk to existing housing stock next to the river to flood. The council has a duty to protect its current residents from flood risks. - - The effect of any development impacts on the character of the neighbourhood. Helmshore has become a popular location to live in Rossendale and this popularity has naturally seen a vast increase in the housing stock in our village meaning an increase in council tax from these new mainly high band residences. This cannot be expedient as this will ultimately mean destroying the reason why so many want to live in Helmshore. Nature and the character of our neighbourhood must be preserved.</p>		
1290	Deborah	Chapman	-	SHLAA16383 (?)	Object	<p>The village of Helmshore has been steadily expanding and merging into Haslingden. The green spaces are disappearing and the character of the landscape is changing. These proposed developments will be detrimental to the environment and the wildlife in the area. The Greens lane site is already congested at school times and there is a wealth of wildlife on the golfcourse (I hear a rumour about more proposed building along the golf course backing onto Cherry Tree Way). There are foxes, hedgehogs, too many bird species to mention. - - The roads and parking are at a premium in this area. The land at Snig Hole and Curven Edge are places where children play - more houses would mean more traffic and parking problems. A new park has just been built and crossing as it was dangerous and parking at Snig Hole along Station Rd (Bowl Alley) is a problem already. - - The Grane site backs on to Grane Road which is already completed congested and a rat run to the M65. The road network, , drainage, schools and amenities cannot take any more in this area. The council do little to look after the area - - building more houses mean we would loose the beautiful walks around here.</p>		-

1299	David	Bemment	-	SHLAA16384	Object	There is too much development in and around Helmshore, The roads cannot cope with an increase in traffic volume.		I vigorously object to any further development in and around Helmshore. - The majority of the open spaces have been built on and the few remaining ones should be left alone, especially the one off Curven Edge, SHLAA16288. This area has been used by children as a play area since I moved here in 1990 and before that. - The local roads are gridlocked in the mornings and late afternoons, any increase in traffic volume would be intolerable. The other routes out of Helmshore are gridlocked as well e.g. Grane rd, M66 and Haslingden Rd. - The schools are full already and children from Helmshore can't always get into a school in Helmshore. - I think the development of Helmshore as a suburb of Manchester has gone far enough. -
1311	Joanne	Mellody	-	SHLAA16384	Object	Helmshore is already saturated with houses, causing driving and pedestrian hazards due to compromised visibility because of numerable parked cars on narrow streets, Please use the power entrusted to you by the electorate wisely and protect the green spaces for the sake of our environment and the mental health and wellbeing of Rossendale's population.		
1313	Jonathan	Hunt	-	SHLAA16384	Object	Helmshore is already saturated with houses, causing driving and pedestrian hazards due to compromised visibility because of numerable parked cars on narrow streets, Please use the power entrusted to you by the electorate wisely and protect the green spaces for the sake of our environment and the mental health and wellbeing of Rossendale's population.

1334	matthew	dickinson	-		Object	It was a mystery to me where the money was found to pay for such a high quality resurfacing of the lane through Snig Hole at a time of "austerity" when it's only serving a handful of houses. Especially when the main roads in the valley would embarrass 1990s Bosnia. However, it is now clear that this is a precursor to the development of housing. A few points I would like to make would begin with the money spent installing paving for the blind and a zebra crossing to make it possible for the large amount of people who now attend the newly refurbished park to cross bowl ally and Helmshore road without being run over. After that, increasing the amount of traffic in that one spot by building houses would seem a retrograde step. If these houses have children living in them where will they attend school? Not in the nearly full local schools surely? Where will the new residents go for medical attention? I haven't attended Haslingden health centre in years. Partly because I don't get ill but mainly because I can't get in. It's to be hoped none of these new residents want to swim because the entire valley can't fit in Marl Pits! - - I cannot see how it can be justified to ruin a beautiful area of green village land for the sake of cramming in a small number of houses! It is completely disproportionate when there are other local abandoned ares that would benefit from development rather destroying public areas of natural beauty. - - - Regards - Matt Dickinson - - -		-
1345	Gerard	Greenhalgh	-	SHLAA16384	Object	This area is the start of one of the few unspoilt areas of Helmshore, into snig hole. - It is next to Helmshore Park on a elevated position, so will have a visual impact from the Park and opposite side of the Valley. -		
1355	Rebekah	Haworth	-	SHLAA16384	Object	The area recently average speed check cameras have be implemented to improve the safety of the road, if you have ever tried to exit Holcombe road in peak traffic to either head to Blackburn or Haslingden you would would appreciate the 160 extra houses would only add to this problem. - I also am concerned by how local schools will be able to accommodate extra pupils. I myself moved closer to our local primary school, as I know that year on year there is increasing pressure on children to get a place in a good ofsted rated school, and each year there are more and more stories of children having to travel to ramsbottom as they have not been able to get a place in their local school. - Also currently our nearest NHS dentist is in rawtenstall a few miles down the road, and to try and get a appointment within a week at my local GPs is almost impossible. I am not against building more housing, however the current infrastructure will not support these extra houses. And will only lead to further problems.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
1367	Nicola	Hardman	-		Object	<p>Look at an aerial picture of Helmshore 'village' in 2017. Can this once beautiful village really be classed as a village anymore? There is hardly any green space with housing having been allowed to be crammed into every available space and Helmshore is no longer distinguishing from Haslingden. - - You refer to the government white paper, encouraging higher density 'where appropriate'. How can the destruction of a small village be classed as appropriate? - - Does anyone in the council commute outside the valley for work? Particularly the m66? You are encouraging the move to the countryside (cheshire based property developers at the Loom development) yet it is not reasonably possible for anyone who values family life and their time to commute to and from Manchester anymore with this journey now taking approx 90 minutes each way and the roads unable to cope. - - You address the serious concerns about the m66 and the m60 which are virtually gridlocked but do not propose any solutions. This is merely an afterthought. How you can even consider the building of so many new homes 'encouraging higher density' without addressing the lack of infrastructure and the gridlock is negligent. The travel issue such as re-opening the railway should be the starting point. - - No mention is made in the report of building extra schools or how Helmshore will cope with an influx of local residents when schools are already over subscribed with some people resorting to pay for their children to attend primary school due to be offered unsatisfactory schools outside of the area they reside. Again this should be a starting point. - - The lack of green space in the urban area of Helmshore is particularly sad for future generations. Yes, Helmshore is surrounded by beautiful hills, but is this a reason to remove all the green space within the 'village' itself and turn this into a concrete jungle? - - HS2 76 SNIG HOLE - - one of the more beautiful areas of Helmshore opposite the memorial park is at risk. See your policy HS5. This would have a clear impact on local character and appearance. - - Very close to one of the only green spaces where all the children in Helmshore are squished in the park to play. Development here is not safe. - - - the houses that have been allowed to have been built on Helmshore road in front of this proposed development are already an eyesore being so elevated. Further development would ruin this area steeped in history with the church so close by. - - Green belt? - - I fail to see why any green belt should be released to meet the 'housing requirement'. Planning for future generations should require saving greenbelt, not amending urban boundaries as suits and developing other areas of brownfield or other less developed areas of rossendale. The ratio of what is being proposed in Helmshore is grossly out of proportion with the size of the village. - - It's shameful that these developments are even being proposed and I assume that the council knew this given that the documented Proposal does not have the confidence to clearly define the proposed building in 'Helmshore' in the contents and attempts to sneak these developments in</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						under vague headings. Perhaps the council was aware of the upset anticipated from local residents. - This speaks volumes. Do you want your legacy to be ruining Helmshore for the future? -		
1399	George	Garlick	-		Object	Traffic hazard. - Junction Helmshore Rd / Station Rd already a mess due to Snig Hole parking (usually very badly) on Station Rd. Station Rd yellow lines stop too near jct, so traffic turning into Station Rd backs up onto Helmshore Rd. Turning L uphill out of Station Rd always hazardous because of cars parked in front of Elm Terrace too corner; you have to swing out into invisible traffic. Add to this suggestion of traffic merging from Snig Hole on a much more regular basis and you end up needing a mini roundabout or other control. Traffic going into Snig Hole will copete with traffic coming out, resulting in backing up onto Helmshore Road again. it's not realistic to have more traffic coming from that direction (the access road below Sunnybank Club may be a little less chaotic though I imagine getting out/in will still be a major problem for people. - User of the Snig Hole route is an obvious and dangerous hazard to children, pedestrians abd horseriders, all of whom rightly have priority and ownersip of a park entrance adn Lancashire greenway. i though teh whole point was to develop safe cycling space for children. - More posh houses are not needed in the village, and in the absence of a scheme for low cost housing on this site with careful traffic management, this should be rejected.		I would not support any further building in the green belt. - I would support building on the urban side of Holcombe Road between the (ex Holden Vale hotel) corner and Grane Road, subject to that land being deemed safe. the open space north of the textile mill lodges and linked to teh old railway line should be protected

1400	Yvonne	Cox	-	SHLAA16384	Object	<p>The site at Snig Hole would put housing adjacent to the entrance of the recently refurbished Snig Hole Park. This is currently grazing land and with the river on the other side of the entrance provides a beautiful natural break from the buildings on Helmsshore Road to the park. The site is not flat and retained by a stone wall that forms a vital part of the entrance to the park. Any building on this area would reduce natural light to the entrance to the park and form a corridor effect to the lane. The park is well used and the lane already has vehicle access to the houses at the end of the lane. If access to the site is obtained via the entrance to Snig Hole a further 7 houses would result in potentially another 14 vehicles accessing a lane that is single track, has been specifically resurfaced for cyclists and regularly has high pedestrian levels (particularly young children). With the new crossing on Helmsshore Road encouraging safe pedestrian access to the park any increase in the number of vehicles in the area would seem to be a complete contradiction to the road safety measures already taken. Traffic along this road at peak times is already heavy and a development would add to this. This also would apply if access to the site is obtained via the lane next to Sunny Bank Social Club. The pavement was reinstated next to this entrance so that visitors to the park could access it safely. Encouraging more housing and more vehicle access would contribute to increased noise, pollution and waste and would remove essential natural features that assist in the drainage of this area. The park is a haven for those wishing to enjoy its beautiful natural surroundings and a playground that cost over £100k of public money to refurbish. This development would literally cast a shadow on this area of natural beauty and encroach on the enjoyment of this much loved facility .</p>		<p>Although it is appreciated that there is a housing requirement in the area , building executive homes at a cost of natural green space, children's play areas , and the environment does not seem to address this issue. Just because land owners see a potential housing site is agreeable to their pockets does not mean residents have to agree with this. Helmsshore has had a significant amount of new build housing over the last 3 years and the increase in traffic through the village has turned a quiet village into a commuter over spill. I sincerely hope that the council will listen to the objections from the residents of Helmsshore and keep our green spaces green.</p>
1403	Mark	Haworth	-	Snig Hole	Object	<p>Objections base around the following: - 1. The volume of traffic will increase in an area where the volume is already for the surrounding roads. (in particular Bowl Ally and Station Road. - 2. The increase of traffic will likely cause potential hazards on the runs along the park and the surrounding areas - 3. Parking in this area is already difficult for residents because of the recently developed park and usage of Helmsshore Road by patrons of Sunny Bank Social Club - 4 Double parking and parking on the pavement on Bowl Ally is already a cause a hazard and access problems for residents. - 5. The height of this development is also a concern for potentially obscuring/overlooking the surrounding houses. - 6. The access to this proposed development will be a problem due to so many converging in a very small area, where vision is already difficult because of parking in this area. - 7. Noise pollution for the surrounding residents will go up .</p>		<p>The communication about the nature of these plans has been so far uninformative. Residents would appreciate more details and more information. - E.g. Where the access Road is potentially going to be? The height of the proposed</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
1414	Gavin	Cox	-	SHLAA16384	Object	This land, while being made available for development by the owner has unsuitable access. Access onto Helmshore Road which, at this point is almost single carriage way due to car parking, is unsuitable and allowing more cars access onto the bridal way leading into the park is unacceptable given the number of children and bikes that access this location. The site is being taken out of green belt to allow development and this should be reviewed in light of the reduced number of houses that are now needed per the latest government announcement that came after the local plan was released. - - As it is, the bridal way is single carriage way so the additional traffic will lead to more cars trying to pass each other and the only option would be to reverse back onto Helmshore road directly opposite station road. Additional cars should not be allowed to mix with other users of the bridal way in this location.		-
1424	Pamela	Beech	-	SHLAA16384	Object	I find it hard to believe that Rossendale council are planning to take away designated green spaces, which have been in place for many years. - The outlined plan for green belt land to have housing built on it is disgraceful. - They say there is a housing shortage in the Rossendale area, perhaps if the council looked at the many empty houses in the area and encouraged building company's to look at these rather than continually wanting to build new. - The Helmshore area is already over populated, the schools are over subscribed with children having to travel some distance to attend school. The traffic congestion in the area is getting worse, what should be a 20 minute drive to work takes me 40, 20 mins just to get out of Helmshore. - The proposed site at sing hole, I feel would lead to many accidents, even with the new crossing it is still a challenge to cross the road, 3 weeks ago when taking my granddaughter to the park when waiting to cross a bus was going so fast I did not think he was going to stop, he slammed is breaks on, then as we crossed a car over took the bus and nearly ran us down. - This would be even worse with cars trying to get out of the entry as well. - - Rossendale golf club seem to think that every time they run out of funding that it is ok to try sell off land and build houses, maybe they should look at the accounts team who manage there finances. - The impact of houses been built on the golf course, will affect not only the population increase but will have a major impact on the wildlife. - - Therefore as a resident of Helmshore I strongly object to the proposed plans. -		I feel that before any further decisions are made the people of Rossendale should be given the opportunity to speak. And given advance notice of any plans so they have time to reposond unlike this consultation which has not allowed people time to respond.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
1427	Lee	Kershaw	-	SHLAA16384	Object	Again this is green belt land. It is right next to a park. The access into this area is very tight and is only single track.		We live in a beautiful part of the World, packing houses onto any bit of spare land just so that we can say to the Government that we have completed our quota is a bloody crime. If we are not careful we will become another suburb of Manchester.
1462	Robert	Harbin	-	SHLAA 16384	Object	This proposal would build 7 houses directly opposite a new and very successful young childrens play area. Access via Snig Hole would result in a major increase in traffic along the end of this lane and would represent a danger to children and others using the site. - - It would also sit directly opposite the Memorial Gardens and reduce the amenity value of this historic site. - - In addition it sits directly on National Cycleway 6 which runs along Snig Hole. This would represent a hazard to those using the cycleway.		- Both comments relate to proposals that go against the council role in promoting health and physical activity
1523	Kathlyn	Lawson	-		Object	HS2.76 is situated directly in front of a newly erected children's crossing on an already over populated, extremely busy Helmshore Road. Traffic flow on Helmshore Road is many times single line traffic due to the road being quite narrow, alongside parking for existing houses and a very popular Working Men's Club where there is constant traffic and no parking facilities. Access to more housing would create even further problems if proposed access is via SnigHole single lane track where the recently refurbished children's park is situated and no provisions made whatsoever for parking. Parents park cars dangerously on footpaths on Helmshore Road and Bowl Alley when visiting the park with their children. Any other proposed access to additional housing would be potentially dangerous for the same reasons as above.		Helmshore is already over populated with new housing and car congestion on housing projects recently completed in the vicinity of HS2.76 Lack of school spaces and funding being axed from central government leaving RBC always pleading poverty seems totally irresponsible to even consider the proposed amount of housing required in the area when there are insufficient funds to implement the necessary infrastructure. Leave green belt alone!!!!!!
1529	Lena	Warburton	-		Object	1. Loss of Greenbelt - 2. Inappropriate development on Greenbelt - 3. Highway safety - 4. Loss of visual amenity		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
1548	Victor and Linda	Marcinkiewkz and Doody		SHLAA16384	Object	<p>I am writing to register my objections to proposed developments on sites:</p> <ol style="list-style-type: none"> 1) SHLAA 16384 HS2.76 Land at Snig Hole 2) SHLAA 16288 HS2.77 Land off Curven Edge <p>I attach my objections on separate sheets to this letter, for your examination. It should not be forgotten that in addition to these proposed building sites, close to Helmshore Road. Here are also more houses planned further up the toad on the St Veronica site.</p> <p>Site SHLAA 16384 HS2.76 Land at Snig Hole</p> <ol style="list-style-type: none"> 1. Site location: Unnecessary removal of site from Green Belt and alteration of Urban Boundary when there are sufficient Brown Field sites available. RBC should be looking at the development of former commercial premises in town centres to provide flats which would be more affordable for first time buyers etc. For example, in Haslingden there are the half completed flats in the former Roebuck pub in Lower Deardengate; flats above former NatWest Bank in Lower Deardengate; former Methodist manse on Manchester Road; empty flats above property at corner of Dale Street. A recently example of conversion of former commercial premises can be seen at 176 - 180, Blackburn Road, Haslingden, where a disused antique shop has been made into three houses. 2. Topography (comments): Site is not 'virtually flat' 3. Vehicular access: Vehicular access to site would be along narrow lane to Snig Hole from a busy junction on Helmshore, which has recently been upgraded to improve road safety for pedestrians. More traffic here would create a dangerous situation both at the junction and along the lane. The lane adjoining the site is being incorporated into National Cycle Route 6 and is already heavily used by walkers, cyclists and horse riders. An increase in traffic on the lane would have an adverse effect on this route and its users. 4. Ecological value: It is incorrect to say the site is not adjacent to a Biological Heritage Site. It is within a few hundred yards of the BHS at Snig Hole/Ravenshore and is connected to it by neighbouring fields and the Memorial Grounds (Snig Hole park). Nature does not recognise lines drawn on a map and the site is an important link in the Environmental Corridor that runs through Helmshore from Ravenshore via Snig Hole, Riverside Walk, former railway lines etc. No artificial fertilizers have been used on the field for at least 30 years which is likely to have increased its biodiversity. This is in contrast to the neighbouring Memorial Grounds, which, although part of the Environmental Corridor, have been more intensively managed. 5. Any housing development would have an adverse impact on the setting of Helmshore Memorial Grounds (Snig Hole park), the children's play area of which has been upgraded and is heavily used. This land was given as a memorial to men killed in the First World War and according to the deed of gift in 1925 includes the lane from Helmshore Road to Snig Hole. It would be 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>unacceptable to take any land from the park to widen the lane or to allow the setting of the gateway at the entrance on Helmshore Road to be altered. To take land from the field to widen the lane would reduce the acreage and make a development unviable.</p> <p>6. Constraints due to utilities: sewers, gas pipes etc. to neighbouring properties underlie the site.</p>		
1553	M	Rimmer			Object	<p>I am writing in objection to the above proposed plans.</p> <p>1) This access is used by many children so will be unsafe.</p> <p>2) The land is too narrow for traffic.</p> <p>3) Danger of traffic coming onto Helmshore Road.</p> <p>4) Use of green belt land.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
1616	Janet	Simpson			Object	<p>SHLAA16384 – Land at Snig Hole, Helmshore (HS2.76)</p> <p>I wish to lodge an objection to the designation of the above parcel of land for housing development, plus why the change to the current Green Belt boundary and extension of the Urban Boundary should not go ahead.</p> <p>To being with there are a number of inaccuracies and errors in the SHLAA, which have a bearing on the suitability for inclusion of this parcel in the Urban Boundary and allocation for housing development.</p> <p>ASSESSMENT</p> <p>Availability</p> <p>The Assessment states that this parcel of land is in single ownership, when in fact it is multiple ownership. This criterion should be changed from green to reflect this.</p> <p>Legal constraints/ownership issues – part of the site was not put forward by the owner for release for housing development. This should change from green to red.</p> <p>Intentions of the landowner – the landowner who did not put forward their land for release has indicated that they are not willing to release it. This should change from green to red.</p> <p>Whilst the owner of the remaining parcel of land may still wish to release this for housing development, given the reduction in size, together with further constraints which will be outlined later on, would this site still be viable or would it now be considered too small?</p> <p>Suitability</p> <p>Topography – the comment is that this site is virtually flat, which is not correct. The land slopes sufficiently to require some engineering works to provide suitable ground levels for development. This should change from green to amber.</p> <p>Vehicular access – this has been set as green indicating good access or adjacent to a road. The lane leading from Helmshore Road to Snig Hole is a narrow, single track lane with only one passing place, this being the site entrance to one of the properties accessed off the lane, not owned by the applicant.</p> <p>The entrance into the lane at its junction with Helmshore Road is narrow with very restricted views of users (vehicles, pedestrians, cyclists and horse riders) entering or leaving the lane.</p> <p>The lane is very well used not only by residents to access their properties but also by people going to the play area, including families with prams and young children; walkers on the Public Right of Way network (FP375 Haslingden); dog walkers; horse riders and cyclists on the recently upgraded National Cycle Route 6.</p> <p>A great deal of money has recently been spent on providing a pedestrian crossing immediately adjacent to the park gates. This was to provide a safe</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>place to cross for all those going to and from the park and beyond. Likewise money has been spent upgrading the lane as part of the Sustrans National Cycle Route No 6. Increasing the number of daily vehicle movements along this narrow lane, with no footway or places for other users to safely move off the lane to allow vehicles to pass is contrary to NPPF paragraph 75 which states that 'planning policies should protect and enhance public rights of way and access. ' A new access road would have to be created from the lane into the site, thereby reducing the area of developable land. Any proposed local widening would have to be taken off the site, again reducing the area for development. The two stone park gateposts at the entrance to the lane are a noted feature when entering Helmshore Memorial Park. These should not be removed purely to facilitate access. There is also the danger that these could be damaged irreparably by any large construction vehicles. Ecological value – the assessment states that the site is not located adjacent to a Biological Heritage Site (BHS). This is wrong as the site clearly is adjacent to one. There are no physical barriers or constraints that would prevent the free movement of plants and wildlife. This parcel of land has been used for agriculture for hundreds of years, but has not been farmed intensively for at least the last 40 years. It acts as a Green/Environmental Corridor allowing the movement of flora and fauna from the adjacent BHS to the surrounding countryside. Land management of the dismantled railway to the north of the site has also provided a more biodiverse environment than when it was in use as a railway. The creation of any new access would mean the loss of mature trees and hedgerow. Draft Local Plan Policy ENV12: states that development should not result in the loss or harm to trees or hedgerows and that the retention and protection of trees and hedgerow is critical in terms of biodiversity and also to protect the Borough's individual landscape and character. Constraints due to utilities – this is shown as green but should be red. The sewer serving the existing dwellings runs diagonally across the site. The gas pipe supplying the same properties also runs at a right angle across the middle of the field. The presence of these utilities would further reduce the area available for development. Achievability Extra costs of development – currently shown as green but should be changed to red. There would be the cost of creating a new access road into the site due to changes in ground levels, plus the presence of utilities infrastructure. Conclusion The conclusion summaries would need to be changed to accurately reflect a true assessment of the site, which should be that this is not a suitable site to be developed for housing. The creation of any new access would mean the loss of mature trees and</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>hedgerow. Draft Local Plan Policy ENV12: states that development should not result in the loss or harm to trees or hedgerows and that the retention and protection of trees and hedgerow is critical in terms of biodiversity and also to protect the Borough's individual landscape and character.</p> <p>Proposed changes to the Green Belt Boundary</p> <p>Moving on to the proposed changes to the Green Belt Boundary and the removal of this parcel of land, currently within the existing Green Belt, and the argument for its retention as Green Belt. (An objection to the proposed changes to the Green Belt will also be lodged under a separate submission.)</p> <p>According to NPPF Purpose 3 of the Green Belt is 'to assist in safeguarding the countryside from encroachment.'</p> <p>In the proposed changes to the Green Belt, Urban Boundary and Countryside document – Land Parcel Ref 30 notes on Purpose 3 state that 'there is a sense of encroachment with the parcel as a result of a cluster of residential properties, facilities of Sunnybank Social Club and a children's play area' so that 'the north of the parcel has a somewhat weakened rural character.'</p> <p>Sunnybank Social Club and Helmsore Memorial Park (which includes the playground) have both been in their locations for over 100 years. Likewise the residential properties are mainly a farmhouse and cottage which have been on site for over 300 years with associated farm buildings having been converted or re-built on the original footprint. In this respect there has been no recent 'encroachment'. Other buildings/structures associated with equestrian use are recognised as accepted use in rural areas (Policy LT5).</p> <p>The Potential Degree of Harm caused by the removal of this area from the Green Belt is considered Medium. However, this parcel is adjoining a large area of land where the Degree of Harm is considered High. If this parcel were to be removed the threat to the Green Belt would be increased. This parcel of land should remain, not only for its own value, but also to protect this whole section of Green Belt and the adjoining BHS.</p> <p>Draft Local Plan</p> <p>There are various policies in the draft Local Plan which strongly support the case of the Green Belt boundary not being move in this part of Helmsore. Briefly there are.</p> <p>Policy ENV4: Landscape Character and Quality</p> <p>In order to protect and enhance the character and quality of the landscape, development proposals should:</p> <p>Retain and, where possible, enhance key views</p> <p>The Borough's landscape is significant in terms of its local identity, cultural value, tourism and general contribution to quality of life and it is essential that it is protected.</p> <p>Whilst the council are proposing the above policy for new builds, the same protection should be applied to existing properties. Views from the properties at Tor View Farm are considered some of the best in Rossendale.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						<p>Policy ENV5: Biodiversity, Geodiversity and Ecological Networks Ecological networks should be conserved, enhanced and expanded.</p> <p>Policy ENV6: Green Infrastructure Schemes which would result in a net loss of green infrastructure on-site will only be permitted if:</p> <ul style="list-style-type: none"> • The proposals would not have an unacceptable impact on amenity, surface water run-off, nature conservation or the integrity of the green infrastructure network. <p>Green Infrastructure refers to the network of Rossendale’s multi-functional green spaces, corridors and waterways (“blue infrastructure”), which provide multiple social, environmental benefits, and enhance quality of life. 						<p>NPPF</p> <p>Para 81 – Once Green Belts have been defined, local planning authorities should plan positively to enhance the beneficial use of the Green Belt, such as looking for opportunities to ... retain and enhance landscapes, visual amenity and biodiversity ...'.</p> <p>Para 83 – Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances...'</p> <p>Para109 – The planning system should contribute to and enhance the natural and local environment by:</p> <p>Recognising the wider benefits of ecosystem services;</p> <p>Minimising impacts on biodiversity and providing net gains in biodiversity where possible, contributing to the Government's commitment to halt the overall decline in biodiversity, including establishing coherent ecological networks that are more resilient to current and future pressures.</p> <p>Para 114 – Local planning authorities should:</p> <p>Set out a strategic approach in their Local Plans, planning positively for the creation, protection, enhancement and management of networks of biodiversity and green infrastructure.</p> <p>Given all the above evidence and reasons this parcel of land should not be removed from the Green Belt and should not be designated for housing.</p>		
1655	Kirsten	Black		Snig Hole	Object	I would like to object to this development - it would be turning Helmshore into something it's not supposed to be and the local resources won't be able to support it e.g. schools, nor will they be adequately funded.		
1770	Katharine	Kennedy			Object	<p>HS2.76</p> <p>I would like to register my objection to the planned houses on the field adjacent to Sunnybank social club. I lived at Snig Hole for many years and was always struck by what a well-used and loved area this is, popular with walkers, cyclists and families using the park. It is also a significant wildlife corridor which links with Irwell Vale. Housing development here chips away at this crucial and much- valued green space.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
1814	P N & J	Heath			Object	<p>Housing Allocation Reference HS2.76 - Land at Snig Hole, Helmshore</p> <p>As residents of Helmshore for over 40 years we wish to put forward our objections to the inclusion of the above area of land in the Rossendale Draft Local Plan for future housing development. We feel this is an unnecessary and unacceptable intrusion into the Green Belt.</p> <p>1. Development of Land in the Green Belt</p> <p>Government Policy is to support the retention of the Green Belt except in very special or exceptional circumstances. We cannot see any special or exceptional circumstances which would warrant the removal of this land from the Green Belt when there are sufficient other areas of land within the borough outside the Green Belt which are available/suitable for housing development. The removal of this area of land from a Green Belt is premature.</p> <p>2. Accessibility</p> <p>It would appear that access to the site would have to be from the lane from Helmshore Road adjacent to the Memorial Gardens, children's playground, kick about area, cycle way and access to countryside walks. This would create a potential danger to children, families, walkers and cyclists (it is on the National Cycles Route) and horse riders who regularly use the lane. The provision of 7 houses could mean potentially an extra 20 cars (residents and visitors) using the lane.</p> <p>The land is in close proximity to the dangerous junction of Snig Hole/Helmshore Road and Station Road.</p> <p>The fact that a pedestrian crossing has recently been provided in this area for the safety of pedestrians is proof of the fact that there was a danger to pedestrians gaining access to Snig Hole. Any further development will only make the situation worse.</p> <p>In addition the high retaining wall to the Sunnybank Social Club Bowling green will severely restrict the visibility for vehicles entering Helmshore Road from the proposed development.</p> <p>3. Overdevelopment</p> <p>Since the 1970's Helmshore in general has been overdeveloped. The most recent developments at Sunnybank, Alden Rise, The Power Mill, Holden Vale and the former Airtours' sites, to name but a few, have placed tremendous pressure on the local infrastructure particularly the local primary and secondary schools and the Health services. Further development such as this will only exacerbate the current situation.</p> <p>4. Amenity</p> <p>The removal of this area of land from the Green Belt for the provision of 7 houses, given its location and close proximity to the Memorial Gardens, children's playground and the open countryside will be injurious to the amenities currently enjoyed by local residents of Helmshore and elsewhere and must be resisted.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.076	Further comment
						Please acknowledge receipt of this letter. We hope that our objections and concerns will be given very careful consideration and look forward to the amendment of the plan by the removal of the site from policy HS2 - Housing Site Allocations.

Reference		HS2.077		Land off Curven Edge, Helmshore				
524	Susannah	Penney	-		Object	Too many houses in an area of countryside already.		-
589	Stephen	Langridge			Not Applicable	3. HS277 Curven Edge, this land fronting onto Curven edge has, I understand, previously had planning permission granted for housing but the developer decided not to build on this area because of unsuitable ground conditions - I doubt that state of affairs has changed.		
665	Julie	Darbyshire	-		Object	A high risk proposal to further develop an area so close to a very well used young children's playground. Access arrangements are totally impractical for this development.		
673	Rosemary	Kearney	-	SHLAA16288	Object	We strongly object to the above planning applications for a number of reasons. - - Helmshore as an area is struggling to cope providing the amenities at present with the residents there are at the moment. The local primary schools are already over subscribed and children from the area are having to attend school in other towns. - - There has been a lot of money (self funded) spent on Snig Hole play area which is a great place for children to play safely and away from the main road. If there are more houses built there, the new resident's cars will have to drive right past the area which is unsafe for children. - - The planning for Rossendale Golf Club on Greens Lane again affects local school children as Haslingden High School is located on Greens Lane. This road is already busy especially at school times and more housing will only exacerbate the situation. - - The land off Curven Edge is one of the only green grass areas that children can play on safely. Especially as the local playing fields have been fenced off on Helmshore Road. This area is known locally for holding water as a culvert flows directly under it so I would not expect it to be a good area for development.		-
683	Brenda	Williams	-	HS2.77 curved edge, helmshore	Object	I STRONGLY OBJECT TO THIS SITE BEING BUILT ON. - - THIS IS THE ONLY LITTLE BIT OF LAND FOR THE CHILDREN FROM THIS AREA TO PLAY ON WITHOUT GOING TO THE PARK WHICH FOR SOME IS TOO FAR TO GO, AS THIS WOULD MAKE THEM GO ON A BUSY ROAD TO GET TO THE PARK. - - WE ONLY HAVE THIS SMALL GREEN AREA FOR THE CHILDREN. IT WOULD BE DISGRACEFUL IF THIS WAS TAKEN AWAY.		Only that we need green spaces for our wellbeing.

697	Julie	Woods	-	HS279, hs278, hs278, hs277, hs276	Object	<p>Helmshore village is being swamped with more and more houses and the roads and local services are becoming less and less able to cope. We have already seen huge building programmes including the Power Mill and the Loom on Holcombe Road, Weavers Dene, Alden Brook apartments and Broadway housing development which has only added to the pressure to all the local services. Trying to exit onto Helmshore Road from Fairhill or Curven Edge is already very dangerous due to the amount of traffic at peak times and raises real safety concerns due to visitors and new residents cutting through the village. Trying to get a doctors appointment is already difficult. The proposal of 15 houses on Greens Lane is so impractical. The traffic around St Veronicas and Haslingden School is so congested people are blocking in drive ways and making it impossible for residents to park. The road on Brooklands Avenue is so narrow it is impossible to pass at peak times and residents are already complaining to the schools about the parking issues. My main concern is Rosendale Golf Club who are now holding a meeting on 7th October to discuss selling the land at the rear of the houses on Cherry Tree Way. They have already sold the land on Greens Lane and are now proposing to sell the land at this location, they are threatening the players that if they do not vote for it that they will put up their golf fees. They have no consideration for the people who live in the houses on Cherry Tree Way and are basically blackmailing the players into voting for the decision to go ahead. Should this proposal go ahead the roads on the estate will not be able to cope with the additional traffic, (we are unsure where they are proposing to gain access) not to mention the value of our houses decreasing. I am very worried about this proposal for obvious reasons and where will it all stop if they are allowed to continue. We moved to Helmshore more than 20 years ago and chose the area because of the village feel, it was relatively quiet but had all the local amenities. The Golf course provides us with a green space between the continual growth of our village and we would like reassurance that they will not be able to continue to sell of land to greedy developers</p>		-

749	Fred	Barlow			Object	<p>I have been looking at the proposed plans for helmshore,holcombe road area. (1) Land off curven edge;This bit of land is the only play area this estate has,it has a culvert running under it,the land itself is infill ,the site is an old lodge belonging albion mill,it was something like 30ft.deep at the road end and I would say totally unsuitable for building on.I also believe some of the infill came from the bleach works site at Holden Wood where it was considered unfit for building on.</p> <p>(2) snig hole site;This sight has got problems with road junctions ,the river, road access ,it has parking problems connected with Sunnybank social club,it is overlooked by the bowling green.This land is also GREEN BELT land. Both sites will suffer from lack of school places,Helmshore school is full up now.The bus service is hopeless.</p> <p>I would like to object to the Plans for the above reasons.</p>		
751	Noel	Broadgate		SHLAA16288	Object	<p>I write regarding the unacceptable decision to appropriate the Green Belt land off Curven Edge to permit the erection of seven houses on this quarter of a hectare of Green Belt land.</p> <p>This can of worms has been opened at least once before, when an overwhelming number of local residents quite rightly had their way, and the flawed plans were withdrawn.</p> <p>Apart from obvious reasons such as the drain on local resources - schools, hospitals, police, sewers etc etc, there are problems specific to the proposed site, viz:- the ground is naturally soggy - drive past today and you will see clumps of marsh grass everywhere - such that local lore suggests that a digger once sank into it. There is an underground culvert, and at one time there was a big drain hole, now covered over. One of the reasons why the ground is boggy, particularly after the prolonged rain that we get in Rossendale, is that it is bordered on two sides by steep slopes, on three sides by domestic dwellings, the majority of which have drives, paths and paved areas which do not absorb water.</p> <p>Access would have to be from Curven Edge, as access from Fairhill is too steep. When residents protested last time, a photograph and an article appeared in the Rossendale Free Press. Access to their archive will show the strength of local feeling, as a result of which, this area, which we call "the rec", was designated as open land, for the use of residents, and future generations to enjoy.</p> <p>If you likewise appropriate the park down at Snig Hole, then there will be no usable local open recreational area.</p> <p>Please take this letter as an objection to the above plans, lodged by myself and my extended family.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
756	John	Simpson	-		Object	1. Site unsuitable for building as it straddles the culverted Longshaw Brook. - 2. Site already heavily used for informal recreation (not 'is likely to be'). It is a valuable space for the nearby housing estate. - 3. Site likely to be contaminated as it was used as a tip in 19th/20th centuries. - 4. Any increase in traffic at this junction undesirable.		RBC should concentrate on the conversion of former commercial property in towns into residential properties: - 1. High street shopping has changed with the number of supermarkets in the valley and online shopping. Towns do not need the same number of shop units. Banks etc which are closed are never going to reopen as banks and so again could be converted into apartments (at least in part, e.g. the upper storeys of the former Barclays Bank in Haslingden). - 2. This would reduce the need to build on so much of the Green Belt as is proposed, especially if, as is alleged, central government has reduced targets for the number of new houses that have to be built. - 3. Flats etc. would be more affordable for first time buyers, single people (one in three people in the UK now live alone) etc. - 4. Such developments provide a realistic attempt to address the problem of the homeless, which three and four bed-roomed houses etc do not. -
764	Chris	Aspin	Helmshore Local History Society		Object	Land is above a stream and former mill pond. Part was a local authority tip. - - Children use this area. Since the Borough Council allowed the Primary School to deny access to the School Field,, the land has been used much more for recreation.. -		Helmshore has more than enough houses. More would place an extra burden of the local schools and the Health Service. More cars, more problems.
795	Michael	Lord	-		Object	This is a green space used by kids to play in summer and often sledging in winter. Although we have a screen of trees between us and the field I want to look at a field in winter where there are no leaves on the trees not look down at 5 new houses.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
799	Sarah	Lord	-		Object	This is a village green area that is used by children throughout the year and also dog walkers. Building houses on the land will increase traffic on to an already busy road (Helmshore Road) which as well as parking issues, could cause safety issues (due to children playing on the land). Helmshore has recently had new (substantial) housing developments; below St Thomas' church and on the old Airtours car park, and there will soon be no green spaces left. Additionally the area is subject to flooding. - -		-
800	Peter	Wright	-		Object	I strongly object to development on land at Curven Edge, Helmshore. - This parcel of land has been used by generations of children and adults as leisure land. Removal of this would be to deprive (particularly) children of a safe place to play 'informally.' The 'dip' as it is known locally has been used by children (including my children and grandchildren) for sledging over many years and there is no other land in the area which offers the same 'facility.' I appreciate there are public parks and play areas at Snig Hole and Victoria Park but these in no way match the character and nature of 'the dip.' - Active outdoor play does have health benefits - I would not wish for any such benefits, however small, to be removed, - - In addition to the leisure aspect removing this green belt land would destroy a vital characteristic of the neighbourhood - an amenity lost for ever. - Should you require any further comment please let me know		-
810	Carl	Warren	-		Object	I would like to know why a notice informing residents of the Local Plan & site HS2.77 was attached to a lamp post on Fairhill only at the end of last week. Surely if you wish to inform people then the time to have done this was at the end of July, certainly before the meeting in Haslingden library. - - This development is for 5 houses, the yield proposed by applicant is blank since there is no applicant as yet. Is 5 the maximum that will be allowed & if not why not? - - This site known locally as "The Dip" is a popular place for children, especially for sledging on the bank after snow. The slope on the other side is much steeper and any houses would have roofs approximately level with the pavement on Fairhill. Relatively recently it has been realised that wood burning stoves are not "Green" but a source of particulate matter known as PM2.5 & this is the most harmful type of air pollution. - - Because the ground rises to the north & east of Fairhill & the prevailing wind is from the south west, smoke & pollutants often linger. Having a source at ground level with make this problem much worse. - - Since the number of wood burning stoves is rapidly increasing & in some areas there are plans to ban their use, I believe that this issue should be adressed before any decisions are made. - - I presume that the whole of the site will be sold off & there will be no guarantee that any of the trees will be retained.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
860	Stephen	Harris	-		Object	This is a greenfield site which has ALWAYS been used as an informal playing area since the estate was built in the early 1970s, particularly by local children. It is the only open green space in the area and it is within my knowledge that it has been used for that purpose at least as far back as September 1978. My wife and I have lived on Cherry Tree Way since then. It is used daily for general play and a variety of ball games; also by dog walkers. The slope at the side has always been used for sledging. The proposed alternative area at the back of the site is in my opinion unsuitable for recreational use. The children playing would no longer be visible from the road and so there is a safety aspect. It is also unclear as to how they would access the area. The land has long been thought unsuitable for building in any event. There is thought to be a culvert underneath. The Plan notes that there is a risk of flooding, which apparently is even more significant at the back of the site (proposed as a play area - it is not much used at the moment). The three storey houses built to one side several years ago are not in keeping with the area but they now conceal the site from St Thomas Church. They were built on the site of the old Portofino Restaurant (later "Truffles") which itself replaced a building which had been erected many years ago on stilts. The Plan shows that a significant part of the site is shown to be at medium risk of surface water flooding. We have witnessed serious flooding in Helmshore in the past. The main objection is that the site has ALWAYS been used by residents for recreational activities.		I object in principle to the proposed use of green belt land for housing, which should be kept as green belt, as originally intended. It seems to me that there are other possibilities, such as brownfield sites, which have not been satisfactorily explored. Also, there should be greater restrictions on the number of houses proposed in any given area. There seems to be a policy of "nibbling away" every few years at the established green belt. Ultimately
950	Stuart	Thompson	None	SHLAA16288	Object	The site and volume of housing proposed will dramatically increase the burden on local site infrastructure such as schools, healthcare, road infrastructure. - - Lancashire County Council have already stated that the funding available to further develop these type of services are scheduled to be cut, not increased, in the coming years. This will lead to an unmanageable overload and therefore a deterioration in educational and health provision to the current population which would be significantly exacerbated should the population increase. - - A demonstration that funding will be available and all additional support services will be developed/improved from their current condition needs to be clearly stated by local, county and central governing bodies. - -		
975	Lynn	Bentley	-		Object	This is an area where children can play safe and an area of relaxation		Unfortunately there are two many housing estates being built in the Helmshore area without an thoughts to its infrastructure

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
976	Gillian	Stephens	-	SHLAA16288	Object	Helmshore has been ruined as a village with the over development which has been allowed to take place over the years. There are virtually no green spaces left without a significant walk. We are supposed to encourage healthy living for our children yet you are proposing taking away green land used by many many children as a playing field close to their homes. Helmshore Primary School was the only other area where the whole community walked, played and generally enjoyed the outdoors, but that has been stopped due to the headteacher actions. This means the only other area for recreational use is Snighole park, which is already heavily used. The fact that there would only be one piece of land for such a large population is ludicrous and unfair. 'The Dip' as it is locally called is used every single day Winter and Summer. I was under the impression that some green land should be available for estates for the benefit of children and adults alike. I think the Council needs to give serious consideration to the amount of people's lives that will be affected with the building on 'The Dip' and consider the consequences of removing for ever this final small piece of green land. Does this Council was the legacy of ruining Helmshore.		Please consider the views of the local people who inevitably know their areas better than the Councillors. You cannot keep allowing one area to be built on over and over again until there is nothing left.
980	Julie	Cawtherley	-	SHLAA16288	Object	It's green belt land and should not be built on. It's the only green space for children to play on on that estate		There are too many housing developments being considered. The infrastructure in Helmshore can not accommodate the new residents
983	Neil	Leeming	-	SHLAA16288	Object	The land is constantly water logged, and is used by children to play games i.e. Football , sledging in winter and it is a green belt site and brakes up the monotony of houses.		by building on green belt sites you are taking away our village way of life and wildlife areas within the village.
996	Gillian	Bower	-		Object	There is a river running underneath this land. - The land is used by locals for a variety of activities. - The green land should not be eroded.		The proposed site for 160 houses adjacent to the Grane Road will also impact on our status as a village and erode into our green fields. The unused derelict buildings should be redeveloped into affordable housing to avoid the expansion of more concrete and buildings. We wish to remain a village with open green spaces, countryside surroundings and pleasant views not a built up urban sprawl. - -

998	Jill	Jihkson	-		Object	Helmshore is already overdeveloped thanks to the Taylor Wimpey hideous estate on holcombe road. The roads are in a terrible state and too crowded you can't get off holcombe rd or up helmshore road. The schools are already at full capacity. There is not enough infrastructure to continually add hundreds more houses to this village. We have no train links. Just the bottle neck m66 - People need to listen to residents we have had enough we have no support from local council - Stop building in helmshore green belt before we have no green spaces left		Listen to the complaints that people are raising
1005	Peter	Dickinson	-		Object	This land is the only green space accessible to the public for recreational use in the immediate area. - It is used by local children - from Fairhill/Curven Edge/Cherry Tree Way/Knowl Meadow/Newbarn Close/St Thomas Close/East Street - as a play area. - The only other option for these children would be the park, at Snig Hole, but this is too far away for under 12 year olds to be allowed to go to unsupervised. - It would be most unfair to take away this amenity to build ONLY 5 houses, which is an insignificant contribution to the development plan. - - This land is also used by dogwalkers, the more elderly of whom cannot walk further to the next available green space.		
1014	Geoffrey	Hallam	-		Object	The same comments apply as same as those relating to area adjacent Helmshore Park.		
1019	Rachel	Dulson		SHLAA16288	Object	Helmshore is not equipped for additional homes to be built. Roads and schools are inadequate for the current population already. Current issues have not been addressed and now you are planning to throw even more people into the mix, as well as the disruption to traffic flow that building work brings. - Build us a new school, improve our roads and perhaps once that is done, redevelop the existing old buildings that are abandoned and in disrepair and then think about building new homes.		
1049	wendy	boniface			Object	There are to many references to list - The house proposed behind cherry tree will cause problems with site entrance and traffic. The same is applicable for greens lane and the dip off cherry tree. - - The last set of houses built in helmshore were supposed to be the last. You are compromising the integrity of the village. - - I would like to point out that greens lane is already an unsafe road and should be one way. Heavy water that runs down that lane after rain will also be made worse by the removal of trees -

1060	Stephen	Davies	Resident	SHLAA16288	Object	I agree housing needs to be built. But there are no plans to support infrastructure in the area. Grane road for example has a lot of traffic issues since joining up to the M65. Another 160 homes on that road trying to get out and in to the development will be a nightmare. Also there are plenty of brown field site to build on especially in Blackburn. Helmshore is a village we pay premium prices for homes in the area to have this life style we don't not want it spoilt. Large firms/ housing contractors build quick homes cutting corners all the time. Where are the children going to go to school with all schools in the area full and some of our children already having to travel to bury for school.		We need homes but well thought out planned homes. With good investment in roads, gp surgeries, schools, parks etc. We can not keep cutting into our countryside for the sake of making shareholders rich they don't love here we do please don't have the wool pulled over your eyes for all our sakes and children's.
1066	David	Ormerod	-		Object	<p>- I am writing to voice my objection to the proposed building of houses on landmark off Curven Edge. - It is imperative that no house building takes place on this valuable green space. This small green haven, known by our family and others as 'the big dip', has been used for years by children as a safe place to play, make dens, kick a football, around, go sledging when it snows etc. It is also full of wildlife and established trees. - This land should NEVER be built on, instead I propose that the 'big dip' be given the status of Village Green and be properly maintained, not neglected as it and it's surrounding pavements have been recently. Please save this lovely little area for generations to come.</p> <p>Email received 05/10/2017: I am writing to voice my objection to the proposed building of houses on landmark off Curven Edge. It is imperative that no house building takes place on this valuable green space. This small green haven, known by our family and others as 'the big dip', has been used for years by children as a safe place to play, make dens, kick a football, around, go sledging when it snows etc. It is also full of wildlife and established trees. This land should NEVER be built on, instead I propose that the 'big dip' be given the status of Village Green and be properly maintained, not neglected as it and it's surrounding pavements have been recently. Please save this lovely little area for generations to come.</p>		Helmshore is one of the few remaining jewels in the Rossendale Valley, proving very popular with commuters, but without its green spaces it will lose it's attraction as a Village and just become another small, overcrowded town. This is already in evidence in the standard, aesthetics and quality of the development opposite Musbury Fabrics, this new build is an eyesore built with a totally disregard to the heritage around it.
1218	Jack	Bacon	-	SHLAA16288	Object	Helmshore is a historic country town but our green belt land is gradually being taken away. There is one park in Helmshore and Snig Hole is one of the few green parks in the Valley as a whole. I personally do not want children to have to grow up without the countryside we all value greatly. Why should we have to pay the price for government quotas losing the green belt land we value so greatly?		-
1254	Sian	Davies	-	SHLAA16288	Object	Objection to loss of green spaces in Helmshore		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
1290	Deborah	Chapman	-	SHLAA16288	Object	The village of Helmshore has been steadily expanding and merging into Haslingden. The green spaces are disappearing and the character of the landscape is changing. These proposed developments will be detrimental to the environment and the wildlife in the area. The Greens lane site is already congested at school times and there is a wealth of wildlife on the golfcourse (I hear a rumour about more proposed building along the golf course backing onto Cherry Tree Way). There are foxes, hedgehogs, too many bird species to mention. - - The roads and parking are at a premium in this area. The land at Snig Hole and Curven Edge are places where children play - more houses would mean more traffic and parking problems. A new park has just been built and crossing as it was dangerous and parking at Snig Hole along Station Rd (Bowl Alley) is a problem already. - - The Grane site backs on to Grane Road which is already completed congested and a rat run to the M65. The road network, , drainage, schools and amenities cannot take any more in this area. The council do little to look after the area - - building more houses mean we would loose the beautiful walks around here.		-
1294	Michael	Chapman	-	SHLAA16288	Object	These developments will alter the community feel of Helmshore. - The school infrastructure isn't suitable. - The green belt should be protected. - -		-
1299	David	Bemment	-	SHLAA16288	Object	This area is the last green space locally available for the children of our estate to play on. - There is already too much traffic on Helmshore Rd, this will make it worse. the area is too congested as it is.		I vigorously object to any further development in and around Helmshore. - The majority of the open spaces have been built on and the few remaining ones should be left alone, especially the one off Curven Edge, SHLAA16288. This area has been used by children as a play area since I moved here in 1990 and before that. - The local roads are gridlocked in the mornings and late afternoons, any increase in traffic volume would be intolerable. The other routes out of Helmshore are gridlocked as well e.g. Grane rd, M66 and Haslingden Rd. - The schools are full already and children from Helmshore can't always get into a school in Helmshore. - I think the development of Helmshore as a suburb of Manchester has gone far enough. -

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
1311	Joanne	Mellody	-	SHLAA16288	Object	Helmshore is already saturated with houses, causing driving and pedestrian hazards due to compromised visibility because of numerable parked cars on narrow streets, Please use the power entrusted to you by the electorate wisely and protect the green spaces for the sake of our environment and the mental health and wellbeing of Rossendale's population.		
1313	Jonathan	Hunt	-	SHLAA16288	Object	Helmshore is already saturated with houses, causing driving and pedestrian hazards due to compromised visibility because of numerable parked cars on narrow streets, Please use the power entrusted to you by the electorate wisely and protect the green spaces for the sake of our environment and the mental health and wellbeing of Rossendale's population.		-
1334	matthew	dickinson	-	SHLAA16288	Object	After the mean spirited actions of Lancashire county council in fencing off land which had been in public use for many years (playing fields behind Helmshore county primary), I find it beggars belief that one of the only green spaces left in Helmshore in public use could be ear marked for housing. This land is in constant use all year round by children for playing out in good weather, sledging in winter and is even used by local scout, cub and brownie troops to practice erecting tents. Whilst I was born and raised in haslingden, my family lived in Helmshore and I am aware of this land in constant use for recreation for the 34 years that I can claim to be aware. To add to that the roads, doctors surgery, primary schools, secondary school and available recreation facilities haven't grown appreciably since I was born (in fact thanks to your employers actions they have noticeably shrunken) so how your organisation proposes to handle more incoming residents is a mystery to me. - Regards - Matthew dickinson		-
1355	Rebekah	Haworth	-	SHLAA16288	Object	The area recently average speed check cameras have be implemented to improve the safety of the road, if you have ever tried to exit Holcombe road in peak traffic to either head to Blackburn or Haslingden you would would appreciate the 160 extra houses would only add to this problem. - I also am concerned by how local schools will be able to accommodate extra pupils. I myself moved closer to our local primary school, as I know that year on year there is increasing pressure on children to get a place in a good ofsted rated school, and each year there are more and more stories of children having to travel to ramsbottom as they have not been able to get a place in their local school. - Also currently our nearest NHS dentist is in rawtenstall a few miles down the road, and to try and get a appointment within a week at my local GPs is almost impossible. I am not against building more housing, however the current infrastructure will not support these extra houses. And will only lead to further problems.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
1367	Nicola	Hardman	-		Object	<p>I am writing to put forward my objections to the proposed property development in Helmshore. - - I will address each of the sites separately below however my overall concern which applies to all of the proposed development sites in Helmshore is the lack of services, infrastructure, and erosion of valuable green space. - - Look at an aerial picture of Helmshore 'village' in 2017. Can this once beautiful village really be classed as a village anymore? There is hardly any green space with housing having been allowed to be crammed into every available space and Helmshore is no longer distinguishing from Haslingden. - - You refer to the government white paper, encouraging higher density 'where appropriate'. How can the destruction of a small village be classed as appropriate? - - Does anyone in the council commute outside the valley for work? Particularly the m66? You are encouraging the move to the countryside (cheshire based property developers at the Loom development) yet it is not reasonably possible for anyone who values family life and their time to commute to and from Manchester anymore with this journey now taking approx 90 minutes each way and the roads unable to cope. - - You address the serious concerns about the m66 and the m60 which are virtually gridlocked but do not propose any solutions. This is merely an afterthought. How you can even consider the building of so many new homes 'encouraging higher density' without addressing the lack of infrastructure and the gridlock is negligent. The travel issue such as re-opening the railway should be the starting point. - - No mention is made in the report of building extra schools or how Helmshore will cope with an influx of local residents when schools are already over subscribed with some people resorting to pay for their children to attend primary school due to be offered unsatisfactory schools outside of the area they reside. Again this should be a starting point. - - The lack of green space in the urban area of Helmshore is particularly sad for future generations. Yes, Helmshore is surrounded by beautiful hills, but is this a reason to remove all the green space within the 'village' itself and turn this into a concrete jungle? - - To turn to the particular proposed developments; - - - HS2 77 CURVEN EDGE - - this proposed development would remove a playing field for children which contravenes the government policy on reducing child obesity. This is a safe local space for the children of the estate to play on. Surely this contravenes open space requirements if you are taking away open space on one development to make a new development? - - the houses that have been allowed to have been built on Helmshore road in front of this proposed development are already an eyesore being so elevated. Further development would ruin this area steeped in history with the church so close by. - -Green belt? - - - I fail to see why any green belt should be released to meet the 'housing requirement'. Planning for future generations should require saving greenbelt, not amending urban boundaries as suits and developing other areas of brownfield or other</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
						less developed areas of rossendale. The ratio of what is being proposed in Helmshore is grossly out of proportion with the size of the village. - - It's shameful that these developments are even being proposed and I assume that the council knew this given that the documented - Proposal does not have the confidence to clearly define the proposed building in 'Helmshore' in the contents and attempts to sneak these developments in under vague headings. Perhaps the council was aware of the upset anticipated from local residents. - This speaks volumes. Do you want your legacy to be ruining Helmshore for the future? -		
1399	George	Garlick	-		Object	Drainage and implications on site + further down the hill. - This site has not previously been built on because of serious drainage issues. Any suggestion of building would need a watertight - literally - solution to be in place before construction. i don't know if this is practical or achievable; if this scheme delivered solely or majority low cost housing I would support its implementation if it is achievable. - Part of any plan must NOT result, as Lime Tree Close has, in further problems down the hill. Land below Lime Tree Close is now significantly wetter than before, with the loss of soakaways above the railway line resulting in flooding risk and actual flooding below due to water ingress. - Play area - This is a rare open space among the housing. the only other one - the school playing field - has been rendered inaccessible to a generation of children now by obstructionist policies perpetuated by the Helmshore Primary School head. This has rendered the area unusable, without expanding play space for the schoolchildren. Has any consideration been given to building on some of the school playing field and leaving this known open space with unfettered play access alone?		I would not support any further building in the green belt. - I would support building on the urban side of Holcombe Road between the (ex Holden Vale hotel) corner and Grane Road, subject to that land being deemed safe. the open space north of the textile mill lodges and linked to teh old railway line should be protected

1400	Yvonne	Cox	-	SHLAA16288	Object	<p>This land is currently green space at the entrance to a housing estate built in the 1970's. It is predominantly used by children to play on and dog walkers . In snowy weather it is a well used well loved sledging area . It has mature trees to one side and housing around it. This area provides vital vegetation to absorb surface water in the area and any building on this area would impact on this. - Any access from this site on to Curvan Edge would increase traffic directly onto a road where traffic backs up the hill, queuing to turn onto Helmshore Road .The town houses opposite St Thomas Musbury have their parking accessed via Curvan Edge and increase in traffic or additional access to this road would be potentially dangerous to pedestrians walking up the hill and cars turning into the Curvan edge. It is vital that to keep the village feel of Helmshore green areas such as this are protected and not built on. - In an area where there are limited school places, doctors and dentists, it would be interesting to have details of what provision is in place to support this requirement.</p>		<p>Although it is appreciated that there is a housing requirement in the area , building executive homes at a cost of natural green space, children's play areas , and the environment does not seem to address this issue. Just because land owners see a potential housing site is agreeable to their pockets does not mean residents have to agree with this. Helmshore has had a significant amount of new build housing over the last 3 years and the increase in traffic through the village has turned a quiet village into a commuter over spill. I sincerely hope that the council will listen to the objections from the residents of Helmshore and keep our green spaces green.</p>
1414	Gavin	Cox	-	SHLAA16288	Object	<p>This land is well used by local residents for all round leisure activities. The argument that this land had been previously discounted due to the proximity to St Thomas' church still applies. The fact that a building that was becoming derelict and has been refurbished now presents a barrier between this site and the church seems tenuous. It is already difficult to exit the estate at rush hour and additional cars and access to this site within a short distance of the junction will only make this harder. The apartment have access from Curven edge and development on this site would mean two junctions onto Curven edge in a very short distance decreasing the safety of the young people who live here already. You have to wonder why this site was not developed originally and it doesn't take much to discover the site is very much covering historic pollution. Given the pressures of school places locally and doctors additional housing, which most likely would be targeted at families, does not have the local amenities to support it.</p>		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
1424	Pamela	Beech	-	SHLAA16288	Object	I find it hard to believe that Rossendale council are planning to take away designated green spaces, which have been in place for many years. - The outlined plan for green belt land to have housing built on it is disgraceful. - They say there is a housing shortage in the Rossendale area, perhaps if the council looked at the many empty houses in the area and encouraged building company's to look at these rather than continually wanting to build new. - The Helmshore area is already over populated, the schools are over subscribed with children having to travel some distance to attend school. The traffic congestion in the area is getting worse, what should be a 20 minute drive to work takes me 40, 20 mins just to get out of Helmshore. - The proposed site at sing hole, I feel would lead to many accidents, even with the new crossing it is still a challenge to cross the road, 3 weeks ago when taking my granddaughter to the park when waiting to cross a bus was going so fast I did not think he was going to stop, he slammed is breaks on, then as we crossed a car over took the bus and nearly ran us down. - This would be even worse with cars trying to get out of the entry as well. - - Rossendale golf club seem to think that every time they run out of funding that it is ok to try sell off land and build houses, maybe they should look at the accounts team who manage there finances. - The impact of houses been built on the golf course, will affect not only the population increase but will have a major impact on the wildlife. - - Therefore as a resident of Helmshore I strongly object to the proposed plans. -		I feel that before any further decisions are made the people of Rossendale should be given the opportunity to speak. And given advance notice of any plans so they have time to reposond unlike this consultation which has not allowed people time to respond.
1427	Lee	Kershaw	-	SHLAA16288	Object	This area of land is an old rubbish tip. This is why it has not been built on in the past. The area has been covered over some years ago and is now used as a children's play area. To destroy a children's play area for the sake of 5 house is ludicrous.		We live in a beautiful part of the World, packing houses onto any bit of spare land just so that we can say to the Government that we have completed our quota is a bloody crime. If we are not careful we will become another suburb of Manchester.
1462	Robert	Harbin	-	SHLAA 16288	Object	This proposal for development of 5 houses is on the only open area for children to play within the whole of this estate. - - Given the role of councils to promote healthy liefstyles it seems peverse as it would remove the opportunity for informal play. The area in question is well used by local children. The Local Plan emphasises the importanc e of playing fields but it is important not to forget the role of informal play areas, easily accessible and in close proximity to childrens homes. (It was even better used before RBC suspended regular mowing of the whole site and only the roadside margin mowed.) - - Im not qualified to comment on the suitability of the land for building but when we moverd to the area - 34 years ago - the site contained a small lake! -		- Both comments relate to proposals that go against the council role in promoring health and physical activity

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
1467	Karen	Brooks	n/a		Object	The land in question is regularly used by the community as a children's play area. Play occurs on here throughout the year - regardless of weather conditions. It is especially popular during the winter months, when it snows, with families going out sledging. The space is invaluable for those families living on the estate from Fairhill to Curven Edge as it provides a safe space for the children to play and removes the need for them to cross Helmshore Road, which is high in traffic at most times during the day, week and weekends alike. - - There are many people with dogs in the local area and dog walkers equally use the space responsibly. - - The land as it stands is a welcome bit of green space generally for all concerned. There are well established trees and it would be a huge loss if these were to be removed or their future growth curtailed. - - Helmshore, in my opinion, has already been developed to the max. in terms of housing. Any further additions to the housing stock, regardless of how big, would provide added strain on the infrastructure and services in the area (road usage, schools, bus routes, local facilities). - - The disruption the development would cause in the interim would, I feel, be detrimental to everyone in the local area - noise, added construction traffic. - - The ongoing impact of the development on the environment - more pollution especially from cars, wood-burners, etc.		-
1474	Peter	O'Dowd	-	SHLAA16288	Object	Object to green belt land being built on especially the golf course and breach of covenant on curven edge		No
1498	mary	garlick	-		Object	This area is routinely flooded in wet weather and is permanently boggy indicating it is land that acts as drainage and potentially flood defense for the area. Having experienced water inundation in my property, in part possibly linked to housing development on Lime Tree Close where drainage of the site has resulted in more water running onto the land below the old railway line, I would be concerned that building on the Curven Edge site would have similar effects.		It is not clear from information available at this point what provision for social housing is being made. - While some of the implications of increased housing in the area relate to service provision by the County Council e.g. Education it is not clear how the Local Plan will address increased need for public services when the local population increases.
1521	Barbara	Shaw		SHLAA16288	Object	There are already a lot of children living on this estate who use this space for playing ball etc in the summer and for sledging in the winter. If the proposed housing goes ahead then these children will resort to playing on the roads which will be both unsafe and a nuisance. It is too far for them to go the local parks whereas this plot of land is ideally placed.		-

1561	Richard	Peat			Object	<p>Plan Ref: HS2.77 Land off Curven Edge, Helmshore Attached to this e mail</p> <p>1 Press copies about previous planning applications. There are significant comments from councillor and council officials in these cuttings. Please have a look at them.</p> <p>2 Photographs of the area under consideration before and after landfill.</p> <p>3 Letter from councillor John Holt with copies of minute extracts from Derelict Land Scheme/Landscaping and funding for landscaping.</p> <p>4 Minutes from Corporate Policy Committee Meeting 27.08.02 Please note points 3.3,4.1, 4.2, 5.1,6.1 and 9.2</p> <p>5 Letter from council estates officer Christine Sheasby 12.09.02 confirming the outcome of the 27.08.02 meeting with the comment 'THE SITE SHOULD BE REMOVED FROM THE SCHEDULE OF SITES FOR DISPOSAL'</p> <p>6 One page example of the 1044 signature petition.</p> <p>7 Letters of support from previous valley MP's. David Trippier and Janet Anderson.</p> <p>I write reference the Rossendale Local Plan and specifically regarding plot HS2.77 land off Curven Edge, Helmshore.</p> <p>There have been three previous attempts to build on this land. All three applications have been refused. The arguments against are basically unchanged since the first application in 1989. Mainly that the area was intended as a landscaped green play area and has been used for this purpose since landscaping took place after infill from the Haslingden Bypass was used to level the site in the 1980's. This allowed grass seeding and tree planting to take place. The trees were given preservation status by yourselves as you were landscaping the area for the future. The suitability of this land for development has also been called into question you can see from the attached photographs of before and after the state of the land and the depth of the infill. This is 7.9m at its deepest point there was a stream running through the centre of the plot that is now in a culvert at that depth. On the point of suitability I draw your attention to the corporate policy committee findings at their meeting in August 2002, copy attached. Please note points 3.3,4.1, 4.2, 5.1,6.1 and 9.2. You will also see in the attached letter from Christine Sheasby that this land should be removed from the schedule of sites for disposal.</p> <p>During the 2001 planning application a 1044 signature petition was raised objecting to any use other than for recreational purposes for this piece of land. The petition was raised within five days showing the strong feeling locally to keep the land available as a safe play area. If you look at the original planning application by Milbury Homes, for the development of Curven Edge,</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
						<p>you will see quite clearly the area as marked as a landscaped green infrastructure. You will see on your current plan there is a strip of land not owned by the council adjacent to number 48 Curven Edge, running through to the rear of the field. Again if you look at the original plan a fourth house, number 50, should have been built here but the land was deemed unsuitable for number 50 was never completed. The stability of the area would have to be brought into question if development was considered. During the landfill process the ground moved with the machinery that was tipping and levelling the site. Number 48 sustained cracking damage and had to have remedial work. Land behind numbers 32, 34 and 36 moved out towards the infilled dip. In this area only gardens and fences were involved, however, movement still took place. Any heavy digging work could likely cause such problems again. Building records should show if the new culvert was constructed to a specification to allow building over it. However, when the two properties were built at the end of Cherry Tree Way the site had to be excavated and the culvert upgraded under the houses. If this needs doing again this culvert is 7.9 metres in depth across the field.</p> <p>The council own the front part of the plot a retired builder the rear, the area you say will be left as a green infrastructure. If you allow planning on your part of the plot then the owner of the rear will more than likely expect he can get planning on his part. This will cause still more objections as the whole area is used by children to play on. Every planning committee that has looked at this piece of land since 1989 has accepted it should be left as a green play area support has come from all sides of the council including country councillors and local MP's. The area is used daily by families, dog owners and children from sledging in the winter to ball games etc. in the summer and should remain available for this purpose.</p> <p>Since 2003 the plot has provided a further 4 homes for the area when the original restaurant was rebuilt as a residential property and three townhouses were erected on the old restaurant car park area. There is additional space further up Helmshore Road where St Veronicas church has recently been demolished. I notice this area doesn't feature on your plan but I cannot believe this isn't intended for future development giving space for more than 5 houses that fit better in the surrounding area. I trust once again it can be accepted that the land off Curven Edge is better remaining in the community as a recreational area. It would be really helpful if you could once and for all declare this land not for housing development, as has actually been promised during the conclusion of each previous planning application review.</p> <p>Please see appendix for attachments</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
1627	Wendy	Leake			Object	We have concerns regarding the planning to this location. The roads are busy enough around this area. Our children in this area use this land in the summer to play and winter to sledge on there is not any other spare ground in the immediate vicinity to accommodate this. To build on this ground would stop this from happening. We have spoke to other families regarding this and we all feel the same way. Our prime interest is to keep our children off the street and safe. Please could you get back to us regarding the above issues.		
1639	Anthony & Janette	Lye			Object	<p>I am writing with my objection to the proposed building on the land at Curven Edge, Helmshore. The notice which as been displayed does not explain when the building will take place, the number and type of houses which are proposed, the name of the builders, and also the commencement of the buildings. The land at Curven Edge is used as a local amenity for children as a play area, provides open character, woods and dog walking facilities for our local community where this open space is enjoyed by many residents in the local community. Our concerns regarding this plot are the culvert running under the proposed building plot. We have lived here since December 2014 and we have noted that the land is constantly water logged. Our solicitor informed us when we purchased the property that it was unlikely consideration would even be given to building on this site due to these circumstances. We also understand that this site has been subjected to mine workings in the past. We are also concerned as to what impact any groundwork in preparation for building may have on our property. Please tell us who will indemnify us in respect of any possible structural defects to our property, which may result from any such works.</p> <p>In the past few years RBC have passed for houses to be built on the land adjacent to St Thomas's Church on Limewood Close, the conversion of flats in the Power Mill on Holcombe Road, houses on Yarn Avenue the old Airtours sight and a possible proposal of 150 houses on Holcombe Road and Grane Road which is still under consultation with a proposal of houses being built on land adjacent to Snig Hole.</p> <p>Helmshore was considered a village in the 30's and 40's with a rail network and roads to use for the use of commuting. At present we do now have no rail network, buses run around Helmshore infrequently, and the X41 bus, which goes either to Manchester or Blackburn, is only accessible on Broadway. This means people have to commute to work using their own transport therefore increasing the volume of cars in the area. Also affected are public services such as schools and doctor facilities, which are going to be stretched even further than they are already when the population increases in this neighbourhood.</p>

1658		Bickford			Object	<p>I would like to register my protest to the building of houses at Curven Edge (HS2.77)</p> <p>Our house over looks this land and through the spring/summer we have taken great delight in seeing the local children, on a daily basis using this land to play on. Their activities range from football to den building.</p> <p>In an environment when we are seeing children become less and less active leading to future obesity and other health issues which put demands on the NHS, it is surely a necessity that we keep the sites which allow children to participate in activities which nurture good health and help to build friendships in local communities.</p> <p>The other group that regularly use the land are dog walkers who we see responsibly picking up their dog litter and disposing it. The area provides a safe grassy sites for any dog owners on the large estate to allow their dogs to have a good run around.</p> <p>It is also well documented that the presence of greenery from grass and foliage has a positive effect on mental health. Mental health issues as you will know are increasing and anything that could alleviate this would be beneficial. Please consider that the effects of removing such a well used and loved site on the health and well being of the local population</p>

1814	P N & J	Heath			Object	<p>Housing Allocation Reference HS2.77- Land at Curven Edge. Helmshore As residents of Helmshore for over 40 years we wish to put forward our objections to the inclusion of the above area of land in the Rossendale Draft Local Plan for future housing development.</p> <p>1. Unsuitability of land for Development This land was the subject of a Derelict Land Reclamation Scheme in 1979. For more information please refer to Rossendale B.C. Planning Committee Minute no. 597© 10/9/79, minute no. 885 12/11/79 and minute no. 1077(b) 10/12/79.</p> <p>The land was culverted and then filled in using spoil from the Haslingden By-Pass Scheme. From personal knowledge the material tipped was more like slurry and many complaints were made at the time about the type of material being used to fill the site. The land was then top soiled and seeded. The result of this has meant that part of the site in the vicinity of the deep manhole shafts (see photographs) is always wet throughout the year whatever the weather. We would suggest that the unsuitable/unsafe ground conditions would preclude any possible housing developments without expensive and extensive engineering/foundation works being undertaken, thus making it uneconomical to develop.</p> <p>2. Loss of amenity This land and the land opposite forms a pleasing aspect at the entrance to the estate and its development would mean the loss of a valuable amenity to the residents of the estate.</p> <p>The main area of land which is adjacent to Curven Edge has been and still is used by residents and others as a dog exercise area, by families and children for ball games, communal bonfire/firework displays and for sledging and snowballing in the winter- It provides a safe play area for children on the estate,</p> <p>Our own children enjoyed the use of this land and we would not like to see the current and future generation of children deprived of the use of this valuable recreation facility,</p> <p>The loss of this area of land would therefore be injurious to the amenities at present enjoyed by the residents of the estate and Helmshore as a whole,</p> <p>3, Overdevelopment Since the 1970's Helmshore in general has been overdeveloped, The most recent developments at Sunnybank, Alden Rise, The Power Mill, Holden Vale and the former Airtours' sites, to name but a few, have placed tremendous pressure on the local infrastructure particularly the local primary and secondary schools and the Health services, Further development such as this will only exacerbate the current situation,</p> <p>4, Previous History As we understand it part of the land is owned by the Council and the Council</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.077	Further comment
						in the past has refused to dispose of their interest therein, In addition planning permission has been refused for housing development for the whole site. No doubt your records will confirm the planning history of the site, Please acknowledge receipt of this letter- We hope that our objections will be given very careful consideration and for the reasons stated above the Draft Plan will be amended by the removal of this site HS2,77 from policy HS2- Housing Site Allocations.

179	Anthony	Hodbod			Object	<p>B6232 Grane Road</p> <p>When the highway planners decided to put an intersection off the M65 at guide into the B6232, did they intend that this little used, and under considered difficult road should become a major traffic artery in the North West of England? Because this is what it rapidly became.</p> <p>The attached map is not based on traffic survey. It is based on good estimates of driver choice to use the most efficient route. Thousands of drivers now use B6232 Grane Road as their first choice of travel between a very large range of destinations.</p> <p>The transformation of a quiet local road into an arterial road since 1998 has had a major impact on the quality of life of people in the inhabited area through which the road passes before it joins the A56.</p> <p>Traffic Volume</p> <p>Large numbers of vehicles are not just experienced at "rush hours". There is dense traffic at all hours during the daytuime. Night-time is favoured by HGV drivers ignoring the 7.5ton limit. During the daytime "convoys" of some 50 cars are regularly observed (local observation)</p> <p>Speed</p> <p>The writer considers that, from his own and other peoples' observations, a large proportion of drivers in the 30 mph restrctied section of Grane Road have no intention of conforming to the speed limit. This is most probably because the inhabited length of Grane Road is a minor interruption on a longer journey which must be undertaken at maximum speed.</p> <p>There is occasional police presence which slows the traffic down for a while. The open stretch of the B6232 attracts riders of powerful motorcycles. Some riders do not wait until the have cleared the 30 mph zone to open their throttles to maximum acceleration. Thry experience the exhilaration of power and speed whilst the residents are subjected to high levels of noise and danger.</p> <p>Residents have suggested a number of safety measures over the years from 1998:</p> <ul style="list-style-type: none"> 40 mph speed limit from heap clough to the present 30 mph limit speed cameras in the 30 mph zone Predestrian refuges at bus stops A roundabout at the Holden Arms <p>Even if all these measures were implemented it would still leave Grane Road as an over-used, congested and dangerous road. It would be the height of folly to place a surther 160 houses into this completely unsuitable environment.</p> <p>The solution</p> <p>Recently in the north west money has been lavished on two majoy congestion points - the A55 in Chesire and the A6 north of Preston. The M65 at guide to the A56 at haslingden grane road is now a major traffic axis, and should</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>therefore be given similar treatment.</p> <p>This axis of travel should continue BUT on a new road dedicated to this traffic (see map No.2). The new road would not pass close to any inhabitation and the traffic would disturb no-one. It would not be expensive to construct. A few bridges and underpasses would be needed for farm access, but otherwise there should be no access or exit points. The US army corps of Engineers could build on the road in three months.</p> <p>The intersection of the A56 and Grane Road should then be closed. Only when the inhabited part of Grane road returns to being a quiet, peripheral urban back water should any further house building be contemplated.</p>		
459	Brian	Clarke			Object	Can't open windows, can't cross road, can't get out of jubilee road, very stressful trying to get out of street on to grane road		Too many houses and cars here now to much vibration and is very noisy with traffic, can't keep windows open as noisy and very dusty it doesn't help our asthma + allergic rhinitis, not enough doctors and schools to cope with the people now do not think this is a good idea to have more houses in this area.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
462		Seddon			Object	<p>Dear sir or madam, I am writing as a long standing resident of Grane Road, as yet again we have a set of plans for housing on this small site, and I can't imagine why :-</p> <p>a) so many houses can be considered for such a small site, not to mention the amount of disruption, noise and dust this will inflict on Grane residents who already have to put up with the huge amount of traffic noise and pollution as it is.</p> <p>b)some of this land may still be contaminated from past industrial use.</p> <p>c)there is a great danger that by putting an access road onto the site off Grane Road, a road that already has way too much traffic than it's "B" road status can handle, will increase the chances of accidents, especially during peak periods, first from construction traffic, and then from heaven knows how many cars trying to get on and off the site.</p> <p>d)and what about a little bit of thought for the present Grane residents who already have to put up with the daily struggle of first trying to get into their cars, and then trying to join the incessant flow of traffic that is never ending. What about resident parking, it's bad enough now as a lot of households have two cars, because as an access road I'm assuming there will be some ban on parking near the entrance. How is that going to work for all concerned?</p> <p>e)putting a roundabout at the cemetery is going to cause absolute chaos because it's not a big enough area, and the non-stop traffic up and down the road will make it near on impossible to join the flow, and what about ambulances? They have a hard time as it is.</p> <p>f)another thing to think about is schools and GP surgeries, there aren't enough places now so how are we going to accommodate in influx of people?</p> <p>Finally, may I suggest that members of the planning committee put themselves into a couple of cars and park on Grane Road near to the proposed site access between 6.30-9.00am, and 4.30-7.00pm during term time just to witness for themselves the sheer volume of traffic already on the road, and ask themselves - is this a suitable place for any kind of access to this proposed site.</p> <p>I know we need housing , but I just think this needs to be thought through a bit more. Maybe try to find another access route, because I realise that even with objections some kind of housing is going to be built anyway. It's just that this is a dangerous road already, and we don't need anything else to make it worse.</p> <p>Letter received 09/10/2017:</p> <ol style="list-style-type: none"> 1. <input checked="" type="checkbox"/> Are you concerned about the amount of traffic using Grane Road? <input checked="" type="checkbox"/> Yes 2. <input checked="" type="checkbox"/> Does the speed of traffic using Grane Road worry you? <input checked="" type="checkbox"/> Yes 3. <input checked="" type="checkbox"/> Does the traffic noise concern you? <input checked="" type="checkbox"/> Yes 4. <input checked="" type="checkbox"/> Can you feel the vibration in your property when HGV's pass? <input checked="" type="checkbox"/> Yes 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>5. <input checked="" type="checkbox"/> Have you suffered any damage to your property due to vibration and/or impact from vehicles using Grane Road? <input checked="" type="checkbox"/> Yes</p> <p>6. <input checked="" type="checkbox"/> Does the volume of traffic make you feel afraid when walking along Grane Road? <input checked="" type="checkbox"/> Yes</p> <p>7. <input checked="" type="checkbox"/> Do you experience difficulty crossing Grane Road due to the amount of traffic? <input checked="" type="checkbox"/> Yes</p> <p>8. <input checked="" type="checkbox"/> Is your property affected by excessive dust caused by passing traffic? <input checked="" type="checkbox"/> Yes</p> <p>9. <input checked="" type="checkbox"/> Do you or a member of your household suffer from Bronchitis, Asthma or any other respiratory complaint? <input checked="" type="checkbox"/> Yes</p> <p>10. <input checked="" type="checkbox"/> Does the volume of traffic affect your quality of life, is so please explain how? <input checked="" type="checkbox"/> Yes</p> <p>11. <input checked="" type="checkbox"/> Do you think a roundabout at the Cemetery would aid road safety? <input type="checkbox"/> No</p> <p>12. <input checked="" type="checkbox"/> Do you drive a vehicle? <input checked="" type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> If yes to the above, do you experience any difficulty entering the flow of traffic on Grane Road? <input checked="" type="checkbox"/> Yes</p> <p><input checked="" type="checkbox"/> How many minutes does this take? <input type="checkbox"/> 5-10</p> <p>13. <input checked="" type="checkbox"/> Are you concerned about the Grane Village housing proposal? <input checked="" type="checkbox"/> Yes</p> <p>Increase in traffic volume onto an already very busy 'B' road will lead to more noise, dust and possibly accidents esp. if families with small children move in.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
484	Michael	Murray	GRAss	H84	Not Applicable	<p>Letter dated 23 August 2017</p> <p>I write as Chairman of Grane Residents' Association (GRAss) following our meeting on 15 August 2017. Before entering into discussion on the Draft Local Plan Consultation, I wish the Planning Department to consider the following three points which are vital, if subsequent consultations are to be meaningful, in deciding whether the proposed site is suitable for development.</p> <p>The general information for Site SHLAA16304 sets out the site location, the area available for development and the calculated yield for housing at 106 to 160. It sets out topography, vehicle access, bus and distance to strategic road network, distance to schools, surgeries, local town centre, play areas and sports grounds. It sets out flood risks, ecological value and the landscape value. It could well be that we would wish to comment on these items following further meetings with residents, when the developer's plans are known. In the meantime we submit the comments made in relation to the previous submission for housing development on this site, copy enclosed. Whereas the above items are important when assessing whether the site is suitable, it is believed that it is lacking in three critical areas which are as follows:</p> <p>1 The volume of traffic on Grane Road has increased dramatically over the years. We believe that in assessing the suitability of the site for development, this increase should be taken into account. Can you please supply me with any surveys of traffic volume, which you have taken into account when deciding that the site is suitable for the building of 106 to 160 houses, which would considerably increase the volume of traffic using Grane Road. We have endeavoured to obtain traffic figures from various official sources, so far without success. I refer to a survey conducted by GRAss in 1992 in support of our objection to this site being designated for Employment purposes. During a 12 hour period on Thursday 5 March 1992, 6,952 vehicles used Grane Road. On 8 March 2010 a report was submitted to Lancashire Local Hyndburn – Lancashire Local Rossendale. The Committee was asked to make decisions on this document on the then current position regarding HGV usage of Grane Road. It was stated that in January 2006, 11,843 vehicles were counted and in April 2006, 12,909 were counted. What is the current statistic? If no current survey has been carried out, then surely an up to date survey should be undertaken to assess the current volume of vehicles using Grane Road. Then a correct assessment could be made of a housing development and subsequent increase in traffic and whether this meets the needs of local residents, pedestrians and road users, on what has become an extremely busy and congested road, especially during peak periods. Is the Council prepared to commission such a survey?</p> <p>2 Local Authorities in the UK have a responsibility under Local Air Quality Management (LAQM) legislation to review air quality. Where concentration</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	---------	-----------------

exceeds national objectives, measures should be put in place to reduce emissions. What is the current Air Quality on Grane Road? Has it been measured? If it is above national levels in the vicinity of the proposed site, further siting of housing increasing traffic volume on Grane Road would not meet the Council's obligations relative to Local Air Quality legislation. If no monitoring has taken place, it should immediately be undertaken by the Council before any decision is taken in regard to development of the site. Is the Council prepared to commission such a survey?

3 Have any recent assessments been made on the flood risks and surface water flooding risks? We have noticed sample drilling has taken place over the site and we would be pleased if the results of these tests could be made available to us.

It is noted that a developer has shown an interest in developing the site. During the previous Draft Local Plan Consultation, when the developer's plans for housing were proposed, you obtained on our behalf a copy of these plans, to enable residents to consider the proposals. It would be helpful if could forward to GRAss the developer's current plans for the site so that local residents can be made aware of what is now being proposed.

29 August 2015

Dear Sir

Re: Policy Reference, Grane Road, Grane Village – Site Location H84

Following their attendance at the "Lives and Landscapes - Local Plan Part 2" exhibition at Haslingden Library on 4 August, this matter was discussed by Grane Residents' Association at their meeting the following week. It was agreed that local residents be informed of the planned housing development on Grane Road as enquiries from residents had been received by Association members, having had no official correspondence regarding the plans that would result in dramatic changes to their lives, outlook and amenities. Local residents were invited to an open meeting on 26 August to discuss the proposals and to express their views. Although as a group, there was no opposition to some housing development on the site, anger and concern was expressed in relation to the consequences of a development of this scale and the number of dwellings to be situated in Grane, as opposed to the spread of such development across the Valley. There was concern on the possible impact on schools and amenities in the area which are operating at capacity, together with the impending traffic mayhem on the notoriously busy and dangerous Grane Road.

