485			East Lancs CCG		Not Applicable	View of East Lancashire CCG:- "Both in my role at East Lancashire CCG and more importantly as a local GP, I'm becoming increasingly aware of the impact that fast food outlets are having on the health of the population and many of my fellow health professionals see it as one of the most important health challenges around. The Health profile in Rossendale is very similar to that of the national position, where over a quarter of adults and a third of nine year olds are overweight or obese, many of whom either have or are at risk of developing Diabetes" GP Partner – Dr Mackenzie and Partners and Rossendale Locality GP Lead		
1510	Chris	Holmes	Kentucky Fried Chicken (Great Britain) Limited	Policy R5 bullet points 3 and 4	Object	Kentucky Fried Chicken (Great Britain) Limited (KFC) is committed to working in partnership with government to increase the availability of healthy diet and exercise choices. It agrees with reasonable and fair strategies to increase the availability of healthy diet and exercise choices, but cannot agree with measures, which may be unlawful and simply restrict choice for all members of the public without good evidence of effectiveness. - - The draft policy is not based on any objectively assessed development requirement. It effectively assesses the requirement for hot food takeaways in certain areas as zero, but without regard to baseline levels or any level or distance at which the alleged contribution to obesity is supposed to occur. There is no assessment of how many applications would be refused or the environmental or economic impact of longer journeys and lost jobs. - - There is no evidence of a distance at which the alleged harm will occur or indeed that it necessarily will occur at all, as there is no evidence that hot food takeaways contribute to obesity more than any other land use at which it is possible to purchase or consume food and drink, including coffee shops, bakeries (or, simply, supermarkets) in Class A1, restaurants and cafes in Class A3 or drinking establishments within Class A4. - - The inclusion of primary schools is particularly problematic, as it is clear that children at primary schools are not permitted to leave the premises unaccompanied. Indeed, no account is taken of secondary schools that operate "locked gates" policies at lunchtimes. We suggest that it would be better to focus on ensuring good and broadly equal access to open space, sport and recreation opportunities and on a balanced retail offer.
