

Invitation to provide quotation for the following items:

- Cisco Firepower FPR-1150

The Vendor will monitor and manage Cisco Firepower FPR-1150 Network

Security/Firewall Appliance Qty 2 for availability and performance and alert any issues to the Vendor Service Desk and Rossendale ICT Support team via the dashboard, email and / or SMS. Firewalls will be patched to the latest recommended firmware levels twice a year (unless a serious security vulnerability is discovered sooner). The Rossendale ICT Support team will be consulted prior to firmware patches being implemented to firewalls and any other appliances. All Firewall configurations will be backed up to a central repository every month. The backing up of firewalls and devices fall in to the following 3 categories:

Change management backups

When a device configuration is changed, the running configuration before the change is made is secured, then once the change is complete the updated configuration is secured.

Project backups

As part of a project, when a device configuration is changed, the running configuration before the change is made is secured, then once the change is complete the updated configuration is secured.

Automated / monthly backups

Where a device has the ability to run an automated schedule (such as switches) then this is configuring to run a monthly backup. If the device does not have such functionality (Firewalls), this is undertaken manually.

Vendor will provide remote support as required and changes when requested.

- PRTG Real Time Monitoring & Alerting Service QTY 13 licenses for a range of devices