After long and heated discussion residents agreed that the views of local residents must be considered by Rossendale Borough Council, Planners and Government when making a decision which will affect them. Equal consideration should be given by Planners, to residents who have paid their Rates/Council Tax for 40-50 years as oppose to developers and new residents

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>who may be just starting to contribute to the economy of Rossendale.</p> <p>Adequacy of Parking/Loading/Turning/Road Access</p> <p>A major concern is the volume of traffic currently using Grane Road, which is always busy and fast moving, with peak times creating chaos for anyone wishing to cross the road, especially the elderly and children. Great difficulty is also experienced by residents wishing to exit side roads or driveways onto Grane Road. It has been intimated that should planning permission be granted, an entrance/exit onto Grane Road would be required with the provision of traffic lights. In our view this would cause major disruption, not only from traffic approaching from Blackburn but from traffic backing up onto the by-pass at peak times. It would also cause problems for the residents in the immediate vicinity of the traffic lights who currently park their cars on Grane Road, having no facility for off road parking. Alternative provision must therefore be considered for a roundabout which may result in a reduction of proposed properties but would ensure that traffic is free flowing with the added benefit of slowing down speeding motorists on a stretch of road where few cars travel at the 30 mph speed limit, making it very difficult for people to cross the road. A further smaller roundabout at the junction of Holcombe Road would ensure that traffic accessing Grane Road would do so more safely, as would vehicles exiting the cemetery.</p> <p>Grane Residents' Association has been campaigning for greater road safety since 1998 and over the years our efforts have brought about significant improvements to road safety for motorists both local and those passing through the area. We now wish to see consideration given to local residents by developers providing parking for current residents within the proposed site, as it is highly likely that residents will be faced with yellow lines bordering their properties. It has been pointed out that problems are currently being experienced by residents who are unable to park in front of their properties due to visitors/employees of The Courtyard parking outside their homes causing frustration and inconvenience.</p> <p>It should be noted that an application for planning permission for "a farrier training facility for a temporary 4 year period for 25 days per year" was turned down in August 2013 by Planners on the grounds that, "the scheme, by reason of the resulting traffic movement using a junction with poor visibility to the busy Grane Road would result in unacceptable danger to highway safety". This location is directly opposite to the proposed site access/exit.</p> <p>It should be further noted that Grane Road is the major route for the Valley to the Royal Blackburn hospital. Residents will confirm that ambulances pass their properties on a frequent basis throughout the day and night, with blue lights and sirens indicating the emergency they are responding to. There is further concern that traffic lights at the proposed junction to the site will not only cause a hazard when the development is completed, but during construction when heavy vehicles will be accessing and leaving the site on</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>going. It was stressed by residents that a site of this nature and size should have more than one entrance/exit for reasons of safety and ease of access from Helmsore, without the necessity to use Grane Road, especially during any construction.</p> <p>Loss of trees/Nature and Conservation</p> <p>We do not profess to be tree huggers but we are concerned that mature trees within the site and mature Hawthorne hedgerows bordering the site should be maintained to ensure that the habitat is catered for. We are aware that plovers and newts currently inhabit the area and evidence should be provided to confirm that development will not be detrimental to existing wildlife.</p> <p>Hazardous Material</p> <p>When opposing employment proposals for the site 24 years ago, Grane Residents' Association was mindful of the hazardous materials left on the site following the closure of the former Holden Vale Bleach Works. Are we to understand that the proposed Play Area to be situated next to the existing gas governor and pond is a suitable safe and healthy place for children to play? It is admirable that provision for a Play Area has been acknowledged but a site more central within the development would allow use by all local children, opposed to being situated at the edge of the development, next to a pond, gas governor and in close proximity to heavy traffic entering and exiting the existing employment site.</p> <p>As previously stated Grane Road is extremely busy and residents experiencing increased traffic emissions have yet to discover the effect on their health and wellbeing. Experiencing wide disruption caused by heavy traffic movement, dust and noise over a possible five year period during construction, will no doubt have a devastating effect on some members of the community should planning permission be granted. A survey on such a topic may be beneficial to determine the current health status of local residents.</p> <p>Overlooking, Loss of Privacy</p> <p>It is of concern that a minority of residents backing onto the proposed site, most of whom have lived in their homes in excess of 30 years, will not only lose their view of the countryside, the main consideration for buying their properties, but also lose their privacy. It is proposed that one property in particular is to be surrounded on three sides by new properties with the remaining side overlooking Grane Road and all its present and future traffic chaos. Surely it is not unreasonable to believe that consideration should be given for an appropriate barrier between existing and new properties to accommodate privacy, overshadowing and to provide parking provision. A consideration should also be paid to the design of properties in close proximity to current dwellings to ensure that they are of sufficient height not to have a detrimental impact on privacy. Such a barrier could provide a green space to facilitate the movement of wildlife within the site which will be seriously diminished by development.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>We understand that social housing is to be included in the proposals. Are we to presume that there may be some single storey properties suitable for single/elderly residents within the site? If so this may provide alternative housing for current residents whose properties have become too large to maintain but who wish to remain in the locality.</p> <p>Noise and disturbance resulting from use</p> <p>It must be said that development of this nature will have a massive impact on Grane due to the increased volume of heavy traffic generated both during and after construction. Should traffic lights be installed, as suggested, we believe this will create a further hazard by way of pollution from vehicles queuing in both directions, their engines labouring and emitting toxic fumes.</p> <p>It must be noted that construction of The Courtyard has provided invaluable experience for local residents and to ensure that planning constraints are robustly adhered to in any future development in the Grane area. During the former development, building materials used were not as stipulated and the provision of mature trees resulted in saplings that are still awaiting maturity. We believe that any further development must include consultation with Grane Residents' Association who will form a sub-committee to ensure that what is planned for development is agreed by all parties and executed accordingly.</p> <p>Yours faithfully</p> <p>Letter dated 03.10.2017: Thank you for your letter of reply dated 1 September to my submission dated 23 August 2017. I again write as Chairman of Grane Residents' Association (GRAss).</p> <p>As I see it the consultation must fall into two areas as determined by the true scale and information available. The first consultation is in regard to the suitability of the site SHLAA16304 as to its location, the area available for development and the calculated yield for housing at 106 to 160. The second consultation must be in regard to the plans submitted by the developer for the site.</p> <p>In regard to the suitability of the site, consideration must be given to the fact that it is within the West Pennine Moors, the largest new site of special scientific interest (SSSI) notified by Natural England since 2004, covering a total of 76 square kilometres including Haslingden Grane. This notification of the West Pennine Moors was approved by Natural England's Board on 19 July 2017. This move reflects the national significance of the area and its combination of upland habitats, moorland fringe grasslands and woodland, which support an impressive array of breeding birds.</p> <p>In my letter of the 23 August 1 stated that at this point in time we are unable to fully question the suitability of the site as we do not have figures for traffic volume/flow, air quality on Grane Road and surface water/flood risk. I asked</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>if you had figures for these items or if the Council were prepared to obtain such figures in order that a factual assessment could be made as to the suitability of the site.</p> <p>As I understand it from your reply of the 1 September and our brief conversation at the Public Consultation at Haslingden Library, the developers will supply details of surveys carried out in these three areas. I believe that they are obliged to supply you with such studies when they make a planning application. In order that meaningful consultations can take place, and as this information is mandatory in such a planning application, I would respectfully suggest that you let us have details of these items together with the developer's plans for housing and site access etc. Failure to disclose information on these items would in our view render the consultation process invalid.</p> <p>As Grane Road is very busy, the figures supplied by the developer will give us details of just how busy it has become, as the site is virtually at the corner of the increasingly busy Holcombe Road junction. We believe that Traffic Management Police should participate in the consultation process along with Emergency Services who direct ambulances which use the road in both directions to service the whole of the Valley during routine and emergency life and death situations. We fear that emergency vehicles may be hindered by the increased traffic flow which could result from the development of a further 106 to 160 houses.</p> <p>I hope that when the developers submit their plans they will be prepared to meet with residents to discuss how the proposed site would be developed to benefit all residents in Grane Village.</p>		
526	vicki	last	-		Object	<p>Helmshore has a major issue with vehicular access, parking and safety. - - Aside from people using helmshore as a cut through from one place to another, street parking, coupled with no local parking and poor roads/pavements means that as a 'family orientated village' its is becoming more dangerous for families. Adding more houses and hence more vehicles to the area will only make the area worse. - - Over the last few years the number of developments in Helmshore have been huge. The roads are already fairly awful during peak hours. Packing more and more houses into the area will only cause greater problems in my opinion unless access is greatly improved.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
589	Stephen	Langridge			Not Applicable	<p>2. HS278 Holden Wood, This area identified as a location for 100 to 150 houses with access from Holcombe Road.</p> <p>pros. a large and (by valley standards) flat area of land.</p> <p>cons. additional traffic load onto an already busy road with particular conjunction on the Grane Road/Holcombe Road junction - already a problem at peak times.</p> <p>Impact on infrastructure - please refer to item 5 below.</p> <p>(...)</p> <p>5. Pockets of land, I understand that if a housing development of under 100 houses takes place, then this is deemed as having no impact on local schools, doctors and other services. However, with developments such as Yarn Avenue, (off Holcombe Road) 60+ houses, Limewood Close (off Helmshore Road) 20+ houses and The Power Mill development (off Holcombe Road) then the accumalative effect is the same as a single 100+ development. Helmshore Primary School and Broadway Primary School are both running at full acapacity whilst Haslingden High School is running at or near full capacity. Where are the children from these new houses going to go to school? or Doctors? or Dentist?</p> <p>Lancashire County is already strapped for funds, how are additional places to be sourced or funded.</p> <p>If other pockets of land are identified by developers - e.g. the site of the recently demolished St. Veronicas Church in Helmshore - will this then allow for the removal of other pockets of already identified land from the local plan?</p>

612	Joe	Donovan			Object	<p>Can I ask you why there is only one speed camera in Haslingden, and only one in Helmshore?</p> <p>Could I point out to you, that Grane Road on any weekday, has in excess of 14,000 vehicles per day.</p> <p>Could I also point out there have been scores of accidents, just in the Rossendale section, many of them serious, and several of them fatal, all in the last 10 years.</p> <p>The blatant disregard for speed limits continues on Grane Road, day and night, every day. There is seldom any enforcement of speed limits, maybe one afternoon or evening every few months. The sheer volume of traffic makes it unenforceable. Drivers know this. This is why there is such disregard for the safety of other. This is the reason there are accidents, serious accidents.</p> <p>I must raise this point with you. The promised but still not operational average speed check appears only to cover the 40 mph section from the M65 to Belthorn, and the 50mph section from Belthorn to just outside Haslingden. Why is it not applied to the 30mph stretch? This is a well populated residential area with over houses on or nearby Grane Road.</p> <p>Residents have campaigned for speed enforcement cameras on this 30 mph section for years, all our requests have been repeatedly disregarded and ignored. All we have in the way of "enforcement" are two "slow down" signs, one of which is no longer working.</p> <p>A few moments spent on crashmap.co.uk will tell you instantly, this road more that fulfils all criteria for placement of speed cameras, and enforcement of the mph limit. There have been dozens of accidents on this 30mph section in the last 10 years, despite it being less than a mile long. All I can conclude from this, is that the authorities have no interest in enforcing laws which protect the safety of the public, and are simply content to allow the accidents to continue.</p> <p>Can you tell me why or how this is acceptable? The problems will not go away if nothing is done. When a stretch of road has a high rate of collisions, injuries and deaths, then the Highway Authority has a duty to do something about it. I feel as though I must write to you about this, because our repeated requests to Rossendale Council have all been ignored and resulted in nothing, no action being taken, and not even an excuse as to why.</p> <p>To add to this, the road surface is almost 25 years old and completely worn out, it is tiringly, incessantly, obtrusively noisy. When walking alongside the road or even stood outside a house, one has to shout to hold a conversation. Surely the noise of this road, when busy, which is most of the day, would be well in excess of safe noise limits at work. Why won't the Council provide decibel counters to monitor noise, and why isn't air pollution monitored? Surely, this is also well in excess of legal limits.</p> <p>Resurfacing Grane Road with modern day low-noise road surfacing would go a</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>long way to reduce the amount of excessive noise.</p> <p>We also recommended to the Council, pedestrian islands so, at busy times at least when crossing, one can cross halfway, and when traffic finally ceases the other way, cross the remainder.</p> <p>This request has been repeatedly ignored, despite at least 1000 vehicles per hour, and waiting well over five minutes to cross.</p> <p>In many places the road markings are completely worn out. This is purely down to overuse.</p> <p>For too long in this country, all policies and endeavours have been biased completely in favour of putting more traffic on the roads. Grane road these last 25 years, proves this point completely.</p> <p>It is very much to the cost and detriment of everything and everyone else. There is zero quality of life on this road. People don't socialize or walk, or go out, unless they have to. Traffic levels/speed/noise/accidents/pollution all make it so unpleasant to be actively discouraging. Many people have serious health problems, for example, permanent tinnitus, respiratory problems etc. It's all because of excessive amounts of traffic on Grane Road.</p> <p>The M65 was opened in December 1997. We have put up with this for almost 20 years. The point of a motorway is surely to get the traffic off roads like this. Can you please tell me, how or why this is acceptable in any way, and why this situation should be allowed to continue?</p> <p>In view of all the problems outlined above, are we expected to welcome the new Grane Village development, to include a further 160 houses, which will no doubt generate an estimated 320 resident vehicles, plus service vehicles? Whether the access point for this development is to be on Grane Road or Holcombe Road, we envisage that the majority of vehicles will be travelling through the residential 30mph section of Grane Road, thereby putting further pressure on both Grane Road and its residents.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
613	T	Riley			Object	<p>The road access to the proposed site is on, one of the busiest roads in Lancs. It is almost impossible to access the road even now from 6am to 7pm due to the constant flow of traffic. To add 160 houses, who may have more than one car is at least unrealistic and dangerous. Anyone who has travelled the Grane Road during peak times must realise there is a serious problem. Many people have been killed in road accidents on this road.</p> <p>Being a resident opposite the proposed site, we have a serious problem parking our own vehicles which now have to be double parked to gain access to property. There is often an over spill of vehicles from the existing industrial estate next to the proposed site. This situation causes problems for larger vehicles passing too close to parked vehicles have been damaged by other vehicles passing too close to parked vehicles causing damage to panels and mirrors. This also causes difficulty for pedestrians when vehicles are obstructing the footpath. There will also need to be future provisions for Electric car charging ports outside existing properties.</p> <p>There is an abundance of wildlife within the site, including rabbits, birds, bee's and many other creatures. Creating a corridor would be useless, as most if not all would be killed during construction work, the wildlife corridor would have to be alongside Grane Road to protect wildlife and buffer the site from residents.</p> <p>Having lived here for 70 years I can confirm there is a serious concern regarding land contamination, from the old gas works, and from the old bleach works. The area's affected were not cleaned up, they were just over filled to hide them. There is poison from the gasometer pits which were 40ft deep in the ground. On the bleach works site, there was a caustic settlement lake in front of the of works. On demolition it proved too expensive to remove, as it was over filled with a mound of earth. These dangerous chemicals are still in the ground. The density of build is too much, houses will be cramped together with only one access road.</p> <p>These plans are designed to maximise profit from the site, regardless of the safety and wellbeing of the present residents. Traffic has already reached Gridlock at peak times, the plans would add approx. 200 vehicle movements onto Grane Road. The disruption would be unbearable for residents and passing traffic.</p> <p>I therefore oppose the plans.</p>		
634	Christine	Wright	-		Object	<p>This site has been turned down for house building previously. - Access to Holcombe Rd and then onto Grane Rd is already under pressure and congested at the junction with Grane Rd. Increased traffic onto Grane Rd would lead to even more accidents than at p</p>		<p>Helmshore and Haslingden have had huge amounts of building in the last 40 years, no extra infrastructure has been added. No extra school places, shops or family facilities. - - This area can sustain no more.</p>

697	Julie	Woods	-	HS279, hs278, hs278, hs277, hs276	Object	Helmshore village is being swamped with more and more houses and the roads and local services are becoming less and less able to cope. We have already seen huge building programmes including the Power Mill and the Loom on Holcombe Road, Weavers Dene, Alden Brook apartments and Broadway housing development which has only added to the pressure to all the local services. Trying to exit onto Helmshore Road from Fairhill or Curven Edge is already very dangerous due to the amount of traffic at peak times and raises real safety concerns due to visitors and new residents cutting through the village. Trying to get a doctors appointment is already difficult. The proposal of 15 houses on Greens Lane is so impractical. The traffic around St Veronicas and Haslingden School is so congested people are blocking in drive ways and making it impossible for residents to park. The road on Brooklands Avenue is so narrow it is impossible to pass at peak times and residents are already complaining to the schools about the parking issues. My main concern is Rosendale Golf Club who are now holding a meeting on 7th October to discuss selling the land at the rear of the houses on Cherry Tree Way. They have already sold the land on Greens Lane and are now proposing to sell the land at this location, they are threatening the players that if they do not vote for it that they will put up their golf fees. They have no consideration for the people who live in the houses on Cherry Tree Way and are basically blackmailing the players into voting for the decision to go ahead. Should this proposal go ahead the roads on the estate will not be able to cope with the additional traffic, (we are unsure where they are proposing to gain access) not to mention the value of our houses decreasing. I am very worried about this proposal for obvious reasons and where will it all stop if they are allowed to continue. We moved to Helmshore more than 20 years ago and chose the area because of the village feel, it was relatively quiet but had all the local amenities. The Golf course provides us with a green space between the continual growth of our village and we would like reassurance that they will not be able to continue to sell of land to greedy developers

950	Stuart	Thompson	None	SHLAA16402	Object	The site and volume of housing proposed will dramatically increase the burden on local site infrastructure such as schools, healthcare, road infrastructure. - - Lancashire County Council have already stated that the funding available to further develop these type of services are scheduled to be cut, not increased, in the coming years. This will lead to an unmanageable overload and therefore a deterioration in educational and health provision to the current population which would be significantly exacerbated should the population increase. - - A demonstration that funding will be available and all additional support services will be developed/improved from their current condition needs to be clearly stated by local, county and central governing bodies. - -		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
964	Joanne	Smithson	-	SHLAA16304	Object	This is ridiculous. Grane road has many well documented issues with regard to traffic and you want to build more property?? - Where will these peoples children go to school? We already have issues with families not getting their choice of school due to oversubscription! - What little green land we have we need to preserve!	-	
998	Jill	Jihkson	-		Object	Helmshore is already overdeveloped thanks to the Taylor wimpey hideous estate on holcombe road. The roads are in a terrible state and too crowded you can't get off holcombe rd or up helmshore road. The schools are already at full capacity. There is not enough infrastructure to continually add hundreds more houses to this village. We have no train links. Just the bottle neck m66 - People need to listen to residents we have had enough we have no support from local council - Stop building in helmshore green belt before we have no green spaces left		Listen to the complaints that people are raising
1060	Stephen	Davies	Resident	SHLAA16304	Object	I agree housing needs to be built. But there are no plans to support infustructure in the area. Grane road for example has a lot of traffic issues since joining up to the M65. Another 160 homes on that road trying to get out and in to the development will be a nightmare. Also there are plenty of brown field site to build on especially in Blackburn. Helmshore is a village we pay premium prices for homes in the area to have this life style we don't not want it spoilt. Large firms/ housing contractors build quick homes cutting corners all the time. Where are the children going to go to school with all schools in the area full and some of our children already having to travel to bury for school.		
1254	Sian	Davies	-	SHLAA16304	Object	Objection to loss of green spaces in Helmshore		
1290	Deborah	Chapman	-	SHLAA16304	Object	The village of Helmshore has been steadily expanding and merging into Haslingden. The green spaces are disappearing and the character of the landscape is changing. These proposed developments will be detrimental to the environment and the wildlife in the area. The Greens lane site is already congested at school times and there is a wealth of wildlife on the golfcourse (I hear a rumour about more proposed building along the golf course backing onto Cherry Tree Way). There are foxes, hedgehogs, too many bird species to mention. - - The roads and parking are at a premium in this area. The land at Snig Hole and Curven Edge are places where children play - more houses would mean more traffic and parking problems. A new park has just been built and crossing as it was dangerous and parking at Snig Hole along Station Rd (Bowl Alley) is a problem already. - - The Grane site backs on to Grane Road which is already completed congested and a rat run to the M65. The road network, , drainage, schools and amenities cannot take any more in this area. The council do little to look after the area - - building more houses mean we would loose the beautiful walks around here.

1311	Joanne	Mellody	-	SHLAA16304	Object	Helmshore is already saturated with houses, causing driving and pedestrian hazards due to compromised visibility because of numerable parked cars on narrow streets, Please use the power entrusted to you by the electorate wisely and protect the green spaces for the sake of our environment and the mental health and wellbeing of Rossendale's population.		
1313	Jonathan	Hunt	-	shlaa16304	Object	Helmshore is already saturated with houses, causing driving and pedestrian hazards due to compromised visibility because of numerable parked cars on narrow streets, Please use the power entrusted to you by the electorate wisely and protect the green spaces for the sake of our environment and the mental health and wellbeing of Rossendale's population.		
1355	Rebekah	Haworth	-	SHLAA16304	Object	The area recently average speed check cameras have be implemented to improve the safety of the road, if you have ever tried to exit Holcombe road in peak traffic to either head to Blackburn or Haslingden you would would appreciate the 160 extra houses would only add to this problem. - I also am concerned by how local schools will be able to accommodate extra pupils. I myself moved closer to our local primary school, as I know that year on year there is increasing pressure on children to get a place in a good ofsted rated school, and each year there are more and more stories of children having to travel to ramsbottom as they have not been able to get a place in their local school. - Also currently our nearest NHS dentist is in rawtenstall a few miles down the road, and to try and get a appointment within a week at my local GPs is almost impossible. I am not against building more housing, however the current infrastructure will not support these extra houses. And will only lead to further problems.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
1367	Nicola	Hardman	-		Object	<p>I am writing to put forward my objections to the proposed property development in Helmshore. - - I will address each of the sites separately below however my overall concern which applies to all of the proposed development sites in Helmshore is the lack of services, infrastructure, and erosion of valuable green space. - - Look at an aerial picture of Helmshore 'village' in 2017. Can this once beautiful village really be classed as a village anymore? There is hardly any green space with housing having been allowed to be crammed into every available space and Helmshore is no longer distinguishing from Haslingden. - - You refer to the government white paper, encouraging higher density 'where appropriate'. How can the destruction of a small village be classed as appropriate? - - Does anyone in the council commute outside the valley for work? Particularly the m66? You are encouraging the move to the countryside (cheshire based property developers at the Loom development) yet it is not reasonably possible for anyone who values family life and their time to commute to and from Manchester anymore with this journey now taking approx 90 minutes each way and the roads unable to cope. - - You address the serious concerns about the m66 and the m60 which are virtually gridlocked but do not propose any solutions. This is merely an afterthought. How you can even consider the building of so many new homes 'encouraging higher density' without addressing the lack of infrastructure and the gridlock is negligent. The travel issue such as re-opening the railway should be the starting point. - - No mention is made in the report of building extra schools or how Helmshore will cope with an influx of local residents when schools are already over subscribed with some people resorting to pay for their children to attend primary school due to be offered unsatisfactory schools outside of the area they reside. Again this should be a starting point. - - The lack of green space in the urban area of Helmshore is particularly sad for future generations. Yes, Helmshore is surrounded by beautiful hills, but is this a reason to remove all the green space within the 'village' itself and turn this into a concrete jungle? - - To turn to the particular proposed developments; - - - HS2 78 HOLDEN ARMS/HOLCOMBE RD - - the size of this proposed site would have a devastating impact on the local school admissions given the amount of children this would mean. - - devastation of wildlife in the area. - - the traffic on grane road is already horrendous and trying to turn right from Holcombe Road onto grane road in busy periods is barely achievable. How would the traffic flow here work? - - - I fail to see why any green belt should be released to meet the 'housing requirement'. Planning for future generations should require saving greenbelt, not amending urban boundaries as suits and developing other areas of brownfield or other less developed areas of rossendale. The ratio of what is being proposed in Helmshore is grossly out of proportion with the size of the village. - - It's shameful that these developments are even being proposed and I assume that</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						the council knew this given that the documented - Proposal does not have the confidence to clearly define the proposed building in 'Helmshore' in the contents and attempts to sneak these developments in under vague headings. Perhaps the council was aware of the upset anticipated from local residents. - This speaks volumes. Do you want your legacy to be ruining Helmshore for the future? -		
1424	Pamela	Beech	-	SHLAA16304	Object	I find it hard to believe that Rossendale council are planning to take away designated green spaces, which have been in place for many years. - The outlined plan for green belt land to have housing built on it is disgraceful. - They say there is a housing shortage in the Rossendale area, perhaps if the council looked at the many empty houses in the area and encouraged building company's to look at these rather than continually wanting to build new. - The Helmshore area is already over populated, the schools are over subscribed with children having to travel some distance to attend school. The traffic congestion in the area is getting worse, what should be a 20 minute drive to work takes me 40, 20 mins just to get out of Helmshore. - The proposed site at sing hole, I feel would lead to many accidents, even with the new crossing it is still a challenge to cross the road, 3 weeks ago when taking my granddaughter to the park when waiting to cross a bus was going so fast I did not think he was going to stop, he slammed is breaks on, then as we crossed a car over took the bus and nearly ran us down. - This would be even worse with cars trying to get out of the entry as well. - - Rossendale golf club seem to think that every time they run out of funding that it is ok to try sell off land and build houses, maybe they should look at the accounts team who manage there finances. - The impact of houses been built on the golf course, will affect not only the population increase but will have a major impact on the wildlife. - - Therefore as a resident of Helmshore I strongly object to the proposed plans. -		
1521	Barbara	Shaw		SHLAA16304	Object	This is a very busy area with considerable traffic already. Another 100 plus houses will greatly exacerbate this problem. Also the local schools are already oversubscribed as are the GP surgeries. Haslingden and Helmshore do not have enough facilities for more people to move into the area.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
1589	David	Wise			Not Applicable	I would like to voice my opinion on the district plan HS2.78 to build up to 160 houses at the new Grane Village my main concern is the increased traffic to Holcombe Road and Grane Road. I live on Warburton Street and the amount of traffic using Grane Road is at saturation point trying to drive out of the street onto Grane Road is a nightmare it now takes on average 5-15 minutes to get out and trying to cross as a pedestrian is a nightmare. When considering this plan this should be taken into consideration, 160 homes two cars at least per house 320 cars going to Holcombe /Grane roads twice a day means an extra at least an extra 640 cars per day using these roads. Could you please explain does a semi detached building count as two houses or one if it counts as one the figures above would be double. I have enclosed a questionnaire regarding this plan. Which ever the entrance is situated i.e. Grane or Holcombe Road this will burden Grane Road with more traffic.		
1644		Muskett			Object	<p>1. <input type="checkbox"/> Are you concerned about the amount of traffic using Grane Road? 1644		Muskett			Support	<p>1. Are you concerned about the amount of traffic using Grane Road ?Yes It's a rat run to/from the motorway slip roads entrance and exit.</p> <p>2. Does the speed of traffic using Grane Road worry you ?Yes The 'speed camera van' should try parking about the 'Valley Cantonese'</p> <p>3. Does the traffic noise concern you?Yes Yes it's terrible - we turn the volume up on our tv and radio</p> <p>4. Can you feel the vibration in your property when HGV's pa? Yes</p> <p>5. Have you suffered any damage to your property due to vibration and/or impact from vehicles using Grane Road?No, it's only a matter of time.</p> <p>6. Does the volume of traffic make you feel afraid when walking along Grane Road?Yes, it's deafening and most unpleasant as well. You can't hold a conversation, it's so loud.</p> <p>7. Do you experience difficulty crossing Grane Road due to the amount of traffic?Yes, all the time.</p> <p>8. Is your property affected by excessive dust caused by passing traffic?Yes</p> <p>9. Do you or a member of your household suffer from Bronchitis, Asthma or any other respiratory complaint?Yes, severe chronic obstructive pulmonary disease.</p> <p>10. Does the volume of traffic affect your quality of life, is so please explain how?Yes. Yes, because it causes stress! I've been hooted at whilst trying to get in my car. I worry about people who have children and pets!</p> <p>11. Do you think a roundabout at the Cemetery would aid road safety?Yes. Better still would be traffic lights.</p> <p>12. Do you drive a vehicle?No</p> <p>a) If yes to the above, do you experience any difficulty entering the flow of traffic on Grane Ro Yes, it's frightening. Also parallel parking is a nightmare!</p> <p>b) How many minutes does this take?5-10</p> <p>13. Are you concerned about the Grane Village housing proposal?No. No, because then they will do something about it then.i.e. traffic lights. Houses would look far better than the units that are on Grane Road now. Residents directly opposite those must wish they were houses.</p> <p>Further comments: We didn't realise when we moved here how bad the traffic is. It's like the M6 with houses on it! If we had only known we wouldn't have moved here! It's downright dangerous! I would liken it walking on the hard-shoulder of a motorway, any day! Motorists even throw their rubbish from their moving cars, cans, bottles, paper cups etc. Horrible! My family don't call because its so bad to run round and park their cars so they expect us to go to them instead. We don't object to new houses being built they would look better than those units do, they are the result of what happened last time houses were proposed to be built on that land. Houses are being built everywhere you do in every town.</p>

1645	I	Yearsley			Not Applicable	<p>1. Are you concerned about the amount of traffic using Grane Road ?Yes It's a rat run to/from the motorway slip roads entrance and exit.</p> <p>2. Does the speed of traffic using Grane Road worry you ?Yes The 'speed camera van' should try parking about the 'Valley Cantonese'</p> <p>3. Does the traffic noise concern you?Yes Yes it's terrible - we turn the volume up on our tv and radio</p> <p>4. Can you feel the vibration in your property when HGV's pa? Yes</p> <p>5. Have you suffered any damage to your property due to vibration and/or impact from vehicles using Grane Road?No, it's only a matter of time.</p> <p>6. Does the volume of traffic make you feel afraid when walking along Grane Road?Yes, it's deafening and most unpleasant as well. You can't hold a conversation, it's so loud.</p> <p>7. Do you experience difficulty crossing Grane Road due to the amount of traffic?Yes, all the time.</p> <p>8. Is your property affected by excessive dust caused by passing traffic?Yes</p> <p>9. Do you or a member of your household suffer from Bronchitis, Asthma or any other respiratory complaint?Yes, severe chronic obstructive pulmonary disease.</p> <p>10. Does the volume of traffic affect your quality of life, is so please explain how?Yes. Yes, because it causes stress! I've been hooted at whilst trying to get in my car. I worry about people who have children and pets!</p> <p>11. Do you think a roundabout at the Cemetery would aid road safety?Yes. Better still would be traffic lights.</p> <p>12. Do you drive a vehicle?No</p> <p>a) If yes to the above, do you experience any difficulty entering the flow of traffic on Grane Ro Yes, it's frightening. Also parallel parking is a nightmare!</p> <p>b) How many minutes does this take?5-10</p> <p>13. 1647	Ron	Entwistle			Object	<p>Letter received 08.09.17: RE: PROPOSED HOUSING H84 ,Grane Rd Haslingden.</p> <p>The road access to the proposed site is to one of the busiest roads in Lancs. It is almost impossible to access the road even now from 6am to 7pm due to the constant flow of traffic. To add 160 houses, who may have more than one car is at least unrealistic and dangerous, Anyone who has travelled the Grane Rd during peak times must realise there is a serious problem. Many people have been killed in road accidents on this road.</p> <p>Being a resident opposite the proposed site, we have a serious problem parking our own vehicles which now have to be double parked to gain access to property. There is often an over spill of vehicles from the existing industrial estate next to the proposed site. This situation causes problems for larger vehicles using Grane Rd. Many vehicles have been damaged by other vehicles passing too close to parked vehicles causing damage to panels and mirrors. this also causes difficulty for pedestrians when vehicles are obstructing the footpath.</p> <p>There is an abundance of wildlife within the site, including rabbits, birds, bee's and many other creatures. Creating a corridor would be useless, as most if not all would be killed during construction work, the wildlife corridor would have to be alongside Grane Rd to protect wildlife and buffer the site from residents. Having lived here for 70yrs I can confirm there is a serious concern regarding land contamination, from the old gas works, and from the old bleach works. The area's affected were not cleaned up, they were just over filled to hide them. There is poison from the gasometer pits which were 40ft deep in the ground. On the old bleach works site, there was a caustic settlement lake in front of the works. On demolition, it proved too expensive to remove, so it was over filled with a mound of earth. These dangerous chemicals are still in the ground. The density of build is too much, houses will be cramped together with only one access road.</p> <p>These plans are designed to maximise profit from the site, regardless of the safety and wellbeing of the present residents. Traffic has already reached Gridlock at peak times, the plans would add approx. 200 vehicle movements onto Grane Rd. the disruption would be unbearable for residents and passing traffic.</p> <p>I therefore oppose the plans.</p> <p>Letter received 09/10/17:</p> <ol style="list-style-type: none"> 1. <input checked="" type="checkbox"/> Are you concerned about the amount of traffic using Grane Road?Yes 2. <input checked="" type="checkbox"/> Does the speed of traffic using Grane Road worry you?Yes 3. <input checked="" type="checkbox"/> Does the traffic noise concern you?Yes 4. <input checked="" type="checkbox"/> Can you feel the vibration in your property when HGV's pass?Yes 5. <input checked="" type="checkbox"/> Have you suffered any damage to your property due to vibration and/or

						<p>impact from vehicles using Grane Road?Yes</p> <p>6. Does the volume of traffic make you feel afraid when walking along Grane Road?Yes</p> <p>7. Do you experience difficulty crossing Grane Road due to the amount of traffic?Yes</p> <p>8. Is your property affected by excessive dust caused by passing traffic?Yes</p> <p>9. Do you or a member of your household suffer from Bronchitis, Asthma or any other respiratory complaint?Yes</p> <p>10. Does the volume of traffic affect your quality of life, is so please explain how?Yes</p> <p>Constant stream of vehicles day and night.</p> <p>11. Do you think a roundabout at the Cemetery would aid road safety?Yes</p> <p>12. Do you drive a vehicle?Yes</p> <p>a) If yes to the above, do you experience any difficulty entering the flow of traffic on Grane Road?Yes</p> <p>b) How many minutes does this take?1-5</p> <p>13. Are you concerned about the Grane Village housing proposal?Yes</p> <p>Further comments:</p> <p>Build density - too high. No allowance for parking 160-approximately 240 extra vehicles, twice or more each day. Road already has grid lock at peak times and road repairs. This is an ill thought our plan, to destroy the area, and a nightmare for existing residents. Vehicle emissions are already affecting people's health.</p>

Yes</p> <p>Further comments:</p> <p>Not enough effort is made to enforce speed limits. It's useless using radar, the worst speeders all have radar detectors, these should be made illegal. Pedestrian islands are urgently needed in order to be able to cross. The surface is worn out, this makes it noisy. It's 23-24 years since re-surfacing, it all needs taking up and doing again, replace with low-noise asphalt. Also, why aren't we allowed to know, despite exhaustive enquiries, the daily traffic count, or the current average speeds, or the kind of pollution levels we are subjected to daily. We've been ignored over these issues again and again.</p>

Also, when the 'average speed check' signs come into use, will the police be able to take the registration numbers of all the HGV which use Grane Rd?</p> <p>Could there be a possible radar camera on the 30 mph limit section of the road.</p> <p>Could the speed limit be 40 mph not 50mph?</p> <p>Could there be traffic lights instead of just a roundabout?</p> <p>This would help people to cross safely as well as slowing traffic.</p>

Are you concerned about the Grane Village housing proposal? Yes</p> <p>Further comments:</p> <p>If there is to be housing designated by Planners on this site, is it not courteous and appropriate to obtain the view of local residents as well as land owners / developers, prior to such a designation being put forward, to ensure a satisfactory outcome for all parties?</p> <p>Letter received 09/10/2017:</p> <p>I write to you as a resident directly affected by the proposal to designate the above site for housing. I state my views in the following paragraphs.</p> <p>Loss of light or overshadowing/Noise and Disturbance/Nature and Conservation/Landscaping</p> <p>I would prefer to see the green fields undeveloped for reasons of habitat conservation and animal grazing, although they have been left to lie fallow for a number of years, possibly with the aim of allowing the land to deteriorate with a view to offering it for sale as suitable for development. This environment has been enjoyed by my family for the past 42 years. I accept however that some development is inevitable, as I understand that the majority of land owners are in agreement with such plans. We have over this period had uninterrupted views of Tor and the local countryside, which was one of the reasons for buying our property. My husband and I take a pride in</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>our garden which has been created over a long period, and which provides a quiet, peaceful and private area in which to relax. No doubt these reasons do not fit in with the legitimate planning objection criteria but I feel that they should be noted. The plans previously submitted and which are awaiting amendment by the prospective developer, will no doubt eliminate this and have an impact on privacy. A small number of properties directly overlook the site and I believe that sufficient distance should be provided between current and new properties to overcome this obstacle. The provision of a buffer between the perimeter of residents' gardens and new properties, with sufficient parking for current residents, would go some way to compensating for this concern.</p> <p>Highways Safety/Noise and Disturbance resulting from use/Hazardous Material Grane Road is notoriously busy, with the traffic travelling its length increasing year on year. I support the safety measures campaigned for by Grane Residents' Association and the improvements implemented to aid road safety, including the average speed cameras currently under construction along the length of Grane Road from Blackburn to Haslingden. We understand that Lancashire County Council is insistent that the access point for any housing development will not be situated on Grane Road.</p> <p>However, even if the access point should be re-located to Holcombe Road, the development of 160 houses, with an estimated 320 resident cars, plus service and emergency vehicles, will put enormous strain onto the already saturated Grane Road, reducing our quality of life even further. It must be remembered that this area is subject to many visitors accessing the cemetery, who currently wait to cross the road for up to 10 minutes due to the heavy flow of traffic. Current noise and disturbance from use of the road is high. Vibration in our house, caused by passing heavy vehicles, is quite substantial and detrimental to our property. An increase in the volume of traffic generated from the proposed development will add further problems in a major way, as the majority of vehicles will still be entering Grane Road from Holcombe Road if access to the site is changed. A roundabout at the Holden Arms junction would be beneficial generally and would aid the flow of traffic. I would however, oppose the implementation of traffic lights as a solution, on the grounds that this will cause disturbance to residents, impact on air quality and health due to idling vehicles waiting at the traffic lights, cause tailbacks at peak periods, take away parking facilities from outside our homes and create a danger to emergency services.</p> <p>In our response to the former housing development plan we stated that at the bottom end of the proposed site was a settling pool for the hazardous waste, created when the site was owned by the Bleach Works. Is there still to be a children's playground situated in this vicinity which is also adjacent to a water source and gas governor? If so, surely it would be better placed central to the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
						<p>site or nearer to Grane Road so that such a facility could be enjoyed by all residents of the wider "Grane Village," as would a village green. I trust that hours of working during any construction on the site would be such as to avoid disruption to residents in the surrounding area. A further consideration which should be taken into account is the question of building materials which should be sympathetic to the surrounding area and once agreed in the final plan be adhered to, unlike development of The Courtyard where building requirements were flaunted by the developer.</p> <p>I presume that a Council Tax rebate will be paid to local residents to compensate for noise, disturbance, dust, movement of heavy plant and machinery etc. should development take place.</p> <p>Loss of Trees/Visual Amenity</p> <p>The loss of trees and greenery which will result, should the current site plans go ahead, is a major loss as it is on the very edge of a truly beautiful area with a number of well used trails, the reservoirs and Tor. Rossendale's natural beauty needs to be conserved for residents and tourists alike. This is yet another green space which if developed, will change the village as we know it and make it unrecognisable. Future plans therefore must be sympathetically considered to meet the needs of local residents where ever possible.</p> <p>Drainage of site</p> <p>Drainage and flooding should be taken into account should the land be developed, to ensure that water running off the hillside is adequately carried away. The land is currently saturated, with water backing up into our gardens and with standing water on Grane Road during heavy downpours, adding further danger to the road.</p> <p>I trust that Grane Residents' Association will be provided with the developer's amended plans, together with the results of their site survey including air quality levels, traffic volume and water levels/flood risk analysis, prior to the site being designated for housing.</p>

1764			Taylor Wimpey UK Ltd		Support	<p>Site Status</p> <p>3.1 Taylor Wimpey have sole control over a 6 hectare site at Grane Road, Haslingden known as 'Grane Village' and have been working alongside the Council to promote the allocation of this site for residential development since 2012.</p> <p>3.2 This site was originally put forward for development as part of Council's 'Lives & Landscapes- Green Belt & Urban Boundary Review' consultation in December 2012, as it was recognised as being at the edge of the urban area and in poor condition; therefore making a limited contribution to the countryside. Taylor Wimpey fully supported this boundary change and have since provided further clarification to the Council on the site's suitability and deliverability through a Development Statement, submitted in January 2014 and this is attached at Appendix 1.</p> <p>3.3 The site (SHLAA Ref: 16304) is now proposed as a housing allocation (Site HS2.78) within Policy HS2 of the Draft Plan, although we note this also include another small parcel of land in separate ownership (SHLAA Ref: 16402).</p> <p>3.4 The attached Development Statement and evidence submitted to date have demonstrated that this is a sustainable and deliverable site in accordance with the NPPF, which is capable of delivering up to 160 units, commencing within the next 5 years.</p> <p>3.5 In light of this we would question why this site has been included in Table 1 as delivering in years 6-15, and ask that this be amended to years 1-5, as Local Plans should not be holding deliverable sites back, particularly where there is an existing 5-year supply shortfall as there is in Rossendale.</p> <p>3.6 We would also question the site area and capacity calculations for SHLAA 16304, given that the Taylor Wimpey have confirmed that they control 6 hectares that could deliver up to 160 units, so we would ask that this is amended as well.</p> <p>3.7 We also welcome the site's categorisation as 'mixed' which acknowledges that it is part brownfield.</p> <p>Evidence Base – Grane Village</p> <p>3.8 We now provide comments on the evidence base documents which consider the Grane Village site: Landscape Assessment</p> <p>3.9 We agree with many of the findings of this report, but have concerns with some of the conclusions in relation to the Grane Village Site. As such, Randall Thorp have provided a comprehensive rebuttal statement which provides commentary on the findings of the Landscape Report, which can be found in Appendix 2. The Randall Thorp note should be</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	---------	-----------------

read in conjunction with these representations and can be summarised as follows:

- The Council’s Landscape Assessment recommended that planned gaps in the layout of the site should be used to retain views to Tor Hill. It is not considered that the existing view to Tor Hill from the identified viewpoint on Grane Road is of exceptional quality due to the visual influence of the large scale industrial buildings which dominate the foreground to the left of the view. As such, it is not considered that the quality of this existing view is high enough to require the entire view line to be kept free from development.

- Appropriately designed development can be delivered on the Grane Village site without resulting in significantly adverse effects upon landscape character, landscape features, or visual receptors.

3.10 This demonstrates that development of the Grane Village site will not generate any adverse landscape impacts, reinforcing its allocation in the Draft Plan.

Strategic Housing Land Availability Assessment- Stages 1 and 2 (May 2017)

3.11 The site was assessed in the SHLAA under site reference 16304. Whilst we agree that the site is suitable and achievable, we would question why it has been not been considered deliverable in the short term, and have a few comments on some of the findings. The Council already consider this site a suitable housing allocation, however, in our view, the site actually performs even better in certain categories of the SHLAA as explained below:

- Ecological value- The site is scored as red in this category, with the commentary explaining how a small strip of land in the site is located within woodland and grassland Stepping Stone. The Development Statement for this site considered all ecological matters, and concluded that there are no ecological or arboricultural constraints preventing the development of this site and appropriate mitigation will be provided where necessary. Additionally, the area of high ecological value to the south-east of the site has been excluded from development, and will therefore be protected by proposals. This is not considered to be an issue on site, therefore the site performs better than a red scoring in this category when taking into consideration the masterplan.

- Landscape value- In the Council’s 2015 Landscape Assessment, it is concluded that the Grane Village site is ‘suitable for development with mitigation’. As the 2015 Landscape Assessment conclusions were specific to the site, it is therefore unclear why the SHLAA has stated that this site has a high landscape impact. The Randall Thorp report contained at Appendix 2 further confirms that the site is suitable from a landscape perspective. It is therefore considered that the landscape scoring or the site is incorrect in the SHLAA, and should certainly not be categorised as red.

3.12 We also note that the scoring methodology and scope of the SHLAA does not allow for detailed considerations such as masterplanning and proposed design/mitigation. The Illustrative Masterplan for Grane Village (see Appendix

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.078	Further comment	
						<p>2) illustrates how the existing public right of way does not pose a constraint on site, on the contrary it can be well-integrated into development proposals.</p> <p>3.13 Therefore, the site will in reality score higher than amber in the recreational value category, when considering the design of development proposals. A similar comment can be made with regards to the flood risk category-the development proposals shown on the illustrative masterplan excludes the area at medium/high risk of surface water flooding. For clarity, the proposed development is located entirely within Flood Zone 1, representing the lowest level of flood risk.</p> <p>Conclusions on Grane Village</p> <p>3.14 Overall, Taylor Wimpey are wholly supportive of the Grane Village, Haslingden allocation (HS2.78), subject to a few comments on the delivery numbers outlined in Table 1 and the evidence base which assesses the site. In particular, it needs to be clarified in Table 1 of the Draft Local Plan that the Taylor Wimpey site can deliver 160 dwellings, not 106 as currently suggested.</p> <p>4. CONCLUSION</p> <p>4.1 Overall, Taylor Wimpey fully support the allocation of the Grane Village site (HS2.78), subject to the comments and suggestions made above, which note that:</p> <ul style="list-style-type: none"> • The overall housing requirement should be increased to take account of economic aspirations and to provide flexibility to accommodate any unmet need generated by the adjacent authorities in Greater Manchester. • The Council should consider allocating additional sites, both as long term reserve sites to provide some headroom in their overall supply, and smaller short term sites to boost 5 year supply, given the current shortfalls. <p>4.2 This representation has shown that the site is deliverable and developable in line with the NPPF, and has also demonstrated its importance for housing delivery in Rossendale, representing over 4.4% of the total allocated dwelling numbers and will make a significant contribution to 5 year supply.</p> <p>4.3 Importantly, Taylor Wimpey have been promoting Grane Village for almost 5 years and will continue to work alongside the Council to demonstrate that it can begin delivering in the next 5 years.</p> <p>Please see appendix for development statement.</p>

673	Rosemary	Kearney	-	SHLAA16285	Object	We strongly object to the above planning applications for a number of reasons. - - Helmshore as an area is struggling to cope providing the amenities at present with the residents there are at the moment. The local primary schools are already over subscribed and children from the area are having to attend school in other towns. - - There has been a lot of money (self funded) spent on Snig Hole play area which is a great place for children to play safely and away from the main road. If there are more houses built there, the new resident's cars will have to drive right past the area which is unsafe for children. - - The planning for Rossendale Golf Club on Greens Lane again affects local school children as Haslingden High School is located on Greens Lane. This road is already busy especially at school times and more housing will only exacerbate the situation. - - The land off Curven Edge is one of the only green grass areas that children can play on safely. Especially as the local playing fields have been fenced off on Helmshore Road. This area is known locally for holding water as a culvert flows directly under it so I would not expect it to be a good area for development.		-

697	Julie	Woods	-	HS279, hs278, hs278, hs277, hs276	Object	<p>Helmshore village is being swamped with more and more houses and the roads and local services are becoming less and less able to cope. We have already seen huge building programmes including the Power Mill and the Loom on Holcombe Road, Weavers Dene, Alden Brook apartments and Broadway housing development which has only added to the pressure to all the local services. Trying to exit onto Helmshore Road from Fairhill or Curven Edge is already very dangerous due to the amount of traffic at peak times and raises real safety concerns due to visitors and new residents cutting through the village. Trying to get a doctors appointment is already difficult. The proposal of 15 houses on Greens Lane is so impractical. The traffic around St Veronicas and Haslingden School is so congested people are blocking in drive ways and making it impossible for residents to park. The road on Brooklands Avenue is so narrow it is impossible to pass at peak times and residents are already complaining to the schools about the parking issues. My main concern is Rossendale Golf Club who are now holding a meeting on 7th October to discuss selling the land at the rear of the houses on Cherry Tree Way. They have already sold the land on Greens Lane and are now proposing to sell the land at this location, they are threatening the players that if they do not vote for it that they will put up their golf fees. They have no consideration for the people who live in the houses on Cherry Tree Way and are basically blackmailing the players into voting for the decision to go ahead. Should this proposal go ahead the roads on the estate will not be able to cope with the additional traffic, (we are unsure where they are proposing to gain access) not to mention the value of our houses decreasing. I am very worried about this proposal for obvious reasons and where will it all stop if they are allowed to continue. We moved to Helmshore more than 20 years ago and chose the area because of the village feel, it was relatively quiet but had all the local amenities. The Golf course provides us with a green space between the continual growth of our village and we would like reassurance that they will not be able to continue to sell of land to greedy developers</p>		-

945	S	Mitton	-		Object	The area in question at Rossendale Golf Club on Greens Lane is the home to an array of insects, animals, bees, butterflies and bats. The line of trees which are semi mature house some of these insects, butterflies, bees and bats. Not only building homes on this lovely site but the impact of the traffic down Greens Lane, the privacy of the residents already on Greens Lane, their light and traffic congestion. Also the strain it will have on the local Schools and Medical services.		No, other than please reconsider using green belt land when there are plenty of brown field sites no in use.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
950	Stuart	Thompson	None	SHLAA16285	Object	The site and volume of housing proposed will dramatically increase the burden on local site infrastructure such as schools, healthcare, road infrastructure. - - Lancashire County Council have already stated that the funding available to further develop these type of services are scheduled to be cut, not increased, in the coming years. This will lead to an unmanageable overload and therefore a deterioration in educational and health provision to the current population which would be significantly exacerbated should the population increase. - - A demonstration that funding will be available and all additional support services will be developed/improved from their current condition needs to be clearly stated by local, county and central governing bodies. - -		
964	Joanne	Smithson	-	SHLAA16285	Object	The access to property already on greens lane and connecting Brooklands Ave is already a nightmare for access. Especially at peak times when owners of the proposed properties would be also be needing access/egress.		
973	Deborah	Haworth	-		Object	I object to more houses being built in Helmshore, and specifically on green belt land. It's already difficult to get an appointment at the doctors without more residents moving in. Our schools are already over subscribed. Our roads are already busy, the roads and pavements are already a disgrace they can't cope with more strain. Helmshore is supposed to be a village, it's fast becoming a town. We need to protect our green spaces, our wildlife and our clean air. We need to reduce carbon monoxide, road traffic accidents and the happiness and wellbeing of our residents. Is all you care about money? You need to listen to the residents of Helmshore, we live here, many of us were brought up here and are already shocked by how ,ugh it has changed. I'm only 45 but have lived here all my life and I'm shocked to see just how many more people and houses have appeared. Look after our heritage, if we need more residences then convert some of the old disused buildings rather than build on our green land killing wildlife and contributing to global warming.		
980	Julie	Cawtherley	-	SHLAA16285	Object	It is green belt land and should not be built on.		There are too many housing developments being considered. The infrastructure is Helmshore can not accommodate the new residents
983	Neil	Leeming	-	SHLAA16285	Object	The uprooting of 250 trees a wild animal oasis, will cause major disruption on Greens Lane which is all ready highly congested at school times.		by building on green belt sites you are taking away our village way of life and wildlife areas within the village.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
1049	wendy	boniface			Object	There are to many references to list - The house proposed behind cherry tree will cause problems with site entrance and traffic. The same is applicable for greens lane and the dip off cherry tree. - The last set of houses built in helmshore were supposed to be the last. You are compromising the integrity of the village. - I would like to point out that greens lane is already an unsafe road and should be one way. Heavy water that runs down that lane after rain will also be made worse by the removal of trees -		-
1060	Stephen	Davies	Resident	SHLAA16285	Object	I agree housing needs to be built. But there are no plans to support infrastructure in the area. Grane road for example has a lot of traffic issues since joining up to the M65. Another 160 homes on that road trying to get out and in to the development will be a nightmare. Also there are plenty of brown field site to build on especially in Blackburn. Helmshore is a village we pay premium prices for homes in the area to have this life style we don't not want it spoilt. Large firms/ housing contractors build quick homes cutting corners all the time. Where are the children going to go to school with all schools in the area full and some of our children already having to travel to bury for school.		We need homes but well thought out planned homes. With good investment in roads, gp surgerys, schools, parks etc. We can not keep cutting into our countryside for the sake of making shareholders rich they don't love here we do please don't have the wool pulled over your eyes for all our sakes and children's.
1116	Sheila	Farnell	-	SHLAA16285	Object	Brook lands Avenue is the route out of Greens Lane and is already over congested at peak times. The school attracts a lot of traffic making the exit dangerous. - Broadway is already a very busy road and so trying to get out at the junction can take a very long time.		-
1128	Joan	Burke	-	SHLAA16285	Object	Each day I walk along Greens Lane and I have seen the traffic steadily building up over the years.Access would have to be via Brooklands avenue.Houses are on both sides of the avenue with cars parked on the left.It is already a bottleneck as the High school uses it to drop the children off.The council seems to want to allow all the green spaces to be built on with no thought for future generations.I have seen numerous wild animals in the trees,where will they go now ?It would take 20 years plus to grow more trees to the height they are now. and we will never get the wild life back.		-
1143	Keith	Walker	-	SHLAA16285	Object	I object on the grounds that you plan to build on green belt and: this will destroy an area of semi mature woodland, increase traffic congestion, devalue current properties, detract from and spoil the peaceful habitat the current residents of Greens Lane currently enjoy, in general the continued encroachment into green belt areas in rossendale is detracting from the very thing that makes the area so special and valued by those that choose to live there.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
1145	Patricia	Walker	-	SHLAA16285	Object	I live on Greens Lane next to the proposed site and strongly object to the proposal of uprooting 250 trees and building houses on the golf course site. - The golf course is a much loved local green belt area and Greens Lane is already a very busy road without further houses and the disruption of building on a school access road. - I think it would be tragic to lose such a beautiful area and it would definitely be detrimental to house prices in the area. We treasure having an unspoilt outlook and was the main reason we bought our house. This would be completely ruined if the proposed houses went ahead. I also think with the vast number of school children walking up Greens Lane every day it would be dangerous and very disruptive to have this level of building going on in the area.		I wish to know if there is a proposed access road near our house so that there would be noise pollution from traffic near our garden
1202	Derek	Burke	-	SHLAA16285	Object	The trees opposite my cottage have now grown higher than the houses and are a haven for wildlife. Vehicle access via Brooklands Avenue can not cope with current usage. Will Brooklands Avenue be widened? Will there be any more school places? Is this the start of further development and will the current infrastructure ie Doctors cope? I am objecting on behalf of future generations.		-
1218	Jack	Bacon	-	SHLAA16285	Object	Local schools are full, facilities such as Doctors surgeries overstretched and all the council's plans are doing is elevating the risk. The aims of the council to systematically take away the green belt land which makes our Valley so special is despicable.		-
1224	Jack	Tattersall	-	Ref shlaa16285	Object	I strongly object to having to destroy 250 young and healthy trees which is also a haven for wildlife such as birds and deer and other small creatures.		There is the high school which is very close by and with the amount of traffic coming and going it is going to get very busy it is very congested now so building 15 new homes isn't going to help.
1232	Liam	Greenhalgh	-	SHLAA16285	Object	I object to the selection of this site to build housing as doing so would involve the destruction of the semi-mature woodland that is well established there. The site is home to a wide range of wildlife and destroying it would have a serious impact on the biodiversity of the area. In addition to this, Greens lane is the main access road to Haslingden High school and building houses on both sides could cause access issues if people were to park their cars on the road in front of their new properties. Currently parking is prohibited on that side of the road.		Generally speaking I believe that without significant investment in infrastructure building so many new houses in the area is unwise. School places, transport (in particular traffic on the M66) and overcrowding are already serious issues.
1254	Sian	Davies	-	SHLAA16285	Object	Objection to loss of green spaces in Helmshore		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
1290	Deborah	Chapman	-	SHLAA16285	Object	The village of Helmshore has been steadily expanding and merging into Haslingden. The green spaces are disappearing and the character of the landscape is changing. These proposed developments will be detrimental to the environment and the wildlife in the area. The Greens lane site is already congested at school times and there is a wealth of wildlife on the golfcourse (I hear a rumour about more proposed building along the golf course backing onto Cherry Tree Way). There are foxes, hedgehogs, too many bird species to mention. - The roads and parking are at a premium in this area. The land at Snig Hole and Curven Edge are places where children play - more houses would mean more traffic and parking problems. A new park has just been built and crossing as it was dangerous and parking at Snig Hole along Station Rd (Bowl Alley) is a problem already. - The Grane site backs on to Grane Road which is already completed congested and a rat run to the M65. The road network, , drainage, schools and amenities cannot take any more in this area. The council do little to look after the area - - building more houses mean we would loose the beautiful walks around here.		-
1294	Michael	Chapman	-	SHLAA16285	Object	These developments will alter the community feel of Helmshore. - The school infrastructure isn't suitable. - The green belt should be protected. - -		-
1299	David	Bemment	-	SHLAA16285	Object	There is too much development in and around Helmshore. The roads cannot cope with any increase in traffic volume.		I vigorously object to any further development in and around Helmshore. - The majority of the open spaces have been built on and the few remaining ones should be left alone, especially the one off Curven Edge, SHLAA16288. This area has been used by children as a play area since I moved here in 1990 and before that. - The local roads are gridlocked in the mornings and late afternoons, any increase in traffic volume would be intolerable. The other routes out of Helmshore are gridlocked as well e.g. Grane rd, M66 and Haslingden Rd. - The schools are full already and children from Helmshore can't always get into a school in Helmshore. - I think the development of Helmshore as a suburb of Manchester has gone far enough. -

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
1311	Joanne	Mellody	-	SHLAA16285	Object	Helmshore is already saturated with houses, causing driving and pedestrian hazards due to compromised visibility because of numerable parked cars on narrow streets, Please use the power entrusted to you by the electorate wisely and protect the green spaces for the sake of our environment and the mental health and wellbeing of Rossendale's population.		-
1313	Jonathan	Hunt	-	SHLAA16285	Object	Helmshore is already saturated with houses, causing driving and pedestrian hazards due to compromised visibility because of numerable parked cars on narrow streets, Please use the power entrusted to you by the electorate wisely and protect the green spaces for the sake of our environment and the mental health and wellbeing of Rossendale's population.		-
1337	Andrew	Holt	-	SHLAA16285	Object	I feel these developments are to large & would add to the ongoing congestion on the Edenfield bi pass leading to the M66 & on the already busyGrane Rd. - - Whilst I accept housing may be needed this should be on brown field sites but also aligned to improvements in infrastructure which currently is not being developed		-
1345	Gerard	Greenhalgh	-	SHLAA16285	Object	The Planning dept in the Plan just skims over the fact that 250 semi mature trees (30 Yrs old) will be destroyed for the sake of up to only 15 houses. I complete waste and what an upheaval it will cause! - There is numerous wildlife that uses the areas, birds nesting in the trees, deer are regularly see feeding in the copse, it will impact on the biodiversity of the area. - There will be further congestion in Greens Lane, already an issue at peak times. - It is beautiful rural quiet area just around the corner from busy Brooadway. - Greens Lane is the natural Green Belt Boundary. - Think again and leave this copse alone!		Not at this time
1348	Mary	Greenhalgh	-	SHLAA16285	Object	This will be the destruction of around 250 semi mature trees, all for the sake of 15 houses. - - There is wildlife that use the area including deer. - - The Green Belt forms the natural line of Greens Lane and shouldn't be extended. - - Will severely impact on the roads especially at Peak times. - -		no

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
1355	Rebekah	Haworth	-	SHLAA16285	Object	The area recently average speed check cameras have be implemented to improve the safety of the road, if you have ever tried to exit Holcombe road in peak traffic to either head to Blackburn or Haslingden you would would appreciate the 160 extra houses would only add to this problem. - I also am concerned by how local schools will be able to accommodate extra pupils. I myself moved closer to our local primary school, as I know that year on year there is increasing pressure on children to get a place in a good ofsted rated school, and each year there are more and more stories of children having to travel to ramsbottom as they have not been able to get a place in their local school. - Also currently our nearest NHS dentist is in rawtenstall a few miles down the road, and to try and get a appointment within a week at my local GPs is almost impossible. I am not against building more housing, however the current infrastructure will not support these extra houses. And will only lead to further problems.	-	
1359	Daniel	Greenhalgh	-	SHLAA16285	Object	There currently exist a large stretch of semi-mature woodland on Greens Lane. This woodland supports local wildlife and its removal will damage the local ecosystem even further. Greens Lane also serves as the main access road for Haslingden High School and currently, at school times, the road becomes extremely congested with parked cars and moving traffic. By building more houses (further increasing traffic on the road) and removing the no parking side of the road by the woodland, this congestion will only be increased further. Increasing congestion will pose a higher danger on greens lane to school children walking up the street as well.	-	
1408	Janet	Birkins	-	SHLAA16285	Object	I wish to object to the uprooting of 250 mature (not semi) trees. These trees form a conservation area for birds, deer, voles, hedgehogs and numerous wildlife.	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
1424	Pamela	Beech	-	SHLA 16285	Object	I find it hard to believe that Rossendale council are planning to take away designated green spaces, which have been in place for many years. - The outlined plan for green belt land to have housing built on it is disgraceful. - They say there is a housing shortage in the Rossendale area, perhaps if the council looked at the many empty houses in the area and encouraged building company's to look at these rather than continually wanting to build new. - The Helmshore area is already over populated, the schools are over subscribed with children having to travel some distance to attend school. The traffic congestion in the area is getting worse, what should be a 20 minute drive to work takes me 40, 20 mins just to get out of Helmshore. - The proposed site at sing hole, I feel would lead to many accidents, even with the new crossing it is still a challenge to cross the road, 3 weeks ago when taking my granddaughter to the park when waiting to cross a bus was going so fast I did not think he was going to stop, he slammed is breaks on, then as we crossed a car over took the bus and nearly ran us down. - This would be even worse with cars trying to get out of the entry as well. - - Rossendale golf club seem to think that every time they run out of funding that it is ok to try sell off land and build houses, maybe they should look at the accounts team who manage there finances. - The impact of houses been built on the golf course, will affect not only the population increase but will have a major impact on the wildlife. - - Therefore as a resident of Helmshore I strongly object to the proposed plans. -		I feel that before any further decisions are made the people of Rossendale should be given the opportunity to speak. And given advance notice of any plans so they have time to reposond unlike this consultation which has not allowed people time to respond.
1427	Lee	Kershaw	-	SHLAA16285	Object	This is green belt land and it should not be allowed to be built on.		We live in a beautiful part of the World, packing houses onto any bit of spare land just so that we can say to the Government that we have completed our quota is a bloody crime. If we are not careful we will become another suburb of Manchester.
1491	Edward	Mercer	-		Object	Traffic is a problem already with access to the High School morning And afternoon with congestion on Greens Lane and Brooklands Ave. Also evenings with the Performing Arts centre on the High School campus.Residents have difficulty parking their cars with nowhere else to park. More housing with access on to Greens Lane will only add to this problem		The High with over a thousand children, and parents dropping off and picking up all creating a blockage on Brooklands Ave. On to Broadway is already a safety hazard that needs dealing with.more housing on Greens Lane will only add to this problem

1766			Peel Holdings (Land and Property) Ltd		Support	<p>1. Introduction</p> <p>1.1 This representation is prepared by Turley on behalf of our client Peel Holdings (Land & Property) Limited (hereafter “Peel” or “our client”). It provides comments to Rossendale Borough Council (RBC) in respect of the Rossendale Draft Local Plan1 (July 2017) (‘DLP’) which is currently the subject of public consultation.</p> <p>1.2 This document relates exclusively to the promotion of land at Rossendale Golf Course, as a development opportunity. It should be considered in conjunction with the overarching representation submitted by Turley on behalf of Peel.</p> <p>Draft Rossendale Local Plan</p> <p>1.3 As set out in the overarching representation submitted, Peel has continuously and historically engaged with the plan-making process for Rossendale. This has included the submission of detailed representations to the previous Core Strategy and the draft Lives and Landscapes DPD (since withdrawn), including Development Frameworks that set out the development potential at four sites:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden (allocated in part) • Land at Haslam Farm, Rawtenstall (allocated in part) • Land at Blackburn Road, Edenfield (allocated) • Land at Burnley Road, Edenfield (not allocated) <p>1.4 Peel welcomes the progress which has been made on the emerging Local Plan and supports, in principle, the proposals for development within it. In particular, Peel strongly supports the allocation of land at Kirkhill Avenue in Haslingden, Haslam Farm in Rawtenstall, and Blackburn Road in Edenfield, which include some or all of three of the sites previously put forward (as above).</p> <p>1.5 It is noted, however, that additional work is required to ensure that the emerging Local Plan is capable of meeting the full development needs of the Borough. Additional land will need to be allocated for residential development, above that which has been identified in the DLP.</p> <p>1.6 This opportunity is being taken to make representations in relation to the sites previously identified by Peel as capable of accommodating development in the Borough that have not been put forward in the DLP for allocation and/or Green Belt release. Peel is preparing updated Development Frameworks which will promote and justify its landholdings within Rossendale. Matters addressed below and in the overarching representation which directly affect its landholdings will be discussed in detail in each Development Framework.</p> <p>Additional Site Allocations</p> <p>1.7 In the context of the need for the Rossendale DLP to allocate additional land for development, Peel wish to reiterate the development opportunities at each of the four sites previously identified, as well as proposing a further</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
						<p>potential site at Rossendale Golf Club.</p> <p>1.8 These sites can each provide a deliverable housing development site in sustainable locations adjoining existing settlements. Initial reviews of site constraints and opportunities, landscape and highways have indicated that there are no significant barriers to development.</p> <p>Development Frameworks</p> <p>1.9 Further site appraisals are being undertaken to inform updated Development Frameworks which will be provided to the Council in due course.</p> <p>1.10 The updated Development Frameworks will:</p> <ul style="list-style-type: none"> • Provide analysis of the site constraints and opportunities. • Where relevant provide details of the findings of further technical assessment (such as highways, flood risk, ground conditions). • Consider the key principles for development of the site. • Present a proposed site layout plan illustrating development parcels, access, landscaping, etc. • Comment on the economic benefits of development. • Address comments / observations made within the recently published evidence base for the emerging Local Plan. <p>Proposed Development Opportunities</p> <p>1.11 In advance of the full Development Frameworks, the individual site representations are submitted providing initial reviews of the development opportunities.</p> <p>1.12 The Sites are represented as follows:</p> <ul style="list-style-type: none"> • Land at Kirkhill Avenue and Moorland Rise, Haslingden • Land at Haslam Farm, Rawtenstall • Land at Blackburn Road, Edenfield • Land at Burnley Road, Edenfield • Land at Rossendale Golf Course, Helmshore (this document) <p>1.13 This representation relates to land at Rossendale Golf Course and includes:</p> <ul style="list-style-type: none"> • Section 2: A description of the site and its location • Section 3: Details of the consideration of the site in the Strategic Housing Land Assessment (SHLAA)2 and a review of the planning policy context including the Draft Local Plan • Section 4: A Green Belt appraisal, commenting on the findings of the Green Belt Review • Section 5: Concluding comments <p>1.14 Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan and the merits of the sites promoted here for residential development.</p> <p>2. Opportunity Site Site Description</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
						<p>2.1 Rossendale Golf Course is located immediately to the east of Helmshore. It extends to 97.13 ha in total, and the site for promotion by Peel is a c. 21.96 ha parcel of land at the north west corner of the golf course. The Site is an I-shaped plot of land adjoining Greens Lane to the north and to the rear of properties on East Street, Fair Hill and Cherry Tree Way to the west.</p> <p>2.2 The site is surrounded by residential development to the west and north west, and is opposite Haslingden High School to the north. The golf course extends to the east and south, beyond which is Lower Cockham Farm.</p> <p>Local Facilities</p> <p>2.3 The site is located within easy walking distance (400m/ 5 minutes) of Helmshore village centre which has a small number of services and amenities including a Post Office, general store, barbers and pharmacy.</p> <p>2.4 The town of Haslingden is 2 km north of the site and Rawtenstall is 3.5km to the east. These towns include a wide variety of traditional town centre uses including supermarkets, national banks and building societies, dentists, high street chemists and a number of restaurants and bars.</p> <p>2.5 St. Veronica's RC Primary School is immediately adjoining the site at the north west boundary. Haslingden High School is immediately opposite the site on Greens Lane site.</p> <p>2.6 There are bus stops located on Broadway, a few minutes' walk from the site. Services run north to Haslingden, Accrington and Blackburn, and east to Rawtenstall. Longer distance services also run south to Bury and Manchester.</p> <p>2.7 The site is well connected to both the local and national highway, with the A56 less than 1km from the site which connects to the M66 (4.5km) and in turn the M62 and M60 19km).</p> <p>3. Planning Policy Context</p> <p>Consideration in SHLAA</p> <p>3.1 The Draft Local Plan evidence base includes the 2017 Strategic Housing Land Availability Assessment (SHLAA), which aims to identify the land supply for housing within the administrative boundary of Rossendale within the next 15 years (2017 – 2032).</p> <p>3.2 The Site was not promoted by the SHLAA, it is noted as a potential site that was excluded after Stage 1 (Site Ref 16286) for the reason 'The site is currently in use as a golf course. The landowner has not expressed an interest to develop the site for another use.'</p> <p>Rossendale Draft Local Plan</p> <p>3.3 As discussed earlier in the overarching representation, the Draft Local Plan (DLP) recognises that some release of Green Belt land will be required to meet the housing requirements and the NPPF requirement for the Council to maintain a 5 year land supply of deliverable sites (DLP, page 12).</p> <p>3.4 The evidence presented in the DLP indicates that 4,425 dwellings will need to be delivered over the period to 2034. Considering the under provision of</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
						<p>425 dwellings since the adoption of the Core Strategy and the potential land supply from non- Green Belt sources of 2,907 dwellings, there is a significant gap of approximately 1,518 dwellings.</p> <p>3.5 The Draft Local Plan proposes areas for release from Green Belt, allowing for a delivery of a further 715 dwellings. It is therefore evident that the Green Belt releases proposed by the DLP need to be more than doubled - to accommodate 1,518 dwellings - if the emerging Local Plan is to be found sound.</p> <p>3.6 The DLP does not propose to include the majority of this land within the Urban Boundary and the site would remain designated Green Belt. Policy SD2: Urban Boundaries directs all development within such boundaries 'except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area.'</p> <p>3.7 A small allocation has been identified in the DLP (HS2.79) which Peel are supportive of. However, as above, it is clear that there is a significant gap between the housing land supply identified in the DLP and the demand, which cannot be met by non-Green Belt sites alone. Peel therefore proposes that land at the golf course can make a greater contribution to meeting the housing needs of the borough.</p> <p>3.8 Peel proposes that including this site as a housing allocation and its release from Green Belt would be in keeping with the NPPF and would assist in achieving the shortfall of land within the Borough for the necessary housing development to meet demand.</p> <p>3.9 The following section considers the role of the land in terms of its contribution to Green Belt purposes in greater detail.</p> <p>4. Green Belt Appraisal</p> <p>4.1 The Site is currently designated as Green Belt. A Green Belt review³ (GBR) forms part of the evidence base for the DLP which has informed the plan's proposed retention of the Site as Green Belt.</p> <p>4.2 The strategic purpose of the area of Green Belt which the Site forms part, is to provide separation between Haslingden and Rawtenstall in the north from Edenfield to the south.</p> <p>4.3 The Site sits to the east of Helmshore village centre, and to the south east of Haslingden. It corresponds with the north western corner of GBR Parcel P27, see below.</p> <p>4.4 The GBR rates the contribution of the land parcel to the five Green Belt purposes.</p> <p>4.5 It is important to note at the outset that there are very clear and accepted exceptional circumstances which justify the release of significant amounts of land from the Green Belt to meet Rossendale's needs. All land within the current Green Belt, fulfils at least some aspects of Green Belt purposes. As such, it will not be possible to meet the identified needs of Rossendale</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
						<p>without some impact on the Green Belt and its purposes.</p> <p>4.6 It is also important to note when considering what land to release from the Green Belt to be clear that the “golden thread” which runs through plan making and decision taking is the achievement of sustainable development. The NPPF confirms this at paragraph 84 when it states that “...when drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development...”. In considering the release of land from Green Belt it is therefore essential to consider what releases of land will achieve sustainable development while minimising the impacts on the purposes of Green Belt.</p> <p>Purpose 1: To check the unrestricted sprawl of large built-up areas</p> <p>4.7 The GBR finds that this GB purpose is not applicable to the golf course because it lies adjacent to Helmshore, which is not considered to be a large built up area assessed against purpose 1. Therefore, the parcel is not considered to contribute towards checking the unrestricted sprawl of large built up areas.</p> <p>4.8 Peel agrees with this assessment and would support an allocation of a proportion of the golf course, closest to the existing settlement, for housing development.</p> <p>Purpose 2 - To prevent neighbouring towns merging into one another</p> <p>4.9 The GBR considers that this parcel plays a ‘moderate’ role in respect of this purpose, forming part of the gap between Helmshore and Rawtenstall but it notes that the parcel does not lie directly between them and is not of critical importance to their separation.</p> <p>4.10 Additionally, it is noted that the parcel lies directly between the settlements of Helmshore and Edenfield, and Helmshore and Stubbins which at this point are approximately 2.5km apart with limited intervisibility. The parcel forms a good proportion of the gap between these settlements, but it is not considered to be of critical importance to their separation. However, any new development and subsequent loss of openness within the parcel could lead to the perception of reducing the physical and visual gap between Helmshore and Rawtenstall, Helmshore and Edenfield, and Helmshore and Stubbins.</p> <p>4.11 The release of a small part of the golf course for housing development would not compromise the role of the GB parcel as a whole in providing this separation. It is feasible that new homes could be accommodated on the west side of the golf course, immediately adjacent to existing development, forming a logical extension to the village of Helmshore. The remainder of the golf course would remain, continuing to provide a physical and visual gap between Helmshore and towns to the east and south.</p> <p>Purpose 3 - To assist in safeguarding the countryside from encroachment</p> <p>4.12 The GBR finds that there is a sense of encroachment within the parcel as a result of the visual influence of the Helmshore to the west. The parcel</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment
						<p>contains little built development apart from the Rossendale Golf Course Club House in the west and a small industrial unit in the south. However, the majority of the landcover to the north comprises the Rossendale Golf Course and lacks rural character. The south of the parcel contains undulating farmland which displays characteristics of the open countryside and is typically rural in character. Overall the role is considered 'moderate' in respect of this purpose.</p> <p>4.13 Peel agrees with this assessment, in that the golf course does not display the characteristics of open countryside and is not of rural character, and therefore has no role to play in achieving this purpose. The development of a small proportion of the golf course, adjoining the village, would have no consequence in respect of protecting open countryside.</p> <p>Purpose 4 - To preserve the setting and special character of historic towns</p> <p>4.14 The parcel was found to have no role in this respect as, in practice; it has very limited intervisibility with Ramsbottom only. The openness of the land within the parcel is not considered to be important to its setting or historic significance. Therefore, any new development that took place within the parcel is considered unlikely to affect the setting or special character of any historic settlements.</p> <p>4.15 Peel agrees with and supports this assessment.</p> <p>Purpose 5 - Assist in urban regeneration by encouraging the recycling of derelict and other urban land</p> <p>4.16 The GBR considers that all parcels make an equally significant contribution to this purpose.</p> <p>4.17 The DLP proposes to optimise the re-use of brownfield sites to meet development needs and in doing so support ongoing urban regeneration.</p> <p>4.18 As noted above, and in the overarching representation, the supply of deliverable brownfield land is insufficient to deliver the number and type of new homes and employment land required to meet the needs of the borough. As such, the extent of urban regeneration/ brown field development which can be achieved is not sufficient to meet Rossendale's sustainable growth needs and must be accompanied by development on Green Belt land. Exceptional circumstances to justify Green Belt release have been proven through the Greater Manchester Spatial Framework. The release of land from the Green Belt will not therefore undermine this purpose.</p> <p>Green Belt Appraisal Conclusion</p> <p>4.19 The GBR makes an assessment of the contribution that is made by a parcel of land golf course site together with agricultural land to the south east (Lower Cockham Farm). It is found that the parcel makes no contribution to the purposes of avoiding urban sprawl, nor preserving historic towns.</p> <p>4.20 Whilst there is a moderate role played in preventing towns from merging, Peel asserts that development of a small area of the golf course, adjacent to the village of Helmshore, would be sensitive to this role and would not</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.079	Further comment	
						<p>compromise the contribution of the larger parcel. Furthermore, the release of such an area would have no impact on the role of the wider parcel on protection of open countryside, as the golf course is not of rural character.</p> <p>4.21 It is considered that this Site is suitable for development and is in a highly sustainable location. Its release from the Green Belt will therefore contribute to a sustainable pattern of development which makes the most of proximity to nearby highway infrastructure. There are therefore clear exceptional circumstances to justify its release from the Green Belt.</p> <p>4.22 Peel strongly supports the allocation of this land and recommends the Council allocate it to ensure sufficient land is allocated to support the housing needs of the borough.</p> <p>5. Conclusion</p> <p>5.1 This representation provides an initial review of the development opportunity at Rossendale Golf Course, including details of the site and its location, consideration of the site in the Strategic Housing Land Assessment (SHLAA); and a Green Belt appraisal, commenting on the findings of the Green Belt Review which forms part of the evidence base to the DLP. A Development Framework will be provided to RBC in due course, setting out a clear vision and proposals for the development of the site.</p> <p>5.2 Peel would welcome discussions with RBC and other stakeholders regarding the emerging Local Plan and the merits of the sites promoted for residential development.</p> <p>5.3 This site is a more recent development opportunity being promoted by Peel, and has hence not been considered in the SHLAA or DLP. The site could reasonably for a discreet extension to the village of Helmshore. The Development Framework to follow this representation will further illustrate the opportunity for development of this site and give comfort that it could reasonably be released for development.</p> <p>5.4 Peel supports the allocation of HS2.79, but considers that the site could make a greater contribution to meeting the housing needs of the borough. Peel welcomes further discussion on the land at Rossendale Golf Course as a housing allocation.</p> <p>Please see appendix</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.080	Further comment
690	William	Hutchinson	-	HS2.53, HS2.54, HS2.56, HS2.80, HS2.82, HS2.83, HS2.86	Not Applicable	The seven sites listed above are all within areas adjacent to Newchurch Road and the assumption can be reasonably made that future residents of the 228 units projected will use Newchurch Road as their principal access. This could account for in the region of an additional 450 vehicles regularly using what is already a very busy stretch of highway. Considerable numbers of pupils of nearby schools either walk or are brought in cars to the Newchurch Rd./Union St./Hurst Lane vicinity to make their way to these schools. The current volume of traffic makes it dangerous for these young people. Elderly residents find it increasingly difficult to cross Newchurch Rd. in this area because of the volume and speed of traffic. Whilst local residents in vehicles can experience danger and frequent difficulty when negotiating the roads and junctions for the same reasons. - In my opinion it should be a condition of any of the proposed development that 'traffic calming' measures must be implemented to protect the safety, convenience and general well-being of all who live in or pass through this location whether on foot, on cycles or in vehicles. To not do so will be doing all concerned a great disservice and will be a dereliction of the 'duty of care' which is incumbent on all who may be deliberating on these proposed developments. - In terms of such 'traffic calming': 'speed-bumps', lower speed limit, road narrowing with priority restrictions and advance warning signs would all be measures I would hope to see introduced.		No
1323	Rachael	Gildert	Valley Heritage		Object	This is a very tight site and I would suggest wholly unsuitable for development. - houses on this site would fully block light from the houses set below at Lea Bank and Lea Bank road itself is very busy. The turning circle at the end of the road is used for parking already meaning access would be made more difficult through development		With regards to Conservation Areas, it was a shame Waterfoot Centre was not put forward. The town is slowly starting to regenerate and additional protection could help to prevent unsuitable shop fronts, UPVC windows and other inappropriate development

527	John	Howat	N/A	HS2.82,HS2.86,H S2.53,HS2.54,HS 2.58,HS2.54,HS2 .57,HS2.54, HS2.56,HS2.84 , Land at Marl Pits.	Object	<p>Observations on Proposed Local Plan for Rossendale. - - Having viewed the 2017 proposed Local Plan for Rossendale and discussing it with a member of the Planning Department at a recent local consultation meeting on Thursday 7th September, I feel obliged to make the following objections and following observations. - - Access. - There appears no have been no consideration of the extra traffic that the proposed developments will generate. From a personal point of view I am particularly concerned by those schemes in Rawtenstall, some requiring extending the Urban Boundary into the countryside, that are contiguous with and likely to be accessed from Newchurch Road. Principally these are: - - Dark Lane Football Ground, HS2.82 (58 Houses). - St Peters Road, Newchurch, HS2.86 (9 Houses). - Johnny Barn Farm, HS2.53 (30 Houses). - Land east of Johnny Barn Farm, HS2.54 (105 Houses) - Higher Cloughfold, HS2.58 (7 Houses). - West of Dobbin Lane, HS2.54 (27Houses). - Land at Conway Road, HS2.57 (5 Houses). - Land between Newchurch Road & Bacup Road, HS2.54 (55 Houses). - Hurst Platt, HS 2.56 (8 Houses). - Peel Street, Clough Fold, HS 2.84 (8 Houses) - - In addition the plan shows a proposal that Urban Boundary behind Marl Pits be moved north to Balladen Clough and although no actual figure or HS reference is given, a figure of 55 houses has been quoted informally in the past. - - Permission has recently been granted for two houses outside the existing Urban Boundary, in a greenfield site, (2015/0308). Although it appears that there is no intention to move the boundary to accommodate them. - - Potentially therefore there are 369 new houses planned that will have their main access via Newchurch Road. Assuming that each household has two cars (738 cars) each making just one trip out and one trip back each day (1476 daily journeys) for 323 days a year (allowing for six weeks holidays) this will be a minimum of 476,748 new car journeys along all or part of Newchurch Road each year. In addition there will be journeys generated by visitors, deliveries and services such as refuse collection. Newchurch Road, downhill from Marl Pits to Rawtenstall, will become exceptionally busy; entrance and exit from Union Street already difficult, will become virtually impossible; an intolerable situation. - - As long as I can remember (30 years or more) there have been problems with access to and from Chapel Hill via the Union Street /Newchurch Road Junction. In 1993, at the public enquiry into objections to the then proposed District Local Plan, it was noted that Rossendale Borough Council considered that Union Street was unsuitable and there were "... severe highway problems in the area" and "... that no additional traffic at all should be allowed to aggravate the situation". The Inspector, Mr D. Gill, added a comment to his ruling on Urban Boundary changes in the area, "... that the present arrangement (for traffic) is certainly below standard". - - None-the-less, over subsequent years, RBC has sanctioned further developments in the area including the making of a rear entrance to Alder Grange School with access via Union Street, which at</p>		I have not commented on individual sites as it is the effect that the sum of these sites will have on the traffic on Newchurch Road that is my concern.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.082	Further comment
						<p>peak periods has worsened the situation considerably, both for pedestrians using the narrow pavements and vehicles dropping off or collecting children. -</p> <p>There are real problems with access from Newchurch Road up Union Street onto Hurst Lane and onwards onto Chapel Hill. Union Street is a steep hill with residents parking which only allows one-way traffic the majority of the time. It is treacherous in winter conditions and at times only four-wheel drive vehicles can ascend; descent too can be extremely awkward when the road is icy. - -</p> <p>The exit from Union Street on to Newchurch Road has become increasingly difficult, as traffic has inexorably increased. There is limited visibility to the east and the road the west it is compromised by the bus stops on both sides and cars parked outside the convenience store. The latter obstruct the carriageway causing vehicles leaving Union Street and turning down Newchurch Road to travel some distance on the wrong side of the road, at times in the face of oncoming traffic. Cars entering from Newchurch Road are often blind to vehicles descending Union Street and this results in awkward maneuvering, with traffic on the main road impeded by cars waiting to ascend Union Street as a result. This is a particular problem for those cars entering Union Street from the east. - - - The single track available at the bottom end of Union Street as a result of residents' parking, can be blocked by vehicles which stop half way up to unload passengers or goods. In recent years large lorries connecting with the conversion of the redundant public house, The Old House at Home, to housing and the (apparently never-ending) construction of the eight new houses behind Hurst Platt have added to the chaos at the bottom of the street as they negotiate the tight junction between Green Street and Union Street (often in reverse) or on to Newchurch Road.</p> <p>Newchurch Road is increasingly busy and joining it from Union Street is often very difficult, especially if traffic is backed up from the pedestrian crossing and traffic lights at the Rams Head/St Mary's Way. Frequently one is reliant on a good-natured driver giving way. - - There is real concern amongst the residents in Waingate that Fire, Ambulances and other emergency vehicles would at times be unable to reach their destination expeditiously. - - There are no alternative routes onto Chapel Hill. The continuation of Hurst Lane from the top of Union Street down hill to Newchurch Road is little more than an alley, a very narrow single track with no pavements. It cannot be considered as an adequate substitute for Union Street except in the occasional emergency. Only cars can use it. Waingate Road is no longer suitable for vehicular traffic. - - It would appear from planning application 2015/0308 that Lancashire County Council do not see a problem with the traffic on Newchurch Road and Union Street and access to properties on Chapel Hill. It is clear that none of their officers have lived in the area and to my knowledge no one has spoken to the residents. If they had, I suspect they perhaps would hold a different view. It seems that in allocating the various areas along Newchurch Road for extra housing in the Local Plan, there has been neither</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.082	Further comment
						<p>recognition of the problems of Union Street nor consideration as to how they may be alleviated. - - A traffic census was seen to be carried out a few years ago but as it was during half-term, when there was no school traffic, its value therefore must be in doubt and of course it did not take into account those changes that will ensue should the current Local District Plan come to fruition along Newchurch Road as proposed. Should, as was intimated during the consultation meeting I attended, a further study on traffic in Rawtenstall be commissioned, can I urge you to involve to the residents of Waingate, Hurst Lane, Hurst Crescent and Union Street as part of the study? - - Facilities. - Other than to permit a surfeit of supermarkets, RBC appears to have given no consideration to the infrastructure required to support any major increase of housing/population. General Practice surgeries are struggling with the current patient demand and attracting Doctors into existing practices to fill vacancies proves very difficult. Recruitment to new practices is impossible. Currently there are insufficient Medical graduates choosing General Practice as a career. There is also dearth of NHS Dental Surgeries and it may necessary to travel out of the Borough to register for NHS treatment. There appears to be no possibility of extending existing primary or secondary schools nor is there the finance to build new ones. - - Alternative Sites and Uses. - In general I object to the use of greenfield sites to accommodate additional housing. There appears to be no map or register of brownfield sites, which should be completely replaced by residential schemes before any consideration is given to extending the Urban Boundary to provide building land. There are several large redundant buildings which should be sympathetically converted to residential use as apartments as has been done elsewhere both in Rossendale and neighbouring towns and cities. Examples include the old cinema on Bacup Road, vacant and available for many years. It should be converted, with compulsory preservation of the external structure, to two floors of apartments and the ground floor used for residents' parking. Similarly, St John's Church, Crawshawbooth, recently on the market, would make a fine block of flats. The abandoned Kwiksave/Poundland store by the railway station should be demolished and the site made available for new housing. It is not needed for an out of town retail site. - - The plan to move the Urban Boundary at Marl Pits should be abandoned. The area is crossed by a well-used and much-loved rural footpath which would be lost if it was subsequently urbanised. In any case the land at the west end of the plot slopes steeply to the brook and is unsuitable for building. There is currently no vehicular access to the area unless the RBC is to allow it through the Marl Pits car park, which would be unacceptable. A possible alternative use for this land, maintaining its greenfield status, would be as a campsite for tourists, with hard standings for touring caravans and pitches for tents. A dedicated domestic block close to the leisure centre would be acceptable; access could be through the leisure centre car park. An administrative office could be</p>

						established in the leisure centre itself, or as part of the domestic block. This type of facility is sorely needed in Rossendale if, as the RBC professes, the tourist industry is to be promoted and developed. The campsite could be administered and promoted as part of the Leisure Centre. - - Suggested Action. - I am well aware of the pressure applied by Central Government to the RBC to provide affordable and new dwellings. However, now that the target has been reduced by approximately 50% to 2,100, I urge the Council to abandon any proposals for land outwith the Urban Boundary and concentrate development on redundant buildings, brownfield and other former industrial sites. - - 19th September 2017 -		
690	William	Hutchinson	-	HS2.53, HS2.54, HS2.56, HS2.80, HS2.82, HS2.83, HS2.86	Not Applicable	The seven sites listed above are all within areas adjacent to Newchurch Road and the assumption can be reasonably made that future residents of the 228 units projected will use Newchurch Road as their principal access. This could account for in the region of an additional 450 vehicles regularly using what is already a very busy stretch of highway. Considerable numbers of pupils of nearby schools either walk or are brought in cars to the Newchurch Rd./Union St./Hurst Lane vicinity to make their way to these schools. The current volume of traffic makes it dangerous for these young people. Elderly residents find it increasingly difficult to cross Newchurch Rd. in this area because of the volume and speed of traffic. Whilst local residents in vehicles can experience danger and frequent difficulty when negotiating the roads and junctions for the same reasons. - In my opinion it should be a condition of any of the proposed development that 'traffic calming' measures must be implemented to protect the safety, convenience and general well-being of all who live in or pass through this location whether on foot, on cycles or in vehicles. To not do so will be doing all concerned a great disservice and will be a dereliction of the 'duty of care' which is incumbent on all who may be deliberating on these proposed developments. - In terms of such 'traffic calming': 'speed-bumps', lower speed limit, road narrowing with priority restrictions and advance warning signs would all be measures I would hope to see introduced.		No

779	Alison	Squire	-		Object	<p>I wish to object to the above proposed sites for housing which are close to Newchurch Road on the grounds that: - i) increased traffic will be unacceptable on this main road through Rossendale - ii) erosion of greenfield sites instead of using brownfield sites in the Valley - iii) increased demand on already overloaded education and health services. - - As a resident of Waingate Village, I have objected several times to planning applications on a plot of land off Hurst Lane (Ref: 2015/0308) and am extremely displeased that this land has received planning approval despite it continuing to be beyond the Urban Boundary. There were no opportunities for local residents to raise further objections and no communications following approval having been given. I do not feel that the Council supported local residents and instead allowed developers greater importance. I am therefore worried that despite this opportunity to comment on the Local Plan, residents' opinions will not be taken into consideration. - - It appears that the Urban Boundary may be moved to Balladen Clough (a stream) to include a field behind Marl Pits road. An earlier application to build on this land was refused on the grounds of lack of road access. I hope that any future planning applications on this land will continue to be refused and the original Urban Boundary will remain in place. Any development on this land would further increase traffic onto Newchurch Road. - - Having witnessed the gridlock in Bank Street and Angouleme Way on Saturday I do wonder where the increased traffic from all the proposed new housing will go. I appreciate that it is National Government Policy to increase housing and that sites have to be found in the Valley but hope that more brownfield sites can be found, consideration of health and education demands and transport/traffic difficulties will be addressed before adopting the new Local Plan.</p>		-

1303	JULIA	BARROW	-		Object	TRAFFIC IS APALLING IN NEWCHURCH ALREADY. I'VE LIVED HERE 34 YEARS AND FROM BEING A LOVELY VILLAGE IT HAS DEGENERATED INTO A RACE TRACK. HAS ANYONE ACTUALLY BEEN TO SEE THE DOUBLE PARKING ON STAGHILLS ROAD AND TOPBARN LANE EVERY NIGHT CURRENTLY? IF THEY HAVE, HOW ON EARTH CAN THEY EVEN THINK THIS IS A GOOD PLACE TO PLONK 105 NEW HOUSES - MOST OF WHICH WILL BE 3/4 BED HOUSES = 2/3 CARS PER HOUSE? HOW ARE THEY GOING TO GET OUT SAFELY IN A MORNING IN THE RUSH HOUR? THE LOCAL SCHOOL CREATES LOTS OF TRAFFIC IN A MORNING AND AT SCHOOL CLOSING TIME TOO. BUSES STRUGGLE UP STAGHILLS ROAD OUTSIDE THE CHURCH WHERE IT GOES TO SINGLE FILE - TRY GETTING THROUGH WHEN THERE'S A FUNERAL ON..! FOR GOODNESS' SAKE - THERE ARE PLENTY MORE BROWNFIELD SITES MORE SUITABLE FOR DEVELOPMENT...!		I AM VERY AWARE THAT IN ALL THE PROPOSED PLANS NOWHERE HAS THERE BEEN ANY MENTION OF NEW/IMPROVED ROADS/INFRASTRUCTURE? I REMEMEBER THE EDENFIELD BY-PASS BEING OPENED IN 1968 - TO CARRY TRAFFIC AWAY FROM EDENFIELD VILLAGE. IT WAS BRILLIANT, LIVING IN THE VILLAGE BECAME A JOY ONCE AGAIN! THE SAME SMALL BY-PASS NOW HAS ALL THE TRAFFIC FROM BURNLEY/BLACKBURN/HASLINGDEN/ HELMSHORE/CRAWSHAWBOOTH/RA WTENSTALL EMPTYING INTO IT ON A DAILY BASIS. GRANE ROAD NOW HAS AVERAGE SPEED CAMERAS INSTALLED - AN INDICATION AS TO HOW MUCH TRAFFIC THE ROAD NOW CARRIES. - ON ANOTHER NOTE, WE HAVE NO FREE DOCTORS OR DENTISTS, NO POLICE STATION, SCHOOLS ARE FULL AND WE NOW HAVE TO TRAVEL TO BLACKBURN TO GO TO HOSPITAL! AND YOU ARE PROPOSING TO PUT 4/5000 NEW HOUSES UP? WE HAVE NO PUBLIC SERVICES!! THE REFUSE SERVICES ARE STRUGGLING TO COPE WITH WHAT WE HAVE NOW. OUR ROADS ARE APPALING. - IT REALLY DOES SCARE ME! - I THINK WE HAVE MORE BROWNFIELD AREAS WHICH SHOULD BE EXPLORED BEFORE WE LOSE A LOT OF OUR GREEN SPACES, AND I WOULD LIKE TO SEE AN ASSESSMENT OF EMPTY PROPERTIES AVAILABLE IN THE VALLEY WHICH COULD GO TOWARDS THE 4/5000 PROPERTIES NEEDED?

527	John	Howat	N/A	HS2.82,HS2.86,H S2.53,HS2.54,HS 2.58,HS2.54,HS2 .57,HS2.54, HS2.56,HS2.84 , Land at Marl Pits.	Object	<p>Observations on Proposed Local Plan for Rossendale. - - Having viewed the 2017 proposed Local Plan for Rossendale and discussing it with a member of the Planning Department at a recent local consultation meeting on Thursday 7th September, I feel obliged to make the following objections and following observations. - - Access. - There appears no have been no consideration of the extra traffic that the proposed developments will generate. From a personal point of view I am particularly concerned by those schemes in Rawtenstall, some requiring extending the Urban Boundary into the countryside, that are contiguous with and likely to be accessed from Newchurch Road. Principally these are: - - Dark Lane Football Ground, HS2.82 (58 Houses). - St Peters Road, Newchurch, HS2.86 (9 Houses). - Johnny Barn Farm, HS2.53 (30 Houses). - Land east of Johnny Barn Farm, HS2.54 (105 Houses) - Higher Cloughfold, HS2.58 (7 Houses). - West of Dobbin Lane, HS2.54 (27Houses). - Land at Conway Road, HS2.57 (5 Houses). - Land between Newchurch Road & Bacup Road, HS2.54 (55 Houses). - Hurst Platt, HS 2.56 (8 Houses). - Peel Street, Clough Fold, HS 2.84 (8 Houses) - - In addition the plan shows a proposal that Urban Boundary behind Marl Pits be moved north to Balladen Clough and although no actual figure or HS reference is given, a figure of 55 houses has been quoted informally in the past. - - Permission has recently been granted for two houses outside the existing Urban Boundary, in a greenfield site, (2015/0308). Although it appears that there is no intention to move the boundary to accommodate them. - - Potentially therefore there are 369 new houses planned that will have their main access via Newchurch Road. Assuming that each household has two cars (738 cars) each making just one trip out and one trip back each day (1476 daily journeys) for 323 days a year (allowing for six weeks holidays) this will be a minimum of 476,748 new car journeys along all or part of Newchurch Road each year. In addition there will be journeys generated by visitors, deliveries and services such as refuse collection. Newchurch Road, downhill from Marl Pits to Rawtenstall, will become exceptionally busy; entrance and exit from Union Street already difficult, will become virtually impossible; an intolerable situation. - - As long as I can remember (30 years or more) there have been problems with access to and from Chapel Hill via the Union Street /Newchurch Road Junction. In 1993, at the public enquiry into objections to the then proposed District Local Plan, it was noted that Rossendale Borough Council considered that Union Street was unsuitable and there were "... severe highway problems in the area" and "... that no additional traffic at all should be allowed to aggravate the situation". The Inspector, Mr D. Gill, added a comment to his ruling on Urban Boundary changes in the area, "... that the present arrangement (for traffic) is certainly below standard". - - None-the-less, over subsequent years, RBC has sanctioned further developments in the area including the making of a rear entrance to Alder Grange School with access via Union Street, which at</p>		I have not commented on individual sites as it is the effect that the sum of these sites will have on the traffic on Newchurch Road that is my concern.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.084	Further comment
						<p>peak periods has worsened the situation considerably, both for pedestrians using the narrow pavements and vehicles dropping off or collecting children. -</p> <p>There are real problems with access from Newchurch Road up Union Street onto Hurst Lane and onwards onto Chapel Hill. Union Street is a steep hill with residents parking which only allows one-way traffic the majority of the time. It is treacherous in winter conditions and at times only four-wheel drive vehicles can ascend; descent too can be extremely awkward when the road is icy. - -</p> <p>The exit from Union Street on to Newchurch Road has become increasingly difficult, as traffic has inexorably increased. There is limited visibility to the east and the road the west it is compromised by the bus stops on both sides and cars parked outside the convenience store. The latter obstruct the carriageway causing vehicles leaving Union Street and turning down Newchurch Road to travel some distance on the wrong side of the road, at times in the face of oncoming traffic. Cars entering from Newchurch Road are often blind to vehicles descending Union Street and this results in awkward maneuvering, with traffic on the main road impeded by cars waiting to ascend Union Street as a result. This is a particular problem for those cars entering Union Street from the east. - - - The single track available at the bottom end of Union Street as a result of residents' parking, can be blocked by vehicles which stop half way up to unload passengers or goods. In recent years large lorries connecting with the conversion of the redundant public house, The Old House at Home, to housing and the (apparently never-ending) construction of the eight new houses behind Hurst Platt have added to the chaos at the bottom of the street as they negotiate the tight junction between Green Street and Union Street (often in reverse) or on to Newchurch Road.</p> <p>Newchurch Road is increasingly busy and joining it from Union Street is often very difficult, especially if traffic is backed up from the pedestrian crossing and traffic lights at the Rams Head/St Mary's Way. Frequently one is reliant on a good-natured driver giving way. - - There is real concern amongst the residents in Waingate that Fire, Ambulances and other emergency vehicles would at times be unable to reach their destination expeditiously. - - There are no alternative routes onto Chapel Hill. The continuation of Hurst Lane from the top of Union Street down hill to Newchurch Road is little more than an alley, a very narrow single track with no pavements. It cannot be considered as an adequate substitute for Union Street except in the occasional emergency. Only cars can use it. Waingate Road is no longer suitable for vehicular traffic. - - It would appear from planning application 2015/0308 that Lancashire County Council do not see a problem with the traffic on Newchurch Road and Union Street and access to properties on Chapel Hill. It is clear that none of their officers have lived in the area and to my knowledge no one has spoken to the residents. If they had, I suspect they perhaps would hold a different view. It seems that in allocating the various areas along Newchurch Road for extra housing in the Local Plan, there has been neither</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.084	Further comment
						<p>recognition of the problems of Union Street nor consideration as to how they may be alleviated. - - A traffic census was seen to be carried out a few years ago but as it was during half-term, when there was no school traffic, its value therefore must be in doubt and of course it did not take into account those changes that will ensue should the current Local District Plan come to fruition along Newchurch Road as proposed. Should, as was intimated during the consultation meeting I attended, a further study on traffic in Rawtenstall be commissioned, can I urge you to involve to the residents of Waingate, Hurst Lane, Hurst Crescent and Union Street as part of the study? - - Facilities. - Other than to permit a surfeit of supermarkets, RBC appears to have given no consideration to the infrastructure required to support any major increase of housing/population. General Practice surgeries are struggling with the current patient demand and attracting Doctors into existing practices to fill vacancies proves very difficult. Recruitment to new practices is impossible. Currently there are insufficient Medical graduates choosing General Practice as a career. There is also dearth of NHS Dental Surgeries and it may necessary to travel out of the Borough to register for NHS treatment. There appears to be no possibility of extending existing primary or secondary schools nor is there the finance to build new ones. - - Alternative Sites and Uses. - In general I object to the use of greenfield sites to accommodate additional housing. There appears to be no map or register of brownfield sites, which should be completely replaced by residential schemes before any consideration is given to extending the Urban Boundary to provide building land. There are several large redundant buildings which should be sympathetically converted to residential use as apartments as has been done elsewhere both in Rossendale and neighbouring towns and cities. Examples include the old cinema on Bacup Road, vacant and available for many years. It should be converted, with compulsory preservation of the external structure, to two floors of apartments and the ground floor used for residents' parking. Similarly, St John's Church, Crawshawbooth, recently on the market, would make a fine block of flats. The abandoned Kwiksave/Poundland store by the railway station should be demolished and the site made available for new housing. It is not needed for an out of town retail site. - - The plan to move the Urban Boundary at Marl Pits should be abandoned. The area is crossed by a well-used and much-loved rural footpath which would be lost if it was subsequently urbanised. In any case the land at the west end of the plot slopes steeply to the brook and is unsuitable for building. There is currently no vehicular access to the area unless the RBC is to allow it through the Marl Pits car park, which would be unacceptable. A possible alternative use for this land, maintaining its greenfield status, would be as a campsite for tourists, with hard standings for touring caravans and pitches for tents. A dedicated domestic block close to the leisure centre would be acceptable; access could be through the leisure centre car park. An administrative office could be</p>

1537	John	McGuinness	-		Object	I object to this site allocation for the following reasons: - - Loss of greenbelt land - This is only the first stage in a gradual loss of land as more houses will be built further up the hill - Issues with flooding - Increased traffic on Bacup Rd espec		You seem to be trying to implement a plan where nearly all patches of green within the urban boundary are built on. The hillsides may be green (for now) but all small breathing spaces seem to be a target for building on. Sustainable; how can building more houses on any green area be sustainable? Once land is lost to development, it's lost forever.

690	William	Hutchinson	-	HS2.53, HS2.54, HS2.56, HS2.80, HS2.82, HS2.83, HS2.86	Not Applicable	The seven sites listed above are all within areas adjacent to Newchurch Road and the assumption can be reasonably made that future residents of the 228 units projected will use Newchurch Road as their principal access. This could account for in the region of an additional 450 vehicles regularly using what is already a very busy stretch of highway. Considerable numbers of pupils of nearby schools either walk or are brought in cars to the Newchurch Rd./Union St./Hurst Lane vicinity to make their way to these schools. The current volume of traffic makes it dangerous for these young people. Elderly residents find it increasingly difficult to cross Newchurch Rd. in this area because of the volume and speed of traffic. Whilst local residents in vehicles can experience danger and frequent difficulty when negotiating the roads and junctions for the same reasons. - In my opinion it should be a condition of any of the proposed development that 'traffic calming' measures must be implemented to protect the safety, convenience and general well-being of all who live in or pass through this location whether on foot, on cycles or in vehicles. To not do so will be doing all concerned a great disservice and will be a dereliction of the 'duty of care' which is incumbent on all who may be deliberating on these proposed developments. - In terms of such 'traffic calming': 'speed-bumps', lower speed limit, road narrowing with priority restrictions and advance warning signs would all be measures I would hope to see introduced.		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.086	Further comment
779	Alison	Squire	-		Object	<p>I wish to object to the above proposed sites for housing which are close to Newchurch Road on the grounds that: - i) increased traffic will be unacceptable on this main road through Rossendale - ii) erosion of greenfield sites instead of using brownfield sites in the Valley - iii) increased demand on already overloaded education and health services. - - As a resident of Waingate Village, I have objected several times to planning applications on a plot of land off Hurst Lane (Ref: 2015/0308) and am extremely displeased that this land has received planning approval despite it continuing to be beyond the Urban Boundary. There were no opportunities for local residents to raise further objections and no communications following approval having been given. I do not feel that the Council supported local residents and instead allowed developers greater importance. I am therefore worried that despite this opportunity to comment on the Local Plan, residents' opinions will not be taken into consideration. - - It appears that the Urban Boundary may be moved to Balladen Clough (a stream) to include a field behind Marl Pits road. An earlier application to build on this land was refused on the grounds of lack of road access. I hope that any future planning applications on this land will continue to be refused and the original Urban Boundary will remain in place. Any development on this land would further increase traffic onto Newchurch Road. - - Having witnessed the gridlock in Bank Street and Angouleme Way on Saturday I do wonder where the increased traffic from all the proposed new housing will go. I appreciate that it is National Government Policy to increase housing and that sites have to be found in the Valley but hope that more brownfield sites can be found, consideration of health and education demands and transport/traffic difficulties will be addressed before adopting the new Local Plan.</p>		-

1140	Cherry	Hughes	-		Object	<p>I have recently viewed the plans outlining proposals for housing (related to the Local Policy) in the Newchurch/Hareholme ward area and wish the following comments to be noted: - - * there is a proposed development of 7 - 9 houses at the top of St Peter's Road beyond St Peter's RC Primary School. A major concern is congestion particularly around school opening and closing times. The road becomes very congested as many children are dropped off/picked up by car (giiven the School's faith status and the catchment area). Frequently our driveway is blocked during the most congested periods as there is nowhere in the near vicinity for parents to park and walk their children the last few metres to the School Gate. Increased traffic past the School Gate will create a greater hazard. - - * the proposed site is part way down Seat Naze slope. There is already significant run off which impacts on the houses at the top of St Peter's Road and Heightside Avenue. There is also evidence of springs, one of which which percolates through the road that leads to the houses immediately above Newchurch Road. United Utililites has been called to this particular spot on numerous occassions and identified that it isn't a leak from a pipe. I am also aware of the proposed far more significant developments above Johnny Barn and below Marl Pits on land which has always been very wet (even in dry summers). How can developers guarantee good drainage both for the developments and for the existing developed areas downslope from them? How will that impact on the Irwell at the bottom of the Valley and the flooding dangers? - - * Finally I am really concerned that the area does not have the infrastructure to cope with the additional housing stock. Roads are already heavily congested at commuter times. The local primary schools have very limited capacity to take more students but there appears to be no planning for a new primary school. There is a 'play area' on Stacksteads, which I believe the Newchurch Village Association is planning to raise money to renovate, and this is the only one in the immediate area. The area is already due to have a significant development on what was the Rossendale Football Club Ground (up to 100 houses I believe) - and no mention has been made of infrastructure improvements for this development. - - * I live on a road where over the past 5 years, 3 properties were for sale and 2 of these were for sale for at least 4 years before they sold. The difficulty with sales does appear to have alleviated but there are always houses for sale in our immediate neighbourhood - so can we argue that there is a housing crisis in Rossendale (or at least in this part of Rossendale)?</p>

1308	Emer	Killeen	-		Object	Access onto Ste Peter's Road and the roads off this is already very busy throughout the day. This is mainly due to existing school traffic and building additional houses will increase the already high risk of collision to pedestrians (including children) and car users alike. In addition, trying to turn right onto Newchurch Road from St Peter's Rd is already difficult at peak times and any additional vehicles, even from just 9 houses, will cause risks to pedestrians and car users alike. - - The green space around the existing houses is also precious and any additional properties will spoil the views up toward Seat Naze.		-
1323	Rachael	Gildert	Valley Heritage		Object	I feel this site has been put forward as a method to tidy up a scruffy site that is currently used for caravans and general 'waste'. It is bordered on 2 sites by a right of way and houses here would impede the views across the valley - St Peters is a busy school and access along St Peters Road and Newchurch Road at school times is really busy and already hectic for the existing residents. Adding 9 more houses to this site (and I imagine these would be 3-4 bed houses, each with around 3 cars) would significantly add to this trouble. St Peters Road is already often double parked too.		With regards to Conservation Areas, it was a shame Waterfoot Centre was not put forward. The town is slowly starting to regenerate and additional protection could help to prevent unsuitable shop fronts, UPVC windows and other inappropriate development
1619	Michael	Onley	Planning Sense NW		Object	(...)Clients fear cherry-picking of the most desirable sites. This is reflected in the abandonment of density target of 50+ dwellings per hectare appropriate to urban renewal [Rossendale Core Strategy policy 2, RBC 2011] in favour of a suburban 30+ figure [Rossendale Draft Local Plan policy HS5, RBC 2017]. Clients oppose planning blight upon precious greenfield sites such as achingly lovely meadows east of Johnny Barn (variously identified as HS2.53 and duplicated as HS2.54), and cinematic quality, rail-side pasture at Haslam Farm (HS2.60). Access and road safety concerns have been raised in respect of allocation HS2.86 (St Peter's School) - photos attached. (...)•Draft policy HS2 and specifically the proposed allocations of sites HS2.54/54 (east of Johnny Barn, north of Newchurch Road) HS2.86 (St Peter's School) and HS2.60 (Haslam Farm) in respect of unnecessary greenfield allocations(...)

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.091	Further comment
1246	Colin	Brennan	-		Object	Reasons for objection - 1) Flood Risk, the whole area below the designated building proposal is already a major flood risk, this occurs due to the stream and the culvert running down from Fearn Moss, which is itself a flood plain causes a serious overflow which causes the houses known locally as "the red brick row" to be flooded by raw sewage in times of heavy rainfall and snow melt. This will be exacerbated by covering the existing natural soak away with houses and drives. During the flooding many years ago where the underpinning of the bungalow at 22 Park Road was washed away, the contractors repairing the damaged road informed the local people that the Culvert under Park Road was the maximum it could ever be. - 2) The present car parking situation on Park road is already at full capacity especially at peak times since the school on Wolfenden Green was built. Just removing the garage colony would require at least having to find roadside parking for at least 20+ assorted vehicles, building 11 new properties with each having an allocated 1 parking space when in reality it should at least be 2/3.the threat of this development going ahead is deterring people from applying for permission to have a garage on the site, so consequently adding to the street parking which currently blights us all. - Park Road from the junction with Booth Road to the entrance to the Park has 32 houses which because of the era they were built have no facility and never could have to park cars, surely taking away the facility of the garage site and additional use of land for off road parking makes a mockery of new housing planning regulations which requires the provision of parking - 3) The upper part of the site is also currently used has a play area for young children who are too young to be allowed to cross the very busy Park Road to play in the park -		I would need an explanation at a later date if this was to go ahead and so would others as to why the planning officer only one week before the 2019/2034 future plan was announced gave me permission to build a double garage on the site which because I have built to all the latest building regs has cost me £9000, surely given the time scale and the obvious size of the plan it would have been prudent if not ethical to have pointed the proposals out prior to planning consent.

625	John	Kardasz	N/A		Support	I fully support the proposal to utilise the land at HS2.100 for housing development. - The proposal offers an opportunity to expand housing and residential provision for the local community especially at a time when society is facing the social economic demands of an increasing ageing population and national housing stock shortages. The land HS2.100 provides potential opportunities for further residential expansion that would address the future modern housing needs of the area.		I believe that the approval of the proposals within the Rossendale Local Plan (Summer 2017) which proposes the development of land (HS2.100) which serves to increase the much needed housing stock in the Lumb area. The proposals will also benefit all Lumb, Rossendale residents as it will enable local growing families to remain in their local residential areas thus strengthening inter- generational communities therefore preserving local identity and community cultures.

5	Kimberley	Ashworth	-		Object	I am writing to object against the proposed local plan for Whitworth. - - I am unable to attend the meeting tomorrow night due to illness but I have looked at the proposal as stated below: - - http://www.rossendale.gov.uk/download/downloads/id/3700/whitworth_map_with_street_names - - I'm disappointed to see that a number of green spaces are being considered to build houses on. The green spaces behind Tonacliffe School are used by many for walking. To build on this space would be detrimental to the green space due to wildlife and other conversation in that area. - Building houses would also see an increase in traffic which is at demand during peak times at the moment. - - Other green spaces on the plans are also being considered. In a village that is at full capacity I am unsure why Rossendale Council see the need to build in places that already has adequate housing. - - There are no plans to look at new recreational and family facilities which the town needs. The closure of the children's centre means that new parents and young families have nowhere to go. The plans don't take any such new facility into consideration and I urge Rossendale Council to look at this. - - I know I speak on behalf of many in the Town when I say the option for Whitworth is option 1 'Do nothing' - - Kind regards -		I am extremely disappointed that a meeting has been arranged in Whitworth for tomorrow evening when all the other consultation meetings are taking place in September

11	Alan	Pilling	-		Object	<p>I disagree totally with these plans of housing to be built at the back of king street in whitworth. I purchased my property here as I had started a young family I wanted my children to grow up in a safe street and environment over looked by trees and wildlife as there are not many places or streets that still remain with these benefits. Also the area that is proposed for building is a excellent link road to connect the main road to the moorland for many cyclist , a sport I am very passionate about and intend my family to also take part in as a healthy way of life. From looking at the plans this "cycle track" will become a street or main road linking to market street unless I am mistaken? Also this proposed area is also a Greenland for deer and many other wildlife that is often sighted down there. These comments above may seem trivial but these are what make growing up enjoying not living within a building site or city environment that's why we chose to live in a village not a town or city. Not to mention the infrastructure within the village, it is already a problem to see GP's for emergencies due to increased population, my children are not yet at school but I am already worried about them getting a position at local school of my choice due to overcrowding. Traffic is already at rush hour times surely more cars on the single road in and out of the village is going too cause many more problems. Many thanks hope my views are considered . Alan Pilling.</p>		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
27	Michael	Chianca	-		Object	<p>HS2.102 - King Street - HS2.104 - Old Lane - HS2.108 - Sandbank Gardens - HS2.105 - Albert Street - HS2.107 Fern Isle Close - HS2.106 Moorland Cres - HS2.109 Horsefield Av - - All these proposed sited are unsuitable for the following reasons. 1. Wildlife - This greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest area at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. 2. Loss of Trees - The forest itself would have to be cut down a totally unnecessary action when we have other areas within Whitworth to build on that would not require the destruction of trees. 3. The local school at both dropping of and collection time around this area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. 4. A Culvert runs through the middle of the proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. 6. Local amenities such as Schools, Dentists, Doctors are already full and building more housing would have a negative affect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. 9. Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would endanger the lives of the residents living there especially the children. 10. Government policy is to protect greenbelt areas except for "Exceptional circumstances" can you explain what those exceptional circumstances are when we have other areas more suitable for building houses on. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental affect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - My house and others would be overlooked. 14. As the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including school children. 16. This area and the surrounding area has already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost.</p>	-	
42	Jennifer	Earnshaw	-		Not Applicable	I would like to know what is happening on King Street whitworth and how it will affect my daughter who lives on King street		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
56	Valerie	McDonald	-		Object	<p>Whilst I recognise the need for further housing within the area, I am concerned about the siting of so many proposed dwellings in this particular valley. The roads are already clogged at rush hour and as there is only one road through, movement of traffic, should there be an accident or roadworks, becomes frustratingly unpredictable. What provision is there to maintain and develop the road system in the valley? - - Whitworth High School has become more popular over the past couple of years with waiting lists existing. What provision will be made to expand the school, and will this be done with a long term objective in mind and not just a sticking plaster effort to put up some portable classrooms? - - Local services such as the Children's Centre have just been lost. What plans may be afoot to reinstate such necessary provision? I feel it is morally wrong to simply build new houses and forget about the infrastructure to support this development. - - There is a wealth of wildlife on the moors where you are proposing to site many homes. Presumably there will be checks in place to ensure some of these species are not endangered? - - Finally, there are already plenty of properties on the market at very affordable prices (in comparison with some surrounding areas). Some of these have been on the market a while? Why, if there is already affordable housing, is there a need to build more? -</p>		
98	Jacqueline	Butterworth	-		Object	<p>I am objecting to proposed development of all the above houses around the Whitworth area. The area is overrun with traffic as it is. One way in and one way out. The schools are overloaded as are the GP surgery. It is inconceivable to build more houses and allowing more traffic to use our roads which are in a terrible state. We are already experiencing burst water pipes and our water pressure has already been reduced. We are experiencing more power cuts since all the new houses have been built on Cowm Park Way. Surely there must be someone in the planning department with some common sense and will prevent any further building of houses in Whitworth</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
131	Christine	Greenwood	-		Object	I am objecting to plans to allow the building of over £350 properties on various sites around Whitiworth and Shawforth over the next 15 years. - Not only am I concerned about the building on our greenbelt sites which is part of the attraction of the area. I can understand the wind farm and can support renewable energy sources but not the creation of a collection of housing estates - whether social/affordable or not . The awful collection in Britannia speaks for itself! We have already had several builds across Rossendale but the extra Council Tax revenue does not seem to have brought many benefits to the borough. - As it stands at present the infrastructure can just about support the current residents - schools are already over subscribed and getting an appointment at our one GP surgery is already a mammoth undertaking. Planning to build or reopen a school by any chance? - Traffic is already an issue with one road in and out and a bus service that has to be one of the most unreliable in the surrounding areas ! There are next to no facilities for young people/children and a library fighting to survive so I think that this needs to be given serious consideration before you go ahead.		-
153	G.N	Royds			Not Applicable	As I have indicated before, a prerequisite for a community is sustainable employment. A complete hash has been made by not providing this. Former mill sites have been used for housing, such as Orama Mill, Facit Mill, Albert Mill and the mill near Spodden Fold (which I think may have been called Old Kays). Most of these are easily accessible. Now Spring Mill is proposed for similar treatment! On the other hand, peripheral businesses have been allowed, e.g. tattoo parlours and tanning centres, which debase the human body; the type of potentially smelly fast food outlets that encourage unhealthy eating. Housing without local employment means commuting, causing traffic congestion and pollution. The kind of industry needed is that involved in green energy, recycling, sensible clothing and the production of healthy food. The former site of Spring Mill is a place where a sensitively designed industrial estate might be possible. It is already surrounded by trees and has foundations remaining but it is not on a regular public transport route and is less accessible than previously mentioned sites that have been precluded. It is absurd to think of building on HS2.102/103/106/109 and on that part of HS2.107 not formerly occupied by Spring Mill. These are large areas of countryside enjoyed at present as part of the natural environment. HS2.104 also appears to be countryside, with a few established houses, and also should be protected from further building. Cowm Water Treatment Works (HS2.108) is ideal for industrial development. Let us have local jobs and ensure adequate facilities are available before any more houses are built in Whitworth.		P.S. I did not make this response online because it was mandatory to provide an e-mail address. Please change this, so that more people are encouraged to respond. P.P.S. Please keep me informed of developments.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
155	Jo	Furtado			Object	HS2.102 - appears to straddle Barlow Bottoms and a small area of land north of King Street. Methane? Green Belt? Will any development involve some sort of land-swap to join the two sections of the cycleway? And is that land not reserved in some way against the need to have a second route into Facit Quarries? Personally I'd rather have extra houses than landfill, but... Oppose		
195	Janet	King	-	HS.102, HS2.104-9 inclusive	Object	Whitworth' infrastructure cannot support almost 400 new properties - it is already nigh impossible to obtain a doctors appointment and my father has had to wait iver 6 months to obtain a podiatry appointment as there is only one who has been on long term sick and no replacement cover available. The fact that there is only one main arterial road into and out of Whitworth, which already has weekly road works delaying the already totally congested road does not bear thinking about. With an extra 400 properties and the increase in traffic that these will bring and as there is no large employer in the area most of these occupants will be commuting one way or another. We lost access to an A&E in Rochdale and now the nearest is either Fairfield or Oldham with the additional traffic these proposals would create the congested roads Could be catastrophic in an emergency. - - On a personal note, my family moved to Whitworth 12 years ago, from Oldham, due to its naturally beautiful countryside and I see the addition of these properties into areas of greenery (extending Wallbank estate etc.,) is the very short end of the stick. I can see that if these are accepted, encroaching on to green belt areas, slowly but surely the green belt areas will get smaller and smaller until eventually Whitworth just becomes another concrete plot with ever creaking infrastructure. - - Finally, I understand the need for affordable housing but there are plenty of mills/brown field that could be developed. However, I feel strongly that before any proposals are accepted it is of the utmost importance that the infrastructure is in place to support them, that includes roads, schools and NHS access.	-	
258	Fiona	Harrisson			Object	Whitworth is already a very busy village oversubscribed schools and GP Services with one road in and one road out. The pressure on the infrastructure would be immense, plus travelling to or from anywhere especially at peak times is already horrendous, nevermind with another approx 400 houses being built. Our skyline and beautiful views and countryside are also going to be lost.	-	
261	David	Eyes	-		Object	This is an unbelievable plan that will stretch amenities in the area even further. - - The new estate near Cowm has already increased traffic congestion on the one road in and out of the village and schools are already struggling to cope. - - There is also the issue of wildlife and the impact it will have on their environment. - - I for one will be leaving if this idiotic plan goes through. -		This smells of greed over common sense

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
268	Michaela	Radford	-		Object	Whitworth has had numerous instances recently regarding the roadworks for the infrastructure repair and maintenance. As an employee of all 4 major utility asset owners in the area, I am very concerned regarding the houses proposed. We only have one road throughout the valley and this is impacted severly when roadworks are planned. My concerns are that these are not managed correctly by LCC at present, therefore; more houses and more infrastructure would have a massive impact on the people living in the village. People face unemployment now due to the frequent issues we face getting into work. - Not to mention over crowded schools and doctors as we stand at present. - - I request, here in writing, to be informed of any planned meetings regarding the houses in whitworth and notification be sent in writing to my address above.		
286	Christina	Pieper	-	- King Street	Object	39% increase in crime in Whitworth not enough policing to cover already new built houses in Whitworth which more or less proves the more houses the more crime. - Doctors surgery already full and Bacup and Healey not taking more patients. We already have difficulty getting appointments without any more overcrowding. Also schools are already full. - The one road into Rochdale already impossible to reach work and appointments on time in the mornings as Whitworth Road is gridlocked and not suitable for any more traffic. - Water pressure is very low on King Street more houses in the area will take the pressure far too low. - Wildlife would disappear with houses built on Barlow Bottom, deer can regularly be seen around Barlow Bottom. - Facit was a pretty part of Whitworth already spoilt with the front of the new houses all with unkempt gardens. - King Street ia a cul-de-sac with a public footpath at the top end. Foot traffic has increased with the already new built houses mainly with dog walkers. King Street would be the main walkway for pedestrians to houses built above it. We all purchased our houses on a quite cul-de-sac under the Human Rights Act Additionally, Article 8 "a person has the substantive right to respect for their private and family life" this is what we purchased our houses for. Obviously building of houses above King Street takes away our privacy. - Furthermore King Street sits low down and we have very wet gardens and would be in danger of flooding with houses build immediately above it.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
297	Lindsay	Fairhurst			Object	<p>Poor access along the length of Main Rd (Market Street) one narrow road lined with parked cars , as only access into & out of whitworth. No alternative route.</p> <p>No trains or trams. Buses won't must travel on same one access road both in and out as cars.</p> <p>No motorway access under 20 min journey both ways</p> <p>insufficient work in area means people must travel to Manchester, leeds, bury, Rochdale etc.</p> <p>Current public transport unrealistic.</p> <p>Traffic at peak times currently gridlocked & congested.</p> <p>Increased housing will add to this burden.</p> <p>Utilities infrastructure unable to cope currently leading to repeated remedial roadworks.</p> <p>Schools full</p> <p>Doctors full</p> <p>Rossendale Council Lancashire Council needs to address transport & roadways access + education access beofer building homkes where people will be unable to travel to employment and school</p>		
298	Andrew	Fairhurst			Object	<p>the number of houses proposed in this local plan for infrastructure can support. Whitworth has only one road in abd out and already this is constantly being dug up by utility companies often resulting in temporary traffic lights that cause massives queues of traffic in rush hours. Not only is the road narrow and conjested but there is no alternative train service - only the bus (on the same road) This is totall useless for the number of people wo commute to Manchester, Oldham and Bury every working day. Our schools, doctors and dentists are already close to capacity. There are very few options to travel to other facilities apart from along the one road through the valley.</p>		<p>Without robust and achievable plans to increase the support infrastructure for travel (a train for example) and health and education and culture this building should not go ahead. For people to afford these houses they need jobs first. Currently you need to move out of the valley to commute to work. Regeneration of the area and existing housing stock should come first.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
446	Paula	Todd	-		Object	Whitworth is a small community with only one main road to access it. I feel that if all these purposed houses are built the traffic congestion for commuting will be very difficult for the local residents. Other than the bus service residents have no alternative to drive to and from work. - - My children go to local Tonnacliffe school and the traffic and parking is extremely heavy and if more houses are built in that area the roads would not be able to cope. - - Flooding is a massive problem at present in Whitworth, united utilities are constantly out trying to fix problems, having more houses I believe would make the flooding worse. - - Whitworth is also known for its beauty, walks and wildlife and to purpose building on the greenbelt areas of Whitworth would cause a detrimental effect on this. - - Whitworth does not have access to a local A&E dept, Rochdale hospital only has a urgent care centre as does Burnley. Residents of Whitworth closes A&E is either Oldham or Blackburn. Having more residents in Whitworth with limited healthcare facility's could increase morbidity rate. Along side no local A&E we only have one GP practice in the area, having more residence would cause strain on their service, this also includes only one dental practice. - - Will there be enough places in the schools for all the new children to the area? The local high school is only small and as I believe was over subscribed this school year. - -		
590		Ashworth			Object	Absolutely ridiculous One way in and out of whitworth no extra schools or doctors when you have two or three cars per household. This is ruining our villages. We strongly object to this. Listen to the people who vote you in, as we have long memories		
743			Whitworth Town Council		Object	At a meeting of Whitworth Town Council last night (Thursday 28 September 2017), it was resolved that I should contact you with the comments of the Town Council to feed into the current Local Plan consultation: HS2.102 Barlow Bottoms, HS2.102 Land North of King Street and HS2.103 Land Behind Buxton Street Council have concerns that this area is on a flood plain and part of this site is already allocated to a specialist care unit. This is currently the largest undeveloped site locally and if more homes are to be built in Whitworth in the future then the deficiency in social facilities would need to be addressed and this site would be the most appropriate for a school or health centre.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
773	Susan	Worrall	-		Object	Whitworth is a village, a small community. Building these housing developments will change Whitworth into a town. - There is not the infrastructure to support this additional housing. There is one road in and out of Whitworth which is already struggling to cope with the increasing volume of traffic. Especially at peak times. If there are any traffic disruptions it can take 1-2 hours to get to Rochdale . We do not need more cars and the pollution they bring! - - There are limited school places both secondary and primary and local children born in the village will struggle to get places. - The one and only GP practice can not manage to provide the necessary health care for patients with no appointments pre bookable for weeks in advance. This healthcare will be diluted further. Living in Whitworth if A&E treatment is required which is often a life or death situation your chances of survival are reduced add more traffic on market street and your chance of survival diminishes further - - The people who live in Whitworth , live here because it is a village , it is quiet and the countryside is on the door step. Yet the plans want to destroy the village life, increase demands on existing services and increase pollution - - To consider building on greenbelt land in Whitworth is unbelievable and irresponsible, Planning has already - spoil the view of the countryside at the side of Daneswood ave and the wind farms are also affecting the views and countryside. - - Whitworth has lots of wildlife from deer, owls, herons, wild ponies as well as lots of insect life butterflies, bees etc which will all be at risk if the countryside is used for housing. - - There is empty housing all over the borough - fill these , not build more especially in our little village -		Stop putting profits first and put existing residents first

793	Victoria	Roberts	-		Object	<p>I would like to object to the site for in total 35 houses based on north of king st on a site that was previous a landfill site. I would like to raise a few points these being -</p> <p>1. The site used to be a landfill and I was under the understanding it couldn't be built on due to gases etc. As a parent of 3 young children would they be put in danger from the gases in that location. -</p> <p>2 in that area there is many animals like deer, badgers, bats what effect would this have on the animals if trees etc are cut down to make room for the houses? -</p> <p>3 The schools are already over subscribed as it not just whitworth children esp tonacliffe its children from Rochdale taking places. the schools in that area have been extended to the full building capacity and to add more house mean less spaces in local schools. The streets are narrow and to add more parents if extended will cause major issues with parking and traffic management with all schools. The high school there is only one for whitworth which again have had people appealing as not enough room as again Rochdale are sending pupils in to the school. -</p> <p>4. There is an issue with getting appointments with the gp its could be weeks as there isn't enough doctors. The doctors is small and inadequate building in centre of whitworth. then in turn causing parking issues and access as it up a hill double parking etc. They cant expand the doctors in whitworth and on the plans there isn't anything to replace with a bigger centre etc. other service like dentist is over subscribed they also accept patients from out of whitworth causing issues to get appointments -</p> <p>5 the roads in and out of whitworth isn't adequate for the current volume off traffic never mind the 300+ more houses on listed if built. -</p> <p>6 The current plans showed that the cycle path goes past slinco based on station road but as far as im aware the company wont allow them to buy the land so access to the cycle path is down barlow bottoms then causing more issues if houses where to be built. -</p> <p>7 Are they going to provide adequate drainage as currently the road at times is bad and to add more concrete it there going to be a better drainage system in place to direct the water as work carried out in another area caused flooding. Locals have said there is a culvert running through that land and as I am on lower land is my house at risk of flooding? -</p> <p>8 Pollution adding more cars taking down the trees and not replacing them. the carbon foot print -</p> <p>9 the service ie water, electric, gas have not been upgraded to accept all the buildings houses etc casuing problems like power cuts low water pressure flooding no correct drange in place or for it to run off as grass etc replaced with concrete. -</p> <p>10 the roads are an issue more cars means more pot holes as traffic up and down the road is constant with big lorries ie already for the quarry. to add a hell of a lot more houses, people who live here and then people passing through Is going to make it a lot worse and unsafe for children as the road is already a race track . -</p> <p>11 What affects would building the houses on the resale value of mine. As I bought it for the location and the access to he countryside for my children ? - -</p>		<p>whitworth facit Is a small village that current cant take any more traffic and homes . it one in and out and god forbid if traffic lights or bad weather journies increase by 1hrs just to get in and out of whitworth. animals will be loosing homes to make way for more homes. roads unsuitable and more holes then anything -</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
793	Victoria	Roberts	-		Object	the area has wildlife ie deer tht wih the building of the cycle track - the traffic volume on the road currently is a nightmar esp in bad weather - the area is an old tip so what pollution would come from that and may seep in to the river - the land is currently water logged at times and adding more concrete would affect the areas as land drains arnt able to take water away now. - the gp schools local are already over subscribed - the animals will loose there natural habitiat like deer bats etc - the turning is on to a main road that is currently busy and the roads can not take anymore traffic and is becoming more holey - the houses arnt affordable houses -		whitworth facit Is a small village that current cant take any more traffic and homes . it one in and out and god forbid if traffic lights or bad weather journies increase by 1hrs just to get in and out of whitworth. animals will be loosing homes to make way for more homes. roads unsuitable and more holes then anything -
803	Marietta	Galbraith	-		Object	My objections for the proposed building of housing on the above sites is based on a number of reasons: - 1. Infrastructure. The current housing situation is already at (possibly beyond) capacity with regards to schools, doctor's surgeries, dentists, employment and traffic. There are no more schools planned and no way to expand the ones already here. Some children have to travel miles to schools out of the area due to oversubscribed local schools. This is the same for doctor's surgeries and many other amenities. - 2. Traffic. There is one main road in and out of Whitworth that already has issues with raised levels of traffic. In the four years we have lived here, there have been many occasions where traffic has been an issue due to constant roadworks (for various reasons relating to increased housing and traffic) which has caused major problems. Also, most people are employed outside of Whitworth so traffic is high anyway. More housing would increase this issue with no solution being given as to how it could be rectified. - 3. Utilities. More and more power cuts have been happening recently in Whitworth due to new housing as well as burst water pipes and problems with drainage. This has contributed to the traffic issues with roads having to be dug up every few weeks to 'fix' the problem. - 4. More housing would mean taking up land that is natural drainage for flooding. Recently, my area was put into the 'flood risk' catagory (although we haven't flooded), significantly increasing my home insurance. If more homes are built, this would increase risk of flooding to many homes around Whitworth, which would cause loss of market value and would reduce the chances of being able to sell the property. - 5. Much of the 'green land' would be lost which is detrimental to the wildlife around Whitworth. The Government have a duty to protect greenbelt land and our environment! The carbon footprint would be horrific! - In conclusion, building over 300 houses in Whitworth would causes issues beyond repair! Environment, traffic, pollution, infrastructure, drainage etc. would all be dramatically affected in the most negative and damaging way. Whitworth was not meant for so much housing and so many people.		-

875	Margaret	Banham	-		Object	This was a small Village"Town* My family were born and bred here going back to the 1800s,I know what Progress is, But all these Houses with out Building New Sewers, Schools, Doctors ,Roads etc i s Ridiculous ,and it's to busy now with Facit Fold and Grogan Close and many more.... Mr and Mrs Banham.		-
886	Michael	Banham	-	HS2.102 to HS2.109	Object	The infrastructure of whitworth is over stretched as it is,the school's cannot cater for such an undertaking. Theres only one road in or out of whitworth any problems on this road causes absolute mayhem. The winter months are an absolute nightmare just to get onto market street.		I cannot understand why anyone would want to over populate an area that is already struggling.
889	Derek	Lord	-	HS 102, HS105, HS104, HS106, HS107, HS108, HS109.	Object	We in Whitworth are sure that there are enough houses here at the present time.There are large estates at Cowm Park, Tonacliffe, Wain Gap, Wallbank, Knot Hill, Orama Mill Site, Edgemoor Close, and a small estate at Facit. The exits onto the one main road are at present full of traffic. The Doctors, Schools etc are now at bursting point. We in Whitworth have done our share in housing. Please think again before building any more. Thank You.		-
892	Mandy	Sanderson	-	HS2.102, HS2.105,HS2.104, HS2.106, HS2.107, HS2108, HS2.109	Object	The transport system around Whitworth cannot cope with the volume of traffic . Also local amenities are already at braking point..		No
911	Julie	Latham	-		Object	In principle I don't object to more houses or people. However I will until I am convinced that the planners are committed to the infrastructure improvements required to support the extra influx of people and cars . - The main bottlenecks caused by Whitworth traffic happen in the Rochdale Borough at the bottom of Whitworth Road and on Shawclough Road. These areas are controlled by Rochdale Council who are under no obligation to improve traffic flow to improve the lives of the people of Whitworth. There are changes could be made in these areas which would help greatly. Unless Rossendale Planners can work with Rochdale Planners to create new roads and implement better traffic flow measures the extra cars generated by this and other proposed housing projects in Whitworth will mean journey times to get to Rochdale, Manchester and the M62 Motorway network at f peak times will be so long that people who commute this way to work will have to give up their jobs or move away from the village. I really don't think that this issue is being taken on board by either Borough. - The medical centre is also over-subscribed and I believe that the schools are too. I appeal to the planners to find funds and solutions to these concerns before adding more pressure.		-

913	Michelle	Ashcroft	-	HS2.102, HS2.105, HS2.104, HS2.106, HS2.107, HS2.108 & HS2.109	Object	Whitworth is a geographical challenge at the best of times, positioned in a valley, consisting of ONE main road with multiple roads stemming from this leading to many properties that are built on the hillside. There are many green areas which are used by local farmers for their livestock. During times of heavy rain many of the roads are flooded, and during winter many roads are very dangerous in the snow. It is not uncommon for Whitworth to be gridlocked as there are far too many cars on the roads, all it needs is one set of road works and the town becomes inaccessible. The local schools are now over subscribed, the High school has had to turn away many children who only live a couple of miles away. The primary schools are also subscribed making it very difficult for teachers to provide a good education to the children. The local doctors are unable to cope with the number of patients, trying to get a same day appointment is nigh on impossible these days. We have issues with anti social behaviour due to lack of amenities available for teenagers, the local youth club has been closed down. There is a lack of police presence (the PSCO tries her best), people don't feel as safe as they should. The library is still under threat of closure, the pool is only open because of the people of Whitworth who run it. Building more houses brings more people, more cars, more strain on the infrastructure. I appreciate housing is needed but the number of houses that has been suggested will bring this town to it's knees.		I would suggest you come to Whitworth during the morning school run and see how difficult it is around Horsefield Avenue. Come sit in the traffic jams during rush hour. - - The government has spoken about creating new towns, this is a great idea, there are places that can accommodate thousands and thousands of houses. Build there not here!!!
916	Jane	Trudgeon	-	HS2.102 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	We are already an overstretched village infrastructure, the roads would not cope with an extra amount of traffic and would make the already difficult commute to exit/enter the village impossible. There are not enough schools nor would the doctor's surgery be able to cope as even now it is almost impossible to get a reasonable appointment time, - - The housing developments would impact on wildlife		-
918	Marion	Ashworth	-	HS2.107 , ALL.	Object	I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.		I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.

935	Christine	Fallon		HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	1 Whitworth has one main road which is often gridlocked the smaller access roads are grossly un suitable e.g Tonacliffe. - 2 Schools are already oversubscribed parking at drop off times would be more chaotic and dangerous. - 3 Doctors and dentists are already at capacity. - 4 Services of gas electricity and water would require major upgrade. - 5 We are seeing flooding due to inadequate drainage this would be increased. - 6 Is this acceptable use of greenbelt land where previous planning permission has been refused the effect on wildlife and trees would be immense.		-
939	Geoffrey	Fallon	-	HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	Whitworth is a small village with one already inadequate road. Doctors dentists and schools are already oversubscribed parking in school areas is dangerous already and would be far worse. - Gas electricity and water services would need major upgrade. - This is inappropriate use of greenbelt land causing damage to wildlife and the environment drainage is a major problem now with frequent flooding.		-
955	Janet	Whitehead	-	HS2.102, HS2.104,HS2.10 5, HS2.106,HS2.10 7, HS2.108,HS2.10 9	Object	Whitworth is already a very busy village, oversubscribed schools and Doctors We have one road in and one road out which is almost impossible during peak times in the morning - The houses already exceed the heights up the sides of the valley - Our green belt is very important to wildlife and the the people the live here - If we let one builder onto greenbelt it opens the doors to far too many others - Our population is big enough and we cannot accommodate many more		- Our Councillors are voted in by us and now need to stand up and fight for us - - 400 houses is a ridiculous amount of new houses for a tiny village - - We have had 2 different sites where new houses have been built in recent years we've done our bit for Government figures - - Please find somewhere else
962	Kathryn	Gill	-	HS2.102, HS2.105, HS2104, HS2106, HS2107, HS2108, HS2109	Object	I object to any changes in use of local greenbelt land to build houses. Also, there is only one road through Whitworth and it is already congested. We have only 1 doctors surgery, and not enough school places to accommodate hundreds of additional families. Greenbelt land cannot be restored once built on, and these proposals would change the landscape of Whitworth. I am also concerned about the building of 20 properties around Cowm. This is a resource continually used for recreation by the people of Whitworth and should be preserved.		No
979	Marie	Pye	-		Object	All of these developments will contribute to already existing traffic problems as there is one road in and one road out of the area. The high school is already oversubscribed with local children not being offered places.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
992	Susan	Farrell		HS2: 102, 104, 105, 106, 107, 108, 109	Object	I strongly object to the building of houses on all the above mentioned sites for the following reasons: - Greenbelt land is of importance to all the wildlife of Whitworth and Shawforth . Deer and bats live in the forests in the area. Many badgers and foxes inhabit the countryside and rare species of wildlife live in the ponds. - The forest area at Tonacliffe would be cut down having a negative impact on the environment. - Tonacliffe road is already dangerous for children with cars parked along the length of the road at school dropping off and picking up time. The increased number of cars if more houses were built in the area would be worse for the children and residents. - Local amenities such as dentists and GPs could not cope with the increased population. It is almost impossible at the moment to get a GP appointment in less than two weeks. More housing would have a detrimental effect on the residents of Whitworth and Shawforth. - Facilities such as water, gas and electricity are already stretched and a major upgrade of the infrastructure would be required to support increased housing. - Local drainage cannot cope with the current usage. More housing could have an impact on flooding. - Public footpaths could be lost reducing the number of rights of way for walkers. - The road network both ways from Rochdale to Bacup is already gridlocked. More housing would put an increased strain on traffic and the already poor public transport in the area. - The only high school in the area is already oversubscribed. With increased housing parents may have even less chance of a first choice school for their children. They may have to travel miles to school. - I understood it is government policy to protect Greenbelt land except for 'Exceptional Circumstances'. What are the exceptional circumstances that enable housing to be built on the greenbelt land in Whitworth and Shawforth?		Summary - - Whitworth and Shawforth are already busy villages with oversubscribed schools and GP services with one road in and out between Rochdale and Bacup. - - Can we accommodate more housing that will put pressure on already overstretched amenities, increase traffic and change the beautiful landscape forever?
1011	Paul	Williams	-		Object	Loss of habitat for wildlife. Deer and badgers live in the area. - More housing will increase the traffic on the roads .		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
1029	Angela	Hannam	-	HS2 102; HS2 103; HS2 104; HS2 105; HS2 106; HS2 107; HS2108; HS2 109	Object	1. Whitworth is already overburdened by the current housing stock. Drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. 2. The schools in Whitworth, in particular the high school, are at capacity and cannot sustain any addition to the number of potential pupils. 3. There is only one road in and out of Whitworth and at peak times in particular this road is congested with idling traffic contributing to air pollution. People travelling from Bacup and beyond to get to Rochdale all come through Whitworth and add to the problem. 4. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. 5. Access to most of these sites will increase traffic hazards on an already inadequate highway. - 6. I challenge the need for more housing in Whitworth. 6.1. Where is the evidence of any demand? 6.2 There are countless houses left empty and neglected in Whitworth, why are these not modernised and made available? 6.3 Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? -7. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. 8. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.		-

1109	Jane	Gadsby	-		Object	<p>I wholly object to more housing being built in Whitworth!! We are a small(ish) village that can not cope already with the amount of new houses and people moving into it!! Our schools are already over subscribed; they are turning people away that don't live overly far away that a few years ago would have had no problem getting a place. The Doctors surgery can't cope with the number of patients wanting appointments. You are also increasing the risks of flooding. My house is already at risk and has already flooded twice. The main road (one road in and out) is gridlocked most mornings with commuters trying to get out of the village but most of all you are taking our beautiful green areas that Whitworth is so lucky and honoured to have. We have lots of empty properties that can't be filled already!! Please leave us and our village alone!!</p>		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
1134	Abigail	Leyland	-		Object	WE DO NOT NEED ANYMORE HOUSING IN WHITWORTH! The schools are already oversubscribed, our local doctors can not possibly take on any more patients as it is already a struggle to get an appointment currently. We only have one road in and out of the village which gets badly effected by rush hour traffic, making it difficult for the locals to get to work/school etc. We have such a lovely view of greenery surrounding our little village and we do not want our sight ruined by building ugly, unnecessary housing.		-
1152	angela	Jordan	-		Object	I do not think whitworth has enough resources to sustain further housing estates .The one and only road is already impossible at peak times,our doctors surgery is bursting with no appointments,and our school children cant get a place at our local school. - The wildlife is also important to whitwoth people but is being pushed further and further out of its natural habitat.		No
1166	Brendan	Doherty	-	HS2, 102,104,108,105 ,107,106,109.	Object	WHITWORTH IS FULL. This statement encapsulates all the issues surrounding any expansion of dwelling houses in the township of Whitworth. - - The negative impact of any developments in the town cannot be overstated. - - The whole nature of this small township will be irreversibly destroyed if development are allowed. - - Flora and fauna will be the first to suffer. This valley is home to an exceptional and expanding variety of animals and trees and flowers. This growth has taken decades to achieve and would by totally reversed by the stroke of a pen. - - To say that all the ingredients which go to make up Whitworth as a place for people to live are overloaded is indeed an understatement. - - Congestion of traffic and people is at its limit, any increase can only be detrimental to the health and quality of life of residents. - - Local services, schools, doctors, civic amenities are already at their serviceable optimum. - - The existing utilities of electricity,gas and water only just maintain service. There are often cuts in these making it seem that we are a third world town. - - Whitworth is a linear town with no bypass or possibility of such. Most of the day traffic is heavy and at peak times chaotic. This combined with the nature of HGV traffic leaves the roads in constant need of repair. Add a very poor public transport system and the certain increases proposed then the result is guaranteed to be disastrous.		Listen to the people of Whitworth.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
1185	Shauna	Hamer-pieper	-		Object	I live on king street and the land you are proposing to build on is boggy that would require draining and would lead to water draining down hill onto king street as it is just below the proposed housing site, it's a rather quiet street just how resident like it so the noise from the housing is a no no especially considering most people on king street are elderly. The road you would have To open up has from since when I can remember been a closed road it's now a bike path and they used to put horses on the fields at the bottom it's a nice quiet walk for residents of whitworth also so placing housing there would disrupt peace. Also privacy of the houses on king street the new proposed houses would be over looking king street I for one want to keep privacy in my own home and garden at summer time. We don't want your houses whitworth can't cope with the capacity you want to build it's only a small village with little amenities. We especially don't want immigrants or refugees moving here. Whitworth people like to stick to what they know and you are disrupting people way of life ! Go and build somewhere else like Bacup or further up		We don't want your houses there isn't enough room to accommodate more people. Also it's called a green belt for a reason meaning no building ! You can't change something to suit yourselves. Build houses else where we don't want this kind of change. leave the small town of whitworth alone !
1190	Nathan	Worrall	-	HS2.107 , HS2.108, HS2.109, HS2.102, HS2.105, HS2.104,HS2.106	Object	Whitworth doesn't have the infrastructure to sustain the construction of these new houses. The local doctors and schools would struggle to meet the needs of the increased population. There is bad traffic in Whitworth already, this will only make it worse and these traffic problems are highlighted when there are roadworks and there are large queues. The proposed sites are located on greenbelt land, and this will have a negative effect on the local wildlife as well as destroying the natural beauty of this land.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.102	Further comment
1272	Michala	Geldard	-	HS2.102, HS2.105, HS2.104, HS2.106, HS102.107, HS2.108, HS2.109	Object	I am objecting in general to the proposed house building in various sites around Whitworth and specifically in relation to the proposed sites t Tonacliffe. My objections are based on a number of reasons: 1. Wildlife in the local area. Deer, badgers, foxes and hares live within the forest areas. Rare protected newts live in the pond. Bats nest in the forest. The importance in f this green belt land for the wildlife cannot be over emphasised. - 2. Tonacliffe forest would need to be cut down adversely affecting the local environment. - 3. The impact of more cars around local schools, especially Tonacliffe School, is of great concern due to the already high volume of traffic. Increasing this would be unacceptable. - 4. Local amenities such as schools, doctors, dentists are already to capacity. I have concerns that more houses will have a negative impact on the lives of current residents in relation to these amenities. - 5. Has the infrastructure of our small village been considered in relation to electricity, gas and water supply if more houses are built? Whitworth already experiences power cuts and seems to be worse since other recent building developments have been completed. - 6. The road network into Rochdale is already gridlocked. More houses will increase this problem. Public transport from Whitworth is limited to buses and I consider that if this proposed building goes ahead there will also be a negative impact on the poor public transport in and out of our village. - 7. Local drainage already struggles to cope with usage now, if the volume of residents increases would the drainage system be able to deal with the added strain? - 8. We bought our property because it is located on the last cul de sac of a small estate with no through traffic. This proposed building work will completely alter this into drive through roads. Plus the volume of traffic will - Increase which I consider to be unacceptable. - 9. I am very concerned that we may have loss of privacy as we are not currently overlooked and this was a major consideration when we bought our house.	-	
1283	Jonathan	Geldard	-	HS2.102, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	Whitworths infrastructure is already at near full capacity. The single main road through Whitworth is, at times, grid-locked. Streets around the primary schools is chaotic. There is a definite flood issue through the valley. Crime is rising unchallenged. The rich and diverse wildlife is flourishing around Whitworth. - Any of the development projects would have a negative and detrimental implication on Whitworth and it's residents.	-

1298	Carol	Williams	-		Object	Same reasons as HS2.109 and HS2.106 except for the additional traffic/cars parking near the school		I believe the council is going against the Government policies on planning and green belt conservation - - A high level of protection should be given to most valued landscapes, wildlife habitats and natural resources. - - I object to the policy itself and the proposed housing developments on individual sites mentioned namely HS2.109 Horsefield Avenue, HS2.106 Moorland Crescent, HS2.102 king Street and HS2.104 Quarry Street
1310	Richard	Dolan	-	HS2.101-109	Object	<p>We are vehemently opposed to all housing allocation in Whitworth. Our group has decided to vote against and actively campaign against all Councillors and MPs in favour of this proposal. We will withhold our votes and encourage family, friends, and community to do likewise. - We are outraged by this proposal, especially HS2.107 that will encroach on Healy Dell. On this point we will be contacting the National Trust and other such organisations to make them away of the proposed desecration to the Green Belt. Furthermore, we are now investigating possible financial links between all Councillors, MPs, and RBC employees involved in this issue with the proposed contractors. This senseless proposal for a village far too small to accommodate a possible 300 new homes suggest an ulterior motive. No one in our community that we have spoken to is in favour of this plan and we will use our sizeable influence. - There has been more than enough housing development in Whitworth. This new proposal will destroy our green spaces and necessitate a new schools, doctors' surgery, dentist, shops, and possible a new road. All future housing development must stop. Our community can not accommodate any more. - In light of the fact that this proposal has not been advertised to a great extent (we have spoken to people who know nothing of it), we will be conducting a petition again this proposal and encouraging everyone to sigh the following statement: - We will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community.</p>		To reiterate, we will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community. - - The people's power will be felt if this plan in authorised.

1336	Maureen	O'Mara	-	HS2.102,105,104,106,107,108,109	Object	Whitworth is already struggling with oversubscribed schools. There is only 1 small GP surgery and 1 dentist. The village cannot cope with stretching the existing amenities. - One of the main objections I have is the traffic and parking, which is already dire. Streets are almost impossible to drive down safely due to double parking. There is only one main road, which when closed for any reason means driving via Todmorden to get around - this has happened on a number of occasions. Most roads have very steep inclines which are regularly not gritted in winter. To increase parking and traffic would destroy Whitworth. Where would access roads be and how would this affect current residents.		Put quality of people's lives before profit.
1363	Gareth	Dolan	-	HS2.101 to 109	Object	I do not live in Whitworth but spend a lot of time there with my family. I am deeply concerned by this proposed loss of green belt and will do my utmost to object against it. - - I strongly urge RBC to re-consider its proposal. Whitworth cannot handle any more development. - - Thanks		If this destruction of the green belt in Whitworth is passed then I shall simply take my family and my money elsewhere as there will no longer be the same attraction Whitworth now offers.
1365	Michael	Whitehead	-		Object	The doctors is overcrowded, the schools are overcrowded and there is one road in and out. All three of the mentioned cannot cope in the current state. Whitworth has too many houses for the current infrastructure. If the proposal goes through, which I sincerely hope it does not, there will be 300+ more homes within Whitworth. This means 650+ more people needing a doctor, 300+ more children who need schools and 300+ more cars on the roads. If the current infrastructure is struggling I dread to think how the village would end up with that amount of extra people. - There are also many deer which have recently returned to the greenbelt land on either side of the valley. Moving any sort of greenbelt/urban borders is highly likely to destroy their habitat and force them away.		-

1417	Gillian	Middlemas	Whitworth Community High School	HS1.102 HS2.103 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	As Headteacher of the only secondary school in the Whitworth area, I am concerned that the proposals to build considerable numbers of new dwellings take no account of educational provision in the local area. - The school is already oversubscribed: for 2017 entry into Y7 over 40 families were unsuccessful in gaining a place, despite Whitworth Community High School being their first preference; over 40 families went onto on the Local Authority's waiting list for a place; over 25 families went to Appeal for a place, and very few of them were successful. The school now has 640 students and, without extra classroom space, has no capacity to increase the admissions number, nor to take additional students into existing year groups. - Likewise, many local primary schools are also full / oversubscribed, suggesting there is insufficient educational provision in the local area already. - This situation will be exacerbated if the proposed number of new dwellings goes ahead, unless the developers or Lancashire County Council are prepared to increase the school's capacity by funding additional classroom / learning / social space. The school is over 50 years old, largely of Langspan pre-tensioned concrete construction (intended life expectancy already exceeded) with HAC (high alumina cement) - In addition, the school experiences ongoing issues with the provision of utilities: the water main up the school drive is at risk of collapse; the water supply to the area has recently been affected on a number of occasions, and presumably further demand from new building would increase these issues. - The proposals for new housing does not appear to be linked to any plans to improve the traffic situation in the Whitworth area: lengthy queues heading towards Rochdale each morning already create issues for students travelling to school.		Whilst it is excellent news that there is demand for additional housing in the Whitworth area, I am particularly concerned about the infrastructure which is essential to support this kind of development. Education, and raising aspirations, is essential to improving the future for our young people and I have concerns regarding school capacity; increased traffic; increased demand on local services generally; impact on provision of utilities; and whether or not this has all been factored into the planning process. The infrastructure needs to be in place before the planning is agreed. I also have concerns about the impact of further building on wildlife, the village ethos, and greenbelt areas.

1440	Helen	Banham	-	HS2.102 - King Street	Object	<p>1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - Would my house and others be overlooked. 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. 16. Some of the areas and the surrounding areas have already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost. 18. Local drainage cannot cope with the usage now would more residents put an</p>

						residents put an unbearable strain on this network. -		
1469	George	Salt	-		Object	Whitworth is located in a valley, this in itself presents issues with the amount of space available. 7,500 people lived in Whitworth according to the data from the 2011 Census and this is a large amount of people if you look at the services and infrastructure in Whitworth. To start off with there is one GP surgery that has 7,248 people registered with them. Whitworth Medical Centre has 4 GPs which means that for one GP there are 1,812 people. There is not any more capacity available for more people to register with the practice. - - Schools are also busy especially with just one school for secondary education. With more people living in Whitworth that would mean a greater demand on schools and could result in some children living in Whitworth not going to school there. - - Going back to Whitworth being a valley this physical feature means that infrastructure being put in can be difficult. Whitworth has one road in and out and during peak hours this is a very busy road. Most new people would probably be using a car as their main mode of transport adding more pressure to Market Street and its tributary roads. Public transport is also very poor in Whitworth meaning that it is not really a viable alternative for any new people who would come to Whitworth. - - As shown with a few of these arguments Whitworth does not have the capacity to accommodate an extra 359 houses over the next 15 years. For example an average of 3 people per house would result in 1,077 more people living in Whitworth. It is not going to work.		
1497	Wendy	Rose	-	HS2.102 Barlow Baottoms, Land North King St HS2.105 Albert Mill HS2.104 South Quarry St HS2.106 Tonacliffe HS2.107 Eastgate HS2.108 Cowm Water Works HS2.109 Horsefield Ave	Object	The infrastructure of Whitworth cannot support or sustain further development. There is only one road in and out of Whitworth. Congestion is a serious problem now due to the volume of traffic. When there are roadworks the situation is bordering on dangerous as emergency vehicles are hindered. Further residential development would only compound this issue with higher levels of vehicles. - - Power cuts are a regular occurrence in this area, one can only assume this would get worse with the extent of the proposed developments - - Doctors surgeries are fully to capacity and cannot adequately serve the community at the moment. Waiting times for appointments is ludicrous. Schools are over subscribed. Parking around schools is dangerous and any increase in school children would seriously impact on this. - - All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - - Proposed land in some cases is not viable as parts are prone to flooding. Culverts running through a proposed sight would impact on flood defences in the area. - - -

The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village.	-	
1504	Timothy	Makin	-	HS2.102, HS2.103, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. - - A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. - - Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done. - - Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. - - The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. - - The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village.	-

								<p>footpath (Right of way) could be lost. 18. Local drainage cannot cope with the usage now would more residents put an unbearable strain on this network. - DON'T FORGET EACH ADULT IN YOUR HOUSEHOLD CAN PUT IN THEIR OWN OBJECTION FORM TO THE BUILDING WORK. Extract from the Governments Planning Policy Statement - Protection and Enhancement of the Environment 17. The Government is committed to protecting and enhancing the quality of the natural and historic environment, in both rural and urban areas. Planning policies should seek to protect and enhance the quality, character and amenity value of the countryside and urban areas as a whole. A high level of protection should be given to most valued townscapes and landscapes, wildlife habitats and natural resources. Those with national and international designations should receive the highest level of protection. 18. The condition of our surroundings has a direct impact on the quality of life and the conservation and improvement of the natural and built environment brings social and economic benefit for local communities. Planning should seek to maintain and improve the local environment and help to mitigate the effects of declining environmental quality through positive policies on issues such as design, conservation and the provision of public space. 19. Plan policies and planning decisions should be based on: –up-to-date information on the environmental characteristics of the area; – the</p>

								<p>potential impacts, positive as well as negative, on the environment of development proposals (whether direct, indirect, cumulative, long-term or short-term); and, – recognition of the limits of the environment to accept further development without irreversible damage. Planning authorities should seek to enhance the environment as part of development proposals. Significant adverse impacts on the environment should be avoided and alternative options which might reduce or eliminate those impacts pursued. Where adverse impacts are unavoidable, planning authorities and developers should consider possible mitigation measures. Where adequate mitigation measures are not possible, compensatory measures may be appropriate. In line with the UK sustainable development strategy, environmental costs should fall on those who impose them – the “polluter pays” principle.</p>

						<p>flooding in the valley), should the council be protecting residents from it rather than creating further problems? Local drainage (water and sewage) cannot cope now in some areas. Should County, District and Town Councils together with United Utilities officially verify which of these proposed development sites are in potential flood areas before planning permission is granted? Further house building would expose a failure "to deliver sufficient community infrastructure and services to meet local needs" (a key principle of the National Planning Policy Framework). Such development would also cause further pollution (e.g. to air quality - more traffic on the roads) creating a greater carbon footprint for the valley and the next generation. Article 19 (from the GPPS), in line with UK Sustainable Development Strategy, states that "the environmental costs should fall on those who impose them"; will the council take this "polluter pays principle" into consideration before making any decisions? Geographically, in some of the proposed sites, the landscape makes building difficult. It would require radical and costly solutions. Where would the access roads for these developments be? If any small byroads are used, this would increase traffic, thereby increasing the risk of accidents to children (particularly near schools). Additionally, in winter such roads are often not salted or gritted making them a hazard for the disabled and the elderly resulting in more accidents and costs for the NHS. There is already inadequate infrastructure in transport where roads are gridlocked at peak times and in need of repair e.g. the already congested road leading to the reservoir and quarry (adjacent to Cwm Waterworks). With one main road in and one out, Whitworth is already a congested village. Public transport is very limited e.g. no train/tram services. How will the increased traffic be managed? In other services, there have been at least 4 outages this year in electricity in the Whitworth area. Water and gas would also need upgrading (representing further expenses on already overburdened service users). Present resources would fail to deliver the increased demand new residents would require, thereby failing to meet the criteria set out in NPPF. Currently, schools, doctors and the sole dental practice are all over overstretched and over subscribed. This depletion in resources would curtail the life chances of future generations. Further house building would further increase class numbers in schools and severely overload resources there. Frequently, waiting times for doctor's appointments are well over four weeks. Dental</p>

1546	Sandra	Hesten		SHLAA16020	Object	<p>We have consulted many villagers living in Whitworth and their ideas form a large part of our objections to all the proposed new housing developments (as referenced on page I); particularly those sites (underlined on page I) encroaching on already limited public spaces which consume Greenfield and environmentally sensitive areas. Our view is supported by the National Government Policy Framework (NGPF) which states that planning should contribute to conserve and enhance the natural environment.</p> <p>According to article 8 of the Human Rights Act, everyone has "the right to peaceful enjoyment" of their home and immediate surroundings. These planning proposals would interfere with that right.</p> <p>Public footpaths to surrounding countryside would be compromised. There is also research that suggests that being in, and having access to, a green landscape can improve mental wellbeing and quality of life.</p> <p>According to article 17 of the Government's Planning Policy Statement (GP PS) on Greenbelt conservation, "a high level of protection should be given to wild life habitats". Further house building would have a devastating impact on them, and the landscape as a whole. We believe they would represent a loss of residential amenities to the community.</p> <p>Greenbelt land is important in the protection of Whitworth wildlife. Cutting down the forest of Tonacliffe would represent an act of ecological vandalism. Deer sleep, birds sing and bats nest in these areas. Hares and foxes are frequently seen. Rare protected newts live in nearby ponds. In the coppice, surrounding Cowm Waterworks, there are owls, badgers and increasingly rare, English bluebells. Government Planning Policy is supposed to protect Greenbelt except for exceptional circumstances. What are these circumstances and how have they been justified by the planning committee?</p> <p>Various postcodes within Whitworth have been officially re-classified as within a flood plain e.g. Cowm Waterworks. Therefore, proposing further house building beneath Cowm Reservoir (a local beauty spot) would seem irrational. The dam wall (a public footpath) is now closed for safety checks until November to allow United Utilities to test the infill and stability of the dam.</p> <p>Many residents are very concerned about the implications e.g. a major flood risk. Any reinforcement would be costly. How often would these tests have to be performed in the future?</p> <p>Cowm Waterworks has a small underground storage reservoir within the site. Compromising that and the culvert running through the middle of the Tonacliffe site would increase the risk of</p>

						<p>flooding. With the unpredictability of climate change (e.g. more frequent flooding in the valley), should the council be protecting residents from it rather than creating further problems? Local drainage (water and sewage) cannot cope now in some areas. Should County, District and Town Councils together with United Utilities officially verify which of these proposed development sites are in potential flood areas before planning permission is granted? Further house building would expose a failure "to deliver sufficient community infrastructure and services to meet local needs" (a key principle of the National Planning Policy Framework). Such development would also cause further pollution (e.g. to air quality - more traffic on the roads) creating a greater carbon footprint for the valley and the next generation. Article 19 (from the GPPS), in line with UK Sustainable Development Strategy, states that "the environmental costs should fall on those who impose them"; will the council take this "polluter pays principle" into consideration before making any decisions? Geographically, in some of the proposed sites, the landscape makes building difficult. It would require radical and costly solutions. Where would the access roads for these developments be? If any small byroads are used, this would increase traffic, thereby increasing the risk of accidents to children (particularly near schools). Additionally, in winter such roads are often not salted or gritted making them a hazard for the disabled and the elderly resulting in more accidents and costs for the NHS. There is already inadequate infrastructure in transport where roads are gridlocked at peak times and in need of repair e.g. the already congested road leading to the reservoir and quarry (adjacent to Cwm Waterworks). With one main road in and one out, Whitworth is already a congested village. Public transport is very limited e.g. no train/tram services. How will the increased traffic be managed? In other services, there have been at least 4 outages this year in electricity in the Whitworth area. Water and gas would also need upgrading (representing further expenses on already overburdened service users). Present resources would fail to deliver the increased demand new residents would require, thereby failing to meet the criteria set out in NPPF. Currently, schools, doctors and the sole dental practice are all over overstretched and over subscribed. This depletion in resources would curtail the life chances of future generations. Further house building would further increase class numbers in schools and severely overload resources there. Frequently, waiting times for doctor's appointments are well over four weeks. Dental</p>

						<p>practices have gone from three to one. There is no optometrist. Long queues are the norm at peak times at the chemist. Any extra patient loading would exacerbate already inadequate NHS provision.</p> <p>Local amenities are already perceived to be at breaking point. Any extra pressure would lead to a failure to meet future local community needs impeding the NPPF's strategy of improving "the health, social and cultural wellbeing" of all.</p> <p>Have surveys been undertaken on these sites and if so have the result been published prior to this consultation? How would all the problems described above be resolved? How long would it take?</p> <p>What would it cost? Who would pay for it? Has any planning been done on the extra infrastructure, services and resources required? Do the local council have a legal responsibility to ensure adequate provision of services for all its residents? Can Whitworth cope with an additional 25% to its population?</p> <p>In conclusion, the National Planning Policy Framework states that we should take account of "the different roles and character of different areas"; promote "the vitality of our main urban areas"; protect "the Green Belts around them"; recognise "the intrinsic character and beauty of the countryside"; support "thriving rural communities within it."</p> <p>Shouldn't the council take heed of these Core Planning Principles and vote against the proposals?</p> <p>Please don't reduce our beautiful valley to a dormitory suburb.</p>		
1744	Keren	Szelesi		King Street	Object	<p>Objections:</p> <ol style="list-style-type: none"> 1) Infrastructure is already at breaking point in this area. 2) Road system, water supply, medical centre, schools are at full capacity. 3) Encroach on green spaces. 4) Whitworth will no longer be a village but an urban sprawl. 		Not enough publicity has been given regarding these proposals.
1820	Kelly	Holt	Lancashire County Council		Support	<ul style="list-style-type: none"> • HS 2:102 - Barlow Bottoms, Whitworth – The existing access onto Market Street appears suitable and could be designed to accommodate the potential mixed use for residents and quarry traffic. 		
1822	Richard	Sharples	Lancashire County Council		Not Applicable	<p>It has just been brought to my attention that one of the housing allocations in your draft local plan, HS2.102 in Whitworth, is on land safeguarded in the minerals and waste local plan for an alternative access to Whitworth quarry (MRT12 under policy SA2). This wasn't noticed previously hence wasn't referred to in our response to your regulation 18 consultation this autumn. I think the 2 designations are probably in conflict, has the safeguarded land been overlooked or do you feel it can be accommodated within the housing allocation?</p>

56	Valerie	McDonald	-		Object	<p>Whilst I recognise the need for further housing within the area, I am concerned about the siting of so many proposed dwellings in this particular valley. The roads are already clogged at rush hour and as there is only one road through, movement of traffic, should there be an accident or roadworks, becomes frustratingly unpredictable. What provision is there to maintain and develop the road system in the valley? - - Whitworth High School has become more popular over the past couple of years with waiting lists existing. What provision will be made to expand the school, and will this be done with a long term objective in mind and not just a sticking plaster effort to put up some portable classrooms? - - Local services such as the Children's Centre have just been lost. What plans may be afoot to reinstate such necessary provision? I feel it is morally wrong to simply build new houses and forget about the infrastructure to support this development. - - There is a wealth of wildlife on the moors where you are proposing to site many homes. Presumably there will be checks in place to ensure some of these species are not endangered? - - Finally, there are already plenty of properties on the market at very affordable prices (in comparison with some surrounding areas). Some of these have been on the market a while? Why, if there is already affordable housing, is there a need to build more? -</p>		
131	Christine	Greenwood	-		Object	<p>I am objecting to plans to allow the building of over £350 properties on various sites around Whitiworth and Shawforth over the next 15 years. - Not only am I concerned about the building on our greenbelt sites which is part of the attraction of the area. I can understand the wind farm and can support renewable energy sources but not the creation of a collection of housing estates - whether social/affordable or not . The awful collection in Britannia speaks for itself! We have already had several builds across Rossendale but the extra Council Tax revenue does not seem to have brought many benefits to the borough. - As it stands at present the infrastructure can just about support the current residents - schools are already over subscribed and getting an appointment at our one GP surgery is already a mammoth undertaking. Planning to build or reopen a school by any chance? - Traffic is already an issue with one road in and out and a bus service that has to be one of the most unreliable in the surrounding areas ! There are next to no facilities for young people/children and a library fighting to survive so I think that this needs to be given serious consideration before you go ahead.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.103	Further comment
153	G.N	Royds			Not Applicable	<p>As I have indicated before, a prerequisite for a community is sustainable employment. A complete hash has been made by not providing this. Former mill sites have been used for housing, such as Orama Mill, Facit Mill, Albert Mill and the mill near Spodden Fold (which I think may have been called Old Kays). Most of these are easily accessible. Now Spring Mill is proposed for similar treatment! On the other hand, peripheral businesses have been allowed, e.g. tattoo parlours and tanning centres, which debase the human body; the type of potentially smelly fast food outlets that encourage unhealthy eating.</p> <p>Housing without local employment means commuting, causing traffic congestion and pollution. The kind of industry needed is that involved in green energy, recycling, sensible clothing and the production of healthy food. The former site of Spring Mill is a place where a sensitively designed industrial estate might be possible. It is already surrounded by trees and has foundations remaining but it is not on a regular public transport route and is less accessible than previously mentioned sites that have been precluded. It is absurd to think of building on HS2.102/103/106/109 and on that part of HS2.107 not formerly occupied by Spring Mill. These are large areas of countryside enjoyed at present as part of the natural environment. HS2.104 also appears to be countryside, with a few established houses, and also should be protected from further building. Cowm Water Treatment Works (HS2.108) is ideal for industrial development. Let us have local jobs and ensure adequate facilities are available before any more houses are built in Whitworth.</p>		<p>P.S. I did not make this response online because it was mandatory to provide an e-mail address. Please change this, so that more people are encouraged to respond.</p> <p>P.P.S. Please keep me informed of developments.</p>
155	Jo	Furtado			Support	HS2.103 - the specialist (old people's) accommodation being built near Buxton Street is also welcomed. Support.		
261	David	Eyes	-		Object	<p>This is an unbelievable plan that will stretch amenities in the area even further. - - The new estate near Cowm has already increased traffic congestion on the one road in and out of the village and schools are already struggling to cope. - - There is also the issue of wildlife and the impact it will have on their environment. - - I for one will be leaving if this idiotic plan goes through. -</p>		This smells of greed over common sense

268	Michaela	Radford	-		Object	Whitworth has had numerous instances recently regarding the roadworks for the infrastructure repair and maintenance. As an employee of all 4 major utility asset owners in the area, I am very concerned regarding the houses proposed. We only have one road throughout the valley and this is impacted severly when roadworks are planned. My concerns are that these are not managed correctly by LCC at present, therefore; more houses and more infrastructure would have a massive impact on the people living in the village. People face unemployment now due to the frequent issues we face getting into work. - Not to mention over crowded schools and doctors as we stand at present. - - I request, here in writing, to be informed of any planned meetings regarding the houses in whitworth and notification be sent in writing to my address above.		-
446	Paula	Todd	-		Object	Whitworth is a small community with only one main road to access it. I feel that if all these purposed houses are built the traffic congestion for commuting will be very difficult for the local residents. Other than the bus service residents have no alternative to drive to and from work. - - My children go to local Tonnacliffe school and the traffic and parking is extremely heavy and if more houses are built in that area the roads would not be able to cope. - - Flooding is a massive problem at present in Whitworth, united utilities are constantly out trying to fix problems, having more houses I believe would make the flooding worse. - - Whitworth is also known for its beauty, walks and wildlife and to purpose building on the greenbelt areas of Whitworth would cause a detrimental effect on this. - - Whitworth does not have access to a local A&E dept, Rochdale hospital only has a urgent care centre as does Burnley. Residents of Whitworth closes A&E is either Oldham or Blackburn. Having more residents in Whitworth with limited healthcare facility's could increase morbidity rate. Along side no local A&E we only have one GP practice in the area, having more residence would cause strain on their service, this also includes only one dental practice. - - Will there be enough places in the schools for all the new children to the area? The local high school is only small and as I believe was over subscribed this school year. - -		-
590		Ashworth			Object	Absolutely ridiculous One way in and out of whitworth no extra schools or doctors when you have two or three cars per household. This is ruining our villages. We strongly object to this. Listen to the people who vote you in, as we have long memories		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.103	Further comment
743			Whitworth Town Council		Object	At a meeting of Whitworth Town Council last night (Thursday 28 September 2017), it was resolved that I should contact you with the comments of the Town Council to feed into the current Local Plan consultation: HS2.102 Barlow Bottoms, HS2.102 Land North of King Street and HS2.103 Land Behind Buxton Street Council have concerns that this area is on a flood plain and part of this site is already allocated to a specialist care unit. This is currently the largest undeveloped site locally and if more homes are to be built in Whitworth in the future then the deficiency in social facilities would need to be addressed and this site would be the most appropriate for a school or health centre.		
886	Michael	Banham	-	HS2.102 to HS2.109	Object	The infrastructure of whitworth is over stretched as it is,the school's cannot cater for such an undertaking. Theres only one road in or out of whitworth any problems on this road causes absolute mayhem. The winter months are an absolute nightmare just to get onto market street.		I cannot understand why anyone would want to over populate an area that is already struggling.
918	Marion	Ashworth	-	HS2.107 , ALL.	Object	I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.		I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.

1109	Jane	Gadsby	-		Object	<p>I wholly object to more housing being built in Whitworth!! We are a small(ish) village that can not cope already with the amount of new houses and people moving into it!! Our schools are already over subscribed; they are turning people away that don't live overly far away that a few years ago would have had no problem getting a place. The Doctors surgery can't cope with the number of patients wanting appointments. You are also increasing the risks of flooding. My house is already at risk and has already flooded twice. The main road (one road in and out) is gridlocked most mornings with commuters trying to get out of the village but most of all you are taking our beautiful green areas that Whitworth is so lucky and honoured to have. We have lots of empty properties that can't be filled already!! Please leave us and our village alone!!</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.103	Further comment
1134	Abigail	Leyland	-		Object	WE DO NOT NEED ANYMORE HOUSING IN WHITWORTH! The schools are already oversubscribed, our local doctors can not possibly take on any more patients as it is already a struggle to get an appointment currently. We only have one road in and out of the village which gets badly effected by rush hour traffic, making it difficult for the locals to get to work/school etc. We have such a lovely view of greenery surrounding our little village and we do not want our sight ruined by building ugly, unnecessary housing.		
1152	angela	Jordan	-		Object	I do not think whitworth has enough resources to sustain further housing estates .The one and only road is already impossible at peak times,our doctors surgery is bursting with no appointments,and our school children cant get a place at our local school. - The wildlife is also important to whitwoth people but is being pushed further and further out of its natural habitat.		No
1310	Richard	Dolan	-	HS2.101-109	Object	We are vehemently opposed to all housing allocation in Whitworth. Our group has decided to vote against and actively campaign against all Counillors and MPs in favour of this proposal. We will withhold our votes and encourage family, friends, and community to do likewise. - We are outaged by this proposal, especially HS2.107 that will encroach on Healy Dell. On this point we will be contacting the National Trust and other such organisations to make them away of the proposed desecration to the Green Belt. Furthermore, we are now investigating possible financial links between all Councillors, MPs, and RBC employees involved in this issue with the proposed contractors. This senseless proposal for a village far too small to accommodate a possible 300 new homes suggest an ulterior motive. No one in our community that we have spoken to is in favour of this plan and we will use our sizeable influence. - There has been more than enough housing development in Whitworth. This new proposal will destroy our green spaces and necessitate a new schools, doctors' surgery, dentist, shops, and possible a new road. All future housing development must stop. Our community can not accommodate any more. - In light of the fact that this proposal has not been advertised to a great extent (we have spoken to people who know nothing of it), we will be conducting a petition again this proposal and encouraging everyone to sigh the following statement: - We will vote against and actively campaign against all Counillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community.		To reiterate, we will vote against and actively campaign against all Counillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community. - - The people's power will be felt if this plan in authorised.
1363	Gareth	Dolan	-	HS2.101 to 109	Object	I do not live in Whitworth but spend a lot of time there with my family. I am deeply concerned by this proposed loss of green belt and will do my utmost to object against it. - - I strongly urge RBC to re-consider its proposal. Whitworth cannot handle any more development. - - Thanks		If this destruction of the green belt in Whitworth is passed then I shall simply take my family and my money elsewhere as there will no longer be the same attraction Whitworth now offers.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.103	Further comment
1417	Gillian	Middlemas	Whitworth Community High School	HS1.102 HS2.103 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	As Headteacher of the only secondary school in the Whitworth area, I am concerned that the proposals to build considerable numbers of new dwellings take no account of educational provision in the local area. - The school is already oversubscribed: for 2017 entry into Y7 over 40 families were unsuccessful in gaining a place, despite Whitworth Community High School being their first preference; over 40 families went onto on the Local Authority's waiting list for a place; over 25 families went to Appeal for a place, and very few of them were successful. The school now has 640 students and, without extra classroom space, has no capacity to increase the admissions number, nor to take additional students into existing year groups. - Likewise, many local primary schools are also full / oversubscribed, suggesting there is insufficient educational provision in the local area already. - This situation will be exacerbated if the proposed number of new dwellings goes ahead, unless the developers or Lancashire County Council are prepared to increase the school's capacity by funding additional classroom / learning / social space. The school is over 50 years old, largely of Langspan pre-tensioned concrete construction (intended life expectancy already exceeded) with HAC (high alumina cement) - In addition, the school experiences ongoing issues with the provision of utilities: the water main up the school drive is at risk of collapse; the water supply to the area has recently been affected on a number of occasions, and presumably further demand from new building would increase these issues. - The proposals for new housing does not appear to be linked to any plans to improve the traffic situation in the Whitworth area: lengthy queues heading towards Rochdale each morning already create issues for students travelling to school.		Whilst it is excellent news that there is demand for additional housing in the Whitworth area, I am particularly concerned about the infrastructure which is essential to support this kind of development. Education, and raising aspirations, is essential to improving the future for our young people and I have concerns regarding school capacity; increased traffic; increased demand on local services generally; impact on provision of utilities; and whether or not this has all been factored into the planning process. The infrastructure needs to be in place before the planning is agreed. I also have concerns about the impact of further building on wildlife, the village ethos, and greenbelt areas.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.103	Further comment
1469	George	Salt	-		Object	Whitworth is located in a valley, this in itself presents issues with the amount of space available. 7,500 people lived in Whitworth according to the data from the 2011 Census and this is a large amount of people if you look at the services and infrastructure in Whitworth. To start off with there is one GP surgery that has 7,248 people registered with them. Whitworth Medical Centre has 4 GPs which means that for one GP there are 1,812 people. There is not any more capacity available for more people to register with the practice. - - Schools are also busy especially with just one school for secondary education. With more people living in Whitworth that would mean a greater demand on schools and could result in some children living in Whitworth not going to school there. - - Going back to Whitworth being a valley this physical feature means that infrastructure being put in can be difficult. Whitworth has one road in and out and during peak hours this is a very busy road. Most new people would probably be using a car as their main mode of transport adding more pressure to Market Street and its tributary roads. Public transport is also very poor in Whitworth meaning that it is not really a viable alternative for any new people who would come to Whitworth. - - As shown with a few of these arguments Whitworth does not have the capacity to accommodate an extra 359 houses over the next 15 years. For example an average of 3 people per house would result in 1,077 more people living in Whitworth. It is not going to work.		-
1502	Danielle	Makin	-	HS2.102, HS2.103, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. - - A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. - - Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done. - - Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. - - The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. - - The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village.		-

Reference HS2.104 Land south of Quarry Street, Shawforth

5	Kimberley	Ashworth	-		Object	I am writing to object against the proposed local plan for Whitworth. - - I am unable to attend the meeting tomorrow night due to illness but I have looked at the proposal as stated below: - - http://www.rossendale.gov.uk/download/downloads/id/3700/whitworth_map_with_street_names - - I'm disappointed to see that a number of green spaces are being considered to build houses on. The green spaces behind Tonacliffe School are used by many for walking. To build on this space would be detrimental to the green space due to wildlife and other conversation in that area. - Building houses would also see an increase in traffic which is at demand during peak times at the moment. - - Other green spaces on the plans are also being considered. In a village that is at full capacity I am unsure why Rossendale Council see the need to build in places that already has adequate housing. - - There are no plans to look at new recreational and family facilities which the town needs. The closure of the children's centre means that new parents and young families have nowhere to go. The plans don't take any such new facility into consideration and I urge Rossendale Council to look at this. - - I know I speak on behalf of many in the Town when I say the option for Whitworth is option 1 'Do nothing' - - Kind regards -	I am extremely disappointed that a meeting has been arranged in Whitworth for tomorrow evening when all the other consultation meetings are taking place in September

19	Simon	Johnson	-		Object	This can not cope with the amount of cars in this area as it is - the entrance off - the main road is narrow and will not cope with building trucks going up and down -		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
27	Michael	Chianca	-		Object	<p>HS2.102 - King Street - HS2.104 - Old Lane - HS2.108 - Sandbank Gardens - HS2.105 - Albert Street - HS2.107 Fern Isle Close - HS2.106 Moorland Cres - HS2.109 Horsefield Av - - All these proposed sited are unsuitable for the following reasons. 1. Wildlife - This greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest area at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. 2. Loss of Trees - The forest itself would have to be cut down a totally unnecessary action when we have other areas within Whitworth to build on that would not require the destruction of trees. 3. The local school at both dropping of and collection time around this area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. 4. A Culvert runs through the middle of the proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. 6. Local amenities such as Schools, Dentists, Doctors are already full and building more housing would have a negative affect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. 9. Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would endanger the lives of the residents living there especially the children. 10. Government policy is to protect greenbelt areas except for "Exceptional circumstances" can you explain what those exceptional circumstances are when we have other areas more suitable for building houses on. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental affect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - My house and others would be overlooked. 14. As the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including school children. 16. This area and the surrounding area has already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost.</p>

56	Valerie	McDonald	-		Object	Whilst I recognise the need for further housing within the area, I am concerned about the siting of so many proposed dwellings in this particular valley. The roads are already clogged at rush hour and as there is only one road through, movement of traffic, should there be an accident or roadworks, becomes frustratingly unpredictable. What provision is there to maintain and develop the road system in the valley? - - Whitworth High School has become more popular over the past couple of years with waiting lists existing. What provision will be made to expand the school, and will this be done with a long term objective in mind and not just a sticking plaster effort to put up some portable classrooms? - - Local services such as the Children's Centre have just been lost. What plans may be afoot to reinstate such necessary provision? I feel it is morally wrong to simply build new houses and forget about the infrastructure to support this development. - - There is a wealth of wildlife on the moors where you are proposing to site many homes. Presumably there will be checks in place to ensure some of these species are not endangered? - - Finally, there are already plenty of properties on the market at very affordable prices (in comparison with some surrounding areas). Some of these have been on the market a while? Why, if there is already affordable housing, is there a need to build more? -		-
58	COLIN	SHEPHERD	WHITWORTH -OLD LANE ACTION AND GREEN GROUP		Object	When there is heavy rainfall the rainwater drains and culverts cannot cope and this gets into the sewers and causes problems of raw sewage at 6 and 7 garth edge shawforth. and across the road in the old Red Lion pub - - God knows where the sewage from any other new properties will end up in the insufficient services in our area causing more flooding and sewage leakage on garth edge etc, - - For info please contact United utilities who have a long history of call outs to these premises on old lane		STRONGLY OBJECT
98	Jacqueline	Butterworth	-		Object	I am objecting to proposed development of all the above houses around the Whitworth area. The area is overrun with traffic as it us. One way in and one way out. The schools are overloaded as are the GP surgery. It is inconceivable to build more houses and allowing more traffic to use our roads which are in a terrible state. We are already experiencing burst water pipes and our water pressure has already been reduced. We are experiencing more power cuts since all the new houses have been built on Cowm Park Way . Surely there must be someone in the planning department with some common sense and will prevent any further building of houses in Whitworth		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
131	Christine	Greenwood	-		Object	I am objecting to plans to allow the building of over £350 properties on various sites around Whithworth and Shawforth over the next 15 years. - Not only am I concerned about the building on our greenbelt sites which is part of the attraction of the area. I can understand the wind farm and can support renewable energy sources but not the creation of a collection of housing estates - whether social/affordable or not . The awful collection in Britannia speaks for itself! We have already had several builds across Rossendale but the extra Council Tax revenue does not seem to have brought many benefits to the borough. - As it stands at present the infrastructure can just about support the current residents - schools are already over subscribed and getting an appointment at our one GP surgery is already a mammoth undertaking. Planning to build or reopen a school by any chance? - Traffic is already an issue with one road in and out and a bus service that has to be one of the most unreliable in the surrounding areas ! There are next to no facilities for young people/children and a library fighting to survive so I think that this needs to be given serious consideration before you go ahead.		-
155	Jo	Furtado			Object	HS2.104-Green Belt, and a real Greta Garbo site. The exact location is unclear on the map, because it is difficult to make out the path and boundary markings. Oppose		
188	Paul	Prophet	-		Object	This area is already a flood risk with inadequate drainage.. - Additional housing would cause increased flooding and cause sewerage to affect properties at the base of Garth Edge.. - This area cannot cope with additional houses with the current infrastructure..		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
195	Janet	King	-	HS.102, HS2.104-9 inclusive	Object	Whitworth' infrastructure cannot support almost 400 new properties - it is already nigh impossible to obtain a doctors appointment and my father has had to wait iver 6 months to obtain a podiatry appointment as there is only one who has been on long term sick and no replacement cover available. The fact that there is only one main arterial road into and out of Whitworth, which already has weekly road works delaying the already totally congested road does not bear thinking about. With an extra 400 properties and the increase in traffic that these will bring and as there is no large employer in the area most of these occupants will be commuting one way or another. We lost access to an A&E in Rochdale and now the nearest is either Fairfield or Oldham with the additional traffic these proposals would create the congested roads Could be catastrophic in an emergency. - - On a personal note, my family moved to Whitworth 12 years ago, from Oldham, due to its naturally beautiful countryside and I see the addition of these properties into areas of greenery (extending Wallbank estate etc.,) is the very short end of the stick. I can see that if these are accepted, encroaching on to green belt areas, slowly but surely the green belt areas will get smaller and smaller until eventually Whitworth just becomes another concrete plot with ever creaking infrastructure. - - Finally, I understand the need for affordable housing but there are plenty of mills/brown field that could be developed. However, I feel strongly that before any proposals are accepted it is of the utmost importance that the infrastructure is in place to support them, that includes roads, schools and NHS access.		-
222	Lynne	Corey	-		Object	- - Access to the site is bad roads already in poor state . The facilities in the area are already to capacity. This would spoil an area which has been improved over the years by the coal board.		- - - - There is no shortage of houses in the valley.
261	David	Eyes	-		Object	This is an unbelievable plan that will stretch amenities in the area even further. - - The new estate near Cowm has already increased traffic congestion on the one road in and out of the village and schools are already struggling to cope. - - There is also the issue of wildlife and the impact it will have on their environment. - - I for one will be leaving if this idiotic plan goes through. -		This smells of greed over common sense

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
268	Michaela	Radford	-		Object	Whitworth has had numerous instances recently regarding the roadworks for the infrastructure repair and maintenance. As an employee of all 4 major utility asset owners in the area, I am very concerned regarding the houses proposed. We only have one road throughout the valley and this is impacted severly when roadworks are planned. My concerns are that these are not managed correctly by LCC at present, therefore; more houses and more infrastructure would have a massive impact on the people living in the village. People face unemployment now due to the frequent issues we face getting into work. - Not to mention over crowded schools and doctors as we stand at present. - - I request, here in writing, to be informed of any planned meetings regarding the houses in whitworth and notification be sent in writing to my address above.		
297	Lindsay	Fairhurst			Object	<p>Poor access along the length of Main Rd (Market Street) one narrow road lined with parked cars , as only access into & out of whitworth. No alternative route.</p> <p>No trains or trams. Buses won't must travel on same one access road both in and out as cars.</p> <p>No motorway access under 20 min journey both ways</p> <p>insufficient work in area means people must travel to Manchester, leeds, bury, Rochdale etc.</p> <p>Current public transport unrealistic.</p> <p>Traffic at peak times currently gridlocked & congested.</p> <p>Increased housing will add to this burden.</p> <p>Utilities infrastructure unable to cope currently leading to repeated remedial roadworks.</p> <p>Schools full</p> <p>Doctors full</p> <p>Rossendale Council Lancashire Council needs to address transport & roadways access + education access beofer building homkes where people will be unable to travel to employment and school</p>		
298	Andrew	Fairhurst			Object	the number of houses proposed in this local plan for infrastructure can support. Whitworth has only one road in abd out and already this is constantly being dug up by utility companies often resulting in temporary traffic lights that cause massives queues of traffic in rush hours. Not only is the road narrow and conjested but there is no alternative train service - only the bus (on the same road) This is totall useless for the number of people wo commute to Manchester, Oldham and Bury every working day. Our schools, doctors and dentists are already close to capacity. There are very few options to travel to other facilities apart from along the one road through the valley.		Without robust and achievable plans to increase the support infrastructure for travel (a train for example) and health and education and culture this building should not go ahead. For people to afford these houses they need jobs first. Currently you need to move out of the valley to commute to work. Regeneration of the area and existing housing stock should come first.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
590		Ashworth			Object	Absolutely ridiculous One way in and out of whitworth no extra schools or doctors when you have two or three cars per household. This is ruining our villages. We strongly object to this. Listen to the people who vote you in, as we have long memories		
754	debra	lee	-		Object	loss of developed wildlife habitat, trees, - added pressure to current infrastructure schools,roads, dentists - - landscaping has a land survey been done?? already floods and issues with sewerwage and drains further building would exacerbate these known issues		-
755	ROCKIE	LEE	-	OLD LANE	Object	A GREN BELT SITE WITH ALREADY INVESTED MONEY BY THE COUNCIL TO PROVIDE WILDLIFE HABITAT AND TREES IF BUILT UPON WOULD ALL GO TO WASTE. - - HOUSES ON THIS SITE WOULD ADD TO THE ALREADY PROBLEMATIC SEWARGE AND WATER DRAIN ISSUES OF THE AREA THAT IS ALREADY PRONE TO FLOODING AND ISSUES, THE SITE IS ON A HILLSIDE THAT POTENTIALLY COULD BE PRONE TO LANDSLIDING DOWN - HAS A FULL LAND SURVEY BEEN DONE INTO THE PRACTICALITIES OF THIS?? - - WOULD JUST ADD TO THE ALREADY STRETCH AMMENITIES SCHOOL DENTISTS ROAD WAYS		-
773	Susan	Worrall	-		Object	Whitworth is a village, a small community. Building these housing developments will change Whitworth into a town. - There is not the infrastructure to support this additional housing. There is one road in and out of Whitworth which is already struggling to cope with the increasing volume of traffic.Especially at peak times. If there are any traffic disruptions it can take 1-2 hours to get to Rochdale . We do not need more cars and the pollution they bring! - - There are limited school places both secondary and primary and local children born in the village will struggle to get places. - The one and only GP practice can not manage to provide the necessary health care for patients with no appointments pre bookable for weeks in advance. This healthcare will be diluted further. Living in Whitworth if A&E treatment is required which is often a life or death situation your chances of survival are reduced add more traffic on market street and your chance of survival diminishes further - - The people who live in Whitworth , live here because it is a village , it is quiet and the countryside is on the door step. Yet the plans want to destroy the village life, increase demands on existing services and increase pollution - - To consider building on greenbelt land in Whitworth is unbelievable and irresponsible, Planning has already - spoil the view of the countryside at the side of Daneswood ave and the wind farms are also affecting the views and countryside. - - Whitworth has lots of wildlife from deer, owls, herons, wild ponies as well as lots of insect life butterflies, bees etc which will all be at risk if the countryside is used for housing. - - There is empty housing all over the borough - fill these , not build more especially in our little village -		Stop putting profits first and put existing residents first

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
803	Marietta	Galbraith	-		Object	My objections for the proposed building of housing on the above sites is based on a number of reasons: - 1. Infrastructure. The current housing situation is already at (possibly beyond) capacity with regards to schools, doctor's surgeries, dentists, employment and traffic. There are no more schools planned and no way to expand the ones already here. Some children have to travel miles to schools out of the area due to oversubscribed local schools. This is the same for doctor's surgeries and many other amenities. - 2. Traffic. There is one main road in and out of Whitworth that already has issues with raised levels of traffic. In the four years we have lived here, there have been many occasions where traffic has been an issue due to constant roadworks (for various reasons relating to increased housing and traffic) which has caused major problems. Also, most people are employed outside of Whitworth so traffic is high anyway. More housing would increase this issue with no solution being given as to how it could be rectified. - 3. Utilities. More and more power cuts have been happening recently in Whitworth due to new housing as well as burst water pipes and problems with drainage. This has contributed to the traffic issues with roads having to be dug up every few weeks to 'fix' the problem. - 4. More housing would mean taking up land that is natural drainage for flooding. Recently, my area was put into the 'flood risk' category (although we haven't flooded), significantly increasing my home insurance. If more homes are built, this would increase risk of flooding to many homes around Whitworth, which would cause loss of market value and would reduce the chances of being able to sell the property. - 5. Much of the 'green land' would be lost which is detrimental to the wildlife around Whitworth. The Government have a duty to protect greenbelt land and our environment! The carbon footprint would be horrific! - In conclusion, building over 300 houses in Whitworth would cause issues beyond repair! Environment, traffic, pollution, infrastructure, drainage etc. would all be dramatically affected in the most negative and damaging way. Whitworth was not meant for so much housing and so many people.		-
886	Michael	Banham	-	HS2.102 to HS2.109	Object	The infrastructure of whitworth is over stretched as it is,the school's cannot cater for such an undertaking. Theres only one road in or out of whitworth any problems on this road causes absolute mayhem. The winter months are an absolute nightmare just to get onto market street.		I cannot understand why anyone would want to over populate an area that is already struggling.
889	Derek	Lord	-	HS 102, HS105, HS104, HS106, HS107, HS108, HS109.	Object	We in Whitworth are sure that there are enough houses here at the present time.There are large estates at Cowm Park, Tonacliffe, Wain Gap, Wallbank, Knot Hill, Orama Mill Site, Edgemoor Close, and a small estate at Facit. The exits onto the one main road are at present full of traffic. The Doctors, Schools etc are now at bursting point. We in Whitworth have done our share in housing. Please think again before building any more. Thank You. -		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
892	Mandy	Sanderson	-	HS2.102, HS2.105,HS2.104, HS2.106, HS2.107, HS2.108, HS2.109	Object	The transport system around Whitworth cannot cope with the volume of traffic . Also local amenities are already at braking point..		No
902	sean	campbell	-		Object	There is no sufficient access and egress to the proposed site. During rush hour it is often difficult to exit coppice drive and during adverse weather such as snow, gritting is not sufficient, you therefore have to leave your car along market street. The two local schools, Tonnacliffe and Whitworth High are currently oversubscribed, Whitworth High last year for example was oversubscribed by 140 applicants for 600 places. - The current amenities, GP surgery, dentist, post office, pharmacist would be unable to support an increase in personnel, the impact on roads, local infrastructure and amenities will be disastrous to the village and is totally unacceptable,		no
913	Michelle	Ashcroft	-	HS2.102, HS2.105, HS2.104, HS2.106, HS2.107, HS2.108 & HS2.109	Object	Whitworth is a geographical challenge at the best of times, positioned in a valley, consisting of ONE main road with multiple roads stemming from this leading to many properties that are built on the hillside. There are many green areas which are used by local farmers for their livestock. During times of heavy rain many of the roads are flooded, and during winter many roads are very dangerous in the snow. It is not uncommon for Whitworth to be gridlocked as there are far too many cars on the roads, all it needs is one set of road works and the town becomes inaccessible. The local schools are now over subscribed, the High school has had to turn away many children who only live a couple of miles away. The primary schools are also subscribed making it very difficult for teachers to provide a good education to the children. The local doctors are unable to cope with the number of patients, trying to get a same day appointment is nigh on impossible these days. We have issues with anti social behaviour due to lack of amenities available for teenagers, the local youth club has been closed down. There is a lack of police presence (the PSCO tries her best), people don't feel as safe as they should. The library is still under threat of closure, the pool is only open because of the people of Whitworth who run it. Building more houses brings more people, more cars, more strain on the infrastructure. I appreciate housing is needed but the number of houses that has been suggested will bring this town to it's knees.		I would suggest you come to Whitworth during the morning school run and see how difficult it is around Horsefield Avenue. Come sit in the traffic jams during rush hour. - - The government has spoken about creating new towns, this is a great idea, there are places that can accommodate thousands and thousands of houses. Build there not here!!!
916	Jane	Trudgeon	-	HS2.102 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	We are already an overstretched village infrastructure, the roads would not cope with an extra amount of traffic and would make the already difficult commute to exit/enter the village impossible. There are not enough schools nor would the doctor's surgery be able to cope as even now it is almost impossible to get a reasonable appointment time, - - The housing developments would impact on wildlife		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
918	Marion	Ashworth	-	HS2.107 , ALL.	Object	I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.		I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.
935	Christine	Fallon		HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	1 Whitworth has one main road which is often gridlocked the smaller access roads are grossly un suitable e.g Tonacliffe. - 2 Schools are already oversubscribed parking at drop off times would be more chaotic and dangerous. - 3 Doctors and dentists are already at capacity. - 4 Services of gas electricity and water would require major upgrade. - 5 We are seeing flooding due to inadequate drainage this would be increased. - 6 Is this acceptable use of greenbelt land where previous planning permission has been refused the effect on wildlife and trees would be immense.		-
939	Geoffrey	Fallon	-	HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	Whitworth is a small village with one already inadequate road. Doctors dentists and schools are already oversubscribed parking in school areas is dangerous already and would be far worse. - Gas electricity and water services would need major upgrade. - This is inappropriate use of greenbelt land causing damage to wildlife and the environment drainage is a major problem now with frequent flooding.		-
955	Janet	Whitehead	-	HS2.102, HS2.104,HS2.10 5, HS2.106,HS2.10 7, HS2.108,HS2.10 9	Object	Whitworth is already a very busy village, oversubscribed schools and Doctors - We have one road in and one road out which is almost impossible during peak times in the morning - The houses already exceed the heights up the sides of the valley - Our green belt is very important to wildlife and the the people the live here - If we let one builder onto greenbelt it opens the doors to far too many others - Our population is big enough and we cannot accommodate many more		- Our Councillors are voted in by us and now need to stand up and fight for us - - 400 houses is a ridiculous amount of new houses for a tiny village - - We have had 2 different sites where new houses have been built in recent years we've done our bit for Government figures - - Please find somewhere else
962	Kathryn	Gill	-	HS2.102, HS2.105, HS2104, HS2106, HS2107, HS2108, HS2109	Object	I object to any changes in use of local greenbelt land to build houses. Also, there is only one road through Whitworth and it is already congested. We have only 1 doctors surgery, and not enough school places to accommodate hundreds of additional families. Greenbelt land cannot be restored once built on, and these proposals would change the landscape of Whitworth. I am also concerned about the building of 20 properties around Cowm. This is a resource continually used for recreation by the people of Whitworth and should be preserved.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
979	Marie	Pye	-		Object	All of these developments will contribute to already existing traffic problems as there is one road in and one road out of the area. The high school is already oversubscribed with local children not being offered places.		-
992	Susan	Farrell		HS2: 102, 104, 105, 106, 107, 108, 109	Object	I strongly object to the building of houses on all the above mentioned sites for the following reasons: - Greenbelt land is of importance to all the wildlife of Whitworth and Shawforth . Deer and bats live in the forests in the area. Many badgers and foxes inhabit the countryside and rare species of wildlife live in the ponds. - The forest area at Tonacliffe would be cut down having a negative impact on the environment. - Tonacliffe road is already dangerous for children with cars parked along the length of the road at school dropping off and picking up time. The increased number of cars if more houses were built in the area would be worse for the children and residents. - Local amenities such as dentists and GPs could not cope with the increased population. It is almost impossible at the moment to get a GP appointment in less than two weeks. More housing would have a detrimental effect on the residents of Whitworth and Shawforth. - Facilities such as water, gas and electricity are already stretched and a major upgrade of the infrastructure would be required to support increased housing. - Local drainage cannot cope with the current usage. More housing could have an impact on flooding. - Public footpaths could be lost reducing the number of rights of way for walkers. - The road network both ways from Rochdale to Bacup is already gridlocked. More housing would put an increased strain on traffic and the already poor public transport in the area. - The only high school in the area is already oversubscribed. With increased housing parents may have even less chance of a first choice school for their children. They may have to travel miles to school. - I understood it is government policy to protect Greenbelt land except for 'Exceptional Circumstances'. What are the exceptional circumstances that enable housing to be built on the greenbelt land in Whitworth and Shawforth?		Summary - - Whitworth and Shawforth are already busy villages with oversubscribed schools and GP services with one road in and out between Rochdale and Bacup. - - Can we accommodate more housing that will put pressure on already overstretched amenities, increase traffic and change the beautiful landscape forever?
1000	carol	Thomson	-		Object	I object to the amount of houses that will be built affecting the countryside. Are there any more schools being built to accommodate?		-

There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. 6. Access to most of these sites will increase traffic hazards on an already inadequate highway. 7. I challenge the need for more housing in Whitworth. - 7.1. Where is the evidence of any demand? - 7.2 There are countless houses left empty and neglected in Whitworth, why are these not modernised and made available? - 7.3 Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? 8. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. 9. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.</p>		-
1109	Jane	Gadsby	-		Object	<p>I wholly object to more housing being built in Whitworth!! We are a small(ish) village that can not cope already with the amount of new houses and people moving into it!! Our schools are already over subscribed; they are turning people away that don't live overly far away that a few years ago would have had no problem getting a place. The Doctors surgery can't cope with the number of patients wanting appointments. You are also increasing the risks of flooding. My house is already at risk and has already flooded twice. The main road (one road in and out) is gridlocked most mornings with commuters trying to get out of the village but most of all you are taking our beautiful green areas that Whitworth is so lucky and honoured to have. We have lots of empty properties that can't be filled already!! Please leave us and our village alone!!</p>

1118	Gary	Calderbank	-		Object	<p>There are a great number of reasons why Whitworth township should not be blighted with further development, particularly on land which has been designated as green belt for a large number of years. I wish to summarise these as below.</p> <ul style="list-style-type: none"> - - Traffic - Whitworth is served by one road from both the north and south and is a major arterial route to people accessing the m62 and surrounding towns from the valley, Burnley and beyond. It is therefore very busy all of the time without even considering the effect of increasing local traffic even further. This route is regularly disrupted as a result of failing infrastructure resulting in severe delays and tailbacks. - - Schools - The existing schools in the town are already over subscribed and there is no capacity for further children without again significant development of schools. The road where I live is already gridlocked by vehicles dropping off children twice a day, illegally parked and causing obstructions. In relation to developments at Tonacliffe and Horsefield the thought of construction traffic too would be completely unmanageable and dangerous. Further development would exacerbate the problem. - - Policing - Whitworth already suffers from insufficient community policing resulting in many issues which do not get resolved, from burglary to bad behaviour and fly tipping. The town can not afford a further increase of population on this scale bringing with it its percentage of problems. - - Planning Policy - Brown Field Sites - Whitworth and the valley in general is a town built on industrial heritage and just like other cities should be primarily developing brownfield developments not green belt. There are many derelict spaces which can be developed to improve the area whilst providing suitable additional housing. There is no real justification for building on moorland in lieu of this. - - Construction Difficulties - Much of Whitworth moorland is unsuitable to build on, primarily due to poor access to the developments earmarked, mine shafts, poorly drained ground, sloping sites, poor infrastructure, marshland and biodiversity issues. - - Biodiversity - The land surrounding Whitworth is a haven for many wild animals which can be seen on a daily basis. From our house we can regularly observe, a family of foxes, badgers, deer, birds of prey, pipistrelle bats, cows, horses and sheep. This is a gift without price. - - Infrastructure - We regularly have power cuts, water bursts and the A671 is constantly being dug up as existing services are updated resulting in major delays. The drains in our road are currently running 24/7 as a result of water run off off the moors even when it has not rained for a number of days. When it does rain the water backs up out of the covers as the drains are undersize and cannot cope. This would be totally unsuitable for further development, especially considering a greater amount of hard surfacing. 	-

1134	Abigail	Leyland	-		Object	WE DO NOT NEED ANYMORE HOUSING IN WHITWORTH! The schools are already oversubscribed, our local doctors can not possibly take on any more patients as it is already a struggle to get an appointment currently. We only have one road in and out of the village which gets badly effected by rush hour traffic, making it difficult for the locals to get to work/school etc. We have such a lovely view of greenery surrounding our little village and we do not want our sight ruined by building ugly, unnecessary housing.		
1152	angela	Jordan	-		Object	I do not think whitworth has enough resources to sustain further housing estates .The one and only road is already impossible at peak times,our doctors surgery is bursting with no appointments,and our school children cant get a place at our local school. - The wildlife is also important to whitwoth people but is being pushed further and further out of its natural habitat.		
1166	Brendan	Doherty	-	HS2, 102,104,108,105 ,107,106,109.	Object	WHITWORTH IS FULL. This statement encapsulates all the issues surrounding any expansion of dwelling houses in the township of Whitworth. - - The negative impact of any developments in the town cannot be overstated. - - The whole nature of this small township will be irreversibly destroyed if development are allowed. - - Flora and fauna will be the first to suffer. This valley is home to an exceptional and expanding variety of animals and trees and flowers. This growth has taken decades to achieve and would by totally reversed by the stroke of a pen. - - To say that all the ingredients which go to make up Whitworth as a place for people to live are overloaded is indeed an understatement. - - Congestion of traffic and people is at its limit, any increase can only be detrimental to the health and quality of life of residents. - - Local services, schools, doctors, civic amenities are already at their serviceable optimum. - - The existing utilities of electricity,gas and water only just maintain service. There are often cuts in these making it seem that we are a third world town. - - Whitworth is a linear town with no bypass or possibility of such. Most of the day traffic is heavy and at peak times chaotic. This combined with the nature of HGV traffic leaves the roads in constant need of repair. Add a very poor public transport system and the certain increases proposed then the result is guaranteed to be disastrous.		Listen to the people of Whitworth.
1190	Nathan	Worrall	-	HS2.107 , HS2.108, HS2.109, HS2.102, HS2.105, HS2.104,HS2.10 6	Object	Whitworth doesn't have the infrastructure to sustain the construction of these new houses. The local doctors and schools would struggle to meet the needs of the increased population. There is bad traffic in Whitworth already, this will only make it worse and these traffic problems are highlighted when there are roadworks and there are large queues. The proposed sites are located on greenbelt land, and this will have a negative effect on the local wildlife as well as destroying the natural beauty of this land.

1272	Michala	Geldard	-	HS2.102, HS2.105, HS2.104, HS2.106, HS102.107, HS2.108, HS2.109	Object	I am objecting in general to the proposed house building in various sites around Whitworth and specifically in relation to the proposed sites t Tonacliffe. My objections are based on a number of reasons: 1. Wildlife in the local area. Deer, badgers, foxes and hares live within the forest areas. Rare protected newts live in the pond. Bats nest in the forest. The importance in f this green belt land for the wildlife cannot be over emphasised. - 2. Tonacliffe forest would need to be cut down adversely affecting the local environment. - 3. The impact of more cars around local schools, especially Tonacliffe School, is of great concern due to the already high volume of traffic. Increasing this would be unacceptable. - 4. Local amenities such as schools, doctors, dentists are already to capacity. I have concerns that more houses will have a negative impact on the lives of current residents in relation to these amenities. - 5. Has the infrastructure of our small village been considered in relation to electricity, gas and water supply if more houses are built? Whitworth already experiences power cuts and seems to be worse since other recent building developments have been completed. - 6. The road network into Rochdale is already gridlocked. More houses will increase this problem. Public transport from Whitworth is limited to buses and I consider that if this proposed building goes ahead there will also be a negative impact on the poor public transport in and out of our village. - 7. Local drainage already struggles to cope with usage now, if the volume of residents increases would the drainage system be able to deal with the added strain? - 8. We bought our property because it is located on the last cul de sac of a small estate with no through traffic. This proposed building work will completely alter this into drive through roads. Plus the volume of traffic will - Increase which I consider to be unacceptable. - 9. I am very concerned that we may have loss of privacy as we are not currently overlooked and this was a major consideration when we bought our house.	-	
1283	Jonathan	Geldard	-	HS2.102, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	Whitworths infrastructure is already at near full capacity. The single main road through Whitworth is, at times, grid-locked. Streets around the primary schools is chaotic. There is a definite flood issue through the valley. Chime is rising unchallenged. The rich and diverse wildlife is flourishing around Whitworth. - Any of the development projects would have a negative and detrimental implication on Whitworth and it's residents.	-

1298	Carol	Williams	-		Object	Same as HS2.109 without the cars and traffic relating to the local school		I believe the council is going against the Government policies on planning and green belt conservation - - A high level of protection should be given to most valued landscapes, wildlife habitats and natural resources. - - I object to the policy itself and the proposed housing developments on individual sites mentioned namely HS2.109 Horsefield Avenue, HS2.106 Moorland Crescent, HS2.102 king Street and HS2.104 Quarry Street
1310	Richard	Dolan	-	HS2.101-109	Object	We are vehemently opposed to all housing allocation in Whitworth. Our group has decided to vote against and actively campaign against all Councillors and MPs in favour of this proposal. We will withhold our votes and encourage family, friends, and community to do likewise. - We are outraged by this proposal, especially HS2.107 that will encroach on Healy Dell. On this point we will be contacting the National Trust and other such organisations to make them away of the proposed desecration to the Green Belt. Furthermore, we are now investigating possible financial links between all Councillors, MPs, and RBC employees involved in this issue with the proposed contractors. This senseless proposal for a village far too small to accommodate a possible 300 new homes suggest an ulterior motive. No one in our community that we have spoken to is in favour of this plan and we will use our sizeable influence. - There has been more than enough housing development in Whitworth. This new proposal will destroy our green spaces and necessitate a new schools, doctors' surgery, dentist, shops, and possible a new road. All future housing development must stop. Our community can not accommodate any more. - In light of the fact that this proposal has not been advertised to a great extent (we have spoken to people who know nothing of it), we will be conducting a petition again this proposal and encouraging everyone to sigh the following statement: - We will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community.		To reiterate, we will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community. - - The people's power will be felt if this plan in authorised.

1336	Maureen	O'Mara	-	HS2.102,105,104,106,107,108,109	Object	Whitworth is already struggling with oversubscribed schools. There is only 1 small GP surgery and 1 dentist. The village cannot cope with stretching the existing amenities. - One of the main objections I have is the traffic and parking, which is already dire. Streets are almost impossible to drive down safely due to double parking. There is only one main road, which when closed for any reason means driving via Todmorden to get around - this has happened on a number of occasions. Most roads have very steep inclines which are regularly not gritted in winter. To increase parking and traffic would destroy Whitworth. Where would access roads be and how would this affect current residents.		
1363	Gareth	Dolan	-	HS2.101 to 109	Object	I do not live in Whitworth but spend a lot of time there with my family. I am deeply concerned by this proposed loss of green belt and will do my utmost to object against it. - - I strongly urge RBC to re-consider its proposal. Whitworth cannot handle any more development. - - Thanks		If this destruction of the green belt in Whitworth is passed then I shall simply take my family and my money elsewhere as there will no longer be the same attraction Whitworth now offers.
1365	Michael	Whitehead	-		Object	The doctors is overcrowded, the schools are overcrowded and there is one road in and out. All three of the mentioned cannot cope in the current state. Whitworth has too many houses for the current infrastructure. If the proposal goes through, which I sincerely hope it does not, there will be 300+ more homes within Whitworth. This means 650+ more people needing a doctor, 300+ more children who need schools and 300+ more cars on the roads. If the current infrastructure is struggling I dread to think how the village would end up with that amount of extra people. - There are also many deer which have recently returned to the greenbelt land on either side of the valley. Moving any sort of greenbelt/urban borders is highly likely to destroy their habitat and force them away.		-
1397	John	Cavanagh			Object	would like to object to the above sites being changed to buildings lands on the following basis, Whitworth is already full to bursting Doctors, schools, dentist are all full. Traffic has one road in and one road out, all it takes is one set of traffic lights and the whole village comes to a stand still causing problems for local businesses in the surrounding areas. The area around Tonacliffe is home to wildlife such as badgers, foxes, bats, deer, newts, frogs where will these animals go will they be simply expected to relocate??? Local people use the moorland for walking, cycling it is a play area for children and is simply the last green space we have that the council haven't built on. We have ponds where fish and pondlife live geese spend summer here . - - Drainage is very much a problem already we flood when we have a regular amount of rainfall, when it rains heavily the drains cannot cope and the area in Tonacliffe is heavily saturated. - - Access at Tonacliffe is already bad for emergency vehicles and large vehicles, once you include more housing and the school traffic it will simply become impassable.		Yes absolutely let the planning officers spend some time actually in Whitworth village they will see how much traffic there is and how we are struggling to cope, the new Tesco is an accident blackspot which the planners felt fit to approve. Come down from your ivory tower and look what normal people are struggling make a decision that is right for the people and community in Whitworth and have to struggle everyday with traffic, leave us the green space that we deserve

1417	Gillian	Middlemas	Whitworth Community High School	HS1.102 HS2.103 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	As Headteacher of the only secondary school in the Whitworth area, I am concerned that the proposals to build considerable numbers of new dwellings take no account of educational provision in the local area. - The school is already oversubscribed: for 2017 entry into Y7 over 40 families were unsuccessful in gaining a place, despite Whitworth Community High School being their first preference; over 40 families went onto on the Local Authority's waiting list for a place; over 25 families went to Appeal for a place, and very few of them were successful. The school now has 640 students and, without extra classroom space, has no capacity to increase the admissions number, nor to take additional students into existing year groups. - Likewise, many local primary schools are also full / oversubscribed, suggesting there is insufficient educational provision in the local area already. - This situation will be exacerbated if the proposed number of new dwellings goes ahead, unless the developers or Lancashire County Council are prepared to increase the school's capacity by funding additional classroom / learning / social space. The school is over 50 years old, largely of Langspan pre-tensioned concrete construction (intended life expectancy already exceeded) with HAC (high alumina cement) - In addition, the school experiences ongoing issues with the provision of utilities: the water main up the school drive is at risk of collapse; the water supply to the area has recently been affected on a number of occasions, and presumably further demand from new building would increase these issues. - The proposals for new housing does not appear to be linked to any plans to improve the traffic situation in the Whitworth area: lengthy queues heading towards Rochdale each morning already create issues for students travelling to school.

It isn't alot but it is valued and appreciated beyond your knowledge or understanding - all of these below would be affected adversely. - - Wildlife - Loss of trees - The local school - Landscaping - - Local amenities - Infrastructure - - - We deserve our voices to be heard.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.104	Further comment
1440	Helen	Banham	-	HS2.104 - Old Lane	Object	<p>1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - Would my house and others be overlooked. 14. 1469	George	Salt	-		Object	Whitworth is located in a valley, this in itself presents issues with the amount of space available. 7,500 people lived in Whitworth according to the data from the 2011 Census and this is a large amount of people if you look at the services and infrastructure in Whitworth. To start off with there is one GP surgery that has 7,248 people registered with them. Whitworth Medical Centre has 4 GPs which means that for one GP there are 1,812 people. There is not any more capacity available for more people to register with the practice. - - Schools are also busy especially with just one school for secondary education. With more people living in Whitworth that would mean a greater demand on schools and could result in some children living in Whitworth not going to school there. - - Going back to Whitworth being a valley this physical feature means that infrastructure being put in can be difficult. Whitworth has one road in and out and during peak hours this is a very busy road. Most new people would probably be using a car as their main mode of transport adding more pressure to Market Street and its tributary roads. Public transport is also very poor in Whitworth meaning that it is not really a viable alternative for any new people who would come to Whitworth. - - As shown with a few of these arguments Whitworth does not have the capacity to accommodate an extra 359 houses over the next 15 years. For example an average of 3 people per house would result in 1,077 more people living in Whitworth. It is not going to work.		
1497	Wendy	Rose	-	South Quarry	Object	The infrastructure of Whitworth cannot support or sustain further development. There is only one road in and out of Whitworth. Congestion is a serious problem now due to the volume of traffic. When there are roadworks the situation is bordering on dangerous as emergency vehicles are hindered. Further residential development would only compound this issue with higher levels of vehicles. - - Power cuts are a regular occurrence in this area, one can only assume this would get worse with the extent of the proposed developments - - Doctors surgeries are fully to capacity and cannot adequately serve the community at the moment. Waiting times for appointments is ludicrous. Schools are over subscribed. Parking around schools is dangerous and any increase in school children would seriously impact on this. - - All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - - Proposed land in some cases is not viable as parts are prone to flooding. Culverts running through a proposed sight would impact on flood defences in the area. - - -

The Government is committed to protecting and enhancing the quality of the natural and historic environment, in both rural and urban areas. Planning policies should seek to protect and enhance the quality, character and amenity value of the countryside and urban areas as a whole. A high level of protection should be given to most valued townscapes and landscapes, wildlife habitats and natural resources. Those with national and international designations should receive the highest level of protection. 18. The condition of our surroundings has a direct impact on the quality of life and the conservation and improvement of the natural and built environment brings social and economic benefit for local communities. Planning should seek to maintain and improve the local environment and help to mitigate the effects of declining environmental quality through positive policies on issues such as design, conservation and the provision of public space. 19. Plan policies and planning decisions should be based on: –up-to-date information on the environmental characteristics of the area; – the</p>

								<p>potential impacts, positive as well as negative, on the environment of development proposals (whether direct, indirect, cumulative, long-term or short-term); and, – recognition of the limits of the environment to accept further development without irreversible damage. Planning authorities should seek to enhance the environment as part of development proposals. Significant adverse impacts on the environment should be avoided and alternative options which might reduce or eliminate those impacts pursued. Where adverse impacts are unavoidable, planning authorities and developers should consider possible mitigation measures. Where adequate mitigation measures are not possible, compensatory measures may be appropriate. In line with the UK sustainable development strategy, environmental costs should fall on those who impose them – the “polluter pays” principle.</p>

						<p>flooding in the valley), should the council be protecting residents from it rather than creating further problems? Local drainage (water and sewage) cannot cope now in some areas. Should County, District and Town Councils together with United Utilities officially verify which of these proposed development sites are in potential flood areas before planning permission is granted? Further house building would expose a failure "to deliver sufficient community infrastructure and services to meet local needs" (a key principle of the National Planning Policy Framework). Such development would also cause further pollution (e.g. to air quality - more traffic on the roads) creating a greater carbon footprint for the valley and the next generation. Article 19 (from the GPPS), in line with UK Sustainable Development Strategy, states that "the environmental costs should fall on those who impose them"; will the council take this "polluter pays principle" into consideration before making any decisions? Geographically, in some of the proposed sites, the landscape makes building difficult. It would require radical and costly solutions. Where would the access roads for these developments be? If any small byroads are used, this would increase traffic, thereby increasing the risk of accidents to children (particularly near schools). Additionally, in winter such roads are often not salted or gritted making them a hazard for the disabled and the elderly resulting in more accidents and costs for the NHS. There is already inadequate infrastructure in transport where roads are gridlocked at peak times and in need of repair e.g. the already congested road leading to the reservoir and quarry (adjacent to Cwm Waterworks). With one main road in and one out, Whitworth is already a congested village. Public transport is very limited e.g. no train/tram services. How will the increased traffic be managed? In other services, there have been at least 4 outages this year in electricity in the Whitworth area. Water and gas would also need upgrading (representing further expenses on already overburdened service users). Present resources would fail to deliver the increased demand new residents would require, thereby failing to meet the criteria set out in NPPF. Currently, schools, doctors and the sole dental practice are all over overstretched and over subscribed. This depletion in resources would curtail the life chances of future generations. Further house building would further increase class numbers in schools and severely overload resources there. Frequently, waiting times for doctor's appointments are well over four weeks. Dental</p>

24	Erica	Preston	-	HS2.105, HS. 107, HS2. 108, HS2.109	Object	The single road through the valley is not up to the volume of traffic using it currently. Hall St.will be a blocked junction, as will Tonacliffe Road. There are not the amenities in the area eg.doctors, dentists, schools etc. Unless major investment in the valley is made to update amenities and utilities these developments will cause immense problems and destroy the reasons people want to live here and turn the valley into yet another sprawling suburb. - I have every sympathy for the need for housing but feel the proposals are ill thought out and will lead to a detrimental effect on the township.		The need for housing must be weighed against the needs of the valley as a whole and destroying green belt and valued wildlife habitat will not make it a place people want to live.

27	Michael	Chianca	-		Object	<p>HS2.102 - King Street - HS2.104 - Old Lane - HS2.108 - Sandbank Gardens - HS2.105 - Albert Street - HS2.107 Fern Isle Close - HS2.106 Moorland Cres - HS2.109 Horsefield Av - - All these proposed sited are unsuitable for the following reasons. 1. Wildlife - This greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest area at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. 2. Loss of Trees - The forest itself would have to be cut down a totally unnecessary action when we have other areas within Whitworth to build on that would not require the destruction of trees. 3. The local school at both dropping of and collection time around this area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. 4. A Culvert runs through the middle of the proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. 6. Local amenities such as Schools, Dentists, Doctors are already full and building more housing would have a negative affect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. 9. Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would endanger the lives of the residents living there especially the children. 10. Government policy is to protect greenbelt areas except for "Exceptional circumstances" can you explain what those exceptional circumstances are when we have other areas more suitable for building houses on. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental affect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - My house and others would be overlooked. 14. As the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including school children. 16. This area and the surrounding area has already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost.</p>

32	Paula	McNinch	-		Object	There is not the infrastructure in Whitworth to cope with extra housing. The road in and out is already too busy, the schools are full and there are no facilities for young people.		-
56	Valerie	McDonald	-		Object	Whilst I recognise the need for further housing within the area, I am concerned about the siting of so many proposed dwellings in this particular valley. The roads are already clogged at rush hour and as there is only one road through, movement of traffic, should there be an accident or roadworks, becomes frustratingly unpredictable. What provision is there to maintain and develop the road system in the valley? - - Whitworth High School has become more popular over the past couple of years with waiting lists existing. What provision will be made to expand the school, and will this be done with a long term objective in mind and not just a sticking plaster effort to put up some portable classrooms? - - Local services such as the Children's Centre have just been lost. What plans may be afoot to reinstate such necessary provision? I feel it is morally wrong to simply build new houses and forget about the infrastructure to support this development. - - There is a wealth of wildlife on the moors where you are proposing to site many homes. Presumably there will be checks in place to ensure some of these species are not endangered? - - Finally, there are already plenty of properties on the market at very affordable prices (in comparison with some surrounding areas). Some of these have been on the market a while? Why, if there is already affordable housing, is there a need to build more? -		-
98	Jacqueline	Butterworth	-		Object	I am objecting to proposed development of all the above houses around the Whitworth area. The area is overrun with traffic as it us. One way in and one way out. The schools are overloaded as are the GP surgery. It is inconceivable to build more houses and allowing more traffic to use our roads which are in a terrible state. We are already experiencing burst water pipes and our water pressure has already been reduced. We are experiencing more power cuts since all the new houses have been built on Cowm Park Way . Surely there must be someone in the planning department with some common sense and will prevent any further building of houses in Whitworth		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.105	Further comment
131	Christine	Greenwood	-		Object	I am objecting to plans to allow the building of over £350 properties on various sites around Whitiworth and Shawforth over the next 15 years. - Not only am I concerned about the building on our greenbelt sites which is part of the attraction of the area. I can understand the wind farm and can support renewable energy sources but not the creation of a collection of housing estates - whether social/affordable or not . The awful collection in Britannia speaks for itself! We have already had several builds across Rossendale but the extra Council Tax revenue does not seem to have brought many benefits to the borough. - As it stands at present the infrastructure can just about support the current residents - schools are already over subscribed and getting an appointment at our one GP surgery is already a mammoth undertaking. Planning to build or reopen a school by any chance? - Traffic is already an issue with one road in and out and a bus service that has to be one of the most unreliable in the surrounding areas ! There are next to no facilities for young people/children and a library fighting to survive so I think that this needs to be given serious consideration before you go ahead.		-
155	Jo	Furtado			Support	HS2.105 - most people in Whitworth are relieved that Albert Mill has been demolished, and are not unhappy about the fact that housing will be built on the land released, for all that they have broad reservations about the issues raised above [see LT1 and General comments]; and a hope that access from the site to the main road has been carefully thought through - it's quite some rise. Support.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.105	Further comment
195	Janet	King	-	HS.102, HS2.104-9 inclusive	Object	Whitworth' infrastructure cannot support almost 400 new properties - it is already nigh impossible to obtain a doctors appointment and my father has had to wait iver 6 months to obtain a podiatry appointment as there is only one who has been on long term sick and no replacement cover available. The fact that there is only one main arterial road into and out of Whitworth, which already has weekly road works delaying the already totally congested road does not bear thinking about. With an extra 400 properties and the increase in traffic that these will bring and as there is no large employer in the area most of these occupants will be commuting one way or another. We lost access to an A&E in Rochdale and now the nearest is either Fairfield or Oldham with the additional traffic these proposals would create the congested roads Could be catastrophic in an emergency. - - On a personal note, my family moved to Whitworth 12 years ago, from Oldham, due to its naturally beautiful countryside and I see the addition of these properties into areas of greenery (extending Wallbank estate etc.,) is the very short end of the stick. I can see that if these are accepted, encroaching on to green belt areas, slowly but surely the green belt areas will get smaller and smaller until eventually Whitworth just becomes another concrete plot with ever creaking infrastructure. - - Finally, I understand the need for affordable housing but there are plenty of mills/brown field that could be developed. However, I feel strongly that before any proposals are accepted it is of the utmost importance that the infrastructure is in place to support them, that includes roads, schools and NHS access.	-	-
206	Michael	Day	-		Object	Recent persimmon development has brought 100 homes to the area. - Schools can't cope, medical services can't cope and the road infrastructure is abysmal, more home will compound all these matters. - - We moved to Whitworth, Rossendale for the scenery, quiet life etc this will bee ruined -	-	-
261	David	Eyes	-		Object	This is an unbelievable plan that will stretch amenities in the area even further. - - The new estate near Cowm has already increased traffic congestion on the one road in and out of the village and schools are already struggling to cope. - - There is also the issue of wildlife and the impact it will have on their environment. - - I for one will be leaving if this idiotic plan goes through. -		This smells of greed over common sense

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.105	Further comment
268	Michaela	Radford	-		Object	Whitworth has had numerous instances recently regarding the roadworks for the infrastructure repair and maintenance. As an employee of all 4 major utility asset owners in the area, I am very concerned regarding the houses proposed. We only have one road throughout the valley and this is impacted severly when roadworks are planned. My concerns are that these are not managed correctly by LCC at present, therefore; more houses and more infrastructure would have a massive impact on the people living in the village. People face unemployment now due to the frequent issues we face getting into work. - Not to mention over crowded schools and doctors as we stand at present. - - I request, here in writing, to be informed of any planned meetings regarding the houses in whitworth and notification be sent in writing to my address above.		-
297	Lindsay	Fairhurst			Object	Poor access along the length of Main Rd (Market Street) one narrow road lined with parked cars , as only access into & out of whitworth. No alternative route. No trains or trams. Buses won't must travel on same one access road both in and out as cars. No motorway access under 20 min journey both ways insufficient work in area means people must travel to Manchester, leeds, bury, Rochdale etc. Current public transport unrealistic. Traffic at peak times currently gridlocked & congested. Increased housing will add to this burden. Utilities infrastructure unable to cope currently leading to repeated remedial roadworks. Schools full Doctors full Rossendale Council Lancashire Council needs to address transport & roadways access + education access beofer building homkes where people will be unable to travel to employment and school		Highway safety compromised by insufficient access to site
298	Andrew	Fairhurst			Object	the number of houses proposed in this local plan for infrastructure can support. Whitworth has only one road in abd out and already this is constantly being dug up by utility companies often resulting in temporary traffic lights that cause massives queues of traffic in rush hours. Not only is the road narrow and conjested but there is no alternative train service - only the bus (on the same road) This is totall useless for the number of people wo commute to Manchester, Oldham and Bury every working day. Our schools, doctors and dentists are already close to capacity. There are very few options to travel to other facilities apart from along the one road through the valley.		Without robust and achievable plans to increase the support infrastructure for travel (a train for example) and health and education and culture this building should not go ahead. For people to afford these houses they need jobs first. Currently you need to move out of the valley to commute to work. Regeneration of the area and existing housing stock should come first.

515	alec	taylor	-		Not Applicable	need to see the plan before commenting		no
590		Ashworth			Object	Absolutely ridiculous One way in and out of whitworth no extra schools or doctors when you have two or three cars per household. This is ruining our villages. We strongly object to this. Listen to the people who vote you in, as we have long memories		
631	Sue	Eveleigh	-		Support	The junction of Hall Street with Market Street is already very busy during rush hour and when children are being dropped and picked up from school. What vehicular access is being provided for the new houses to be built on the site of the Albert Mill, (and		-
691	Louisa	Corlett	-		Object	The road access around hall street is already dangerous. The traffic is already causing congestion. I regularly observe children exposed to moving traffic near the 2 school on hall street. The pavement is very narrow. The flooding regularly causes issues along this stretch. - Horses and access to healey dell is already compromised and dangerous for people trying to cross. - Free roaming sheep and other wildlife such as herons are seen along the river on hall street. More traffic would cause more damage to the environment. - The schools and dr surgery in this location are already at capacity.		-
743			Whitworth Town Council		Support	HS2.105 Albert Mill, Whitworth Council agreed that this site requires development and housing would seem the only viable option. There is an outline application already approved for 49 houses. Council raised concerns about access and potential flooding risk for houses on this site.		
763	Alan	Billingsley	-		Object	The Albert Mill scheme, albeit welcome in so much that it has achieved finally the demolition of the complete site, is just another housing addition to a village with an infrastructure that is already struggling to meet the demands of its current population. The building of 49 properties, on a site that is on a Flood Zone 3 (high risk), has access issues, not only to Albert St and Massey Croft, but also to Hall St and Market St, impinges on Green Belt areas to the south of the site and land adjacent to Massey Croft and will result in increased traffic flow past an area of elderly residents, is not acceptable		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.105	Further comment
773	Susan	Worrall	-		Object	Whitworth is a village, a small community. Building these housing developments will change Whitworth into a town. - There is not the infrastructure to support this additional housing. There is one road in and out of Whitworth which is already struggling to cope with the increasing volume of traffic. Especially at peak times. If there are any traffic disruptions it can take 1-2 hours to get to Rochdale . We do not need more cars and the pollution they bring! - - There are limited school places both secondary and primary and local children born in the village will struggle to get places. - The one and only GP practice can not manage to provide the necessary health care for patients with no appointments pre bookable for weeks in advance. This healthcare will be diluted further. Living in Whitworth if A&E treatment is required which is often a life or death situation your chances of survival are reduced add more traffic on market street and your chance of survival diminishes further - - The people who live in Whitworth , live here because it is a village , it is quiet and the countryside is on the door step. Yet the plans want to destroy the village life, increase demands on existing services and increase pollution - - To consider building on greenbelt land in Whitworth is unbelievable and irresponsible, Planning has already - spoil the view of the countryside at the side of Daneswood ave and the wind farms are also affecting the views and countryside. - - Whitworth has lots of wildlife from deer, owls, herons, wild ponies as well as lots of insect life butterflies, bees etc which will all be at risk if the countryside is used for housing. - - There is empty housing all over the borough - fill these , not build more especially in our little village -		Stop putting profits first and put existing residents first

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.105	Further comment
803	Marietta	Galbraith	-		Object	My objections for the proposed building of housing on the above sites is based on a number of reasons: - 1. Infrastructure. The current housing situation is already at (possibly beyond) capacity with regards to schools, doctor's surgeries, dentists, employment and traffic. There are no more schools planned and no way to expand the ones already here. Some children have to travel miles to schools out of the area due to oversubscribed local schools. This is the same for doctor's surgeries and many other amenities. - 2. Traffic. There is one main road in and out of Whitworth that already has issues with raised levels of traffic. In the four years we have lived here, there have been many occasions where traffic has been an issue due to constant roadworks (for various reasons relating to increased housing and traffic) which has caused major problems. Also, most people are employed outside of Whitworth so traffic is high anyway. More housing would increase this issue with no solution being given as to how it could be rectified. - 3. Utilities. More and more power cuts have been happening recently in Whitworth due to new housing as well as burst water pipes and problems with drainage. This has contributed to the traffic issues with roads having to be dug up every few weeks to 'fix' the problem. - 4. More housing would mean taking up land that is natural drainage for flooding. Recently, my area was put into the 'flood risk' category (although we haven't flooded), significantly increasing my home insurance. If more homes are built, this would increase risk of flooding to many homes around Whitworth, which would cause loss of market value and would reduce the chances of being able to sell the property. - 5. Much of the 'green land' would be lost which is detrimental to the wildlife around Whitworth. The Government have a duty to protect greenbelt land and our environment! The carbon footprint would be horrific! - In conclusion, building over 300 houses in Whitworth would cause issues beyond repair! Environment, traffic, pollution, infrastructure, drainage etc. would all be dramatically affected in the most negative and damaging way. Whitworth was not meant for so much housing and so many people.		-
886	Michael	Banham	-	HS2.102 to HS2.109	Object	The infrastructure of whitworth is over stretched as it is,the school's cannot cater for such an undertaking. Theres only one road in or out of whitworth any problems on this road causes absolute mayhem. The winter months are an absolute nightmare just to get onto market street.		I cannot understand why anyone would want to over populate an area that is already struggling.
889	Derek	Lord	-	HS 102, HS105, HS104, HS106, HS107, HS108, HS109.	Object	We in Whitworth are sure that there are enough houses here at the present time.There are large estates at Cowm Park, Tonacliffe, Wain Gap, Wallbank, Knot Hill, Orama Mill Site, Edgemoor Close, and a small estate at Facit. The exits onto the one main road are at present full of traffic. The Doctors, Schools etc are now at bursting point. We in Whitworth have done our share in housing. Please think again before building any more. Thank You. -		-

892	Mandy	Sanderson	-	HS2.102, HS2.105,HS2.10 4, HS2.106, HS2.107, HS2108, HS2.109	Object	The transport system around Whitworth cannot cope with the volume of traffic . Also local amenities are already at braking point..		No
903	Louise	Hewitt	-		Object	It is absolutely ridiculous to try and put 49 houses on the Albert Mill sight, not only is it going to be dangerous to try and access this sight but the schools are already oversubscribed and are turning people in the village away as they are full, the doctors are struggling with patients and you can't get a appointment and it is horrendous when there are roadworks or snow as there is only one road in and one road out.		No
911	Julie	Latham	-		Object	In principle I don't object to more houses or people. However I will until I am convinced that the planners are committed to the infrastructure improvements required to support the extra influx of people and cars . - The main bottlenecks caused by Whitworth traffic happen in the Rochdale Borough at the bottom of Whitworth Road and on Shawclough Road. These areas are controlled by Rochdale Council who are under no obligation to improve traffic flow to improve the lives of the people of Whitworth. There are changes could be made in these areas which would help greatly. Unless Rossendale Planners can work with Rochdale Planners to create new roads and implement better traffic flow measures the extra cars generated by this and other proposed housing projects in Whitworth will mean journey times to get to Rochdale, Manchester and the M62 Motorway network at f peak times will be so long that people who commute this way to work will have to give up their jobs or move away from the village. I really don't think that this issue is being taken on board by either Borough. - The medical centre is also over-subscribed and I believe that the schools are too. I appeal to the planners to find funds and solutions to these concerns before adding more pressure.		-

913	Michelle	Ashcroft	-	HS2.102, HS2.105, HS2.104, HS2.106, HS2.107, HS2.108 & HS2.109	Object	Whitworth is a geographical challenge at the best of times, positioned in a valley, consisting of ONE main road with multiple roads stemming from this leading to many properties that are built on the hillside. There are many green areas which are used by local farmers for their livestock. During times of heavy rain many of the roads are flooded, and during winter many roads are very dangerous in the snow. It is not uncommon for Whitworth to be gridlocked as there are far too many cars on the roads, all it needs is one set of road works and the town becomes inaccessible. The local schools are now over subscribed, the High school has had to turn away many children who only live a couple of miles away. The primary schools are also subscribed making it very difficult for teachers to provide a good education to the children. The local doctors are unable to cope with the number of patients, trying to get a same day appointment is nigh on impossible these days. We have issues with anti social behaviour due to lack of amenities available for teenagers, the local youth club has been closed down. There is a lack of police presence (the PSCO tries her best), people don't feel as safe as they should. The library is still under threat of closure, the pool is only open because of the people of Whitworth who run it. Building more houses brings more people, more cars, more strain on the infrastructure. I appreciate housing is needed but the number of houses that has been suggested will bring this town to it's knees.		I would suggest you come to Whitworth during the morning school run and see how difficult it is around Horsefield Avenue. Come sit in the traffic jams during rush hour. - - The government has spoken about creating new towns, this is a great idea, there are places that can accommodate thousands and thousands of houses. Build there not here!!!
916	Jane	Trudgeon	-	HS2.102 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	We are already an overstretched village infrastructure, the roads would not cope with an extra amount of traffic and would make the already difficult commute to exit/enter the village impossible. There are not enough schools nor would the doctor's surgery be able to cope as even now it is almost impossible to get a reasonable appointment time, - - The housing developments would impact on wildlife		-
918	Marion	Ashworth	-	HS2.107 , ALL.	Object	I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.		I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.

955	Janet	Whitehead	-	HS2.102, HS2.104,HS2.10 5, HS2.106,HS2.10 7, HS2.108,HS2.10 9	Object	Whitworth is already a very busy village, oversubscribed schools and Doctors - We have one road in and one road out which is almost impossible during peak times in the morning - The houses already exceed the heights up the sides of the valley - Our green belt is very important to wildlife and the the people the live here - If we let one builder onto greenbelt it opens the doors to far too many others - Our population is big enough and we cannot accommodate many more		- Our Councillors are voted in by us and now need to stand up and fight for us - - 400 houses is a ridiculous amount of new houses for a tiny village - - We have had 2 different sites where new houses have been built in recent years we've done our bit for Government figures - - Please find somewhere else
962	Kathryn	Gill	-	HS2.102, HS2.105, HS2104, HS2106, HS2107, HS2108, HS2109	Object	I object to any changes in use of local greenbelt land to build houses. Also, there is only one road through Whitworth and it is already congested. We have only 1 doctors surgery, and not enough school places to accommodate hundreds of additional families. Greenbelt land cannot be restored once built on, and these proposals would change the landscape of Whitworth. I am also concerned about the building of 20 properties around Cowm. This is a resource continually used for recreation by the people of Whitworth and should be preserved.		
979	Marie	Pye	-		Object	All of these developments will contribute to already existing traffic problems as there is one road in and one road out of the area. The high school is already oversubscribed with local children not being offered places.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.105	Further comment
992	Susan	Farrell		HS2: 102, 104, 105, 106, 107, 108, 109	Object	<p>I strongly object to the building of houses on all the above mentioned sites for the following reasons: - Greenbelt land is of importance to all the wildlife of Whitworth and Shawforth . Deer and bats live in the forests in the area. Many badgers and foxes inhabit the countryside and rare species of wildlife live in the ponds. - The forest area at Tonacliffe would be cut down having a negative impact on the environment. - Tonacliffe road is already dangerous for children with cars parked along the length of the road at school dropping off and picking up time. The increased number of cars if more houses were built in the area would be worse for the children and residents. - Local amenities such as dentists and GPs could not cope with the increased population. It is almost impossible at the moment to get a GP appointment in less than two weeks. More housing would have a detrimental effect on the residents of Whitworth and Shawforth. - Facilities such as water, gas and electricity are already stretched and a major upgrade of the infrastructure would be required to support increased housing. - Local drainage cannot cope with the current usage. More housing could have an impact on flooding. - Public footpaths could be lost reducing the number of rights of way for walkers. - The road network both ways from Rochdale to Bacup is already gridlocked. More housing would put an increased strain on traffic and the already poor public transport in the area. - The only high school in the area is already oversubscribed. With increased housing parents may have even less chance of a first choice school for their children. They may have to travel miles to school. - I understood it is government policy to protect Greenbelt land except for 'Exceptional Circumstances'. What are the exceptional circumstances that enable housing to be built on the greenbelt land in Whitworth and Shawforth?</p>		<p>Summary - - Whitworth and Shawforth are already busy villages with oversubscribed schools and GP services with one road in and out between Rochdale and Bacup. - - Can we accommodate more housing that will put pressure on already overstretched amenities, increase traffic and change the beautiful landscape forever?</p>

1109	Jane	Gadsby	-		Object	<p>I wholly object to more housing being built in Whitworth!! We are a small(ish) village that can not cope already with the amount of new houses and people moving into it!! Our schools are already over subscribed; they are turning people away that don't live overly far away that a few years ago would have had no problem getting a place. The Doctors surgery can't cope with the number of patients wanting appointments. You are also increasing the risks of flooding. My house is already at risk and has already flooded twice. The main road (one road in and out) is gridlocked most mornings with commuters trying to get out of the village but most of all you are taking our beautiful green areas that Whitworth is so lucky and honoured to have. We have lots of empty properties that can't be filled already!! Please leave us and our village alone!!</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.105	Further comment
1134	Abigail	Leyland	-		Object	WE DO NOT NEED ANYMORE HOUSING IN WHITWORTH! The schools are already oversubscribed, our local doctors can not possibly take on any more patients as it is already a struggle to get an appointment currently. We only have one road in and out of the village which gets badly effected by rush hour traffic, making it difficult for the locals to get to work/school etc. We have such a lovely view of greenery surrounding our little village and we do not want our sight ruined by building ugly, unnecessary housing.		
1166	Brendan	Doherty	-	HS2, 102,104,108,105 ,107,106,109.	Object	WHITWORTH IS FULL. This statement encapsulates all the issues surrounding any expansion of dwelling houses in the township of Whitworth. - - The negative impact of any developments in the town cannot be overstated. - - The whole nature of this small township will be irreversibly destroyed if development are allowed. - - Flora and fauna will be the first to suffer. This valley is home to an exceptional and expanding variety of animals and trees and flowers. This growth has taken decades to achieve and would by totally reversed by the stroke of a pen. - - To say that all the ingredients which go to make up Whitworth as a place for people to live are overloaded is indeed an understatement. - - Congestion of traffic and people is at its limit, any increase can only be detrimental to the health and quality of life of residents. - - Local services, schools, doctors, civic amenities are already at their serviceable optimum. - - The existing utilities of electricity,gas and water only just maintain service. There are often cuts in these making it seem that we are a third world town. - - Whitworth is a linear town with no bypass or possibility of such. Most of the day traffic is heavy and at peak times chaotic. This combined with the nature of HGV traffic leaves the roads in constant need of repair. Add a very poor public transport system and the certain increases proposed then the result is guaranteed to be disastrous.		Listen to the people of Whitworth.
1190	Nathan	Worrall	-	HS2.107 , HS2.108, HS2.109, HS2.102, HS2.105, HS2.104,HS2.10 6	Object	Whitworth doesn't have the infrastructure to sustain the construction of these new houses. The local doctors and schools would struggle to meet the needs of the increased population. There is bad traffic in Whitworth already, this will only make it worse and these traffic problems are highlighted when there are roadworks and there are large queues. The proposed sites are located on greenbelt land, and this will have a negative effect on the local wildlife as well as destroying the natural beauty of this land.

1272	Michala	Geldard	-	HS2.102, HS2.105, HS2.104, HS2.106, HS102.107, HS2.108, HS2.109	Object	I am objecting in general to the proposed house building in various sites around Whitworth and specifically in relation to the proposed sites t Tonacliffe. My objections are based on a number of reasons: 1. Wildlife in the local area. Deer, badgers, foxes and hares live within the forest areas. Rare protected newts live in the pond. Bats nest in the forest. The importance in f this green belt land for the wildlife cannot be over emphasised. - 2. Tonacliffe forest would need to be cut down adversely affecting the local environment. - 3. The impact of more cars around local schools, especially Tonacliffe School, is of great concern due to the already high volume of traffic. Increasing this would be unacceptable. - 4. Local amenities such as schools, doctors, dentists are already to capacity. I have concerns that more houses will have a negative impact on the lives of current residents in relation to these amenities. - 5. Has the infrastructure of our small village been considered in relation to electricity, gas and water supply if more houses are built? Whitworth already experiences power cuts and seems to be worse since other recent building developments have been completed. - 6. The road network into Rochdale is already gridlocked. More houses will increase this problem. Public transport from Whitworth is limited to buses and I consider that if this proposed building goes ahead there will also be a negative impact on the poor public transport in and out of our village. - 7. Local drainage already struggles to cope with usage now, if the volume of residents increases would the drainage system be able to deal with the added strain? - 8. We bought our property because it is located on the last cul de sac of a small estate with no through traffic. This proposed building work will completely alter this into drive through roads. Plus the volume of traffic will - Increase which I consider to be unacceptable. - 9. I am very concerned that we may have loss of privacy as we are not currently overlooked and this was a major consideration when we bought our house.	-	
1283	Jonathan	Geldard	-	HS2.102, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	Whitworths infrastructure is already at near full capacity. The single main road through Whitworth is, at times, grid-locked. Streets around the primary schools is chaotic. There is a definite flood issue through the valley. Chime is rising unchallenged. The rich and diverse wildlife is flourishing around Whitworth. - Any of the development projects would have a negative and detrimental implication on Whitworth and it's residents.	-

1310	Richard	Dolan	-	HS2.101-109	Object	<p>We are vehemently opposed to all housing allocation in Whitworth. Our group has decided to vote against and actively campaign against all Councillors and MPs in favour of this proposal. We will withhold our votes and encourage family, friends, and community to do likewise. - We are outraged by this proposal, especially HS2.107 that will encroach on Healy Dell. On this point we will be contacting the National Trust and other such organisations to make them away of the proposed desecration to the Green Belt. Furthermore, we are now investigating possible financial links between all Councillors, MPs, and RBC employees involved in this issue with the proposed contractors. This senseless proposal for a village far too small to accommodate a possible 300 new homes suggest an ulterior motive. No one in our community that we have spoken to is in favour of this plan and we will use our sizeable influence. - There has been more than enough housing development in Whitworth. This new proposal will destroy our green spaces and necessitate a new schools, doctors' surgery, dentist, shops, and possible a new road. All future housing development must stop. Our community can not accommodate any more. - In light of the fact that this proposal has not been advertised to a great extent (we have spoken to people who know nothing of it), we will be conducting a petition again this proposal and encouraging everyone to sign the following statement: - We will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community.</p>		<p>To reiterate, we will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community. - - The people's power will be felt if this plan is authorised.</p>
1336	Maureen	O'Mara	-	HS2.102,105,104,106,107,108,109	Object	<p>Whitworth is already struggling with oversubscribed schools. There is only 1 small GP surgery and 1 dentist. The village cannot cope with stretching the existing amenities. - One of the main objections I have is the traffic and parking, which is already dire. Streets are almost impossible to drive down safely due to double parking. There is only one main road, which when closed for any reason means driving via Todmorden to get around - this has happened on a number of occasions. Most roads have very steep inclines which are regularly not gritted in winter. To increase parking and traffic would destroy Whitworth. Where would access roads be and how would this affect current residents.</p>		
1363	Gareth	Dolan	-	HS2.101 to 109	Object	<p>I do not live in Whitworth but spend a lot of time there with my family. I am deeply concerned by this proposed loss of green belt and will do my utmost to object against it. - - I strongly urge RBC to re-consider its proposal. Whitworth cannot handle any more development. - - Thanks</p>		<p>If this destruction of the green belt in Whitworth is passed then I shall simply take my family and my money elsewhere as there will no longer be the same attraction Whitworth now offers.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.105	Further comment
1365	Michael	Whitehead	-		Object	The doctors is overcrowded, the schools are overcrowded and there is one road in and out. All three of the mentioned cannot cope in the current state. Whitworth has too many houses for the current infrastructure. If the proposal goes through, which I sincerely hope it does not, there will be 300+ more homes within Whitworth. This means 650+ more people needing a doctor, 300+ more children who need schools and 300+ more cars on the roads. If the current infrastructure is struggling I dread to think how the village would end up with that amount of extra people. - There are also many deer which have recently returned to the greenbelt land on either side of the valley. Moving any sort of greenbelt/urban borders is highly likely to destroy their habitat and force them away.		-
1397	John	Cavanagh		Albert Mill	Object	would like to object to the above sites being changed to buildings lands on the following basis, Whitworth is already full to bursting Doctors, schools, dentist are all full. Traffic has one road in and one road out, all it takes is one set of traffic lights and the whole village comes to a stand still causing problems for local businesses in the surrounding areas. The area around Tonacliffe is home to wildlife such as badgers, foxes, bats, deer, newts, frogs where will these animals go will they be simply expected to relocate??? Local people use the moorland for walking, cycling it is a play area for children and is simply the last green space we have that the council haven't built on. We have ponds where fish and pondlife live geese spend summer here . - - Drainage is very much a problem already we flood when we have a regular amount of rainfall, when it rains heavily the drains cannot cope and the area in Tonacliffe is heavily saturated. - - Access at Tonacliffe is already bad for emergency vehicles and large vehicles, once you include more housing and the school traffic it will simply become impassable.		Yes absolutely let the planning officers spend some time actually in Whitworth village they will see how much traffic there is and how we are struggling to cope, the new Tesco is an accident blackspot which the planners felt fit to approve. Come down from your ivory tower and look what normal people are struggling make a decision that is right for the people and community in Whitworth and have to struggle everyday with traffic, leave us the green space that we deserve

1417	Gillian	Middlemas	Whitworth Community High School	HS1.102 HS2.103 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	As Headteacher of the only secondary school in the Whitworth area, I am concerned that the proposals to build considerable numbers of new dwellings take no account of educational provision in the local area. - The school is already oversubscribed: for 2017 entry into Y7 over 40 families were unsuccessful in gaining a place, despite Whitworth Community High School being their first preference; over 40 families went onto on the Local Authority's waiting list for a place; over 25 families went to Appeal for a place, and very few of them were successful. The school now has 640 students and, without extra classroom space, has no capacity to increase the admissions number, nor to take additional students into existing year groups. - Likewise, many local primary schools are also full / oversubscribed, suggesting there is insufficient educational provision in the local area already. - This situation will be exacerbated if the proposed number of new dwellings goes ahead, unless the developers or Lancashire County Council are prepared to increase the school's capacity by funding additional classroom / learning / social space. The school is over 50 years old, largely of Langspan pre-tensioned concrete construction (intended life expectancy already exceeded) with HAC (high alumina cement) - In addition, the school experiences ongoing issues with the provision of utilities: the water main up the school drive is at risk of collapse; the water supply to the area has recently been affected on a number of occasions, and presumably further demand from new building would increase these issues. - The proposals for new housing does not appear to be linked to any plans to improve the traffic situation in the Whitworth area: lengthy queues heading towards Rochdale each morning already create issues for students travelling to school.		Whilst it is excellent news that there is demand for additional housing in the Whitworth area, I am particularly concerned about the infrastructure which is essential to support this kind of development. Education, and raising aspirations, is essential to improving the future for our young people and I have concerns regarding school capacity; increased traffic; increased demand on local services generally; impact on provision of utilities; and whether or not this has all been factored into the planning process. The infrastructure needs to be in place before the planning is agreed. I also have concerns about the impact of further building on wildlife, the village ethos, and greenbelt areas.

						residents put an unbearable strain on this network. -		
1469	George	Salt	-		Object	Whitworth is located in a valley, this in itself presents issues with the amount of space available. 7,500 people lived in Whitworth according to the data from the 2011 Census and this is a large amount of people if you look at the services and infrastructure in Whitworth. To start off with there is one GP surgery that has 7,248 people registered with them. Whitworth Medical Centre has 4 GPs which means that for one GP there are 1,812 people. There is not any more capacity available for more people to register with the practice. - - Schools are also busy especially with just one school for secondary education. With more people living in Whitworth that would mean a greater demand on schools and could result in some children living in Whitworth not going to school there. - - Going back to Whitworth being a valley this physical feature means that infrastructure being put in can be difficult. Whitworth has one road in and out and during peak hours this is a very busy road. Most new people would probably be using a car as their main mode of transport adding more pressure to Market Street and its tributary roads. Public transport is also very poor in Whitworth meaning that it is not really a viable alternative for any new people who would come to Whitworth. - - As shown with a few of these arguments Whitworth does not have the capacity to accommodate an extra 359 houses over the next 15 years. For example an average of 3 people per house would result in 1,077 more people living in Whitworth. It is not going to work.		
1497	Wendy	Rose	-	Albert Mill	Object	The infrastructure of Whitworth cannot support or sustain further development. There is only one road in and out of Whitworth. Congestion is a serious problem now due to the volume of traffic. When there are roadworks the situation is bordering on dangerous as emergency vehicles are hindered. Further residential development would only compound this issue with higher levels of vehicles. - - Power cuts are a regular occurrence in this area, one can only assume this would get worse with the extent of the proposed developments - - Doctors surgeries are fully to capacity and cannot adequately serve the community at the moment. Waiting times for appointments is ludicrous. Schools are over subscribed. Parking around schools is dangerous and any increase in school children would seriously impact on this. - - All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - - Proposed land in some cases is not viable as parts are prone to flooding. Culverts running through a proposed sight would impact on flood defences in the area. - - -

								<p>footpath (Right of way) could be lost. 18. Local drainage cannot cope with the usage now would more residents put an unbearable strain on this network. - DON'T FORGET EACH ADULT IN YOUR HOUSEHOLD CAN PUT IN THEIR OWN OBJECTION FORM TO THE BUILDING WORK. Extract from the Governments Planning Policy Statement - Protection and Enhancement of the Environment 17. The Government is committed to protecting and enhancing the quality of the natural and historic environment, in both rural and urban areas. Planning policies should seek to protect and enhance the quality, character and amenity value of the countryside and urban areas as a whole. A high level of protection should be given to most valued townscapes and landscapes, wildlife habitats and natural resources. Those with national and international designations should receive the highest level of protection. 18. The condition of our surroundings has a direct impact on the quality of life and the conservation and improvement of the natural and built environment brings social and economic benefit for local communities. Planning should seek to maintain and improve the local environment and help to mitigate the effects of declining environmental quality through positive policies on issues such as design, conservation and the provision of public space. 19. Plan policies and planning decisions should be based on: –up-to-date information on the environmental characteristics of the area; – the</p>

								<p>potential impacts, positive as well as negative, on the environment of development proposals (whether direct, indirect, cumulative, long-term or short-term); and, – recognition of the limits of the environment to accept further development without irreversible damage. Planning authorities should seek to enhance the environment as part of development proposals. Significant adverse impacts on the environment should be avoided and alternative options which might reduce or eliminate those impacts pursued. Where adverse impacts are unavoidable, planning authorities and developers should consider possible mitigation measures. Where adequate mitigation measures are not possible, compensatory measures may be appropriate. In line with the UK sustainable development strategy, environmental costs should fall on those who impose them – the “polluter pays” principle.</p>

						<p>flooding in the valley), should the council be protecting residents from it rather than creating further problems? Local drainage (water and sewage) cannot cope now in some areas. Should County, District and Town Councils together with United Utilities officially verify which of these proposed development sites are in potential flood areas before planning permission is granted? Further house building would expose a failure "to deliver sufficient community infrastructure and services to meet local needs" (a key principle of the National Planning Policy Framework). Such development would also cause further pollution (e.g. to air quality - more traffic on the roads) creating a greater carbon footprint for the valley and the next generation. Article 19 (from the GPPS), in line with UK Sustainable Development Strategy, states that "the environmental costs should fall on those who impose them"; will the council take this "polluter pays principle" into consideration before making any decisions? Geographically, in some of the proposed sites, the landscape makes building difficult. It would require radical and costly solutions. Where would the access roads for these developments be? If any small byroads are used, this would increase traffic, thereby increasing the risk of accidents to children (particularly near schools). Additionally, in winter such roads are often not salted or gritted making them a hazard for the disabled and the elderly resulting in more accidents and costs for the NHS. There is already inadequate infrastructure in transport where roads are gridlocked at peak times and in need of repair e.g. the already congested road leading to the reservoir and quarry (adjacent to Cwm Waterworks). With one main road in and one out, Whitworth is already a congested village. Public transport is very limited e.g. no train/tram services. How will the increased traffic be managed? In other services, there have been at least 4 outages this year in electricity in the Whitworth area. Water and gas would also need upgrading (representing further expenses on already overburdened service users). Present resources would fail to deliver the increased demand new residents would require, thereby failing to meet the criteria set out in NPPF. Currently, schools, doctors and the sole dental practice are all over overstretched and over subscribed. This depletion in resources would curtail the life chances of future generations. Further house building would further increase class numbers in schools and severely overload resources there. Frequently, waiting times for doctor's appointments are well over four weeks. Dental</p>

Reference		HS2.106		Land to the east of Tonacliffe School				

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
5	Kimberley	Ashworth	-		Object	<p>I am writing to object against the proposed local plan for Whitworth. - - I am unable to attend the meeting tomorrow night due to illness but I have looked at the proposal as stated below: - - http://www.rossendale.gov.uk/download/downloads/id/3700/whitworth_map_with_street_names - - I'm disappointed to see that a number of green spaces are being considered to build houses on. The green spaces behind Tonacliffe School are used by many for walking. To build on this space would be detrimental to the green space due to wildlife and other conversation in that area. - Building houses would also see an increase in traffic which is at demand during peak times at the moment. - - Other green spaces on the plans are also being considered. In a village that is at full capacity I am unsure why Rossendale Council see the need to build in places that already has adequate housing. - - There are no plans to look at new recreational and family facilities which the town needs. The closure of the children's centre means that new parents and young families have nowhere to go. The plans don't take any such new facility into consideration and I urge Rossendale Council to look at this. - - I know I speak on behalf of many in the Town when I say the option for Whitworth is option 1 'Do nothing' - - Kind regards -</p> <p>Email received 31/07/17: Dear Sir or Madam I am writing to express my disappointment about the draft Local Plan consultation meetings. Many residents in Whitworth have found out today about the consultation meeting taking place tomorrow evening. This is simply too short notice when many residents haven't had time to find out more about the plans. It is clearly a very important issue. Unfortunately, I wouldn't be able to get to one of the other consultations for before 7.30pm as I work the other side of Manchester.</p>		I am extremely disappointed that a meeting has been arranged in Whitworth for tomorrow evening when all the other consultation meetings are taking place in September
12	Chloe	Halliday	-		Object	<p>Already too much traffic in this area during school hours with cars often dangerously parked. Would also result in the habitats of many wildlife being disrupted.</p>		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
18	Michael	Stewart	-		Object	<p>This proposed site is unsuitable for the following reasons. - - 1. Wildlife - This greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep with the Forest area at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. - - 2. Loss of Trees - The forest itself would have to be cut down a totally unnecessary action when we have other areas within Whitworth to build on that would not require the destruction of trees. - - 3. The local school at both dropping of and collection time around this area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. - - 4. A Culvert runs through the middle of the proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. - - 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. - - 6. Local amenities such as Schools, Dentists, Doctors are already full and building more housing would have a negative affect on the living standards of the people of Whitworth. - - 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing. - - 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. - - 9. Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would endanger the lives of the residents living there especially the children. - - 10. Government policy is to protect greenbelt areas except for "Exceptional circumstances" can you explain what those exceptional circumstances are when we have other areas more suitable for building houses on. - - 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on the living standers of both. - - 12. What would the impact be on the carbon footprint of the valley ? - - 13. Loss of privacy - My house and others would be overlooked. - - 14. As the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. - - 15. The safety of all the local residents would be put at risk with the increase of traffic including school children. - - 16. This area and the surrounding area has already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. - - 17. A public footpath (Right of way) would be lost. - - PLEASE CAN I HAVE A WRITTEN RESPONSE TO MY OBJECTIONS.</p>		<p>I will be writing to my MP and local councillors on this matter as it is my belief you are going against your own policy on greenbelt areas. - - I will be involving all relevant parties including Campaign to protect rural England as I believe we have better sites to build houses on with in Whitworth that would have much less impact on the community and Wildlife. - - I would expect a written report sending to me via email answering the objections I have put forward.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
20	Jamie	Ward	-		Object	The objection is simple on the grounds of traffic management, a majority of the streets do not have proper paving and the hills up to Tonacliffe have a lot of problems with traffic and parking already, especially when there is a primary school on two of the roads.unless new access roads are added or the existing roads are considerably improves including traffic calming measures and possibly a one way system then you would sing be making the roads too congested and also very dangerous.		-
21	Jordan	Buckley	-		Object	Development on this land would cause a disruption in the community. - - increased traffic due to builders etc. - - increased traffic due to the number of houses proposed - - ruin perfect moorland, visible from a number of houses. - -		No
22	susan	mairs	-		Object	Object to any new building in whitworth especially on the moorlands, my concern is that the amount of more traffic, not enough schooling, wildlife conservation, and invasion of more eople in our village, lack of policing etc, more people will cause more problems.		Having lived in this village for over 40 years and love it, I am really concerned that it's going to be spoilt by excessive building of new homes. I think there are plenty of old properties to be purchased in the area.
23	Carole	Linley	-	Moorland Crescent,	Object	Whitworth village is already far far too busy and we live on Moorland Crescent, OL12 8SU and are surrounded by moorland which is full of nature and should not be disturbed		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
27	Michael	Chianca	-		Object	<p>HS2.102 - King Street - HS2.104 - Old Lane - HS2.108 - Sandbank Gardens - HS2.105 - Albert Street - HS2.107 Fern Isle Close - HS2.106 Moorland Cres - HS2.109 Horsefield Av - - All these proposed sited are unsuitable for the following reasons. 1. Wildlife - This greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest area at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. 2. Loss of Trees - The forest itself would have to be cut down a totally unnecessary action when we have other areas within Whitworth to build on that would not require the destruction of trees. 3. The local school at both dropping of and collection time around this area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. 4. A Culvert runs through the middle of the proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. 6. Local amenities such as Schools, Dentists, Doctors are already full and building more housing would have a negative affect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. 9. Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would endanger the lives of the residents living there especially the children. 10. Government policy is to protect greenbelt areas except for "Exceptional circumstances" can you explain what those exceptional circumstances are when we have other areas more suitable for building houses on. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental affect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - My house and others would be overlooked. 14. As the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including school children. 16. This area and the surrounding area has already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost.</p>

28	Karen	Ward	N/a		Object	<p>I object to the proposed planning for houses in my local area (Whitworth). The local infer-structure of Whitworth Village cannot possible take the volume of traffic these proposed houses will generate. The increased in cars commuting out/in especially at peaks times would cause a residential and commuting nightmare as there is one road in and one road out of Whitworth. Most houses proposed to be built are two to three bedroom family homes, and therefore in reality this could mean that each home will be a two car family. This will add to commuting time as more traffic is on the road (one road in and out of Whitworth). This means that more time travelling is cutting into precious work-life balance time with family and children. Also, the local surgeries/dentists are already full to capacity with appointments not being able to be given the same day or appointments not able to be given the same week, meaning residents have to wait in some cases one to two weeks to see a local GP. How many extra people wanting to sign on at Whitworth/Healey medical centre for medical attention which is over stretched as it is. Building in the area would only add to these already stretched services within the area. In view of this there is also the emergency services to consider and are these able to cope with demand? Has this been looked into in regards to emergency response times and that the nearest A&E is Oldham hospital? Some of the planned access roads are classed as un-adopted/private. These are not suitable for heavy or extra traffic and who will maintain these roads? Building more houses in the area would mean the current schools in the area would not be able to cope with demand. With the local schools already at near capacity and with no current plans in the proposal to build another local school this will only get worse. Since schools are no longer ring-fenced in regards to places/applications, there are many of the local children not getting into their local Whitworth school/nurse. By adding more houses within the Whitworth Valley this would add to the demand for school/nursery places. Local children (who currently live within the Valley) are having to travel outside of the Valley as places are being taken up from children outside the immediate area, therefore adding more houses in Whitworth would cause additional placement/schooling and nursery demands to mean the out local children's needs are not being met. Currently the need, sheer capacity and demand as it is falling short of residents needs without adding more houses to the area. More research and investment needs to be been done, looking at how many children locally are wanting nursery, school places in Whitworth as there are many parents struggling to place their children in a school near to the home/first choice for intake 2017. Traffic in the area is already at dangerous levels around Tonacliffe primary school in the mornings and afternoon and therefore adding houses and extra traffic to the streets that are not suitable for the extra capacity will increase the risk of accidents. The roads are narrow with resident's double parking on the side in which they live.</p>		Whitworth infer-structure can't take the amount of proposed housing that these plans show. I find it disgraceful that local residence and Whitworth council have not been consulted from the start.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
						Building houses on Green-belt will lead to the destruction of the local wildlife, flora and fauna. This needs to be considered in regards to building on land and this is the natural habitat for many birds, animals, insects and flowers. - - -		
32	Paula	McNinch	-		Object	There is not the infrastructure in Whitworth to cope with extra housing. The road in and out is already too busy, the schools are full and there are no facilities for young people.	-	
39	Claire	Butterworth	-		Object	There is no infrastructure to place extra houses in this location. Wildlife in the area bats, deer, foxes and badgers all reside in this area with there homes in these locations these will be destroyed. The roads are not wide enough to accommodate extra houses and are not maintained by the council (it has taken 3 years of complaints to resurface a road a few hundred yards in length) the grit bins do not get filled in the winter and the road turns to sheet ice with the water off the moor, this would worsen. the doctors have no space for extra patients nor does the school. Children out playing will become more vulnerable with extra traffic, as the countryside is there playground and you are removing this. Winter fetches flood water off the hills and with extra property this will put our houses st risk of flooding when water finds it's natural pathway flooding has increased in the area over the last couple of years as the council is already aware. One road in and one out this will cause traffic problems at peak times. You will be reducing the price of my property as I bought the property for its views and location, my views will be gone (am I going to compensated for this).		There are certain areas which would benefit from extra property but these locations are not the best option.
40	Jason	Butterworth	-		Object	1 traffic congestion problems already causing danger to children at school before said planning. 2 roads are very narrow already causing people to park on the paths. 3 land is very wet at all times with numerous streams throughout the land and would need large scale infrastructure to cure . 4 there is no infrastructure in place to accommodate e.g. Doctors schools already full. 5 traffic is already bad getting in or out of Whitworth due to one road in and would make a problem worse than already is. 6 there is a lot of wildlife in both areas badger sets bats deer which would be upsetting to all involved. 7 people use the land for walking,children play on the land taking it away would leave them with only streets to play on making them more vulnerable. 8 with flooding problems already in Whitworth would only make matter worse. 9 people bought houses at a price which reflected the area and would de value all properties being over looked by lots of houses. 10 the area would need large scale earth moving to accommodate these plans leaving the area having the feel of a valley taken away.		This would cause a lot of stress to the community and cause divisions throughout Whitworth.
46	Ian	Hills	-		Object	Increase in traffic pollution and the lack of new access to these sites		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
56	Valerie	McDonald	-		Object	<p>Whilst I recognise the need for further housing within the area, I am concerned about the siting of so many proposed dwellings in this particular valley. The roads are already clogged at rush hour and as there is only one road through, movement of traffic, should there be an accident or roadworks, becomes frustratingly unpredictable. What provision is there to maintain and develop the road system in the valley? - - Whitworth High School has become more popular over the past couple of years with waiting lists existing. What provision will be made to expand the school, and will this be done with a long term objective in mind and not just a sticking plaster effort to put up some portable classrooms? - - Local services such as the Children's Centre have just been lost. What plans may be afoot to reinstate such necessary provision? I feel it is morally wrong to simply build new houses and forget about the infrastructure to support this development. - - There is a wealth of wildlife on the moors where you are proposing to site many homes. Presumably there will be checks in place to ensure some of these species are not endangered? - - Finally, there are already plenty of properties on the market at very affordable prices (in comparison with some surrounding areas). Some of these have been on the market a while? Why, if there is already affordable housing, is there a need to build more? -</p>		-
98	Jacqueline	Butterworth	-		Object	<p>I am objecting to proposed development of all the above houses around the Whitworth area. The area is overrun with traffic as it us. One way in and one way out. The schools are overloaded as are the GP surgery. It is inconceivable to build more houses and allowing more traffic to use our roads which are in a terrible state. We are already experiencing burst water pipes and our water pressure has already been reduced. We are experiencing more power cuts since all the new houses have been built on Cowm Park Way . Surely there must be someone in the planning department with some common sense and will prevent any further building of houses in Whitworth</p>		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
131	Christine	Greenwood	-		Object	I am objecting to plans to allow the building of over £350 properties on various sites around Whitiworth and Shawforth over the next 15 years. - Not only am I concerned about the building on our greenbelt sites which is part of the attraction of the area. I can understand the wind farm and can support renewable energy sources but not the creation of a collection of housing estates - whether social/affordable or not . The awful collection in Britannia speaks for itself! We have already had several builds across Rossendale but the extra Council Tax revenue does not seem to have brought many benefits to the borough. - As it stands at present the infrastructure can just about support the current residents - schools are already over subscribed and getting an appointment at our one GP surgery is already a mammoth undertaking. Planning to build or reopen a school by any chance? - Traffic is already an issue with one road in and out and a bus service that has to be one of the most unreliable in the surrounding areas ! There are next to no facilities for young people/children and a library fighting to survive so I think that this needs to be given serious consideration before you go ahead.		-
153	G.N	Royds			Not Applicable	As I have indicated before, a prerequisite for a community is sustainable employment. A complete hash has been made by not providing this. Former mill sites have been used for housing, such as Orama Mill, Facit Mill, Albert Mill and the mill near Spodden Fold (which I think may have been called Old Kays). Most of these are easily accessible. Now Spring Mill is proposed for similar treatment! On the other hand, peripheral businesses have been allowed, e.g. tattoo parlours and tanning centres, which debase the human body; the type of potentially smelly fast food outlets that encourage unhealthy eating. Housing without local employment means commuting, causing traffic congestion and pollution. The kind of industry needed is that involved in green energy, recycling, sensible clothing and the production of healthy food. The former site of Spring Mill is a place where a sensitively designed industrial estate might be possible. It is already surrounded by trees and has foundations remaining but it is not on a regular public transport route and is less accessible than previously mentioned sites that have been precluded. It is absurd to think of building on HS2.102/103/106/109 and on that part of HS2.107 not formerly occupied by Spring Mill. These are large areas of countryside enjoyed at present as part of the natural environment. HS2.104 also appears to be countryside, with a few established houses, and also should be protected from further building. Cowm Water Treatment Works (HS2.108) is ideal for industrial development. Let us have local jobs and ensure adequate facilities are available before any more houses are built in Whitworth.		P.S. I did not make this response online because it was mandatory to provide an e-mail address. Please change this, so that more people are encouraged to respond. P.P.S. Please keep me informed of developments.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
155	Jo	Furtado			Object	<p>HS2.106 and 109 -those areas of land are d'etightful to walk on; they might be delightful to live on, if the houses are well built and well insulated BUT access to/from those houses, via Tonacliffe Way, would put real pressure on narrow"estate roads, particularly at school start and finish times. The two big issues are broader, however. 1. The numbers of houses proposed pose a real challenge/threat in terms of schools, health services and road infrastructure, as outlined above. The proximity of these sites to the southern end of the valley means they would almost certainly be occupied disproportionately by those who work in or beyond Rochdale, with obvious consequences for the A671 and its users. 2. These are two sizeable chunks of Green Belt, carefully shown as such on your own Green Belt Assessment document (which was available along with the DLP maps/document/Infrastructure Delivery document at the Library), though mysteriously appearing as Urban Area on the DLP map.</p> <p>Whitworth's Green Belt is mostly moorland, and there will be those who see moorland as worthless. But the moorland is a large part of what gives Whitworth the character its residents value: we should not be giving it up so easily. (The moorland surrounding is already disproportionately given up to wind turbines.) Let the government meet its housebuilding targets by throwing up estates in the Cotswolds, or the South Downs, or the Chilterns, or the South Hams. Perhaps we should redesignate our moorland a "Heritage Asset": in ENV2 you yourselves say that historic landscapes could be so designated. Oppose vigorously, in both cases.</p> <p>In SD2 the DLP states, "All new developments in the Borough will take place within the Urban Boundary defined in the Policies map ... " which begs the question, when, and by whose authority, did the parcels of land numbered HS2.106 and 109 transfer from Green Belt to Urban Land? The DLP goes on, " ... except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area." (My italics) Put bluntly, they don't, and they wouldn't. The spirit ofthe DLP is quite clear: it would be wrong to build houses on either of these two sites.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
195	Janet	King	-	HS.102, HS2.104-9 inclusive	Object	Whitworth' infrastructure cannot support almost 400 new properties - it is already nigh impossible to obtain a doctors appointment and my father has had to wait iver 6 months to obtain a podiatry appointment as there is only one who has been on long term sick and no replacement cover available. The fact that there is only one main arterial road into and out of Whitworth, which already has weekly road works delaying the already totally congested road does not bear thinking about. With an extra 400 properties and the increase in traffic that these will bring and as there is no large employer in the area most of these occupants will be commuting one way or another. We lost access to an A&E in Rochdale and now the nearest is either Fairfield or Oldham with the additional traffic these proposals would create the congested roads Could be catastrophic in an emergency. - - On a personal note, my family moved to Whitworth 12 years ago, from Oldham, due to its naturally beautiful countryside and I see the addition of these properties into areas of greenery (extending Wallbank estate etc.,) is the very short end of the stick. I can see that if these are accepted, encroaching on to green belt areas, slowly but surely the green belt areas will get smaller and smaller until eventually Whitworth just becomes another concrete plot with ever creaking infrastructure. - - Finally, I understand the need for affordable housing but there are plenty of mills/brown field that could be developed. However, I feel strongly that before any proposals are accepted it is of the utmost importance that the infrastructure is in place to support them, that includes roads, schools and NHS access.	-	
258	Fiona	Harrisson			Object	Whitworth is already a very busy village oversubscribed schools and GP Services with one road in and one road out. The pressure on the infrastructure would be immense, plus travelling to or from anywhere especially at peak times is already horrendous, nevermind with another approx 400 houses being built. Our skyline and beautiful views and countryside are also going to be lost.	-	
261	David	Eyes	-		Object	This is an unbelievable plan that will stretch amenities in the area even further. - - The new estate near Cowm has already increased traffic congestion on the one road in and out of the village and schools are already struggling to cope. - - There is also the issue of wildlife and the impact it will have on their environment. - - I for one will be leaving if this idiotic plan goes through. -		This smells of greed over common sense

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
268	Michaela	Radford	-		Object	Whitworth has had numerous instances recently regarding the roadworks for the infrastructure repair and maintenance. As an employee of all 4 major utility asset owners in the area, I am very concerned regarding the houses proposed. We only have one road throughout the valley and this is impacted severly when roadworks are planned. My concerns are that these are not managed correctly by LCC at present, therefore; more houses and more infrastructure would have a massive impact on the people living in the village. People face unemployment now due to the frequent issues we face getting into work. - Not to mention over crowded schools and doctors as we stand at present. - - I request, here in writing, to be informed of any planned meetings regarding the houses in whitworth and notification be sent in writing to my address above.		-
297	Lindsay	Fairhurst			Object	Poor access along the length of Main Rd (Market Street) one narrow road lined with parked cars , as only access into & out of whitworth. No alternative route. No trains or trams. Buses won't must travel on same one access road both in and out as cars. No motorway access under 20 min journey both ways insufficient work in area means people must travel to Manchester, leeds, bury, Rochdale etc. Current public transport unrealistic. Traffic at peak times currently gridlocked & congested. Increased housing will add to this burden. Utilities infrastructure unable to cope currently leading to repeated remedial roadworks. Schools full Doctors full Rossendale Council Lancashire Council needs to address transport & roadways access + education access beofer building homkes where people will be unable to travel to employment and school		highway safety compromised by insufficient access up tonacliffe road past primary school - children at risk also
298	Andrew	Fairhurst			Object	the number of houses proposed in this local plan for infrastructure can support. Whitworth has only one road in abd out and already this is constantly being dug up by utility companies often resulting in temporary traffic lights that cause massives queues of traffic in rush hours. Not only is the road narrow and conjested but there is no alternative train service - only the bus (on the same road) This is totall useless for the number of people wo commute to Manchester, Oldham and Bury every working day. Our schools, doctors and dentists are already close to capacity. There are very few options to travel to other facilities apart from along the one road through the valley.		Without robust and achievable plans to increase the support infrastructure for travel (a train for example) and health and education and culture this building should not go ahead. For people to afford these houses they need jobs first. Currently you need to move out of the valley to commute to work. Regeneration of the area and existing housing stock should come first.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
335	Venkatesh	Thoppae	-		Object	Currently, due to traffic I am already starting 30 minutes early to work, with the school run, I believe the roads towards Haslingden and Rochdale will be much congested for office goers if proposed plans are executed without proper plans to widen the roads and making new ways to connect to the various part of the main roads(motor way). - - Also the schools, GP services will be under much more strain if those are not equipped to address the increasing population.		-
405	Sheila	Sutcliffe	-		Object	Whitworth and in particular the area around Tonacliffe Primary School is already a very busy area with extreme access and parking problems. - - This area is already saturated with housing and there is no advantage to be gained by the proposal of increasing housing in the area. This would only increase the associated problems brought by a new housing development i.e. extra traffic, parking problems, school places, GP and dentist places. - - The traffic problems alone would be horrific, the proposal of building a further 120 new houses would bring 240 more vehicles to the area, bearing in mind that most houses have at least 2 vehicles. The proposed site in Tonacliffe has only one access road, Tonacliffe Way, which is already heavily congested as it includes the main entrance to a primary school. Police are continually requested to show a presence to deter traffic issues on Tonacliffe Way and residents already suffer terribly with obstruction problems outside their properties. - - Tonacliffe School is already up to capacity on the pupil roll number and is oversubscribed in some year groups. It would not be able to sustain the increase in school places that 120 new houses in the area would undoubtedly bring. Tonacliffe School also has no further space within the building to increase the number of classrooms.		I implore all counsellors to reconsider these proposals which would destroy a greenbelt area providing countryside on the doorstep of current residents and an Outstanding Ofsted primary school. - - The area provides a natural habitat for wildlife, I have personally enjoyed watching deer, falcons, and owls in the area. It provides a safe haven for children to play, families enjoy walks together and many, many dog owners exercise their pets on the hillside. - - - -
441	Sharon	Brown	-		Object	Tonacliffe is already congested. Water pipes have burst, the road is in a state of disrepair. - - In addition concerns on how the school would cope with 120 new families moving directly to that street. Plus the additional - - I have lived at Ainsdale for 12 months now and have had 3 power cuts already.		Whitworth Road couldn't cope with the extra through traffic.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
446	Paula	Todd	-		Object	Whitworth is a small community with only one main road to access it. I feel that if all these purposed houses are built the traffic congestion for commuting will be very difficult for the local residents. Other than the bus service residents have no alternative to drive to and from work. - - My children go to local Tonnacliffe school and the traffic and parking is extremely heavy and if more houses are built in that area the roads would not be able to cope. - - Flooding is a massive problem at present in Whitworth, united utilities are constantly out trying to fix problems, having more houses I believe would make the flooding worse. - - Whitworth is also known for its beauty, walks and wildlife and to purpose building on the greenbelt areas of Whitworth would cause a detrimental effect on this. - - Whitworth does not have access to a local A&E dept, Rochdale hospital only has a urgent care centre as does Burnley. Residents of Whitworth closes A&E is either Oldham or Blackburn. Having more residents in Whitworth with limited healthcare facility's could increase morbidity rate. Along side no local A&E we only have one GP practice in the area, having more residence would cause strain on their service, this also includes only one dental practice. - - Will there be enough places in the schools for all the new children to the area? The local high school is only small and as I believe was over subscribed this school year. - -		
464		Hough			Object	<p>We wish to express our opposition to the above proposal on the following grounds.</p> <p>(1) The infrastructure of Whitworth has already been stretched to its limits with the “new” builds over the last few years.</p> <p>(a) Schools are currently fully subscribed.</p> <p>(b) Community support (medical facilities and emergency services) struggle even at present to cope with increasing demands.</p> <p>(c) The geographical nature of Whitworth, one road both in and out of the borough currently presents severe rush hour congestion. The proposed “new builds” will undoubtedly result in more commuters which in turn would make the journey to and from people’s place of work take on “nightmare proportions”.</p> <p>(2) The open moorland and its footpaths and rights of way behind Tonacliffe are of benefit to the community and also home to wildlife deer, foxes, birds and badgers (is it illegal to destroy a badger set?)</p> <p>The open aspect and its benefits will be lost forever if this proposal is permitted to go ahead!</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
464		Hough			Object	<p>I wish to oppose to the above proposal on the following grounds:-</p> <ol style="list-style-type: none"> 1. Schools are oversubscribed at present 2. Roads are crowded at peak times. Any new housebuilding programme would make the situation intolerable. 3. It is difficult to get an appointment at the doctors at present more patients could only make the situation worse. 4. The moorland is boggy and whilst suitable for wildlife (deer, badgers) not suitable for housing. A culvert runs through the proposed Tonacliffe site which drains water. If the new build goes ahead there will be an increased risk of flooding. <p>If this proposed new building programme goes ahead I feel it goes against government policies on planning and greenbelt conservation.</p>		
509	Joanne	Robinson	-	HS2.106 & HS2.109	Object	<p>The changing of usage of these 2 areas from greenbelt so you can use them to build 120 houses is totally unacceptable. To begin with more houses in Whitworth itself is going to create more problems on our main road which is already so busy as it is one main road in & out of the village. Any roadworks that occurs (which are frequently) because of water mains constantly bursting due to overuse & other utilities constantly having to upgrade because of new houses already being built. The back up of traffic is appalling. We also need to think about ruining the natural beauty of the area, the wildlife that will be disturbed, we have 2 ponds in these areas also. Already when we get a lot of rain we have flooding in our gardens. Your plan is proposing to use our street as one of the access roads again this would be a nightmare as the amount of cars on all the streets over Tonnacliffe would make the congestion unbearable. We have a primary school at the bottom which at school time again congestion of cars ridiculous. What about local amenities schools, doctors, dentists will they be able to take the influx of more people?</p>		
510	Philip andrew	Robinson	-	HS2.106 & HS2.109	Object	<p>I am not happy with your proposal to change these 2 areas from greenbelt so you can build 120 houses on them. The area has an abundance of wildlife, 2 ponds and would be a great loss to our community. Taking this piece of greenbelt would ruin our beautiful landscape. The problems with congestion on our main road through the village is getting worse as of new houses already being built and the constant digging up of our roads by the utility department to try and fix problems that are constantly occurring. The state of our main roads and roads around Tonnacliffe are appallingly and will only get worse with more cars. The access to these sites coming off our street and others on Tonnacliffe would be a nightmare because again with the number of cars at the houses already there. When the school is open again the congestion is ridiculous. We also have trouble with flooding after a lot of rain in our gardens coming off the moors so again more houses would not be helping that.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
544	Lois	Lees	-		Object	HS2.106 - The access to the proposed site on Tonacliffe is one road in and out. There are already traffic issues and congestion getting up and down Tonacliffe, and in and out of the village. - The current road surfaces are poor and damaged. - The schools		Whitworth is a lovely village which is just managing to deal with the number of cars, houses and people that exist here. - There is already damage to the roads and water supply. Adding extra housing and more people will only cause more issues with the roa
590		Ashworth			Object	Absolutely ridiculous One way in and out of whitworth no extra schools or doctors when you have two or three cars per household. This is ruining our villages. We strongly object to this. Listen to the people who vote you in, as we have long memories		
627	alan	lord		HS2.109 and HS2.106	Object	Whitworth as a whole is an over developed village, the schools do not have enough places the doctors and dentist are full but more importantly the village is chock a block with traffic. There is one road in and one road out and traffic is a night mare for local people. On Tonacliffe we have badgers, deer, rabbits, foxes and newts just to name a few animals, what happens to these animals where do they go I am not sure they understand the prospect of new houses being built and having to find a new habitat. TRaffic at Tonacliffe school in the mornings and evenings is awful, I came home at 3.30pm on Friday to look for myself I do not know how there are not more accidents or children hurt or injured we just cannot cope with any more people or vehicles in this village		I suggest the planning officer actually visits the area he is planning to decimate and see for himself the beauty of the place and how much he would be ruining. At evenings and weekends the moors off Tonacliffe are full of mountain bikers, walkers and people just enjoying the fresh air which he wants to take away. No doubt the planners will return to their ivory towers and enjoy peace and quiet in their villages why does Whitworth have to have more houses we have more than enough for local people. I havent even touched on emergency vehicles who struggle to get through due to parking on narrow roads that are already full For once councillors think about your actions and decisions and see which people and animals this will affect Greenbelt should stay that protected

717	Joanne	Banks	-		Object	Tonacliffe Way and Tonacliffe Road cannot cope with the additional traffic. The drains on Tonacliffe Road are regularly bursting, they will not be able to cope with an additional 110 houses. - - Whenever there are traffic lights the main road, Whitworth grounds to a halt, as highlighted with the recent traffic lights at Healey Corner. People take short cuts along Tonacliffe Road, which will only get worse if more houses are built in the area. - - Has consideration been made to determine if our amenities can cope with extra housing in Whitworth? Will there be enough school places for our children?		I believe Rossendale Council should think really hard about further developments in Whitworth. The local amenities are already overstretched with only 4 primary schools, 1 high school and 1 GP surgery.
743			Whitworth Town Council		Object	HS2.106 Land to the east of Tonacliffe School HS2.109 Site off Horsefield Avenue, Tonacliffe Council have strong concerns about removing this land from greenbelt and feel that brownfield sites should be prioritised over greenbelt. Developing this area would have an adverse impact on the diversity of nature and wildlife in this area. Additionally, there is a pylon and electricity cables located in the site off Horsefield Avenue which has not been identified on the plan. These areas have formed part of previous greenbelt reviews and the studies have recommended that these areas remain in greenbelt.		
773	Susan	Worrall	-		Object	Whitworth is a village, a small community. Building these housing developments will change Whitworth into a town. - There is not the infrastructure to support this additional housing. There is one road in and out of Whitworth which is already struggling to cope with the increasing volume of traffic. Especially at peak times. If there are any traffic disruptions it can take 1-2 hours to get to Rochdale . We do not need more cars and the pollution they bring! - - There are limited school places both secondary and primary and local children born in the village will struggle to get places. - The one and only GP practice can not manage to provide the necessary health care for patients with no appointments pre bookable for weeks in advance. This healthcare will be diluted further. Living in Whitworth if A&E treatment is required which is often a life or death situation your chances of survival are reduced add more traffic on market street and your chance of survival diminishes further - - The people who live in Whitworth , live here because it is a village , it is quiet and the countryside is on the door step. Yet the plans want to destroy the village life, increase demands on existing services and increase pollution - - To consider building on greenbelt land in Whitworth is unbelievable and irresponsible, Planning has already - spoil the view of the countryside at the side of Daneswood ave and the wind farms are also affecting the views and countryside. - - Whitworth has lots of wildlife from deer, owls, herons, wild ponies as well as lots of insect life butterflies, bees etc which will all be at risk if the countryside is used for housing. - - There is empty housing all over the borough - fill these , not build more especially in our little village -

793	Victoria	Roberts	-		Object	<p>1 My children attend this school that is current over subscribed as its not just whitworth children loads are from Rochdale taking spaces. the school is unable to be extended ie additional buildings. so to add more house with families would cause issues with people getting to school of choice/local on door step. - 2 Parking is currently as issues plus the narrow streets makes it hard now to park to add more houses would make it horrendous and I feel would to add the amount would put strain on the current roads but also make it unsafe for children esp the ones that walk to school so it would make it dangerous to increased volume - 3when the roads have congestion over tonaccliffe is used as a short causing issues of safety esp when schools is open. The situation has been ongoing for years and trying to find a solution but has been unsuccessful so far - 4 wildlife in that area will be affected there homes will lose there habit, trees cut down are they going to be replaced? some trees are fully grown and been there hundreds of years. are the endangered specie going to be taken in to consideration - 5 children use that access to walk over the moors on trips to the local church. will this mean that children can no longer do this as it will be unsafe taking a large amount of children on an educational trip. this could become a cost to the parents school etc so the trips could be lost so a child loses the incite to local church - 6 one of the roads that will be used is okenshaw and this road has that many holes inis in great need of resurfacing but there is no money in the pot. so more volume of traffic is only going to make it worse. and lcc Idea is to fill in holes wasting money this has been done many times. - 7 the facilities to get to the houses gas eclectic etc. is going to cause great disruption on the people in the area also parents picking dropping up. the extent of the issue around parking etc needs to be taken in to consideration. as the safety of my children is paramount and would be deeply upset if any harm cam to them through to a judgement that causes more harm than good. - 8 is the school going to lose out door space? they should be safe in there environment and the freedom to roam but if house are to be built then they will be confined in a smaller space in a small outdoor playground. -</p>		<p>whitworth facit Is a small village that current cant take any more traffic and homes . it one in and out and god forbid if traffic lights or bad weather journies increase by 1hrs just to get in and out of whitworth. animals will be loosing homes to make way for more homes. roads unsuitable and more holes then anything -</p>
796	Steven	Smith	Wagg		Object	<p>Already an overcrowded infastucture..object to greenbelt land being used and local wildlife being destroyed.the proposed site on horsefield av site would be built under or very near electricity pylons.the roads or already overused to and from whitworth so more traffic will mean longer delays on worse roads.the schools and doctors are already full..more traffic passing tonaccliffe primary school would endanger the pupils at school opening and closing.previous mining at tonacclffe makes the proposed site unsuitable for building on.the transportation of heavy plant will damage the roads.</p>		<p>Don't use greenbelt land and build somewhere else.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
797	Louise	Madden	-		Object	<p>1. The roads around Moorland Crescent are already extremely busy at school times, parking is a increasingly growing concern and the impact of more traffic around this are is quite worrying. My son attends this school and I see first hand how dangerous the current situation is without adding more traffic to the mix. - 2. I live on Market St which is the main thoroughfare from Rochdale to Bacup. We are often gridlocked (especially when there are road closures / traffic lights in the area). As an example, myself and my son often 'play a game' about how many cars pass us before we can pull out into traffic. Our record is 122 cars without a break in traffic. This road was never intended to take this level of traffic, what impact would this have on the already poor level of public transport. - 3. The proposed site is on greenbelt land, which the government is supposedly protecting. What would happen to the wildlife currently in this area, not only during the building process but also the higher level of pollution around this area. - 4. Amenities are already stretched, almost every month there are some works being done to water, electric, gas etc. would further impact these services. Tonacliffe Road has been dug up every winter for the last few years due to burst pipes, this situation won't improve with increased usage and traffic. - 5. The forest at Tonacliffe would have to be cut down, a totally unnecessary action once again having a negative impact on the environment. How greatly would this impact for carbon footprint of the valley,.</p>		<p>There are several proposed housing sites in Whitworth, and in general I object to them all. This is due to the infrastructure of the valley already at breaking point. - Due to only one road in / one road out, Market St is often gridlocked at peak times. 4 years ago, there was a bad accident outside our house. Due to this, the road was closed for 3 hours, this meant a diversion, either back through Bacup through Littleborough or through Rawtenstall / Bury. Increased traffic through the whole valley is just putting further pressure on the valley. - We often have temporary traffic lights on this main road, as our current facilities (water / gas / electric etc) struggle to cope with demand. Have this services been contacted, are any plans to improve their facilities - again this will lead to further problems already highlighted. - Our doctors / dentists are already fully loaded (I know this through hearsay as I am a patient at surgeries in Rochdale). I often hear complaints about the amount of time it takes to see a doctor. - - I feel that major improvements need to be made to the current infrastructure in Whitworth to cope with the current population, adding to this is just putting so much pressure on an already failing situation.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
803	Marietta	Galbraith	-		Object	<p>My objections for the proposed building of housing on the above sites is based on a number of reasons: - 1. Infrastructure. The current housing situation is already at (possibly beyond) capacity with regards to schools, doctor's surgeries, dentists, employment and traffic. There are no more schools planned and no way to expand the ones already here. Some children have to travel miles to schools out of the area due to oversubscribed local schools. This is the same for doctor's surgeries and many other amenities. - 2. Traffic. There is one main road in and out of Whitworth that already has issues with raised levels of traffic. In the four years we have lived here, there have been many occasions where traffic has been an issue due to constant roadworks (for various reasons relating to increased housing and traffic) which has caused major problems. Also, most people are employed outside of Whitworth so traffic is high anyway. More housing would increase this issue with no solution being given as to how it could be rectified. - 3. Utilities. More and more power cuts have been happening recently in Whitworth due to new housing as well as burst water pipes and problems with drainage. This has contributed to the traffic issues with roads having to be dug up every few weeks to 'fix' the problem. - 4. More housing would mean taking up land that is natural drainage for flooding. Recently, my area was put into the 'flood risk' category (although we haven't flooded), significantly increasing my home insurance. If more homes are built, this would increase risk of flooding to many homes around Whitworth, which would cause loss of market value and would reduce the chances of being able to sell the property. - 5. Much of the 'green land' would be lost which is detrimental to the wildlife around Whitworth. The Government have a duty to protect greenbelt land and our environment! The carbon footprint would be horrific! - In conclusion, building over 300 houses in Whitworth would cause issues beyond repair! Environment, traffic, pollution, infrastructure, drainage etc. would all be dramatically affected in the most negative and damaging way. Whitworth was not meant for so much housing and so many people.</p>		-

852	Christine	O'Malley	-		Object	<p>I strongly object to the proposed housing sites 'to the land east of Tonacliffe School' 68 houses and 'site off Horsefield Avenue, Tonacliffe' 52 houses. I live at number one Tonacliffe Way and I have a birds eye view of how congested the traffic is on Tonacliffe Way and Tonacliffe Road. This is especially serious when in the mornings, afternoons and evenings when the school is open. Cars park on the pavement forcing pedestrians including those with prams and young children into the road and oncoming traffic. When the cars park on either side of the road only one car can pass up the road at once causing congestion, chaos and a very dangerous situation. Rossendale Council recognised this a couple of years ago by adding double yellow lines on both sides of the road. This hasn't reduced the traffic risk as drivers ignore the restrictions and park on the lines every day. Occasionally the local enforcement officer drives round and gives parking tickets but it's not often enough to put off drivers parking wherever they want on the restricted areas. If the proposed 120 new houses are approved in the Tonacliffe area then this situation will be magnified and put the children and parents lives in more risk of an accident. - Outside of school times there are many drivers who do not abide to the 20 mile an hour speed restriction and as far as I'm aware no-one has been fined for going over this speed limit. - There is also the problem of accommodating the new children that these houses would bring into local schools. All the schools in this area are over subscribed and could mean children having to travel a long way from home to attend a primary school. This would then increase the traffic in and out of Whitworth. The infrastructure can only just accommodate the current traffic flow if all the local housing plans are approved then the main road in and out of Whitworth would grind to a halt including the emergency services that would not be able to pass through. - The local GP practices can't expand any further and new developments would increase the demand for accessing gp services. Many residents would then be put off trying to access the local health services and would potentially increase the risk of early intervention of health conditions in local residents and increase pressure and spend on hospital services and specialist care in local Health Authorities. - Other potential health problems would increase by building on green belt land by not allowing residents to enjoy the beautiful land that surrounds Tonacliffe. Walking has been proven by many health professionals as having a positive impact on our health and reducing the access to this land would discourage many residents of doing this cost free exercise. - On the many walks I have done on this green belt land around Tonacliffe I have seen lots of different wildlife including badgers, deer, rabbits and squirrels. Building the 120 new homes on this green belt will inevitably destroy the habitat for these animals. - During the last few years heavy rain fallen and has seen many houses flooded in this area. We are especially vulnerable at Tonacliffe as we are at the mid point on a hill side. The</p>	-

						moorland that is proposed for housing developments is currently soaking up a lot of the rain. If this land is developed on then this flood barrier will be removed and houses all over Tonacliffe will be susceptible to flooding.		
866	Robert	Atkinson	-		Object	I strongly oppose the proposed plan to build additional houses on the Greenfield site Horsefield Avenue. •The proposed build will overlook my property and as such will result in a loss of privacy. •Access to the the proposed development is restricted and increased traffic levels would cause unacceptable noise and congestion. •Unacceptable over development of the site. •Open aspect views of the countryside would be lost adversely affecting the residential amenity of neighbouring owners. •Generally the schools, medical centres, roads (namely Tonacliffe Road and Tonacliffe Way) and other amenities and infrastructure in Whitworth are unable to support further development. •Previous applications have been refused		No
873	Terence	Burke	N/A	HS2.106 HS2.109	Object	This location is heavily congested with traffic and can be extremely dangerous with speeding traffic. The Council have been helpful in a limited way with educational signs but the police have not shown much interest with speeding or illegal parking in the whitworth area. - There have been a number of accidents (some serious) and tonacliffe Rd is particularly hazardous because vehicles meet head on round a blind bend. - - The Idea that Whitworth will benefit commercially from development is illogical because of poor network links; at certain times it can take half an hour to reach Rochdale and longer to access the motorway, on days with roadworks it is considerably longer. - - Subsidence is also an issue. There are many mine shafts all around this area; there is one mine shaft at the top of High Peak Rd that has been capped with concrete. All the cottages on High Peak were miners cabins many years ago; my bungalow still has the cabin in the walls and roof space. - - The schools in Whitworth are already stretched with some local children having to travel out off the area. - - The local wildlife will suffer like the newts in the pond and the badgers and foxes in the area, although I don't think developers care much about wildlife, or about the local residents either. - If the proposed housing is to be built like the small houses leading up to Whitworth cemetery which looks like a prison block then the village is going down hill fast. Any development should be sympathetic to its local surroundings with both design and the existing social environment blending together.		-
886	Michael	Banham	-	HS2.102 to HS2.109	Object	The infrastructure of whitworth is over stretched as it is, the school's cannot cater for such an undertaking. There's only one road in or out of whitworth any problems on this road causes absolute mayhem. The winter months are an absolute nightmare just to get onto market street.		I cannot understand why anyone would want to over populate an area that is already struggling.

890	Debbie	Stewart	-		Object	<p>1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. - 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. - 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. - 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? - 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. - 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. - 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. - 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. - 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. - 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. - 12. What would the impact be on the carbon footprint of the valley ? - 13. Loss of privacy - Would my house and others be overlooked. - 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. - 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. - 16. Some of the areas and the surrounding areas have already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. - 17. A public footpath (Right of way) could be lost. - 18. Local drainage cannot cope with the usage now would more</p>		no

899	Julie	Bywater	N/a	HS2.106 & HS2.109	Object	<p>The Tonacliffe area cannot take any more traffic. Tonacliffe way and Tonacliffe rd are dangerously congested especially at School times and the roads are full of pot holes due to the excess traffic. Additional traffic could be fatal to a child including my own. - Both of these proposed areas have local wildlife including deer, badgers, foxes, hares, bats and newts. A family of deer is seen on a daily basis grazing on the moorland crescent site which is a wonderful site for residents and children to see these in their natural habitat. Building here will mean the loss of all this wildlife and their natural habitat. - In addition as a resident that backs onto this land I can confirm that the land including my own back garden is flooded all year round. We have had drainage laid in our garden but this has not stopped the flooding and our garden is unusable all year round. Additional houses will mean less natural drainage and will cause a severe and dangerous flooding risk to all residents. There is a culvert that runs through the land which is always running water away from the houses however this is at bursting point every time there is even a bit of rain. - We are regularly experiencing power cuts and burst water pipes impacting on this area. This causes roads to be dug up meaning horrendous tailbacks of traffic through Whitworth as far as shawforth. More houses will mean more frequent utility issues and therefore longer tailbacks due to the increase in population. The traffic is gridlocked down market st and Whitworth rd everyday! This small village simply cannot take any additional traffic, existing residents lives are already miserable enough sitting in this rush hour traffic everyday!! - The schools and GP surgeries are oversubscribed, will there be new schools and GP surgeries built? The existing ones cannot take the amount of residents as it is. - Finally, my husband and I purchased our house in 2010 due to the corner plot location. We wanted our children to grow up surrounded by nature and knew this was greenbelt land when we bought it. Greenbelt land used to mean something and was protected for a reason, we feel incredibly sad that it is even being considered to change the usage of this beautiful and natural landscape. From a financial point of view, if these houses go ahead the value of our house will decrease effectively putting us into negative equity. This will leave us unable to move to another area impacting on our children's upbringing significantly. If we had wanted to raise our children in the middle of a large housing estate we would have bought a house in one. The Human Rights Act, protocol 2, Article 1 states that 'a person has the right to peaceful enjoyment of all their possessions, which includes the home and other land'. -</p>		Please please rethink these plans, there are better and more appropriate areas to build than this saturated village.

911	Julie	Latham	-		Object	In principle I don't object to more houses or people. However I will until I am convinced that the planners are committed to the infrastructure improvements required to support the extra influx of people and cars . - The main bottlenecks caused by Whitworth traffic happen in the Rochdale Borough at the bottom of Whitworth Road and on Shawclough Road. These areas are controlled by Rochdale Council who are under no obligation to improve traffic flow to improve the lives of the people of Whitworth. There are changes could be made in these areas which would help greatly. Unless Rossendale Planners can work with Rochdale Planners to create new roads and implement better traffic flow measures the extra cars generated by this and other proposed housing projects in Whitworth will mean journey times to get to Rochdale, Manchester and the M62 Motorway network at f peak times will be so long that people who commute this way to work will have to give up their jobs or move away from the village. I really don't think that this issue is being taken on board by either Borough. - The medical centre is also over-subscribed and I believe that the schools are too. I appeal to the planners to find funds and solutions to these concerns before adding more pressure.		-
912	Amanda	Greenwood	-	HS2.106 and HS2.109	Object	Whitworth is a beautiful and unspoilt village. It has a fantastic community and is supported by one local secondary school and three Primary schools. There is one road in and out; and traffic is usually busy. I live in the Tonacliffe part of Whitworth and with school runs and work commutes etc, we already see enough traffic. The various proposals for housing developments in the area are ludicrous. They are proposing building a further 359 houses that will cause more problems with already oversubscribed schools, more local traffic, more pressure on already stretched services such as doctors and not forgetting what this will do to a stunning area of natural beauty.		No.

913	Michelle	Ashcroft	-	HS2.102, HS2.105, HS2.104, HS2.106, HS2.107, HS2.108 & HS2.109	Object	Whitworth is a geographical challenge at the best of times, positioned in a valley, consisting of ONE main road with multiple roads stemming from this leading to many properties that are built on the hillside. There are many green areas which are used by local farmers for their livestock. During times of heavy rain many of the roads are flooded, and during winter many roads are very dangerous in the snow. It is not uncommon for Whitworth to be gridlocked as there are far too many cars on the roads, all it needs is one set of road works and the town becomes inaccessible. The local schools are now over subscribed, the High school has had to turn away many children who only live a couple of miles away. The primary schools are also subscribed making it very difficult for teachers to provide a good education to the children. The local doctors are unable to cope with the number of patients, trying to get a same day appointment is nigh on impossible these days. We have issues with anti social behaviour due to lack of amenities available for teenagers, the local youth club has been closed down. There is a lack of police presence (the PSCO tries her best), people don't feel as safe as they should. The library is still under threat of closure, the pool is only open because of the people of Whitworth who run it. Building more houses brings more people, more cars, more strain on the infrastructure. I appreciate housing is needed but the number of houses that has been suggested will bring this town to it's knees.		I would suggest you come to Whitworth during the morning school run and see how difficult it is around Horsefield Avenue. Come sit in the traffic jams during rush hour. - - The government has spoken about creating new towns, this is a great idea, there are places that can accommodate thousands and thousands of houses. Build there not here!!!
916	Jane	Trudgeon	-	HS2.102 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	We are already an overstretched village infrastructure, the roads would not cope with an extra amount of traffic and would make the already difficult commute to exit/enter the village impossible. There are not enough schools nor would the doctor's surgery be able to cope as even now it is almost impossible to get a reasonable appointment time, - - The housing developments would impact on wildlife		-
918	Marion	Ashworth	-	HS2.107 , ALL.	Object	I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth. 922	Susan	Percy	-	HS.2107 HS2.106 HS2.109	Object	I wish to object to the proposed building developments on the grounds that there is one route into and out of this village which is Market Street. This route is already very congested during morning and evening rush hour and also due to school runs at other times of the day. This is compounded by the many times that the roads are being dug up for roadworks and temporary traffic lights in situ. - - Increased traffic would be an issue for children that play in these areas. - - Schools are also over subscribed in this area and additional parking outside schools would make a bad situation even worse and dangerous. - - Doctors surgeries and Dentists are also full and additional patients would mean longer waiting times to get appointments and would be detrimental for the health and well being of local people. - - Building on green belt would result in loss of wildlife e.g newts, badgers, foxes and hares. Deer use shelter within these areas and it would be detrimental to them if they lost this facility. - - Drainage is a major issue - loss of more greenbelt would make this worse as we already have problems. There is a culvert runs through the middle of Tonacliffe which takes land drain water off the moors this is already near bursting point and we could be in danger of severe flooding. - - Has a land survey been undertaken? Some of these sites would be unsuitable for building on.	-	
935	Christine	Fallon		HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	1 Whitworth has one main road which is often gridlocked the smaller access roads are grossly unsuitable e.g Tonacliffe. - 2 Schools are already oversubscribed parking at drop off times would be more chaotic and dangerous. - 3 Doctors and dentists are already at capacity. - 4 Services of gas electricity and water would require major upgrade. - 5 We are seeing flooding due to inadequate drainage this would be increased. - 6 Is this acceptable use of greenbelt land where previous planning permission has been refused the effect on wildlife and trees would be immense.	-	
939	Geoffrey	Fallon	-	HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	Whitworth is a small village with one already inadequate road. Doctors dentists and schools are already oversubscribed parking in school areas is dangerous already and would be far worse. - Gas electricity and water services would need major upgrade. - This is inappropriate use of greenbelt land causing damage to wildlife and the environment drainage is a major problem now with frequent flooding.	-	
944	N/A	N/A	Britannia Hotels Limited		Support	Allocation of land to the east of Tonacliffe School, Whitworth for housing development is welcomed and supported by the landowner. This support relates to Local Plan site reference HS2.106.	No

955	Janet	Whitehead	-		Object	Whitworth is already a very busy village, oversubscribed schools and Doctors - We have one road in and one road out which is almost impossible during peak times in the morning - The houses already exceed the heights up the sides of the valley - Our green belt is very important to wildlife and the the people the live here - If we let one builder onto greenbelt it opens the doors to far too many others - Our population is big enough and we cannot accommodate many more		- Our Councillors are voted in by us and now need to stand up and fight for us - - 400 houses is a ridiculous amount of new houses for a tiny village - - We have had 2 different sites where new houses have been built in recent years we've done our bit for Government figures - - Please find somewhere else
962	Kathryn	Gill	-	HS2.102, HS2.105, HS2104, HS2106, HS2107, HS2108, HS2109	Object	I object to any changes in use of local greenbelt land to build houses. Also, there is only one road through Whitworth and it is already congested. We have only 1 doctors surgery, and not enough school places to accommodate hundreds of additional families. Greenbelt land cannot be restored once built on, and these proposals would change the landscape of Whitworth. I am also concerned about the building of 20 properties around Cowm. This is a resource continually used for recreation by the people of Whitworth and should be preserved.		
979	Marie	Pye	-		Object	All of these developments will contribute to already existing traffic problems as there is one road in and one road out of the area. The high school is already oversubscribed with local children not being offered places.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
992	Susan	Farrell		HS2: 102, 104, 105, 106, 107, 108, 109	Object	I strongly object to the building of houses on all the above mentioned sites for the following reasons: - Greenbelt land is of importance to all the wildlife of Whitworth and Shawforth . Deer and bats live in the forests in the area. Many badgers and foxes inhabit the countryside and rare species of wildlife live in the ponds. - The forest area at Tonacliffe would be cut down having a negative impact on the environment. - Tonacliffe road is already dangerous for children with cars parked along the length of the road at school dropping off and picking up time. The increased number of cars if more houses were built in the area would be worse for the children and residents. - Local amenities such as dentists and GPs could not cope with the increased population. It is almost impossible at the moment to get a GP appointment in less than two weeks. More housing would have a detrimental effect on the residents of Whitworth and Shawforth. - Facilities such as water, gas and electricity are already stretched and a major upgrade of the infrastructure would be required to support increased housing. - Local drainage cannot cope with the current usage. More housing could have an impact on flooding. - Public footpaths could be lost reducing the number of rights of way for walkers. - The road network both ways from Rochdale to Bacup is already gridlocked. More housing would put an increased strain on traffic and the already poor public transport in the area. - The only high school in the area is already oversubscribed. With increased housing parents may have even less chance of a first choice school for their children. They may have to travel miles to school. - I understood it is government policy to protect Greenbelt land except for 'Exceptional Circumstances'. What are the exceptional circumstances that enable housing to be built on the greenbelt land in Whitworth and Shawforth?		Summary - - Whitworth and Shawforth are already busy villages with oversubscribed schools and GP services with one road in and out between Rochdale and Bacup. - - Can we accommodate more housing that will put pressure on already overstretched amenities, increase traffic and change the beautiful landscape forever?
1000	carol	Thomson	-		Object	I object to the amount of houses that will be built affecting the countryside. Are there any more schools being built to accommodate?		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1025	Warren	Madden	-		Object	<p>1. The roads around Horsefield Ave are already extremely busy at school times, parking is a increasingly growing concern and the impact of more traffic around this are is quite worrying. My son attends this school and I see first hand how dangerous the current situation is without adding more traffic to the mix. - 2. I live on Market St which is the main thoroughfare from Rochdale to Bacup. We are often gridlocked (especially when there are road closures / traffic lights in the area). This road was never intended to take this level of traffic, what impact would this have on the already poor level of public transport. - 3. The proposed site is on greenbelt land, which the government is supposedly protecting. What would happen to the wildlife currently in this area, not only during the building process but also the higher level of pollution around this area. - 4. Amenities are already stretched, almost every month there are some works being done to water, electric, gas etc. would further impact these services. Tonacliffe Road has been dug up every winter for the last few years due to burst pipes, this situation won't improve with increased usage and traffic. -</p>		<p>There are several proposed housing sites in Whitworth, and in general I object to them all. This is due to the infrastructure of the valley already at breaking point. - Due to only one road in / one road out, Market St is often gridlocked at peak times. 4 years ago, there was a bad accident outside our house. Due to this, the road was closed for 3 hours, this meant a diversion, either back through Bacup through Littleborough or through Rawtenstall / Bury. Increased traffic through the whole valley is just putting further pressure on the valley. - We often have temporary traffic lights on this main road, as our current facilities (water / gas / electric etc) struggle to cope with demand. Have this services been contacted, are any plans to improve their facilities - again this will lead to further problems already highlighted. - Our doctors / dentists are already fully loaded (I know this through hearsay as I am a patient at surgeries in Rochdale). I often hear complaints about the amount of time it takes to see a doctor. - - I feel that major improvements need to be made to the current infrastructure in Whitworth to cope with the current population, adding to this is just putting so much pressure on an already failing situation. -</p>

1109	Jane	Gadsby	-		Object	<p>I wholly object to more housing being built in Whitworth!! We are a small(ish) village that can not cope already with the amount of new houses and people moving into it!! Our schools are already over subscribed; they are turning people away that don't live overly far away that a few years ago would have had no problem getting a place. The Doctors surgery can't cope with the number of patients wanting appointments. You are also increasing the risks of flooding. My house is already at risk and has already flooded twice. The main road (one road in and out) is gridlocked most mornings with commuters trying to get out of the village but most of all you are taking our beautiful green areas that Whitworth is so lucky and honoured to have. We have lots of empty properties that can't be filled already!! Please leave us and our village alone!!</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1118	Gary	Calderbank	-		Object	<p>There are a great number of reasons why Whitworth township should not be blighted with further development, particularly on land which has been designated as green belt for a large number of years. I wish to summarise these as below.</p> <ul style="list-style-type: none"> - - Traffic - Whitworth is served by one road from both the north and south and is a major arterial route to people accessing the m62 and surrounding towns from the valley, Burnley and beyond. It is therefore very busy all of the time without even considering the effect of increasing local traffic even further. This route is regularly disrupted as a result of failing infrastructure resulting in severe delays and tailbacks. - - Schools - The existing schools in the town are already over subscribed and there is no capacity for further children without again significant development of schools. The road where I live is already gridlocked by vehicles dropping off children twice a day, illegally parked and causing obstructions. In relation to developments at Tonacliffe and Horsefield the thought of construction traffic too would be completely unmanageable and dangerous. Further development would exacerbate the problem. - - Policing - Whitworth already suffers from insufficient community policing resulting in many issues which do not get resolved, from burglary to bad behaviour and fly tipping. The town can not afford a further increase of population on this scale bringing with it its percentage of problems. - - Planning Policy - Brown Field Sites - Whitworth and the valley in general is a town built on industrial heritage and just like other cities should be primarily developing brownfield developments not green belt. There are many derelict spaces which can be developed to improve the area whilst providing suitable additional housing. There is no real justification for building on moorland in lieu of this. - - Construction Difficulties - Much of Whitworth moorland is unsuitable to build on, primarily due to poor access to the developments earmarked, mine shafts, poorly drained ground, sloping sites, poor infrastructure, marshland and biodiversity issues. - - Biodiversity - The land surrounding Whitworth is a haven for many wild animals which can be seen on a daily basis. From our house we can regularly observe, a family of foxes, badgers, deer, birds of prey, pipistrelle bats, cows, horses and sheep. This is a gift without price. - - Infrastructure - We regularly have power cuts, water bursts and the A671 is constantly being dug up as existing services are updated resulting in major delays. The drains in our road are currently running 24/7 as a result of water run off off the moors even when it has not rained for a number of days. When it does rain the water backs up out of the covers as the drains are undersize and cannot cope. This would be totally unsuitable for further development, especially considering a greater amount of hard surfacing. 	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1127	William	Calderbank	Tonacliffe Resident	HS2.109 & HS2.106	Object	I understand that for some people in this day and age, the natural beauty of the countryside may not seem important or significant in perspective to more immediate problems. I have lived in Whitworth my whole life and have spent almost 22 years surrounded by the wonders of the open fields, hills, and moors. I may be a "Millennial" but that does not mean that I can not appreciate more than just technology, growing up the moors behind Tonacliffe was my playground, where my siblings, friends, neighbour children and I would all play using nothing but our imaginations and the local natural environment for entertainment. However, I am no longer a child but an adult who has learned to appreciate the peaceful and pleasing aesthetic of the natural land for what it is. For 3 years I lived away from home and attended Nottingham Trent University and had to endure living in the cramped hustle and bustle of the inner city, fast-paced, noisy and dismally grey in comparison to my life back home and the tranquil green of the countryside. - - Whilst studying at university my family got a dog named Todd, He is a young "Staffy" (which if you know dogs, are one of the most athletic and playful breeds). For nearly 3 years he also has had the privilege of being raised with the moorland behind Tonacliffe as his playground. The moors offer him long leisurely local walks from Brown Wardle Hill, Healey Stones and Healey Fisheries, a safe place to play and explore (to satisfy his inquisitive nature). He may be a dog, yet the destruction of this land not only affects people but the pets of locals. - - It seems to be quite incomprehensible to understand that with all the fuss the last few years over recycling and saving the planet that you blatantly wish to outright destroy the natural environment, destroying the habitats of hundreds of multiple species of plants, insects and animals in order to create more houses in an already overpopulated village.		-
1134	Abigail	Leyland	-		Object	WE DO NOT NEED ANYMORE HOUSING IN WHITWORTH! The schools are already oversubscribed, our local doctors can not possibly take on any more patients as it is already a struggle to get an appointment currently. We only have one road in and out of the village which gets badly effected by rush hour traffic, making it difficult for the locals to get to work/school etc. We have such a lovely view of greenery surrounding our little village and we do not want our sight ruined by building ugly, unnecessary housing.		
1152	angela	Jordan	-		Object	I do not think whitworth has enough resources to sustain further housing estates .The one and only road is already impossible at peak times,our doctors surgery is bursting with no appointments,and our school children cant get a place at our local school. - The wildlife is also important to whitwoth people but is being pushed further and further out of its natural habitat.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1166	Brendan	Doherty	-	HS2, 102,104,108,105 ,107,106,109.	Object	WHITWORTH IS FULL. This statement encapsulates all the issues surrounding any expansion of dwelling houses in the township of Whitworth. - - The negative impact of any developments in the town cannot be overstated. - - The whole nature of this small township will be irreversibly destroyed if development are allowed. - - Flora and fauna will be the first to suffer. This valley is home to an exceptional and expanding variety of animals and trees and flowers. This growth has taken decades to achieve and would be totally reversed by the stroke of a pen. - - To say that all the ingredients which go to make up Whitworth as a place for people to live are overloaded is indeed an understatement. - - Congestion of traffic and people is at its limit, any increase can only be detrimental to the health and quality of life of residents. - - Local services, schools, doctors, civic amenities are already at their serviceable optimum. - - The existing utilities of electricity,gas and water only just maintain service. There are often cuts in these making it seem that we are a third world town. - - Whitworth is a linear town with no bypass or possibility of such. Most of the day traffic is heavy and at peak times chaotic. This combined with the nature of HGV traffic leaves the roads in constant need of repair. Add a very poor public transport system and the certain increases proposed then the result is guaranteed to be disastrous.		Listen to the people of Whitworth.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1172	Racheal	Biggs	-	HS2.109 HS2.106	Object	<p>I would like to object to the building of more housing on this site for the following reasons: - 1. Due to existing school and it's growing numbers of families this has caused a significant increase in the amount of cars in the area and causes substantial problems with access and volume of traffic. If more houses were to be built in this area then i believe the impact on existing residents would be very concerning. We already have issues of safety for the children coming out of school and our resident children due to the large numbers of cars and road layout: Small streets, cul de sacs, one small road into the area, more cars would make an existing bottle-neck even worse. Increase in volume of traffic in such a small area is compromising the safety of these children and would have a negative affect on existing residents. - 2. Living in a semi rural environment means that we are able to enjoy the landscape and the wildlife within it. More houses in this area could potentially see the loss of not only tress but wildlife including.. Deer, badgers, foxes, protected species of pondlife, bats, owls and other birds. Increased noise pollution and construction in this area would see this wildlife disrupted and potentially at risk of harm. Over the last 15 years we have seen an increase in the wildlife and this adds to our rural environment that as residents we would like to continue to enjoy. Government policy is to protect Greenbelt areas except for 'exceptional circumstances'. Building in this area I believe would not be regarded as 'exceptional' and is not needed. - 3.In the past few years we have suffered from local flooding and have had many drains in the road flooding out due to poor drainage and excessive water. More building in this area is going to take away the moorland which I believe soaks up this excess water and helps prevent residential properties from being flooded. There is a culvert which runs through the middle of the proposed site and this helps with drainage, building would impact on this and create problems with local flooding. - 4. Infrastructure of the village is already stretched and schools, GP's, care homes etc are full to capacity making it increasingly difficult to access in its current state. Adding more houses to this area is going to create overcrowding and would have a negative effect on living standards of the residents of Whitworth. We have had over the past 3 years over 150 new houses built in the area which has impacted on school intake, making what i would consider local people, unable to access their chosen school and this will worsen with another 400 new homes in this area. There is only one road in and out of Whitworth and increases in traffic will put a significant strain on transport. Any roadworks in our small village creates huge problems and the prospect of 400 more families which potentially equates to 800 more cars would be catastrophic. We have seen an increase in power cuts and water bursts over the last few years and I feel this may be due to the current addition of new housing with no improvement to existing infrastructure. Roads in and around Whitworth are in dire need of repair and this is getting</p>		<p>We understand the need for more housing in the borough but it was highlighted in a survey which was conducted in 2015 by Turley on behalf of Peel investments that the need was not in the East (Whitworth & Bacup) but more in the west (Helmshore & Haslingden). The current housing minister Sajid Javid has now pointed out in his September 2017 speech that we need to assess where that demand is and 'Nor does it impress local people who see their area taking on a huge number of new homes while a town on the other side of a local authority boundary barely expands at all'. I understand this means other local authorities but it is also true of our own authority. If you were to include the increase of new houses built in Whitworth and the overwhelming number of new houses built in Shawforth and Bacup, then take into account that those new residents may work in Rochdale then their only choice of route is through Whitworth... creating substantial pressure on the volume of traffic in the area. This factor must be a consideration when evaluating where Rossendale needs new housing.</p>

----	-----------	---------	--------------	-----------------	-----------	---------	-----------------

worse with each year. - In conclusion I believe that the council would be going against government policies on planning and Greenbelt conservation and would be affecting the human rights and 'the right to peaceful enjoyment of all their possessions, which includes the home and other land' - (Human Rights Act- Protocol 1, Article 1) of every single resident in this area and that you have a duty to respect the community and their welfare standards.

1174	Timothy	Southwick	-	HS2.106- HS2.109	Object	<p>Received 08/09/17: I bought this house due to its location and green belt land to the rear of the property, there are fishing ponds, deer, badgers, newts, bats and many other habitats that feed and rely on this beautiful countryside. Badgers have many pathways through this country side and sets quite close to the houses. At the moment the traffic is becoming dangerous at school times and the amount of growing parked cars in all directions, not to mention the escalating traffic to the bottle neck at the Rochdale junctions in the morning, is there a highways strategy for the growing population in Whitworth, Bacup and surrounding areas. Since I have lived here, I have had to set off an hour earlier in the mornings to try to get to work, sometimes still not making it on time. I could loose my job or sanity if it gets any worse. I really think it would be a terrible shame to develop on this piece of land, not just for my own personal reasons, but the uniqueness of the old walls, fields and its history. This area is to valuable to be developed on surely, it would be a colossal mistake.</p> <p>Received 08/10/17: Well for a start the fields and fishing lodges are habitat to many different types of wildlife and walking areas for many residents. There are deer regularly visiting the area, herons and swallows feeding from the insects from the ponds, as well as newts, frogs ect. There are badgers and birds of prey, Buzzards, sparrow hawks and kestrels. This is a nature reserve for many animals and an area of natural beauty. It would be preposterous to use this area for further development. - The traffic also seems to be at it worst its ever been, living at Tonacliffe I have experienced increasing problems with school traffic and serous wear to the surrounding roads. This Urban sprawl in whitworth gets worse year on year and the grid lock at the bottom of Whitworth Road and Shawclough Road is soul destroying in the mornings. Even on my street parking and disputes are becoming a issue and tempers on the roads are increasing, so instead of thinking about revenue and development, maybe try thinking about the consequences and Highway compatibility first. People are not happy with the traffic getting out of Whitworth in the mornings and the grid lock at Rochdale Junctions. So with regards to future Local plan, do not regard Whitworth as an appropriate village for increasing housing, Whitworth will gain a reputation as a place not to come and live, reducing housing prices due to the dense population and unable to get to work in the mornings. -</p>		Develop nearer the motorways and not small inadequate villages.

1178	Stacey	Ryan	-		Object	<p>1. Whitworth is already overburdened by the current housing stock. Drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. -2. The schools in Whitworth are full to capacity, in particular, Whitworth High School, and cannot sustain any addition to the number of potential students. 3. There is only one road in and out of Whitworth and at peak times in particular, this road is congested with stand still traffic, contributing to air pollution. - People travelling from Bacup and beyond to get to Rochdale, all travel through Whitworth and all add to the problem. In rush hour traffic a 10 minute journey to travel from Whitworth to Rochdale can regularly take up to 40 minutes. The three access roads to Market Street from Add to dictionary are regularly backed up with traffic, only adding to the peak time travel chaos. 4. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. additional development will only increase the potential for more severe incidents. 5. Access to most of these proposed sites will increase traffic hazards on an already inadequate highway. Traffic on Tonacliffe, particularly around school drop off and pick up times is chaotic. The proposed sites will only add to this chaos and potentially endanger the lives of more school children. -6. I challenge the need for more housing in Whitworth. - 6.1 Where is the evidence of any demand? - 6.2 There are countless houses left empty and neglected in Whitworth. Why are these not modernised and made available? - 6.3 Where are the job opportunities for these proposed residents? Presumably in another town or city as there are few or none in Whitworth, so why not build elsewhere which is within easy commute of employment easing traffic congestion and pollution. 7. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these environments. For example, wild deer are regularly seen on the Tonacliffe moors and protected Newts live in the brook on the Tonacliffe moors. 8. Crime and lack of effective policing has already become an unwelcome fact of life in Whitworth. Additional housing will inevitable add tot the problem.</p>		Any planning in Whitworth seems ill thought out due to the lack of amenities, schools, GP surgery, adequate roads and employment opportunities.

1190	Nathan	Worrall	-		Object	<p>Whitworth doesn't have the infrastructure to sustain the construction of these new houses. The local doctors and schools would struggle to meet the needs of the increased population. There is bad traffic in Whitworth already, this will only make it worse and these traffic problems are highlighted when there are roadworks and there are large queues. The proposed sites are located on greenbelt land, and this will have a negative effect on the local wildlife as well as destroying the natural beauty of this land.</p>

1260	Rita	Banham	-		Object	<p>1. Wildlife - There are Deer and Badgers (which are protected) - According to The government planning policy statement Protection should be given to most valued townscapes and landscapes, wildlife habitats and natural resources. - - 2. Newts living in ponds, bats nests in the forrest, foxes and hares. - - 3. Loss of Trees - - 4. Increased traffic could cause further danger to children. The impact of more cars passing through could be fatal. Parking around this area is already a concern - increased traffic will make it worse. Local residents regularly voice their concerns on this. - - 5. A culvert runs through the middle of the tonacliffe proposed site which takes drain water off the moors - this is already at near bursting point when there is heavy rain. If this site goes a head I worry we are at danger of flooding, - - 6. landscaping - the site is geographically unsuitable for housing. The features of the landscape would make it difficult to build. Has a land survey been done?? - - 7. Local Amenities such as schools, doctors, dentists are already full. Building would have a negative effect on the living standards of the people of whitworth. - - 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. - - 9. If access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs - this would endanger the lives of the residents living there especially the children. - - 10. it is government policy to protect greenbelt areas except for "exceptional circumstances" what are those exceptional circumstances? - - 11. Local drainage cannot cope with the useage now - more residents would put an unbearable strain on this network. - - 12. A public footpath (right of way) could be lost. - - 13. Loss of privacy. - - 14. Increased noise pollution - the area is surrounded by wildlife and local residents. Building in this area would have a detrimental effect on both. - -</p>		We highly protest against this building development. Our community is already under enough pressure and the safety of our children does not need to be compromised any further by incremental traffic, especially the roads leading up to Moorland Crescent via Tonacliffe road the traffic is already too dangerous.

1266	Will	Biggs	-	HS2.106, HS2.109	Object	1) Impact of more traffic around Tonacliffe area- we have limited routes in and out of Tonacliffe and particularly around school times it suffers with congestion already- this will be compounded by a further increase. There will be more risk to safety of children walking to/from school due to increase in traffic and local parking - There is only two routes into the village from Rochdale and one out towards Bacup that will suffer with the additional traffic.. - 2) Local schools, doctors and dentists are already at capacity and increased housing will create issues with services being compromised without further provision. - 3) Would expect facilities such as Water, electric and gas to need further uplift to support this - I have witnessed a number of water leaks on Tonacliffe recently as well as power cuts over the years- will our services cope with the additional demand for these proposals - 4) Loss of trees and wildlife on the green belt- This will impact our environment and need for our wildlife habitats. - 5) Many children play on the local area around Moorland Cresnet & Tonacliffe way (Cottesmore Close, Horsefield Ave, Bell Isle etc) and more through traffic from the new estates will create further risk of injury or even fatality

1272	Michala	Geldard	-	HS2.102, HS2.105, HS2.104, HS2.106, HS102.107, HS2.108, HS2.109	Object	I am objecting in general to the proposed house building in various sites around Whitworth and specifically in relation to the proposed sites t Tonacliffe. My objections are based on a number of reasons: 1. Wildlife in the local area. Deer, badgers, foxes and hares live within the forest areas. Rare protected newts live in the pond. Bats nest in the forest. The importance in f this green belt land for the wildlife cannot be over emphasised. - 2. Tonacliffe forest would need to be cut down adversely affecting the local environment. - 3. The impact of more cars around local schools, especially Tonacliffe School, is of great concern due to the already high volume of traffic. Increasing this would be unacceptable. - 4. Local amenities such as schools, doctors, dentists are already to capacity. I have concerns that more houses will have a negative impact on the lives of current residents in relation to these amenities. - 5. Has the infrastructure of our small village been considered in relation to electricity, gas and water supply if more houses are built? Whitworth already experiences power cuts and seems to be worse since other recent building developments have been completed. - 6. The road network into Rochdale is already gridlocked. More houses will increase this problem. Public transport from Whitworth is limited to buses and I consider that if this proposed building goes ahead there will also be a negative impact on the poor public transport in and out of our village. - 7. Local drainage already struggles to cope with usage now, if the volume of residents increases would the drainage system be able to deal with the added strain? - 8. We bought our property because it is located on the last cul de sac of a small estate with no through traffic. This proposed building work will completely alter this into drive through roads. Plus the volume of traffic will - Increase which I consider to be unacceptable. - 9. I am very concerned that we may have loss of privacy as we are not currently overlooked and this was a major consideration when we bought our house.	-	-
1283	Jonathan	Geldard	-	HS2.102, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	Whitworths infrastructure is already at near full capacity. The single main road through Whitworth is, at times, grid-locked. Streets around the primary schools is chaotic. There is a definite flood issue through the valley. Crime is rising unchallenged. The rich and diverse wildlife is flourishing around Whitworth. - Any of the development projects would have a negative and detrimental implication on Whitworth and it's residents.	-	-

1298	Carol	Williams	-		Object	Same as HS2.109 Horsefield Avenue - Infrastructure, roads, electricity, water and gas, drainage - Wildlife - Amenities - schools, Dentists,Doctors - Danger to local residents due to addition cars/traffic - landscape, trees, forest, ponds - Green belt area, noise and pollution - Plans previously refused in certain parts and nothing's changed - Access, would endanger lives - Loss of privacy		I believe the council is going against the Government policies on planning and green belt conservation - - A high level of protection should be given to most valued landscapes, wildlife habitats and natural resources. - - I object to the policy itself and the proposed housing developments on individual sites mentioned namely HS2.109 Horsefield Avenue, HS2.106 Moorland Crescent, HS2.102 king Street and HS2.104 Quarry Street

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1302	Tegan	Calderbank	Student	HS2.109 and HS2.106	Object	<p>How would you describe England's land? Green? My favourite part of growing up was running and playing on the vast fields that my house backs onto. The fields around Tonacliffe are scattered with wildflowers of all kinds the variations of grasses, shrubs and flowers helps expand the biodiversity of the land. - - When I heard of the plan to build houses on the green belt land surrounding Tonacliffe I was shocked, appalled and disgusted at the notion of it. How could anyone possibly want to destroy the habitats of countless animals? It made me think of the precious memories I have of the land, from of watching fox cubs play fight with each other, to seeing deer graze in the fields, watching a fawn prance through the grass, or bucks play fight. Rabbits have burrows in the hillside and there is no better sight than watching them feast on the lush grass in spring. Badgers make tracks in the grass, tracks that tell you a story. - - If you build houses on this land these animals will have nowhere to live, Doe will have nowhere to feed their fawns or watch them grow, Rabbits have nowhere to burrow, Foxes have nowhere to raise their cubs and Badgers cannot make their journey along the tracks they made to get food. For what? Houses? Will people buy your houses when they know how much suffering they were made from? Do the lives of these animals mean nothing to you? Programs like Countryfile encourage you to enjoy the great outdoors, to support wildlife nearby and to preserve natural beauty. If you take this land away from its local residents to cover it in tarmac and stick masses of brick and metal on it you are taking the countryside away from us. We would not be able to enjoy the great outdoors, we would not be able to support wildlife or preserve its natural beauty because it won't be there. You are the ones damaging the biodiversity of the world, you are the ones killing these animals. If you build houses on the green belt land around Tonacliffe you are just proving me right. - - There are many protected animals in the area surrounding Tonacliffe, including pipistrel bats the population of pipistrelle bats has declined in the UK over the past 30 years, between 1978 and 1993 there was a national decrease of 70 percent. All the UK species of bats are protected under the Wildlife and Countryside Act 1981, and it is illegal to harm them or disturb their roost sites. Over the years the habitats e.g. hedges, ponds and old grassland, where bats like to hunt have declined in number and they have also lost many of their traditional roosting places, such as hollow trees. - - Traffic around tonacliffe is bad enough as it is, if you build an estate on the land around Tonacliffe then imagine how bad the road traffic will be. 52 houses of the site of Horsefield Ave and 68 houses on the land east of Tonacliffe means 120 houses. Suppose if these housed nuclear families and each parent had a car that would mean 240 more cars on Whitworth's roads causing more road erosion and more traffic. With Whitworth having only one road in and one road out, it's extremely obvious that there is a lot of traffic going in and out already. Can we really deal with anymore? - - When</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
						<p>Tonacliffe Primary School closes at 3:30 pm parents park their cars ANYWHERE in order to pick their child up from school. They park on double yellow lines, block your drive, park on corners and park where the kerb has been lowered to help wheelchair users and powered mobility vehicles these all come under rule 243 from the department of transport as illegal. Imagine how hard it is to drive up the hill you live on, squeezing through gaps, fighting for road space only to arrive at your drive and find it blocked by a parent picking their child up from school. Obviously building houses on the lands around Tonacliffe will escalate the problem, with more residents trying to get up or down the road. - - Another issue is local schools in Whitworth are already OVERSUBSCRIBED. Primary schools e.g. Tonacliffe Primary School, St Anselm's RC Primary School and other local primary schools in the area. High schools are sparsely distributed in Rossendale and high schools like All Saints Catholic High School and Whitwoth High School are ALSO oversubscribed. How is Whitworth supposed to manage with more residents? It's a simple answer, it cant.</p>		
1307	Jenny	Lowe	-		Object	<p>Done my objection :- 1. Whitworth is already overburdened by the current housing stock. Drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. - 2. The schools in Whitworth, in particular the high school, are at capacity and cannot sustain any addition to the number of potential pupils. - 3. There is only one road in and out of Whitworth and at peak times in particular this road is congested with idling traffic contributing to air pollution. People travelling from Bacup and beyond to get to Rochdale all come through Whitworth and add to the problem. - 4. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. - 5. Access to most of these sites will increase traffic hazards on an already inadequate highway. - 6. I challenge the need for more housing in Whitworth. - 6.1. Where is the evidence of any demand? - 6.2 There are countless houses left empty and neglected in Whitworth, why are these not modernised and made available? - 6.3 Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? - 7. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. - 8. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1310	Richard	Dolan	-	HS2.101-109	Object	<p>We are vehemently opposed to all housing allocation in Whitworth. Our group has decided to vote against and actively campaign against all Councillors and MPs in favour of this proposal. We will withhold our votes and encourage family, friends, and community to do likewise. - We are outraged by this proposal, especially HS2.107 that will encroach on Healy Dell. On this point we will be contacting the National Trust and other such organisations to make them away of the proposed desecration to the Green Belt. Furthermore, we are now investigating possible financial links between all Councillors, MPs, and RBC employees involved in this issue with the proposed contractors. This senseless proposal for a village far too small to accommodate a possible 300 new homes suggest an ulterior motive. No one in our community that we have spoken to is in favour of this plan and we will use our sizeable influence. - There has been more than enough housing development in Whitworth. This new proposal will destroy our green spaces and necessitate a new schools, doctors' surgery, dentist, shops, and possible a new road. All future housing development must stop. Our community can not accommodate any more. - In light of the fact that this proposal has not been advertised to a great extent (we have spoken to people who know nothing of it), we will be conducting a petition again this proposal and encouraging everyone to sign the following statement: - We will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community.</p>		<p>To reiterate, we will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community. - - The people's power will be felt if this plan is authorised.</p>
1321	Andrew	Lowe	-		Object	<p>I am extremely worked about the impact of new housing in the area. - 1, The traffic in this area is already very busy especially before and after Tonacliffe school. The roads are always in a bad state of repair. Adding new houses will only make things worse. - 2, This area is full of natural beauty and full of wildlife. You see the Deer, foxes and each evening without fail hundreds of bats. This would be so wrong to damage their habitat. - 3, The Schools are already at breaking point. Many kids what have gone through primary school in Whitworth have missed out on going to Whitworth High School this time. They have had to go to Todmorden High which is outrageous. New houses in Whitworth would only make the situation worse. - 4, Whitworth is a small Village with few amenities. It is very difficult to get in at the doctors or dentist as it is. New houses will ruin our village. - 5, Crime is as bad as it's ever been in the Village now. The nearest police station being in Waterfoot. A bigger population in Whitworth will only make for more crime. - Whitworth is a village not a town and these houses will take away everything that is good about our village.</p>		<p>New housing will ruin our village and our wildlife. I am completely against new housing in the village of Whitworth.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1336	Maureen	O'Mara	-		Object	Whitworth is already struggling with oversubscribed schools. There is only 1 small GP surgery and 1 dentist. The village cannot cope with stretching the existing amenities. - One of the main objections I have is the traffic and parking, which is already dire. Streets are almost impossible to drive down safely due to double parking. There is only one main road, which when closed for any reason means driving via Todmorden to get around - this has happened on a number of occasions. Most roads have very steep inclines which are regularly not gritted in winter. To increase parking and traffic would destroy Whitworth. Where would access roads be and how would this affect current residents.		
1363	Gareth	Dolan	-	HS2.101 to 109	Object	I do not live in Whitworth but spend a lot of time there with my family. I am deeply concerned by this proposed loss of green belt and will do my utmost to object against it. - - I strongly urge RBC to re-consider its proposal. Whitworth cannot handle any more development. - - Thanks		If this destruction of the green belt in Whitworth is passed then I shall simply take my family and my money elsewhere as there will no longer be the same attraction Whitworth now offers.
1365	Michael	Whitehead	-		Object	The doctors is overcrowded, the schools are overcrowded and there is one road in and out. All three of the mentioned cannot cope in the current state. Whitworth has too many houses for the current infrastructure. If the proposal goes through, which I sincerely hope it does not, there will be 300+ more homes within Whitworth. This means 650+ more people needing a doctor, 300+ more children who need schools and 300+ more cars on the roads. If the current infrastructure is struggling I dread to think how the village would end up with that amount of extra people. - There are also many deer which have recently returned to the greenbelt land on either side of the valley. Moving any sort of greenbelt/urban borders is highly likely to destroy their habitat and force them away.		-
1387	Victoria	Mairs			Object	I would like to object to the above sites being changed to buildings lands on the following basis, Whitworth is already full to bursting Doctors, schools, dentist are all full. Traffic has one road in and one road out, all it takes is one set of traffic lights and the whole village comes to a stand still causing problems for local businesses in the surrounding areas. The area around Tonacliffe is home to wildlife such as badgers, foxes, bats, deer, newts, frogs where will these animals go will they be simply expected to relocate??? Local people use the moorland for walking, cycling it is a play area for children and is simply the last green space we have that the council haven't built on. We have ponds where fish and pondlife live geese spend summer here . - Drainage is very much a problem already we flood when we have a regular amount of rainfall, when it rains heavily the drains cannot cope and the area in Tonacliffe is heavily saturated. - - Access at Tonacliffe is already bad for emergency vehicles and large vehicles, once you include more housing and the school traffic it will simply become impassable.		Yes absolutely let the planning officers spend some time actually in Whitworth village they will see how much traffic there is and how we are struggling to cope, the new Tesco is an accident blackspot which the planners felt fit to approve. Come down from your ivory tower and look what normal people are struggling make a decision that is right for the people and community in Whitworth and have to struggle everyday with traffic, leave us the green space that we deserve

1391	rachel	maddock	-		Object	I am objecting to the above proposal of housing. - - I am a Bacup resident who travels regularly to Whitworth for work and schooling. The proposal of changing the beautiful greenbelt land on Tonacliffe for more housing is outrageous. I have lived in Whitworth and Bacup all my life and grew up on the moors surrounding Tonacliffe. ...the beautiful moors that we are very lucky to have. Has anyone thought of the wildlife?.....where will they go?..... - To build housing in an area which is already fit to burst is madness. The schools and public services in Whitworth or already oversubscribed. ...getting a doctors apt or dentist apt takes weeks to get. ...adding more people to these services will bring it to breaking point,. - The traffic is also a major problem already. There is one road in and one road out. A simple traffic light brings the village to a halt already, let alone having another cohort of cars and people added to the equation.		-

1417	Gillian	Middlemas	Whitworth Community High School	HS1.102 HS2.103 HS2.105 HS2.104 HS2.106 HS2 107 HS2.108 HS2.109	Object	As Headteacher of the only secondary school in the Whitworth area, I am concerned that the proposals to build considerable numbers of new dwellings take no account of educational provision in the local area. - The school is already oversubscribed: for 2017 entry into Y7 over 40 families were unsuccessful in gaining a place, despite Whitworth Community High School being their first preference; over 40 families went onto on the Local Authority's waiting list for a place; over 25 families went to Appeal for a place, and very few of them were successful. The school now has 640 students and, without extra classroom space, has no capacity to increase the admissions number, nor to take additional students into existing year groups. - Likewise, many local primary schools are also full / oversubscribed, suggesting there is insufficient educational provision in the local area already. - This situation will be exacerbated if the proposed number of new dwellings goes ahead, unless the developers or Lancashire County Council are prepared to increase the school's capacity by funding additional classroom / learning / social space. The school is over 50 years old, largely of Langspan pre-tensioned concrete construction (intended life expectancy already exceeded) with HAC (high alumina cement) - In addition, the school experiences ongoing issues with the provision of utilities: the water main up the school drive is at risk of collapse; the water supply to the area has recently been affected on a number of occasions, and presumably further demand from new building would increase these issues. - The proposals for new housing does not appear to be linked to any plans to improve the traffic situation in the Whitworth area: lengthy queues heading towards Rochdale each morning already create issues for students travelling to school.

1436	Louise	Currie	-		Object	<p>1. The plans to build in this area, will reduce the natural environment within the area, which the government's planning policy is committed to protect. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. 2. Utilities are already stretched with the current housing stock - drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. 3. The schools in Whitworth, in particular the high school, are at capacity and cannot sustain any addition to the number of potential pupils. 4. There are currently parking issues and high traffic volumes around Tonacliffe Primary, without creating additional through traffic to new houses in the vicinity along a narrow road, which requires resurfacing and who's current 20 mile an hour speed limit is not enforced. 5. There is only one road in and out of Whitworth and at peak times in particular this road is congested with idling traffic contributing to air pollution. People travelling from Bacup and beyond to get to Rochdale all come through Whitworth and add to the problem. Continuing roadworks to address ongoing issues with failing water mains often leaves Whitworth gridlocked with long queues of traffic trying to leave the Village in the morning and return in the evening. Additional housing will compound this problem 6. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. 7. Access to most of these sites will increase traffic hazards on an already inadequate highway. 8. Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? 9. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.</p>		As well as these particular developments, the others sited in the plan will also increase volumes of traffic along Market Street (A671), adding to congestion and putting pressure on water mains and utilities and the road's surface leading to increased road works and further problems entering and leaving the Village at peak times. - - Whitworth and the other villages along the A671 cannot simply continue to expand without addressing the wider infrastructure of utilities and access in and out of the village through neighbouring authority areas

1440	Helen	Banham	-	HS2.106 - Moorland Cres	Object	<p>1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - Would my house and others be overlooked. 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. 16. Some of the areas and the surrounding areas have already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost. 18. Local drainage cannot cope with the usage now would more residents put an</p>

1464	R	Platts	-		Object	<p>residents put an unbearable strain on this network. -</p> <p>Overall I object to upwards of 300 houses being built in a small village of only 7,500 residents. There is only one road in and one road out and traffic is already slow moving, if indeed moving at all, at peak times. The village is already susceptible to flooding, a problem that more building will only exacerbate. Local amenities such as our schools, our local doctors and dentists are already oversubscribed. In short, the village can't support such a surge in population. - The two sites I mainly object to are Horsefield Avenue and land to the East of Tonacliffe School. These sites are both Greenfield. Greenfield should not be built on unless absolutely necessary. In this case, it isn't absolutely necessary. If Government policy is to protect greenbelt areas except for "Exceptional circumstances", then Rossendale Council should take heed of this and concentrate it's focus on other areas instead. - The roads around this area surround Tonacliffe Primary School, and twice during the day these roads are virtually impassible and extremely dangerous to children. Bringing more traffic into the area is an accident waiting to happen. Pedestrians on Tonacliffe Road walking in the Rochdale direction aren't well catered for with footpaths. There's only very narrow pavements on the left-hand side, and no pavement at all in some parts. The resulting excess in vehicles will make it even more dangerous. As a parent I worry constantly about my children and the roads around here and that will only get worse. - I would also like to add that after heavy rainfall, Highgate Lane is like a river with all the excess water running down from the hills. We'll all be at risk of flooding if parts of the greenbelt is concreted over.</p>

1469	George	Salt	-		Object	Whitworth is located in a valley, this in itself presents issues with the amount of space available. 7,500 people lived in Whitworth according to the data from the 2011 Census and this is a large amount of people if you look at the services and infrastructure in Whitworth. To start off with there is one GP surgery that has 7,248 people registered with them. Whitworth Medical Centre has 4 GPs which means that for one GP there are 1,812 people. There is not any more capacity available for more people to register with the practice. - - Schools are also busy especially with just one school for secondary education. With more people living in Whitworth that would mean a greater demand on schools and could result in some children living in Whitworth not going to school there. - - Going back to Whitworth being a valley this physical feature means that infrastructure being put in can be difficult. Whitworth has one road in and out and during peak hours this is a very busy road. Most new people would probably be using a car as their main mode of transport adding more pressure to Market Street and its tributary roads. Public transport is also very poor in Whitworth meaning that it is not really a viable alternative for any new people who would come to Whitworth. - - As shown with a few of these arguments Whitworth does not have the capacity to accommodate an extra 359 houses over the next 15 years. For example an average of 3 people per house would result in 1,077 more people living in Whitworth. It is not going to work.		
1487	Claire	Taylor	-		Object	I object to all of the plans to increase the population in Whitworth. Our schools are bursting at the seams, with local children not getting places. The water drains burst constantly, we cannot add any further pressure - my water was off 5 times this year due to burst pipes. - We cannot accommodate additional people in the doctors. - More cars around Tonnacliffe will be fatal, parking is already jam packed and winter due to heavy snow in the area makes it an access nightmare to school and houses. The village infrastructure is over flowing, we struggle for broadband already, and burst water pipes is very common. - We cannot accommodate any further growth, we do not want to see depreciation of our lovely village, its landscapes or the wildlife.		Yes, we do not want any additional housing in whitworth period.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1497	Wendy	Rose	-	Tonacliffe	Object	The infrastructure of Whitworth cannot support or sustain further development. There is only one road in and out of Whitworth. Congestion is a serious problem now due to the volume of traffic. When there are roadworks the situation is bordering on dangerous as emergency vehicles are hindered. Further residential development would only compound this issue with higher levels of vehicles. - - Power cuts are a regular occurrence in this area, one can only assume this would get worse with the extent of the proposed developments - - Doctors surgeries are fully to capacity and cannot adequately serve the community at the moment. Waiting times for appointments is ludicrous. Schools are over subscribed. Parking around schools is dangerous and any increase in school children would seriously impact on this. - - All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - - Proposed land in some cases is not viable as parts are prone to flooding. Culverts running through a proposed sight would impact on flood defences in the area. - - -		-

1505	Pat	Stewart	na		Object	<p>I object to all the listed sites in whitworth. - - HS2.102 - King Street, HS2.104 - Old Lane, HS2.108 - Sandbank Gardens, - HS2.105 - Albert Street, HS2.107 Fern Isle Close, HS2.106 - Moorland Cres, - HS2.109 - Horsefield Av - - 1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. - 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. - 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. - 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? - 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. - 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. - 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. - 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. - 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. - 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. - 12. What would the impact be on the carbon footprint of the valley ? - 13. Loss of privacy - Would my house and others be overlooked. - 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. - 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. - 16. Some of the areas and the surrounding areas have already had planning refused in</p>		Please can you inform me of how many people object to the whitworth sites.

1535	Susan	Neilson	N/A	HS2.106 Moorland Crescent and HS2.109 Horsefield Avenue	Object	<p>These two sites at Tonacliffe are unsuitable for housing. The geographical features of the landscape would make it very difficult to build on (as previous land surveys conducted here in the 70's and 90's have proved). Access to the proposed sites is also not suitable, as there is a dangerous bottleneck situation from the Moorland Crescent side and the second proposed access at High Peak Lane is partially owned by local residents, so would not be a viable option. - - The moorland is percolated by a system of springs and the culvert, which runs through the middle of the Tonacliffe site is already near besting point at times of heavy rain. There would be a serious risk of widespread flooding if this building goes ahead. - - The current infrastructure is totally inadequate for this proposed number of houses, as Tonacliffe Road, leading to the two designated access roads for the Tonacliffe site, is very narrow, currently often congested and in need of frequent repairs with the current level of traffic. At dropping off and collection time, the roads in the Tonacliffe area around Tonacliffe County Primary School are already very dangerous for the children. The impact of more cars passing could be fatal . Parking around the area is already a concern for the school and an increase in traffic will only make it worse . Local residents regularly voice their concerns about this . Local amenities such as the schools, dentists, and doctors are already full and building more houses would have a negative effect on the living and health standards of the people of Whitworth . The water, electricity and gas services would also need major work and upgrades to accommodate this level of housing. There have been several incidents are linked to other new building developments, which have already being completed in Whitworth , at which have resulted in power cuts and problems with sewerage and water supply . The road network to and from Rochdale and Bacup was never intended to take the already large volume of traffic. It is frequently gridlocked. More houses would make it worse. - - The proposed site is in an area of Greenbelt Land, which is of great importance to preserve local wildlife in Whitworth . We have protected newts living in the pond and Pipistrelle bats nesting in the area. There are badgers, foxes, deer and hares living wild, alongside the sheep and horses that graze on the moors. In a recent government planning policy statement, it was stated that there needs to be 'a higher level of protection given to the most valued townscapes and landscapes, wildlife habitat and natural resources.' This needs to be factored In In order to maintain the environmental quality of the area . The proposed building would cause irreversible damage to the environment . - - -</p>		There would also be a detrimental effect both for the local wildlife and residents in terms of increased noise, pollution and related impact on the carbon footprint of the valley. Public footpaths and rights of way would be lost .The whole proposal across both sites at Tonacliffe could only negatively impact on both the character of the village and its environment and pollute what is currently an area of importance both to the conservation of protected species and wild, moorland beauty .

						<p>flooding in the valley), should the council be protecting residents from it rather than creating further problems? Local drainage (water and sewage) cannot cope now in some areas. Should County, District and Town Councils together with United Utilities officially verify which of these proposed development sites are in potential flood areas before planning permission is granted? Further house building would expose a failure "to deliver sufficient community infrastructure and services to meet local needs" (a key principle of the National Planning Policy Framework). Such development would also cause further pollution (e.g. to air quality - more traffic on the roads) creating a greater carbon footprint for the valley and the next generation. Article 19 (from the GPPS), in line with UK Sustainable Development Strategy, states that "the environmental costs should fall on those who impose them"; will the council take this "polluter pays principle" into consideration before making any decisions? Geographically, in some of the proposed sites, the landscape makes building difficult. It would require radical and costly solutions. Where would the access roads for these developments be? If any small byroads are used, this would increase traffic, thereby increasing the risk of accidents to children (particularly near schools). Additionally, in winter such roads are often not salted or gritted making them a hazard for the disabled and the elderly resulting in more accidents and costs for the NHS. There is already inadequate infrastructure in transport where roads are gridlocked at peak times and in need of repair e.g. the already congested road leading to the reservoir and quarry (adjacent to Cwm Waterworks). With one main road in and one out, Whitworth is already a congested village. Public transport is very limited e.g. no train/tram services. How will the increased traffic be managed? In other services, there have been at least 4 outages this year in electricity in the Whitworth area. Water and gas would also need upgrading (representing further expenses on already overburdened service users). Present resources would fail to deliver the increased demand new residents would require, thereby failing to meet the criteria set out in NPPF. Currently, schools, doctors and the sole dental practice are all over overstretched and over subscribed. This depletion in resources would curtail the life chances of future generations. Further house building would further increase class numbers in schools and severely overload resources there. Frequently, waiting times for doctor's appointments are well over four weeks. Dental</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
1547	Karen	Ruane		SHLAA16002	Object	<p>I wish to object to the Emerging Local Plan Draft Local Plan (2019 to 2034) for Rossendale and the proposals for Whitworth. I would like to state my objections to the local plan specifically for the Whitworth Area, and in particular Site Ref HS2.106 and Site Ref HS2.1 09</p> <p>I am a resident of Meadow Head ave and have lived here since February 1978. I remember when these two areas were defined as Green Belt because of their unsuitability for development. (Inspector's Report September 1994 Gill. D and Sustainability Appraisal May 2017 {3.16.7})</p> <p>The objections raised then and their causes have not 'gone away and are just as valid now. In fact, there are more reasons for keeping the areas as Green Belt. As the problems expressed then, have multiplied rather than decreased. The increased congestion at Tonacliffe Road and Tonacliffe Way is now a nightmare for residents entering and leaving their homes and for parents dropping off their children at Tonacliffe School.</p> <p>Bus Services have decreased from Rochdale and Rossendale through Whitworth as part of a cost cutting exercise. Leaving the minor roads on to estates not serviced by public transport. Shift workers have to use their own cars or car sharing and the last resort, Taxis, because there are no Buses available.</p> <p>I am not a lone voice in expressing my concerns over the current infrastructure which is not adequate for our needs? This Emerging Local Plan (ELP) is going to increase our problems rather than relieve them. And while our MP Jake Berry and Rossendale Borough Council (RBC) may publicly argue about the figures for housing needs, their discussion does prove that it is a Government-led initiative RBC are chasing in this ELP rather than filling a Local need.</p> <p>The increase in pressure on our local resources, this ELP would produce is because of a Whitehall need not a Whitworth need.</p> <p>On the 14th September 2017 in parliament Sajid Javid, Secretary of State for Communities and Local Government publicly stated the government's commitment by saying. "Greenbelt is still protected."</p> <p>Our local MP then announced in the Rossendale Free Press on 22nd September 2017 "I'm delighted that after raising this issue at the highest levels that I've been able to get the Valley's housing figures reduced to protect more of our local green spaces. This is a victory for everyone here in Rossendale. "</p> <p>In presenting this Draft ELP Rossendale Borough Council are ignoring the wishes of our MP and the residents of Whitworth who seek to protect the Greenbelt not because we consider it our own back garden but because in the absence of any proper development of resources this ELP will increase the burden on an already overburdened infrastructure. As Jake Berry says. "These new homes should</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.106	Further comment
						<p>continue to be prioritised on brownfield and former industrial sites rather than our beautiful countryside."</p> <p>I agree with the Sustainable Development Commission which states: "Sustainable Development starts with making better decisions on the issues that affect all of our lives, easy access to health care and leisure facilities, education for all ... at the nearest school, good public transport, roads and schools. It is about ensuring a strong, healthy, and just society, meeting the diverse needs of all residents those existing and potential future generations. The Schools, Tonaciiffe School, St Anselms School, St Bartholomew's school, St Michael and St John School and the one High School are almost at capacity now. The planning area of Whitworth will show a limited number of places remaining across schools in that planning area If local schools are unable to meet the demand of a new development there is the potential to have an adverse impact on the local community, with children having to travel greater distances to access a school place.</p> <p>(Rossendale Infrastructure Delivery July 2017)</p> <p>One GP Surgery, one dentist, one road in and out of Whitworth, schools oversubscribed, I feel this ELP does not show how Sustainable Development (SD) will be achieved. It does, however, show how Rossendale rate revenue will be increased.</p> <p>I believe as community members we have a duty to preserve our open spaces and not allow them to be removed from the Greenbelt to justify a Whitehall need, rather than the needs of Whitworth people for better and improved Services.</p> <p>Without improvement to the existing infrastructure in Whitworth, this Emerging Local Plan will increase problems not reduce them.</p>		
1744	Keren	Szelesi		Moorland Crescent	Object	<p>Objections:</p> <ol style="list-style-type: none"> 1) Infrastructure is already at breaking point in this area. 2) Road system, water supply, medical centre, schools are at full capacity. 3) Encroach on green spaces. 4) Whitworth will no longer be a village but an urban sprawl. 		Not enough publicity has been given regarding these proposals.
1820	Kelly	Holt	Lancashire County Council		Not Applicable	<p>TONACLIFFE, WHITWORTH - HS 2:106 and 109 – The sustainability of the sites is considered to be low and improvements to the pedestrian and cycle links would be required. There are ongoing concerns on Tonacliffe Road raised by the residents in relation to vehicle speeds and therefore mitigation measures to reduce vehicle speeds in accordance with the speed limit may be required. The sites could be deemed acceptable subject to a design which is in accordance with Manual for Streets which provides maximum permeability and loop roads for multiple vehicle access points off the adopted highway network, rather than extensions of cul-de-sacs.</p>

Reference		HS2.107		Land off Eastgate, Whitworth				
23	Carole	Linley	-	Moorland Crescent,	Object	Whitworth village is already far far too busy and we live on Moorland Crescent, OL12 8SU and are surrounded by moorland which is full of nature and should not be disturbed		-
24	Erica	Preston	-	HS2.105, HS. 107, HS2. 108, HS2.109	Object	The single road through the valley is not up to the volume of traffic using it currently. Hall St.will be a blocked junction, as will Tonacliffe Road. There are not the amenities in the area eg.doctors, dentists, schools etc. Unless major investment in the valley is made to update amenities and utilities these developments will cause immense problems and destroy the reasons people want to live here and turn the valley into yet another sprawling suburb. - I have every sympathy for the need for housing but feel the proposals are ill thought out and will lead to a detrimental effect on the township.		The need for housing must be weighed against the needs of the valley as a whole and destroying green belt and valued wildlife habitat will not make it a place people want to live.
25	Rachael	Dowsing	-		Object	Fern Isle is already at its limit for parking,the road itself is covered in potholes and if this is the access road there is going to be a higher flow of traffic affecting the road itself. The parking is very limited and there are already too many cars for households located on Fern Isle Close meaning that some residents are having to park in the layby. The local children also play on the proposed site and regularly on the street, the increase in traffic means that they are unable to play in front of their own houses. The is also the fact that Wallbank Drive and Hall street and the one road in and out to are already in disrepair and a nightmare at peak hours.		Residents have not been kept informed of the upcoming plans but luckily due to social media this has been highlighted. Is it not good practice to keep local residents who will be affected by the works informed?

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
27	Michael	Chianca	-		Object	<p>HS2.102 - King Street - HS2.104 - Old Lane - HS2.108 - Sandbank Gardens - HS2.105 - Albert Street - HS2.107 Fern Isle Close - HS2.106 Moorland Cres - HS2.109 Horsefield Av - - All these proposed sited are unsuitable for the following reasons. 1. Wildlife - This greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest area at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. 2. Loss of Trees - The forest itself would have to be cut down a totally unnecessary action when we have other areas within Whitworth to build on that would not require the destruction of trees. 3. The local school at both dropping of and collection time around this area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. 4. A Culvert runs through the middle of the proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. 6. Local amenities such as Schools, Dentists, Doctors are already full and building more housing would have a negative affect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. 9. Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would endanger the lives of the residents living there especially the children. 10. Government policy is to protect greenbelt areas except for "Exceptional circumstances" can you explain what those exceptional circumstances are when we have other areas more suitable for building houses on. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental affect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - My house and others would be overlooked. 14. As the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including school children. 16. This area and the surrounding area has already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost.</p>

32	Paula	McNinch	-		Object	There is not the infrastructure in Whitworth to cope with extra housing. The road in and out is already too busy, the schools are full and there are no facilities for young people.		-
49	Geoffrey	Lyon	-		Object	IT IS PROPOSED TO BUILD 111 UNITS ON THE LAND OFF EASTGATE WHITWORTH, HOWEVER THE ONLY ACCESS IS VIA HALL ST WHITWORTH. - HALL ST IS ALREADY SATURATED WITH TRAFFIC, THE ROAD IS CRUMBLING WITH THE AMOUNT OF VEHICLES ALREADY USING IT. - IT JUST CANNOT TAKE ANY MORE TRAFFIC, SITE TRAFFIC WOULD HAVE A DETRIMENTAL EFFECT NOT ONLY ON THE ROAD SURFACE BUT WILL HAVE TO GO STRAIGHT THROUGH WALLBANK HOUSING ESTATE - ONCE BUILT THE NEW HOUSED WOULD INCREASE TRAFFIC ON HALL ST BY OVER 20% - THERE ARE NO FACILITIES FOR ANY NEW HOUSES OTHER THAN A CORNER SHOP ON WALLBANK ESTATE - THERE IS NO DEMAND FOR SO MANY NEW HOUSES ,OVER 350 IN TOTAL TO BE BUILT WITHIN THE WHITWORTH AREA - LOCAL SCHOOLS ARE ALREADY CLOSE TO CAPACITY		-
56	Valerie	McDonald	-		Object	Whilst I recognise the need for further housing within the area, I am concerned about the siting of so many proposed dwellings in this particular valley. The roads are already clogged at rush hour and as there is only one road through, movement of traffic, should there be an accident or roadworks, becomes frustratingly unpredictable. What provision is there to maintain and develop the road system in the valley? - - Whitworth High School has become more popular over the past couple of years with waiting lists existing. What provision will be made to expand the school, and will this be done with a long term objective in mind and not just a sticking plaster effort to put up some portable classrooms? - - Local services such as the Children's Centre have just been lost. What plans may be afoot to reinstate such necessary provision? I feel it is morally wrong to simply build new houses and forget about the infrastructure to support this development. - - There is a wealth of wildlife on the moors where you are proposing to site many homes. Presumably there will be checks in place to ensure some of these species are not endangered? - - Finally, there are already plenty of properties on the market at very affordable prices (in comparison with some surrounding areas). Some of these have been on the market a while? Why, if there is already affordable housing, is there a need to build more? -		-

73	Caroline	Lord			Object	<p>This is green space where wildlife thrives, there are badgers, foxes, deer, hare, newts in the river and many many more, to build here would destroy their habitat. The local schools are at saturation point I work in the local Secondary school and we are full to bursting with the council still allowing more and more students in on appeal it is causing disruption to student learning. Parking by Tonacliffe primary school is a nightmare at the moment to introduce more cars will cause total gridlock. A culvert runs through Tonacliffe and this is at bursting point when it rains heavily our garden is flooded. The landscape is totally unsuitable for building and will most certainly cause flooding should building commence. Local amenities will not cope with more people doctors dentist etc are already full. Whitworth as a village comes to a standstill at the drop of a hat and total carnage occurs should there be traffic lights etc. Recent demolition of the local mill was an example of this as there is only one road in and out of the village. Access roads to Tonacliffe are narrow and will cause problems for emergency vehicles with more traffic it will be dangerous for children playing, basically if councillors came and looked at this beautiful green moorland I am fairly certain they could not agree to build and surely a brief walk through Whitworth would show this village is totally at saturation point . Come on counsellors have some sense!</p>		<p>I really hope you take into consideration local peoples feelings for once instead of sitting in your ivory towers making decisions that affect local people</p>
98	Jacqueline	Butterworth	-		Object	<p>I am objecting to proposed development of all the above houses around the Whitworth area. The area is overrun with traffic as it is. One way in and one way out. The schools are overloaded as are the GP surgery. It is inconceivable to build more houses and allowing more traffic to use our roads which are in a terrible state. We are already experiencing burst water pipes and our water pressure has already been reduced. We are experiencing more power cuts since all the new houses have been built on Cowm Park Way . Surely there must be someone in the planning department with some common sense and will prevent any further building of houses in Whitworth</p>		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
131	Christine	Greenwood	-		Object	I am objecting to plans to allow the building of over £350 properties on various sites around Whitiworth and Shawforth over the next 15 years. - Not only am I concerned about the building on our greenbelt sites which is part of the attraction of the area. I can understand the wind farm and can support renewable energy sources but not the creation of a collection of housing estates - whether social/affordable or not . The awful collection in Britannia speaks for itself! We have already had several builds across Rossendale but the extra Council Tax revenue does not seem to have brought many benefits to the borough. - As it stands at present the infrastructure can just about support the current residents - schools are already over subscribed and getting an appointment at our one GP surgery is already a mammoth undertaking. Planning to build or reopen a school by any chance? - Traffic is already an issue with one road in and out and a bus service that has to be one of the most unreliable in the surrounding areas ! There are next to no facilities for young people/children and a library fighting to survive so I think that this needs to be given serious consideration before you go ahead.		-
153	G.N	Royds			Not Applicable	As I have indicated before, a prerequisite for a community is sustainable employment. A complete hash has been made by not providing this. Former mill sites have been used for housing, such as Orama Mill, Facit Mill, Albert Mill and the mill near Spodden Fold (which I think may have been called Old Kays). Most of these are easily accessible. Now Spring Mill is proposed for similar treatment! On the other hand, peripheral businesses have been allowed, e.g. tattoo parlours and tanning centres, which debase the human body; the type of potentially smelly fast food outlets that encourage unhealthy eating. Housing without local employment means commuting, causing traffic congestion and pollution. The kind of industry needed is that involved in green energy, recycling, sensible clothing and the production of healthy food. The former site of Spring Mill is a place where a sensitively designed industrial estate might be possible. It is already surrounded by trees and has foundations remaining but it is not on a regular public transport route and is less accessible than previously mentioned sites that have been precluded. It is absurd to think of building on HS2.102/103/106/109 and on that part of HS2.107 not formerly occupied by Spring Mill. These are large areas of countryside enjoyed at present as part of the natural environment. HS2.104 also appears to be countryside, with a few established houses, and also should be protected from further building. Cowm Water Treatment Works (HS2.108) is ideal for industrial development. Let us have local jobs and ensure adequate facilities are available before any more houses are built in Whitworth.		P.S. I did not make this response online because it was mandatory to provide an e-mail address. Please change this, so that more people are encouraged to respond. P.P.S. Please keep me informed of developments.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
155	Jo	Furtado			Not Applicable	HS2.107 - surely permission for housing at the old Spring Mill site was granted long since? I suppose the local feelings are 1. Is some greedy company land-hoarding? 2. Is the fact that no-one has built on it yet an indication that there's something wrong with the land - pollution of some sort? 3. Long may there be no building there, given that access would be via Wallbank Drive (already an interesting drive, given the number of estate roads that feed into it, the number of kids, and the sections where the road narrows to one lane to accommodate parked cars); and then onto Hall Street (two schools, on-road parking, and the route onto the main road for the new 100+ house estate on the old Orama Mill site). Neither support nor oppose.		
195	Janet	King	-	HS.102, HS2.104-9 inclusive	Object	Whitworth' infrastructure cannot support almost 400 new properties - it is already nigh impossible to obtain a doctors appointment and my father has had to wait iver 6 months to obtain a podiatry appointment as there is only one who has been on long term sick and no replacement cover available. The fact that there is only one main arterial road into and out of Whitworth, which already has weekly road works delaying the already totally congested road does not bear thinking about. With an extra 400 properties and the increase in traffic that these will bring and as there is no large employer in the area most of these occupants will be commuting one way or another. We lost access to an A&E in Rochdale and now the nearest is either Fairfield or Oldham with the additional traffic these proposals would create the congested roads Could be catastrophic in an emergency. - - On a personal note, my family moved to Whitworth 12 years ago, from Oldham, due to its naturally beautiful countryside and I see the addition of these properties into areas of greenery (extending Wallbank estate etc.,) is the very short end of the stick. I can see that if these are accepted, encroaching on to green belt areas, slowly but surely the green belt areas will get smaller and smaller until eventually Whitworth just becomes another concrete plot with ever creaking infrastructure. - - Finally, I understand the need for affordable housing but there are plenty of mills/brown field that could be developed. However, I feel strongly that before any proposals are accepted it is of the utmost importance that the infrastructure is in place to support them, that includes roads, schools and NHS access.		-
249	Sandra	Cosby	-		Not Applicable	Wish to know were houses will be actualy built land off Eastgate		No
258	Fiona	Harrisson			Object	Whitworth is already a very busy village oversubscribed schools and GP Services with one road in and one road out. The pressure on the infrastructure would be immense, plus travelling to or from anywhere especially at peak times is already horrendous, nevermind with another approx 400 houses being built. Our skyline and beautiful views and countryside are also going to be lost.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
261	David	Eyes	-		Object	This is an unbelievable plan that will stretch amenities in the area even further. - - The new estate near Cowm has already increased traffic congestion on the one road in and out of the village and schools are already struggling to cope. - - There is also the issue of wildlife and the impact it will have on their environment. - - I for one will be leaving if this idiotic plan goes through. -		This smells of greed over common sense
268	Michaela	Radford	-		Object	Whitworth has had numerous instances recently regarding the roadworks for the infrastructure repair and maintenance. As an employee of all 4 major utility asset owners in the area, I am very concerned regarding the houses proposed. We only have one road throughout the valley and this is impacted severely when roadworks are planned. My concerns are that these are not managed correctly by LCC at present, therefore; more houses and more infrastructure would have a massive impact on the people living in the village. People face unemployment now due to the frequent issues we face getting into work. - Not to mention over crowded schools and doctors as we stand at present. - - I request, here in writing, to be informed of any planned meetings regarding the houses in whitworth and notification be sent in writing to my address above.		-
297	Lindsay	Fairhurst			Object	Poor access along the length of Main Rd (Market Street) one narrow road lined with parked cars , as only access into & out of whitworth. No alternative route. No trains or trams. Buses won't must travel on same one access road both in and out as cars. No motorway access under 20 min journey both ways insufficient work in area means people must travel to Manchester, leeds, bury, Rochdale etc. Current public transport unrealistic. Traffic at peak times currently gridlocked & congested. Increased housing will add to this burden. Utilities infrastructure unable to cope currently leading to repeated remedial roadworks. Schools full Doctors full Rossendale Council Lancashire Council needs to address transport & roadways access + education access beofer building homkes where people will be unable to travel to employment and school		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
298	Andrew	Fairhurst			Object	the number of houses proposed in this local plan for infrastructure can support. Whitworth has only one road in abd out and already this is constantly being dug up by utility companies often resulting in temporary traffic lights that cause massives queues of traffic in rush hours. Not only is the road narrow and conjested but there is no alternative train service - only the bus (on the same road) This is totall useless for the number of people wo commute to Manchester, Oldham and Bury every working day. Our schools, doctors and dentists are already close to capacity. There are very few options to travel to other facilities apart from along the one road through the valley.		Without robust and achievable plans to increase the support infrastructure for travel (a train for example) and health and education and culture this building should not go ahead. For people to afford these houses they need jobs first. Currently you need to move out of the valley to commute to work. Regeneration of the area and existing housing stock should come first.
391	Emma	Dudley	-		Object	We tried this 5 years ago and got no where. I'm objecting to the build of houses on land off eastgate on wallbank (actually land off westgate) the land is too wet to build and contaminated with all kinds of chemicals. There's so much wildlife too where are they suppose to go!! It's really unfair. My house will be to overlooked and I fear for my privacy. We can't cope with the amount of traffic going through Whitworth at the minute and things go really bad when there's traffic lights as you have probably heard with recent events so why add more it's ridiculous. There's no room in primary schools near by and the high school is full too, there's only one dentist and one doctors that can just about cope so we're are all these people from the proposed builds goingvto go. Do you even think about this. We should keep Whitworth green belts this is what makes Whitworth a great place to live we don't need anymore ugly looking houses added to it, there's enough new builds now. But really just think about the roads there's only one road on and off wallbank the traffic at hall street is bad enough		Please leave the green belt on the land off eastgate wallbank we really don't need anymore houses. This really annoys me because I have lived in my house on westgate since 1999 and have never heard of any build off eastgate until me and the neighbours seen diggers in the field at the back in 2012 that was because they had to do something on the land before the planning ran out so they put a bit of tarmac down!!!! Ridiculous!! And how are they aloud to build on the field at the back of westgate when it's not eastgate?? The plans say land off eastgate! Surely the field at the back of westgate should be land off westgate it's not on eastgate side

544	Lois	Lees	-		Object	Whitworth is a lovely but busy village. There is only one road into the village and one out. Traffic is already heavy at peak times. Adding more housing to the village will only increase the number of vehicles on the road, causing more congestion, and further damage to the already damaged roads. - Schools and GP's are already over subscribed. The village has sufficient housing and does not need more. - HS2.107 - The road onto Wallbank, leading to Eastgate/Spring mill land is a complete mess. Hall Street is full of pot holes and has been patched so many times that at the junction of Wallbank Drive and Hallfold, the road is terrible. There is limited access to the site at Spring Mill. - The land is full of wildlife. There is a pond at the side of the road, close to the waterworks access, there are Great Crested Newts in this pond, as well as frogs and other creatures. Herons feed at this pond. - There are deer living in the trees in the land at the top of the plot and badgers use the area to feed. Woodpeckers live in the trees, and many varieties of birds nest in the shrubs and bushes. - The land at Spring Mill has been contaminated for years, disturbing this land would release toxins and cause environmental damage.		Whitworth is a lovely village which is just managing to deal with the number of cars, houses and people that exist here. - There is already damage to the roads and water supply. Adding extra housing and more people will only cause more issues with the roa
561	Lynne	Meigh	Retired	SHLAA16005	Object	This proposal would bring a great amount of traffic onto an already congested area. The bridge at Hall Street over the River Spodden is already taking too much traffic. Near to the bridge there are three lots of housing complexes where there are a large a		-
590		Ashworth			Object	Absolutely ridiculous One way in and out of whitworth no extra schools or doctors when you have two or three cars per household. This is ruining our villages. We strongly object to this. Listen to the people who vote you in, as we have long memories		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
674	Tracey Jane	Dowd	-		Object	According to the council the local high school is under subscribed yet the school claims it's over subscribed and is turning away students. Which one is it as they want to build more homes where the schools are oversubscribed. The roads are in a terrible mess and there are no real parking spaces on the Wallbank estate. School times are an accident waiting to happen with the idiot parents who park anywhere they want. On Wallbank Drive people park over the steps and on Southgate one car parks fully on the path blocking 2 footpaths so you have to walk on the grass and the council wants to make it even worse by adding more houses and more cars.		Clearly this is a case of money rather than thinking about what it means for the local residents who have to live where they want to build more houses. - Why are these decisions made by someone who doesn't live in the area and has no idea what they are doing. If you are adding 50 more houses then you should st least double that by the amount of cars that will be in the area and with no where to park on the main streets in the area you are just making the situation worse. - Hall street is an absolute disgrace regarding the state of the road . The drains are not maintained properly so when we have a massive downpour it gets flooded. We have had so many bursts this year already and one burst was left for a few days that the road collapsed and blew my tyre resulting in me making a claim. The drains are not cleared when the leaves falls so the road gets flooded where Wallbank lodge is. -

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
692	Gregory William	Meigh	-		Object	<p>I object on the grounds that: - - 1. The roads leading off this site would be more congested and quite dangerous. Two of the main schools are on this road where at certain times of the day our children are walking to and from school. There are quite a number of our elderly residents living in this area who already struggle to cross these roads due to the amount of traffic. - - 2. There is a narrow bridge which has to take this traffic and is inadequate for this purpose and has a blind spot. - - 3. Due to vehicles parking at school times and when there is an event on at the church on this road, it becomes extremely narrow and queuing traffic on Hall Street, to get onto Market Street, can be as far back as the schools. It doesn't need much thought to see how dangerous this can be. - - 4. As previously stated, our village is already very busy. More traffic would be horrendous. Our schools are oversubscribed, our gp service are over burdened and the one main road cannot be expected to cope. - - Whitworth is becoming a place where people won't want to live.</p> <p>I object to this proposal on the grounds that: - - The roads in this area are very busy. They serve two busy schools, and a church plus Wallbank housing estate, plus three residential buildings for the elderly. - - At peak periods the traffic is intense with numerous parked vehicles and a great number of our children walking in this area. A lot of our elderly who live nearby are already struggle to cross Hall Street. At peak periods traffic will back up to the schools waiting to get onto Market Street, (our only main road.) There is a bridge with a bend and drivers cannot see until they negotiate this bend. This bridge I feel is already under a great strain. - If there is an event at the church this will add to the parking problem. There have been a number of accidents. - - If the 111 houses are built, how many more vehicles would be on these roads, maybe 100 to 150?? - - Ours schools are full our GP & services are overstretched. We are already experiencing electric cuts, burst water pipes, phone lines and internet being overloaded. Our greenery is slowly disappearing, as is our village. - - Enough is enough.</p>		
743			Whitworth Town Council		Support	<p>HS2.107 Land off Eastgate (should read land to rear of Westgate)</p> <p>This site has existing outline planning permission, Council agreed that this site is likely to be developed but raised concerns that we do not have the physical infrastructure nor social facilities for a development of that size.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
773	Susan	Worrall	-		Object	Whitworth is a village, a small community. Building these housing developments will change Whitworth into a town. - There is not the infrastructure to support this additional housing. There is one road in and out of Whitworth which is already struggling to cope with the increasing volume of traffic.Especially at peak times. If there are any traffic disruptions it can take 1-2 hours to get to Rochdale . We do not need more cars and the pollution they bring! - - There are limited school places both secondary and primary and local children born in the village will struggle to get places. - The one and only GP practice can not manage to provide the necessary health care for patients with no appointments pre bookable for weeks in advance. This healthcare will be diluted further. Living in Whitworth if A&E treatment is required which is often a life or death situation your chances of survival are reduced add more traffic on market street and your chance of survival diminishes further - - The people who live in Whitworth , live here because it is a village , it is quiet and the countryside is on the door step. Yet the plans want to destroy the village life, increase demands on exisiting services and increase pollution - - To consider building on greenbelt land in Whitworth is unbelievable and irresponsible, Planning has already - spoil the view of the countryside at the side of Daneswood ave and the wind farms are also affecting the views and countryside. - - Whitworth has lots of wildlife from deer, owls, herons, wild ponies as well as lots of insect life butterflies, bees etc which will all be at risk if the countryside is used for housing. - - There is empty housing all over the borough - fill these , not build more especially in our little village -		Stop putting profits first and put existing residents first
796	Steven	Smith	Wagg		Object	Already an overcrowded infastucture..object to greenbelt land being used and local wildlife being destroyed.the proposed site on horsefield av site would be built under or very near electricity pylons.the roads or already overused to and from whitworth so more traffic will mean longer delays on worse roads.the schools and doctors are already full..more traffic passing tonacliffe primary school would endanger the pupils at school opening and closing.previous mining at tonaclffe makes the proposed site unsuitable for building on.the transportation of heavy plant will damage the roads.		Don't use greenbelt land and build somewhere else.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
803	Marietta	Galbraith	-		Object	My objections for the proposed building of housing on the above sites is based on a number of reasons: - 1. Infrastructure. The current housing situation is already at (possibly beyond) capacity with regards to schools, doctor's surgeries, dentists, employment and traffic. There are no more schools planned and no way to expand the ones already here. Some children have to travel miles to schools out of the area due to oversubscribed local schools. This is the same for doctor's surgeries and many other amenities. - 2. Traffic. There is one main road in and out of Whitworth that already has issues with raised levels of traffic. In the four years we have lived here, there have been many occasions where traffic has been an issue due to constant roadworks (for various reasons relating to increased housing and traffic) which has caused major problems. Also, most people are employed outside of Whitworth so traffic is high anyway. More housing would increase this issue with no solution being given as to how it could be rectified. - 3. Utilities. More and more power cuts have been happening recently in Whitworth due to new housing as well as burst water pipes and problems with drainage. This has contributed to the traffic issues with roads having to be dug up every few weeks to 'fix' the problem. - 4. More housing would mean taking up land that is natural drainage for flooding. Recently, my area was put into the 'flood risk' category (although we haven't flooded), significantly increasing my home insurance. If more homes are built, this would increase risk of flooding to many homes around Whitworth, which would cause loss of market value and would reduce the chances of being able to sell the property. - 5. Much of the 'green land' would be lost which is detrimental to the wildlife around Whitworth. The Government have a duty to protect greenbelt land and our environment! The carbon footprint would be horrific! - In conclusion, building over 300 houses in Whitworth would cause issues beyond repair! Environment, traffic, pollution, infrastructure, drainage etc. would all be dramatically affected in the most negative and damaging way. Whitworth was not meant for so much housing and so many people.		
886	Michael	Banham	-	HS2.102 to HS2.109	Object	The infrastructure of whitworth is over stretched as it is,the school's cannot cater for such an undertaking. Theres only one road in or out of whitworth any problems on this road causes absolute mayhem. The winter months are an absolute nightmare just to get onto market street.		I cannot understand why anyone would want to over populate an area that is already struggling.
889	Derek	Lord	-	HS 102, HS105, HS104, HS106, HS107, HS108, HS109.	Object	We in Whitworth are sure that there are enough houses here at the present time.There are large estates at Cowm Park, Tonacliffe, Wain Gap, Wallbank, Knot Hill, Orama Mill Site, Edgemoor Close, and a small estate at Facit. The exits onto the one main road are at present full of traffic. The Doctors, Schools etc are now at bursting point. We in Whitworth have done our share in housing. Please think again before building any more. Thank You. -

892	Mandy	Sanderson	-	HS2.102, HS2.105,HS2.104, HS2.106, HS2.107, HS2.108, HS2.109	Object	The transport system around Whitworth cannot cope with the volume of traffic . Also local amenities are already at braking point..		No
911	Julie	Latham	-		Object	In principle I don't object to more houses or people. However I will until I am convinced that the planners are committed to the infrastructure improvements required to support the extra influx of people and cars . - The main bottlenecks caused by Whitwo		-
913	Michelle	Ashcroft	-	HS2.102, HS2.105, HS2.104, HS2.106, HS2.107, HS2.108 & HS2.109	Object	Whitworth is a geographical challenge at the best of times, positioned in a valley, consisting of ONE main road with multiple roads stemming from this leading to many properties that are built on the hillside. There are many green areas which are used by local farmers for their livestock. During times of heavy rain many of the roads are flooded, and during winter many roads are very dangerous in the snow. It is not uncommon for Whitworth to be gridlocked as there are far too many cars on the roads, all it needs is one set of road works and the town becomes inaccessible. The local schools are now over subscribed, the High school has had to turn away many children who only live a couple of miles away. The primary schools are also subscribed making it very difficult for teachers to provide a good education to the children. The local doctors are unable to cope with the number of patients, trying to get a same day appointment is nigh on impossible these days. We have issues with anti social behaviour due to lack of amenities available for teenagers, the local youth club has been closed down. There is a lack of police presence (the PSCO tries her best), people don't feel as safe as they should. The library is still under threat of closure, the pool is only open because of the people of Whitworth who run it. Building more houses brings more people, more cars, more strain on the infrastructure. I appreciate housing is needed but the number of houses that has been suggested will bring this town to it's knees.		I would suggest you come to Whitworth during the morning school run and see how difficult it is around Horsefield Avenue. Come sit in the traffic jams during rush hour. - - The government has spoken about creating new towns, this is a great idea, there are places that can accommodate thousands and thousands of houses. Build there not here!!!
916	Jane	Trudgeon	-	HS2.102 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	We are already an overstretched village infrastructure, the roads would not cope with an extra amount of traffic and would make the already difficult commute to exit/enter the village impossible. There are not enough schools nor would the doctor's surgery be able to cope as even now it is almost impossible to get a reasonable appointment time, - - The housing developments would impact on wildlife		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
918	Marion	Ashworth	-	HS2.107 , ALL.	Object	I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.		I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.
922	Susan	Percy	-	HS.2107 HS2.106 HS2.109	Object	I wish to object to the proposed building developments on the grounds that there is one route into and out of this village which is Market Street. This route is already very congested during morning and evening rush hour and also due to school runs at other times of the day. This is compounded by the many times that the roads are being dug up for roadworks and temporary traffic lights in situ. - - Increased traffic would be an issue for children that play in these areas. - - Schools are also over subscribed in this area and additional parking outside schools would make a bad situation even worse and dangerous. - - Doctors surgeries and Dentists are also full and additional patients would mean longer waiting times to get appointments and would be detrimental for the health and well being of local people. - - Building on green belt would result in loss of wildlife e.g newts, badgers, foxes and hares. Deer use shelter within these areas and it would be detrimental to them if they lost this facility. - - Drainage is a major issue - loss of more greenbelt would make this worse as we already have problems. There is a culvert runs through the middle of Tonacliffe which takes land drain water off the moors this is already near bursting point and we could be in danger of severe flooding. - - Has a land survey been undertaken? Some of these sites would be unsuitable for building on.		-
935	Christine	Fallon		HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	1 Whitworth has one main road which is often gridlocked the smaller access roads are grossly un suitable e.g Tonacliffe. - 2 Schools are already oversubscribed parking at drop off times would be more chaotic and dangerous. - 3 Doctors and dentists are already at capacity. - 4 Services of gas electricity and water would require major upgrade. - 5 We are seeing flooding due to inadequate drainage this would be increased. - 6 Is this acceptable use of greenbelt land where previous planning permission has been refused the effect on wildlife and trees would be immense.		-
939	Geoffrey	Fallon	-	HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	Whitworth is a small village with one already inadequate road. Doctors dentists and schools are already oversubscribed parking in school areas is dangerous already and would be far worse. - Gas electricity and water services would need major upgrade. - This is inappropriate use of greenbelt land causing damage to wildlife and the environment drainage is a major problem now with frequent flooding.		-

955	Janet	Whitehead	-		Object	Whitworth is already a very busy village, oversubscribed schools and Doctors - We have one road in and one road out which is almost impossible during peak times in the morning - The houses already exceed the heights up the sides of the valley - Our green belt is very important to wildlife and the the people the live here - If we let one builder onto greenbelt it opens the doors to far too many others - Our population is big enough and we cannot accommodate many more		Our Councillors are voted in by us and now need to stand up and fight for us - - 400 houses is a ridiculous amount of new houses for a tiny village - - We have had 2 different sites where new houses have been built in recent years we've done our bit for Government figures - - Please find somewhere else
962	Kathryn	Gill	-	HS2.102, HS2.105, HS2104, HS2106, HS2107, HS2108, HS2109	Object	I object to any changes in use of local greenbelt land to build houses. Also, there is only one road through Whitworth and it is already congested. We have only 1 doctors surgery, and not enough school places to accommodate hundreds of additional families. Greenbelt land cannot be restored once built on, and these proposals would change the landscape of Whitworth. I am also concerned about the building of 20 properties around Cowm. This is a resource continually used for recreation by the people of Whitworth and should be preserved.		
979	Marie	Pye	-		Object	All of these developments will contribute to already existing traffic problems as there is one road in and one road out of the area. The high school is already oversubscribed with local children not being offered places.

992	Susan	Farrell		HS2: 102, 104, 105, 106, 107, 108, 109	Object	<p>I strongly object to the building of houses on all the above mentioned sites for the following reasons: - Greenbelt land is of importance to all the wildlife of Whitworth and Shawforth . Deer and bats live in the forests in the area. Many badgers and foxes inhabit the countryside and rare species of wildlife live in the ponds. - The forest area at Tonacliffe would be cut down having a negative impact on the environment. - Tonacliffe road is already dangerous for children with cars parked along the length of the road at school dropping off and picking up time. The increased number of cars if more houses were built in the area would be worse for the children and residents. - Local amenities such as dentists and GPs could not cope with the increased population. It is almost impossible at the moment to get a GP appointment in less than two weeks. More housing would have a detrimental effect on the residents of Whitworth and Shawforth. - Facilities such as water, gas and electricity are already stretched and a major upgrade of the infrastructure would be required to support increased housing. - Local drainage cannot cope with the current usage. More housing could have an impact on flooding. - Public footpaths could be lost reducing the number of rights of way for walkers. - The road network both ways from Rochdale to Bacup is already gridlocked. More housing would put an increased strain on traffic and the already poor public transport in the area. - The only high school in the area is already oversubscribed. With increased housing parents may have even less chance of a first choice school for their children. They may have to travel miles to school. - I understood it is government policy to protect Greenbelt land except for 'Exceptional Circumstances'. What are the exceptional circumstances that enable housing to be built on the greenbelt land in Whitworth and Shawforth?</p>		<p>Summary - - Whitworth and Shawforth are already busy villages with oversubscribed schools and GP services with one road in and out between Rochdale and Bacup. - - Can we accommodate more housing that will put pressure on already overstretched amenities, increase traffic and change the beautiful landscape forever?</p>

1109	Jane	Gadsby	-		Object	<p>I wholly object to more housing being built in Whitworth!! We are a small(ish) village that can not cope already with the amount of new houses and people moving into it!! Our schools are already over subscribed; they are turning people away that don't live overly far away that a few years ago would have had no problem getting a place. The Doctors surgery can't cope with the number of patients wanting appointments. You are also increasing the risks of flooding. My house is already at risk and has already flooded twice. The main road (one road in and out) is gridlocked most mornings with commuters trying to get out of the village but most of all you are taking our beautiful green areas that Whitworth is so lucky and honoured to have. We have lots of empty properties that can't be filled already!! Please leave us and our village alone!!</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
1134	Abigail	Leyland	-		Object	WE DO NOT NEED ANYMORE HOUSING IN WHITWORTH! The schools are already oversubscribed, our local doctors can not possibly take on any more patients as it is already a struggle to get an appointment currently. We only have one road in and out of the village which gets badly effected by rush hour traffic, making it difficult for the locals to get to work/school etc. We have such a lovely view of greenery surrounding our little village and we do not want our sight ruined by building ugly, unnecessary housing.		
1166	Brendan	Doherty	-	HS2, 102,104,108,105 ,107,106,109.	Object	WHITWORTH IS FULL. This statement encapsulates all the issues surrounding any expansion of dwelling houses in the township of Whitworth. - - The negative impact of any developments in the town cannot be overstated. - - The whole nature of this small township will be irreversibly destroyed if development are allowed. - - Flora and fauna will be the first to suffer. This valley is home to an exceptional and expanding variety of animals and trees and flowers. This growth has taken decades to achieve and would by totally reversed by the stroke of a pen. - - To say that all the ingredients which go to make up Whitworth as a place for people to live are overloaded is indeed an understatement. - - Congestion of traffic and people is at its limit, any increase can only be detrimental to the health and quality of life of residents. - - Local services, schools, doctors, civic amenities are already at their serviceable optimum. - - The existing utilities of electricity,gas and water only just maintain service. There are often cuts in these making it seem that we are a third world town. - - Whitworth is a linear town with no bypass or possibility of such. Most of the day traffic is heavy and at peak times chaotic. This combined with the nature of HGV traffic leaves the roads in constant need of repair. Add a very poor public transport system and the certain increases proposed then the result is guaranteed to be disastrous.		Listen to the people of Whitworth.
1190	Nathan	Worrall	-	HS2.107 , HS2.108, HS2.109, HS2.102, HS2.105, HS2.104,HS2.10 6	Object	Whitworth doesn't have the infrastructure to sustain the construction of these - new houses. The local doctors and schools would struggle to meet the needs of the increased population. There is bad traffic in Whitworth already, this will only make it worse and these traffic problems are highlighted when there are roadworks and there are large queues. The proposed sites are located on greenbelt land, and this will have a negative effect on the local wildlife as well as destroying the natural beauty of this land.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
1272	Michala	Geldard	-	HS2.102, HS2.105, HS2.104, HS2.106, HS102.107, HS2.108, HS2.109	Object	I am objecting in general to the proposed house building in various sites around Whitworth and specifically in relation to the proposed sites t Tonacliffe. My objections are based on a number of reasons: 1. Wildlife in the local area. Deer, badgers, foxes and hares live within the forest areas. Rare protected newts live in the pond. Bats nest in the forest. The importance in f this green belt land for the wildlife cannot be over emphasised. - 2. Tonacliffe forest would need to be cut down adversely affecting the local environment. - 3. The impact of more cars around local schools, especially Tonacliffe School, is of great concern due to the already high volume of traffic. Increasing this would be unacceptable. - 4. Local amenities such as schools, doctors, dentists are already to capacity. I have concerns that more houses will have a negative impact on the lives of current residents in relation to these amenities. - 5. Has the infrastructure of our small village been considered in relation to electricity, gas and water supply if more houses are built? Whitworth already experiences power cuts and seems to be worse since other recent building developments have been completed. - 6. The road network into Rochdale is already gridlocked. More houses will increase this problem. Public transport from Whitworth is limited to buses and I consider that if this proposed building goes ahead there will also be a negative impact on the poor public transport in and out of our village. - 7. Local drainage already struggles to cope with usage now, if the volume of residents increases would the drainage system be able to deal with the added strain? - 8. We bought our property because it is located on the last cul de sac of a small estate with no through traffic. This proposed building work will completely alter this into drive through roads. Plus the volume of traffic will - Increase which I consider to be unacceptable. - 9. I am very concerned that we may have loss of privacy as we are not currently overlooked and this was a major consideration when we bought our house.	-	-
1283	Jonathan	Geldard	-	HS2.102, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	Whitworths infrastructure is already at near full capacity. The single main road through Whitworth is, at times, grid-locked. Streets around the primary schools is chaotic. There is a definite flood issue through the valley. Crime is rising unchallenged. The rich and diverse wildlife is flourishing around Whitworth. - Any of the development projects would have a negative and detrimental implication on Whitworth and it's residents.	-	-

1310	Richard	Dolan	-	HS2.101-109	Object	<p>We are vehemently opposed to all housing allocation in Whitworth. Our group has decided to vote against and actively campaign against all Councillors and MPs in favour of this proposal. We will withhold our votes and encourage family, friends, and community to do likewise. - We are outraged by this proposal, especially HS2.107 that will encroach on Healy Dell. On this point we will be contacting the National Trust and other such organisations to make them away of the proposed desecration to the Green Belt. Furthermore, we are now investigating possible financial links between all Councillors, MPs, and RBC employees involved in this issue with the proposed contractors. This senseless proposal for a village far too small to accommodate a possible 300 new homes suggest an ulterior motive. No one in our community that we have spoken to is in favour of this plan and we will use our sizeable influence. - There has been more than enough housing development in Whitworth. This new proposal will destroy our green spaces and necessitate a new schools, doctors' surgery, dentist, shops, and possible a new road. All future housing development must stop. Our community can not accommodate any more. - In light of the fact that this proposal has not been advertised to a great extent (we have spoken to people who know nothing of it), we will be conducting a petition again this proposal and encouraging everyone to sign the following statement: - We will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community.</p>		<p>To reiterate, we will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community. - - The people's power will be felt if this plan is authorised.</p>
1336	Maureen	O'Mara	-		Object	<p>Whitworth is already struggling with oversubscribed schools. There is only 1 small GP surgery and 1 dentist. The village cannot cope with stretching the existing amenities. - One of the main objections I have is the traffic and parking, which is already dire. Streets are almost impossible to drive down safely due to double parking. There is only one main road, which when closed for any reason means driving via Todmorden to get around - this has happened on a number of occasions. Most roads have very steep inclines which are regularly not gritted in winter. To increase parking and traffic would destroy Whitworth. Where would access roads be and how would this affect current residents.</p>		
1363	Gareth	Dolan	-	HS2.101 to 109	Object	<p>I do not live in Whitworth but spend a lot of time there with my family. I am deeply concerned by this proposed loss of green belt and will do my utmost to object against it. - - I strongly urge RBC to re-consider its proposal. Whitworth cannot handle any more development. - - Thanks</p>		<p>If this destruction of the green belt in Whitworth is passed then I shall simply take my family and my money elsewhere as there will no longer be the same attraction Whitworth now offers.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
1365	Michael	Whitehead	-		Object	The doctors is overcrowded, the schools are overcrowded and there is one road in and out. All three of the mentioned cannot cope in the current state. Whitworth has too many houses for the current infrastructure. If the proposal goes through, which I sincerely hope it does not, there will be 300+ more homes within Whitworth. This means 650+ more people needing a doctor, 300+ more children who need schools and 300+ more cars on the roads. If the current infrastructure is struggling I dread to think how the village would end up with that amount of extra people. - There are also many deer which have recently returned to the greenbelt land on either side of the valley. Moving any sort of greenbelt/urban borders is highly likely to destroy their habitat and force them away.		-
1397	John	Cavanagh		Eastgate	Object	would like to object to the above sites being changed to buildings lands on the following basis, Whitworth is already full to bursting Doctors, schools, dentist are all full. Traffic has one road in and one road out, all it takes is one set of traffic lights and the whole village comes to a stand still causing problems for local businesses in the surrounding areas. The area around Tonacliffe is home to wildlife such as badgers, foxes, bats, deer, newts, frogs where will these animals go will they be simply expected to relocate??? Local people use the moorland for walking, cycling it is a play area for children and is simply the last green space we have that the council haven't built on. We have ponds where fish and pondlife live geese spend summer here . - - Drainage is very much a problem already we flood when we have a regular amount of rainfall, when it rains heavily the drains cannot cope and the area in Tonacliffe is heavily saturated. - - Access at Tonacliffe is already bad for emergency vehicles and large vehicles, once you include more housing and the school traffic it will simply become impassable.		Yes absolutely let the planning officers spend some time actually in Whitworth village they will see how much traffic there is and how we are struggling to cope, the new Tesco is an accident blackspot which the planners felt fit to approve. Come down from your ivory tower and look what normal people are struggling make a decision that is right for the people and community in Whitworth and have to struggle everyday with traffic, leave us the green space that we deserve

1417	Gillian	Middlemas	Whitworth Community High School	HS1.102 HS2.103 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	As Headteacher of the only secondary school in the Whitworth area, I am concerned that the proposals to build considerable numbers of new dwellings take no account of educational provision in the local area. - The school is already oversubscribed: for 2017 entry into Y7 over 40 families were unsuccessful in gaining a place, despite Whitworth Community High School being their first preference; over 40 families went onto on the Local Authority's waiting list for a place; over 25 families went to Appeal for a place, and very few of them were successful. The school now has 640 students and, without extra classroom space, has no capacity to increase the admissions number, nor to take additional students into existing year groups. - Likewise, many local primary schools are also full / oversubscribed, suggesting there is insufficient educational provision in the local area already. - This situation will be exacerbated if the proposed number of new dwellings goes ahead, unless the developers or Lancashire County Council are prepared to increase the school's capacity by funding additional classroom / learning / social space. The school is over 50 years old, largely of Langspan pre-tensioned concrete construction (intended life expectancy already exceeded) with HAC (high alumina cement) - In addition, the school experiences ongoing issues with the provision of utilities: the water main up the school drive is at risk of collapse; the water supply to the area has recently been affected on a number of occasions, and presumably further demand from new building would increase these issues. - The proposals for new housing does not appear to be linked to any plans to improve the traffic situation in the Whitworth area: lengthy queues heading towards Rochdale each morning already create issues for students travelling to school.

1440	Helen	Banham	-	HS2.107 Fern Isle Close	Object	<p>1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - Would my house and others be overlooked. 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. 16. 						unbearable strain on this network.		
1469	George	Salt	-		Object	Whitworth is located in a valley, this in itself presents issues with the amount of space available. 7,500 people lived in Whitworth according to the data from the 2011 Census and this is a large amount of people if you look at the services and infrastructure in Whitworth. To start off with there is one GP surgery that has 7,248 people registered with them. Whitworth Medical Centre has 4 GPs which means that for one GP there are 1,812 people. There is not any more capacity available for more people to register with the practice. - - Schools are also busy especially with just one school for secondary education. With more people living in Whitworth that would mean a greater demand on schools and could result in some children living in Whitworth not going to school there. - - Going back to Whitworth being a valley this physical feature means that infrastructure being put in can be difficult. Whitworth has one road in and out and during peak hours this is a very busy road. Most new people would probably be using a car as their main mode of transport adding more pressure to Market Street and its tributary roads. Public transport is also very poor in Whitworth meaning that it is not really a viable alternative for any new people who would come to Whitworth. - - As shown with a few of these arguments Whitworth does not have the capacity to accommodate an extra 359 houses over the next 15 years. For example an average of 3 people per house would result in 1,077 more people living in Whitworth. It is not going to work.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
1493	Kathryn	Meigh	-		Object	I wish to object to the proposed site for housing off Eastgate in Whitworth because of several reasons - 1) Hall Street is already very congested with traffic especially at peak times and it takes a long time to get out on to the main road due to the school, church and residential traffic. - 2) Extra road traffic would increase the risk of safety to motorists, school children and the Elderly as there are 2 busy schools and at least 3 elderly people's residence off Hall Street i.e. Spodden Fold bungalows, Riddiough Court and Masseycroft. - I have reported issues with the blind spot on the road to pull out safely from Spodden Fold when people already speed down Hall Street towards Hallfold and Wallbank and about parents narrowing the roads to drop off and pick up their children up from school. This would only become worse with more housing. - 3) The impact this would have on local services. The schools and local Doctors surgeries are already over subscribed and it is difficult to get appointment including the local dentist. More Houses would mean even more pressure on local vital services. - 4) The extra demand for amenities of water, gas, electric, broadband, telephone etc. In Whitworth especially in the hall street area, we have had power, broadband and water cuts repeatedly. The general consensus is the increased demand created by the old Orama mill housing estate has not helped the situation and more housing will add to this problem. - I have lived in Whitworth all my life and if these plans go ahead, I will have to consider moving away from my area because of commuting difficulties and access.		
1497	Wendy	Rose	-	Eastgate	Object	The infrastructure of Whitworth cannot support or sustain further development. There is only one road in and out of Whitworth. Congestion is a serious problem now due to the volume of traffic. When there are roadworks the situation is bordering on dangerous as emergency vehicles are hindered. Further residential development would only compound this issue with higher levels of vehicles. - - Power cuts are a regular occurrence in this area, one can only assume this would get worse with the extent of the proposed developments - - Doctors surgeries are fully to capacity and cannot adequately serve the community at the moment. Waiting times for appointments is ludicrous. Schools are over subscribed. Parking around schools is dangerous and any increase in school children would seriously impact on this. - - All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - - Proposed land in some cases is not viable as parts are prone to flooding. Culverts running through a proposed sight would impact on flood defences in the area. - - - -

1502	Danielle	Makin	-	HS2.102, HS2.103, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. - - A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. - - Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done. - - Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. - - The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. - - The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village.	-

1545	Robert	Hesten		SHLAA16005	Object	<p>We have consulted many villagers living in Whltworth and their ideas form a large part of our objections to all the proposed new housing developments (as referenced on page I); particularly those sites (underlined on page I) encroaching on already limited public spaces which consume Greenfield and environmentally sensitive areas. Our view is supported by the National Government Policy Framework (NGPF) which states that planning should contribute to conserve and enhance the natural environment.</p> <p>According to article 8 of the Human Rights Act, everyone has "the right to peaceful enjoyment" of their home and immediate surroundings. These planning proposals would interfere with that right.</p> <p>Public footpaths to surrounding countryside would be compromised. There is also research that suggests that being in, and having access to, a green landscape can improve mental wellbeing and quality of life.</p> <p>According to article 17 of the Government's Planning Policy Statement (GP PS) on Greenbelt conservation, "a high level of protection should be given to wild life habitats". Further house building would have a devastating impact on them, and the landscape as a whole. We believe they would represent a loss of residential amenities to the community.</p> <p>Greenbelt land is important in the protection of Whitworth wildlife. Cutting down the forest of Tonacliffe would represent an act of ecological vandalism. Deer sleep, birds sing and bats nest in these areas. Hares and foxes are frequently seen. Rare protected newts live in nearby ponds. In the coppice, surrounding Cowm Waterworks, there are owls, badgers and increasingly rare, English bluebells. Government Planning Policy is supposed to protect Greenbelt except for exceptional circumstances. What are these circumstances and how have they been justified by the planning committee?</p> <p>Various postcodes within Whitworth have been officially re-classified as within a flood plain e.g. Cowm Waterworks. Therefore, proposing further house building beneath Cowm Reservoir (a local beauty spot) would seem irrational. The dam wall (a public footpath) is now closed for safety checks until November to allow United Utilities to test the infill and stability of the dam. Many residents are very concerned about the implications e.g. a major flood risk. Any reinforcement would be costly. How often would these tests have to be performed in the future?</p> <p>Cowm Waterworks has a small underground storage reservoir within the site. Compromising that and the culvert running through the middle of the Tonacliffe site would increase the risk of flooding. With the unpredictability of climate change (e.g. more frequent</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.107	Further comment
						<p>flooding in the valley), should the council be protecting residents from it rather than creating further problems? Local drainage (water and sewage) cannot cope now in some areas. Should County, District and Town Councils together with United Utilities officially verify which of these proposed development sites are in potential flood areas before planning permission is granted? Further house building would expose a failure "to deliver sufficient community infrastructure and services to meet local needs" (a key principle of the National Planning Policy Framework).</p> <p>Such development would also cause further pollution (e.g. to air quality - more traffic on the roads) creating a greater carbon footprint for the valley and the next generation. Article 19 (from the GPPS), in line with UK Sustainable Development Strategy, states that "the environmental costs should fall on those who impose them"; will the council take this "polluter pays principle" into consideration before making any decisions?</p> <p>Geographically, in some of the proposed sites, the landscape makes building difficult. It would require radical and costly solutions. Where would the access roads for these developments be? If any small byroads are used, this would increase traffic, thereby increasing the risk of accidents to children (particularly near schools). Additionally, in winter such roads are often not salted or gritted making them a hazard for the disabled and the elderly resulting in more accidents and costs for the NHS.</p> <p>There is already inadequate infrastructure in transport where roads are gridlocked at peak times and in need of repair e.g. the already congested road leading to the reservoir and quarry (adjacent to Cwm Waterworks). With one main road in and one out, Whitworth is already a congested village.</p> <p>Public transport is very limited e.g. no train/tram services. How will the increased traffic be managed?</p> <p>In other services, there have been at least 4 outages this year in electricity in the Whitworth area.</p> <p>Water and gas would also need upgrading (representing further expenses on already overburdened service users). Present resources would fail to deliver the increased demand new residents would require, thereby failing to meet the criteria set out in NPPF.</p> <p>Currently, schools, doctors and the sole dental practice are all over overstretched and over subscribed. This depletion in resources would curtail the life chances of future generations. Further house building would further increase class numbers in schools and severely overload resources there. Frequently, waiting times for doctor's appointments are well over four weeks. Dental</p>

1	Phil	Jones			Object	<p>Thanks for your prompt reply I attended the meeting and would also like to raise the following points re united utilities land next to cwm reservoir :</p> <ol style="list-style-type: none"> 1) I live on the hedgerows the overflow runs through my garden this year it has risen higher than ever before, what impact would the extra houses have on this? 2) I was told by the environment agency I could not build within 10m of the stream when applying for planning resulting in me having land surveys to clarify application! 3) I have a badger set in my garden and bats fly over mainly at dusk coming from that direction! Has the impact on this been thought about? 4) drains in this estate are sub standard at the best mine have collapsed twice over the last ten years! 5) the roads in this estate are in poor repair and are never gritted in winter resulting in sometimes not being able to get off the estate more houses would mean risk of more vehicles being stuck at side of the road! 6) local schools are already nearly or arefull, 7) can't get into the one doctors easily more people even less chance of an appointment <p>Online survey comment:</p> <p>Access to the proposed site is no sufficient to carry the amount of traffic, also due to the fact the drainage on the cwm park estate is poor at best. It would ruin the look if cwm reservoir, the estate is never gritted in winter due to insufficient funds!!! Whitworth is a one road in and out already a nightmare, roads in poor state will be made worse due to increase of traffic</p> <p>Also I wish to be kept informed via this email of any further changes to the consultation re the united utilities land!</p>

5	Kimberley	Ashworth	-		Object	I am writing to object against the proposed local plan for Whitworth. - - I am unable to attend the meeting tomorrow night due to illness but I have looked at the proposal as stated below: - - http://www.rossendale.gov.uk/download/downloads/id/3700/whitworth_map_with_street_names - - I'm disappointed to see that a number of green spaces are being considered to build houses on. The green spaces behind Tonacliffe School are used by many for walking. To build on this space would be detrimental to the green space due to wildlife and other conversation in that area. - Building houses would also see an increase in traffic which is at demand during peak times at the moment. - - Other green spaces on the plans are also being considered. In a village that is at full capacity I am unsure why Rossendale Council see the need to build in places that already has adequate housing. - - There are no plans to look at new recreational and family facilities which the town needs. The closure of the children's centre means that new parents and young families have nowhere to go. The plans don't take any such new facility into consideration and I urge Rossendale Council to look at this. - - I know I speak on behalf of many in the Town when I say the option for Whitworth is option 1 'Do nothing' - - Kind regards -		I am extremely disappointed that a meeting has been arranged in Whitworth for tomorrow evening when all the other consultation meetings are taking place in September
24	Erica	Preston	-	HS2.105, HS. 107, HS2. 108, HS2.109	Object	The single road through the valley is not up to the volume of traffic using it currently. Hall St.will be a blocked junction, as will Tonacliffe Road. There are not the amenities in the area eg.doctors, dentists, schools etc. Unless major investment in the valley is made to update amenities and utilities these developments will cause immense problems and destroy the reasons people want to live here and turn the valley into yet another sprawling suburb. - I have every sympathy for the need for housing but feel the proposals are ill thought out and will lead to a detrimental effect on the township.		The need for housing must be weighed against the needs of the valley as a whole and destroying green belt and valued wildlife habitat will not make it a place people want to live.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
27	Michael	Chianca	-		Object	<p>HS2.102 - King Street - HS2.104 - Old Lane - HS2.108 - Sandbank Gardens - HS2.105 - Albert Street - HS2.107 Fern Isle Close - HS2.106 Moorland Cres - HS2.109 Horsefield Av - - All these proposed sited are unsuitable for the following reasons. 1. Wildlife - This greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest area at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. 2. Loss of Trees - The forest itself would have to be cut down a totally unnecessary action when we have other areas within Whitworth to build on that would not require the destruction of trees. 3. The local school at both dropping of and collection time around this area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. 4. A Culvert runs through the middle of the proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. 6. Local amenities such as Schools, Dentists, Doctors are already full and building more housing would have a negative affect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. 9. Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would endanger the lives of the residents living there especially the children. 10. Government policy is to protect greenbelt areas except for "Exceptional circumstances" can you explain what those exceptional circumstances are when we have other areas more suitable for building houses on. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental affect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - My house and others would be overlooked. 14. As the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including school children. 16. This area and the surrounding area has already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost.</p>

32	Paula	McNinch	-		Object	There is not the infrastructure in Whitworth to cope with extra housing. The road in and out is already too busy, the schools are full and there are no facilities for young people.		-
35	Catherine	Duffy	-	HS2.108 in particular, + all the other proposed sites in Whitworth	Object	I am very concerned about all these proposals, especially Sandbank Gardens! - - 1) Where is the access going to be? Sandbank Gardens is a cul-de-sac with private gardens at the top, it is a very narrow street with already many residents cars parked on the kerb/street. The public house close by is one of the hubs of the community and as such hosts regular events, ie meetings re the local football teams, starts for races and many more. Sandbank Gardens then takes the brunt of people attending these events parking their vehicles on Sandbank Gardens. Maybe the plan is to use Tong End as the access, again another nightmare! On a very narrow over used road. It is used every week day by the waggons up and down to the quarry, lots of visitors to the water ski centre, the reservoir and off road centre in the quarry, along with residents cars parked outside their homes on the road. - - 2) The water and electricity struggles already with the amount of properties in the village. We have frequent disruptions in services in both these areas, more properties on this clearly out of date system would surely lead to even more disruption. - - 3) The majority of the primary schools and the high school are running on full capacity (even with waiting lists), therefore, who will fund the building works and staffing, to accommodate the influx of children wishing to be educated, as I am presuming that the proposed sites would be family homes! - - 4) Our village has one road in and out, which is already busy. The slightest disruption makes for major delays, surely more users would make these delays more permanent.		Leave our village as a village, don't make it into a town. It's facilities and amenities are already at full stretch with no sight of extra funding to accommodate these proposed extra residents!!

45	Patricia	Clegg	-		Object	- I object to the above planning proposal for the following reasons:- - The access road suggested from Tong End is not suitable, it runs alongside a listed a grade 2 listed property (nos 30 & 32). - The access road suggested also has poor visibility when turning out on to Tong End. - - Tong End and Tong Lane are already under pressure from traffic running to and from the quarries and is in serious need of repair. - - The main road through Whitworth (Market Street) is already congested with traffic especially during rush hour and is again in need of repair. - - All the schools in the valley are oversubscribed - - The Doctors surgeries at both Whitworth and Healey are under severe pressure already. - - You are developing on land that is Green Belt, near a reservoir that is used by many for walking and recreation. It should be protected not built on! - - The proposed housing will be built very near to the reservoir dam, as United Utilities recently sent out a letter advising residents what to do if the dam fails, is this a sensible thing to do? - - There is a large underground water storage facility next to the proposed housing. - - There has been a problem with surface water flooding on Tong End for a long time. No 30 had a long standing problem with water seeping into the living room which took over 2 years to sort out. None of the authorities involved could find out where that water was coming from. - -		- Although at the moment the planning proposal is only for building properties on the old water treatment works, with the amount of infrastructure that will need to take place, widening the road for example, it would only be a matter of time before more houses would be built and the whole area would be spoilt. - - - There is also a memorial woodland site along the side of the proposed access road, what would happen to this?
53	Nicola	Clegg	-		Object	I object to the above planning proposal for the following reasons:- - The access road from Tong End runs alongside 2 listed buildings (nos 30 & 32) - - There is poor visibility when turning out onto Tong End, putting people at risk who are walking up to the reservoir. - - Both Tong End and Tong Lane are already under pressure from traffic running to and from the quarry, they are permanently dusty and are in serious need of repair. - - All the school in the area are over subscribed. - - Both doctors surgeries (at Whitworth and Healey) are under severe pressure already. - - You are developing Green Belt land which according to government regulations should be protected! - - The proposed housing would be built near to a reservoir dam in an area that is already prone to flooding. United Utilities recently sent out a letter advising nearby residents want to do if the dam fails, is this a sensible thing to do. - - There is also a severe problem with surface water flooding on both Tong Eand and Tong Lane. No 30 Tong End had a long standing problem with water seeping into the living room which took nearly two years to sort out. None of the authorities involved could find out where that water was coming from. - - There is a large underground water storage facility near the proposed site. - - Have you considered air pollution, Whitworth is a ribbon development running along one road, surely a massive increase in vehicles using an already very busy road is bad for all residents. - - The bus service is not a regular as you seem to think it is! - - There is a memorial woodland alongside the proposed access road, what would happen to this. - - - -		- I have noticed that most of the sites that you have allocated for housing in Whitworth are on - Green Belt, why? There is not a great demand for housing in the valley in fact there are plenty of empty properties available already. Why build so many new houses in an area whose infrastructure is already severely stretched it doesn't make sense.

54	David	Tod	-		Object	I object to the above planning proposal for the following reasons:- - The access road from Tong End runs alongside two listed buildings, nos 30 and 32. - - There is poor visibility when turning out onto Tong End, putting people at risk who are walking up to the reservoir. - - Both Tong End and Tong Lane are already under pressure from traffic running to and from the quarry, they are permanently dusty and are in serious need of repair. - - All the schools in the area are oversubscribed. - - Both doctors surgeries at Healey and Whitworth are under severe pressure already. - - You are developing on Green Belt land which according to government regulations should be protected. - - The proposed housing would be built near to a reservoir dam in an area that is already prone to flooding. United Utilities recently sent out a letter advising nearby residents what to do if the dam failed, is building more houses a sensible thing to do? - - There is an underground water storage facility near the proposed site. - - Have you even thought about air pollution and the detrimental effect so many new houses would have? Whitworth is a ribbon development running along one main road, surely a massive increase in vehicles using an already busy road is bad for all residents. - - The bus service is not a regular as you seem to think! - - There is a memorial woodland alongside the proposed access road, what would happen to this? - - -		Although at the moment the planning proposal is only for building on the old water treatment works, with the amount of infrastructure that will need to take place, widening the road for example, it would only be a matter of time before more and more houses would be built, spoiling a area that is loved and well used by all residents of Whitworth. - - In fact most of your proposed housing in Whitworth are on Green Belt, Why? There is not a huge demand for new housing in fact there are many empty properties available, why put more pressure on a village whose infrastructure is already stretched to the limit.
56	Valerie	McDonald	-		Object	Whilst I recognise the need for further housing within the area, I am concerned about the siting of so many proposed dwellings in this particular valley. The roads are already clogged at rush hour and as there is only one road through, movement of traffic, should there be an accident or roadworks, becomes frustratingly unpredictable. What provision is there to maintain and develop the road system in the valley? - - Whitworth High School has become more popular over the past couple of years with waiting lists existing. What provision will be made to expand the school, and will this be done with a long term objective in mind and not just a sticking plaster effort to put up some portable classrooms? - - Local services such as the Children's Centre have just been lost. What plans may be afoot to reinstate such necessary provision? I feel it is morally wrong to simply build new houses and forget about the infrastructure to support this development. - - There is a wealth of wildlife on the moors where you are proposing to site many homes. Presumably there will be checks in place to ensure some of these species are not endangered? - - Finally, there are already plenty of properties on the market at very affordable prices (in comparison with some surrounding areas). Some of these have been on the market a while? Why, if there is already affordable housing, is there a need to build more? -		-

70		Anonymous			Object	<p>1. By virtue of necessity this is an industrial building on a greenfield site. I object, this proposal would place houses on this greenfield site.</p> <p>2. In 2015 I received a leadlet from L.C.C explaining evacuation procedures should the dam burst. You are proposing to build houses nearer to the dam and on a known flood plain.</p> <p>3. To designate the site for the number of houses proposed would not be a sound economic proposition. RED HERRING - there would have to be far more properties. TELL THE TRUTH Highway - Access & Egress - No Adequate highway to this site.</p> <p>4. Tong End & Tong Lane are already congested with traffic. Traffic NEVER STOPS, well after & before the quarry has closed.</p> <p>5. Adjacent to the site there is a large, deep underground water storage reservoir. WHAT WILL HAPPEN TO THIS?</p> <p>6. An ecological study was carried out on the site by Bowland Ecology Unit - IN THE MIDDLE OF DECEMBER</p> <p>7. U.U has designated Cowm as an area for peaceful recreation. Pressure on this area is too great now, more houses would exacerbate this problem. The proposed development has a greater impact on the green belt</p>		
98	Jacqueline	Butterworth	-		Object	<p>I am objecting to proposed development of all the above houses around the Whitworth area. The area is overrun with traffic as it us. One way in and one way out. The schools are overloaded as are the GP surgery. It is inconceivable to build more houses and allowing more traffic to use our roads which are in a terrible state. We are already experiencing burst water pipes and our water pressure has already been reduced. We are experiencing more power cuts since all the new houses have been built on Cowm Park Way . Surely there must be someone in the planning department with some common sense and will prevent any further building of houses in Whitworth</p>

131	Christine	Greenwood	-		Object	I am objecting to plans to allow the building of over £350 properties on various sites around Whithworth and Shawforth over the next 15 years. - Not only am I concerned about the building on our greenbelt sites which is part of the attraction of the area. I can understand the wind farm and can support renewable energy sources but not the creation of a collection of housing estates - whether social/affordable or not. The awful collection in Britannia speaks for itself! We have already had several builds across Rossendale but the extra Council Tax revenue does not seem to have brought many benefits to the borough. - As it stands at present the infrastructure can just about support the current residents - schools are already over subscribed and getting an appointment at our one GP surgery is already a mammoth undertaking. Planning to build or reopen a school by any chance? - Traffic is already an issue with one road in and out and a bus service that has to be one of the most unreliable in the surrounding areas! There are next to no facilities for young people/children and a library fighting to survive so I think that this needs to be given serious consideration before you go ahead.		-
150	Sheila	Morgan			Object	<ol style="list-style-type: none"> 1. 'Our doctors' we can't get an appointment it's nearly impossible 2. Schools already full 3. The infrastructure of the village facilities such as water gas electric would need a major uplift to accommodate more houses 4. Wildlife all the green belt land is of great importance to wildlife. Badgers foxes deer bats. 5. The road network both ways to Bacup and Rochdale is already gridlocked. 6. What would be the impact on the carbon footprint of the valley! 		Has the land 'HS2108' been checked for leaks, underground, reservoir etc,
151	Andrew	Smalley			Object	<p>The following points I feel have been overlooked.</p> <ol style="list-style-type: none"> 1. Access to site (This road used for quarry) 2. The state of Tong Lane is a disgrace as this road would be used to access. 3. The local wildlife would suffer. 4. Infrastructure in Whithworth is overloaded already. 5. Doctors is overworked and impossible to get appointment. 6. Also house prices could depreciate over time 7. Known underground reservoir on site 8. Whithworth as a whole is at maximum with new housing already. 		I feel Whithworth was once a village now it feels more like a town and losing its village identity.
152	Morgan	Jeffrey			Not Applicable	<ol style="list-style-type: none"> 1. Tong Lane is a disgrace anymore traffic and we are in danger of accidents. 2. Drs full to capacity 3. Market Street is gridlocked most days 4. Facilities, gas water selective need updating A.S.P 5. Wildlife will be extinct. 		Build by all means but no on green belt

161	Jessie	Clegg			Object	Wildlife Highways Local Amenities Infrastructure Loss Privacy Noise Pollution Decrease Property Value		
162	Caroline	Clegg			Object	Loss of wildlife and trees Local highways and roads already over stretched and gridlocked Local amenities schools, dentists, doctors already full More housing would have negative effect n living standards Infrastructure of whitworth is already an overstretched water, as and electric would need major uplift increase noise pollution loss of privacy property decrease in value Whitworth already has too many houses with little spending as it is in the valleyon eddential things		I feel whitworth was the short straw when it comes to anything that needs money spending on it even though we elect councillors there are only one or two that always show up to meetings and fight for whitworth valley and the people who live here
195	Janet	King	-	HS.102, HS2.104-9 inclusive	Object	Whitworth' infrastructure cannot support almost 400 new properties - it is already nigh impossible to obtain a doctors appointment and my father has had to wait iver 6 months to obtain a podiatry appointment as there is only one who has been on long term sick and no replacement cover available. The fact that there is only one main arterial road into and out of Whitworth, which already has weekly road works delaying the already totally congested road does not bear thinking about. With an extra 400 properties and the increase in traffic that these will bring and as there is no large employer in the area most of these occupants will be commuting one way or another. We lost access to an A&E in Rochdale and now the nearest is either Fairfield or Oldham with the additional traffic these proposals would create the congested roads Could be catastrophic in an emergency. - - On a personal note, my family moved to Whitworth 12 years ago, from Oldham, due to its naturally beautiful countryside and I see the addition of these properties into areas of greenery (extending Wallbank estate etc.,) is the very short end of the stick. I can see that if these are accepted, encroaching on to green belt areas, slowly but surely the green belt areas will get smaller and smaller until eventually Whitworth just becomes another concrete plot with ever creaking infrastructure. - - Finally, I understand the need for affordable housing but there are plenty of mills/brown field that could be developed. However, I feel strongly that before any proposals are accepted it is of the utmost importance that the infrastructure is in place to support them, that includes roads, schools and NHS access.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
258	Fiona	Harrison			Object	Whitworth is already a very busy village oversubscribed schools and GP Services with one road in and one road out. The pressure on the infrastructure would be immense, plus travelling to or from anywhere especially at peak times is already horrendous, nevermind with another approx 400 houses being built. Our skyline and beautiful views and countryside are also going to be lost.		-
261	David	Eyes	-		Object	This is an unbelievable plan that will stretch amenities in the area even further. - - The new estate near Cowm has already increased traffic congestion on the one road in and out of the village and schools are already struggling to cope. - - There is also the issue of wildlife and the impact it will have on their environment. - - I for one will be leaving if this idiotic plan goes through. -		This smells of greed over common sense
268	Michaela	Radford	-		Object	Whitworth has had numerous instances recently regarding the roadworks for the infrastructure repair and maintenance. As an employee of all 4 major utility asset owners in the area, I am very concerned regarding the houses proposed. We only have one road throughout the valley and this is impacted severely when roadworks are planned. My concerns are that these are not managed correctly by LCC at present, therefore; more houses and more infrastructure would have a massive impact on the people living in the village. People face unemployment now due to the frequent issues we face getting into work. - Not to mention over crowded schools and doctors as we stand at present. - - I request, here in writing, to be informed of any planned meetings regarding the houses in whitworth and notification be sent in writing to my address above.		-
297	Lindsay	Fairhurst			Object	Poor access along the length of Main Rd (Market Street) one narrow road lined with parked cars , as only access into & out of whitworth. No alternative route. No trains or trams. Buses won't must travel on same one access road both in and out as cars. No motorway access under 20 min journey both ways insufficient work in area means people must travel to Manchester, leeds, bury, Rochdale etc. Current public transport unrealistic. Traffic at peak times currently gridlocked & congested. Increased housing will add to this burden. Utilities infrastructure unable to cope currently leading to repeated remedial roadworks. Schools full Doctors full Rossendale Council Lancashire Council needs to address transport & roadways access + education access beofer building homkes where people will be unable to travel to employment and school		highway safety compromised by very narrow access. Quarry traffic adds to this burden sandbank gardens is curently a flood risk area large quarry vehicles become jammed occasionally due to residential parking issues

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
298	Andrew	Fairhurst			Object	the number of houses proposed in this local plan for infrastructure can support. Whitworth has only one road in abd out and already this is constantly being dug up by utility companies often resulting in temporary traffic lights that cause massives queues of traffic in rush hours. Not only is the road narrow and conjested but there is no alternative train service - only the bus (on the same road) This is totall useless for the number of people wo commute to Manchester, Oldham and Bury every working day. Our schools, doctors and dentists are already close to capacity. There are very few options to travel to other facilities apart from along the one road through the valley.		Without robust and achievable plans to increase the support infrastructure for travel (a train for example) and health and education and culture this building should not go ahead. For people to afford these houses they need jobs first. Currently you need to move out of the valley to commute to work. Regeneration of the area and existing housing stock should come first.
335	Venkatesh	Thoppae	-		Object	Currently, due to traffic I am already starting 30 minutes early to work, with the school run, I believe the roads towards Haslingden and Rochdale will be much congested for office goers if proposed plans are executed without proper plans to widen the roads and making new ways to connect to the various part of the main roads(motor way). - - Also the schools, GP services will be under much more strain if those are not equipped to address the increasing population.		-
544	Lois	Lees	-		Object	The access to the proposed land at Cowm is not sufficient to accommodate further housing. Tong Lane is used daily by waggons from the quarry and is in a poor state of repair. - Sandbank Gardens is not ideal for 2 way traffic. - Access in and out of the vi		Whitworth is a lovely village which is just managing to deal with the number of cars, houses and people that exist here. - There is already damage to the roads and water supply. Adding extra housing and more people will only cause more issues with the roa

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
561	Lynne	Meigh	Retired	SHLAA16016	Object	<p>I wish to strongly object to this proposal on the grounds that: - 1). There is numerous wildlife in this area plus mature trees and natural plants. Also Owls, Bats, plus visiting birds to the reservoir etc. This proposal will most definitely change our landscape. - 2). The roads leading to this sight are narrow and are already heavily congested not only with many vehicles but also quarry wagons who often block the road due to their size and the many parked vehicles. Since the houses named The Stable was built and the only exit they have via the narrow road named Cockhall Lane this has lead to even more congestion and there have been many occasions where a near accident has occurred. The parked vehicle from the Cock and Magpie public house often close Sandbank Gardens down and it is too narrow for an ambulance to travel through. When exiting the street it is impossible to get clear vision of oncoming traffic. - 3). There is one main road through Whitworth which already on numerous occasions does not cope with the volume of traffic at peak times and if it snows or roadworks are taking place it is horrendous. A ten minute journey can take one hour. - 4). THE INFRASTRUCTURE is not coping now let alone with further growth. - 5). Since moving into our home 50 years ago Whitworth had grown in excess. Our schools are oversubscribed. The doctors are over stretched. As is the social care facilities. Further housing would over burden these and I fear it could lead to suffering or even death. - The proposals will, I fear make Whitworth NOT the place to live and will change our landscape for ever. Enough is enough</p>		
590		Ashworth			Object	<p>Absolutely ridiculous One way in and out of whitworth no extra schools or doctors when you have two or three cars per household. This is ruining our villages. We strongly object to this. Listen to the people who vote you in, as we have long memories</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
692	Gregory William	Meigh	-		Object	<p>I strongly object to this proposal on the grounds that: - - 1. The roads are already congested in the area and in a terrible state of repair. There is only one main road Market Street, to service all the traffic not only from Whitworth but the surrounding areas. This already gets gridlocked. - - 2. Our schools are already oversubscribed. The GPS and health services are already at full stretch. Our amenities are gradually breaking down. - - 3. There is a large amount of wildlife and trees in this proposed site which will be destroyed/altered to the detriment of the area. There are bats and owls and visiting birds to the reservoir. - - 4. I have lived in my home for nearly 50 years and with all the houses which have been built in this area recently and the amount of traffic from the quarry (large lorries) and the increased parking from both the public house and reservoir when there are events on it is extremely difficult and even dangerous to negotiate the roads. I personally have witnessed many near misses. At these times the parked vehicles close the road down so much so an emergency vehicle e.g. Ambulance can not get through. - - It is a nonsense to propose building any more houses.</p> <p>I strongly object to this proposal: - - 1. The roads to this site are narrow and congested. Traffic is heavy which includes quarry wagons. When there are events on at either the public house (The Cock & Magpie) or the reservoir parking becomes horrendous closing our road down to the extent emergency vehicles cannot get through. Also the roads are in a very poor state of repair. I personally have witnessed many near misses at the junction of Cockhall Lane, Tong End and crossroads at Tong Lane and Cowm Park Way, due to vision being blocked. - - 2. This area has a great amount of wildlife, plus, owls, bats and visiting birds to the reservoir. There are mature trees and plants on this proposed site. Housing would change the whole landscape to its detriment. - - 3. Whitworth only has one main road which serves all Whitworth & surrounding towns, which on numerous occasions this becomes gridlocked. Roadworks or snow will cause caos. A ten minute journey will take one hour. - - 4. Already our schools are oversubscribed, our GP and health services are already overstretched. All amenities are already showing strain. Any further housing would break our village. - - I have lived on Sandbank Gardens for 49 years and since the already recent developments in the area I would seriously consider leaving Whitworth if anymore houses are built. Whitworth will change for the worst.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
701	Christine	Dodd	-		Object	<p>Following discussion with my solicitor, notification of such a development from the council would have been preferable to chance hearsay. Myself and several neighbours occupy homes within listed building status. We strive to upkeep and maintain the character and quaintness of the buildings and surrounding area. We were disturbed to hear that a proposed access point was directly adjacent to our properties. - - We feel privileged to live in an area we consider to be one of Whitworths most outstanding. It is a place which attracts many people such as walkers who seek pleasure and peacefulness within a beautiful landscape. - - I feel a housing development would have a great negative impact on the skyline, losing its quaintness and inherent character. Visually it would detract from the current open feel to the area, over bearing and out of scale within the size of area to be developed. It would adversely affect the character of the listed buildings and its surroundings. - - I also have great concerns with the proposed site and access point in relation to the Life for a Life Memorial forest. The trees form an avenue along the proposed entrance site. Benches are sited to over look the natural surroundings, offering bereaved and grieving families a peaceful haven to remember their loved ones. As a widow myself I can only imagine how devastated these people would be to have a building development and all that it entails passing through their chosen memorial (for which they have specially chosen and paid good money for). Grieving families should be afforded the dignity and respect they so rightly deserve. - - Tong End already has a multitude of ongoing problems without additional issues. Over the years the quarry alone has thrown up many factors. The wagons and low loaders often cause the road to be blocked. Several times I have been unable to leave or re-enter my property without a lengthy delay. Visibility is compromised, hence safety. On four occasions my bins have been dragged off the pavement and their contents strewn over the road. I reported one such time as my young boy was stood next to the bin. Another occasion my gardener was jet washing when a bin close by (on top of which was his cup of hot coffee) was dragged off again. - - My property has also been directly impacted. I incurred thousands of pounds in legal fees following an ingress of water/flooding issues. This involved a multitude of agencies - highways, insurance, united utilities, environment, environmental. It was felt that the volume of traffic outside the house had to contributed to cracked and broken drains. Drains were 80% full of silt and debris. Water was running directly off the road and into my property, often resembling a rive. I spent hours dealing with the above whilst raising four young children on my own. - - The gullies are supposed to be on a regular maintenance plan. Needless to say this does not happen. The gully once again is blocked, I reported this many weeks ago and it still remains blocked. Silt and debris remain commonplace with huge expense in car valeting and jet washing. Speed, noise, smells, emissions are</p>	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
						troublesome. The road itself causes the wagons to wake us up as they hit the dents in the road at the crack of dawn. Grit and dirt fly in peoples faces at its heights. - - Additional thorough fare would only exacerbate these problems.		
743			Whitworth Town Council		Object	HS2.108 Cowm water treatment works, Whitworth Council have concerns about the safety of this site following the information members were given during public question time. There are also concerns over the access and egress passing buildings with heritage status. Another concern is that there is an underground storage reservoir in the area. Developing this site would also have a negative impact on the nature and natural habitats in this area.		
773	Susan	Worrall	-		Object	Whitworth is a village, a small community. Building these housing developments will change Whitworth into a town. - There is not the infrastructure to support this additional housing. There is one road in and out of Whitworth which is already struggling to cope with the increasing volume of traffic. Especially at peak times. If there are any traffic disruptions it can take 1-2 hours to get to Rochdale . We do not need more cars and the pollution they bring! - - There are limited school places both secondary and primary and local children born in the village will struggle to get places. - The one and only GP practice can not manage to provide the necessary health care for patients with no appointments pre bookable for weeks in advance. This healthcare will be diluted further. Living in Whitworth if A&E treatment is required which is often a life or death situation your chances of survival are reduced add more traffic on market street and your chance of survival diminishes further - - The people who live in Whitworth , live here because it is a village , it is quiet and the countryside is on the door step. Yet the plans want to destroy the village life, increase demands on exisiting services and increase pollution - - To consider building on greenbelt land in Whitworth is unbelievable and irresponsible, Planning has already - spoilt the view of the countryside at the side of Daneswood ave and the wind farms are also affecting the views and countryside. - - Whitworth has lots of wildlife from deer, owls, herons, wild ponies as well as lots of insect life butterflies, bees etc which will all be at risk if the countryside is used for housing. - - There is empty housing all over the borough - fill these , not build more especially in our little village -		Stop putting profits first and put existing residents first

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
803	Marietta	Galbraith	-		Object	<p>My objections for the proposed building of housing on the above sites is based on a number of reasons: - 1. Infrastructure. The current housing situation is already at (possibly beyond) capacity with regards to schools, doctor's surgeries, dentists, employment and traffic. There are no more schools planned and no way to expand the ones already here. Some children have to travel miles to schools out of the area due to oversubscribed local schools. This is the same for doctor's surgeries and many other amenities. - 2. Traffic. There is one main road in and out of Whitworth that already has issues with raised levels of traffic. In the four years we have lived here, there have been many occasions where traffic has been an issue due to constant roadworks (for various reasons relating to increased housing and traffic) which has caused major problems. Also, most people are employed outside of Whitworth so traffic is high anyway. More housing would increase this issue with no solution being given as to how it could be rectified. - 3. Utilities. More and more power cuts have been happening recently in Whitworth due to new housing as well as burst water pipes and problems with drainage. This has contributed to the traffic issues with roads having to be dug up every few weeks to 'fix' the problem. - 4. More housing would mean taking up land that is natural drainage for flooding. Recently, my area was put into the 'flood risk' category (although we haven't flooded), significantly increasing my home insurance. If more homes are built, this would increase risk of flooding to many homes around Whitworth, which would cause loss of market value and would reduce the chances of being able to sell the property. - 5. Much of the 'green land' would be lost which is detrimental to the wildlife around Whitworth. The Government have a duty to protect greenbelt land and our environment! The carbon footprint would be horrific! - In conclusion, building over 300 houses in Whitworth would cause issues beyond repair! Environment, traffic, pollution, infrastructure, drainage etc. would all be dramatically affected in the most negative and damaging way. Whitworth was not meant for so much housing and so many people.</p>		-
818	Niall	Hayden-Pawson	-		Object	<p>Location considered unsuitable for further housing development due to: - poor vehicle access to the area and site - already over stretched local facilities ie doctors, schools - unsuitable location at the foot of a reservoir dam - potential risk to dam structural integrity due to excavation/piling/construction works - the land on Sandbank Gardens is poor building land, often waterlogged and properties have suffered subsidence, the land at the foot of the reservoir is likely to be similar - the location is well used by families, both during summer walks and also winter activities (sledging etc) - Whitworth has a single access road between Bacup and Rochdale which is often congested and additional housing will increase this -</p>		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
819	Jacqueline	Hayden-Pawson	-		Object	Poor vehicle access to the area. - Roads already degraded. - Flooding already on Sandbank Gardens. - No capacity in local community resources e.g. doctors, schools. - Unsuitable location at the bottom of a reservoir, potential risk to dam due to proposed buildings work. - Damage to Trees and Wildlife. - Access via one road to Rochdale and Bacup already overwhelmed at times. - Power supply already challenged. - The location is well used by families during summer and winter activities. - Danger to children playing out due to increased traffic when families have chosen the location on a culdesac to purchase their homes. - access to Tong Lane is already over capacity, the roads are already degraded because of the excessive use and lack of up keep by the council. - Prospsed site is a well used local recreational area both in summer and winter. - there is a potential risk from building at the bottom of a reservoir and risk to the dam stability by building on proposed site. - sandbank Gardens Drains cannot already cope and floods have been regularly reported to Lancashire County Council - damaging to trees and wildlife. - local community resources already at capacity - The one road to Rochdale and Bacup is already congested with frequent delays. - safety of children comprised due to increase in cars and families have chosen to live in culdesacs to promote the safety of their children. - The corner of Sandbank Gardens and Sandbank Cottages has already been reported to the local authority because restricted access due to overcrowded parking. -		-
886	Michael	Banham	-	HS2.102 to HS2.109	Object	The infrastructure of whitworth is over stretched as it is,the school's cannot cater for such an undertaking. Theres only one road in or out of whitworth any problems on this road causes absolute mayhem. The winter months are an absolute nightmare just to get onto market street.		I cannot understand why anyone would want to over populate an area that is already struggling.
889	Derek	Lord	-	HS 102, HS105, HS104, HS106, HS107, HS108, HS109.	Object	We in Whitworth are sure that there are enough houses here at the present time.There are large estates at Cowm Park, Tonacliffe, Wain Gap, Wallbank, Knot Hill, Orama Mill Site, Edgemoor Close, and a small estate at Facit. The exits onto the one main road are at present full of traffic. The Doctors, Schools etc are now at bursting point. We in Whitworth have done our share in housing. Please think again before building any more. Thank You. -		-
892	Mandy	Sanderson	-	HS2.102, HS2.105,HS2.104, HS2.106, HS2.107, HS2108, HS2.109	Object	The transport system around Whitworth cannot cope with the volume of traffic . Also local aminities are already at braking point..		No
911	Julie	Latham	-		Object	In principle I don't object to more houses or people. However I will until I am convinced that the planners are committed to the infrastructure improvements required to support the extra influx of people and cars . - The main bottlenecks caused by Whitwo		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
913	Michelle	Ashcroft	-	HS2.102, HS2.105, HS2.104, HS2.106, HS2.107, HS2.108 & HS2.109	Object	Whitworth is a geographical challenge at the best of times, positioned in a valley, consisting of ONE main road with multiple roads stemming from this leading to many properties that are built on the hillside. There are many green areas which are used by local farmers for their livestock. During times of heavy rain many of the roads are flooded, and during winter many roads are very dangerous in the snow. It is not uncommon for Whitworth to be gridlocked as there are far too many cars on the roads, all it needs is one set of road works and the town becomes inaccessible. The local schools are now over subscribed, the High school has had to turn away many children who only live a couple of miles away. The primary schools are also subscribed making it very difficult for teachers to provide a good education to the children. The local doctors are unable to cope with the number of patients, trying to get a same day appointment is nigh on impossible these days. We have issues with anti social behaviour due to lack of amenities available for teenagers, the local youth club has been closed down. There is a lack of police presence (the PSCO tries her best), people don't feel as safe as they should. The library is still under threat of closure, the pool is only open because of the people of Whitworth who run it. Building more houses brings more people, more cars, more strain on the infrastructure. I appreciate housing is needed but the number of houses that has been suggested will bring this town to it's knees.		I would suggest you come to Whitworth during the morning school run and see how difficult it is around Horsefield Avenue. Come sit in the traffic jams during rush hour. - - The government has spoken about creating new towns, this is a great idea, there are places that can accommodate thousands and thousands of houses. Build there not here!!!
916	Jane	Trudgeon	-	HS2.102 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	We are already an overstretched village infrastructure, the roads would not cope with an extra amount of traffic and would make the already difficult commute to exit/enter the village impossible. There are not enough schools nor would the doctor's surgery be able to cope as even now it is almost impossible to get a reasonable appointment time, - - The housing developments would impact on wildlife		-
918	Marion	Ashworth	-	HS2.107 , ALL.	Object	I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.		I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
935	Christine	Fallon		HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	1 Whitworth has one main road which is often gridlocked the smaller access roads are grossly un suitable e.g Tonacliffe. - 2 Schools are already oversubscribed parking at drop off times would be more chaotic and dangerous. - 3 Doctors and dentists are already at capacity. - 4 Services of gas electricity and water would require major upgrade. - 5 We are seeing flooding due to inadequate drainage this would be increased. - 6 Is this acceptable use of greenbelt land where previous planning permission has been refused the effect on wildlife and trees would be immense.		-
939	Geoffrey	Fallon	-	HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	Whitworth is a small village with one already inadequate road. Doctors dentists and schools are already oversubscribed parking in school areas is dangerous already and would be far worse. - Gas electricity and water services would need major upgrade. - This is inappropriate use of greenbelt land causing damage to wildlife and the environment drainage is a major problem now with frequent flooding.		-
955	Janet	Whitehead	-		Object	Whitworth is already a very busy village, oversubscribed schools and Doctors - We have one road in and one road out which is almost impossible during peak times in the morning - The houses already exceed the heights up the sides of the valley - Our green belt is very important to wildlife and the the people the live here - If we let one builder onto greenbelt it opens the doors to far too many others - Our population is big enough and we cannot accommodate many more		- Our Councillors are voted in by us and now need to stand up and fight for us - - 400 houses is a ridiculous amount of new houses for a tiny village - - We have had 2 different sites where new houses have been built in recent years we've done our bit for Government figures - - Please find somewhere else
962	Kathryn	Gill	-	HS2.102, HS2.105, HS2104, HS2106, HS2107, HS2108, HS2109	Object	I object to any changes in use of local greenbelt land to build houses. Also, there is only one road through Whitworth and it is already congested. We have only 1 doctors surgery, and not enough school places to accommodate hundreds of additional families. Greenbelt land cannot be restored once built on, and these proposals would change the landscape of Whitworth. I am also concerned about the building of 20 properties around Cowm. This is a resource continually used for recreation by the people of Whitworth and should be preserved.		
979	Marie	Pye	-		Object	All of these developments will contribute to already existing traffic problems as there is one road in and one road out of the area. The high school is already oversubscribed with local children not being offered places.		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
992	Susan	Farrell		HS2: 102, 104, 105, 106, 107, 108, 109	Object	I strongly object to the building of houses on all the above mentioned sites for the following reasons: - Greenbelt land is of importance to all the wildlife of Whitworth and Shawforth . Deer and bats live in the forests in the area. Many badgers and foxes inhabit the countryside and rare species of wildlife live in the ponds. - The forest area at Tonacliffe would be cut down having a negative impact on the environment. - Tonacliffe road is already dangerous for children with cars parked along the length of the road at school dropping off and picking up time. The increased number of cars if more houses were built in the area would be worse for the children and residents. - Local amenities such as dentists and GPs could not cope with the increased population. It is almost impossible at the moment to get a GP appointment in less than two weeks. More housing would have a detrimental effect on the residents of Whitworth and Shawforth. - Facilities such as water, gas and electricity are already stretched and a major upgrade of the infrastructure would be required to support increased housing. - Local drainage cannot cope with the current usage. More housing could have an impact on flooding. - Public footpaths could be lost reducing the number of rights of way for walkers. - The road network both ways from Rochdale to Bacup is already gridlocked. More housing would put an increased strain on traffic and the already poor public transport in the area. - The only high school in the area is already oversubscribed. With increased housing parents may have even less chance of a first choice school for their children. They may have to travel miles to school. - I understood it is government policy to protect Greenbelt land except for 'Exceptional Circumstances'. What are the exceptional circumstances that enable housing to be built on the greenbelt land in Whitworth and Shawforth?		Summary - - Whitworth and Shawforth are already busy villages with oversubscribed schools and GP services with one road in and out between Rochdale and Bacup. - - Can we accommodate more housing that will put pressure on already overstretched amenities, increase traffic and change the beautiful landscape forever?
1000	carol	Thomson	-		Object	I object to the amount of houses that will be built affecting the countryside. Are there any more schools being built to accommodate?

1029	Angela	Hannam	-		Object	<p>1. Whitworth is already overburdened by the current housing stock. Drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. 2. The schools in Whitworth, in particular the high school, are at capacity and cannot sustain any addition to the number of potential pupils. 3. There is only one road in and out of Whitworth and at peak times in particular this road is congested with idling traffic contributing to air pollution. People travelling from Bacup and beyond to get to Rochdale all come through Whitworth and add to the problem. 4. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. 5. Access to most of these sites will increase traffic hazards on an already inadequate highway. - 6. I challenge the need for more housing in Whitworth. 6.1. Where is the evidence of any demand? 6.2 There are countless houses left empty and neglected in Whitworth, why are these not modernised and made available? 6.3 Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? -7. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. 8. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.</p>

1109	Jane	Gadsby	-		Object	<p>I wholly object to more housing being built in Whitworth!! We are a small(ish) village that can not cope already with the amount of new houses and people moving into it!! Our schools are already over subscribed; they are turning people away that don't live overly far away that a few years ago would have had no problem getting a place. The Doctors surgery can't cope with the number of patients wanting appointments. You are also increasing the risks of flooding. My house is already at risk and has already flooded twice. The main road (one road in and out) is gridlocked most mornings with commuters trying to get out of the village but most of all you are taking our beautiful green areas that Whitworth is so lucky and honoured to have. We have lots of empty properties that can't be filled already!! Please leave us and our village alone!!</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
1118	Gary	Calderbank	-		Object	<p>There are a great number of reasons why Whitworth township should not be blighted with further development, particularly on land which has been designated as green belt for a large number of years. I wish to summarise these as below.</p> <ul style="list-style-type: none"> - - Traffic - Whitworth is served by one road from both the north and south and is a major arterial route to people accessing the m62 and surrounding towns from the valley, Burnley and beyond. It is therefore very busy all of the time without even considering the effect of increasing local traffic even further. This route is regularly disrupted as a result of failing infrastructure resulting in severe delays and tailbacks. - - Schools - The existing schools in the town are already over subscribed and there is no capacity for further children without again significant development of schools. The road where I live is already gridlocked by vehicles dropping off children twice a day, illegally parked and causing obstructions. In relation to developments at Tonacliffe and Horsefield the thought of construction traffic too would be completely unmanageable and dangerous. Further development would exacerbate the problem. - - Policing - Whitworth already suffers from insufficient community policing resulting in many issues which do not get resolved, from burglary to bad behaviour and fly tipping. The town can not afford a further increase of population on this scale bringing with it its percentage of problems. - - Planning Policy - Brown Field Sites - Whitworth and the valley in general is a town built on industrial heritage and just like other cities should be primarily developing brownfield developments not green belt. There are many derelict spaces which can be developed to improve the area whilst providing suitable additional housing. There is no real justification for building on moorland in lieu of this. - - Construction Difficulties - Much of Whitworth moorland is unsuitable to build on, primarily due to poor access to the developments earmarked, mine shafts, poorly drained ground, sloping sites, poor infrastructure, marshland and biodiversity issues. - - Biodiversity - The land surrounding Whitworth is a haven for many wild animals which can be seen on a daily basis. From our house we can regularly observe, a family of foxes, badgers, deer, birds of prey, pipistrelle bats, cows, horses and sheep. This is a gift without price. - - Infrastructure - We regularly have power cuts, water bursts and the A671 is constantly being dug up as existing services are updated resulting in major delays. The drains in our road are currently running 24/7 as a result of water run off off the moors even when it has not rained for a number of days. When it does rain the water backs up out of the covers as the drains are undersize and cannot cope. This would be totally unsuitable for further development, especially considering a greater amount of hard surfacing. 		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
1134	Abigail	Leyland	-		Object	WE DO NOT NEED ANYMORE HOUSING IN WHITWORTH! The schools are already oversubscribed, our local doctors can not possibly take on any more patients as it is already a struggle to get an appointment currently. We only have one road in and out of the village which gets badly effected by rush hour traffic, making it difficult for the locals to get to work/school etc. We have such a lovely view of greenery surrounding our little village and we do not want our sight ruined by building ugly, unnecessary housing.		
1152	angela	Jordan	-		Object	I do not think whitworth has enough resources to sustain further housing estates .The one and only road is already impossible at peak times,our doctors surgery is bursting with no appointments,and our school children cant get a place at our local school. - The wildlife is also important to whitwoth people but is being pushed further and further out of its natural habitat.		
1166	Brendan	Doherty	-	HS2, 102,104,108,105 ,107,106,109.	Object	WHITWORTH IS FULL. This statement encapsulates all the issues surrounding any expansion of dwelling houses in the township of Whitworth. - - The negative impact of any developments in the town cannot be overstated. - - The whole nature of this small township will be irreversibly destroyed if development are allowed. - - Flora and fauna will be the first to suffer. This valley is home to an exceptional and expanding variety of animals and trees and flowers. This growth has taken decades to achieve and would by totally reversed by the stroke of a pen. - - To say that all the ingredients which go to make up Whitworth as a place for people to live are overloaded is indeed an understatement. - - Congestion of traffic and people is at its limit, any increase can only be detrimental to the health and quality of life of residents. - - Local services, schools, doctors, civic amenities are already at their serviceable optimum. - - The existing utilities of electricity,gas and water only just maintain service. There are often cuts in these making it seem that we are a third world town. - - Whitworth is a linear town with no bypass or possibility of such. Most of the day traffic is heavy and at peak times chaotic. This combined with the nature of HGV traffic leaves the roads in constant need of repair. Add a very poor public transport system and the certain increases proposed then the result is guaranteed to be disastrous.		Listen to the people of Whitworth.
1190	Nathan	Worrall	-	HS2.107 , HS2.108, HS2.109, HS2.102, HS2.105, HS2.104,HS2.10 6	Object	Whitworth doesn't have the infrastructure to sustain the construction of these - new houses. The local doctors and schools would struggle to meet the needs of the increased population. There is bad traffic in Whitworth already, this will only make it worse and these traffic problems are highlighted when there are roadworks and there are large queues. The proposed sites are located on greenbelt land, and this will have a negative effect on the local wildlife as well as destroying the natural beauty of this land.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
1272	Michala	Geldard	-	HS2.102, HS2.105, HS2.104, HS2.106, HS102.107, HS2.108, HS2.109	Object	I am objecting in general to the proposed house building in various sites around Whitworth and specifically in relation to the proposed sites t Tonacliffe. My objections are based on a number of reasons: 1. Wildlife in the local area. Deer, badgers, foxes and hares live within the forest areas. Rare protected newts live in the pond. Bats nest in the forest. The importance in f this green belt land for the wildlife cannot be over emphasised. - 2. Tonacliffe forest would need to be cut down adversely affecting the local environment. - 3. The impact of more cars around local schools, especially Tonacliffe School, is of great concern due to the already high volume of traffic. Increasing this would be unacceptable. - 4. Local amenities such as schools, doctors, dentists are already to capacity. I have concerns that more houses will have a negative impact on the lives of current residents in relation to these amenities. - 5. Has the infrastructure of our small village been considered in relation to electricity, gas and water supply if more houses are built? Whitworth already experiences power cuts and seems to be worse since other recent building developments have been completed. - 6. The road network into Rochdale is already gridlocked. More houses will increase this problem. Public transport from Whitworth is limited to buses and I consider that if this proposed building goes ahead there will also be a negative impact on the poor public transport in and out of our village. - 7. Local drainage already struggles to cope with usage now, if the volume of residents increases would the drainage system be able to deal with the added strain? - 8. We bought our property because it is located on the last cul de sac of a small estate with no through traffic. This proposed building work will completely alter this into drive through roads. Plus the volume of traffic will - Increase which I consider to be unacceptable. - 9. I am very concerned that we may have loss of privacy as we are not currently overlooked and this was a major consideration when we bought our house.	-	
1283	Jonathan	Geldard	-	HS2.102, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	Whitworths infrastructure is already at near full capacity. The single main road through Whitworth is, at times, grid-locked. Streets around the primary schools is chaotic. There is a definite flood issue through the valley. Chime is rising unchallenged. The rich and diverse wildlife is flourishing around Whitworth. - Any of the development projects would have a negative and detrimental implication on Whitworth and it's residents.	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
1310	Richard	Dolan	-	HS2.101-109	Object	<p>We are vehemently opposed to all housing allocation in Whitworth. Our group has decided to vote against and actively campaign against all Councillors and MPs in favour of this proposal. We will withhold our votes and encourage family, friends, and community to do likewise. - We are outraged by this proposal, especially HS2.107 that will encroach on Healy Dell. On this point we will be contacting the National Trust and other such organisations to make them away of the proposed desecration to the Green Belt. Furthermore, we are now investigating possible financial links between all Councillors, MPs, and RBC employees involved in this issue with the proposed contractors. This senseless proposal for a village far too small to accommodate a possible 300 new homes suggest an ulterior motive. No one in our community that we have spoken to is in favour of this plan and we will use our sizeable influence. - There has been more than enough housing development in Whitworth. This new proposal will destroy our green spaces and necessitate a new schools, doctors' surgery, dentist, shops, and possible a new road. All future housing development must stop. Our community can not accommodate any more. - In light of the fact that this proposal has not been advertised to a great extent (we have spoken to people who know nothing of it), we will be conducting a petition again this proposal and encouraging everyone to sign the following statement: - We will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community.</p>		<p>To reiterate, we will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community. - - The people's power will be felt if this plan is authorised.</p>
1336	Maureen	O'Mara	-		Object	<p>Whitworth is already struggling with oversubscribed schools. There is only 1 small GP surgery and 1 dentist. The village cannot cope with stretching the existing amenities. - One of the main objections I have is the traffic and parking, which is already dire. Streets are almost impossible to drive down safely due to double parking. There is only one main road, which when closed for any reason means driving via Todmorden to get around - this has happened on a number of occasions. Most roads have very steep inclines which are regularly not gritted in winter. To increase parking and traffic would destroy Whitworth. Where would access roads be and how would this affect current residents.</p>		
1363	Gareth	Dolan	-	HS2.101 to 109	Object	<p>I do not live in Whitworth but spend a lot of time there with my family. I am deeply concerned by this proposed loss of green belt and will do my utmost to object against it. - - I strongly urge RBC to re-consider its proposal. Whitworth cannot handle any more development. - - Thanks</p>		<p>If this destruction of the green belt in Whitworth is passed then I shall simply take my family and my money elsewhere as there will no longer be the same attraction Whitworth now offers.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.108	Further comment
1365	Michael	Whitehead	-		Object	The doctors is overcrowded, the schools are overcrowded and there is one road in and out. All three of the mentioned cannot cope in the current state. Whitworth has too many houses for the current infrastructure. If the proposal goes through, which I sincerely hope it does not, there will be 300+ more homes within Whitworth. This means 650+ more people needing a doctor, 300+ more children who need schools and 300+ more cars on the roads. If the current infrastructure is struggling I dread to think how the village would end up with that amount of extra people. - There are also many deer which have recently returned to the greenbelt land on either side of the valley. Moving any sort of greenbelt/urban borders is highly likely to destroy their habitat and force them away.		-
1383	JOHN	DUFFY	-		Object	There is only one road in and out of Whitworth and this cannot take all the traffic now. - There is a serious problem with flooding at the moment especially on Sandbank Gardens, so building more houses will only increase this. - the schools in Whitworth are already at maximum capacity and cannot sustain any more potential pupils. - Access to these sites will increase traffic on the already busy roads that are falling to bits, due to waggons coming down from the quarry. - Crime is already becoming a problem due to lack of policing, additional housing will inevitably add to this. - We already have problems with water and electricity supplies so increased housing will only make this worse.		-
1397	John	Cavanagh		water works	Object	would like to object to the above sites being changed to buildings lands on the following basis, Whitworth is already full to bursting Doctors, schools, dentist are all full. Traffic has one road in and one road out, all it takes is one set of traffic lights and the whole village comes to a stand still causing problems for local businesses in the surrounding areas. The area around Tonacliffe is home to wildlife such as badgers, foxes, bats, deer, newts, frogs where will these animals go will they be simply expected to relocate??? Local people use the moorland for walking, cycling it is a play area for children and is simply the last green space we have that the council haven't built on. We have ponds where fish and pondlife live geese spend summer here . - - Drainage is very much a problem already we flood when we have a regular amount of rainfall, when it rains heavily the drains cannot cope and the area in Tonacliffe is heavily saturated. - - Access at Tonacliffe is already bad for emergency vehicles and large vehicles, once you include more housing and the school traffic it will simply become impassable.		Yes absolutely let the planning officers spend some time actually in Whitworth village they will see how much traffic there is and how we are struggling to cope, the new Tesco is an accident blackspot which the planners felt fit to approve. Come down from your ivory tower and look what normal people are struggling make a decision that is right for the people and community in Whitworth and have to struggle everyday with traffic, leave us the green space that we deserve

1417	Gillian	Middlemas	Whitworth Community High School	HS1.102 HS2.103 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	As Headteacher of the only secondary school in the Whitworth area, I am concerned that the proposals to build considerable numbers of new dwellings take no account of educational provision in the local area. - The school is already oversubscribed: for 2017 entry into Y7 over 40 families were unsuccessful in gaining a place, despite Whitworth Community High School being their first preference; over 40 families went onto on the Local Authority's waiting list for a place; over 25 families went to Appeal for a place, and very few of them were successful. The school now has 640 students and, without extra classroom space, has no capacity to increase the admissions number, nor to take additional students into existing year groups. - Likewise, many local primary schools are also full / oversubscribed, suggesting there is insufficient educational provision in the local area already. - This situation will be exacerbated if the proposed number of new dwellings goes ahead, unless the developers or Lancashire County Council are prepared to increase the school's capacity by funding additional classroom / learning / social space. The school is over 50 years old, largely of Langspan pre-tensioned concrete construction (intended life expectancy already exceeded) with HAC (high alumina cement) - In addition, the school experiences ongoing issues with the provision of utilities: the water main up the school drive is at risk of collapse; the water supply to the area has recently been affected on a number of occasions, and presumably further demand from new building would increase these issues. - The proposals for new housing does not appear to be linked to any plans to improve the traffic situation in the Whitworth area: lengthy queues heading towards Rochdale each morning already create issues for students travelling to school.

1440	Helen	Banham	-	HS2.108 - Sandbank Gardens	Object	<p>1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - Would my house and others be overlooked. 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. 16. Some of the areas and the surrounding areas have already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost. 18. Local drainage cannot cope with the usage now would more residents put an</p>

1469	George	Salt	-		Object	<p>residents put an unbearable strain on this network. -</p> <p>Whitworth is located in a valley, this in itself presents issues with the amount of space available. 7,500 people lived in Whitworth according to the data from the 2011 Census and this is a large amount of people if you look at the services and infrastructure in Whitworth. To start off with there is one GP surgery that has 7,248 people registered with them. Whitworth Medical Centre has 4 GPs which means that for one GP there are 1,812 people. There is not any more capacity available for more people to register with the practice. - - Schools are also busy especially with just one school for secondary education. With more people living in Whitworth that would mean a greater demand on schools and could result in some children living in Whitworth not going to school there. - - Going back to Whitworth being a valley this physical feature means that infrastructure being put in can be difficult. Whitworth has one road in and out and during peak hours this is a very busy road. Most new people would probably be using a car as their main mode of transport adding more pressure to Market Street and its tributary roads. Public transport is also very poor in Whitworth meaning that it is not really a viable alternative for any new people who would come to Whitworth. - - As shown with a few of these arguments Whitworth does not have the capacity to accommodate an extra 359 houses over the next 15 years. For example an average of 3 people per house would result in 1,077 more people living in Whitworth. It is not going to work.</p>

1475	Kim	March	-	shlaa16016	Object	<p>This site is is the bottom of big hills on two sides of the proposed development. The rear north boundary of my property backs onto this site, and the side boundary of my property backs on the hill to the west. I am the only property owner that has this placement in terms of boundaries. I have significant flood problems in the winter and although water has not encroached into my house yet, it came very close (ie two or less inches) a couple of years ago, and I have retained the video footage showing the level of water going over the step up to my back door. The proposed site would create water flow off the site and my property is immediately beneath the site and so instead of water being absorbed into the land as it currently is on that site after heavy rain or snow (flowing off the hills onto a flat surface albeit my back garden) it will increase the level of water on my land. This increase of surface water off the site onto my property will make all the difference and create a flood problem to the extent that my house will likely be flooded. I have provided notice of the risk to you by way of this email and should this risk actually occur, you and or the developer and or future residents of properties on the site will be liable to me for damage as you have deliberately created an unnatural flow of water onto my property knowing that it would likely be flooded. I will serve notice on the developer and each resident of properties on the site (should they proceed) to that effect so that if flooding occurs, I can take legal action to recover my losses and any future loss. It is the same as creating fire on a property in the knowledge that it would spread to adjoining properties and cause damage to them. I also understand that the stability of the reservoir built in 1878 is also insufficient for current use, and so building works underneath it are likely to cause further stability issues and a potential flood risk. The site is full of newts as I have seen them on the land and in my back garden, together with bats and much other wildlife that should not be disturbed. There is insufficient infrastructure to accommodate the proposed site as the road is simply too narrow to enable use for additional properties.</p>		-
1493	Kathryn	Meigh	-		Object	<p>I also wish to object to the development proposed at Cowm Waterworks. I was born and grew up on Sandbank Gardens and go back there daily to my parental home. I remember this land being green belt not long ago, therefore why is it now brown belt land ?</p>		-

1497	Wendy	Rose	-	Cowm Water Works	Object	The infrastructure of Whitworth cannot support or sustain further development. There is only one road in and out of Whitworth. Congestion is a serious problem now due to the volume of traffic. When there are roadworks the situation is bordering on dangerous as emergency vehicles are hindered. Further residential development would only compound this issue with higher levels of vehicles. - - Power cuts are a regular occurrence in this area, one can only assume this would get worse with the extent of the proposed developments - - Doctors surgeries are fully to capacity and cannot adequately serve the community at the moment. Waiting times for appointments is ludicrous. Schools are over subscribed. Parking around schools is dangerous and any increase in school children would seriously impact on this. - - All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - - Proposed land in some cases is not viable as parts are prone to flooding. Culverts running through a proposed sight would impact on flood defences in the area. - - - -	-

Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. 12. What would the impact be on the carbon footprint of the valley ? - 13. Loss of privacy - Would my house and others be overlooked. 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. 16. Some of the areas and the surrounding areas have already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public</p>

								<p>footpath (Right of way) could be lost. 18. Local drainage cannot cope with the usage now would more residents put an unbearable strain on this network. - DON'T FORGET EACH ADULT IN YOUR HOUSEHOLD CAN PUT IN THEIR OWN OBJECTION FORM TO THE BUILDING WORK. Extract from the Governments Planning Policy Statement - Protection and Enhancement of the Environment 17. The Government is committed to protecting and enhancing the quality of the natural and historic environment, in both rural and urban areas. Planning policies should seek to protect and enhance the quality, character and amenity value of the countryside and urban areas as a whole. A high level of protection should be given to most valued townscapes and landscapes, wildlife habitats and natural resources. Those with national and international designations should receive the highest level of protection. 18. The condition of our surroundings has a direct impact on the quality of life and the conservation and improvement of the natural and built environment brings social and economic benefit for local communities. Planning should seek to maintain and improve the local environment and help to mitigate the effects of declining environmental quality through positive policies on issues such as design, conservation and the provision of public space. 19. Plan policies and planning decisions should be based on: –up-to-date information on the environmental characteristics of the area; – the</p>

								<p>potential impacts, positive as well as negative, on the environment of development proposals (whether direct, indirect, cumulative, long-term or short-term); and, – recognition of the limits of the environment to accept further development without irreversible damage. Planning authorities should seek to enhance the environment as part of development proposals. Significant adverse impacts on the environment should be avoided and alternative options which might reduce or eliminate those impacts pursued. Where adverse impacts are unavoidable, planning authorities and developers should consider possible mitigation measures. Where adequate mitigation measures are not possible, compensatory measures may be appropriate. In line with the UK sustainable development strategy, environmental costs should fall on those who impose them – the “polluter pays” principle.</p>

						<p>flooding in the valley), should the council be protecting residents from it rather than creating further problems? Local drainage (water and sewage) cannot cope now in some areas. Should County, District and Town Councils together with United Utilities officially verify which of these proposed development sites are in potential flood areas before planning permission is granted? Further house building would expose a failure "to deliver sufficient community infrastructure and services to meet local needs" (a key principle of the National Planning Policy Framework). Such development would also cause further pollution (e.g. to air quality - more traffic on the roads) creating a greater carbon footprint for the valley and the next generation. Article 19 (from the GPPS), in line with UK Sustainable Development Strategy, states that "the environmental costs should fall on those who impose them"; will the council take this "polluter pays principle" into consideration before making any decisions? Geographically, in some of the proposed sites, the landscape makes building difficult. It would require radical and costly solutions. Where would the access roads for these developments be? If any small byroads are used, this would increase traffic, thereby increasing the risk of accidents to children (particularly near schools). Additionally, in winter such roads are often not salted or gritted making them a hazard for the disabled and the elderly resulting in more accidents and costs for the NHS. There is already inadequate infrastructure in transport where roads are gridlocked at peak times and in need of repair e.g. the already congested road leading to the reservoir and quarry (adjacent to Cwm Waterworks). With one main road in and one out, Whitworth is already a congested village. Public transport is very limited e.g. no train/tram services. How will the increased traffic be managed? In other services, there have been at least 4 outages this year in electricity in the Whitworth area. Water and gas would also need upgrading (representing further expenses on already overburdened service users). Present resources would fail to deliver the increased demand new residents would require, thereby failing to meet the criteria set out in NPPF. Currently, schools, doctors and the sole dental practice are all over overstretched and over subscribed. This depletion in resources would curtail the life chances of future generations. Further house building would further increase class numbers in schools and severely overload resources there. Frequently, waiting times for doctor's appointments are well over four weeks. Dental</p>

1744	Keren	Szelesi		Sandbank Gardens	Object	<p>Objections:</p> <ol style="list-style-type: none"> 1) Infrastructure is already at breaking point in this area. 2) Road system, water supply, medical centre, schools are at full capacity. 3) Encroach on green spaces. 4) Whitworth will no longer be a village but an urban sprawl. 		Not enough publicity has been given regarding these proposals.
1820	Kelly	Holt	Lancashire County Council		Not Applicable	<p>HS 2:108 – Tong Lane itself is constrained in width by buildings and has poor pedestrian provision. There is a higher than average percentage of HGV traffic on Tong lane due to the Quarry to the north. The site access off Tong End is too narrow currently and requires widening and what is potentially third party land. The provision of 20 houses appears high considering the site is crossed by the reservoir spillways however the provision of any additional housing would be a concern due to the constraints of Tong Lane and the site access.</p>

5	Kimberley	Ashworth	-		Object	I am writing to object against the proposed local plan for Whitworth. - - I am unable to attend the meeting tomorrow night due to illness but I have looked at the proposal as stated below: - - http://www.rossendale.gov.uk/download/downloads/id/3700/whitworth_map_with_street_names - - I'm disappointed to see that a number of green spaces are being considered to build houses on. The green spaces behind Tonacliffe School are used by many for walking. To build on this space would be detrimental to the green space due to wildlife and other conversation in that area. - Building houses would also see an increase in traffic which is at demand during peak times at the moment. - - Other green spaces on the plans are also being considered. In a village that is at full capacity I am unsure why Rossendale Council see the need to build in places that already has adequate housing. - - There are no plans to look at new recreational and family facilities which the town needs. The closure of the children's centre means that new parents and young families have nowhere to go. The plans don't take any such new facility into consideration and I urge Rossendale Council to look at this. - - I know I speak on behalf of many in the Town when I say the option for Whitworth is option 1 'Do nothing' - - Kind regards -		I am extremely disappointed that a meeting has been arranged in Whitworth for tomorrow evening when all the other consultation meetings are taking place in September
12	Chloe	Halliday	-		Object	Already too much traffic in this area during school hours with cars often dangerously parked. Would also result in the habitats of many wildlife being disrupted.		-
20	Jamie	Ward	-		Object	The objection is simple on the grounds of traffic management, a majority of the streets do not have proper paving and the hills up to Tonacliffe have a lot of problems with traffic and parking already, especially when there is a primary school on two of the roads.unless new access roads are added or the existing roads are considerably improves including traffic calming measures and possibly a one way system then you would sing be making the roads too congested and also very dangerous.		-
24	Erica	Preston	-	HS2.105, HS. 107, HS2. 108, HS2.109	Object	The single road through the valley is not up to the volume of traffic using it currently. Hall St.will be a blocked junction, as will Tonacliffe Road. There are not the amenities in the area eg.doctors, dentists, schools etc. Unless major investment in the valley is made to update amenities and utilities these developments will cause immense problems and destroy the reasons people want to live here and turn the valley into yet another sprawling suburb. - I have every sympathy for the need for housing but feel the proposals are ill thought out and will lead to a detrimental effect on the township.		The need for housing must be weighed against the needs of the valley as a whole and destroying green belt and valued wildlife habitat will not make it a place people want to live.
26	Christine	Bamford	Childminder		Object	This is a quiet cul de sac, never in this world can the Avenue cope with more traffic!! Online survey submitted 09/10/17: HorsefieldAvenue could not cope with more houses, no room in school, no room for that amount of traffic thro the Avenue, it's a crazy proposal!		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
27	Michael	Chianca	-		Object	<p>HS2.102 - King Street - HS2.104 - Old Lane - HS2.108 - Sandbank Gardens - HS2.105 - Albert Street - HS2.107 Fern Isle Close - HS2.106 Moorland Cres - HS2.109 Horsefield Av - - All these proposed sited are unsuitable for the following reasons. 1. Wildlife - This greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest area at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. 2. Loss of Trees - The forest itself would have to be cut down a totally unnecessary action when we have other areas within Whitworth to build on that would not require the destruction of trees. 3. The local school at both dropping of and collection time around this area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. 4. A Culvert runs through the middle of the proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. 6. Local amenities such as Schools, Dentists, Doctors are already full and building more housing would have a negative affect on the living standards of the people of Whitworth. 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing. 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. 9. Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would endanger the lives of the residents living there especially the children. 10. Government policy is to protect greenbelt areas except for "Exceptional circumstances" can you explain what those exceptional circumstances are when we have other areas more suitable for building houses on. 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental affect on both. 12. What would the impact be on the carbon footprint of the valley ? 13. Loss of privacy - My house and others would be overlooked. 14. As the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. 15. The safety of all the local residents would be put at risk with the increase of traffic including school children. 16. This area and the surrounding area has already had planning refused in the past and nothing has changed since that application apart from more wildlife moving in to the area. 17. A public footpath (Right of way) could be lost.</p>

28	Karen	Ward	N/a	HS2.109 and HS2.106 relating to the Tonacliffe area.	Object	<p>I object to the proposed planning for houses in my local area (Whitworth). The local infer-structure of Whitworth Village cannot possible take the volume of traffic these proposed houses will generate. The increased in cars commuting out/in especially at peaks times would cause a residential and commuting nightmare as there is one road in and one road out of Whitworth. Most houses proposed to be built are two to three bedroom family homes, and therefore in reality this could mean that each home will be a two car family. This will add to commuting time as more traffic is on the road (one road in and out of Whitworth). This means that more time travelling is cutting into precious work-life balance time with family and children. Also, the local surgeries/dentists are already full to capacity with appointments not being able to be given the same day or appointments not able to be given the same week, meaning residents have to wait in some cases one to two weeks to see a local GP. How many extra people wanting to sign on at Whitworth/Healey medical centre for medical attention which is over stretched as it is. Building in the area would only add to these already stretched services within the area. In view of this there is also the emergency services to consider and are these able to cope with demand? Has this been looked into in regards to emergency response times and that the nearest A&E is Oldham hospital? Some of the planned access roads are classed as un-adopted/private. These are not suitable for heavy or extra traffic and who will maintain these roads? Building more houses in the area would mean the current schools in the area would not be able to cope with demand. With the local schools already at near capacity and with no current plans in the proposal to build another local school this will only get worse. Since schools are no longer ring-fenced in regards to places/applications, there are many of the local children not getting into their local Whitworth school/nurse. By adding more houses within the Whitworth Valley this would add to the demand for school/nursery places. Local children (who currently live within the Valley) are having to travel outside of the Valley as places are being taken up from children outside the immediate area, therefore adding more houses in Whitworth would cause additional placement/schooling and nursery demands to mean the out local children's needs are not being met. Currently the need, sheer capacity and demand as it is falling short of residents needs without adding more houses to the area. More research and investment needs to be been done, looking at how many children locally are wanting nursery, school places in Whitworth as there are many parents struggling to place their children in a school near to the home/first choice for intake 2017. Traffic in the area is already at dangerous levels around Tonacliffe primary school in the mornings and afternoon and therefore adding houses and extra traffic to the streets that are not suitable for the extra capacity will increase the risk of accidents. The roads are narrow with resident's double parking on the side in which they live.</p>		Whitworth infer-structure can't take the amount of proposed housing that these plans show. I find it disgraceful that local residence and Whitworth council have not been consulted from the start.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
						Building houses on Green-belt will lead to the destruction of the local wildlife, flora and fauna. This needs to be considered in regards to building on land and this is the natural habitat for many birds, animals, insects and flowers. - - -		
32	Paula	McNinch	-		Object	There is not the infrastructure in Whitworth to cope with extra housing. The road in and out is already too busy, the schools are full and there are no facilities for young people.	-	
39	Claire	Butterworth	-		Object	There is no infrastructure to place extra houses in this location. Wildlife in the area bats, deer, foxes and badgers all reside in this area with there homes in these locations these will be destroyed. The roads are not wide enough to accommodate extra houses and are not maintained by the council (it has taken 3 years of complaints to resurface a road a few hundred yards in length) the grit bins do not get filled in the winter and the road turns to sheet ice with the water off the moor, this would worsen. the doctors have no space for extra patients nor does the school. Children out playing will become more vulnerable with extra traffic, as the countryside is there playground and you are removing this. Winter fetches flood water off the hills and with extra property this will put our houses st risk of flooding when water finds it's natural pathway flooding has increased in the area over the last couple of years as the council is already aware. One road in and one out this will cause traffic problems at peak times. You will be reducing the price of my property as I bought the property for its views and location, my views will be gone (am I going to compensated for this).		There are certain areas which would benefit from extra property but these locations are not the best option.
40	Jason	Butterworth	-		Object	1 traffic congestion problems already causing danger to children at school before said planning. 2 roads are very narrow already causing people to park on the paths. 3 land is very wet at all times with numerous streams throughout the land and would need large scale infrastructure to cure . 4 there is no infrastructure in place to accommodate e.g. Doctors schools already full. 5 traffic is already bad getting in or out of Whitworth due to one road in and would make a problem worse than already is. 6 there is a lot of wildlife in both areas badger sets bats deer which would be upsetting to all involved. 7 people use the land for walking,children play on the land taking it away would leave them with only streets to play on making them more vulnerable. 8 with flooding problems already in Whitworth would only make matter worse. 9 people bought houses at a price which reflected the area and would de value all properties being over looked by lots of houses. 10 the area would need large scale earth moving to accommodate these plans leaving the area having the feel of a valley taken away.		This would cause a lot of stress to the community and cause divisions throughout Whitworth.
46	Ian	Hills	-		Object	Increase in traffic pollution and the lack of new access to these sites		No

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
56	Valerie	McDonald	-		Object	<p>Whilst I recognise the need for further housing within the area, I am concerned about the siting of so many proposed dwellings in this particular valley. The roads are already clogged at rush hour and as there is only one road through, movement of traffic, should there be an accident or roadworks, becomes frustratingly unpredictable. What provision is there to maintain and develop the road system in the valley? - - Whitworth High School has become more popular over the past couple of years with waiting lists existing. What provision will be made to expand the school, and will this be done with a long term objective in mind and not just a sticking plaster effort to put up some portable classrooms? - - Local services such as the Children's Centre have just been lost. What plans may be afoot to reinstate such necessary provision? I feel it is morally wrong to simply build new houses and forget about the infrastructure to support this development. - - There is a wealth of wildlife on the moors where you are proposing to site many homes. Presumably there will be checks in place to ensure some of these species are not endangered? - - Finally, there are already plenty of properties on the market at very affordable prices (in comparison with some surrounding areas). Some of these have been on the market a while? Why, if there is already affordable housing, is there a need to build more? -</p>		
60	Valerie	Archibald	-		Object	<p>This site is moorland edge and is the habitat of roe deer,badgers, foxes,birds of prey,squirrels,hedgehogs,weasels frogs and bats as well as countless species of birds,butterflies.and insects.It has not been cultivated for more than 40 years and there is a diversity of wild flowers.It is a completely wild place,mostly untouched by Man and as such it should be preserved. - - The gradient of most of the site makes it totally unsuitable for building,the subsoil is sand and shale and the - run off of rainwater from the site [and into my property] means that if building proceeded my property could be substantially damaged . - - Because of the gradient of the site any buildings would overlook my property and the value of my property would thus be greatly reduced.As well as this,the building work needed to get the site fit for building would mean a good deal of disruption for all living nearby as well as the disappearance of a wildlife habitat. - - The local road leading to this site is heavily congested at times because of the local school and if further houses were built this would make the present unpleasant situation even worse.As most employment opportunities mean commuting towards Rochdale,this would mean that the busy main road into Rochdale would be even more congested than it is at present. - - The local school is at present full and there are insufficient Doctors locally to serve the present population as it is not at all easy to get an appointment now. - - With an additional 120 houses in the vicinity,the any amenity value of Tonacliffe would be gone.</p>	No

73	Caroline	Lord			Object	<p>This is green space where wildlife thrives, there are badgers, foxes, deer, hare, newts in the river and many many more, to build here would destroy their habitat. The local schools are at saturation point I work in the local Secondary school and we are full to bursting with the council still allowing more and more students in on appeal it is causing disruption to student learning. Parking by Tonacliffe primary school is a nightmare at the moment to introduce more cars will cause total gridlock. A culvert runs through Tonacliffe and this is at bursting point when it rains heavily our garden is flooded. The landscape is totally unsuitable for building and will most certainly cause flooding should building commence. Local amenities will not cope with more people doctors dentist etc are already full. Whitworth as a village comes to a standstill at the drop of a hat and total carnage occurs should there be traffic lights etc. Recent demolition of the local mill was an example of this as there is only one road in and out of the village. Access roads to Tonacliffe are narrow and will cause problems for emergency vehicles with more traffic it will be dangerous for children playing, basically if councillors came and looked at this beautiful green moorland I am fairly certain they could not agree to build and surely a brief walk through Whitworth would show this village is totally at saturation point . Come on counsellors have some sense!</p>		I really hope you take into consideration local peoples feelings for once instead of sitting in your ivory towers making decisions that affect local people
98	Jacqueline	Butterworth	-		Object	<p>I am objecting to proposed development of all the above houses around the Whitworth area. The area is overrun with traffic as it is. One way in and one way out. The schools are overloaded as are the GP surgery. It is inconceivable to build more houses and allowing more traffic to use our roads which are in a terrible state. We are already experiencing burst water pipes and our water pressure has already been reduced. We are experiencing more power cuts since all the new houses have been built on Cowm Park Way . Surely there must be someone in the planning department with some common sense and will prevent any further building of houses in Whitworth</p>		-

131	Christine	Greenwood	-		Object	I am objecting to plans to allow the building of over £350 properties on various sites around Whitiworth and Shawforth over the next 15 years. - Not only am I concerned about the building on our greenbelt sites which is part of the attraction of the area. I can understand the wind farm and can support renewable energy sources but not the creation of a collection of housing estates - whether social/affordable or not . The awful collection in Britannia speaks for itself! We have already had several builds across Rossendale but the extra Council Tax revenue does not seem to have brought many benefits to the borough. - As it stands at present the infrastructure can just about support the current residents - schools are already over subscribed and getting an appointment at our one GP surgery is already a mammoth undertaking. Planning to build or reopen a school by any chance? - Traffic is already an issue with one road in and out and a bus service that has to be one of the most unreliable in the surrounding areas ! There are next to no facilities for young people/children and a library fighting to survive so I think that this needs to be given serious consideration before you go ahead.		-
149	Hellen	Hills			Object	<ol style="list-style-type: none"> 1. Wildlife, lots of different species 2. Conservation of moorland 3. Traffic is already an issue so more would be catastrophic also access would be a maor issue. 4. I blieve the proposed site would be totally unsuitable to build on and would cause damage to an area that already has water problems mainly leaks. 5. Schools, dentists, general practice (doctors) are already struggling 6. roads are already in a poor state more traffic would only compound this issue. 7. Pollution 		I strongly believe this would be catastrophic for the people of tonacliffe and all of whiteworth from too many vehicles on already poor roads to the pollution they would cause. Also to the local wildlife that have lived and continue to thrive on the proposed sites.

153	G.N	Royds			Not Applicable	<p>As I have indicated before, a prerequisite for a community is sustainable employment. A complete hash has been made by not providing this. Former mill sites have been used for housing, such as Orama Mill, Facit Mill, Albert Mill and the mill near Spodden Fold (which I think may have been called Old Kays). Most of these are easily accessible. Now Spring Mill is proposed for similar treatment! On the other hand, peripheral businesses have been allowed, e.g. tattoo parlours and tanning centres, which debase the human body; the type of potentially smelly fast food outlets that encourage unhealthy eating.</p> <p>Housing without local employment means commuting, causing traffic congestion and pollution. The kind of industry needed is that involved in green energy, recycling, sensible clothing and the production of healthy food. The former site of Spring Mill is a place where a sensitively designed industrial estate might be possible. It is already surrounded by trees and has foundations remaining but it is not on a regular public transport route and is less accessible than previously mentioned sites that have been precluded. It is absurd to think of building on HS2.102/103/106/109 and on that part of HS2.107 not formerly occupied by Spring Mill. These are large areas of countryside enjoyed at present as part of the natural environment. HS2.104 also appears to be countryside, with a few established houses, and also should be protected from further building. Cowm Water Treatment Works (HS2.108) is ideal for industrial development. Let us have local jobs and ensure adequate facilities are available before any more houses are built in Whitworth.</p>		<p>P.S. I did not make this response online because it was mandatory to provide an e-mail address. Please change this, so that more people are encouraged to respond.</p> <p>P.P.S. Please keep me informed of developments.</p>

155	Jo	Furtado			Object	<p>HS2.106 and 109 -those areas of land are d'etightful to walk on; they might be delightful to live on, if the houses are well built and well insulated BUT access to/from those houses, via Tonacliffe Way, would put real pressure on narrow"estate roads, particularly at school start and finish times. The two big issues are broader, however. 1. The numbers of houses proposed pose a real challenge/threat in terms of schools, health services and road infrastructure, as outlined above. The proximity of these sites to the southern end of the valley means they would almost certainly be occupied disproportionately by those who work in or beyond Rochdale, with obvious consequences for the A671 and its users. 2. These are two sizeable chunks of Green Belt, carefully shown as such on your own Green Belt Assessment document (which was available along with the DLP maps/document/Infrastructure Delivery document at the Library), though mysteriously appearing as Urban Area on the DLP map.</p> <p>Whitworth's Green Belt is mostly moorland, and there will be those who see moorland as worthless. But the moorland is a large part of what gives Whitworth the character its residents value: we should not be giving it up so easily. (The moorland surrounding is already disproportionately given up to wind turbines.) Let the government meet its housebuilding targets by throwing up estates in the Cotswolds, or the South Downs, or the Chilterns, or the South Hams. Perhaps we should redesignate our moorland a "Heritage Asset": in ENV2 you yourselves say that historic landscapes could be so designated. Oppose vigorously, in both cases.</p> <p>In SD2 the DLP states, "All new developments in the Borough will take place within the Urban Boundary defined in the Policies map ... " which begs the question, when, and by whose authority, did the parcels of land numbered HS2.106 and 109 transfer from Green Belt to Urban Land? The DLP goes on, " ... except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area." (My italics) Put bluntly, they don't, and they wouldn't. The spirit ofthe DLP is quite clear: it would be wrong to build houses on either of these two sites.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
195	Janet	King	-	HS.102, HS2.104-9 inclusive	Object	Whitworth' infrastructure cannot support almost 400 new properties - it is already nigh impossible to obtain a doctors appointment and my father has had to wait iver 6 months to obtain a podiatry appointment as there is only one who has been on long term sick and no replacement cover available. The fact that there is only one main arterial road into and out of Whitworth, which already has weekly road works delaying the already totally congested road does not bear thinking about. With an extra 400 properties and the increase in traffic that these will bring and as there is no large employer in the area most of these occupants will be commuting one way or another. We lost access to an A&E in Rochdale and now the nearest is either Fairfield or Oldham with the additional traffic these proposals would create the congested roads Could be catastrophic in an emergency. - - On a personal note, my family moved to Whitworth 12 years ago, from Oldham, due to its naturally beautiful countryside and I see the addition of these properties into areas of greenery (extending Wallbank estate etc.,) is the very short end of the stick. I can see that if these are accepted, encroaching on to green belt areas, slowly but surely the green belt areas will get smaller and smaller until eventually Whitworth just becomes another concrete plot with ever creaking infrastructure. - - Finally, I understand the need for affordable housing but there are plenty of mills/brown field that could be developed. However, I feel strongly that before any proposals are accepted it is of the utmost importance that the infrastructure is in place to support them, that includes roads, schools and NHS access.	-

208	Tracie	Dexter	-		Object	<p>1. Wildlife - there would be a huge impact on the wildlife in this area. We have regular sightings of foxes, badgers, deer, kestrels and bats. There are also rare protected newts living in the pond in this area. 2. Trees - there are a significant amount of trees in this area which would have to be cut down and this would have a negative affect on the wildlife and local environment. 3. Schools - Parking in this area at the local school is already a concern for the school and local residents at dropping off and collection times. The road is regularly gridlocked and there has been a number of incidents and 'near misses' involving cars and pedestrians. The inevitable increase in traffic will only make this worse. 4. Flooding/drainage - a culvert runs through the middle of this area which takes land/drain water off the moors. This is already at near bursting point during heavy rain and a number of properties which back onto the open moorland frequently have rain water/ mud flooding into their gardens. I believe that increased flooding is a risk if this site goes ahead. 5. Landscaping - This site is geographically unsuitable for housing and the features of the landscape would make it difficult to build. The site is extremely steep and there is an electricity pylon at the bottom of the hill. The site would have to be radically altered in order to build. Has a land survey been done? 6. Local Amenities - Tonacliffe school is already at full capacity, it is already extremely difficult to get a doctors/dentist appointment and more housing would have a negative effect on the living standards of people living in Whitworth. 7. Infrastructure - We regularly suffer power cuts and loss of water supply which indicates that these utilities are already stretched. These would need a major uplift to accommodate more housing. 8. Roads -there is only one road in/out of Whitworth and this is already gridlocked at peak times and when roadworks/accidents occur. This road was never intended to take such huge amounts of traffic and more housing/ residents would have a massive impact. 9. Access - if access to the proposed site is to be through Horsefield Ave, which is currently a cul de sac, the lives of residents living in the area would be endangered, as would the large numbers of children that play freely and safely in this area. 10 Policy - it is Government Policy to protect greenbelt areas except for 'exceptional circumstances'. What are those exceptional circumstances? 11. Noise Pollution - this area is peaceful and surrounded by wildlife which is one of the main reasons local residents chose to live here. Building in this area would increase noise pollution and would have a detrimental affect on both. 12. Loss of privacy - my house backs onto open moorland. The proposed building plans would mean that I would most likely be overlooked and would lose the privacy I currently enjoy. 13. Public footpath - there is a public footpath (right of way) that runs across the moorland and this would be lost.</p>		-

258	Fiona	Harrison			Object	Whitworth is already a very busy village oversubscribed schools and GP Services with one road in and one road out. The pressure on the infrastructure would be immense, plus travelling to or from anywhere especially at peak times is already horrendous, nevermind with another approx 400 houses being built. Our skyline and beautiful views and countryside are also going to be lost.		-
261	David	Eyes	-		Object	This is an unbelievable plan that will stretch amenities in the area even further. - - The new estate near Cowm has already increased traffic congestion on the one road in and out of the village and schools are already struggling to cope. - - There is also the issue of wildlife and the impact it will have on their environment. - - I for one will be leaving if this idiotic plan goes through. -		This smells of greed over common sense
268	Michaela	Radford	-		Object	Whitworth has had numerous instances recently regarding the roadworks for the infrastructure repair and maintenance. As an employee of all 4 major utility asset owners in the area, I am very concerned regarding the houses proposed. We only have one road throughout the valley and this is impacted severely when roadworks are planned. My concerns are that these are not managed correctly by LCC at present, therefore; more houses and more infrastructure would have a massive impact on the people living in the village. People face unemployment now due to the frequent issues we face getting into work. - Not to mention over crowded schools and doctors as we stand at present. - - I request, here in writing, to be informed of any planned meetings regarding the houses in whitworth and notification be sent in writing to my address above.		-
297	Lindsay	Fairhurst			Object	Poor access along the length of Main Rd (Market Street) one narrow road lined with parked cars , as only access into & out of whitworth. No alternative route. No trains or trams. Buses won't must travel on same one access road both in and out as cars. No motorway access under 20 min journey both ways insufficient work in area means people must travel to Manchester, leeds, bury, Rochdale etc. Current public transport unrealistic. Traffic at peak times currently gridlocked & congested. Increased housing will add to this burden. Utilities infrastructure unable to cope currently leading to repeated remedial roadworks. Schools full Doctors full Rossendale Council Lancashire Council needs to address transport & roadways access + education access beofer building homkes where people will be unable to travel to employment and school		highway safety compromised by insufficient access up tonacliffe road past primary school - children at risk also

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
298	Andrew	Fairhurst			Object	the number of houses proposed in this local plan for infrastructure can support. Whitworth has only one road in abd out and already this is constantly being dug up by utility companies often resulting in temporary traffic lights that cause massives queues of traffic in rush hours. Not only is the road narrow and conjested but there is no alternative train service - only the bus (on the same road) This is totall useless for the number of people wo commute to Manchester, Oldham and Bury every working day. Our schools, doctors and dentists are already close to capacity. There are very few options to travel to other facilities apart from along the one road through the valley.		Without robust and achievable plans to increase the support infrastructure for travel (a train for example) and health and education and culture this building should not go ahead. For people to afford these houses they need jobs first. Currently you need to move out of the valley to commute to work. Regeneration of the area and existing housing stock should come first.
335	Venkatesh	Thoppae	-		Object	Currently, due to traffic I am already starting 30 minutes early to work, with the school run, I believe the roads towards Haslingden and Rochdale will be much congested for office goers if proposed plans are executed without proper plans to widen the roads and making new ways to connect to the various part of the main roads(motor way). - - Also the schools, GP services will be under much more strain if those are not equipped to address the increasing population.		-
405	Sheila	Sutcliffe	-		Object	Whitworth and in particular the area around Tonacliffe Primary School is already a very busy area with extreme access and parking problems. - - This area is already saturated with housing and there is no advantage to be gained by the proposal of increasing housing in the area. This would only increase the associated problems brought by a new housing development i.e. extra traffic, parking problems, school places, GP and dentist places. - - The traffic problems alone would be horrific, the proposal of building a further 120 new houses would bring 240 more vehicles to the area, bearing in mind that most houses have at least 2 vehicles. The proposed site in Tonacliffe has only one access road, Tonacliffe Way, which is already heavily congested as it includes the main entrance to a primary school. Police are continually requested to show a presence to deter traffic issues on Tonacliffe Way and residents already suffer terribly with obstruction problems outside their properties. - - Tonacliffe School is already up to capacity on the pupil roll number and is oversubscribed in some year groups. It would not be able to sustain the increase in school places that 120 new houses in the area would undoubtedly bring. Tonacliffe School also has no further space within the building to increase the number of classrooms.		I implore all counsellors to reconsider these proposals which would destroy a greenbelt area providing countryside on the doorstep of current residents and an Outstanding Ofsted primary school. - - The area provides a natural habitat for wildlife, I have personally enjoyed watching deer, falcons, and owls in the area. It provides a safe haven for children to play, families enjoy walks together and many, many dog owners exercise their pets on the hillside. - - - -
441	Sharon	Brown	-		Object	Tonacliffe is already congested. Water pipes have burst, the road is in a state of disrepair. - - In addition concerns on how the school would cope with 120 new families moving directly to that street. Plus the additional - - I have lived at Ainsdale for 12 months now and have had 3 power cuts already.		Whitworth Road couldn't cope with the extra through traffic.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
446	Paula	Todd	-		Object	Whitworth is a small community with only one main road to access it. I feel that if all these purposed houses are built the traffic congestion for commuting will be very difficult for the local residents. Other than the bus service residents have no alternative to drive to and from work. - - My children go to local Tonnacliffe school and the traffic and parking is extremely heavy and if more houses are built in that area the roads would not be able to cope. - - Flooding is a massive problem at present in Whitworth, united utilities are constantly out trying to fix problems, having more houses I believe would make the flooding worse. - - Whitworth is also known for its beauty, walks and wildlife and to purpose building on the greenbelt areas of Whitworth would cause a detrimental effect on this. - - Whitworth does not have access to a local A&E dept, Rochdale hospital only has a urgent care centre as does Burnley. Residents of Whitworth closes A&E is either Oldham or Blackburn. Having more residents in Whitworth with limited healthcare facility's could increase morbidity rate. Along side no local A&E we only have one GP practice in the area, having more residence would cause strain on their service, this also includes only one dental practice. - - Will there be enough places in the schools for all the new children to the area? The local high school is only small and as I believe was over subscribed this school year. - -		-
509	Joanne	Robinson	-	HS2.106 & HS2.109	Object	The changing of usage of these 2 areas from greenbelt so you can use them to build 120 houses is totally unacceptable. To begin with more houses in Whitworth itself is going to create more problems on our main road which is already so busy as it is one main road in & out of the village. Any roadworks that occurs (which are frequently) because of water mains constantly bursting due to overuse & other utilities constantly having to upgrade because of new houses already being built. The back up of traffic is appalling. We also need to think about ruining the natural beauty of the area, the wildlife that will be disturbed , we have 2 ponds in these areas also. Already when we get alot of rain we have flooding in our gardens. Your plan is proposing to use our street as one of the access roads again this would be a nightmare as the amount of cars on all the streets over Tonnacliffe would make the congestion unbearable. We have a primary school at the bottom which at school time again congestion of cars ridiculous. What about local amenities schools, doctors, dentists will they be able to take the influx of more people ?		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
510	Philip andrew	Robinson	-	HS2.106 & HS2.109	Object	I am not happy with you proposal to change these 2 areas from greenbelt so you can build 120 houses on them. The area has an abundance of wildlife, 2 ponds and would be a great loss to our community. Taking this piece of greenbelt would ruin our beautiful landscape. The problems with congestion on our main road through the village is getting worse as of new houses already bejng built and the constant digging up of our roads by the utilitie department to try and fix problems that are constatly occuring. The state of our main roads and roads around Tonnacliffe are appallingly and will only get worse with more cars. The access to these sites coming of our street and others on Tonnacliffe would be a nightmare because ahain with the number of cars at the houses already there. When the school is open again the congestion is ridiculous. We also have trouble with flooding after alot of rain in our gardens coming off the moors so again more houses would not be helping that .		-
578	Enid Jean	Ainsworth	-		Object	I believe the proposal to build 52 houses on the green belt land on the site of Horsfield Avenue is inappropriate for a number of reasons. - This is greenbelt land that is dedicated to the community for leisure e.g. dog walking, children's play. Also to encourage wild life to thrive in whatever form e.g. freshwater newts, flowers, birds, foxes and badgers. - The people who have chosen to live their lives alongside this peaceful area of Whitworth, live there because they value the land adjoining them, for the reasons that it is designated greenbelt land, or to simply enjoy the benefits of the scenery. - The entrance to the new site may be from the road at the side of Tonacliffe school. This area is already a potential danger zone for children and adults due to it's close proximity to the school. The entrance to the existing estate from Whitworth Road onto Oakfield Avenue is already very busy with cars coming onto the estate to access homes and the school. - Tonacliffe school is already over-subscribed and the building is not large enough to accommodate an increase in children. - Whitworth village itself is accessed by two roads from Rochdale. Then, from Healey Corner the road becomes one. The route to Whitworth and beyond is increasingly busy due to the new builds on the far side of Whitworth and the new builds in and around Bacup. - I believe there are too many reasons why we should not accommodate any new houses, especially in this part of Whitworth. Both regarding the very real problems of infra-structure and of the natural, greenbelt area.		-
590		Ashworth			Object	Absolutely ridiculous One way in and out of whitworth no extra schools or doctors when you have two or three cars per household. This is ruining our villages. We strongly object to this. Listen to the people who vote you in, as we have long memories		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
627	alan	lord		HS2.109 and HS2.106	Object	Whitworth as a whole is an over developed village, the schools do not have enough places the doctors and dentist are full but more importantly the village is chock a block with traffic. There is one road in and one road out and traffic is a night mare for local people. On Tonacliffe we have badgers, deer, rabbits, foxes and newts just to name a few animals, what happens to these animals where do they go I am not sure they understand the prospect of new houses being built and having to find a new habitat. TRaffic at Tonacliffe school in the mornings and evenings is awful, I came home at 3.30pm on Friday to look for myself I do not know how there are not more accidents or children hurt or injured we just cannot cope with any more people or vehicles in this village		I suggest the planning officer actually visits the area he is planning to decimate and see for himself the beauty of the place and how much he would be ruining. At evenings and weekends the moors off Tonacliffe are full of mountain bikers, walkers and people just enjoying the fresh air which he wants to take away. No doubt the planners will return to their ivory towers and enjoy peace and quiet in their villages why does Whitworth have to have more houses we have more than enough for local people. I havent even touched on emergency vehicles who struggle to get through due to parking on narrow roads that are already full For once councillors think about your actions and decisions and see which people and animals this will affect Greenbelt should stay that protected
705	Sandra	Collier	-		Object	The site is completely unsuitable for development access to the existing housing is already extremely difficult and more traffic would make it impossible and dangerous. The nearby school is already full and traffic at school opening and closing times is horrendous. Whitworth is already experiencing major difficulties accessing public services and increasing numbers will put further strain on these already overstretched resources.		-
706	Jackie	Taylor	-		Object	This is a natural area supporting wildlife that is protected - - Access routes are unclear but likely to impact on High Peak Road a small lane serving a small cluster of homes - This is not feasible to use and any short cuts taken by new home owners will negatively impact - Traffic in Tonacliffe is peak now and more would affect negatively on existing residents - Schools, medical services are I understand already at capacity in these areas - - I object to any green belt areas being destroyed		I trust our council will consider the unintended consequences of harming our village and take a responsible decision to safeguard our environment for the people and wildlife
717	Joanne	Banks	-		Object	As above. The same reasons for objecting against site HS2.106		I believe Rossendale Council should think really hard about further developments in Whitworth. The local amenities are already overstretched with only 4 primary schools, 1 high school and 1 GP surgery.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
743			Whitworth Town Council		Object	HS2.106 Land to the east of Tonacliffe School Avenue, Tonacliffe Council have strong concerns about removing this land from greenbelt and feel that brownfield sites should be prioritised over greenbelt. Developing this area would have an adverse impact on the diversity of nature and wildlife in this area. Additionally, there is a pylon and electricity cables located in the site off Horsefield Avenue which has not been identified on the plan. These areas have formed part of previous greenbelt reviews and the studies have recommended that these areas remain in greenbelt.		
773	Susan	Worrall	-		Object	Whitworth is a village, a small community. Building these housing developments will change Whitworth into a town. - There is not the infrastructure to support this additional housing. There is one road in and out of Whitworth which is already struggling to cope with the increasing volume of traffic.Especially at peak times. If there are any traffic disruptions it can take 1-2 hours to get to Rochdale . We do not need more cars and the pollution they bring! - - There are limited school places both secondary and primary and local children born in the village will struggle to get places. - The one and only GP practice can not manage to provide the necessary health care for patients with no appointments pre bookable for weeks in advance. This healthcare will be diluted further. Living in Whitworth if A&E treatment is required which is often a life or death situation your chances of survival are reduced add more traffic on market street and your chance of survival diminishes further - - The people who live in Whitworth , live here because it is a village , it is quiet and the countryside is on the door step. Yet the plans want to destroy the village life, increase demands on existing services and increase pollution - - To consider building on greenbelt land in Whitworth is unbelievable and irresponsible, Planning has already - spoil the view of the countryside at the side of Daneswood ave and the wind farms are also affecting the views and countryside. - - Whitworth has lots of wildlife from deer, owls, herons, wild ponies as well as lots of insect life butterflies, bees etc which will all be at risk if the countryside is used for housing. - - There is empty housing all over the borough - fill these , not build more especially in our little village -		Stop putting profits first and put existing residents first
796	Steven	Smith	Wagg		Object	Already an overcrowded infrastructure..object to greenbelt land being used and local wildlife being destroyed.the proposed site on horsefield av site would be built under or very near electricity pylons.the roads or already overused to and from whitworth so more traffic will mean longer delays on worse roads.the schools and doctors are already full..more traffic passing tonacliffe primary school would endanger the pupils at school opening and closing.previous mining at tonacliffe makes the proposed site unsuitable for building on.the transportation of heavy plant will damage the roads.		Don't use greenbelt land and build somewhere else.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
797	Louise	Madden	-		Object	<p>1. The roads around Horsefield Ave are already extremely busy at school times, parking is a increasingly growing concern and the impact of more traffic around this are is quite worrying. My son attends this school and I see first hand how dangerous the current situation is without adding more traffic to the mix. - 2. I live on Market St which is the main thoroughfare from Rochdale to Bacup. We are often gridlocked (especially when there are road closures / traffic lights in the area). As an example, myself and my son often 'play a game' about how many cars pass us before we can pull out into traffic. Our record is 122 cars without a break in traffic. This road was never intended to take this level of traffic, what impact would this have on the already poor level of public transport. - 3. The proposed site is on greenbelt land, which the government is supposedly protecting. What would happen to the wildlife currently in this area, not only during the building process but also the higher level of pollution around this area. - 4. Amenities are already stretched, almost every month there are some works being done to water, electric, gas etc. would further impact these services. Tonacliffe Road has been dug up every winter for the last few years due to burst pipes, this situation won't improve with increased usage and traffic. -</p>		<p>There are several proposed housing sites in Whitworth, and in general I object to them all. This is due to the infrastructure of the valley already at breaking point. - Due to only one road in / one road out, Market St is often gridlocked at peak times. 4 years ago, there was a bad accident outside our house. Due to this, the road was closed for 3 hours, this meant a diversion, either back through Bacup through Littleborough or through Rawtenstall / Bury. Increased traffic through the whole valley is just putting further pressure on the valley. - We often have temporary traffic lights on this main road, as our current facilities (water / gas / electric etc) struggle to cope with demand. Have this services been contacted, are any plans to improve their facilities - again this will lead to further problems already highlighted. - Our doctors / dentists are already fully loaded (I know this through hearsay as I am a patient at surgeries in Rochdale). I often hear complaints about the amount of time it takes to see a doctor. - - I feel that major improvements need to be made to the current infrastructure in Whitworth to cope with the current population, adding to this is just putting so much pressure on an already failing situation.</p>

803	Marietta	Galbraith	-		Object	<p>My objections for the proposed building of housing on the above sites is based on a number of reasons: - 1. Infrastructure. The current housing situation is already at (possibly beyond) capacity with regards to schools, doctor's surgeries, dentists, employment and traffic. There are no more schools planned and no way to expand the ones already here. Some children have to travel miles to schools out of the area due to oversubscribed local schools. This is the same for doctor's surgeries and many other amenities. - 2. Traffic. There is one main road in and out of Whitworth that already has issues with raised levels of traffic. In the four years we have lived here, there have been many occasions where traffic has been an issue due to constant roadworks (for various reasons relating to increased housing and traffic) which has caused major problems. Also, most people are employed outside of Whitworth so traffic is high anyway. More housing would increase this issue with no solution being given as to how it could be rectified. - 3. Utilities. More and more power cuts have been happening recently in Whitworth due to new housing as well as burst water pipes and problems with drainage. This has contributed to the traffic issues with roads having to be dug up every few weeks to 'fix' the problem. - 4. More housing would mean taking up land that is natural drainage for flooding. Recently, my area was put into the 'flood risk' category (although we haven't flooded), significantly increasing my home insurance. If more homes are built, this would increase risk of flooding to many homes around Whitworth, which would cause loss of market value and would reduce the chances of being able to sell the property. - 5. Much of the 'green land' would be lost which is detrimental to the wildlife around Whitworth. The Government have a duty to protect greenbelt land and our environment! The carbon footprint would be horrific! - In conclusion, building over 300 houses in Whitworth would cause issues beyond repair! Environment, traffic, pollution, infrastructure, drainage etc. would all be dramatically affected in the most negative and damaging way. Whitworth was not meant for so much housing and so many people.</p>		-

852	Christine	O'Malley	-		Object	<p>I strongly object to the proposed housing sites 'to the land east of Tonacliffe School' 68 houses and 'site off Horsefield Avenue, Tonacliffe' 52 houses. I live at number one Tonacliffe Way and I have a birds eye view of how congested the traffic is on Tonacliffe Way and Tonacliffe Road. This is especially serious when in the mornings, afternoons and evenings when the school is open. Cars park on the pavement forcing pedestrians including those with prams and young children into the road and oncoming traffic. When the cars park on either side of the road only one car can pass up the road at once causing congestion, chaos and a very dangerous situation. Rossendale Council recognised this a couple of years ago by adding double yellow lines on both sides of the road. This hasn't reduced the traffic risk as drivers ignore the restrictions and park on the lines every day. Occasionally the local enforcement officer drives round and gives parking tickets but it's not often enough to put off drivers parking wherever they want on the restricted areas. If the proposed 120 new houses are approved in the Tonacliffe area then this situation will be magnified and put the children and parents lives in more risk of an accident. - Outside of school times there are many drivers who do not abide to the 20 mile an hour speed restriction and as far as I'm aware no-one has been fined for going over this speed limit. - There is also the problem of accommodating the new children that these houses would bring into local schools. All the schools in this area are over subscribed and could mean children having to travel a long way from home to attend a primary school. This would then increase the traffic in and out of Whitworth. The infrastructure can only just accommodate the current traffic flow if all the local housing plans are approved then the main road in and out of Whitworth would grind to a halt including the emergency services that would not be able to pass through. - The local GP practices can't expand any further and new developments would increase the demand for accessing gp services. Many residents would then be put off trying to access the local health services and would potentially increase the risk of early intervention of health conditions in local residents and increase pressure and spend on hospital services and specialist care in local Health Authorities. - Other potential health problems would increase by building on green belt land by not allowing residents to enjoy the beautiful land that surrounds Tonacliffe. Walking has been proven by many health professionals as having a positive impact on our health and reducing the access to this land would discourage many residents of doing this cost free exercise. - On the many walks I have done on this green belt land around Tonacliffe I have seen lots of different wildlife including badgers, deer, rabbits and squirrels. Building the 120 new homes on this green belt will inevitably destroy the habitat for these animals. - During the last few years heavy rain fallen and has seen many houses flooded in this area. We are especially vulnerable at Tonacliffe as we are at the mid point on a hill side. The</p>	-

						moorland that is proposed for housing developments is currently soaking up a lot of the rain. If this land is developed on then this flood barrier will be removed and houses all over Tonacliffe will be susceptible to flooding.		
866	Robert	Atkinson	-		Object	I strongly oppose the proposed plan to build additional houses on the Greenfield site Horsefield Avenue. •The proposed build will overlook my property and as such will result in a loss of privacy. •Access to the the proposed development is restricted and increased traffic levels would cause unacceptable noise and congestion. •Unacceptable over development of the site. •Open aspect views of the countryside would be lost adversely affecting the residential amenity of neighbouring owners. •Generally the schools, medical centres, roads (namely Tonacliffe Road and Tonacliffe Way) and other amenities and infrastructure in Whitworth are unable to support further development. •Previous applications have been refused		No
873	Terence	Burke	N/A	HS2.106 HS2.109	Object	This location is heavily congested with traffic and can be extremely dangerous with speeding traffic. The Council have been helpful in a limited way with educational signs but the police have not shown much interest with speeding or illegal parking in the whitworth area. - There have been a number of accidents (some serious) and tonacliffe Rd is particularly hazardous because vehicles meet head on round a blind bend. - - The Idea that Whitworth will benefit commercially from development is illogical because of poor network links; at certain times it can take half an hour to reach Rochdale and longer to access the motorway, on days with roadworks it is considerably longer. - - Subsidence is also an issue. There are many mine shafts all around this area; there is one mine shaft at the top of High Peak Rd that has been capped with concrete. All the cottages on High Peak were miners cabins many years ago; my bungalow still has the cabin in the walls and roof space. - - The schools in Whitworth are already stretched with some local children having to travel out off the area. - - The local wildlife will suffer like the newts in the pond and the badgers and foxes in the area, although I don't think developers care much about wildlife, or about the local residents either. - If the proposed housing is to be built like the small houses leading up to Whitworth cemetery which looks like a prison block then the village is going down hill fast. Any development should be sympathetic to its local surroundings with both design and the existing social environment blending together. -		
886	Michael	Banham	-	HS2.102 to HS2.109	Object	The infrastructure of whitworth is over stretched as it is, the school's cannot cater for such an undertaking. There's only one road in or out of whitworth any problems on this road causes absolute mayhem. The winter months are an absolute nightmare just to get onto market street.		I cannot understand why anyone would want to over populate an area that is already struggling.

899	Julie	Bywater	N/a	HS2.106 & HS2.109	Object	<p>The Tonacliffe area cannot take any more traffic. Tonacliffe way and Tonacliffe rd are dangerously congested especially at School times and the roads are full of pot holes due to the excess traffic. Additional traffic could be fatal to a child including my own. - - Both of these proposed areas have local wildlife including deer, badgers, foxes, hares, bats and newts. A family of deer is seen on a daily basis grazing on the moorland crescent site which is a wonderful site for residents and children to see these in their natural habitat. Building here will mean the loss of all this wildlife and their natural habitat. - - In addition as a resident that backs onto this land I can confirm that the land including my own back garden is flooded all year round. We have had drainage laid in our garden but this has not stopped the flooding and our garden is unusable all year round. Additional houses will mean less natural drainage and will cause a severe and dangerous flooding risk to all residents. There is a culvert that runs through the land which is always running water away from the houses however this is at bursting point every time there is even a bit of rain. - - We are regularly experiencing power cuts and burst water pipes impacting on this area. This causes roads to be dug up meaning horrendous tailbacks of traffic through Whitworth as far as shawforth. More houses will mean more frequent utility issues and therefore longer tailbacks due to the increase in population. The traffic is gridlocked down market st and Whitworth rd everyday! This small village simply cannot take any additional traffic, existing residents lives are already miserable enough sitting in this rush hour traffic everyday!! - - The schools and GP surgeries are oversubscribed, will there be new schools and GP surgeries built? The existing ones cannot take the amount of residents as it is. - - Finally, my husband and I purchased our house in 2010 due to the corner plot location. We wanted our children to grow up surrounded by nature and knew this was greenbelt land when we bought it. Greenbelt land used to mean something and was protected for a reason, we feel incredibly sad that it is even being considered to change the usage of this beautiful and natural landscape. From a financial point of view, if these houses go ahead the value of our house will decrease effectively putting us into negative equity. This will leave us unable to move to another area impacting on our children's upbringing significantly. If we had wanted to raise our children in the middle of a large housing estate we would have bought a house in one. The Human Rights Act, protocol 2, Article 1 states that 'a person has the right to peaceful enjoyment of all their possessions, which includes the home and other land'. -</p>		Please please rethink these plans, there are better and more appropriate areas to build than this saturated village.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
912	Amanda	Greenwood	-	HS2.106 and HS2.109	Object	Whitworth is a beautiful and unspoilt village. It has a fantastic community and is supported by one local secondary school and three Primary schools. There is one road in and out; and traffic is usually busy. I live in the Tonacliffe part of Whitworth and with school runs and work commutes etc, we already see enough traffic. The various proposals for housing developments in the area are ludicrous. They are proposing building a further 359 houses that will cause more problems with already oversubscribed schools, more local traffic, more pressure on already stretched services such as doctors and not forgetting what this will do to a stunning area of natural beauty.		No.
913	Michelle	Ashcroft	-	HS2.102, HS2.105, HS2.104, HS2.106, HS2.107, HS2.108 & HS2.109	Object	Whitworth is a geographical challenge at the best of times, positioned in a valley, consisting of ONE main road with multiple roads stemming from this leading to many properties that are built on the hillside. There are many green areas which are used by local farmers for their livestock. During times of heavy rain many of the roads are flooded, and during winter many roads are very dangerous in the snow. It is not uncommon for Whitworth to be gridlocked as there are far too many cars on the roads, all it needs is one set of road works and the town becomes inaccessible. The local schools are now over subscribed, the High school has had to turn away many children who only live a couple of miles away. The primary schools are also subscribed making it very difficult for teachers to provide a good education to the children. The local doctors are unable to cope with the number of patients, trying to get a same day appointment is nigh on impossible these days. We have issues with anti social behaviour due to lack of amenities available for teenagers, the local youth club has been closed down. There is a lack of police presence (the PSCO tries her best), people don't feel as safe as they should. The library is still under threat of closure, the pool is only open because of the people of Whitworth who run it. Building more houses brings more people, more cars, more strain on the infrastructure. I appreciate housing is needed but the number of houses that has been suggested will bring this town to it's knees.		
916	Jane	Trudgeon	-	HS2.102 HS2.105 HS2.104 HS2.106 HS2.107 HS2.108 HS2.109	Object	We are already an overstretched village infrastructure, the roads would not cope with an extra amount of traffic and would make the already difficult commute to exit/enter the village impossible. There are not enough schools nor would the doctor's surgery be able to cope as even now it is almost impossible to get a reasonable appointment time, - - The housing developments would impact on wildlife		-

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
918	Marion	Ashworth	-	HS2.107 , ALL.	Object	I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.		I object to all proposed planing in Whitworth, if these house are built Whitworth will not be a good place to live, Dr's and schools are full to bursting, the roads will be gridlocked they are now at busy times, the wildlife we are very lucky to have will have their habitats decimated, please NO more houses in Whitworth.
922	Susan	Percy	-	HS.2107 HS2.106 HS2.109	Object	I wish to object to the proposed building developments on the grounds that there is one route into and out of this village which is Market Street. This route is already very congested during morning and evening rush hour and also due to school runs at other times of the day. This is compounded by the many times that the roads are being dug up for roadworks and temporary traffic lights in situ. - - Increased traffic would be an issue for children that play in these areas. - - Schools are also over subscribed in this area and additional parking outside schools would make a bad situation even worse and dangerous. - - Doctors surgeries and Dentists are also full and additional patients would mean longer waiting times to get appointments and would be detrimental for the health and well being of local people. - - Building on green belt would result in loss of wildlife e.g newts, badgers, foxes and hares. Deer use shelter within these areas and it would be detrimental to them if they lost this facility. - - Drainage is a major issue - loss of more greenbelt would make this worse as we already have problems. There is a culvert runs through the middle of Tonacliffe which takes land drain water off the moors this is already near bursting point and we could be in danger of severe flooding. - - Has a land survey been undertaken? Some of these sites would be unsuitable for building on.		-
935	Christine	Fallon		HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	1 Whitworth has one main road which is often gridlocked the smaller access roads are grossly un suitable e.g Tonacliffe. - 2 Schools are already oversubscribed parking at drop off times would be more chaotic and dangerous. - 3 Doctors and dentists are already at capacity. - 4 Services of gas electricity and water would require major upgrade. - 5 We are seeing flooding due to inadequate drainage this would be increased. - 6 Is this acceptable use of greenbelt land where previous planning permission has been refused the effect on wildlife and trees would be immense.		-
939	Geoffrey	Fallon	-	HS2.102 HS2.104. HS2.106 HS2.107. HS2.108. HS2.109	Object	Whitworth is a small village with one already inadequate road. Doctors dentists and schools are already oversubscribed parking in school areas is dangerous already and would be far worse. - Gas electricity and water services would need major upgrade. - This is inappropriate use of greenbelt land causing damage to wildlife and the environment drainage is a major problem now with frequent flooding.		-

944	N/A	N/A	Britannia Hotels Limited		Support	Allocation of land at Horsefield Avenue, Tonacliffe for housing development is welcomed and supported by the landowner. This support relates to Local Plan site reference HS2.109.		No
955	Janet	Whitehead	-		Object	Whitworth is already a very busy village, oversubscribed schools and Doctors - We have one road in and one road out which is almost impossible during peak times in the morning - The houses already exceed the heights up the sides of the valley - Our green belt is very important to wildlife and the the people the live here - If we let one builder onto greenbelt it opens the doors to far too many others - Our population is big enough and we cannot accommodate many more		Our Councillors are voted in by us and now need to stand up and fight for us - - 400 houses is a ridiculous amount of new houses for a tiny village - - We have had 2 different sites where new houses have been built in recent years we've done our bit for Government figures - - Please find somewhere else
962	Kathryn	Gill	-	HS2.102, HS2.105, HS2104, HS2106, HS2107, HS2108, HS2109	Object	I object to any changes in use of local greenbelt land to build houses. Also, there is only one road through Whitworth and it is already congested. We have only 1 doctors surgery, and not enough school places to accommodate hundreds of additional families. Greenbelt land cannot be restored once built on, and these proposals would change the landscape of Whitworth. I am also concerned about the building of 20 properties around Cowm. This is a resource continually used for recreation by the people of Whitworth and should be preserved.		
979	Marie	Pye	-		Object	All of these developments will contribute to already existing traffic problems as there is one road in and one road out of the area. The high school is already oversubscribed with local children not being offered places.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
992	Susan	Farrell		HS2: 102, 104, 105, 106, 107, 108, 109	Object	I strongly object to the building of houses on all the above mentioned sites for the following reasons: - Greenbelt land is of importance to all the wildlife of Whitworth and Shawforth . Deer and bats live in the forests in the area. Many badgers and foxes inhabit the countryside and rare species of wildlife live in the ponds. - The forest area at Tonacliffe would be cut down having a negative impact on the environment. - Tonacliffe road is already dangerous for children with cars parked along the length of the road at school dropping off and picking up time. The increased number of cars if more houses were built in the area would be worse for the children and residents. - Local amenities such as dentists and GPs could not cope with the increased population. It is almost impossible at the moment to get a GP appointment in less than two weeks. More housing would have a detrimental effect on the residents of Whitworth and Shawforth. - Facilities such as water, gas and electricity are already stretched and a major upgrade of the infrastructure would be required to support increased housing. - Local drainage cannot cope with the current usage. More housing could have an impact on flooding. - Public footpaths could be lost reducing the number of rights of way for walkers. - The road network both ways from Rochdale to Bacup is already gridlocked. More housing would put an increased strain on traffic and the already poor public transport in the area. - The only high school in the area is already oversubscribed. With increased housing parents may have even less chance of a first choice school for their children. They may have to travel miles to school. - I understood it is government policy to protect Greenbelt land except for 'Exceptional Circumstances'. What are the exceptional circumstances that enable housing to be built on the greenbelt land in Whitworth and Shawforth?		Summary - - Whitworth and Shawforth are already busy villages with oversubscribed schools and GP services with one road in and out between Rochdale and Bacup. - - Can we accommodate more housing that will put pressure on already overstretched amenities, increase traffic and change the beautiful landscape forever?
1000	carol	Thomson	-		Object	I object to the amount of houses that will be built affecting the countryside. Are there any more schools being built to accommodate?		
1011	Paul	Williams	-		Object	Gardens already liable to flooding. Parking is a nightmare. Schools already full. - Traffic through Whitworth centre gridlocked most rush hours.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
1025	Warren	Madden	-		Object	<p>1. The roads around Horsefield Ave are already extremely busy at school times, parking is a increasingly growing concern and the impact of more traffic around this are is quite worrying. My son attends this school and I see first hand how dangerous the current situation is without adding more traffic to the mix. - 2. I live on Market St which is the main thoroughfare from Rochdale to Bacup. We are often gridlocked (especially when there are road closures / traffic lights in the area). This road was never intended to take this level of traffic, what impact would this have on the already poor level of public transport. - 3. The proposed site is on greenbelt land, which the government is supposedly protecting. What would happen to the wildlife currently in this area, not only during the building process but also the higher level of pollution around this area. - 4. Amenities are already stretched, almost every month there are some works being done to water, electric, gas etc. would further impact these services. Tonacliffe Road has been dug up every winter for the last few years due to burst pipes, this situation won't improve with increased usage and traffic. -</p>		<p>There are several proposed housing sites in Whitworth, and in general I object to them all. This is due to the infrastructure of the valley already at breaking point. - Due to only one road in / one road out, Market St is often gridlocked at peak times. 4 years ago, there was a bad accident outside our house. Due to this, the road was closed for 3 hours, this meant a diversion, either back through Bacup through Littleborough or through Rawtenstall / Bury. Increased traffic through the whole valley is just putting further pressure on the valley. - We often have temporary traffic lights on this main road, as our current facilities (water / gas / electric etc) struggle to cope with demand. Have this services been contacted, are any plans to improve their facilities - again this will lead to further problems already highlighted. - Our doctors / dentists are already fully loaded (I know this through hearsay as I am a patient at surgeries in Rochdale). I often hear complaints about the amount of time it takes to see a doctor. - - I feel that major improvements need to be made to the current infrastructure in Whitworth to cope with the current population, adding to this is just putting so much pressure on an already failing situation. -</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
1029	Angela	Hannam	-		Object	1. Whitworth is already overburdened by the current housing stock. Drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. 2. The schools in Whitworth, in particular the high school, are at capacity and cannot sustain any addition to the number of potential pupils. 3. There is only one road in and out of Whitworth and at peak times in particular this road is congested with idling traffic contributing to air pollution. People travelling from Bacup and beyond to get to Rochdale all come through Whitworth and add to the problem. 4. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. 5. Access to most of these sites will increase traffic hazards on an already inadequate highway. - 6. I challenge the need for more housing in Whitworth. 6.1. Where is the evidence of any demand? 6.2 There are countless houses left empty and neglected in Whitworth, why are these not modernised and made available? 6.3 Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? -7. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. 8. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.		
1035	Nadeen	Whitworth	-	HS2.109 and HS2.106	Object	The schools and gp surgeries are already at capacity in this area. - - Floods already around Tonacliffe areas and beyond. - - Traffic to and from Rochdale is horrendous, the road cannot cope with anymore traffic. Especially when there are roadworks. - - Badgers, foxes, owls and hares have been seen on the fields also we believe there are old coaling mines around the area. - - There have already been new houses built Hall fold, new line and bacup we do not need anymore affecting our countryside and wildlife. -		Why are you destroying the lovely countryside and wildlife we have left. You need to look at renovating abandoned building before new builds.
1037	Derick	Whitworth	-	HS2.109 and HS2.106	Object	The schools and gp surgeries are already at capacity in the area. - - Floods around Tonacliffe areas and beyond. - - Traffic to and from Rochdale in horrendous the road cannot cope with anymore traffic especially when there are roadworks. - - Badgers, Foxes, owls and hares live in this area and their homes are protected. There is historic coal mining in the area of HS2.109. - - There have already been new houses built at hall fold, new line, bacup and shawclough. We do not need any more new built houses affecting our countryside and wildlife. - - The area is also used for recreation by local children especially when it has snowed.		-

1107	Keith	Hannam	-	HS2 102; HS2 103; HS2 104; HS2 105; HS2 106; HS2 107; HS2 108; HS2 109	Object	<p>1. Whitworth is already overburdened by the current housing stock. Drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. 2. GP services and other related support services are already overstretched and inadequate. 3. The schools in Whitworth, in particular the high school, are at capacity and cannot sustain any addition to the number of potential pupils. 4. There is only one road in and out of Whitworth and at peak times in particular this road is congested with idling traffic contributing to air pollution. People travelling from Bacup and beyond to get to Rochdale all come through Whitworth and add to the problem. 5. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. 6. Access to most of these sites will increase traffic hazards on an already inadequate highway. 7. I challenge the need for more housing in Whitworth. - 7.1. Where is the evidence of any demand? - 7.2 There are countless houses left empty and neglected in Whitworth, why are these not modernised and made available? - 7.3 Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? 8. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. 9. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.</p>		
1109	Jane	Gadsby	-		Object	<p>I wholly object to more housing being built in Whitworth!! We are a small(ish) village that can not cope already with the amount of new houses and people moving into it!! Our schools are already over subscribed; they are turning people away that don't live overly far away that a few years ago would have had no problem getting a place. The Doctors surgery can't cope with the number of patients wanting appointments. You are also increasing the risks of flooding. My house is already at risk and has already flooded twice. The main road (one road in and out) is gridlocked most mornings with commuters trying to get out of the village but most of all you are taking our beautiful green areas that Whitworth is so lucky and honoured to have. We have lots of empty properties that can't be filled already!! Please leave us and our village alone!!</p>

1118	Gary	Calderbank	-		Object	<p>There are a great number of reasons why Whitworth township should not be blighted with further development, particularly on land which has been designated as green belt for a large number of years. I wish to summarise these as below.</p> <ul style="list-style-type: none"> - - Traffic - Whitworth is served by one road from both the north and south and is a major arterial route to people accessing the m62 and surrounding towns from the valley, Burnley and beyond. It is therefore very busy all of the time without even considering the effect of increasing local traffic even further. This route is regularly disrupted as a result of failing infrastructure resulting in severe delays and tailbacks. - - Schools - The existing schools in the town are already over subscribed and there is no capacity for further children without again significant development of schools. The road where I live is already gridlocked by vehicles dropping off children twice a day, illegally parked and causing obstructions. In relation to developments at Tonacliffe and Horsefield the thought of construction traffic too would be completely unmanageable and dangerous. Further development would exacerbate the problem. - - Policing - Whitworth already suffers from insufficient community policing resulting in many issues which do not get resolved, from burglary to bad behaviour and fly tipping. The town can not afford a further increase of population on this scale bringing with it its percentage of problems. - - Planning Policy - Brown Field Sites - Whitworth and the valley in general is a town built on industrial heritage and just like other cities should be primarily developing brownfield developments not green belt. There are many derelict spaces which can be developed to improve the area whilst providing suitable additional housing. There is no real justification for building on moorland in lieu of this. - - Construction Difficulties - Much of Whitworth moorland is unsuitable to build on, primarily due to poor access to the developments earmarked, mine shafts, poorly drained ground, sloping sites, poor infrastructure, marshland and biodiversity issues. - - Biodiversity - The land surrounding Whitworth is a haven for many wild animals which can be seen on a daily basis. From our house we can regularly observe, a family of foxes, badgers, deer, birds of prey, pipistrelle bats, cows, horses and sheep. This is a gift without price. - - Infrastructure - We regularly have power cuts, water bursts and the A671 is constantly being dug up as existing services are updated resulting in major delays. The drains in our road are currently running 24/7 as a result of water run off off the moors even when it has not rained for a number of days. When it does rain the water backs up out of the covers as the drains are undersize and cannot cope. This would be totally unsuitable for further development, especially considering a greater amount of hard surfacing.

1127	William	Calderbank	Tonacliffe Resident	HS2.109 & HS2.106	Object	I understand that for some people in this day and age, the natural beauty of the countryside may not seem important or significant in perspective to more immediate problems. I have lived in Whitworth my whole life and have spent almost 22 years surrounded by the wonders of the open fields, hills, and moors. I may be a "Millennial" but that does not mean that I can not appreciate more than just technology, growing up the moors behind Tonacliffe was my playground, where my siblings, friends, neighbour children and I would all play using nothing but our imaginations and the local natural environment for entertainment. However, I am no longer a child but an adult who has learned to appreciate the peaceful and pleasing aesthetic of the natural land for what it is. For 3 years I lived away from home and attended Nottingham Trent University and had to endure living in the cramped hustle and bustle of the inner city, fast-paced, noisy and dismally grey in comparison to my life back home and the tranquil green of the countryside. - Whilst studying at university my family got a dog named Todd, He is a young "Staffy" (which if you know dogs, are one of the most athletic and playful breeds). For nearly 3 years he also has had the privilege of being raised with the moorland behind Tonacliffe as his playground. The moors offer him long leisurely local walks from Brown Wardle Hill, Healey Stones and Healey Fisheries, a safe place to play and explore (to satisfy his inquisitive nature). He may be a dog, yet the destruction of this land not only affects people but the pets of locals. - It seems to be quite incomprehensible to understand that with all the fuss the last few years over recycling and saving the planet that you blatantly wish to outright destroy the natural environment, destroying the habitats of hundreds of multiple species of plants, insects and animals in order to create more houses in an already overpopulated village.		-
1134	Abigail	Leyland	-		Object	WE DO NOT NEED ANYMORE HOUSING IN WHITWORTH! The schools are already oversubscribed, our local doctors can not possibly take on any more patients as it is already a struggle to get an appointment currently. We only have one road in and out of the village which gets badly effected by rush hour traffic, making it difficult for the locals to get to work/school etc. We have such a lovely view of greenery surrounding our little village and we do not want our sight ruined by building ugly, unnecessary housing.		
1152	angela	Jordan	-		Object	I do not think whitworth has enough resources to sustain further housing estates .The one and only road is already impossible at peak times,our doctors surgery is bursting with no appointments,and our school children cant get a place at our local school. - The wildlife is also important to whitwoth people but is being pushed further and further out of its natural habitat.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
1153	Katie	Offley	-		Object	The proposed site is directly behind my house where me and my family have lived for nearly 15 years. Building on the area behind the houses on Tonacliffe Way will not only completely take away the amazing view that we all have but will increase the traffic flow on the roads near by which is already an issue when The school at the bottom of the street is open.	-	
1166	Brendan	Doherty	-	HS2, 102,104,108,105 ,107,106,109.	Object	WHITWORTH IS FULL. This statement encapsulates all the issues surrounding any expansion of dwelling houses in the township of Whitworth. - - The negative impact of any developments in the town cannot be overstated. - - The whole nature of this small township will be irreversibly destroyed if development are allowed. - - Flora and fauna will be the first to suffer. This valley is home to an exceptional and expanding variety of animals and trees and flowers. This growth has taken decades to achieve and would by totally reversed by the stroke of a pen. - - To say that all the ingredients which go to make up Whitworth as a place for people to live are overloaded is indeed an understatement. - - Congestion of traffic and people is at its limit, any increase can only be detrimental to the health and quality of life of residents. - - Local services, schools, doctors, civic amenities are already at their serviceable optimum. - - The existing utilities of electricity,gas and water only just maintain service. There are often cuts in these making it seem that we are a third world town. - - Whitworth is a linear town with no bypass or possibility of such. Most of the day traffic is heavy and at peak times chaotic. This combined with the nature of HGV traffic leaves the roads in constant need of repair. Add a very poor public transport system and the certain increases proposed then the result is guaranteed to be disastrous.		Listen to the people of Whitworth.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
1172	Racheal	Biggs	-	HS2.109 HS2.106	Object	<p>I would like to object to the building of more housing on this site for the following reasons: - 1. Due to existing school and it's growing numbers of families this has caused a significant increase in the amount of cars in the area and causes substantial problems with access and volume of traffic. If more houses were to be built in this area then i believe the impact on existing residents would be very concerning. We already have issues of safety for the children coming out of school and our resident children due to the large numbers of cars and road layout: Small streets, cul de sacs, one small road into the area, more cars would make an existing bottle-neck even worse. Increase in volume of traffic in such a small area is compromising the safety of these children and would have a negative affect on existing residents. - 2. Living in a semi rural environment means that we are able to enjoy the landscape and the wildlife within it. More houses in this area could potentially see the loss of not only tress but wildlife including.. Deer, badgers, foxes, protected species of pondlife, bats, owls and other birds. Increased noise pollution and construction in this area would see this wildlife disrupted and potentially at risk of harm. Over the last 15 years we have seen an increase in the wildlife and this adds to our rural environment that as residents we would like to continue to enjoy. Government policy is to protect Greenbelt areas except for 'exceptional circumstances'. Building in this area I believe would not be regarded as 'exceptional' and is not needed. - 3.In the past few years we have suffered from local flooding and have had many drains in the road flooding out due to poor drainage and excessive water. More building in this area is going to take away the moorland which I believe soaks up this excess water and helps prevent residential properties from being flooded. There is a culvert which runs through the middle of the proposed site and this helps with drainage, building would impact on this and create problems with local flooding. - 4. Infrastructure of the village is already stretched and schools, GP's, care homes etc are full to capacity making it increasingly difficult to access in its current state. Adding more houses to this area is going to create overcrowding and would have a negative effect on living standards of the residents of Whitworth. We have had over the past 3 years over 150 new houses built in the area which has impacted on school intake, making what i would consider local people, unable to access their chosen school and this will worsen with another 400 new homes in this area. There is only one road in and out of Whitworth and increases in traffic will put a significant strain on transport. Any roadworks in our small village creates huge problems and the prospect of 400 more families which potentially equates to 800 more cars would be catastrophic. We have seen an increase in power cuts and water bursts over the last few years and I feel this may be due to the current addition of new housing with no improvement to existing infrastructure. Roads in and around Whitworth are in dire need of repair and this is getting</p>		<p>We understand the need for more housing in the borough but it was highlighted in a survey which was conducted in 2015 by Turley on behalf of Peel investments that the need was not in the East (Whitworth & Bacup) but more in the west (Helmshore & Haslingden). The current housing minister Sajid Javid has now pointed out in his September 2017 speech that we need to assess where that demand is and 'Nor does it impress local people who see their area taking on a huge number of new homes while a town on the other side of a local authority boundary barely expands at all'. I understand this means other local authorities but it is also true of our own authority. If you were to include the increase of new houses built in Whitworth and the overwhelming number of new houses built in Shawforth and Bacup, then take into account that those new residents may work in Rochdale then their only choice of route is through Whitworth... creating substantial pressure on the volume of traffic in the area. This factor must be a consideration when evaluating where Rossendale needs new housing.</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
						worse with each year. - In conclusion I believe that the council would be going against government policies on planning and Greenbelt conservation and would be affecting the human rights and 'the right to peaceful enjoyment of all their possessions, which includes the home and other land' - (Human Rights Act- Protocol 1, Article 1) of every single resident in this area and that you have a duty to respect the community and their welfare standards.		
1174	Timothy	Southwick	-	HS2.106- HS2.109	Object	Well for a start the fields and fishing lodges are habitat to many different types of wildlife and walking areas for many residents. There are deer regularly visiting the area, herons and swallows feeding from the insects from the ponds, as well as newts, frogs ect. There are badgers and birds of prey, Buzzards, sparrow hawks and kestrels. This is a nature reserve for many animals and an area of natural beauty. It would be preposterous to use this area for further development. - The traffic also seems to be at it worst its ever been, living at Tonacliffe I have experienced increasing problems with school traffic and serous wear to the surrounding roads. This Urban sprawl in whitworth gets worse year on year and the grid lock at the bottom of Whitworth Road and Shawclough Road is soul destroying in the mornings. Even on my street parking and disputes are becoming a issue and tempers on the roads are increasing, so instead of thinking about revenue and development, maybe try thinking about the consequences and Highway compatibility first. People are not happy with the traffic getting out of Whitworth in the mornings and the grid lock at Rochdale Junctions. So with regards to future Local plan, do not regard Whitworth as an appropriate village for increasing housing, Whitworth will gain a reputation as a place not to come and live, reducing housing prices due to the dense population and unable to get to work in the mornings. -		Develop nearer the motorways and not small inadequate villages.
1190	Nathan	Worrall	-	HS2.107 , HS2.108, HS2.109, HS2.102, HS2.105, HS2.104,HS2.106	Object	Whitworth doesn't have the infrastructure to sustain the construction of these - new houses. The local doctors and schools would struggle to meet the needs of the increased population. There is bad traffic in Whitworth already, this will only make it worse and these traffic problems are highlighted when there are roadworks and there are large queues. The proposed sites are located on greenbelt land, and this will have a negative effect on the local wildlife as well as destroying the natural beauty of this land.

1266	Will	Biggs	-	HS2.106, HS2.109	Object	1) Impact of more traffic around Tonacliffe area- we have limited routes in and out of Tonacliffe and particularly around school times it suffers with congestion already- this will be compounded by a further increase. There will be more risk to safety of children walking to/from school due to increase in traffic and local parking - There is only two routes into the village from Rochdale and one out towards Bacup that will suffer with the additional traffic.. - 2) Local schools, doctors and dentists are already at capacity and increased housing will create issues with services being compromised without further provision. - 3) Would expect facilities such as Water, electric and gas to need further uplift to support this - I have witnessed a number of water leaks on Tonacliffe recently as well as power cuts over the years- will our services cope with the additional demand for these proposals - 4) Loss of trees and wildlife on the green belt- This will impact our environment and need for our wildlife habitats. - 5) Many children play on the local area around Moorland Crescent & Tonacliffe way (Cottesmore Close, Horsefield Ave, Bell Isle etc) and more through traffic from the new estates will create further risk of injury or even fatality

1272	Michala	Geldard	-	HS2.102, HS2.105, HS2.104, HS2.106, HS102.107, HS2.108, HS2.109	Object	I am objecting in general to the proposed house building in various sites around Whitworth and specifically in relation to the proposed sites t Tonacliffe. My objections are based on a number of reasons: 1. Wildlife in the local area. Deer, badgers, foxes and hares live within the forest areas. Rare protected newts live in the pond. Bats nest in the forest. The importance in f this green belt land for the wildlife cannot be over emphasised. - 2. Tonacliffe forest would need to be cut down adversely affecting the local environment. - 3. The impact of more cars around local schools, especially Tonacliffe School, is of great concern due to the already high volume of traffic. Increasing this would be unacceptable. - 4. Local amenities such as schools, doctors, dentists are already to capacity. I have concerns that more houses will have a negative impact on the lives of current residents in relation to these amenities. - 5. Has the infrastructure of our small village been considered in relation to electricity, gas and water supply if more houses are built? Whitworth already experiences power cuts and seems to be worse since other recent building developments have been completed. - 6. The road network into Rochdale is already gridlocked. More houses will increase this problem. Public transport from Whitworth is limited to buses and I consider that if this proposed building goes ahead there will also be a negative impact on the poor public transport in and out of our village. - 7. Local drainage already struggles to cope with usage now, if the volume of residents increases would the drainage system be able to deal with the added strain? - 8. We bought our property because it is located on the last cul de sac of a small estate with no through traffic. This proposed building work will completely alter this into drive through roads. Plus the volume of traffic will - Increase which I consider to be unacceptable. - 9. I am very concerned that we may have loss of privacy as we are not currently overlooked and this was a major consideration when we bought our house.	-	
1283	Jonathan	Geldard	-	HS2.102, HS2.104, HS2.105, HS2.106, HS2.107, HS2.108, HS2.109	Object	Whitworths infrastructure is already at near full capacity. The single main road through Whitworth is, at times, grid-locked. Streets around the primary schools is chaotic. There is a definite flood issue through the valley. Chime is rising unchallenged. The rich and diverse wildlife is flourishing around Whitworth. - Any of the development projects would have a negative and detrimental implication on Whitworth and it's residents.	-	

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
1298	Carol	Williams	-	HS2.109 Horsefield Avenue	Object	<p>Infrastructure is inadequate already without more houses being built. Primary schools are already over subscribed along with the local High School. Dentists and doctors are full and with more houses this would have a negative effect on the living standards of the people of Whitworth. - Facilities such as water, electric and gas would need a major uplift to accommodate more housing has this been looked at? We suffer from low water pressure and power cuts as it is. The road through the valley is often gridlocked and adding more houses would just add to the existing problems. The road was never intended to take such huge amounts of traffic and rush hour is already a nightmare. - If access is required via Horsefield Avenue, a quiet cul d sac thus making this road a drone through this would endanger the lives of residents especially young children. The roads are already littered with parked cars due to the local school, getting through is near on impossible at school opening and closing times. The area is already very dangerous for the children. Local residents regularly voice their concerns. Loss of privacy, my house would be overlooked by the new builds and suffer a potential loss of light. Local drainage cannot cope with the usage now and extra residents would put too much strain on this network. Increased noise pollution on a quiet cul d sac - this area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. - Wildlife - this is green belt land and is of great importance yo local wildlife. We have deer, badgers, foxes and Hares, rare newts in the pond and bats. What will happen to the culvert that runs through the middle of the proposed site? This is already near to busting point when we have heavy rain. The loss of trees would also have a negative effect on our local environment. The safety of local residents would be put at risk with all the additional cars/traffic especially off Tonacliffe. Some of the areas have already had planning refused in the past and nothing has changed since that application apart from more wildlife.</p>		<p>I believe the council is going against the Government policies on planning and green belt conservation - - A high level of protection should be given to most valued landscapes, wildlife habitats and natural resources. - - I object to the policy itself and the proposed housing developments on individual sites mentioned namely HS2.109 Horsefield Avenue, HS2.106 Moorland Crescent, HS2.102 king Street and HS2.104 Quarry Street</p>

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
1302	Tegan	Calderbank	Student	HS2.109 and HS2.106	Object	<p>How would you describe England's land? Green? My favourite part of growing up was running and playing on the vast fields that my house backs onto. The fields around Tonacliffe are scattered with wildflowers of all kinds the variations of grasses, shrubs and flowers helps expand the biodiversity of the land. - - When I heard of the plan to build houses on the green belt land surrounding Tonacliffe I was shocked, appalled and disgusted at the notion of it. How could anyone possibly want to destroy the habitats of countless animals? It made me think of the precious memories I have of the land, from of watching fox cubs play fight with each other, to seeing deer graze in the fields, watching a fawn prance through the grass, or bucks play fight. Rabbits have burrows in the hillside and there is no better sight than watching them feast on the lush grass in spring. Badgers make tracks in the grass, tracks that tell you a story. - - If you build houses on this land these animals will have nowhere to live, Doe will have nowhere to feed their fawns or watch them grow, Rabbits have nowhere to burrow, Foxes have nowhere to raise their cubs and Badgers cannot make their journey along the tracks they made to get food. For what? Houses? Will people buy your houses when they know how much suffering they were made from? Do the lives of these animals mean nothing to you? Programs like Countryfile encourage you to enjoy the great outdoors, to support wildlife nearby and to preserve natural beauty. If you take this land away from its local residents to cover it in tarmac and stick masses of brick and metal on it you are taking the countryside away from us. We would not be able to enjoy the great outdoors, we would not be able to support wildlife or preserve its natural beauty because it won't be there. You are the ones damaging the biodiversity of the world, you are the ones killing these animals. If you build houses on the green belt land around Tonacliffe you are just proving me right. - - There are many protected animals in the area surrounding Tonacliffe, including pipistrel bats the population of pipistrelle bats has declined in the UK over the past 30 years, between 1978 and 1993 there was a national decrease of 70 percent. All the UK species of bats are protected under the Wildlife and Countryside Act 1981, and it is illegal to harm them or disturb their roost sites. Over the years the habitats e.g. hedges, ponds and old grassland, where bats like to hunt have declined in number and they have also lost many of their traditional roosting places, such as hollow trees. - - Traffic around tonacliffe is bad enough as it is, if you build an estate on the land around Tonacliffe then imagine how bad the road traffic will be. 52 houses of the site of Horsefield Ave and 68 houses on the land east of Tonacliffe means 120 houses. Suppose if these housed nuclear families and each parent had a car that would mean 240 more cars on Whitworth's roads causing more road erosion and more traffic. With Whitworth having only one road in and one road out, it's extremely obvious that there is a lot of traffic going in and out already. Can we really deal with anymore? - - When</p>

						<p>Tonacliffe Primary School closes at 3:30 pm parents park their cars ANYWHERE in order to pick their child up from school. They park on double yellow lines, block your drive, park on corners and park where the kerb has been lowered to help wheelchair users and powered mobility vehicles these all come under rule 243 from the department of transport as illegal. Imagine how hard it is to drive up the hill you live on, squeezing through gaps, fighting for road space only to arrive at your drive and find it blocked by a parent picking their child up from school. Obviously building houses on the lands around Tonacliffe will escalate the problem, with more residents trying to get up or down the road. - - Another issue is local schools in Whitworth are already OVERSUBSCRIBED. Primary schools e.g. Tonacliffe Primary School, St Anselm's RC Primary School and other local primary schools in the area. High schools are sparsely distributed in Rossendale and high schools like All Saints Catholic High School and Whitwoth High School are ALSO oversubscribed. How is Whitworth supposed to manage with more residents? It's a simple answer, it cant.</p>		
1307	Jenny	Lowe	-	Object		<p>Done my objection :- 1. Whitworth is already overburdened by the current housing stock. Drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. - 2. The schools in Whitworth, in particular the high school, are at capacity and cannot sustain any addition to the number of potential pupils. - 3. There is only one road in and out of Whitworth and at peak times in particular this road is congested with idling traffic contributing to air pollution. People travelling from Bacup and beyond to get to Rochdale all come through Whitworth and add to the problem. - 4. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. - 5. Access to most of these sites will increase traffic hazards on an already inadequate highway. - 6. I challenge the need for more housing in Whitworth. - 6.1. Where is the evidence of any demand? - 6.2 There are countless houses left empty and neglected in Whitworth, why are these not modernised and made available? - 6.3 Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? - 7. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. - 8. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.</p>	-

1310	Richard	Dolan	-	HS2.101-109	Object	<p>We are vehemently opposed to all housing allocation in Whitworth. Our group has decided to vote against and actively campaign against all Councillors and MPs in favour of this proposal. We will withhold our votes and encourage family, friends, and community to do likewise. - We are outraged by this proposal, especially HS2.107 that will encroach on Healy Dell. On this point we will be contacting the National Trust and other such organisations to make them away of the proposed desecration to the Green Belt. Furthermore, we are now investigating possible financial links between all Councillors, MPs, and RBC employees involved in this issue with the proposed contractors. This senseless proposal for a village far too small to accommodate a possible 300 new homes suggest an ulterior motive. No one in our community that we have spoken to is in favour of this plan and we will use our sizeable influence. - There has been more than enough housing development in Whitworth. This new proposal will destroy our green spaces and necessitate a new schools, doctors' surgery, dentist, shops, and possible a new road. All future housing development must stop. Our community can not accommodate any more. - In light of the fact that this proposal has not been advertised to a great extent (we have spoken to people who know nothing of it), we will be conducting a petition again this proposal and encouraging everyone to sign the following statement: - We will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community.</p>		<p>To reiterate, we will vote against and actively campaign against all Councillors and MPs in favour of this proposal. All persons voting in favour of this should expect and strong reaction from the community. - - The people's power will be felt if this plan is authorised.</p>
1321	Andrew	Lowe	-		Object	<p>The roads are already at capacity in our area and village. The School traffic creates chaos daily. More houses in the area will only create more problems. This is a accident waiting to happen. - The risk to the wildlife is to big a risk. Animals such as deer, foxes and the bats each evening would be in severe danger of losing their habitat. - The High school is already full with local having to travel as far as Todmorden which is completely wrong. - The doctors and dentist are at braking point. - New houses will only put more pressure on our local services which are already at braking point. Crime is already a problem in the village. Bigger population will only create more crime.</p>		<p>New housing will ruin our village and our wildlife. I am completely against new housing in the village of Whitworth.</p>
1336	Maureen	O'Mara	-		Object	<p>Whitworth is already struggling with oversubscribed schools. There is only 1 small GP surgery and 1 dentist. The village cannot cope with stretching the existing amenities. - One of the main objections I have is the traffic and parking, which is already dire. Streets are almost impossible to drive down safely due to double parking. There is only one main road, which when closed for any reason means driving via Todmorden to get around - this has happened on a number of occasions. Most roads have very steep inclines which are regularly not gritted in winter. To increase parking and traffic would destroy Whitworth. Where would access roads be and how would this affect current residents.</p>

1341	Katie	Pauline	-		Object	<p>I strongly object to the proposed development on the end of Horsefield Av for a number of reasons, detailed below:</p> <p>1. Traffic: - Tonacliffe is accessible by just 3 roads, 2 of which are narrow with residents cars parked down both sides meaning only one car can pass at any time. With the proposed extra houses at Horsefield Ave as well as the proposed site at the end of Bell Isle Ave this will cause an unsustainable amount of traffic in what is already a busy residential area making it unattractive for working age families. At school times the roads are gridlocked, drives are blocked and commuting is extremely difficult - extra vehicles would make it impossible.</p> <p>2. Safety: - Further to this the roads are all 20mph as there is a primary school and young kids playing at weekends and in the evenings, a lot of people drive over 20mph and there have been a number of near accidents especially around school dropping off and picking up time - the proposed housing would double the amount of vehicle on these roads making it unsafe for children and unsuitable for families.</p> <p>3. Access: - At HS2.109 there are two proposed access roads. The first is via Horsefield Avenue which is currently not a through route. This will hugely increase the traffic on what is currently a quiet road with cars parked up both sides, kids playing in the street and a popular cut through for dog walkers. The proposed access and resulting traffic will significantly alter the character and usage of the Avenue making it unsafe, unattractive and bringing down the value of the houses already there. The second access road High Peake Rd is a tiny, bumpy track road, partly cobbled, completely unsuitable for increased traffic. Even if resurfaced no one would choose to take that access as it's extremely difficult to turn out of meaning the majority of traffic for the new houses would rely on Horsefield Ave causing traffic issues as outlined above. I also believe High Peake Rd is owned privately. It is also the site of an old coal mining shaft so increased traffic is unlikely to be sustainable.</p> <p>4. Infrastructure: - The majority of the schools in Whitworth are at full capacity with those not currently at full capacity due to reach capacity in the next 2-5 years, The provision of GP and dental services are already under pressure and could not meet the needs of increased housing. Public transport is completely unreliable and not suitable for commuting for work or education. There is one road in, one road out of Whitworth and traffic is already awful, at peak times it can be extremely problematic to get in or out of Whitiworth and the smallest of road works can back up traffic for miles as there are no alternative routes and any small cut round become quickly gird locked. What should be 10 minute car journey to the train station to get in to Manchester takes 30-40 minutes at peak times meaning travel time to Manchester is 60 mins if you're lucky and get a fast train (which are at most every 25 minutes and jam packed so you can't always get on a train). More vehicles commuting in and out of Whitworth each day would make commuting to Manchester unjustifiable with travel time making it an</p>

						<p>unattractive place to live for city workers wishing to live there and commute in. There is an acute lack of jobs in the area meaning there would be a need for those moving in to the area to commute out to work. Problems with the power supply to Tonacliffe continue to cause power cuts each year and the flooding in the area has meant periods of brown water or low pressure at certain points each year - more houses will worsen these issues. 5: Wildlife: The moorland adjacent to and behind Horsefield Ave is home to an array of wildlife. I have concerns in particular for the deer that graze there and the red crested newts (which I believe are a protected species) that live in the two pond areas on the moors. There are also bats that live in the nearby woodland and fly over the moors in the evening. Building on this Moorland would disrupt the wildlife, put it in danger and drive it away and housing situated there in the long term would take away their natural habitat. The proposed building site covers some greenbelt land which the greenbelt report advises against. Without demonstrating 'exceptional circumstances' this should be absolutely out of the question, especially on a site which poses such a number of other issues. 6: Topography & flooding - The moorland adjacent to Horsefield Avenue where building I proposed is steep, marshy and has heavy water flowing down it when it rains - I find it difficult to understand how this can be suitable for homes. I'm aware it was also a coal mining site and in addition to this our house on Horsefield Avenue and others on the row show evidence of subsidence in ours and other properties on Horsefield Ave. 7: Landscape and leisure: - Whitworth is an attractive place to live due to the beautiful moorland, Tonacliffe in particular is popular with dog walkers, hikers, photographers, runners and cyclists. Taking away the green land will make it a less attractive place to live. There is little by way of entertainment, retail or transport links meaning protecting the moors and green areas is crucial to ensuring Whitworth doesn't fall in to decline like other areas of the valley. The moorland in question is used during all seasons by residents and hikers from outside of Whitworth. It is also worth noting there is an electricity pylon above where the new houses are proposed which is really loud. You only need to stand on the end of Horsefield Ave to hear it and I think this would be really off putting to any one looking to buy a property any closer to the pylon. At the end of Horsefield Ave on the right there is a row of terraced house that look out on to the moorland. The proposed plans would put housing directly in front of those houses, obscuring their view and drastically changing the character of the houses, the access to sunlight as well as severely reducing the value of those houses. Loss of privacy, noise pollution and loss of green space are a huge concern to these houses and the rest of the residents on Tonacliffe. - - The plans entirely change the character and environment of Tonacliffe as well as having a huge impact on lifestyle with the strain on infrastructure and increased traffic. Houses being built here would be unattractive to buyers based on these issues, drive down property prices and</p>

1363	Gareth	Dolan	-	HS2.101 to 109	Object	I do not live in Whitworth but spend a lot of time there with my family. I am deeply concerned by this proposed loss of green belt and will do my utmost to object against it. - - I strongly urge RBC to re-consider its proposal. Whitworth cannot handle any more development. - - Thanks		If this destruction of the green belt in Whitworth is passed then I shall simply take my family and my money elsewhere as there will no longer be the same attraction Whitworth now offers.
1365	Michael	Whitehead	-		Object	The doctors is overcrowded, the schools are overcrowded and there is one road in and out. All three of the mentioned cannot cope in the current state. Whitworth has too many houses for the current infrastructure. If the proposal goes through, which I sincerely hope it does not, there will be 300+ more homes within Whitworth. This means 650+ more people needing a doctor, 300+ more children who need schools and 300+ more cars on the roads. If the current infrastructure is struggling I dread to think how the village would end up with that amount of extra people. - There are also many deer which have recently returned to the greenbelt land on either side of the valley. Moving any sort of greenbelt/urban borders is highly likely to destroy their habitat and force them away.		-
1387	Victoria	Mairs			Object	I would like to object to the above sites being changed to buildings lands on the following basis, Whitworth is already full to bursting Doctors, schools, dentist are all full. Traffic has one road in and one road out, all it takes is one set of traffic lights and the whole village comes to a stand still causing problems for local businesses in the surrounding areas. The area around Tonacliffe is home to wildlife such as badgers, foxes, bats, deer, newts, frogs where will these animals go will they be simply expected to relocate??? Local people use the moorland for walking, cycling it is a play area for children and is simply the last green space we have that the council haven't built on. We have ponds where fish and pondlife live geese spend summer here . - Drainage is very much a problem already we flood when we have a regular amount of rainfall, when it rains heavily the drains cannot cope and the area in Tonacliffe is heavily saturated. - - Access at Tonacliffe is already bad for emergency vehicles and large vehicles, once you include more housing and the school traffic it will simply become impassable.		Yes absolutely let the planning officers spend some time actually in Whitworth village they will see how much traffic there is and how we are struggling to cope, the new Tesco is an accident blackspot which the planners felt fit to approve. Come down from your ivory tower and look what normal people are struggling make a decision that is right for the people and community in Whitworth and have to struggle everyday with traffic, leave us the green space that we deserve

1417	Gillian	Middlemas	Whitworth Community High School		Object	As Headteacher of the only secondary school in the Whitworth area, I am concerned that the proposals to build considerable numbers of new dwellings take no account of educational provision in the local area. - The school is already oversubscribed: for 2017 entry into Y7 over 40 families were unsuccessful in gaining a place, despite Whitworth Community High School being their first preference; over 40 families went onto on the Local Authority's waiting list for a place; over 25 families went to Appeal for a place, and very few of them were successful. The school now has 640 students and, without extra classroom space, has no capacity to increase the admissions number, nor to take additional students into existing year groups. - Likewise, many local primary schools are also full / oversubscribed, suggesting there is insufficient educational provision in the local area already. - This situation will be exacerbated if the proposed number of new dwellings goes ahead, unless the developers or Lancashire County Council are prepared to increase the school's capacity by funding additional classroom / learning / social space. The school is over 50 years old, largely of Langspan pre-tensioned concrete construction (intended life expectancy already exceeded) with HAC (high alumina cement) - In addition, the school experiences ongoing issues with the provision of utilities: the water main up the school drive is at risk of collapse; the water supply to the area has recently been affected on a number of occasions, and presumably further demand from new building would increase these issues. - The proposals for new housing does not appear to be linked to any plans to improve the traffic situation in the Whitworth area: lengthy queues heading towards Rochdale each morning already create issues for students travelling to school.

1420	Julie	bower	-	Horsefield Ave	Object	<p>I would like to object to the above sites being changed to buildings lands on the following basis, Whitworth is already full of bursting Doctors, schools, dentist are all full. Traffic has one road in and one road out, all it takes is one set of traffic lights and the whole village comes to a stand still causing problems for local businesses in the surrounding areas. The area around Tonacliffe is home to wildlife such as badgers, foxes, bats, deer, newts, frogs where will these animals go will they be simply expected to relocate??? Local people use the moorland for walking, cycling it is a play area for children and is simply the last green space we have that the council haven't built on. We have ponds where fish and pondlife live geese spend summer here . - - Drainage is very much a problem already we flood when we have a regular amount of rainfall, when it rains heavily the drains cannot cope and the area in Tonacliffe is heavily saturated. - - Access at Tonacliffe is already bad for emergency vehicles and large vehicles, once you include more housing and the school traffic it will simply become impassable. - This already over saturated with people for the small community resources there are. - There is not enough road space, and only a little amount of moorland available. We try to encourage our young in the community to go outside and be 'heathy'. There won't be anywhere left. I find the lack of advertising this proposal unacceptable. There are many more areas of fields elsewhere. Why add to an over exhausted community already? I dont understand why Whitworth has to be the target for this.</p>		<p>Yes absolutely let the planning officers spend some time actually in Whitworth village they will see how much traffic there is and how we are struggling to cope, the new Tesco is an accident blackspot which the planners felt fit to approve. Come down from your ivory tower and look what normal people are struggling make a decision that is right for the people and community in Whitworth and have to struggle everyday with traffic, leave us the green space that we deserve. It isn't alot but it is valued and appreciated beyond your knowledge or understanding - all of these below would be affected adversely. - - Wildlife - Loss of trees - The local school - Landscaping - - Local amenities - Infrastructure - - - We deserve our voices to be heard.</p>
1425	Paul & Gillian	Marshall	Hindle Pastures (Self Catering Holiday Accommodation)	SHLAA16001	Object	<p>From a Business point of view we would suffer further loss of business due to horrendous track problems getting out of Whitworth into Rochdale and Motorway network. We get amazing reviews but little repeat business mostly due to current traffic problems. - - From a personal point of view over subscribed Schools and Doctors surgery will be hugely affected . - - Tonacliffe Road is very narrow and there's a primary school on it which already causes huge traffic problems in the morning and afternoon. - - At the lower end due to the steepness of houses there is no footpath in places, cars have to be parked on the road causing particular problems when walking up with children (in our case granddaughter); with pushchairs having to move in behind parked cars to allow cars coming the other way to pass and with all these proposed new houses it is only going to create havoc and chaos. This is an ill thought out planning application without thought to access and/or increase of traffic. Has anyone actually been to see the proposed sites to assess the implications of the extra traffic? - - Whitworth has very poor access to public transport eg distance from a rail way station and access to motorways. A huge percentage of the traffic in Whitworth goes in the direction of Rochdale/Manchester. To increase this would be detrimental to the environment and the people of Whitworth. - - - -</p>		-

1436	Louise	Currie	-		Object	<p>1. The plans to build in this area, will reduce the natural environment within the area, which the government's planning policy is committed to protect. The wildlife around Whitworth is rich and diverse with several protected species making their homes in the area. The council has a duty to protect these habitats. 2. Utilities are already stretched with the current housing stock - drains, water supplies, power supplies all fail on a regular basis. The infrastructures are aged and insufficient to sustain further demands. 3. The schools in Whitworth, in particular the high school, are at capacity and cannot sustain any addition to the number of potential pupils. 4. There are currently parking issues and high traffic volumes around Tonacliffe Primary, without creating additional through traffic to new houses in the vicinity along a narrow road, which requires resurfacing and who's current 20 mile an hour speed limit is not enforced. 5. There is only one road in and out of Whitworth and at peak times in particular this road is congested with idling traffic contributing to air pollution. People travelling from Bacup and beyond to get to Rochdale all come through Whitworth and add to the problem. Continuing roadworks to address ongoing issues with failing water mains often leaves Whitworth gridlocked with long queues of traffic trying to leave the Village in the morning and return in the evening. Additional housing will compound this problem 6. There is already a serious problem with flooding in the Whitworth valley, which is getting worse each year. Additional development will increase the potential for more severe incidents. 7. Access to most of these sites will increase traffic hazards on an already inadequate highway. 8. Where are the job opportunities for the proposed residents? Presumably in another town or city, because there are few or none in Whitworth, so why not build within easy commute of employment and help avoid road traffic congestion and pollution? 9. Crime and lack of effective policing is already becoming an unwelcome fact of life in Whitworth, additional housing will inevitably add to the problem.</p>		As well as these particular developments, the others sited in the plan will also increase volumes of traffic along Market Street (A671), adding to congestion and putting pressure on water mains and utilities and the road's surface leading to increased road works and further problems entering and leaving the Village at peak times. - - Whitworth and the other villages along the A671 cannot simply continue to expand without addressing the wider infrastructure of utilities and access in and out of the village through neighbouring authority areas

						residents put an unbearable strain on this network. -		
1446	Rachael	Atkinson	-		Object	I object to this proposal for many reasons, traffic in and out of whitworth is already horrendous so adding more houses and people will increase this. Local amenities ie schools doctors are already full so more house would not be accommodate in these places. Dangers of flooding due to poor drainage already surely more house will increase this! It is a green belt area and these should be protected! Local wildlife will become endangered! The safety of residents with more traffic hitting the roads!		-
1448	Christine	Atkinson	-		Object	I strongly object to this proposal due to a variety of reasons including infrastructure being stretched to a limit.The proposed land is greenbelt the local wildlife would be seriously affected.Our street would be an access road to one of the developments which would cause major disruptions and impact on greenbelt land. It would cause serious traffic problems due to one road in and out of Whitworth, and could cause serious problems particularly in the winter months. Community services such as health centres, dentists, schools would be over suscribed.		I think this proposal of new houses would not be in the interest of Whitworth as a community and cause major disruptions to this small village.
1452	vikki	Megram			Object	1. Whitworth is already overburdened by the current housing stock. Drains, water supplies, power supplies all fail on a regular basis. 1464	R	Platts	-		Object	<p>residents put an unbearable strain on this network. -</p> <p>Overall I object to upwards of 300 houses being built in a small village of only 7,500 residents. There is only one road in and one road out and traffic is already slow moving, if indeed moving at all, at peak times. The village is already susceptible to flooding, a problem that more building will only exacerbate. Local amenities such as our schools, our local doctors and dentists are already oversubscribed. In short, the village can't support such a surge in population. - The two sites I mainly object to are Horsefield Avenue and land to the East of Tonacliffe School. These sites are both Greenfield. Greenfield should not be built on unless absolutely necessary. In this case, it isn't absolutely necessary. If Government policy is to protect greenbelt areas except for "Exceptional circumstances", then Rossendale Council should take heed of this and concentrate it's focus on other areas instead. - The roads around this area surround Tonacliffe Primary School, and twice during the day these roads are virtually impassible and extremely dangerous to children. Bringing more traffic into the area is an accident waiting to happen. Pedestrians on Tonacliffe Road walking in the Rochdale direction aren't well catered for with footpaths. There's only very narrow pavements on the left-hand side, and no pavement at all in some parts. The resulting excess in vehicles will make it even more dangerous. As a parent I worry constantly about my children and the roads around here and that will only get worse. - I would also like to add that after heavy rainfall, Highgate Lane is like a river with all the excess water running down from the hills. We'll all be at risk of flooding if parts of the greenbelt is concreted over.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
1469	George	Salt	-		Object	Whitworth is located in a valley, this in itself presents issues with the amount of space available. 7,500 people lived in Whitworth according to the data from the 2011 Census and this is a large amount of people if you look at the services and infrastructure in Whitworth. To start off with there is one GP surgery that has 7,248 people registered with them. Whitworth Medical Centre has 4 GPs which means that for one GP there are 1,812 people. There is not any more capacity available for more people to register with the practice. - - Schools are also busy especially with just one school for secondary education. With more people living in Whitworth that would mean a greater demand on schools and could result in some children living in Whitworth not going to school there. - - Going back to Whitworth being a valley this physical feature means that infrastructure being put in can be difficult. Whitworth has one road in and out and during peak hours this is a very busy road. Most new people would probably be using a car as their main mode of transport adding more pressure to Market Street and its tributary roads. Public transport is also very poor in Whitworth meaning that it is not really a viable alternative for any new people who would come to Whitworth. - - As shown with a few of these arguments Whitworth does not have the capacity to accommodate an extra 359 houses over the next 15 years. For example an average of 3 people per house would result in 1,077 more people living in Whitworth. It is not going to work.

1494	Richard	Woodhouse	-	SHLAA16001	Object	<p>I object to the building on this site for two primary reasons. Firstly that the "Tonacliffe" area already has more than enough residences. The roads, the parking, the traffic etc. are already maxed out. There is no infrastructure such as shops, play areas, buses, doctors, dentists etc. to serve the people already here, so any new dwellings will rely on cars as much as we do and add to the congestion. This is compounded by the school which increases these issues 3 times a day or more. Furthermore the quality of living here in relation to noise and views has already suffered enough with the housing that has already been put up. Secondly in developing the site access is limited to two roads. One is very awkward for a car let alone larger vehicles and the other is full of parked cars, kids playing, traffic relating to the school etc. As well as these two main points there are a lot of other reasons why this site is not a good idea that you acknowledge in your assessment such as the water issue, the difficulty involved given the hilly nature, the coal issue, electricity pylons, building on greenbelt etc. The last point and the impact on areas such as Healey Nature Reserve is in particular something that I'd like to emphasise. The village of Whiworth in general would struggle with more dwellings. There is only one road in and out which is already a nightmare at peak times, there is very little in the way of shops and facilities and services such as doctors, dentists and schools are already beyond capacity. These issues are felt even more in Tonacliffe because we are set back and up from the main road and village. As an example before joining the main road in the morning to spend 45 minutes traveling 3 miles towards Rochdale, we have to spend another 10/15 minutes traveling 400 yards to get to the main road because of the lack of access and the school.</p>		<p>I appreciate that people have to live somewhere and that houses have to be built but this site is truly a bad idea that can surely only look viable on paper.</p>

1497	Wendy	Rose	-	Horsefield Ave	Object	The infrastructure of Whitworth cannot support or sustain further development. There is only one road in and out of Whitworth. Congestion is a serious problem now due to the volume of traffic. When there are roadworks the situation is bordering on dangerous as emergency vehicles are hindered. Further residential development would only compound this issue with higher levels of vehicles. - - Power cuts are a regular occurrence in this area, one can only assume this would get worse with the extent of the proposed developments - - Doctors surgeries are fully to capacity and cannot adequately serve the community at the moment. Waiting times for appointments is ludicrous. Schools are over subscribed. Parking around schools is dangerous and any increase in school children would seriously impact on this. - - All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - - Proposed land in some cases is not viable as parts are prone to flooding. Culverts running through a proposed sight would impact on flood defences in the area. - - - -	-

1505	Pat	Stewart	na		Object	<p>I object to all the listed sites in whitworth. - - HS2.102 - King Street, HS2.104 - Old Lane, HS2.108 - Sandbank Gardens, - HS2.105 - Albert Street, HS2.107 Fern Isle Close, HS2.106 - Moorland Cres, - HS2.109 - Horsefield Av - - 1. Wildlife – All the greenbelt land is of great importance to the local wildlife of Whitworth. Deer Sleep within the Forest areas at night. We have rare protected newts living in the pond. Badgers/Foxes and Hares are often seen with in this area. Bats nest in the forest. - 2. Loss of Trees - The forest at Tonacliffe would have to be cut down a totally unnecessary action once again having a negative effect on the local environment. - 3. The local school at both dropping off and collection time around Tonacliffe area is already very dangerous for the children. The impact of more cars passing could be fatal. Parking around that area is already a concern for the school increasing traffic will make it worse. Local residents regularly voice their concerns on this. - 4. A Culvert runs through the middle of the Tonacliffe proposed site which takes land drain water off the moors this is already at near bursting point when it is heavy rain. If this site goes ahead I believe we are in danger of flooding. - 5. Landscaping - The site geographically is unsuitable for housing the features of the landscape would make it difficult to build. These would need to be radically altered in order to build. Has a land survey been done? - 6. Local amenities such as Schools, Dentists and Doctors are already full and building more housing would have a negative effect on the living standards of the people of Whitworth. - 7. The infrastructure of the town is stretched already facilities such as Water, Electric and Gas would need a major uplift to accommodate more housing has this been looked at? We regularly suffer power cuts is this due to other new building developments already completed in Whitworth. - 8. The road network both ways to Rochdale and Bacup is already gridlocked. The road was never intended to take such huge amounts of traffic adding more houses will make it worse. Would the increase of residents put a strain on the already poor public transport in and out of the village. - 9. If Access to the proposed site is via private roads and in making these roads drive through roads instead of cul-d-sacs would this endanger the lives of the residents living there especially the children. - 10. It is Government policy is to protect greenbelt areas except for "Exceptional circumstances" what are those exceptional circumstances. - 11. Increased noise pollution - The area is surrounded by wildlife and local residents building in this area would have a detrimental effect on both. - 12. What would the impact be on the carbon footprint of the valley ? - 13. Loss of privacy - Would my house and others be overlooked. - 14. If the houses will be higher than ours due to the landscape we would suffer a loss of light and overshadowing. - 15. The safety of all the local residents would be put at risk with the increase of traffic including local children who play near the proposed access roads. - 16. Some of the areas and the surrounding areas have already had planning refused in</p>		Please can you inform me of how many people object to the whitworth sites.

1535	Susan	Neilson	N/A	HS2.106 Moorland Crescent and HS2.109 Horsefield Avenue	Object	<p>These two sites at Tonacliffe are unsuitable for housing. The geographical features of the landscape would make it very difficult to build on (as previous land surveys conducted here in the 70's and 90's have proved). Access to the proposed sites is also not suitable, as there is a dangerous bottleneck situation from the Moorland Crescent side and the second proposed access at High Peak Lane is partially owned by local residents, so would not be a viable option. - - The moorland is percolated by a system of springs and the culvert, which runs through the middle of the Tonacliffe site is already near besting point at times of heavy rain. There would be a serious risk of widespread flooding if this building goes ahead. - - The current infrastructure is totally inadequate for this proposed number of houses, as Tonacliffe Road, leading to the two designated access roads for the Tonacliffe site, is very narrow, currently often congested and in need of frequent repairs with the current level of traffic. At dropping off and collection time, the roads in the Tonacliffe area around Tonacliffe County Primary School are already very dangerous for the children. The impact of more cars passing could be fatal . Parking around the area is already a concern for the school and an increase in traffic will only make it worse . Local residents regularly voice their concerns about this . Local amenities such as the schools, dentists, and doctors are already full and building more houses would have a negative effect on the living and health standards of the people of Whitworth . The water, electricity and gas services would also need major work and upgrades to accommodate this level of housing. There have been several incidents are linked to other new building developments, which have already being completed in Whitworth , at which have resulted in power cuts and problems with sewerage and water supply . The road network to and from Rochdale and Bacup was never intended to take the already large volume of traffic. It is frequently gridlocked. More houses would make it worse. - - The proposed site is in an area of Greenbelt Land, which is of great importance to preserve local wildlife in Whitworth . We have protected newts living in the pond and Pipistrelle bats nesting in the area. There are badgers, foxes, deer and hares living wild, alongside the sheep and horses that graze on the moors. In a recent government planning policy statement, it was stated that there needs to be 'a higher level of protection given to the most valued townscapes and landscapes, wildlife habitat and natural resources.' This needs to be factored In In order to maintain the environmental quality of the area . The proposed building would cause irreversible damage to the environment . - - -</p>		There would also be a detrimental effect both for the local wildlife and residents in terms of increased noise, pollution and related impact on the carbon footprint of the valley. Public footpaths and rights of way would be lost .The whole proposal across both sites at Tonacliffe could only negatively impact on both the character of the village and its environment and pollute what is currently an area of importance both to the conservation of protected species and wild, moorland beauty .

								<p>footpath (Right of way) could be lost. 18. Local drainage cannot cope with the usage now would more residents put an unbearable strain on this network. - DON'T FORGET EACH ADULT IN YOUR HOUSEHOLD CAN PUT IN THEIR OWN OBJECTION FORM TO THE BUILDING WORK. Extract from the Governments Planning Policy Statement - Protection and Enhancement of the Environment 17. The Government is committed to protecting and enhancing the quality of the natural and historic environment, in both rural and urban areas. Planning policies should seek to protect and enhance the quality, character and amenity value of the countryside and urban areas as a whole. A high level of protection should be given to most valued townscapes and landscapes, wildlife habitats and natural resources. Those with national and international designations should receive the highest level of protection. 18. The condition of our surroundings has a direct impact on the quality of life and the conservation and improvement of the natural and built environment brings social and economic benefit for local communities. Planning should seek to maintain and improve the local environment and help to mitigate the effects of declining environmental quality through positive policies on issues such as design, conservation and the provision of public space. 19. Plan policies and planning decisions should be based on: –up-to-date information on the environmental characteristics of the area; – the</p>

								<p>potential impacts, positive as well as negative, on the environment of development proposals (whether direct, indirect, cumulative, long-term or short-term); and, – recognition of the limits of the environment to accept further development without irreversible damage. Planning authorities should seek to enhance the environment as part of development proposals. Significant adverse impacts on the environment should be avoided and alternative options which might reduce or eliminate those impacts pursued. Where adverse impacts are unavoidable, planning authorities and developers should consider possible mitigation measures. Where adequate mitigation measures are not possible, compensatory measures may be appropriate. In line with the UK sustainable development strategy, environmental costs should fall on those who impose them – the “polluter pays” principle.</p>

						<p>flooding in the valley), should the council be protecting residents from it rather than creating further problems? Local drainage (water and sewage) cannot cope now in some areas. Should County, District and Town Councils together with United Utilities officially verify which of these proposed development sites are in potential flood areas before planning permission is granted? Further house building would expose a failure "to deliver sufficient community infrastructure and services to meet local needs" (a key principle of the National Planning Policy Framework). Such development would also cause further pollution (e.g. to air quality - more traffic on the roads) creating a greater carbon footprint for the valley and the next generation. Article 19 (from the GPPS), in line with UK Sustainable Development Strategy, states that "the environmental costs should fall on those who impose them"; will the council take this "polluter pays principle" into consideration before making any decisions? Geographically, in some of the proposed sites, the landscape makes building difficult. It would require radical and costly solutions. Where would the access roads for these developments be? If any small byroads are used, this would increase traffic, thereby increasing the risk of accidents to children (particularly near schools). Additionally, in winter such roads are often not salted or gritted making them a hazard for the disabled and the elderly resulting in more accidents and costs for the NHS. There is already inadequate infrastructure in transport where roads are gridlocked at peak times and in need of repair e.g. the already congested road leading to the reservoir and quarry (adjacent to Cwm Waterworks). With one main road in and one out, Whitworth is already a congested village. Public transport is very limited e.g. no train/tram services. How will the increased traffic be managed? In other services, there have been at least 4 outages this year in electricity in the Whitworth area. Water and gas would also need upgrading (representing further expenses on already overburdened service users). Present resources would fail to deliver the increased demand new residents would require, thereby failing to meet the criteria set out in NPPF. Currently, schools, doctors and the sole dental practice are all over overstretched and over subscribed. This depletion in resources would curtail the life chances of future generations. Further house building would further increase class numbers in schools and severely overload resources there. Frequently, waiting times for doctor's appointments are well over four weeks. Dental</p>

1547	Karen	Ruane		SHLAA16001	Object	<p>I wish to object to the Emerging Local Plan Draft Local Plan (2019 to 2034) for Rossendale and the proposals for Whitworth. I would like to state my objections to the local plan specifically for the Whitworth Area, and in particular Site Ref HS2.106 and Site Ref HS2.1 09</p> <p>I am a resident of Meadow Head ave and have lived here since February 1978. I remember when these two areas were defined as Green Belt because of their unsuitability for development. (Inspector's Report September 1994 Gill. D and Sustainability Appraisal May 2017 {3.16.7})</p> <p>The objections raised then and their causes have not 'gone away and are just as valid now. In fact, there are more reasons for keeping the areas as Green Belt. As the problems expressed then, have multiplied rather than decreased. The increased congestion at Tonacliffe Road and Tonacliffe Way is now a nightmare for residents entering and leaving their homes and for parents dropping off their children at Tonacliffe School.</p> <p>Bus Services have decreased from Rochdale and Rossendale through Whitworth as part of a cost cutting exercise. Leaving the minor roads on to estates not serviced by public transport. Shift workers have to use their own cars or car sharing and the last resort, Taxis, because there are no Buses available.</p> <p>I am not a lone voice in expressing my concerns over the current infrastructure which is not adequate for our needs? This Emerging Local Plan (ELP) is going to increase our problems rather than relieve them. And while our MP Jake Berry and Rossendale Borough Council (RBC) may publicly argue about the figures for housing needs, their discussion does prove that it is a Government-led initiative RBC are chasing in this ELP rather than filling a Local need.</p> <p>The increase in pressure on our local resources, this ELP would produce is because of a Whitehall need not a Whitworth need.</p> <p>On the 14th September 2017 in parliament Sajid Javid, Secretary of State for Communities and Local Government publicly stated the government's commitment by saying. "Greenbelt is still protected."</p> <p>Our local MP then announced in the Rossendale Free Press on 22nd September 2017 "I'm delighted that after raising this issue at the highest levels that I've been able to get the Valley's housing figures reduced to protect more of our local green spaces. This is a victory for everyone here in Rossendale. "</p> <p>In presenting this Draft ELP Rossendale Borough Council are ignoring the wishes of our MP and the residents of Whitworth who seek to protect the Greenbelt not because we consider it our own back garden but because in the absence of any proper development of resources this ELP will increase the burden on an already overburdened infrastructure. As Jake Berry says. "These new homes should</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
						<p>continue to be prioritised on brownfield and former industrial sites rather than our beautiful countryside."</p> <p>I agree with the Sustainable Development Commission which states: "Sustainable Development starts with making better decisions on the issues that affect all of our lives, easy access to health care and leisure facilities, education for all ... at the nearest school, good public transport, roads and schools. It is about ensuring a strong, healthy, and just society, meeting the diverse needs of all residents those existing and potential future generations. The Schools, Tonaciiffe School, St Anselms School, St Bartholomew's school, St Michael and St John School and the one High School are almost at capacity now. The planning area of Whitworth will show a limited number of places remaining across schools in that planning area If local schools are unable to meet the demand of a new development there is the potential to have an adverse impact on the local community, with children having to travel greater distances to access a school place. (Rossendale Infrastructure Delivery July 2017) One GP Surgery, one dentist, one road in and out of Whitworth, schools oversubscribed, I feel this ELP does not show how Sustainable Development (SD) will be achieved. It does, however, show how Rossendale rate revenue will be increased. I believe as community members we have a duty to preserve our open spaces and not allow them to be removed from the Greenbelt to justify a Whitehall need, rather than the needs of Whitworth people for better and improved Services. Without improvement to the existing infrastructure in Whitworth, this Emerging Local Plan will increase problems not reduce them.</p>

1684	Amanda	Calderbank			Object	<p>I am writing to you today to object about your future planning of houses around Tonacliffe Way and Horsefield Avenue.</p> <p>I have lived in this house with my husband for 24 years and we have raised our three children here.</p> <p>I am quite shocked and very upset that you are even thinking about building houses on this area of moor land you may not be aware of the wildlife that lives behind my home and you are going to destroy all of this.</p> <p>Firstly I would like to point out to you that the land behind my home is moor land. We are very lucky to back onto the moors and as such we get to see all the wildlife that live here we see family of Foxes to Badges, Deer with their young fawns Birds of prey, Rabbits, Birds and Bats.</p> <p>Yet again this year we have had the privilege of watching a Vixen with her fox cubs seeing these little cubs grow up with love and care of their mother watching these little cubs running around playing with each other and even explore their surrounding while we have been watching them they have stopped playing and then watch us as we watch them this Vixen has come back year after year to use the two same dens.</p> <p>Secondly the School here at Tonacliffe does not have the capacity for more houses as we already struggle with the amount of traffic that come up and down Tonacliffe Way. Please find attached photos that I have taken on a normal School day. These pictures are taken at 3.30 pm when Tonacliffe School closes. As you can see people have no regard for us residents who live here and on numerous occasions I have had my drive blocked by parents going to collect their children. Over the last few years this situation has got worse even when the community police come up nothing seems to get done. I have missed several appointments for my children and I due to parents being selfish and blocking the entrance to my drive and I have been unable to get out please feel free to come and take a look for yourselves it is utter madness on a daily basis and you want to make it ten times harder.</p> <p>Thirdly during the wintermonths the ground behind my home can get very water logged and there are patches of marsh land we even have water coming off the moors on a daily basis which then runs straight down Tonacliffe way. If you were to build houses behind my house I would no longer have a back garden but a pond!!!!</p> <p>If you were to build these houses where would all the children go to School as Tonacliffe Primary and Whitworth High School are already at the full capacity. Do you have plans to build New Primary and Secondary Schools to cater for all these children if so where are you going to put these buildings?</p> <p>My husband and I bought our house here because we fell in love with surrounding moor land. We have been very fortunate to have let our children grow up with wonderful memories of playing outside on the moors for hours on end making dens having picnics out on the</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
						<p>rocks and under the trees. As a mother you always want the best for your children so letting them play outside where I could see them all the time was very comforting. I knew they were safe many of our extended families have come to our house over the years and said how lucky we are to have this on our door step I see lots of children from around the estate playing out on the moors are you really going to destroy all of this beauty just so you can make a profit.</p> <p>I also think that you should re think about putting houses on this land due to the mine shafts that are here. Is the ground safe if you start digging it up are you going to open up holes in ground.</p> <p>We have a dog who enjoys playing and going for walks outside on the moor we often see people who are dog walking ramble's horse riders enjoying the surrounding countryside where all the wildlife live there are flowers plants and trees here.</p> <p>Please stop and consider what damage you will cause if you do go ahead. Where will all the wildlife go? Our homes already feel like a prison at school time and it will be like running a gauntlet just going to work and carrying out our everyday lives.</p>		
1748	M C	Reed			Object	<p>Rossendale Borough Council's forward planning for potential new housing on the above site in particular does not seem to take in the fact that access would be extremely poor and would cause immense problems in an already congested area. Tonacliffe Road is always busy, particularly during the hours which accommodate commuting to and from work or school. Also it is badly maintained and is constantly plagued by water pipe burts.</p> <p>The proposed building land above is inhabited by wildlife and in the past has been proved unfit for building due to bad drainage. Also, our landscape would be ruined.</p> <p>The actual main road - market Street - is the only access into Rochdale or Bacup and the road itself is already extremely busy, hence the amount of "Yellow boxes" in an attempt to control traffic.</p> <p>Whitworth is a busy village with very few facilities as it lies on the cusp of Rossendale. We already have oversubscribed schools and medical services, surely with such stretched amenities do we require more housing in all the proposed areas?</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.109	Further comment
1820	Kelly	Holt	Lancashire County Council		Not Applicable	TONACLIFFE, WHITWORTH - HS 2:106 and 109 – The sustainability of the sites is considered to be low and improvements to the pedestrian and cycle links would be required. There are ongoing concerns on Tonacliffe Road raised by the residents in relation to vehicle speeds and therefore mitigation measures to reduce vehicle speeds in accordance with the speed limit may be required. The sites could be deemed acceptable subject to a design which is in accordance with Manual for Streets which provides maximum permeability and loop roads for multiple vehicle access points off the adopted highway network, rather than extensions of cul-de-sacs.

739	Edward	Oldham			Support	I write on behalf of our client Edward Oldham who owns the above site as identified on the South West Policies Map within the Rossendale Draft Local Plan. My client fully supports the proposed allocation of the site for residential development. The site is 'deliverable'; it is available for development; it offers a suitable location for housing development; residential development on the site is viable and housing could be delivered on the site within five years. The factory has been vacant since December 2015. It has been actively marketed since that date. No firm interest or offers have been made for the site as a going concern. As such we do not consider that it is appropriate to continue to retain the land in employment use. As you are aware a planning application (ref. 2017/0290) for residential development has been submitted for land, within the proposed allocation, to the south of the river Ogden. This demonstrates the availability and deliverability of the site.		
950	Stuart	Thompson	None	SHLAA16278	Object	The site and volume of housing proposed will dramatically increase the burden on local site infrastructure such as schools, healthcare, road infrastructure. - - Lancashire County Council have already stated that the funding available to further develop these type of services are scheduled to be cut, not increased, in the coming years. This will lead to an unmanageable overload and therefore a deterioration in educational and health provision to the current population which would be significantly exacerbated should the population increase. - - A demonstration that funding will be available and all additional support services will be developed/improved from their current condition needs to be clearly stated by local, county and central governing bodies. - -		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.110	Further comment
1367	Nicola	Hardman	-		Object	<p>I am writing to put forward my objections to the proposed property development in Helmshore. - - I will address each of the sites separately below however my overall concern which applies to all of the proposed development sites in Helmshore is the lack of services, infrastructure, and erosion of valuable green space. - - Look at an aerial picture of Helmshore 'village' in 2017. Can this once beautiful village really be classed as a village anymore? There is hardly any green space with housing having been allowed to be crammed into every available space and Helmshore is no longer distinguishing from Haslingden. - - You refer to the government white paper, encouraging higher density 'where appropriate'. How can the destruction of a small village be classed as appropriate? - - Does anyone in the council commute outside the valley for work? Particularly the m66? You are encouraging the move to the countryside (cheshire based property developers at the Loom development) yet it is not reasonably possible for anyone who values family life and their time to commute to and from Manchester anymore with this journey now taking approx 90 minutes each way and the roads unable to cope. - - You address the serious concerns about the m66 and the m60 which are virtually gridlocked but do not propose any solutions. This is merely an afterthought. How you can even consider the building of so many new homes 'encouraging higher density' without addressing the lack of infrastructure and the gridlock is negligent. The travel issue such as re-opening the railway should be the starting point. - - No mention is made in the report of building extra schools or how Helmshore will cope with an influx of local residents when schools are already over subscribed with some people resorting to pay for their children to attend primary school due to be offered unsatisfactory schools outside of the area they reside. Again this should be a starting point. - - The lack of green space in the urban area of Helmshore is particularly sad for future generations. Yes, Helmshore is surrounded by beautiful hills, but is this a reason to remove all the green space within the 'village' itself and turn this into a concrete jungle? - - To turn to the particular proposed developments; - - HS2 76 SNIG HOLE - - one of the more beautiful areas of Helmshore opposite the memorial park is at risk. See your policy HS5. This would have a clear impact on local character and appearance. - - Very close to one of the only green spaces where all the children in Helmshore are squished in the park to play. Development here is not safe. - - - HS2 710 IRWELL VALE MILL SITE - - this is an area that floods already - - Irwell vale has one road in and out without a proper footpath. Not safe for anyone on foot. - - another beauty spot being ruined. - - the affect on wildlife. - - I fail to see why any green belt should be released to meet the 'housing requirement'. Planning for future generations should require saving greenbelt, not amending urban boundaries as suits and developing other areas of brownfield or other less developed areas of rossendale. The ratio of what is being proposed in</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	HS2.110	Further comment
						Helmshore is grossly out of proportion with the size of the village. - - It's shameful that these developments are even being proposed and I assume that the council knew this given that the documented - Proposal does not have the confidence to clearly define the proposed building in 'Helmshore' in the contents and attempts to sneak these developments in under vague headings. Perhaps the council was aware of the upset anticipated from local residents. - This speaks volumes. Do you want your legacy to be ruining Helmshore for the future? -		
1439	Antony	Wild	-		Object	Any development at Irwell Vale will require the provision of a new access road. As a former resident, the current access past the sewage farm is dangerous because there is no footpath. The road is initially very narrow and scarcely allows two cars to pass. If this is a serious development, then road widening or alternative access routes (Hardsough Lane?!!) need implementing.		What happened to the Green Belt and using up Brown Field sites first (instead of sanctioning M&S and the myriad of other supermarkets)? - -
1777	Adam	Brennan	United Utilities		Not Applicable	HS2.110 – Inner Vale Mill Site The site in question is located next to Rossendale Wastewater Treatment works. There is also pumping station located within the site and it may be more appropriate to consider the new location of development and reduction on future residential amenity in terms of being located close to an asset. We would ask any future developer(s) to contact us to explore options for addressing this as early as possible.

DRAFT LOCAL PLAN POLICIES

Chapter 0: Delivering Sustainable Development

Reference SD1 Presumption in Favour of Sustainable Development

1473	K	Howieson	C/O Agent		Support	<p>3. DRAFT LOCAL PLAN POLICIES</p> <p>POLICY SD1 PRESUMPTION IN FAVOUR OF SUSTAINABLE DEVELOPMENT</p> <p>3.1 This policy is in line with the Framework and supports sustainable development in accordance with the Local Plan, unless material considerations indicate otherwise. In addition, where policies are out of date or irrelevant the Council will grant permission unless material considerations indicate otherwise, taking into account any adverse impacts that would demonstrably outweigh the benefits or any specific policies in the Framework that indicate development should be restricted.</p> <p>3.2 This policy is supported as it is directly in line with the Framework.</p>		
------	---	----------	-----------	--	---------	---	--	--

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD1	Further comment
1592	Warren	Hilton	Highways England		Not Applicable	<p>The Draft Local Plan makes reference to the NPPF and that a core theme within the Framework is a presumption in favour of sustainable development. It states that the Council will therefore proactively seek opportunities to meet the development aspirations and needs of Rossendale. The Local Plan also states that the document contains policies that follow an approach in favour of sustainable development.</p> <p>The Policy recognises this, stating the following: ‘The Council will always work proactively with applicants jointly to find solutions which mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area’</p> <p>Furthermore, the policy adds: ‘Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision then the Council will grant permission unless material considerations indicate otherwise’</p> <p>Key Point: The Council recognises the importance of Sustainable Development as identified within the NPPF and it will work proactively to ensure that such developments are delivered within the Borough.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD1	Further comment
1781			Rossendale Civic Trust		Support	<p>Policy SD1: Presumption in Favour of Sustainable Development</p> <p>When considering development proposals the Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the national Planning Policy Framework (the Framework). The Council will always work proactively with applicants jointly to find solutions which mean that proposals can be approved wherever possible, and to secure development that improves the economic, social and environmental conditions in the area.</p> <p>Planning applications that accord with the policies in this Local Plan will be approved without delay, unless material considerations indicate otherwise. Where there are no policies relevant to the application or relevant policies are out of date at the time of making the decision then the Council will grant permission unless material considerations indicate otherwise, taking into account whether:</p> <p>a) any adverse impacts of granting permission would significantly and demonstrably outweigh the benefits, when assessed against the policies in the National Planning Policy Framework taken as a whole; or</p> <p>b) specific policies in the Framework indicate that development should be restricted.</p> <p>RCT supports SD1 subject to amendment to definitions of sustainable development in 2011 Core Strategy and NPPF 2012, and prefers these: Resolution 42/187 of the United Nations General Assembly defined sustainable development as meeting the needs of the present without compromising the ability of future generations to meet their own needs. The UK Sustainable Development Strategy Securing the Future set out five ‘guiding principles’ of sustainable development: living within the planet’s environmental limits; ensuring a strong, healthy and just society; achieving a sustainable economy; promoting good governance; and using sound science responsibly. Not just a lot of low density “aspirational” housing”. Nor now demolished free grant money projects such as Blackburn’s Waves Leisure Pool that followed the 1981 riots.</p>

1789	Jackie	Copley	CPRE		Not Applicable	<p>Policy SD1: Presumption in Favour of Sustainable Development</p> <p>6. CPRE Lancashire is pleased to note that when considering development proposals the Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the National Planning Policy Framework (NPPF). Environmental factors must be considered in balance with economic and social ones.</p> <p>7. The absence of a definition for sustainable development in the NPPF is a glaring omission, and we recommend that this deficiency could be rectified by the inclusion of one, in the local plan. We follow the Brundtland Commission, 1987 definition: "Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs". It contains two key concepts:</p> <ul style="list-style-type: none"> • The concept of "needs", in particular the essential needs of the world's poor, to which overriding priority should be given; and • The idea of limitations imposed by the state of technology and social organization on the environment's ability to meet present and future needs."

1790	David	Trivett			Not Applicable	<p>I appreciate the opportunity to comment on the July 2017 Local Plan Written Statement (Regulation 18 Draft) and submit the following for consideration. Although the draft plan encompasses the entire borough I have limited my comments to the proposals I consider will affect our immediate locality in and around the Bacup and Stacksteads area.</p> <p>I have several areas of concern about the proposals within the draft but will focus on those I consider most important for the future.</p> <p>Policy SD1: Presumption in Favour of Sustainable Development</p> <p>I understand sustainable development means: Development that meets present needs without compromising the ability of future generations to meet their needs.</p> <p>With consideration to some recent planning decisions made by the council I have serious concerns about the statement on page 4 of the draft:</p> <p>“Planning applications that accord with the policies in this Local Plan will be approved without delay, unless material considerations indicate otherwise.” and page 5</p> <p>“approve development proposals that accord with the Local Plan without delay; and</p> <p>Where the Local Plan is absent, silent, or relevant policies are out-of-date, grant permission unless:</p> <p>any adverse impacts of doing so would significantly and demonstrably outweigh the benefits, when assessed against the policies in the Framework taken as a whole; or</p> <p>specific policies in the Framework indicate the development should be restricted.”</p> <p>My interpretation of the presumption in favour of sustainable development is; a small group of elected, lay person, representatives make decisions which will have a long reaching effect on future generations with regard to the local environment, finances and their future wellbeing.</p> <p>As with this exercise I appreciate planning notifications are issued and consultation events are organised. However, I believe a large proportion of the populace are too busy living their daily lives to take note of some of the proposals which could affect them; other than those highlighted in the media. Recent claims that some individuals were too scared to voice an opinion on the £2 million Bacup Town Heritage Initiative and comments that a majority of people are in favour of the first, now rejected, public realm initiative scheme are examples of the manner in which some major decisions are managed. If no objections are raised the presumption is then made in favour of the proposal. This concerns me.</p> <p>The fact that some individuals are not aware, are too busy to respond to what is happening around them, or consider there is no point in objecting because; it won't make any difference to the decision, frustrates me greatly. Hence my</p>

Reference	SD2	Urban Boundary and Green Belt						
8	Lorraine Butler	-	Green Belt Parcel Ref 74	Object		<p>I object to the application of Land Parcel Ref 74 to be allocated as a "sub area with potential for release" as I strongly believe it should remain within the designated Greenbelt boundary as is currently defined. The vast part of the land that has been assigned for potential release is farm land that is currently used for agricultural purposes for the feeding of livestock and therefore releasing this land would have a significant impact on the openness of the green belt area and encourage urban sprawl. - - Releasing this Parcel of land would blur the lines between Greenbelt and urbanisation of the village of Whitworth and would allow the encroachment of developments on to the current Greenbelt, releasing this land will allow for further applications to made for further Greenbelt areas. - - Over the last two years there have been several planning applications made for a detached house to be built on the Northern part of the land that you have earmarked for potential release. However both the local authority and the Government Building Inspectorate have dismissed planning due to the fact that there is a clearly defined boundary that separates the urban area of the village and the current greenbelt. Releasing this land will mean that there is no longer a clearly defined boundary. - - The historical houses situated within the Greenbelt have been here for nearly 300 years and releasing this land would have a significant impact on the visual amenity and openness of the area.</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
93	Norman	Crook	-	SD2 Proposed urban area boundary at Blackwood Road Stacksteads	Object	Whilst the urban area boundary should include land to the north and south of Blackwood Road, Stacksteads to include housing allocation HS2.24, the boundary should be extended to include a wider enclave incorporating existing housing and to connect more logically to the main existing urban area. This will provide a more defensible long-term urban area boundary. - - (A Plan showing the suggested urban area boundary accompanies the original representation seeking the allocation of land at Blackwood Road in response to the 'Call for Sites')		No. - - If further information, clarification or explanation is required, please do not hesitate to contact the Agent.
432	Antony	Greenwood	-		Object	This land, which is currently designated as Green Belt is being proposed to be Countryside in the current emerging Local Plan consultation. I would like this land to be brought into the Urban Boundary. There is much development going on at New Hall Hey on the other side of the motorway and changes to the Urban Boundary currently being considered are only about 3 fields away. Letter received at Bacup Roadshow (14/09/2017): I would like this to be included in the new Urban Boundary please. Please see appendix for attachment.		-
477	Sadaqut	Amin			Not Applicable	Thank you for your email. After carefully viewing the Haslingden proposals it has led me to question what is exactly meant by the 'proposed urban boundary' and is there any chance you can send the original map with streets to view what changes are actually made. My general assumption is that when it states 'proposed urban boundary' it implies residential area but there seems to be some areas which are marked on the outskirts of such proposal so therefore could disadvantage some residents. My specific enquiry is in relation to the proposed urban boundary which runs through Rake Foot but fails to acknowledge the residential area on Rock Hall Road (see attached). As a resident of this area can you offer some insights about why this is and if these proposals are accepted what are the implications for any future building, planning etc... if it's in the outskirts of the urban boundary? I hope to hear from you soon. Thanks		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
527	John	Howat	N/A	Land at Marl Pits	Object	<p>Observations on Proposed Local Plan for Rossendale. - - Having viewed the 2017 proposed Local Plan for Rossendale and discussing it with a member of the Planning Department at a recent local consultation meeting on Thursday 7th September, I feel obliged to make the following objections and following observations. - - Access. - There appears no have been no consideration of the extra traffic that the proposed developments will generate. From a personal point of view I am particularly concerned by those schemes in Rawtenstall, some requiring extending the Urban Boundary into the countryside, that are contiguous with and likely to be accessed from Newchurch Road. Principally these are: - - Dark Lane Football Ground, HS2.82 (58 Houses). - St Peters Road, Newchurch, HS2.86 (9 Houses). - Johnny Barn Farm, HS2.53 (30 Houses). - Land east of Johnny Barn Farm, HS2.54 (105 Houses) - Higher Cloughfold, HS2.58 (7 Houses). - West of Dobbin Lane, HS2.54 (27Houses). - Land at Conway Road, HS2.57 (5 Houses). - Land between Newchurch Road & Bacup Road, HS2.54 (55 Houses). - Hurst Platt, HS 2.56 (8 Houses). - Peel Street, Clough Fold, HS 2.84 (8 Houses) - - In addition the plan shows a proposal that Urban Boundary behind Marl Pits be moved north to Balladen Clough and although no actual figure or HS reference is given, a figure of 55 houses has been quoted informally in the past. - - Permission has recently been granted for two houses outside the existing Urban Boundary, in a greenfield site, (2015/0308). Although it appears that there is no intention to move the boundary to accommodate them. - - Potentially therefore there are 369 new houses planned that will have their main access via Newchurch Road. Assuming that each household has two cars (738 cars) each making just one trip out and one trip back each day (1476 daily journeys) for 323 days a year (allowing for six weeks holidays) this will be a minimum of 476,748 new car journeys along all or part of Newchurch Road each year. In addition there will be journeys generated by visitors, deliveries and services such as refuse collection. Newchurch Road, downhill from Marl Pits to Rawtenstall, will become exceptionally busy; entrance and exit from Union Street already difficult, will become virtually impossible; an intolerable situation. - - As long as I can remember (30 years or more) there have been problems with access to and from Chapel Hill via the Union Street /Newchurch Road Junction. In 1993, at the public enquiry into objections to the then proposed District Local Plan, it was noted that Rossendale Borough Council considered that Union Street was unsuitable and there were "... severe highway problems in the area" and "... that no additional traffic at all should be allowed to aggravate the situation". The Inspector, Mr D. Gill, added a comment to his ruling on Urban Boundary changes in the area, "... that the present arrangement (for traffic) is certainly below standard". - - None-the-less, over subsequent years, RBC has sanctioned further developments in the area including the making of a rear entrance to Alder Grange School with access via Union Street, which at</p>		I have not commented on individual sites as it is the effect that the sum of these sites will have on the traffic on Newchurch Road that is my concern.

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>peak periods has worsened the situation considerably, both for pedestrians using the narrow pavements and vehicles dropping off or collecting children. -</p> <p>There are real problems with access from Newchurch Road up Union Street onto Hurst Lane and onwards onto Chapel Hill. Union Street is a steep hill with residents parking which only allows one-way traffic the majority of the time. It is treacherous in winter conditions and at times only four-wheel drive vehicles can ascend; descent too can be extremely awkward when the road is icy. - -</p> <p>The exit from Union Street on to Newchurch Road has become increasingly difficult, as traffic has inexorably increased. There is limited visibility to the east and the road the west it is compromised by the bus stops on both sides and cars parked outside the convenience store. The latter obstruct the carriageway causing vehicles leaving Union Street and turning down Newchurch Road to travel some distance on the wrong side of the road, at times in the face of oncoming traffic. Cars entering from Newchurch Road are often blind to vehicles descending Union Street and this results in awkward maneuvering, with traffic on the main road impeded by cars waiting to ascend Union Street as a result. This is a particular problem for those cars entering Union Street from the east. - - - The single track available at the bottom end of Union Street as a result of residents' parking, can be blocked by vehicles which stop half way up to unload passengers or goods. In recent years large lorries connecting with the conversion of the redundant public house, The Old House at Home, to housing and the (apparently never-ending) construction of the eight new houses behind Hurst Platt have added to the chaos at the bottom of the street as they negotiate the tight junction between Green Street and Union Street (often in reverse) or on to Newchurch Road.</p> <p>Newchurch Road is increasingly busy and joining it from Union Street is often very difficult, especially if traffic is backed up from the pedestrian crossing and traffic lights at the Rams Head/St Mary's Way. Frequently one is reliant on a good-natured driver giving way. - - There is real concern amongst the residents in Waingate that Fire, Ambulances and other emergency vehicles would at times be unable to reach their destination expeditiously. - - There are no alternative routes onto Chapel Hill. The continuation of Hurst Lane from the top of Union Street down hill to Newchurch Road is little more than an alley, a very narrow single track with no pavements. It cannot be considered as an adequate substitute for Union Street except in the occasional emergency. Only cars can use it. Waingate Road is no longer suitable for vehicular traffic. - - It would appear from planning application 2015/0308 that Lancashire County Council do not see a problem with the traffic on Newchurch Road and Union Street and access to properties on Chapel Hill. It is clear that none of their officers have lived in the area and to my knowledge no one has spoken to the residents. If they had, I suspect they perhaps would hold a different view. It seems that in allocating the various areas along Newchurch Road for extra housing in the Local Plan, there has been neither</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
----	-----------	---------	--------------	-----------------	-----------	---------	-----	-----------------

recognition of the problems of Union Street nor consideration as to how they may be alleviated. - - A traffic census was seen to be carried out a few years ago but as it was during half-term, when there was no school traffic, its value therefore must be in doubt and of course it did not take into account those changes that will ensue should the current Local District Plan come to fruition along Newchurch Road as proposed. Should, as was intimated during the consultation meeting I attended, a further study on traffic in Rawtenstall be commissioned, can I urge you to involve to the residents of Waingate, Hurst Lane, Hurst Crescent and Union Street as part of the study? - - Facilities. - Other than to permit a surfeit of supermarkets, RBC appears to have given no consideration to the infrastructure required to support any major increase of housing/population. General Practice surgeries are struggling with the current patient demand and attracting Doctors into existing practices to fill vacancies proves very difficult. Recruitment to new practices is impossible. Currently there are insufficient Medical graduates choosing General Practice as a career. There is also dearth of NHS Dental Surgeries and it may necessary to travel out of the Borough to register for NHS treatment. There appears to be no possibility of extending existing primary or secondary schools nor is there the finance to build new ones. - - Alternative Sites and Uses. - In general I object to the use of greenfield sites to accommodate additional housing. There appears to be no map or register of brownfield sites, which should be completely replaced by residential schemes before any consideration is given to extending the Urban Boundary to provide building land. There are several large redundant buildings which should be sympathetically converted to residential use as apartments as has been done elsewhere both in Rossendale and neighbouring towns and cities. Examples include the old cinema on Bacup Road, vacant and available for many years. It should be converted, with compulsory preservation of the external structure, to two floors of apartments and the ground floor used for residents' parking. Similarly, St John's Church, Crawshawbooth, recently on the market, would make a fine block of flats. The abandoned Kwiksave/Poundland store by the railway station should be demolished and the site made available for new housing. It is not needed for an out of town retail site. - - The plan to move the Urban Boundary at Marl Pits should be abandoned. The area is crossed by a well-used and much-loved rural footpath which would be lost if it was subsequently urbanised. In any case the land at the west end of the plot slopes steeply to the brook and is unsuitable for building. There is currently no vehicular access to the area unless the RBC is to allow it through the Marl Pits car park, which would be unacceptable. A possible alternative use for this land, maintaining its greenfield status, would be as a campsite for tourists, with hard standings for touring caravans and pitches for tents. A dedicated domestic block close to the leisure centre would be acceptable; access could be through the leisure centre car park. An administrative office could be

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						established in the leisure centre itself, or as part of the domestic block. This type of facility is sorely needed in Rossendale if, as the RBC professes, the tourist industry is to be promoted and developed. The campsite could be administered and promoted as part of the Leisure Centre. - - Suggested Action. - I am well aware of the pressure applied by Central Government to the RBC to provide affordable and new dwellings. However, now that the target has been reduced by approximately 50% to 2,100, I urge the Council to abandon any proposals for land outwith the Urban Boundary and concentrate development on redundant buildings, brownfield and other former industrial sites. - - 19th September 2017 -		
562	Phillip	Byrne	-	RCGL (UB) 11 - Lives and Landscapes July 2014	Object	There are material considerations that demonstrate this change to the urban boundary is counter-indicated. - 1. Grade 2 listed Church of St Mary and All Saints - This is a site of cultural value for which the setting must be maintained per Part (2) of section 16 and Part (1) of section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990. The proposed change to the urban boundary would significantly affect the setting of this important, graded local building. - 2. Residential amenity - The effect of building high density housing in the proposed area would have an adverse impact on the character of the neighbourhood and on the residential amenity of neighbours. Adjacent properties are substantial, detached properties with good spacing and ample grounds and these new houses would be very much out of place. - 3. Road Safety - Whilst accepting there will be a thorough and detailed Road Safety Audit, the fact is that more buildings equals more cars. Any development would adversely affect highway safety by creating conflicts between pedestrians, cyclists and vehicular movements, given the poor provision of parking and pavements along the single-track road that is Goodshaw Lane. The lane is accessed by children on their way to and from Crawshawbooth Primary School, the attached recreational area and the outdoor classroom. Additionally, increased traffic will exacerbate current access problems for Goodshaw Lane, making it difficult for emergency services. - 4. Core Strategy Development Plan Document: The Way Forward (2011 - 2026) - This document states that housing will be focussed on Rawtenstall with no major development in Goodshaw and that the integrity of existing open spaces will be maintained. Further it states that walking and cycling improvements in Goodshaw will offer improved countryside access. Changing the urban boundary to facilitate additional development contravenes these commitments. - 5. Creation of Precedent - Moving this area of countryside within the urban boundary to allow a development will make it difficult to refuse similar developments on similar sites, as a precedent will have been created, irrevocably changing the overall character of the area.

571	Andrew	Ellis	-	RCGL(UB)11 /SHLAA16196	Object	<p>The proposed urban boundary change will only encourage more building on the east of Goodshaw Lane which will increase traffic flow on a dangerous narrow partially steep and blind-cornered lane. The lane is used recreationally by lots of people (walking, cycling and horse riding) - as it is a refuge from Burnley road, scenic and a pleasant area to use. I don't feel that your assessment of its recreational value has been fully ascertained i.e. at weekends, especially during fine weather, it is a very popular walk, cycle and horse riding route. Many children (and parents) use the lane to walk to Crawshawbooth primary, again to avoid a busy road and enjoy the rural nature the valley. I can find no evidence that any assessment of the lane's use at these high use times has been conducted. The high level of traffic caused by other local attractions / services (Church and local children's nursery on Goodshaw Avenue) have a large impact at key times. Moving the urban boundary to ultimately facilitate house building (by landowners who do not live in the valley) would not only increase traffic but would massively reduce the quality of the natural environment for local people now and in the future, i.e. walking through a housing estate on a dangerously narrow road would be yet another way to erosion of the quality just to facilitate a larger population. Given the marginal gain in potential housing land and the impact on the natural environment and landscape, I would urge you to keep the urban boundary as it is and therefore discourage any further development along Goodshaw Lane.</p> <p>The proposed urban boundary change set out in in the local plan part 2 (RCGL(UB)11 - Land south of Goodshw Chapel and opposite St Marys and All Saints had a sustainability appraisal. The new proposal document has further moved the urban boundary into more</p>		I do feel that you have have tried to make documents and information available to the public but the sheer scale of the proposal has meant that changes proposed to the urban boundary have become obscured and confusing.

573	Jessica	Dougherty	None		Object	<p>I would like to oppose the proposal concerning Policy Ref: RCGL(UB)11/SHLAA16196; Site Location: Land south of Goodshaw Chapel and opposite St Mary's and All Saints for the following reasons: 1. Changing the urban boundary from its current position (centre of Goodshaw Lane) would mean increasing the likelihood of future development and housing. This will exacerbate further the significant access issues on this quiet and narrow lane. Certainly, the existing highway infrastructure is highly unsuitable to serve as a means of access to any further development proposals. 2. In addition, the local land form is such as to make residential development here, regardless of form or layout, overbearing and intrusive in character and allocation of this land would involve development on a visually prominent site, clearly visible from adjoining roads and footpaths. Goodshaw Lane is of significant recreational importance to the countryside, as a greenfield area which has several public rights of way. Families with young children, horse riders, walkers, cyclists and runners all frequent the lane as it an important and peaceful refuge from the increasingly busy Burnley Road. School children and walking buses from Goodshaw Primary are also frequent users. 3. Further, I strongly oppose the later changes proposed as it dramatically increases the extent of the boundary change immediately south of Hawthorn Farm Cottage from the previous proposed boundary change in prior to 2015 which only encompassed the paddock immediately adjacent to Goodshaw Lane on the east side. It is our understanding that this seemingly arbitrary extension of the original proposed urban boundary change had not been subject to a 'Sustainability Appraisal' at all – your previous ref: RCGL(UB)11. Additionally, this new proposal for the boundary change was actually made prior to the most recent site survey which has taken place, dated 7th June 2017. Reading this document, it appears to greatly underestimate and under play the impact of any development on the natural environment and biodiversity; on heritage assets (St Mary's and All Saints Church & Goodshaw Chapel) and its setting; the capability of sustainable development; and any adverse impact on local views and viewpoints. 4. While the original proposal for alteration of the urban boundary included land east of Goodshaw Lane that had been previously developed, this minimal housing development had been fully demolished and the land fully cleared from buildings of any kind since the 1960s. Since then the paddock in question has been returned to grazing. However, the further substantial shift in the proposed urban boundary in the most recent document (June 2017) would mean that even more land designated as valuable greenfield countryside and currently used for grazing and hay production would be potentially lost. This hay meadow does provide habitats for wildlife and its loss would likely result in deterioration of biodiversity, wildlife refuge and valuable feeding areas (including bats). The additional field in question has never been used as housing, and is currently</p>		-

						<p>classed as countryside, which, in our view, dramatically weakens the case for moving the urban boundary across this area. 5. Additionally, due to the omission of this land from the original appraisal prior to 2015 (and subsequent arbitrary inclusion), as stated earlier, we feel that the validity of the consultation process has again been called into question as potential objectors may not be aware of this major shift in the proposed urban boundary in Goodshaw Ward and this has not been sufficiently been communicated. 6. We are also concerned as to the reasoning behind this substantial proposed erosion of countryside and its centring only in this specific location to the east of Goodshaw Lane and are genuinely confused as to why this should be the case when other such substantial shifts have not been proposed elsewhere along Goodshaw Lane south of St Mary's Church. In addition, I am concerned that this may create a worrying precedent which could potentially lead to further housing development in Goodshaw Ward. It is notable that the only proposals to move the urban boundary in the area have actually come from the landowners themselves who do not actually live in the valley. Clearly, any movement of the urban boundary to include their land would benefit them individually in terms of land price and potential development opportunities. However, I believe that the negative impact on the local community and the environment in the immediate and long term as outlined above should be the primary consideration in this case. If you require any further information or clarification, please do not hesitate to contact us. I look forward to your response in due course.</p>

596	P	Byrne			Land South of Goodshaw Chapel and opposite St Marys and All Saints Church	Object	Further to the publication of your draft local plan presentation thereof, I would like to formally put on record my objection to the following proposal contained therein: Land south of Goodshaw Chapel and opposite St Marys and All Saints Church This change proposes taking land from the countryside and bringing it into the urban boundary, to enable it to be developed in the future. There are a number of material considerations that illustrate the need for this change to be reconsidered and I strongly urge that you do based on the following: 1. Grade II Listed Church of St Mary and All Saints A church has stood on this site since 1542, with the current church being built in 1829. This church is a site of significant cultural value for which the setting must be maintained. The church currently enjoys a Grade II listing, per the Listed Buildings and Conservation Areas Act 1990 and confirmed by the Historic Buildings and Monuments Commission for England. This listing ensures that the church is of special interest, warranting every effort to preserve it and its settings. Specifically, Part (1) of section 66 of the Planning (Listed Buildings and Conservation Areas) Act 1990 states, "In considering whether to grant planning permission for development for development which affects a listed building or its setting, the local planning authority or, as the case may be, the Secretary of State shall have special regard to the desirability of preserving the building or its setting or any features of special architectural or historic interest which it possesses". The proposed change to the urban boundary to enable development would have the potential to significantly affect the setting of this important, graded local building. Further it would detrimentally affect the amenity value provided to those parishioners who use this church, which is now the sole remaining Church of England place of worship for the parish. 2. Residential amenity The stretch of Goodshaw Lane from St Mary and All Sainsts Church to Crawshawbooth primary school has a particular character, exemplified by the size and nature of the houses that have been built there. Over many years, particular care has been taken by the planning officer to ensure new houses, and modifications to old houses, are sympathetic with this character. The effect of building high-density housing in the proposed area would have an adverse impact on the character of the neighbourhood and on the residential amenity of neighbours. Adjacent properties aer substantial, detached properties with good spacing and ample grounds and new, high-density houses would be very much out of place. 3. Road Safety Whilst accepting there will be a thorough and detailed road safety audit, an inescapable fact is that in this day and age, more buildings equals more cars.		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>Twenty high-density houses may well result in as many as thirty additional motor vehicles and there will not be the space to park these cars. The resultant overspill would adversely affect highway safety by creating conflicts between pedestrians, cyclists and vehicular movements. This would be further exacerbated by the poor provision of parking and pavements along the single-track road that is Goodshaw Lane.</p> <p>The lane is accessed by children on their way to and from Crawshawbooth Primary School, the attached recreational area and outdoor classroom. There are many footpaths accessed directly from Goodshaw Lane and walkers journey up and down the lane to get from one path to another. Horses with riders are a daily occurrence. Elderly people resident at Harvey Longworth Court regularly access the lane on foot. None of these will mix well with increased vehicular movements.</p> <p>Additionally, an increase in the amount of vehicles on or around this part of Goodshaw Lane will worsen the already critical problem of access for larger vehicles. Council service vehicles have problems accessing all areas of the land and, at certain times, emergency vehicles simply would not be able to get to where they need to go.</p> <p>4. Core Strategy Development Plan Document: The Way Forward (2011 - 2026) This document states that housing will be focused on Rawtenstall with no major development in Goodshaw and that the integrity of existing open spaces will be maintained. Further it states that Goodshaw and that the integrity of existing open spaces will be maintained. Further it states that walking and cycling improvements in Goodshaw will offer improved countryside access. Whilst the core strategy document will be replaced by the Local Plan once it is formally issued, we assume that these same commitments will be by inherent on the decisions made and direction taken by the planning office going forward. Changing the urban boundary to facilitate major, additional development contravenes these commitments. Brining countryside into the Urban Boundary opposite St Marys and All Saints Church would be the least sympathetic place to do so, if upholding the twin vision of maintaining the integrity of current open spaces and improving walking and cycling access to the countryside is a true aspiration of the Planning Officer.</p> <p>5. creation of Precedent A long-stated aspiration of the Planning Office is to maintain the Urban Boundary for Crawshawbooth as much as between the Burnley Road and Goodshaw Lane as is possible. The area to the east of Goodshaw Lane has always, with good reason, enjoyed protection from development. Many applications for development in that area have, in the past, been refused and potential developers have been told tht there is enough land elsewhere for development.</p> <p>This situation has bit changed and many sites within the Urban Boundary, but</p>		

ID	Firstname	Surname	Organisation	Other Reference	Statement	Comment	SD2	Further comment
						<p>not shown in the draft Local plan, could be identified as sites for development. The government's white paper in February this year called for local councils to focus on identifying and registering such sites and back this instruction by setting up a £1.2B fund to create upwards of 30,000 homes on brownfield land. Moving countryside within the urban boundary to allow development contravenes this government initiative.</p> <p>The action of eschewing government direction and opening up the countryside to new-build developments will have set a precedent and will make it difficult to refuse similar developments on similar sites in the future. The loss of swathes of countryside to the east of Goodshaw Lane is then, just a matter of time.</p> <p>In summary, bringing countryside south of Goodshaw Chapel and opposite St Marys and All Saints Church into the Urban Boundary contravenes both government initiatives and the council's own, stated position. It does so without making a material gain in terms of solving the overall housing problem being addressed by the council. However, what it does achieve is to set precedent and direction that will irrevocably change the nature of countryside in that area and will severely detract from the amenity value enjoyed by residents of and visitors to that neighbourhood. I implore you to reconsider this change to the Urban Boundary and encourage you to build upon the government's initiative and find the equivalent number of houses in the many pockets of brownfield land in and around the Goodshaw area.</p>

598	David	Trick		Hutch Bank Farm, Flip Road, Haslingden	Object	<p>I am writing to seek your agreement to the realignment of the Western Urban Boundary line shown on the draft policies plan in the area known as Hutch Bank, Haslingden</p> <p>I have recently inherited Hutch Bank Farm, Flip Road in Haslingden. I am rather disappointed to see that the urban boundary line in this area remains the same as the previous local plan policies map. Presently the farm and surrounding area beyond St Crispins Way is an eye sore and contributes little to the town. I would like the opportunity to create a sense of place that is likely to be valued. There is definitely the potential to achieve a substantial development with good design.</p> <p>The area itself is strategically positioned for both walking and cycling into Haslingden and is easily accessible to the local highway network</p> <p>I have enclosed, on the next two emails, two sketches that show residential development on the site. By the very nature of the site and its close proximity to St Crispin Way it does seem suitable for small starter homes. To create a sense of place a nature tree screening could be managed and developed along the eastern boundary line as shown. With views above the tree line and across the valley it could potentially be an exciting development.</p> <p>The local infrastructure to service the site is within easy reach and would not adversely affect the highway network</p> <p>Furthermore with good design there is the potential to unlock land to the south that is presently considered as left over space contributing nothing to the local economy.</p> <p>Presently the site falls under countryside in the policies plan. This does nothing to help enhance the region that is sadly lacking nor does it provide an opportunity to change the area for the better</p> <p>Online questionnaire received 25/09/2017: Refer to email under Hutch Bank Farm, Potential Development Proposals</p> <p>Please see attachments in appendix</p>

610	Joyce	Haworth			Object	<p>I have attended this church for more than 60 years and, as number of cars on our roads has grown beyond anything that could have been anticipated, I have seen traffic on the road outside the church increase and the amount of parking space decrease. To allow the building of houses on this piece of land would have the most devastating effect on our church, which has embraced the congregation of St John's in Crawshawbooth since its closure, as well as the area in general.</p> <p>Parking spaces on a Sunday are at a premium and members of the congregation, many of whom are elderly, are faced with having to park some distance away. In addition, the church facilitates many weddings, baptisms, funerals and social events which bring with them a marked increase in cars and people.</p> <p>Goodshaw Lane is very narrow with several 'blind' bends. There are no adequate pavements and scant street lighting. The road is used by young families walking to the nearby primary school and nursery, horse riders, walkers and customers going to the Kennels.</p> <p>The area already has a large amount of houses - council and private, as well as a large sheltered housing complex - and the demands which would be made on services (doctors, dentists, school etc) - in the area would be stretched to its limits.</p> <p>The area and its people deserve to have some open spaces and a safe environment, and this development would contribute nothing to either.</p>		
677	Phil	Ramsden	Lindon Park Development s Ltd		Not Applicable	<p>Policy SD2: Urban Boundary and Green Belt - - It is acknowledged and supported that all new development in the borough should take place within the Urban Boundaries, which are defined on the Policies Map, except where development specifically needs to be located within a countryside location and the development enhances the rural character of the area. - - However, it is imperative that the Council fully undertakes a detailed assessment of sites outside of the defined urban boundary to ensure that all sites with potential or which have a historic planning permission are included within the boundary. Sites that fall within the latter category can have the effect of reducing the overall amount of greenfield land that will need to be allocated for development. - - This is the case with regard to a site off Lindon Park Road, Ewood Bridge, Haslingden which benefits from a historic but implemented and still extant planning permission. The emerging Local Plan proposes the site to be included within a wider zone of Green Belt when it should be allocated for housing development, by reference to its planning history. -</p>

749	Fred	Barlow		Green belt land in Helmshore	Object	<p>It has come to my notice that more GREEN BELT land is to be considered for building on in Helmshore, land off FREE LANE. This land is now allotments. Allotments are part of the amenities of a community and should be kept as such.</p> <p>Haslingden and Helmshore have been walked on enough by Rossendale council planning, our kids still have no swimming pool!</p> <p>I would like to strongly object to these proposals, this land needs to be kept as GREEN BELT.</p>
